The Power Off and Sleep Timers

The product enters sleep mode or turns off automatically if it is not used for a period of time. You can adjust the time period before power management, but increasing the time reduces the product's energy efficiency.

Changing the Power Off Timer Setting from the Control Panel
Changing the Sleep Timer Setting from the Control Panel
Changing the Power and Sleep Timer Settings - Windows
Changing the Power and Sleep Timer Settings - Mac OS X

Changing the Power Off Timer Setting from the Control Panel

You can use the product's control panel to change the time period before the printer turns off automatically.

1. Press the home button, if necessary.
2. Press the left or right arrow buttons, select Setup, and then press OK.
3. Press the down arrow button, select Printer Setup, and then press OK.
   You see this screen:

![Printer Setup Menu](image)

4. Press the down arrow button, select Power Off Timer, and then press OK.
You see this screen:

![Power Off Timer](image)

5. Press the up or down arrow buttons to select the length of time after which you want the product to automatically turn off when it is not in use. Then press OK.

6. Press the home button to exit.

Parent topic: The Power Off and Sleep Timers

Changing the Sleep Timer Setting from the Control Panel

You can use the product's control panel to change the time period before the product enters sleep mode.

1. Press the home button, if necessary.
2. Press the left or right arrow buttons, select Setup, and then press OK.
3. Press the down arrow button, select Printer Setup, and then press OK.

You see this screen:
4. Press the down arrow button, select **Sleep Timer**, and then press **OK**.
   You see this screen:

5. Press the up or down arrow buttons to select the time period you want before the product goes to sleep. Then press **OK**.
6. Press the home button to exit.

**Parent topic:** The Power Off and Sleep Timers
Changing the Power and Sleep Timer Settings - Windows

You can use the printer software to change the time period before the printer enters sleep mode or turns off automatically.

1. Do one of the following:
   - **Windows 7**: Click and select **Devices and Printers**. Right-click your product name and select **Printing Preferences**.
   - **Windows Vista**: Click and select **Control Panel**. Click **Printer** under **Hardware and Sound**, right-click your product name, and select **Printing Preferences**.
   - **Windows XP**: Click **Start** and select **Printers and Faxes**. (Or open the **Control Panel**, select **Printers and Other Hardware** if necessary, and select **Printers and Faxes**.) Right-click your product name and select **Printing Preferences**.

2. Click the **Maintenance** tab.

3. Click the **Printer and Option Information** button.

   You see the Printer and Option Information screen:
4. Select the length of time after which you want the product to automatically turn off when it is not in use as the **Power Off Timer** setting.

5. Click **Send**.

6. Select the time period you want before the product goes to sleep as the **Sleep Timer** setting.

7. Click **Send**.

8. Click **OK** to close the open program windows.

**Parent topic:** [The Power Off and Sleep Timers](#)

### Changing the Power and Sleep Timer Settings - Mac OS X

You can use the printer software to change the time period before the printer enters sleep mode.
1. Do one of the following:
   • **Mac OS X 10.6/10.7/10.8**: In the Apple menu or the Dock, select **System Preferences**. Select **Print & Fax** or **Print & Scan**, select your product, and select **Options & Supplies**. Select **Utility** and select **Open Printer Utility**.
   • **Mac OS X 10.5**: In the Apple menu or the Dock, select **System Preferences**. Select **Print & Fax**, select your product, and select **Open Print Queue** or **Print Queue**. Select **Utility**.

2. Select **Printer Settings**.
   You see this screen:

   ![Printer Settings Screen]

3. Select the length of time after which you want the product to automatically turn off when it is not in use as the **Power Off Timer** setting.
4. Select the time period you want before the product goes to sleep as the **Sleep Timer** setting.
5. Click **Apply**.
6. Close the Printer Settings window.
EPSON Connect Solutions

You can print documents, photos, emails, and web pages from your home, office, or even across the globe. You can use your smartphone, tablet, or computer. Epson offers these solutions to print and scan from anywhere: EPSON Email Print, EPSON iPrint Mobile App, EPSON Remote Print, and EPSON Scan to Cloud.

Using EPSON Email Print

Using the EPSON iPrint Mobile App

Using EPSON Remote Print

Using EPSON Scan to Cloud

Parent topic: EPSON Connect Solutions

Using EPSON Email Print

With EPSON Email Print, you can print from any device that can send email, such as your smartphone, tablet, or laptop. Just activate your product’s unique email address. When you want to print, attach a PDF, Microsoft Office document, or photo and send an email to your product.

1. Set up your product for network printing as described on the Start Here sheet.

2. If you did not already set up Email Print when you installed your product software, visit www.epson.com/connect to learn more about Email Print, check compatibility, and get detailed setup instructions.

3. Send an email with attachments to your product’s Email Print address.

Note: Both the email and any attachments print by default. You can change these printing options by logging into your EPSON Connect account.
2. Visit www.epson.com/connect to learn more about EPSON iPrint and check the compatibility of your mobile device.
3. Download EPSON iPrint from the Apple App Store or Google Play.
4. Connect your mobile device to the same wireless network that your product is using.
5. Print from your mobile device to your EPSON product.

Parent topic: EPSON Connect Solutions

Using EPSON Remote Print

With EPSON Remote Print software on your Windows computer or laptop, you can print to an EPSON Email-enabled product anywhere in the world.

1. Visit www.epson.com/connect to learn more about Remote Print and how to download the software.
2. Download and install the Remote Print software.
3. Determine the email address and optional access key of the EPSON product you want to use for printing, and enter this address during Remote Print setup.
4. Select the print command in your application and choose this EPSON product as the printer.

Parent topic: EPSON Connect Solutions

Using EPSON Scan to Cloud

The EPSON Scan to Cloud service sends your scanned files to a destination that you have registered with EPSON Connect.

1. Set up your product for network printing as described on the Start Here sheet.
3. After registering, sign in to the EPSON Connect web page with the email address and password you selected.
4. Select Destination List for Scan to Cloud.
5. Click Add, then follow the instructions on the screen to enter your registered email address and a display name for it.
6. When you're ready to scan, select the setting for the Scan to Cloud service on your product control panel.

Parent topic: EPSON Connect Solutions
Related tasks
Starting a Scan Using the Product Control Panel

Using AirPrint
AirPrint allows you to wirelessly print to AirPrint-enabled EPSON products directly from iPhone, iPad, and iPod touch running the latest version of iOS.
1. Set up your EPSON product for wireless printing as described on the Start Here sheet.
2. Connect your Apple device to the same wireless network that your product is using.
3. Print from your iPad, iPhone, or iPod touch to your EPSON product.

Parent topic: Product Basics

Using Google Cloud Print
With a Google Account, you can print from your Apple or Android device to your EPSON wireless product. You can also print from Chromebooks and the Google Chrome browser without drivers or cables.

If you are setting up your product for the first time, set up your EPSON product for wireless printing as described on the Start Here sheet.

Note: Make sure your EPSON printer and computer are connected to the same network before starting the Google Cloud Print setup.

If your product is already on your wireless network, follow these steps:
1. Connect your device to the same wireless network that your EPSON product is using.
2. Print a network status sheet.
3. Locate your product's IP address on the network status sheet.
4. Enter the IP address into the address bar of a web browser.
5. Select the Google Cloud Print Services option.

Note: If you don’t see the Google Cloud Print Services option, turn your product off and back on. If the option still doesn’t appear, select the Firmware Update option and follow the on-screen instructions to update your product.

6. Click Register.
7. Select the check box to agree to the Usage Advisory and click Next.
8. Click OK to launch the sign-in page.
   A separate browser window opens.
9. Enter your Google Account username and password and click Sign in, or, if you don't have an account, click Sign up for a new Google Account and follow the on-screen instructions.
10. Click Finish printer registration to complete setup and print a test page.
   Your product is now linked to your Google Account and can be accessed from any Chromebook, computer, Apple or Android device with internet access. Visit Epson Support for more information on using Google Cloud Print, or the Google Cloud Print website for a list of supported apps.

Printing a Network Status Sheet
Selecting Wireless Network Settings from the Control Panel

You can select or change wireless network settings using your product control panel.

To install your product on a wireless network, follow the instructions on the *Start Here* sheet and install the necessary software from the product CD. The installer program guides you through network setup.

1. Press the home button, if necessary.
2. Press the left arrow button to select **Wi-Fi Setup** and then press **OK**.
   
   You see this screen:

   ![Wi-Fi Setup Menu](image)

3. Press the **OK** button to select **Wi-Fi Setup Wizard**.
4. Press the up or down arrow buttons to select the name of your wireless network and press the **OK** button. If you do not see your wireless network's name, you can enter it manually.

   **Note:** To enter the wireless network name manually, select **Other Networks** and press the **OK** button. Enter your network name as described in the next step.
5. Enter your wireless password (or network name and then password).

![Image of keypad with options for entering network name and password]

- Press the arrow buttons to highlight a character or a function button displayed on the keypad. Then press the OK button to select it.
- To change the case of letters or select symbols, select **AB12** (uppercase), **ab12** (lowercase), or **Symbol** and press the OK button. Then highlight a number or symbol and press the OK button to select it.
- To enter a space, select **Space** and press the OK button.
- To delete characters, select the back arrow and press the OK button.
- When you finish entering characters, select **Done** and press the OK button.

6. Press the OK button to confirm wi-fi settings.

7. Select **Yes** if you want to print a network status report, or **No** if not, and press the OK button. The WiFi light should now be on, but not flashing.

**Note:** If the WiFi light is off, you may have selected the wrong network name or entered the password incorrectly. Repeat these steps to try again.
Loading Paper

Before you print, load paper for the type of printing you will do.

Loading Paper in Cassette 1 (Upper Cassette)
Loading Paper in Cassette 2 (Lower Cassette)
Loading Envelopes
Paper Loading Capacity
Available EPSON Papers
Borderless Paper Type Compatibility
Paper or Media Type Settings

Loading Paper in Cassette 1 (Upper Cassette)

You can load photo paper and other media in these sizes in the upper paper cassette:

- 3.5 × 5 inches (89 × 127 mm)
- 4 × 6 inches (102 × 152 mm)
- 5 × 7 inches (127 × 178 mm)
- A6 (4.1 × 5.8 inches [105 × 148 mm])
- 16:9 wide (4 × 7.1 inches [102 × 181 mm])

**Note:** Do not remove or insert the paper cassette during printing.

1. Close the output tray, if necessary.

![Paper Loading Image]

**Note:** As you slide in the output tray, there may be slight resistance and noise. This is normal.
2. Open the front cover.

3. Pull out the upper paper cassette. The upper cassette has a label on the right side.

4. Slide the edge guides outward.
5. Set the front edge guide to the position for the paper size you are using.

![Image of front edge guide set to position](image)

**Note:** Various paper sizes are marked on the tray.

6. Insert paper with the glossy or printable side facedown.

![Image of paper insertion](image)

**Note:** Make sure the paper is loaded against the front edge guide.

7. Slide the side edge guides against the paper, but not too tightly.

![Image of side edge guides being adjusted](image)

**Note:** Make sure the paper is under the tabs on the edge guides.
8. Keep the cassette flat as you insert it.

Always follow these paper loading guidelines:
- Load only the recommended number of sheets.
- Load paper short edge first and printable side facedown.
- Make sure the paper is under the tabs on the edge guides and not sticking out from the end of the cassette.
- Check the paper package for any additional loading instructions.

Paper Loading Capacity

Loading Paper in Cassette 2 (Lower Cassette)
You can load paper up to this size in the lower paper cassette: Legal (8.5 × 14 inches [216 × 357 mm]).

Note: Do not remove or insert the paper cassette during printing.
1. Close the output tray, if necessary.

   ![Output Tray Illustration]

   **Note:** As you slide in the output tray, there may be slight resistance and noise. This is normal.

2. Open the front cover.

   ![Front Cover Illustration]

3. Pull on the front cover to pull out the lower paper cassette.

   ![Paper Cassette Illustration]
4. Slide the edge guides outward.

**Note:** If you are using legal-size paper, remove the CD/DVD tray from the product. Press the button on the cassette and then extend it as shown.

5. Set the front edge guide to the paper size you are using.

**Note:** Various paper sizes are marked on the tray.
6. Insert paper with the glossy or printable side facedown.

**Note:** Make sure the paper is loaded against the edge guide and not sticking out from the end of the cassette.

7. Slide the side edge guides against the paper, but not too tightly.

**Note:** Make sure the paper is under the tabs on the edge guides.
8. Keep the cassette flat as you insert it.

Always follow these paper loading guidelines:

- Load only the recommended number of sheets.
- Load paper short edge first and printable side facedown.
- Make sure the paper is under the tabs on the edge guides and not sticking out from the end of the cassette.
- Check the paper package for any additional loading instructions.

Paper Loading Capacity

Loading Envelopes

You can load envelopes in Cassette 2 (lower cassette) as described here. You can print on plain paper envelopes in this size: No. 10 (4.1 × 9.5 inches [105 × 241 mm]).

Note: Do not remove or insert the paper cassette during printing.
1. Close the output tray, if necessary.

![Image of a printer with an open output tray]

**Note:** As you slide in the output tray, there may be slight resistance and noise. This is normal.

2. Open the front cover.

![Image of a printer with an open front cover]

3. Pull on the front cover to pull out the lower paper cassette.

![Image of a printer with an open lower paper cassette]
4. Slide the edge guides outward.

![Diagram](image1)

5. Insert up to 10 envelopes, printable side facedown and flap edge left, as shown.

![Diagram](image2)

**Note:** Make sure the envelope is not sticking out from the end of the cassette.

6. Slide the edge guides against the envelopes, but not too tightly.

![Diagram](image3)

**Note:** Make sure the envelopes are under the tabs on the edge guides.
7. Keep the cassette flat as you insert it.

Always follow these envelope loading guidelines:

• If you have trouble loading a stack of envelopes, press each envelope flat before loading it or load one envelope at a time.
• Do not load envelopes that are curled, folded, or too thin.

Placing Originals on the Product

Follow the instructions here to place your original documents or photos on the product.

**Caution:** Do not place anything on top of your product or use its cover as a writing surface to avoid damaging it.

Placing Originals on the Scanner Glass

**Placing Originals on the Scanner Glass**

You can place originals up to this size on the scanner glass: Letter (8.5 × 11 inches [216 × 279 mm]) or A4 (8.3 × 11.7 inches [210 × 297 mm]).

1. Open the document cover.
2. Place your original facedown on the scanner glass with the top of the original facing into the corner shown. Slide the original to the edges of the indicated corner.

![Image of scanner glass with opened cover and paper placed inside]

**Note:** You can place multiple originals on the scanner glass. Just make sure they are at least 0.20 inch (5 mm) away from each other and from the edge of the scanner glass.
3. If you are copying two book pages onto one sheet, place the book as shown to copy the first page, then turn the book as shown to copy the second page.

4. Close the document cover gently to keep your original in place.

Copying Documents or Photos

You can copy documents or photos onto various sizes and types of paper, including Epson special papers.

