Quick Setup

Before using the projector, make sure you read the safety instructions in the online User’s Guide.

Connect the projector
Choose from the following connections. See the sections below or the online User’s Guide for details.

Computer

USB port
Connect the square end of a USB cable to the projector’s USB-A (square) port. Connect the flat end of the cable to any USB port on your computer.

Windows® XP or later
Connect multiple video devices and use the USB Display Installer (flat) port.

Windows® Vista, Windows® 7, or later
You can connect the projector to your network using an Ethernet cable.

Wired network
Connect tablets, smartphones, and other devices that support the MHL™ standard to the HDMI2/MHL port.

Mobile media device
Connect one end of an HDMI cable to the projector’s HDMI1 or HDMI2 port, and the other end to your computer’s monitor port. If you are using a laptop, switch it to external display (see “Troubleshooting”). You can also connect an external monitor, external speakers, or a microphone to your projector to enhance your presentations. See the online User’s Guide for details.

Camera, USB device, or Epson DC-06 document camera
Connect a digital camera, USB flash drive, USB storage device, or Epson DC-06 document camera to the projector’s USB-A (flat) port.

Turn on your equipment
1. Turn on your computer or video source.
2. Plug in the projector. The power light on the projector turns blue.
3. Open the A/V Mute slide all the way.
4. Press the power button on the projector or remote control. The projector beeps, and the Status light flashes blue and then stays on.

Adjust the image
1. If you don’t see an image, press the Source Search button on the projector or remote control. Select Extended and press Enter. Select Language and press Enter. Select your language and press Enter. Press the Menu button to exit the menu system.

2. To raise the image, press the foot release button and lift the front of the projector. Release the button to lock the foot in position.

3. Adjust the image. Select Language and press Enter. The default language of the menu system is English. To select another language, press the Menu button on the projector or remote control. Select Extended and press Enter. Select Language and press Enter. Select your language and press Enter. Press the Menu button to exit the menu system.

4. Turn the focus ring to sharpen the image.
5. Turn the zoom ring to enlarge or reduce the image.

Using the remote control
Make sure the batteries are installed as shown (two AA batteries).

1. To install the wireless LAN module, first remove the screw as shown.
2. Connect the wireless LAN module to the USB-A (flat) port.
3. To configure your projector for wireless projection, do one of the following:
   • If you’re using the optional Quick Wireless Connection USB key (Windows only, part number V12H015M09), press the LAN button on the remote control. When you see a USB and IP address displayed on the screen, remove the wireless LAN module and connect the key to the projector’s USB-A port. Look for the displayed message, remove the key, and connect it to a USB port on your computer. Follow the on-screen instructions to install the driver, then reconnect the wireless LAN module to the projector’s USB-A port. For details, see the online User’s Guide.
   • If you’re not using the key, continue with the steps on the next page.
Quick Setup

Before using the projector, make sure you read the safety instructions in the online User’s Guide.

Connect the projector

Choose from the following connections. See the sections below or the online User’s Guide for details.

- **Computer**
  - **USB port**: Connect the square end of a USB cable to the projector’s USB-B (square) port. Connect the flat end of the cable to any USB port on your computer.
  - **Wired network**: Connect one end of an Ethernet cable to your projector to enhance your presentations. See the online User’s Guide for details.
  - **Component video**: Connect a digital camera, USB flash drive, USB storage device, or Epson DC-06 document camera to the projector’s USB-A (flat) port.
- **Mobile media device**: Connect tablets, smartphones, and other devices that support the MHL™ standard to the HDMI2/MHL port.
  - **Audio cable**: Connect an audio cable.
- **Video device**: Connect multiple video devices and use the Video device button on the projector or remote control to switch between them.
- **External monitor, external speakers, and microphone**: You can also connect an external monitor, external speakers, or a microphone to your projector to enhance your presentations. See the online User’s Guide for details.

Turn on your equipment

1. Turn on your computer or video source.
2. Plug in the projector. The power light on the projector turns blue.
3. Open the A/V Mute slide all the way.
4. Press the power button on the projector or remote control. The projector beeps, and the Status light flashes blue and then stays on.
5. If you don’t see an image, press the Source Search button on the projector or remote control to select the image source.

Adjust the image

1. If your image looks like , you may have placed the projector off to one side of the screen at an angle. Place the projector directly in front of the center of the screen, facing the screen squarely. If you can’t move the projector, use the horizontal keystone slider to correct the image.
2. If you see a blank screen or have other display problems, see the troubleshooting tips on the back of this sheet.
3. If your image looks like , you may have placed the projector off to one side of the screen at an angle. Place the projector directly in front of the center of the screen, facing the screen squarely. If you can’t move the projector, use the horizontal keystone slider to correct the image.
4. Turn the zoom ring to enlarge or reduce the image.
5. Turn the focus ring to sharpen the image.
6. Your projector automatically adjusts images that look like , but if necessary you can press the or button on the projector to correct it.

