† Maximum pages per minute (PPM) are measured after first page with text patterns in Draft Mode on plain paper. Actual print times will vary based on system configuration, software, and page complexity. See [www.epson.com/printspeed](http://www.epson.com/printspeed) for details.

†† ISO ppm is based on ISO/IEC 24734. Black print speed is determined in default, letter-size, single-side mode, in accordance with ISO/IEC 24734. Actual print time will vary based on system configuration, software, and page complexity. See [www.epson.com/printspeed](http://www.epson.com/printspeed) for details, including complete ISO reports.

1 Compared to genuine OEM toner for monochrome laser printers priced at \$249 or less as of May 2012. Calculation based on continuous printing with highest capacity OEM cartridge. Actual savings will vary based on print task and use conditions.

2 Replacement cartridge yields are based on the ISO/IEC 24711 standard using the ISO/IEC 19752 pattern in default mode printing continuously. Cartridge yields vary considerably for reasons including images printed, print settings, temperature, humidity, and frequency of use. Yields may be lower when printing infrequently. Ink is used for printing and printer maintenance. For print quality, part of the ink from the included cartridge is used for printer startup and a variable amount of ink remains in the cartridge after the "replace cartridge" signal. For details, see [www.epson.com/cartridgeinfo](http://www.epson.com/cartridgeinfo)

3 Compared to best-selling, monochrome laser printers priced at \$249 or less as of May 2012. Energy used while copying or active. Rating could vary by product configuration and usage. Specifications were obtained from manufacturers and not confirmed by Epson.

4 Wi-Fi CERTIFIED™; level of performance subject to the range of the router being used. Visit [www.wi-fi.org/files/11basics\\_glossary.pdf](http://www.wi-fi.org/files/11basics_glossary.pdf) for more information.