1. Place your original document or photo on the scanner glass.
2. Load the paper you want to print on.

   Note: Load only the recommended number of sheets.

3. Select Copy and press OK.

![Copy interface]

4. To print more than one copy, press + or – to select the number (up to 99).
5. Press the right or left arrow buttons to select Color or B&W.
6. Press the down arrow and then press OK to view and change additional copy settings, if necessary.
7. When you are ready to copy, press start.

**Note:** To cancel printing, press stop.

Copying and Restoring Photos

You can restore the colors in faded photos as you copy them.

1. Load photo paper in the product.
2. Press the home button, if necessary.
3. Press the left or right arrow buttons, select More Functions, then press the OK button.
4. Select Copy/Restore Photos and press the OK button.

You see this screen:

5. Press the down arrow button to select On, then press the OK button.
6. Place up to two original photos on the product.

Note: Press the up or down arrow buttons for instructions on placing your photos on the product.

7. Press the start button.
8. Press the left or right arrow buttons to scroll through your photos and display one that you want to copy.
9. Press the + or – buttons to select one or more copies of the photo (up to 99).
10. If you placed two originals on the scanner, press the left or right arrow button to view the second original, then press + or – to select one or more copies of the photo (up to 99).
11. To select settings for the photos, press the down arrow button.
12. Do one or more of the following:
   • To change the display setting for the LCD screen, select **Display Mode**, press the **OK** button, and select the setting you want.
   • To change the print settings, select **Paper and Copy Settings**, press the **OK** button, and select the necessary settings.
   • To adjust the copy image, select **Photo Adjustments**, press the **OK** button, and select the necessary settings.
   • To crop or zoom into your photo, select **Crop/Zoom**, press the **OK** button, and press the ++ or −− and arrow buttons to adjust the image area.

13. When you are ready to print, press the ⬤ start button.

   **Note:** To cancel printing, press ⏹️ stop.

Printing From a Computer

Before printing documents or photos from your computer, make sure you have set up your product and installed its software as described on the Start Here sheet.

**Note:** If you have an Internet connection, it is a good idea to check for updates to your product software on Epson's support website. If you see a Software Update screen, select Enable automatic checking and click OK. The update scans your system to see if you have the latest product software. Follow the on-screen instructions.

Parent topic: Printing From a Computer

Selecting Basic Print Settings - Windows
Select the basic settings for the document or photo you want to print.

1. Open a photo or document for printing.
2. Select the print command in your application.

   **Note:** You may need to select a print icon on your screen, the **Print** option in the File menu, or another command. See your application's help utility for details.

3. If necessary, select your product name as the printer you want to use.

   **Note:** You may also need to select **Properties** or **Preferences** to view your print settings.

You see the Main tab of your printer settings window:
4. Select the **Quality Option** setting that matches your print content and the print quality you want to use.

5. Select the **Source** setting that indicates where you loaded the paper or CD/DVD you want to print on.

6. Select the type of paper you loaded as the **Type** setting.

   **Note:** The setting may not exactly match the name of your paper. Check the paper type settings list for details.

7. Select the size of the paper you loaded as the **Size** setting.

   **Note:** You can also select the **User Defined** setting to create a custom paper size.

8. Select one of the border options:
   • If you are printing a borderless photo, select **Borderless**.

      **Note:** You must select a compatible borderless paper type and size to print without borders. Check the borderless paper compatibility list for details.

   • If you are printing a document or a photo with borders, select **Borders**.

9. Select the orientation of your document or photo as shown in the printer settings window.

   **Note:** If you are printing an envelope, select **Landscape**.

10. To print on both sides of the paper, select a **2-sided printing** option.

11. Select any of the available print options.

   **Note:** If you need to access the Epson product support website, click the **Online Support** button.

Selecting Double-sided Printing Settings - Windows

Paper Source Options - Windows
You can select any of the available options in the Paper Source menu to print on the paper loaded in that source.

Auto Cassette Selection
Automatically selects the paper source based on the selected paper size.

Cassette 1
Selects the paper in cassette 1 as the paper source.

Cassette 2
Selects the paper in cassette 2 as the paper source.

Cassette 1 > Cassette 2
Selects the paper in cassette 1 as the paper source and automatically switches to cassette 2 when cassette 1 is empty.

CD/DVD
Selects the CD or DVD loaded as the source.

Parent topic: Selecting Basic Print Settings - Windows

Basic Print Options - Windows
You can select any of the basic print options to customize your print. Some options may be pre-selected or unavailable, depending on other settings you have chosen.

Fix Photo
Improves the color, contrast, and sharpness of flawed photos.

Note: Fix Photo uses a sophisticated face recognition technology to optimize photos that include faces. For this to work, both eyes and the nose must be visible in the subject’s face. If your photo includes a face with an intentional color cast, such as a statue, you may want to turn off Fix Photo to retain the special color effects.

Fix Red-Eye
Reduces or removes red-eye in photos.

Reverse Order
Prints multi-page print jobs last page first.

Print Preview
Displays a preview of your printout before printing.
Selecting Advanced Print Settings - Windows

Select print settings on the Advanced tab to customize the quality and color settings for your printout, and save your own printing presets.

1. Click the **Advanced** tab.
   You see the advanced print settings:

2. Select the **Paper & Quality Options** settings for your printout:
   - Select where you loaded the paper or CD/DVD you want to print on.
   - Select the type of paper you loaded.
• Select the print quality setting you want to use.

**Note:** Check the print quality setting list for details.

• Select the size of the paper you loaded.

• Select **Borderless** to print a borderless photo, or **Borders** to print a document or a photo with borders.

**Note:** You must select a compatible borderless paper type and size to print without borders. Check the borderless paper compatibility list for details.

3. Select **Portrait** or **Landscape** as the orientation of your document or photo.

**Note:** If you are printing an envelope, select **Landscape**.

4. Select any of the available advanced print options.

5. Select any of the available color management options, or turn off color management.

You can select any of the print quality settings to fine-tune the quality of your print. Some settings may be unavailable, depending on the paper type and border setting you have chosen.

**Draft**

For draft printing on photo paper.
**Fast Economy**  
For the fastest printing with draft quality.

**Economy**  
For fast printing with reduced quality.

**Normal**  
For everyday text and image printing.

**Fine**  
For text and graphics with good quality and print speed.

**Photo**  
For photos and graphics with good quality and print speed.

**Photo RPM**  
For the best print quality, but the slowest print speed.

**Parent topic:** Selecting Advanced Print Settings - Windows

### Advanced Print Options - Windows

You can select any of the print options to customize your print. Some options may be unavailable, depending on other settings you have chosen.

**Fix Red-Eye**  
Reduces or removes red-eye in photos.

**High Speed**  
Speeds up printing, but may reduce print quality.

**Edge Smoothing**  
Smoothes jagged edges in low-resolution images such as screen captures or images from the Web.

**Print Preview**  
Displays a preview of your printout before printing.

**Black/Grayscale**  
Prints text and graphics in black or shades of gray.

**Quiet Mode**  
Lessens noise during printing when you select **Plain Paper/Bright White Paper** as the paper Type or Media Type setting.

**Parent topic:** Selecting Advanced Print Settings - Windows

### Color Management Options - Windows

You can adjust the **Color Management** settings on the Advanced tab to fine-tune the colors in your printout, or turn off color management in your printer software.
Color Controls
Let you select a Color Mode setting, individual settings for Brightness, Contrast, Saturation, and Density, and individual color tones. Depending on the selected color mode, you can also adjust the midtone density using the Gamma setting.

Fix Photo
Improves the color, contrast, and sharpness of flawed photos.

Note: Fix Photo uses a sophisticated face recognition technology to optimize photos that include faces. For this to work, both eyes and the nose must be visible in the subject's face. If your photo includes a face with an intentional color cast, such as a statue, you may want to turn off Fix Photo to retain the special color effects.

ICM
Lets you turn off color management in your printer software using the Off (No Color Adjustment) option. You can then manage color using only your application software.

Parent topic: Selecting Advanced Print Settings - Windows

Selecting Print Layout Options - Windows
You can select a variety of sizing and layout options for your document or photo on the Page Layout tab.
• To change the size of your printed document or photo, select the **Reduce/Enlarge Document** checkbox and select sizing options.

• To print on both sides of your paper, select the **2-sided printing** options.

• To print multiple pages on one sheet of paper, or print one image on multiple sheets of paper, select the **Multi-Page** checkbox and select the options you want.

• To print multiple copies and arrange their print order, select the **Copies** options.

• To control printing at the edges of borderless images, select a **Borderless** option:
  • To adjust the automatic settings, select **Auto Expand** as the Enlargement Method setting, then adjust the **Expansion slider** (if necessary) to control the amount of image expansion.
**Note:** If you select the Min option for the Expansion setting, you may see white borders on your printed photo.

- To print the borderless image at its actual size without scaling, select Retain Size as the Enlargement Method setting.
- To add a watermark to your printout, select Watermark settings.
- To rotate or flip the printed image, select the Rotate 180° or Mirror Image checkboxes.

**Parent topic:** Printing with Windows

Selecting Double-sided Printing Settings - Windows

## Selecting a Printing Preset - Windows

For quick access to common groups of print settings, you can select a printing preset.

**Note:** You can create your own preset by clicking the Save Settings button on the Advanced tab.

1. Click the Shortcuts tab.
   
   You see the available Printing Presets options:
2. Place your cursor over a Printing Presets option to view its list of settings.
3. Use any of the available options on the screen to control your printing presets.
4. To choose an option for printing, select it.
5. Click **OK**.

**Parent topic:** Printing with Windows
Selecting Double-sided Printing Settings - Windows

You can print on both sides of the paper by selecting one of the 2-sided printing options on the Main or Page Layout tab. (Some options are not available on the Main tab.)

Automatic double-sided printing is only available if you have loaded plain paper in these sizes: Letter (8.5 × 11 inches [216 × 279 mm]) and A4 (8.3 × 11.7 inches [210 × 297 mm]).

Note: Some options may be unavailable, depending on other settings you have chosen.

1. Click the Page Layout tab.
2. Select one of the 2-sided printing options:
   • Select the Auto checkbox to automatically print your double-sided print job.
   • Select the Manual checkbox to print your double-sided print job manually by printing one side and flipping the paper over to print the other side (recommended for paper types that do not support automatic duplexing).
3. Select the Folded Booklet checkbox if you want to order the pages of your double-sided print to create a single-fold booklet.
4. Click the Settings button.
   You see this window:
5. Select the binding options you want to use.
6. Click **OK** to return to the Page Layout tab.
7. Click the **Adjust Print Density** button.
   You see this window:
8. Select the type of document you are printing as the Document Type setting. The software automatically sets the Adjustments options for that document type.

9. If you selected the Manual document type, select the Adjustments options you want to use.

10. Click OK to return to the Page Layout tab.

11. Print a test copy of your double-sided document to test the selected settings.

12. Follow any instructions displayed on the screen during printing.

### Selecting Default Print Settings - Windows

When you change your print settings in a program, the changes apply only while you are printing in that program session. If you want to change the print settings you use in all your Windows programs, you can select new default print settings.

1. Right-click the product icon in the Windows taskbar.
2. Select **Printer Settings**.
   - You see the printer settings window:
3. Select the print settings you want to use as defaults in all your Windows programs.
4. Click OK.

These settings are now the defaults selected for printing. You can still change them as needed for printing in any program session.

Changing the Language of the Printer Software Screens

Parent topic: Printing with Windows

Changing the Language of the Printer Software Screens

You can change the language used on the Windows printer software screens.
1. Right-click the product icon in the Windows taskbar.
2. Select Printer Settings.
You see the printer settings window.
3. Click the **Maintenance** tab.
You see the maintenance options:

4. Select the language you want to use as the **Language** setting.
5. Click **OK** to close the printer software window.

The printer software screens appear in the language you selected the next time you access them.

*Parent topic: Selecting Default Print Settings - Windows*
Changing Automatic Update Options

Your printer software for Windows automatically checks for updates to the product software. You can change how often the software checks for updates or disable this feature.

1. Right-click the product icon in the Windows taskbar.

2. Select **Software Update Settings**.

You see this window:

3. Do one of the following:
   - To change how often the software checks for updates, select a setting in the **Check every** menu.
   - To disable the automatic update feature, select the **Never** option.

4. Click **OK** to exit.

**Note:** If you choose to disable the automatic update feature, you can check for updates manually.

Printing with Mac OS X

You can print with your product using any Mac OS X printing program, as described in these sections.
Selecting Basic Print Settings - Mac OS X
Selecting Page Setup Settings - Mac OS X
Selecting Print Layout Options - Mac OS X
Selecting Double-sided Printing Settings - Mac OS X
Managing Color - Mac OS X
Selecting Printing Preferences - Mac OS X
Printing Your Document or Photo - Mac OS X

Parent topic: Printing From a Computer

Selecting Basic Print Settings - Mac OS X
Select the basic settings for the document or photo you want to print.

1. Open a photo or document for printing.
2. Select the print command in your application.
   
   Note: You may need to select a print icon on your screen, the Print option in the File menu, or another command. See your application's help utility for details.

3. Select your product as the Printer setting.

4. If necessary, click the arrow next to the Printer setting or the Show Details button to expand the print window.
   
   You see the expanded printer settings window for your product:
Note: The print window may look different, depending on the version of Mac OS X and the application you are using.

5. Select the **Copies** and **Pages** settings as necessary.

   **Note:** If you do not see these settings in the print window, check for them in your application before printing.

6. Select the page setup options: **Paper Size** and **Orientation**.

   **Note:** If you do not see these settings in the print window, check for them in your application before printing. They may be accessible by selecting **Page Setup** from the File menu.
7. Select any application-specific settings that appear on the screen, such as those shown in the image above for the Preview application.
8. Select **Print Settings** from the pop-up menu.

You see these settings:

9. Select the **Paper Source** you wish to print from.
10. Select the type of paper you loaded as the **Media Type** setting.

   **Note:** The setting may not exactly match the name of your paper. Check the paper type settings list for details.

11. Select the **Print Quality** setting you want to use.
12. Select any of the available print options.

   **Paper Source Options - Mac OS X**
   **Print Quality Settings - Mac OS X**

**Paper Source Options - Mac OS X**

You can select any of the available options in the Paper Source menu to print from paper loaded in that source.

**Cassette 1**

Selects the paper in cassette 1 as the paper source.

**Cassette 2**

Selects the paper in cassette 2 as the paper source.

**Parent topic:** Selecting Basic Print Settings - Mac OS X

**Print Quality Settings - Mac OS X**

You can select any of the print quality settings to fine-tune the quality of your print. Some settings may be unavailable, depending on the paper type and border setting you have chosen.

**Draft**

For draft printing on photo paper.

**Fast Economy**

For the fastest printing with draft quality.
Economy
For fast printing with reduced quality.

Normal
For everyday text and image printing.