Using the remote control

Make sure the batteries are installed as shown (two AA batteries)

1. To install the wireless LAN module, first remove the screw as shown.
2. Connect the wireless LAN module to the USB-A (flat) port.
3. To configure your projector for wireless projection, do one of the following:
   - If you’re using the optional Quick Wireless Connection USB key (Windows only, part number V12H015M09), press the LAN button on the remote control. When you see SSID and IP address information on the screen, remove the wireless LAN module and connect the key to the projector’s USB-A port. For details, see the online User’s Guide.
   - If you’re not using the key, continue with the steps on the next page.
4. Attach the wireless LAN module cover and secure it using the screw you removed.

5. Press the Menu button on the remote control, select the Network menu, and press . (for a direct connection to a computer, tablet, or smartphone) or Advanced (for a connection to a router or access point), then press . When you're finished, press to return to the Wireless LAN menu.

6. Choose Network Configuration and press .

7. Select the Wireless LAN menu and press .

8. Choose Connection Mode, press , select Quick (for a direct connection to a computer, tablet, or smartphone) or Advanced (for a connection to a router or access point), then press . When you're finished, press to return to the Wireless LAN menu.

9. If you chose the Advanced connection mode, select SSID, press , and enter your network name (SSID) on the screen that appears.

10. If your network assigns addresses automatically, turn on the DHCP setting. If not, turn off the DHCP setting and enter the projector's IP Address, Subnet Mask, and Gateway Address, as needed. Then press .

11. To prevent the SSID and IP address from appearing on the network standby screen, set the SSDI Display and IP Address Display settings to Off.

12. When you've finished selecting settings in the Wireless LAN menu, press Esc.

13. If you are connecting the projector to a secure network, select the Security menu and press . Then select settings and press Esc when you're finished.

14. Select Complete and press , then select Yes and press again to save your settings.

15. See “Install network software” for additional instructions.

**Project over a wired network**

Follow the steps here to configure your projector for your wired network using the projector's menu system.

1. Plug in and turn on the projector.

2. Press the Menu button on the remote control, select the Network menu, and press .

4. Select the Basic menu and press .

5. Select the Projector Name setting and enter a name (up to 16 characters long) to identify your projector over the network.

   Use the displayed keyboard to enter characters. Press the arrow buttons on the remote control to highlight the characters and press to select them.

   **Note:** See the online User's Guide for information on adding passwords.

6. Select the Wired LAN menu and press .

7. Choose IP Settings and press .

8. If your network assigns addresses automatically, turn on the DHCP setting. If not, turn off the DHCP setting and enter the projector's IP Address, Subnet Mask, and Gateway Address, as needed.

9. If you see a blank screen or the No signal message after turning on your computer or video device, check the following:

   - Make sure the Status light on the projector is blue and not flashing, and the AV Mute slide is open.
   - Press the Source Search button on the projector or the remote control to switch to the correct image source, if necessary.
   - If you're using a Windows laptop, press the function key on your keyboard that lets you display on an external monitor. It may be labeled CRT/LCD or have an icon such as . You may have to hold down the key while pressing it (such as or ). Wait a moment for the display to appear.
   - If you're using a Mac laptop, open System Preferences and select Displays. Click the Arrange tab, and select the Mirror Displays checkbox.

**Troubleshooting**

If you see a blank screen or the No signal message after turning on your computer or video device, check the following:

- Make sure the Status light on the projector is blue and not flashing, and the AV Mute slide is open.
- Press the Source Search button on the projector or the remote control to switch to the correct image source, if necessary.
- If you're using a Windows laptop, press the function key on your keyboard that lets you display on an external monitor. It may be labeled CRT/LCD or have an icon such as . You may have to hold down the key while pressing it (such as or ). Wait a moment for the display to appear.
- If you're using a Mac laptop, open System Preferences and select Displays. Click the Arrange tab, and select the Mirror Displays checkbox.

**Internet support**

Visit epson.com/support (U.S.) or epson.ca/support (Canada) for solutions to common problems. You can download utilities and documentation, get FAQs and troubleshooting advice, or e-mail Epson.

**Registration**

Register today to get product updates and exclusive offers. You can use the CD included with your projector or register online at epson.com/webreg.

**Optional accessories**

For a list of optional accessories, see the online User's Guide.

You can purchase screens or other accessories from an Epson authorized reseller. To find the nearest reseller, call 800-GO-EPSON (800-463-7766). Or you can purchase online at epsonstore.com (U.S. sales) or epson.ca (Canadian sales).

**Where to get help**

**Manuals**

For more information about using the projector, click the icons on your desktop to access the online manuals (requires an Internet connection). If you don't have icons to the manuals, you can install them from the projector CD or go to the Epson website, as described below.

**Telephone support services**

To use the Epson PrivateLine® Support service, call (800) 637-7661. This service is available for the duration of your warranty period. You may also speak with a support specialist by calling (562) 276-4394 (U.S.) or (905) 709-3839 (Canada).

Support hours are 6 AM to 8 PM (Pacific Time), Monday through Friday, and 7 AM to 4 PM, Pacific Time, Saturday. Days and hours of support are subject to change without notice. Toll or long distance charges may apply.
4. Attach the wireless LAN module cover and secure it using the screw you removed.

5. Press the Menu button on the remote control, select the Network menu, and press Enter.

7. Select the Wireless LAN menu and press Enter.

8. Choose Connection Mode, press Enter, select Quick (for a direct connection to a computer, tablet, or smartphone) or Advanced (for a connection to a router or access point), then press Enter again. When you’re finished, press Esc to return to the Wireless LAN menu.

9. If you chose the Advanced connection mode, select SSID, press Enter, and enter your network name (SSID) on the screen that appears.

10. If your network assigns addresses automatically, turn on the DHCP setting. If not, turn off the DHCP setting and enter the projector’s IP Address, Subnet Mask, and Gateway Address, as needed. Then press Esc.

11. To prevent the SSID and IP address from appearing on the network standby screen, set the SSID Display and IP Address Display settings to Off.

12. When you’re finished selecting settings in the Wireless LAN menu, press Esc.

13. If you are connecting the projector to a secure network, select the Security menu and press Enter. Then select settings and press Esc when you’re finished.

14. Select Complete and press Enter, then select Yes and press Enter again to save your settings.

15. See “Install network software” for additional instructions.

Project over a wired network

Follow the steps here to configure your projector for your wired network using the projector’s menu system.

1. Plug in and turn on the projector.

2. Press the Menu button on the remote control, select the Network menu, and press Enter.

4. Select the Basic menu and press Enter.

5. Select the Projector Name setting and enter a name (up to 16 characters long) to identify your projector over the network.

6. Use the displayed keyboard to enter characters. Press the arrow buttons on the remote control to highlight the characters and press Enter to select them.

7. Select the Wired LAN menu and press Enter.

8. If your network assigns addresses automatically, turn on the DHCP setting. If not, turn off the DHCP setting and enter the projector’s IP Address, Subnet Mask, and Gateway Address, as needed.

9. To prevent the IP address from appearing on the network standby screen, set the IP Address Display setting to Off.

10. If you are connecting the projector to a secure network, select the Security menu and press Enter. Then select settings and press Esc when you’re finished.

11. Press the Menu button to exit the menu system.

12. See “Install network software” for additional instructions.

Install network software

Computer

Install the EasyMP Network Projection software on each computer that will project over the network. Use the CD labeled Epson Projector Software to install the program.

For instructions on installing and using your network software, click the icon on your desktop to access the online EasyMP Network Projection Operation Guide (requires an Internet connection). If you don’t see the EasyMP Network Projection Guide icon, you can install it from the projector CD or go to the Epson website, as described on the right.

To monitor and control your projector over the network, download and install the Epson Monitor software and manual from the Epson support web site. You can install a link to the downloads page from the projector CD or go to the Epson website, as described on the right.

Mobile device

To project from an iOS or Android™ device, download and install the Epson Projection™ app. Visit epson.com/projectorapp (U.S.) or epson.ca/projectorapp (Canada) for more information.

Troubleshooting

If you see a blank screen or the No signal message after turning on your computer or video device, check the following:

- To select a number or character, use the arrow buttons on the remote control to highlight it, then press Enter.
- To switch between uppercase and lowercase letters, select CAPS and press Enter.
- To change the displayed symbols, select SYM1 or SYM2 and press Enter.
- When you’ve finished entering the SSID, select Finish and press Enter.
- If you chose the Advanced connection mode, select IP Settings and press Enter.
- If your network assigns addresses automatically, turn on the DHCP setting. If not, turn off the DHCP setting and enter the projector’s IP Address, Subnet Mask, and Gateway Address, as needed.
- To enter numbers, use the arrow buttons on the remote control to highlight a number, then press the Enter button. When you’re finished entering a number, highlight Finish, then press Enter. Press Esc.
- Set the IP Address Display and Gateway Address, as needed.

Where to get help

For more information about using the projector, click the icons on your desktop to access the online manuals (requires an Internet connection). If you don’t have icons to the manuals, you can install them from the projector CD or go to the Epson website, as described below.