Fine
For text and graphics with good quality and print speed.

Photo
For photos and graphics with good quality and print speed.

Photo RPM
For the best print quality, but the slowest print speed.

Print Options - Mac OS X
You can select any of the print options to customize your print. Some options may be unavailable, depending on other settings you have chosen.

Expansion
If you selected a borderless paper size setting, this option adjusts the image expansion settings to control printing at the edges of borderless prints.

Grayscale
Prints text and graphics in black or shades of gray.

Mirror Image
Lets you flip the printed image horizontally.

Note: If you select the Min option for the Expansion setting, you may see white borders on your printed photo.

Selecting Page Setup Settings - Mac OS X
Depending on your application, you may be able to select the paper size and orientation settings from the print window.
**Note:** If you do not see these settings in the print window, check for them in your application before printing. They may be accessible by selecting **Page Setup** from the File menu.

1. Select the size of the paper you loaded as the **Paper Size** setting. If you are printing a borderless photo, select the **Borderless** checkbox or a paper size with a **Borderless** option. You can also select a custom setting to create a custom paper size.

   **Note:** You must select a compatible borderless paper type and size to print without borders. Check the borderless paper compatibility list for details.

2. Select the orientation of your document or photo as shown in the print window.

   **Note:** If you are printing an envelope, select the icon.

   **Note:** You can reduce or enlarge the size of the printed image by selecting **Paper Handling** from the pop-up menu and selecting a scaling option.

**Parent topic:** Printing with Mac OS X

Borderless Paper Type Compatibility

**Selecting Print Layout Options - Mac OS X**

You can select a variety of layout options for your document or photo by selecting **Layout** from the pop-up menu on the print window.
• To print multiple pages on one sheet of paper, select the number of pages in the **Pages per Sheet** pop-up menu. To arrange the print order of the pages, select a **Layout Direction** setting.

• To print borders around each page on the sheet, select a line setting from the **Border** pop-up menu.

• To invert or flip the printed image, select the **Reverse page orientation** or **Flip horizontally** settings.

**Parent topic:** [Printing with Mac OS X](#)

**Selecting Double-sided Printing Settings - Mac OS X**

You can print on both sides of the paper by selecting **Two-sided Printing Settings** from the pop-up menu on the print window.
Note: Some options may be pre-selected or unavailable, depending on other settings you have chosen or if you are accessing the product over a network. This screen may be different, depending on the version of Mac OS X you are using.

1. Select one of the Two-sided Printing options.
2. Select the type of document you are printing as the **Document Type** setting. The software automatically sets the Adjustments options for that document type.

![Two-sided Printing Settings](image)

3. If necessary, customize the Adjustments settings as instructed on the screen.
4. Print a test copy of your double-sided document to test the selected settings.
5. Follow any instructions displayed on the screen during printing.

**Parent topic:** Printing with Mac OS X

**Managing Color - Mac OS X**

You can adjust the Color Matching and Color Options settings to fine-tune the colors in your printout, or turn off color management in your printer software.
1. Select **Color Matching** from the pop-up menu in the print window.

![Color Matching Menu]

2. Select one of the available options.

3. Select **Color Options** from the pop-up menu in the print window.

![Color Options Menu]

**Note:** The available settings on the Color Options menu depend on the option you selected on the Color Matching menu.

4. Select one of the available options.

**Color Matching and Color Options - Mac OS X**

**Parent topic:** Printing with Mac OS X

**Color Matching and Color Options - Mac OS X**

You can select from these settings on the **Color Matching** and **Color Options** menus.
Color Matching Settings

EPSON Color Controls
   Lets you manage color using controls in your printer software, or turn off color management.

ColorSync
   Prints using standard color profiles for your product and paper to help match image colors. You can customize the conversion method and filter settings on the ColorSync pop-up menu in the print window.

Color Options Settings

Manual Settings
   Lets you select manual color adjustments. Click the arrow next to Advanced Settings and select settings for Brightness, Contrast, Saturation, and individual color tones. You can also select a color Mode setting for printing photos and graphics and the Fix Red-Eye setting to reduce or remove red-eye in photos. Depending on the selected color mode, you can also adjust the midtone density using the Gamma setting.

Fix Photo
   Improves the color, contrast, and sharpness of flawed photos. Click the arrow next to Advanced Settings and select the Fix Red-Eye setting to reduce or remove red-eye in photos.

   Note: Fix Photo uses a sophisticated face recognition technology to optimize photos that include faces. For this to work, both eyes and the nose must be visible in the subject's face. If your photo includes a face with an intentional color cast, such as a statue, you may want to turn off Fix Photo to retain the special color effects.

Off (No Color Adjustment)
   Turns off color management in your printer software so you can manage color using only your application software.

Parent topic: Managing Color - Mac OS X

Selecting Printing Preferences - Mac OS X

You can select printing preferences that apply to all the print jobs you send to your product.

1. In the Apple menu or the Dock, select System Preferences.
2. Select Print & Fax or Print & Scan, select your product, and select Options & Supplies.
3. Select Driver.
   You see this screen:
4. Select any of the available printing preferences.
5. Click **OK**.

**Printing Preferences - Mac OS X**

**Parent topic:** Printing with Mac OS X

**Printing Preferences - Mac OS X**

You can select from these settings on the Driver tab.

**Thick paper and envelopes**  
Prevents ink from smearing when you print on envelopes or other thick paper.

**Skip Blank Page**  
Ensures that your product does not print pages that contain no text or images.

**Quiet Mode**  
Lessens noise during printing when you select **Plain Paper/Bright White Paper** as the paper Type or Media Type setting.

**Automatic Cassette Switching**  
Automatically switches to the other cassette when one of the cassettes runs out of paper.

**High Speed Printing**  
Speeds up printing, but may reduce print quality.
Warning Notifications
Lets you choose whether or not to receive warning notifications from the printer software when ink is low.

Placing Originals on the Product

Starting a Scan Using the Product Control Panel

You can scan an image to your computer using your product's touch panel buttons.

Your product automatically selects suitable default scan settings, but you can view or change them as necessary.

1. Make sure you installed the product software and connected the product to your computer or network.
2. Press the home button, if necessary.
3. Press the left or right arrow buttons to select Scan and press the OK button.

The scan options are displayed:
4. Press the arrow buttons to view additional scan options, then select the one you want.
   - **Scan to Memory Card** saves your scanned file on a memory card and lets you select the file format, quality, and other settings.
   - **Scan to Cloud** sends your scanned files to a destination that you have registered with EPSON Connect.
   - **Scan to PC** saves your scanned file directly to your computer or as an image capture in Mac OS X 10.6/10.7/10.8.
   - **Scan to PC (PDF)** saves your scan as a PDF file to your computer or as an image capture in Mac OS X 10.6/10.7/10.8.
   - **Scan to PC (Email)** scans your original and attaches it to a message in your e-mail program. You can select the e-mail program you want to use and resize your image, if necessary, from an option screen on your computer.

   **Note:** This works with MAPI-type email such as Microsoft Outlook, Windows Live Mail, Mac Mail, and Entourage, but not web-based email such as Gmail.

   - **Scan to PC (WSD)** lets you manage wireless scanning in Windows 7 or Windows Vista (English only).

5. To scan to your PC, you first need to select how you connected your product to your computer:
   - If your product is connected directly to your computer with a USB cable, select **USB Connection**.
   - If your product is connected to your computer over a network, select the computer name from the list.
6. Press the start button to start scanning.

### Starting a Scan Using the Product Control Panel

**Changing Default Scan Button Settings**

You can view or change the default scan settings your product uses when you scan to your computer using the product buttons. You do this using the Event Manager program.

1. Do one of the following to open Event Manager:
   - **Windows**: Click or Start > All Programs or Programs > EPSON Software > Event Manager.
   - **Mac OS X**: Open the Applications folder, click Epson Software, and click Event Manager.
2. Open the Scanner (Windows) or Select Scanner (Mac OS X) drop-down list and select your product, if necessary.
3. Click Make Job Settings.
4. Open the Edit Job Settings drop-down list and select the scan button settings you want to view or change.
5. Change the settings as necessary.
6. Click OK.

**Parent topic**: Starting a Scan Using the Product Control Panel

### Starting a Scan Using the EPSON Scan Icon

You can start the EPSON Scan program to select scan settings, scan, and save the scanned image to a file.

- **Windows**: Double-click the EPSON Scan icon on your computer desktop.
- **Mac OS X**: Open the Applications folder, open the Epson Software folder, and double-click the EPSON Scan icon.

**Note**: With Mac OS X 10.6, 10.7, or 10.8, in addition to scanning with Image Capture, you can download and install EPSON Scan scanning software. EPSON Scan provides additional image adjustment and photo correction features for enhancing scanned images, and provides an interface
for TWAIN-compliant OCR scanning software, such as ABBYY FineReader. To download EPSON Scan, visit Epson's driver download site (U.S. downloads or Canadian downloads).

You see an EPSON Scan window like this:

![EPSON Scan window](image)

Parent topic: Starting a Scan
Starting a Scan from a Scanning Program

You can start EPSON Scan from a scanning program to select scan settings, scan, and open the scanned image in the program.

**Note:** With Mac OS X 10.6, 10.7, or 10.8, in addition to scanning with Image Capture, you can download and install EPSON Scan scanning software. EPSON Scan provides additional image adjustment and photo correction features for enhancing scanned images, and provides an interface for TWAIN-compliant OCR scanning software, such as ABBYY FineReader. To download EPSON Scan, visit Epson's driver download site (U.S. downloads or Canadian downloads).

1. Open your scanning program and select its scanning option. (See your scanning program help for instructions.)
2. Select your product.

   **Note:** In certain programs, you may need to select your product as the "source" first. If you see a **Select Source** option, choose it and select your product. With Windows, do not select a **WIA** option for your product; it will not work correctly.

You see an EPSON Scan window like this:
Note: In certain programs, you may see the program's scan window instead of the EPSON Scan window. Select scanning options as necessary.

Selecting EPSON Scan Settings

After starting EPSON Scan, you can select settings in various modes to customize your scan.

Scan Modes
Selecting the Scan Mode
Scanning in Full Auto Mode
Scanning in Home Mode
Scanning in Office Mode
Scanning in Professional Mode
Image Preview Guidelines
Scan Resolution Guidelines
Selecting Scan File Settings

Parent topic: Scanning

Scan Modes

EPSON Scan provides a choice of scan modes with different levels of control over your settings.

**Full Auto Mode**
This mode automatically detects the type of content you are scanning, selects settings for it, and saves your scanned image. You can also select various image adjustment options.

**Home Mode**
You can select setting groups based on the type of content you are scanning. You can also select various image adjustment options, and preview and size your scanned image.

**Office Mode**
You can quickly scan text documents and adjust them on a preview screen. You can also select various image adjustment options and preview your scanned image.

**Professional Mode**
You can manually customize all available settings, and preview and size your scanned image.

Parent topic: Selecting EPSON Scan Settings

Related tasks
Selecting the Scan Mode

Selecting the Scan Mode

Select the EPSON Scan mode you want to use from the Mode box in the upper right corner of the EPSON Scan window:
When you scan in Full Auto Mode, EPSON Scan automatically saves your scanned file in JPEG format in your operating system's Pictures or My Pictures folder, or opens it in your scanning program. You can change the scanned file settings and select various image adjustment options before you scan, if necessary.

1. Start EPSON Scan and select **Full Auto Mode** as the Mode setting.

You see this window:
To scan in Full Auto Mode, position or load the material you want to scan, then click Scan.

For Color Restoration and other options, click the Customize button and then make the settings.

You can change the scan mode in the Mode list box at the top right of the window.
2. To select image adjustment options or change your scanned file settings, click **Customize**, select the settings, and click **OK**.

   ![Customize Settings](image)

   • To choose any of the available image adjustment options, select the checkbox for the option.
   • To change the scanned file settings, click **File Save Settings**.

3. Click **Scan**.

   EPSON Scan scans your original, and saves the file in the selected folder or opens it in your scanning program. If the file was saved directly to your computer, you see the file in the Windows Explorer or Mac OS X Finder, where you can view and print the image, if desired.

Scan Resolution Guidelines

Available Image Adjustments - Full Auto Mode
You can select these image adjustment options in EPSON Scan Full Auto Mode.

**Dust Removal**
Removes dust marks from your originals automatically.

**Color Restoration**
Restores the colors in faded photos automatically.

**Auto Photo Orientation**
Checks the preview image for faces, the sky, and other features, and then correctly rotates the photo when it is scanned, if necessary. (If your photo is not oriented correctly using this option, deselect this option and scan again.)

Parent topic: Scanning in Full Auto Mode

Scanning in Home Mode
When you scan in Home Mode, EPSON Scan automatically saves your scanned file in JPEG format in your operating system's Pictures or My Pictures folder, or opens it in your scanning program. You can select settings, preview, and change the scanned file settings as necessary.

1. Start EPSON Scan and select **Home Mode** as the Mode setting.
   You see this window:
2. Select the **Document Type** setting that matches your original, such as **Photograph** or **Text/Line Art**.

3. Select the **Image Type** setting that matches your original.
4. Select the way you plan to use your scanned image as the **Destination** setting. (The Resolution setting is selected automatically based on the Destination setting you choose.)
   - **Screen/Web**: Select this option for images you will e-mail, view on a computer screen, or post on the web.
   - **Printer**: Select this option for images you will print or documents you will convert to editable text using OCR (Optical Character Recognition) software.
   - **Other**: Select this option if you want to select a custom resolution for your image.

5. If you selected **Other** in the last step, select the **Resolution** setting you want to use for your scan.

6. Click the **Preview** button.
   - EPSON Scan previews your original and displays the result in a separate Preview window.

7. If desired, select the area in your preview image that you want to scan (scan area).

8. Select any of the image adjustment settings you want to use. Before making adjustments, click the image or scan area in the Preview window.

9. If you want to reduce or enlarge your image as you scan, select the **Target Size** setting you want to use.

10. Click **Scan**.
    - You see the File Save Settings window.

11. Change any of the necessary file save settings and click **OK**.
    - EPSON Scan scans your original, and saves the file in the selected folder or opens it in your scanning program. If the file was saved directly to your computer, you see the file in the Windows Explorer or Mac OS X Finder, where you can view and print the image, if desired.

Selecting a Scan Area - Home Mode

You can select a specific area in your preview image to include in your scanned image. You can select the entire image area or a portion of it. You can even select multiple scan areas to create multiple scanned images of different areas (Normal Preview mode only).

You can also use the scan area to select specific Image Adjustments settings for a scanned image. Just be sure to click inside the scan area before selecting the settings.

1. Do one of the following to select your scan area in the Preview image:
   - **Thumbnail preview**: Your scan area is selected automatically, but you can change it. Place your cursor in one corner of the desired scan area, then click and drag the cursor to the opposite corner to create a marquee (dotted line) on the preview image.
• **Normal preview**: Click the Auto Locate icon to create a marquee (dotted line) on the preview image.
2. Do the following, as necessary, to work with the selected scan area:
   - If the marquee is correct, continue with the next step.
   - To move the marquee, click inside the scan area and drag the marquee where you want it.
   - To resize the scan area, place your cursor over the edge or corner of the marquee, then click and drag the edges where you want them. (Hold down the **Shift** key as you resize the marquee to retain the same width/height proportions.)
• **Normal preview:** To create additional marquees (up to 50), click the Copy Marquee icon to copy the existing marquee and paste it on the preview image.

• To delete a marquee, click the marquee, then click the Delete Marquee icon.

3. Click inside the scan area and make any necessary settings in the EPSON Scan window.

**Parent topic:** Scanning in Home Mode

**Available Image Adjustments - Home Mode**

You can select these Image Adjustments options in EPSON Scan Home Mode.

```
Image Adjustments

☐ Descreening
☐ Color Restoration
☐ Image Option
☐ Text Enhancement
☐ Auto Area Segmentation

Brightness...
```

**Note:** Select the **Image Option** checkbox if you need to set any of the grayed-out image adjustments. Not all adjustment settings may be available, depending on the Document Type and Image Type setting. Click the **Brightness** button to access additional settings.

**Descreening**

Removes the ripple pattern that might appear in subtly shaded image areas, such as skin tones. This option improves results when scanning magazines or newspapers. (The results of descreening do not appear in the preview image, only in your scanned image.)

**Color Restoration**

Restores the colors in faded photos automatically.

**Backlight Correction**

Removes shadows from photos that have too much background light.

**Dust Removal**

Removes dust marks from your originals automatically.

**Text Enhancement**

Sharpens the appearance of letters in text documents.
**Auto Area Segmentation**
Makes grayscale images clearer and text recognition more accurate by separating the text from the graphics.

**Brightness**
Adjusts the overall lightness and darkness of the scanned image.

**Contrast**
Adjusts the difference between the light and dark areas of the overall scanned image.

**Threshold**
Adjusts the level at which black areas in text and line art are delineated, improving text recognition in OCR (Optical Character Recognition) programs.

**Parent topic:** Scanning in Home Mode

**Selecting a Scan Size - Home Mode**
You can reduce or enlarge the size of your image as you scan. You can also select a specific scan size, such as a common photo size like 4 x 6 inches (102 x 152 mm). This places a scan area of that size on the preview image so you can use it to help crop the image in the correct proportions.

1. Click the **Preview** button to preview your image.
2. In the EPSON Scan window, select the size you want your scanned image to be from the **Target Size** list.

```
Target Size: 5 x 7 in. ...
```

**Note:** If you need to rotate the orientation of the target size for your image, click the **Orientation** icon.

A marquee (dotted line) appears on your preview image proportioned for the size you selected.
3. Do the following, as necessary, to work with the selected scan area:
   • To move the marquee, click inside the scan area and drag the marquee where you want it.
   • To resize the scan area, place your cursor over the edge or corner of the marquee, then click and drag the edge where you want it.
4. To create a scanned image size that is not available in the Target Size list, click the **Customize** option.

![Target Size dialog box](image)

5. Name the custom size, enter the size, click **Save**, and click **OK**. Then create a scan area on the preview image.

   The marquee is automatically proportioned for your custom scan size.

### Scanning in Office Mode

When you scan in Office Mode, EPSON Scan automatically saves your scanned file in JPEG format in your operating system's Pictures or My Pictures folder, or opens it in your scanning program. You can select settings, preview, and change the scanned file settings as necessary.

1. Start EPSON Scan and select **Office Mode** as the Mode setting.

   You see this window:
2. Select the **Image Type** setting that matches your original.
3. Select the **Document Source** setting indicating where you placed your original.
4. Select the **Size** and **Orientation** settings that match your original.
5. Select the **Resolution** setting you want to use for your scan.
6. Click the **Preview** button.
EPSON Scan previews your original and displays the result in a separate Preview window.

7. If desired, select the area in your preview image that you want to scan (scanned image area).

8. Select any of the image adjustment settings you want to use. Before making adjustments, click the image or scanned image area in the Preview window.

9. Click **Scan**.

   You see the File Save Settings window.

10. Change any of the necessary file save settings and click **OK**.

    EPSON Scan scans your original, and saves the file in the selected folder or opens it in your scanning program. If the file was saved directly to your computer, you see the file in the Windows Explorer or Mac OS X Finder, where you can view and print the image, if desired.

Selecting Scan File Settings

Selecting a Scan Area - Office Mode

You can select a specific area in your preview image to include in your scanned image. You can select the entire image area or a portion of it. You can even select multiple scan areas to create multiple scanned images of different areas.

You can also use the scan area to select specific Image Adjustments settings for a scanned image. Just be sure to click inside the scan area before selecting the settings.
1. In the Preview window, click the **Auto Locate** icon to create a marquee (dotted line) on the preview image.

   ![Image of the Preview window with the Auto Locate icon highlighted](image)

2. Do the following, as necessary, to work with the selected scan area:
   - If the marquee is correct, continue with the next step.
   - To move the marquee, click inside the scan area and drag the marquee where you want it.

   ![Updated Preview window with the marquee moved](image)
• To resize the scan area, place your cursor over the edge or corner of the marquee, then click and drag the edges where you want them. (Hold down the Shift key as you resize the marquee to retain the same width/height proportions.)

• To create additional marquees (up to 50, if available), click the Copy Marquee icon to copy the existing marquee and paste it on the preview image.

• To delete a marquee, click the marquee, then click the Delete Marquee icon.

3. Click inside each scan area and make any necessary settings in the EPSON Scan window.

Parent topic: Scanning in Office Mode

Available Image Adjustments - Office Mode

You can select these Image Adjustments options in EPSON Scan Office Mode.

Note: Select the Image Option checkbox if you need to set any of the grayed-out image adjustments. Not all adjustment settings may be available, depending on the Image Type setting.

Unsharp Mask
Makes the edges of certain image areas clearer. Turn off this option to leave softer edges.

Descreening
Removes the ripple pattern that might appear in subtly shaded image areas, such as skin tones. This option improves results when scanning magazines or newspapers. (The results of descreening do not appear in the preview image, only in your scanned image.)
Text Enhancement
Sharpens the appearance of letters in text documents.

Auto Area Segmentation
Makes grayscale images clearer and text recognition more accurate by separating the text from the graphics.

Color Enhance
Enhances the red, green, or blue shades in the scanned image.

Brightness
Adjusts the overall lightness and darkness of the scanned image.

Contrast
Adjusts the difference between the light and dark areas of the overall scanned image.

Threshold
Adjusts the level at which black areas in text and line art are delineated, improving text recognition in OCR (Optical Character Recognition) programs.

Parent topic: Scanning in Office Mode

Scanning in Professional Mode
When you scan in Professional Mode, EPSON Scan automatically saves your scanned file in JPEG format in your operating system's Pictures or My Pictures folder, or opens it in your scanning program. You can select settings, preview, and change the scanned file settings as necessary.

1. Start EPSON Scan and select Professional Mode as the Mode setting.
   You see this window:
2. Select the **Document Type** setting that matches your original, such as **Reflective** for documents or photos.
3. Select the **Document Source** setting indicating where you placed your original.
4. Select the specific type of original you are scanning as the **Auto Exposure Type** setting: **Document** or **Photo**.
5. Select the details of your original and how you want it scanned as the **Image Type** setting.
6. Select the **Resolution** setting you want to use for your scan.
7. Click the **Preview** button.
   
   EPSON Scan previews your original and displays the result in a separate Preview window.
8. If desired, select the area in your preview image that you want to scan (scan area).
9. Select any of the image adjustment settings you want to use. Before making adjustments, click the image or scanned image area in the Preview window.
10. If you want to reduce or enlarge your image as you scan, select the **Target Size** setting you want to use.
11. Click **Scan**.
    
    You see the File Save Settings window.
12. Change any of the necessary file save settings and click **OK**.

   EPSON Scan scans your original, and saves the file in the selected folder or opens it in your scanning program. If the file was saved directly to your computer, you see the file in the Windows Explorer or Mac OS X Finder, where you can view and print the image, if desired.

Selecting a Scan Area - Professional Mode

You can select a specific area in your preview image to include in your scanned image. You can select the entire image area or a portion of it. You can even select multiple scan areas to create multiple scanned images of different areas (Normal Preview mode only).

You can also use the scan area to select specific Image Adjustments settings for a scanned image. Just be sure to click inside the scan area before selecting the settings.

**Note:** In Professional Mode, the default Preview mode is Normal mode. To use Thumbnail Preview mode instead, select the Thumbnail checkbox beneath the Preview button (if available), then click the Preview button to preview your image again.

1. Do one of the following to select your scan area in the Preview image:
   
   - **Normal preview:** Click the ![Auto Locate](image) icon to create a marquee (dotted line) on the preview image.
• **Thumbnail preview**: Your scan area is selected automatically, but you can change it. Place your cursor in one corner of the desired scan area, then click and drag the cursor to the opposite corner to create a marquee (dotted line) on the preview image.
2. Do the following, as necessary, to work with the selected scan area:
   • If the marquee is correct, continue with the next step.
   • To move the marquee, click inside the scan area and drag the marquee where you want it.
   • To resize the scan area, place your cursor over the edge or corner of the marquee, then click and drag the edges where you want them. (Hold down the Shift key as you resize the marquee to retain the same width/height proportions.)
• **Normal preview**: To create additional marquees (up to 50, if available), click the Copy Marquee icon to copy the existing marquee and paste it on the preview image.

• To delete a marquee, click the marquee, then click the Delete Marquee icon.

3. Click inside the scan area and make any necessary settings in the EPSON Scan window.

</thead>
</table>

**Note:** Not all adjustment settings may be available, depending on the Image Type setting.

Click the image adjustment icon to access additional settings.

Click the ‡ (Windows) or ▶ (Mac OS X) icon next to a setting to change the level of adjustment.

**Unsharp Mask**

Makes the edges of certain image areas clearer. Turn off this option to leave softer edges.

**Descreening**

Removes the ripple pattern that might appear in subtly shaded image areas, such as skin tones. This option improves results when scanning magazines or newspapers. (The results of descreening do not appear in the preview image, only in your scanned image.)
Color Restoration
Restores the colors in faded photos automatically.

Backlight Correction
Removes shadows from photos that have too much background light.

Dust Removal
Removes dust marks from your originals automatically.

Auto Exposure
Automatically adjusts the image exposure settings when you click the Auto Exposure icon. To automatically adjust image exposure settings continuously, click the Configuration button, click the Color tab, and select Continuous auto exposure. You can adjust the level of exposure adjustment using a slider.

Histogram Adjustment
Provides a graphical interface for adjusting highlight, shadow, and gamma levels individually. (For advanced users only.) Click the histogram icon to access the settings.

Tone Correction
Provides a graphical interface for adjusting tone levels individually. (For advanced users only.) Click the tone correction icon to access the settings.

Brightness
Adjusts the overall lightness and darkness of the scanned image.

Contrast
Adjusts the difference between the light and dark areas of the overall scanned image.

Saturation
Adjusts the density of colors in the overall image.

Color Balance
Adjusts the balance of colors in the overall image.

Color Palette
Provides a graphical interface for adjusting mid-tone levels, such as skin tones, without affecting the highlight and shadow areas of the image. (For advanced users only.) Click the Color Palette icon to access the settings.

Threshold
Adjusts the level at which black areas in text and line art are delineated, improving text recognition in OCR (Optical Character Recognition) programs.

Parent topic: Scanning in Professional Mode
Selecting a Scan Size - Professional Mode

You can reduce or enlarge the size of your image as you scan. You can also select a specific scan size, such as a common photo size like 4 × 6 inches (102 × 152 mm). This places a scan area of that size on the preview image so you can use it to help crop the image in the correct proportions.

1. Click the Preview button to preview your image.
2. In the EPSON Scan window, select the size you want your scanned image to be from the Target Size list.

Note: If you need to rotate the orientation of the target size for your image, click the orientation icon.

A marquee (dotted line) appears on your preview image proportioned for the size you selected.
3. Do the following, as necessary, to work with the selected scan area:
   - To move the marquee, click inside the scan area and drag the marquee where you want it.
   - To resize the scan area, place your cursor over the edge or corner of the marquee, then click and drag the edge where you want it.
4. To create a scanned image size that is not available in the Target Size list, click the **Customize** option.

![Customize Option](image)

5. Name the custom size, enter the size, click **Save**, and click **OK**. Then create a scan area on the preview image. The marquee is automatically proportioned for your custom scan size.

6. To use additional sizing tools, click the + (Windows) or ↗ (Mac OS X) icon next to the Target Size setting and select options as desired.

   ![Size Tools](image)

   - **Scale**: Reduces or enlarges your image by the percentage you enter.
   - **Trimming**: Turns automatic image cropping on or off.
• Unlock icon: Unlocks the width/height proportions of the scanned image size so you can adjust it without constraint.

Parent topic: Scanning in Professional Mode

Image Preview Guidelines

You can preview your scanned image so you can adjust the scan settings using the preview as a guide. There are two types of preview available, depending on the scan mode and selected settings:

Thumbnail preview
A thumbnail preview displays your previewed images as thumbnails with the scanned image area and exposure automatically selected. If the Thumbnail checkbox is selected, clicking the Preview button opens a thumbnail preview.

Normal preview
A normal preview displays your previewed images in their entirety so you can select the scanned image area and other settings manually. If the Thumbnail checkbox is deselected, clicking the Preview button opens a normal preview.

Parent topic: Selecting EPSON Scan Settings

Scan Resolution Guidelines

If you plan to enlarge a scanned image so you can print it at a larger size, you may need to increase the resolution from the default resolution set by EPSON Scan. Follow these guidelines to determine the resolution setting you need:

• You will enlarge the image as you scan it.
  
  If you will enlarge the image using EPSON Scan's Target Size setting (Home and Professional modes only), you do not need to increase the Resolution setting.

• You will scan the image at its original size, but enlarge it later in an image-editing program.
  
  Increase EPSON Scan's Resolution setting in your scan. Increase the resolution by the same amount you will increase the image size to retain a high image quality. For example, if the resolution is 300 dpi (dots per inch) and you will double the image size later, change the Resolution setting to 600 dpi.

• You will scan the image at 100% or smaller size.
  
  Select EPSON Scan's Resolution setting based on how you will use the scanned image:
  
  • E-mail/view on a computer screen/post on the web: 96 to 150 dpi
  • Print/convert to editable text (OCR): 300 dpi
  • Fax: 200 dpi
Selecting Scan File Settings

You can select the location, name, and format of your scan file on the File Save Settings window. You can also select various optional settings that control how EPSON Scan behaves when you scan and save files.

The File Save Settings window may appear after you click Scan on the EPSON Scan window. You may also be able to access the window by clicking the icon on the EPSON Scan window.
1. Do one of the following to select the folder in which you want to save your scanned image:
   - Click the button for one of the displayed folders.
   - Click the Other button, click the Browse or Choose button, and select a folder.
2. Type in a stem file name in the Prefix field. This name is used along with numbers to automatically name your scanned files.
3. Select a different number as the Start Number setting, if you like.
4. Select the file format you want to use in the Image Format Type menu.
5. If your file format provides optional settings, click the Options button to select them.
6. Choose any of the optional settings you want to use by selecting their checkboxes.
7. Click OK.

**Available Scanned File Types and Optional Settings**

**Parent topic:** Selecting EPSON Scan Settings

### Available Scanned File Types and Optional Settings

You can select from a variety scanned file types and optional settings on the File Save Settings window in EPSON Scan.

**File Formats**

**Bitmap (*.bmp)**

A standard image file format for most Windows programs.

**JPEG (*.jpg)**

An image format that lets you highly compress image data. However, the higher the compression, the lower the image quality. (The Tiff format is recommended when you need to modify or retouch your scanned image.)

**Multi-Tiff (*.tif)**

A Tiff file format when multiple pages are saved to the same file, allowing you to edit the images using a compatible program.

**PDF (*.pdf)**

A document format that is readable by Windows and Mac OS X systems using Adobe Reader, Acrobat, or other programs. You can save multi-page documents in one PDF file.

**PICT (*.pct)**

A standard image file format for most Mac OS X programs.
PRINT Image Matching II (*.jpg or *.tif)
File formats that include EPSON PRINT Image Matching II data for enhanced quality and a wider color range (does not affect the way the image displays on the screen).

Tiff (*.tif)
A file format created for exchanging data between many programs, such as graphic and DTP software.

Optional Settings

Overwrite any files with the same name
Select to overwrite previous files with the same names.

Show this dialog box before next scan
Select to have the File Save Settings window appear automatically before you scan.

Open image folder after scanning
Select to have Windows Explorer or Mac OS X Finder automatically open to the folder where your scanned image is saved after scanning.

Show Add Page dialog after scanning
If you are scanning a multi-page document using the PDF or Multi-Tiff format, select to display a prompt for scanning additional pages after the first page is scanned.

Scanning with Mac OS X 10.6/10.7/10.8 Using Image Capture

With Mac OS X 10.6/10.7/10.8, you can scan with your product using an image-editing application such as Image Capture.

Note: With Mac OS X 10.6, 10.7, or 10.8, in addition to scanning with Image Capture, you can download and install EPSON Scan scanning software. EPSON Scan provides additional image adjustment and photo correction features for enhancing scanned images, and provides an interface for TWAIN-compliant OCR scanning software, such as ABBYY FineReader. To download EPSON Scan, visit Epson's driver download site (U.S. downloads or Canadian downloads).

1. Open an image editing application, such as Image Capture.
2. Select your EPSON product from the DEVICES or SHARED list, if necessary.
3. If you see the Show Details button, click it.
   If you are scanning an item on the scanner glass, your product begins a preview scan.
4. Select the **Scan Mode** setting indicating where you placed your original (if available). Select any other scan settings as necessary.
5. Select the folder in which you want to save your scanned file in the **Scan To** pop-up menu.
6. Click **Scan**.

   Your scanned file is saved in the folder you selected.

---

### Available Scan Settings - Mac OS X Image Capture

You can select these scan settings in your imaging editing application for Mac OS X.

- **Unsharp Mask**
  - Makes the edges of certain image areas clearer. Turn off this option to leave softer edges.

- **Descreening**
  - Removes the ripple pattern that might appear in subtly shaded image areas, such as skin tones. This option improves results when scanning magazines or newspapers. (The results of descreening do not appear in the preview image, only in your scanned image.)

- **Backlight Correction**
  - Removes shadows from photos that have too much background light.

- **Dust Removal**
  - Removes dust marks from your originals automatically.

- **Color Restoration**
  - Restores the colors in faded photos automatically.

---

### Scanning Special Projects

Your product's scanning software offers various options to help you quickly complete special scan projects.

- **Scanning to a PDF File**
- **Restoring Photo Colors as You Scan**
- **Convert Scanned Documents to Editable Text (OCR)**

---

### Scanning to a PDF File

Using EPSON Scan, you can scan a multi-page document and save it in one PDF (Portable Document Format) file on your computer.
1. Place your original on your product for scanning.
2. Start EPSON Scan.
3. Select the scan mode you want to use.
4. Select the scan settings for your scan.
5. Preview your image.
6. When you finish selecting all your settings, click Scan.
   You see the File Save Settings window.

7. Select PDF as the Type setting.
8. Select any other settings you want to use on the File Save Settings window. Click the **Options** button to access additional settings.

9. Click **OK**.

   EPSON Scan scans your document and you see this window:

   ![Add Page Confirmation]

10. Choose one of the following options on the screen:

    • If you are scanning only one page, click **Save File**.

    • If you need to scan additional pages in a document, click **Add page**. Place additional pages on the product for scanning, click **Scan**, and repeat until you have scanned all the pages. When you are finished, click **Save File**.

    • If you need to delete or reorder the scanned pages, click **Edit page**. Delete or reorder the pages using the icons that appear on the bottom of the editing window. When you are finished, click **OK**.

    **Note:** If you installed an OCR (Optical Character Recognition) program, you may see a screen indicating the program is converting your page to text. Wait until the program re-scans the page and close the program, if necessary.

11. Click **Close** to exit the EPSON Scan window, if necessary.

   EPSON Scan scans your original, and saves the PDF file in the selected folder or opens it in your scanning program. If the file was saved directly to your computer, you see the file in the Windows Explorer or Mac OS X Finder, where you can view and print the document, if desired.
You can restore the colors in faded photos as you scan them using EPSON Scan's Color Restoration setting. You can select this setting in any of the available scan modes.

**Note:** Color restoration is not available in Office Mode, if EPSON Scan offers that mode.

1. Place your original on your product for scanning.
2. Start EPSON Scan.
3. Select the scan mode you want to use.
4. Select the scan settings for your scan.
5. Preview your image.
6. Locate or access the image adjustment settings.
7. Select the **Color Restoration** checkbox.
8. When you finish selecting all your settings, click **Scan**.
9. Click **Close** to exit the EPSON Scan window, if necessary.

EPSON Scan scans your original, and saves the color-restored file in the selected folder or opens it in your scanning program. If the file was saved directly to your computer, you see the file in the Windows Explorer or Mac OS X Finder, where you can view and print the image, if desired.
Convert Scanned Documents to Editable Text (OCR)

You can scan a document and convert the text into data that you can edit with a word processing, spreadsheet, or HTML-editing program. This process is called OCR (Optical Character Recognition).

To scan and use OCR, you need to install an OCR program, such as ABBYY FineReader.

In Mac OS X 10.6/10.7/10.8, you can use ABBYY FineReader to convert scanned documents to editable text by first using an application such as Image Capture. Scan and save your document in Image Capture, then open ABBYY FineReader, open the Get Images From pop-up menu, and select File. Select the conversion option you want to use, then select your scanned file and follow the instructions on the screen.

Note: With Mac OS X 10.6, 10.7, or 10.8, in addition to scanning with Image Capture, you can download and install EPSON Scan scanning software. EPSON Scan provides additional image adjustment and photo correction features for enhancing scanned images, and provides an interface for TWAIN-compliant OCR scanning software, such as ABBYY FineReader. To download EPSON Scan, visit Epson's driver download site (U.S. downloads or Canadian downloads).

Scanning Using OCR - Windows

You can use the ABBYY FineReader OCR program to convert scanned documents to editable text.

1. Place your original on your product for scanning.

2. Click or Start > All Programs or Programs > ABBYY FineReader 9.0 Sprint > ABBYY FineReader 9.0 Sprint.

You see this window:
3. Select the language used in the document you are going to scan as the **Document Language** setting.

4. Click either the **Scan to Other Formats** icon or the icon that corresponds with the program you want to scan to.

5. If you see the Select Scanner window, select your product and click **OK**.

   **Note:** Do not select a **WIA** option for your product; it will not work correctly.

   You see the scan settings window.

6. Select your scan settings.

7. Click **Preview** and adjust the area you want to scan, if necessary.

8. Click **Scan**.

   **Note:** To scan a multi-page document, select settings in the Multi-Page Scanning section and click **Scan** for each page.

9. When you are finished scanning, click **Close**.
Your document is scanned and processed into editable text, then you see the Save As window.

10. Select a name and a file format for your document and click **Save**.

   The file is saved and then opened in an application associated with the file type you selected, if available on your system.

**Parent topic:** Convert Scanned Documents to Editable Text (OCR)

**Printing Photo Layouts From a Memory Card**

You can print one or more photos from a memory card in special layouts on various sizes of photo paper.

1. Load photo paper in your product.
2. Press the 🏡 home button, if necessary.
3. Press the left or right arrow buttons to select More Functions and press the OK button.
4. Press the up or down arrow buttons to select Photo Layout Sheet and press the OK button.

You see this screen:
5. Press the left or right arrow buttons to select one of the layout options and press the OK button. You see this screen:

6. Press the up or down arrow buttons to select the Paper Size setting that matches the paper you loaded and press the OK button.

7. Press the up or down arrow buttons to select the Paper Type setting that matches the paper you loaded and press the OK button.

Depending on the layout you selected, you may see this screen:
8. If you see the screen above, do one of the following:
   • To allow your product to place photos in the layout automatically, select Automatic layout and press the OK button. Press the + button to select a photo to print. If you need to deselect a photo, press the – button. Press the OK button when you’re finished.
   • To place photos in the layout manually, select Place photos manually and press the OK button. Press the arrow buttons displayed to change layout options, pressing the OK button to confirm each photo placement.

   **Note:** If the printer does not automatically advance to the next screen when you’re finished placing your photos, press the arrow buttons displayed to select Finished, then press the OK button.

9. If you want to change the print settings for the photo layout sheet, press the up or down arrow buttons to select Menu, then press the OK button.

10. Press the + or – buttons to select one or more copies of each photo layout sheet (up to 99).

11. Press the OK button.

12. To print more than one copy of the photo layout sheet, press the + or – buttons to select the number (up to 99).

13. When you are ready to print, press the start button.

   **Note:** To cancel printing, press the stop button.

**Photo Layout Options**
Parent topic: Printing from a Memory Card

Photo Layout Options
Select the layout you want to use when printing your photos in a layout.

Picture Package
Prints one photo in multiple sizes on one sheet.

2-up, 4-up, 8-up, or 20-up
Print 2, 4, 8, or 20 photos on one sheet.

Upper ½ or Lower ½
Print one photo in the upper or lower half of the sheet.

Photo ID
Prints 4 ID-sized photos on one sheet.

Jewel Upper
Prints one photo on the upper half of a folded jewel case insert.

Jewel Index
Prints 24 to 48 thumbnail images on a folded jewel case insert.

Printing Photo Greeting Cards
You can create custom greeting cards using photos on your memory card or other device, and add your own handwritten or printed text.

First you select your photo and print a template on plain paper. Then you fill out the template, add your message, and print your cards.

Creating and Printing a Greeting Card Template
Printing a Greeting Card from a Template

Parent topic: Printing from a Memory Card

Creating and Printing a Greeting Card Template
Before you start, make sure plain paper is loaded and your memory card is inserted.

1. Press the home button, if necessary.
2. Press the left or right arrow buttons to select More Functions and press the OK button.
3. Press the up or down arrow buttons to select Print Photo Greeting Card and press the OK button.

You see this screen:
4. Select **Select Photo and Print Template** and press the **OK** button.
5. Press the left or right arrow buttons to select the photo you want, and press the **OK** button.
6. Select **Letter** to print three cards on one letter-size sheet or **4x6in** to print one card. Then press the **OK** button.
7. Select the type of paper you plan to use and press the **OK** button.
8. Select the other print settings as necessary, pressing the **OK** button after each selection.
9. When you are ready to print your greeting card template on plain paper, press the  start button.

**Parent topic:** Printing Photo Greeting Cards

**Printing a Greeting Card from a Template**

After your greeting card template is printed, you fill it out to create your card and add your message.
1. Use a dark pen or pencil to fill in the circles and select the Text Style and Text Effects.

2. Add your greeting card message within the box. You can write it in by hand, print a message and paste it into the box, or draw a picture.

   **Tip:** When adding text, place it in the direction that your photo faces.

3. Load photo paper either in Cassette 2 (lower) for this size: Letter (8.5 × 11 inches [216 × 279 mm]), or in Cassette 1 (upper) for this size: 4 × 6 inches (102 × 152 mm).

4. Select **Print Greeting Cards from Template** and press **OK**. (If you don’t see the option, press the home button, press the left or right arrow buttons, and select **More Functions > OK > Print Photo Greeting Card > OK > Print Greeting Cards from Template > OK**.)

5. Follow the instructions on the LCD screen to place the template facedown on the scanner glass, with the blue triangle facing into the front right corner.

6. Close the document cover, then select **OK**.

7. To print more than one copy, press + or – to select the number (up to 99).

8. When you are ready to print, press the start button.

   **Note:** To cancel printing, press the stop button.

When you finish printing, cut your greeting cards apart, if necessary.

Transferring Photos on a Memory Card

You can transfer photos to and from a memory card inserted into a memory card slot on your product.

Setting Up File Sharing for Photo Transfers from Your Computer

Before you transfer photos from a computer to a memory card inserted into a memory card slot on your product, you may need to set up your product's file sharing settings.

Caution: Remove the memory card before you change this setting or you may lose data from the memory card. Do not remove a memory card or turn off your product while the memory card access light is flashing or you may lose data from the memory card.

1. Remove any memory cards from the product.
2. Press the home button, if necessary.
3. Press the left or right arrow buttons to select Setup and press the OK button.
4. Press the up or down arrow buttons to select File Sharing Setup and press the OK button.
5. Press the arrow buttons to select your connection type and press the OK button.

Transferring Photos from a Memory Card to Your Computer

You can transfer photos to and from a memory card inserted into a memory card slot on your product and a computer connected to your product.

Note: Do not transfer photos to and from a memory card while you are printing from the memory card.

1. Make sure your product is connected to a computer.
2. Insert a memory card into a memory card slot on your product.
3. Do one of the following to access your memory card files from your computer:
   - **Windows**: Select the Computer or My Computer utility, then select the removable disk icon.
   - **Mac OS X with a USB connection**: Look for the removable disk icon on your desktop, then select it.
   - **Mac OS X with a network connection**: Select the hard drive icon on your desktop or select Computer from the Go menu, select your product in the SHARED section of the sidebar (you may need to widen the sidebar to see the name), then select the MEMORYCARD icon.
4. Select the folder that contains your photos.
5. Drag the photos you want to transfer to the desired folder on your computer or on your memory card.

**Note**: Your product's LCD screen does not update to display new photos transferred to the memory card. Wait until the memory card access light stops flashing, then remove and insert the memory card to update the photos displayed.

Printing Personalized Projects

You can turn any photo or drawing into a coloring book page, or print lined paper, graph paper, or stationery with a photo background.

Printing Coloring Book Pages
Printing Personalized Note Paper
Printing Lined Paper and Graph Paper

Printing Coloring Book Pages

You can create a coloring book page from a photo on your memory card, or from a photo or drawing placed on the scanner glass.

1. Load one of these types of paper in either Letter (8.5 × 11 inches [216 × 279 mm]) or A4 (8.3 × 11.7 inches [210 × 297 mm]) size:
   • Plain paper
   • EPSON Bright White Paper
   • EPSON Presentation Paper Matte
   • EPSON Premium Presentation Paper Matte
2. Press the home button, if necessary.
3. Press the left or right arrow button, select More Functions, then press OK.
4. Press the up or down arrow button, select **Coloring Book**, then press **OK**.

![Coloring Book Select Source](Image)

5. Do one of the following:
   - Select **Photo or Drawing on Scanner Glass** to print a design from an original placed facedown on the scanner glass, in the front right corner.
   - Select **Photo on Memory Card** to print a design from a memory card inserted in your product, then select a photo.

6. Press the **OK** button twice.

7. Press the left or right arrow button to select the size and type of paper that you loaded.

8. Press the down arrow button to select **Paper Source** and select where you loaded your paper.

9. If necessary, adjust the following settings:
   - **Density** to make the print lighter or darker
   - **Line Detection** to change the amount of detail in the print

10. When you are ready to print, press the start button.

   **Note:** To cancel printing, press the stop button.

Loading a CD/DVD

You can print on any compatible, ink jet-printable CDs or DVDs, including Blu-ray Discs.

Caution: Do not insert the CD/DVD tray while the product is printing, copying, or performing other operations. Otherwise, your product may be damaged or the surface of the CD/DVD may become dirty or scratched.
**Note:** If you are using discs where the printable area extends to within 0.16 inch (4 mm) of the center hole, you may need to adjust the inner diameter setting using the control panel or EPSON Print CD software.

1. Burn your files, music, or video onto your disc before printing on it.
2. Press the 🏡 home button, if necessary.
3. Press the ⚙️ CD button, select **Load CD/DVD**, then press the **OK** button.
4. When you see a message asking if you want to prepare for CD loading, select **Yes** and press the **OK** button.
5. Raise the control panel all the way up.

![Control panel image]

6. Make sure nothing is on the output tray, then close it.

![Output tray image]

7. Close the front cover.
8. Remove the CD/DVD tray from the bottom of the product.

9. Place a CD or DVD on the CD/DVD tray with the printable side faceup, and insert the tray into the slot above the output tray.

   **Note:** Make sure the ▲ marks on the tray and the ▼ marks on the product line up.

10. Press **OK**.

   **Note:** The CD/DVD tray ejects automatically after a certain period of time.

   **Caution:** Do not turn off the product with a CD or DVD loaded in it. Always remove the disc first.

   **Parent topic:** Printing on CDs/DVDs
Removing a Printed CD/DVD

After your CD or DVD is printed, the tray extends automatically.

1. Pull the CD/DVD tray out of the product, and then remove your CD or DVD from the tray.

2. Insert the CD/DVD tray into the storage slot on the bottom of the product.

After printing, handle the CD or DVD carefully. You may need to wait up to 24 hours for the ink to dry fully before inserting it in a drive, depending on the type of disc you used. Keep printed discs away from moisture and direct sunlight.

**Parent topic:** Printing on CDs/DVDs
Placing a CD/DVD on the Scanner Glass

You can place a CD or DVD on the scanner glass and copy the label design onto another CD or DVD.

1. Open the document cover.
2. Place your CD or DVD facedown in the center of the scanner glass.
3. Close the document cover gently to keep your disc in place.

Parent topic: Printing on CDs/DVDs

Copying onto a CD/DVD

You can copy a printed photo or CD/DVD label directly onto an ink jet-printable CD or DVD. If you want, you can first print a test design on plain paper.

1. Load the CD, DVD, or plain paper you want to print on.
2. Press the home button, if necessary.
3. Press the CD button.
4. Select CD/DVD Copy and press OK.
5. Follow the instructions on the LCD screen to place your original CD, DVD, or photo on the scanner glass, then press OK.
6. If necessary, adjust the inner and outer diameter of your CD as shown on the screen, then press OK.

You see this screen:
7. Press the up or down arrows to select one of the options shown on the screen and press OK. If printing a test print on plain paper, press OK again.

8. Select any copy settings as needed.

9. When you are ready to print, press the start button.

Note: To cancel printing, press the stop button.

### Printing a Jewel Case Insert from a Memory Card

You can print a photo from a memory card, automatically sized to fit on a CD/DVD jewel case insert. You can also print thumbnail images formatted to fit on a jewel case insert. After the insert is printed, you can cut and fold it to fit.

1. Insert a memory card into a memory card slot on your product.
2. Load the paper you want to print on.
3. Press the home button, if necessary.
4. Press the left or right arrow buttons, select **More Functions**, then press OK.
5. Press the down arrow button, select **Photo Layout Sheet**, then press **OK**.

![Photo Layout Sheet](image)

6. Press the left or right arrow buttons and select one of the following:
   - **Jewel Upper** to print one photo on the upper half of the insert.
   - **Jewel Index** to print 24 or 48 thumbnail images on the insert.

7. Select your paper size and type, then press **OK**.

8. Follow the instructions on the LCD display to select your photos and set the number of copies.

9. When you are ready to print, press the start button.

   **Note:** To cancel printing, press the stop button.

10. After your insert is printed, cut and fold it following the crop lines.

Adjusting CD/DVD Print Quality - Windows

Parent topic: Printing on CDs/DVDs from a Computer

Designing a CD/DVD - Windows

You can use EPSON Print CD to design your disc by importing photos, adding text, and creating special effects.

1. Open the EPSON Print CD program on your computer.

You see this screen:
2. Use the buttons on the left side of the screen to select a pre-designed template or add a background image, picture, text, or graphic elements. For more information, select the Help menu.

3. When you are finished creating your design, click Save and save your design file.

Parent topic: Printing on a CD/DVD with Windows

Printing Your CD/DVD Design - Windows

After you create your design, you can print it on paper to test it, then print it on the CD or DVD that contains your data, photos, video, or music. Make sure the disc is loaded for printing before you start.

1. Open your file in EPSON Print CD and click Print.

   You see this screen:

   ![Print dialog box](image)

2. Make sure your product is selected as the Printer setting.

3. To see how your design will look without printing on the disc, click Test Print and follow the instructions on the screen.

4. When you are ready to print on the disc, click the Print button on the screen.

5. Click Print.
Parent topic: Printing on a CD/DVD with Windows

Adjusting CD/DVD Print Position - Windows

If your printed design is not positioned correctly on the disc, you can adjust the print position. First, load an extra CD/DVD to use for printing test patterns.

1. Open your file in EPSON Print CD and click **Print**.
   
   You see this screen:
   
   ![Print screen](image)

2. Select **Print Position Confirmation Pattern**.
3. Click **Print**.
4. Remove the disc after printing.
5. Using a metric ruler, measure the distance from the hole to the cross marks labeled **Top** and **Right**.

   **Note:** Be sure to measure from the edge of the hole and not the edge of the printable area.

6. Click **Print** again, then select **Adjust Print Position**.
   
   You see this screen:
7. Click **Enter Values**, then select the distance for Top into the **Height (Top)** box and the distance for Right in the **Width (Right)** box.

8. Click **OK**.

**Parent topic:** Printing on a CD/DVD with Windows

Adjusting CD/DVD Print Quality - Windows

If ink smears on your disc or is sticky after it dries, you can adjust the color saturation and ink density. This may be necessary to make sure your designs look their best on the particular brand of discs you are using. First, load an extra CD/DVD to use for printing test patterns.

1. Open your file in EPSON Print CD and click **Print**.
   You see this screen:
2. Select Print Density Confirmation Pattern.
3. Click Print.
4. Remove the disc after printing and check to see if you need to make the density darker or lighter.
5. Load the same disc in the product again.
6. Click Print.
7. Adjust the Print Color Correction slider to a darker or lighter setting as necessary.
8. Select Print Density Confirmation Pattern and select the Second radio button.
9. Click Print to print another test pattern
10. Examine the disc after printing to see if further adjustment is needed.
    When the ink density looks good, you are ready to print on your burned CD or DVD.

Purchase EPSON Ink Cartridges

You can purchase genuine EPSON ink and paper at EPSON Supplies Central at www.epson.com/ink3 (U.S. sales) or www.epson.ca (Canadian sales). You can also purchase supplies from an EPSON authorized reseller. To find the nearest one, call 800-GO-EPSON (800-463-7766).

**Note:** We recommend that you use genuine EPSON cartridges and do not refill them. The use of other products may affect your print quality and could result in printer damage.

The cartridges included with the printer are designed for printer set up and not for resale. After some ink is used for priming, the rest is available for printing. Yields vary considerably based on images printed, print settings, paper type, frequency of use, and temperature. For print quality, a variable amount of ink remains in the cartridge after the "replace cartridge" indicator comes on.

Ink Cartridge Part Numbers

Parent topic: Replacing Ink Cartridges

Ink Cartridge Part Numbers

Use these part numbers when you order or purchase new ink cartridges.

**Note:** For best printing results, use up a cartridge within 6 months of opening the package.

**Removing and Installing Ink Cartridges**

Make sure you have your replacement cartridges handy before you begin. You must install new cartridges immediately after removing the old ones.

**Caution:** Leave your old cartridges in the printer until you are ready to replace them to prevent the print head nozzles from drying out. Do not open ink cartridge packages until you are ready to install the ink. Cartridges are vacuum packed to maintain reliability.

1. Make sure that the CD/DVD tray is not inserted for printing.
2. Turn on your product.
   - If an ink cartridge is expended, you see a message on the LCD screen. Note which cartridges need to be replaced and press OK. Then select Yes, replace now and press OK.
   - If you are replacing a cartridge before you see a message on the LCD screen, press the left or right arrow buttons, select Setup > OK > Maintenance > OK > Ink Cartridge Replacement > OK. Then press the start button.
3. Lift up the scanner unit.

Caution: Do not move the print head by hand; otherwise, you may damage your product. Do not touch the flat white cable inside the printer.

4. Push in the blue tab to unlock the ink cartridge you are replacing. Then lift the bottom of the ink cartridge to remove it.

Warning: If ink gets on your skin, wash it thoroughly with soap and water. If ink gets into your eyes, flush them immediately with water. If ink gets into your mouth, spit it out and see a doctor right away. Keep ink cartridges out of the reach of children.
5. Recap the used ink cartridge using the cap that came with it.

![Recap ink cartridge](image)

**Note:** Dispose of used cartridges carefully. Do not take the used cartridge apart or try to refill it.

6. If you are replacing the Black (BK) ink cartridge, it is recommended that you shake the new cartridge gently four or five times before unwrapping it. You do not need to shake the Photo Black (PBK) cartridge or any of the other color ink cartridges.

![Shake new cartridge](image)

**Caution:** Do not shake the cartridges after opening the packages, or ink may leak.
7. Remove the cartridge from the package.

Caution: Do not touch the areas shown above. Doing so may prevent normal operation and printing.

8. Remove the cap from the cartridge and store it in the bag that came with your product for later use.

Note: Save the cap so you can recap ink cartridges before storing or disposing of them.

Caution: Do not remove any other labels or seals, or ink will leak.
9. Insert the ink cartridge head first into the ink cartridge holder. Then press the bottom of the ink cartridge down until it clicks into place.

10. Once you replace all the cartridges that need replacing, close the scanner unit.

The product starts priming the ink. This takes a few minutes. When you see a completion message on the LCD screen, ink replacement is complete.

**Note:** If you see an error screen telling you an ink cartridge is installed incorrectly, lift up the scanner unit and press the ink cartridge down until it clicks into place. When you're finished, close the scanner unit.

If you remove a low or expended ink cartridge, you cannot re-install and use the cartridge.

**Caution:** If you remove an ink cartridge for later use, recap the ink cartridge using the cap that came with it to prevent the ink from drying out and to protect the surrounding area from getting smeared by ink.
Store the ink cartridge in the same environment as the product. Do not leave the product with the ink cartridges removed for an extended period of time. Otherwise, ink remaining in the print head nozzles may dry out and you may not be able to print.

### Print Head Alignment

If your printouts become grainy or blurry, you notice misalignment of vertical lines, or you see dark or light horizontal bands, you may need to align the print head.

**Note:** Banding may also occur if your print head nozzles need cleaning.

- Aligning the Print Head Using the Product Control Panel
- Aligning the Print Head Using a Computer Utility
Aligning the Print Head Using the Product Control Panel

You can align the print head using the control panel on your product.

1. Make sure the CD/DVD tray is not inserted for printing.
2. Load a few sheets of plain paper in the product.
3. Press the home button, if necessary.
4. Press the arrow buttons to select Setup, then press OK.
5. Press the arrow buttons to select Maintenance, then press OK.
6. Press the arrow buttons to select **Print Head Alignment**, then press **OK**.

![Print Head Alignment](image)

7. Press the start button to print an alignment sheet.

   **Note:** Do not cancel printing while you are printing a head alignment pattern.

8. Check the printed pattern and select the number representing the best printed pattern for each set.

9. Press the **OK** button when you are finished.

**Parent topic:** Print Head Alignment

### Aligning the Print Head Using a Computer Utility

You can align the print head using a utility on your Windows computer or Mac.

1. Make sure the CD/DVD tray is not inserted for printing.
2. Load a few sheets of plain paper in the product.
3. Do one of the following:
   - **Windows:** Right-click the product icon in the Windows taskbar.
   - **Mac OS X 10.6/10.7/10.8:** In the Apple menu or the Dock, select **System Preferences**, select **Print & Fax** or **Print & Scan**, select your product, and select **Options & Supplies**, select **Utility** and select **Open Printer Utility**.
   - **Mac OS X 10.5:** In the Apple menu or the Dock, select **System Preferences**, select **Print & Fax**, select your product, and select **Open Print Queue**, select **Utility**.
4. Select **Print Head Alignment**.
5. Click **Next**, then click **Print** to print an alignment sheet.

**Note:** Do not cancel printing while you are printing a head alignment pattern.

You see one of these windows:
6. Check the printed pattern and follow the instructions on the screen to choose the number representing the best printed pattern for each set.
   • After choosing each pattern number, click **Next**.
   • If no patterns are aligned in one or more of the sets, choose the closest one in each set and click **Realignment**. Then print another alignment sheet and check it.

   **Note:** Click **Skip** (where available) if you want to skip a particular alignment sheet.

7. When you are done, click **Finish**.

**Parent topic:** Print Head Alignment
Cleaning the Paper Path

If you see ink on the back of a printout, you can clean the paper path to remove any excess ink.

1. Load a few sheets of plain paper in the product.
2. Use the product control panel to make a copy, but without placing a document on the scanner glass.
3. Check the back of the ejected paper to see if it is clean.
4. Repeat as necessary until the paper comes out clean.

Cleaning and Transporting Your Product

See these sections if you need to clean or transport your product.

Cleaning Your Product
Transporting Your Product

Cleaning Your Product

To keep your product working at its best, you should clean it several times a year. Close the output tray and front cover when you are not using the product to protect it from dust.

**Caution:** Do not use a hard brush, alcohol, or paint thinner to clean the product or you may damage it. Do not use oil or other lubricants inside the product or let water get inside it.

1. Turn off the product.
2. Unplug the power cable.
3. Disconnect any connected cables.
4. Remove all the paper.
5. Clean the scanner glass with a soft, lint-free cloth (microfiber is recommended), moistened with a little glass cleaner.

**Caution:** Do not spray glass cleaner directly on the glass and do not press the glass surface with any force.

6. Clean the outer case and control panel with a soft, dry cloth. Do not use liquid or chemical cleansers.

Parent topic: Cleaning and Transporting Your Product

Transporting Your Product

If you need to ship your product or transport it a long distance, prepare it for transportation as described here.

**Caution:** During transportation and storage, follow these guidelines:

- Avoid tilting the product, placing it vertically, or turning it upside down; otherwise ink may leak.
• Leave the ink cartridges installed. Removing the cartridges can dry out the print head and may prevent the product from printing.
• Do not carry the product by its control panel; this may damage the product.

1. Turn off the product.
2. Lift up the scanner unit and check to see if the print head is in the far right position (the home position). If not, turn on the product, wait for the print head to move, then turn the product off again.

**Caution:** Do not place tape on the white flat cable inside the product; otherwise, you may damage your product.

4. Lower the scanner unit.
5. Remove all the paper from the product.
6. Unplug the power cable.
7. Disconnect any connected cables.
8. Close the output tray, then lower the control panel.

9. Place the product in its original packing materials, if possible, or use equivalent materials with cushioning around the product.

Keep the product level during transportation. Be sure to remove the tape from the ink cartridge holder before turning on your product. If print quality has declined when you print again, clean and align the print head.

Checking for Software Updates

Periodically, it's a good idea to check Epson's support website for free updates to your product software. You can select Download the Latest Software from the Home screen of this manual or visit Epson's driver download site (U.S. downloads or Canadian downloads).

With Windows, your printer software automatically checks for updates. You can also manually update the software by selecting Software Update or Driver Update here:

- Right-clicking the product icon in the Windows taskbar
- On the Maintenance tab in the printer settings window
- In the EPSON program group under your product name

**Running a Product Check**

Running a product check helps you determine if your product is operating properly.

1. Disconnect any interface cables connected to your product.
2. Load plain paper in the product.
3. Press the home button, if necessary.
4. Press the arrow buttons to select Setup, then press OK.
5. Press the arrow buttons to select **Maintenance**, then press **OK**.

6. Select **Nozzle Check**, then press **OK**.

7. Press the start button.  
The nozzle check pattern is printed.

8. Do one of the following, depending on the results of the product check:
   - If the page prints and the nozzle check pattern is complete, the product is operating properly. Any operation problem you may have could be caused by your computer, cable, software, or selected
settings. Check the other solutions in this book or try uninstalling and reinstalling your printer software.

• If the page prints but the nozzle check pattern has gaps, clean or align the print head.
• If the page does not print, the product may have a problem. Check the other solutions in this manual. If they do not work, contact Epson.

Resetting Control Panel Defaults

If you have a problem with settings on the product control panel, you can reset them to their factory defaults. You can choose which settings to reset or reset them all.

1. Press the home button, if necessary.
2. Press the arrow buttons, select Setup, then press OK.
3. Press the arrow buttons, select Restore Default Settings, then press OK.
4. Select one of these options:
   • **Wi-Fi/Network Settings**: Resets all network settings.
   • **All except Wi-Fi/Network & Fax Settings**: Resets all control panel settings, except for network settings.
   • **All Settings**: Resets all control panel settings.
   
   You see a confirmation screen.

5. Select **Yes** to reset the selected settings. (Select **No** if you want to cancel the operation.)

Check these sections if you have problems while setting up your product.

- Noise After Ink Installation
- Software Installation Problems
- Control Panel Setup Problems

Parent topic: Solving Problems

---

**Noise After Ink Installation**

If you hear noises from your product after installing ink, check the following:

- The first time you install ink cartridges, the product must prime its print head. Wait until priming finishes before you turn off the product, or it may prime improperly and use excess ink the next time you turn it on. Your product is finished priming the print head when the power light stops flashing.
- If the product's print head stops moving or making noise, and the charging process has not finished after approximately 5 minutes, turn off your product. Turn it back on and check to see if charging is still in progress. If it is still in progress, contact Epson for help.

Software Installation Problems

If you have problems while installing your product software, try these solutions:

- Make sure your product is turned on and the USB cable is securely connected at both ends. If you still have problems installing software, disconnect the cable and carefully follow the instructions on the Start Here sheet. Also make sure your system meets the requirements for your operating system.
- Close any other programs, including screen savers and virus protection software, and install your product software again.
- In Windows, make sure your product is selected as the default printer and the correct port is shown in the printer properties.
- If you see any error message or your software does not install correctly in Windows, you may not have software installation privileges. Contact your System Administrator.

Parent topic: Solving Network Problems

Product Cannot Connect to a Wireless Router or Access Point

If your product has trouble finding or connecting to a wireless router or access point, try these solutions:

- Make sure to place your product within contact range of your router or access point.

  Note: Avoid placing your product near a microwave oven, 2.4 GHz cordless phone, or large metal object, such as a filing cabinet.

- Verify that your router or access point is operating correctly by connecting to it from your computer or another device.

- You may need to disable the firewall and any anti-virus software on your wireless router or access point.

- Check to see if access restrictions, such as MAC address filtering, are set on the router or access point. If access restrictions are set, add your product’s MAC address to your router’s address list. To obtain your product’s MAC address, print a network status sheet. Then follow the instructions in your router or access point documentation to add the address to the list.

- If your router or access point does not broadcast its network name (SSID), follow the instructions that came with your product to enter your wireless network name manually.

- If your router or access point has security enabled, determine the kind of security it is using and any required password or passphrase for connection. Then make sure to enter the exact WEP key or WPA passphrase correctly.

Parent topic: Solving Network Problems
Network Software Cannot Find Product on a Network
If EpsonNet Setup cannot find your product on a network, try these solutions:
• Make sure your product is turned on and connected to your network. Verify connection using your product control panel.
• If necessary, reinstall your product software and try running EpsonNet Setup again.

When to Uninstall Your Product Software

Cannot Print Over a Network
If you cannot print over a network, try these solutions:
• Make sure that your product is turned on.
• Make sure you install your product’s network software as described in your product documentation.
• Print a network status sheet and verify that the network settings are correct. If the network status is **Disconnected**, check any cable connections and turn your product off and then on again.
• If you are using TCP/IP, make sure the product’s IP address is set correctly for your network. If your network does not assign IP addresses using DHCP, set the IP address manually.
• Make sure your computer and product are both using the same wireless network.
• If network printing is slow, print a network status sheet and check the signal strength. If it is poor, place your product closer to your router or access point.

**Note:** Avoid placing your product near a microwave oven, 2.4 GHz cordless phone, or large metal object, such as a filing cabinet.
• Check your wired LAN router or access point to see if the LED for the port to which your product is connected is on or flashing. If the link LED is off, try the following:
  • Make sure the Ethernet cable is securely connected to your product and to your router, access point, switch, or hub.
  • Try connecting your product to a different port or a different router, access point, switch, or hub.
  • Try connecting with a different Ethernet cable.
  • Try printing to your product from another computer on the network.
  • If you are connecting the product via EpsonNet Setup and the WiFi light on your product is not solid green, make sure your product software was installed correctly. If necessary, reinstall your software.

Printing a Network Status Sheet

Cannot Scan Over a Network

If you cannot start EPSON Scan for scanning over a network, try these solutions:

• If you are scanning a large original at a high resolution, a network communication error may occur. Try scanning again at a lower resolution.

• If network communication was interrupted while starting EPSON Scan, exit EPSON Scan, wait a few seconds, and restart it. If EPSON Scan cannot restart, turn off your product, turn it back on, and try restarting EPSON Scan again.

• Check the connection setting and test the connection using EPSON Scan Settings:
  
  **Windows:** Click 🎨 or Start > All Programs or Programs > EPSON > EPSON Scan > EPSON Scan Settings. Make sure the Connection setting is set to Network, then click the Test button.

  **Mac OS X:** Open the Applications folder, click Epson Software, and click EPSON Scan Settings. Make sure the Connection setting is set to Network, then click the Test button.

  • Make sure the option selected as the Timeout Setting in the EPSON Scan Settings program is long enough to complete scanning over a network.

  • You may need to disable the firewall and any anti-virus software on your wireless router or access point.
Note: With Mac OS X 10.6, 10.7, or 10.8, in addition to scanning with Image Capture, you can download and install EPSON Scan scanning software. EPSON Scan provides additional image adjustment and photo correction features for enhancing scanned images, and provides an interface for TWAIN-compliant OCR scanning software, such as ABBYY FineReader. To download EPSON Scan, visit Epson's driver download site (U.S. downloads or Canadian downloads).

Printing a Network Status Sheet
You can print a network status sheet to help you determine the causes of any problems you may have using your product on a network.

1. Press the home button, if necessary.
2. Press the arrow buttons, select Setup, then press OK.
3. Press the arrow buttons, select Wi-Fi/Network Settings, then press OK.

4. Select Wi-Fi Status, then press OK.
5. Press the start button to print the network status sheet.
   (Press the stop button if you want to cancel the operation.)

Examine the settings shown on the network status sheet to diagnose any problems you have.
Solving Copying Problems

Check these solutions if you have problems copying with your product.

Product Makes Noise, But Nothing Copies

Product Makes Noise When It Sits for a While

Product Makes Noise, But Nothing Copies

If your product makes a noise, but nothing copies, try these solutions:

- Run a nozzle check to see if any of the print head nozzles are clogged. Then clean the print head, if necessary.
- If the nozzle check page does not print, but the product's power light is on, make sure your product software is installed correctly.
- Make sure your product is level (not tilted).

Product Makes Noise When It Sits for a While

Your product is performing routine maintenance. This is normal.

Solving Paper Problems

Paper Jam Problems in the Paper Cassette
Paper Jam Problems in the Auto Duplexer
Paper Ejection Problems
Paper Feeding Problems

If you have problems feeding paper, try these solutions:

• If paper does not feed correctly, remove and reload it against the right side of the cassette and adjust the edge guides. Make sure the paper stack is not above the tab on the edge guides inside the cassette.
• If multiple pages feed at once, remove the paper, fan the edges to separate the sheets, and reload it.
• Do not load more than the recommended number of sheets.
• If paper jams when you print on both sides of the paper, try loading fewer sheets.
• For best results, follow these guidelines:
  • Use new, smooth, high-quality paper that is not curled, creased, old, too thin, or too thick.
  • Load paper in the cassette printable side down.
  • Do not load paper with holes punched in it.
  • Follow any special loading instructions that came with the paper.

Solving Problems Printing from a Computer

Check these sections if you have problems while printing from your computer.

Nothing Prints
Product Icon Does Not Appear in Windows Taskbar
Error After Cartridge Replacement
Printing is Slow

Parent topic: Solving Problems

Nothing Prints

If you have sent a print job and nothing prints, try these solutions:

• Make sure your product is turned on.

• Make sure any interface cables are connected securely at both ends.

• If you connected your product to a USB hub, make sure it is a first-tier hub. If it still does not print, connect your product directly to your computer instead of the hub.
• Run a product check to see if a test page prints. If the test page prints, check to see if your product software is installed correctly.
• In Windows, make sure your product is selected as the default printer.
• In Windows, clear any stalled print jobs from the Windows Spooler:
  • **Windows 7:** Click ![Device Manager](image) and select **Devices and Printers.** Right-click your product name, select **See what’s printing,** select your product name again if necessary, right-click the stalled print job, click **Cancel,** and click **Yes.**
  • **Windows Vista:** Click ![Device Manager](image) and select **Control Panel.** Click **Printer** under **Hardware and Sound,** right-click your product name, select **Open,** right-click the stalled print job, click **Cancel,** and click **Yes.**
  • **Windows XP:** Click **Start** and select **Printers and Faxes.** (Or open the **Control Panel,** select **Printers and Other Hardware** if necessary, and select **Printers and Faxes.**) Right-click your product name, select **Open,** right-click the stalled print job, click **Cancel,** and click **Yes.**

Related tasks

Running a Product Check

**Product Icon Does Not Appear in Windows Taskbar**

If you do not see your product icon in the Windows taskbar, first try restarting your computer. If that does not work, try this solution:

1. Do one of the following:
   • **Windows 7:** Click ![Device Manager](image) and select **Devices and Printers.**
   • **Windows Vista:** Click ![Device Manager](image), select **Control Panel,** and click **Printer** under **Hardware and Sound.**
   • **Windows XP:** Click **Start** and select **Printers and Faxes.** (Or open the **Control Panel,** select **Printers and Other Hardware** if necessary, and select **Printers and Faxes.**) Right-click your product name, select **Open,** right-click the stalled print job, click **Cancel,** and click **Yes.**

2. Right-click your product name, select **Printing Preferences,** and select your product name again if necessary.
3. Click the **Maintenance** tab.
4. Click the **Speed & Progress** or **Extended Settings** button.
5. Click the **Monitoring Preferences** button.
6. Click the **Shortcut Icon** box.
7. Click **OK** to close the open program windows.

**Parent topic:** Solving Problems Printing from a Computer

## Error After Cartridge Replacement

If you see an error light or error message after you replace an ink cartridge, follow these steps:

1. Make sure the print head is in the ink cartridge replacement position. (The ink cartridge holder should be beneath the cutout in the product case, allowing access to the cartridges.)

   **Note:** If the print head is not in the correct position, close the scanner unit, then select **Setup > Maintenance > Ink Cartridge Replacement** to move it to the ink cartridge replacement position.

2. Remove and reinsert the ink cartridge you replaced, making sure to push it all the way into its slot.

3. Complete the ink cartridge installation steps.

**Parent topic:** Solving Problems Printing from a Computer

**Related topics**

Replacing Ink Cartridges

## Printing is Slow

If printing becomes slow, try these solutions:

- Make sure your system meets the requirements for your operating system. If you are printing a high-resolution image, you may need more than the minimum requirements. If necessary, increase your system's memory.
- If you are using Windows 7, close the **Devices and Printers** window before you print.
- Clear space on your hard drive or run a defragmentation utility to free up existing space.
- Close any programs you are not using when you print.
- If your product is connected to a USB hub, connect it directly to your computer instead.
- If printing becomes slower after printing continuously for a long time, the product may have automatically slowed down to protect the print mechanism from overheating or becoming damaged. Let the product rest with the power on for 30 minutes, then try printing again.

For the fastest printing, select the following settings in your product software:

- Make sure the paper type setting matches the type of paper you loaded.
- Turn on any high speed settings in your product software.
• Select a lower print quality setting.
• **Windows**: Click the **Maintenance** tab, select **Speed & Progress** or **Extended Settings**, and select the following settings:
  • **High Speed Copies**
  • **Always spool RAW datatype**
  • **Page Rendering Mode**
  • **Print as Bitmap**

**Parent topic**: Solving Problems Printing from a Computer

## Too Many Copies Print
Make sure that the **Copies** setting in your printing program or printer software is not set for multiple copies.

**Parent topic:** Solving Page Layout and Content Problems

## Blank Pages Print
If blank pages print unexpectedly, try these solutions:
• Make sure you selected the correct paper size settings in your printing program and printer software.
• If a blank page exists in a document you are printing and you want to skip printing it, select the **Skip Blank Page** setting in your printer software.
• Run a print head nozzle check to see if any of the nozzles are clogged. Then clean the print head, if necessary.
• Make sure your product is selected as the printer in your printing program.

Incorrect Margins on Printout

If your printed page has incorrect margins, try these solutions:

- Make sure you selected the correct paper size settings in your printing program and printer software.
- Make sure you selected the correct margins for your paper size in your printing program.
- Make sure your paper is positioned correctly for feeding into the printer.

You can use the preview option in your printer software to check your margins before you print.

Border Appears on Borderless Prints

If you see a border on borderless prints, try these solutions:

- Make sure you are printing on a compatible borderless paper type and size.

  Note: Do not select a custom paper size for borderless prints.

- Windows: Make sure you selected the Borderless setting in your printer software.
- Mac OS X: Make sure you selected the Borderless checkbox or a paper size with a Borderless option in your printer software.
- Adjust the Expansion setting to adjust the amount of image expansion on the edges of borderless prints.
- Make sure the image size and the paper size are set correctly; if the image is small, the enlargement may not be enough to cover the paper.

Incorrect Characters Print
If incorrect characters appear in your prints, try these solutions before reprinting:
• Make sure any cables are securely connected at both ends.
• In Windows, delete all print jobs from the Windows Spooler:
  • Windows 7: Click \device: and select Devices and Printers. Right-click your product name, select See what’s printing, select your product name again if necessary, right-click the stalled print job, click Cancel, and click Yes.
  • Windows Vista: Click \device: and select Control Panel. Click Printer under Hardware and Sound, right-click your product name, select Open, right click the stalled print job, click Cancel, and click Yes.
  • Windows XP: Click Start and select Printers and Faxes. (Or open the Control Panel, select Printers and Other Hardware if necessary, and select Printers and Faxes.) Right-click your product name, select Open, right-click the stalled print job, click Cancel, and click Yes.
• Make sure your product is selected as the printer in your printing program.
• If your product is connected to a USB hub, connect it directly to your computer instead.
Parent topic: Solving Page Layout and Content Problems

Incorrect Image Size or Position
If your printed image is the wrong size or in the wrong position, try these solutions:
• Make sure you selected the correct paper size and layout settings in your printing program and printer software.
• Make sure your paper is positioned correctly for feeding into the printer.
You can use the preview option in your printer software to check your margins before you print.

Solving Print Quality Problems

Check these sections if your printouts have problems with print quality, but your image looks fine on your computer screen.

- White or Dark Lines in Printout
- Blurry or Smeared Printout
- Faint Printout or Printout Has Gaps
- Grainy Printout
- Incorrect Colors

**Parent topic:** Solving Problems

White or Dark Lines in Printout

If you notice white or dark lines in your prints (also called banding), try these solutions before you reprint:

- Run a nozzle check to see if any of the print head nozzles are clogged. Then clean the print head, if necessary.
- Make sure the paper type setting matches the type of paper you loaded.
• Make sure you loaded the printable side of the paper facedown in the cassette.
• Turn off any high speed settings in your product software.
• Align the print head.
• You may need to replace the ink cartridges.

**Blurry or Smeared Printout**

If your printouts are blurry or smeared, try these solutions:

• Make sure your paper is not damp, curled, old, or loaded faceup in the cassette (the printable side should be facedown).
• Use a support sheet with special paper, or load special paper one sheet at a time.
• Make sure your paper meets the specifications for your product.
• Use EPSON papers to ensure proper saturation and absorption of genuine EPSON inks.
• Make sure the paper type setting in your product software matches the type of paper you loaded.
• Remove each sheet from the output tray as it is printed.
• Avoid handling printouts on glossy paper right after printing to allow the ink to set.
• Turn off any high speed settings in your product software.
• If you print on both sides of a sheet of paper, smudges may appear on the reverse side of heavily saturated or dark images. If one side of a sheet will contain a lighter image or text, print that side first. Adjust the Print Density and/or Increased Ink Drying Time settings.
• Run a nozzle check to see if any of the print head nozzles are clogged. Then clean the print head, if necessary.
• Align the print head.
• Clean the paper path.

Note: Your product will not operate properly while tilted at an angle. Place it on a flat, stable surface that extends beyond the base of the product in all directions.

Faint Printout or Printout Has Gaps
If your printouts are faint or have gaps, try these solutions:
• Run a nozzle check to see if any of the print head nozzles are clogged. Then clean the print head, if necessary.
• The ink cartridges may be old or low on ink, and you may need to replace them.
- Make sure the paper type setting matches the type of paper you loaded.
- Make sure your paper is not damp, curled, old, or loaded faceup in the cassette (the printable side should be facedown).
- Align the print head.
- Clean the paper path.

Incorrect Colors

If your printouts have incorrect colors, try these solutions:

• Make sure the Black/Grayscale or Grayscale setting is not selected in your printer software.
• Run a nozzle check to see if any of the print head nozzles are clogged. Then clean the print head, if necessary.
• The ink cartridges may be old or low on ink, and you may need to replace them.
• Your printed colors can never exactly match your on-screen colors. However, you can use a color management system to get as close as possible. Try using the color management options in your printer software.
• For best results, use genuine EPSON ink and paper.

Solving Scanning Problems

Check these solutions if you have problems scanning with your product.

Scanning Software Does Not Operate Correctly

If your scanning software does not operate correctly, try these solutions:

• Make sure your computer has adequate memory and meets the system requirements for your operating system.

• Make sure your computer is not running in a power-saving mode, such as sleep or standby. If so, wake your system and restart your scanning software.

• If you upgraded your operating system but did not reinstall your scanning software, try reinstalling it.

Note: With Mac OS X 10.6, 10.7, or 10.8, in addition to scanning with Image Capture, you can download and install EPSON Scan scanning software. EPSON Scan provides additional image adjustment and photo correction features for enhancing scanned images, and provides an interface for TWAIN-compliant OCR scanning software, such as ABBYY FineReader. To download EPSON Scan, visit Epson's driver download site (U.S. downloads or Canadian downloads).

Cannot Start EPSON Scan

If you cannot start EPSON Scan, try these solutions:

• Make sure your product is turned on and any interface cables are securely connected at both ends.

• Make sure EPSON Scan is selected in your scanning program.
• Make sure your computer is not running in a power-saving mode, such as sleep or standby. If so, wake your system and restart EPSON Scan.

• Check the connection setting and test the connection using EPSON Scan Settings:

  **Windows:** Click 📱 or Start > All Programs or Programs > EPSON > EPSON Scan > EPSON Scan Settings. Make sure the correct **Connection** setting is selected, then click the **Test** button.

  **Mac OS X:** Open the **Applications** folder, click **Epson Software**, and click **EPSON Scan Settings**. Make sure the correct **Connection** setting is selected, then click the **Test** button.

• Make sure you do not have multiple versions of EPSON Scan installed. If you do, uninstall both versions and install one version.

• If you upgraded your operating system but did not reinstall EPSON Scan, try reinstalling it.

**Note:** With Mac OS X 10.6, 10.7, or 10.8, in addition to scanning with Image Capture, you can download and install EPSON Scan scanning software. EPSON Scan provides additional image adjustment and photo correction features for enhancing scanned images, and provides an interface for TWAIN-compliant OCR scanning software, such as ABBYY FineReader. To download EPSON Scan, visit Epson's driver download site (U.S. downloads or Canadian downloads).

**Solving Scanned Image Quality Problems**

Check these sections if a scanned image on your computer screen has a quality problem.

- Image Consists of a Few Dots Only
- Line of Dots Appears in All Scanned Images
- Straight Lines in an Image Appear Crooked
- Image is Distorted or Blurry
- Image Colors are Patchy at the Edges
- Image is Too Dark
- Back of Original Image Appears in Scanned Image
- Ripple Patterns Appear in an Image
Image Consists of a Few Dots Only

If your scanned image consists only of a few dots, try these solutions:

- Make sure you placed your original for scanning facing the correct way.
- If you are scanning using the EPSON Scan Black & White setting, adjust the Threshold setting and scan again.

Line of Dots Appears in All Scanned Images

If a line of dots appears in all your scanned images, clean the scanner glass with a soft, dry, lint-free cloth or use a small amount of glass cleaner on the cloth, if necessary. Paper towels are not recommended.

Caution: Do not spray glass cleaner directly on the scanner glass.

Straight Lines in an Image Appear Crooked

If straight lines in an original appear crooked in a scanned image, make sure to place your original straight when you scan it.
Image is Distorted or Blurry

If a scanned image appears distorted or blurry, try these solutions:

- Make sure your original is not wrinkled or warped. This may prevent the original from laying flat on the scanner glass.
- Do not move your original or your product during scanning.
- Your product will not operate properly while tilted at an angle. Place it on a flat, stable surface that extends beyond the base of the product in all directions.
- Adjust these EPSON Scan settings (if available) and try scanning again:
  - Select the Unsharp Mask setting.
  - Adjust the Auto Exposure setting.
  - Increase the Resolution setting.

Image Colors are Patchy at the Edges

If you are scanning a thick or warped original, cover its edges with paper to block external light as you scan it.

Image is Too Dark

If your scanned image is too dark, try these solutions:

- Adjust these EPSON Scan settings (if available) and try scanning again:
  - Auto Exposure
  - Brightness
  - Histogram Adjustment
- Check the brightness and contrast settings of your computer monitor.
Back of Original Image Appears in Scanned Image

If an image from the back of a thin original appears in your scanned image, place a piece of black paper on the back of the original and scan it again.

Ripple Patterns Appear in an Image

You may see a ripple pattern (called a moiré) in scanned images of printed documents. This is caused by interference from differing pitches in the scanner’s screen and your original’s halftone screen. To reduce this effect, adjust these EPSON Scan settings (if available) and try scanning again:

- Select the Descreening setting.
- Select a lower Resolution setting.

Scanned Image Colors Do Not Match Original Colors

Printed colors can never exactly match the colors on your computer monitor because printers and monitors use different color systems: monitors use RGB (red, green, and blue) and printers typically use CMYK (cyan, magenta, yellow, and black).

Check the color matching and color management capabilities of your computer, display adapter, and the software you are using to see if they are affecting the palette of colors you see on your screen.

To adjust the colors in your scanned image, adjust these EPSON Scan settings (if available) and try scanning again:

- Change the Image Type setting and experiment with different combinations of the next settings.
- Adjust the Tone Correction setting.
- Adjust the Auto Exposure setting.
Scan Area is Not Adjustable in Thumbnail Preview

If you cannot adjust the scan area while viewing a Thumbnail preview in EPSON Scan, try these solutions:

- Create a scan area by drawing a marquee on your preview image and adjusting it as necessary.
- Switch to Normal preview mode, if available, and preview your image again.

When to Uninstall Your Product Software
If you have a problem that requires you to uninstall and re-install your software, follow the instructions for your operating system.

Uninstalling Product Software - Windows
Uninstalling Product Software - Mac OS X

Parent topic: Solving Problems

Uninstalling Product Software - Windows
You can uninstall and then re-install your product software to solve certain problems.

1. Turn off the product.
2. Disconnect any interface cables.
3. Click or Start, and select All Programs or Programs.
4. Select EPSON, select your product, then click EPSON Printer Software Uninstall.

Note: If you see a User Account Control window, click Yes or Continue.

5. In the next window, select your product and click OK. Then follow any on-screen instructions.
6. Open the Windows Control Panel utility.
7. Do one of the following to uninstall EPSON Event Manager, then follow any on-screen instructions:
   • Windows 7 or Windows Vista: Select Programs and Features. (In Classic view, select Programs and click Uninstall a program.) Select Epson Event Manager and click Uninstall/Change.
• **Windows XP**: Double-click **Add or Remove Programs**. Select **Epson Event Manager** and click **Change/Remove**.

8. Do one of the following to uninstall EPSON Scan, then follow any on-screen instructions:
   - **Windows 7 or Windows Vista**: Select **EPSON Scan** and click **Uninstall/Change**.
   - **Windows XP**: Select **EPSON Scan** and click **Change/Remove**.

9. Restart your computer, then see the **Start Here** sheet to re-install your software.

   **Note**: If you find that re-installing your product software does not solve a problem, contact Epson.

---

**Parent topic**: When to Uninstall Your Product Software

### Uninstalling Product Software - Mac OS X

In most cases, you do not need to uninstall your product software before re-installing it. However, you can download the Uninstaller utility from the Epson support website to uninstall your product software as described here.

**Note**: If you find that re-installing your product software does not solve a problem, contact Epson.

1. To download the Uninstaller utility, visit the Epson download site ([U.S. downloads](https://www.epson.com/support) or [Canadian downloads](https://www.epson.ca/support)).
2. Follow the instructions on the screen to install the Uninstaller utility.
3. Quit all applications currently running on your Mac.
4. Double-click the **Uninstaller** icon.
5. Select the checkbox for each software program you want to uninstall.
6. Click **Uninstall**.
7. Follow the on-screen instructions to uninstall the software.
8. To reinstall your product software, see the **Start Here** sheet for instructions.

   **Note**: If you uninstall the printer driver and your product name remains in the Print & Fax or Print & Scan window, select your product name and click the – (remove) icon to remove it.

**Parent topic**: When to Uninstall Your Product Software
Where to Get Help

If you need to contact Epson for technical support services, use the following support options.

Internet Support
Visit Epson’s support website at www.epson.com/support (U.S.) or www.epson.ca/support (Canada) for solutions to common problems. You can download drivers and documentation, get FAQs and troubleshooting advice, or e-mail Epson with your questions.

Speak to a Support Representative
Before you call Epson for support, please have the following information ready:

• Product name
• Product serial number (located on a label on the product)
• Proof of purchase (such as a store receipt) and date of purchase
• Computer configuration
• Description of the problem

Then call:

• U.S.: (562) 276-4382, 6 AM to 8 PM, Pacific Time, Monday through Friday, and 7 AM to 4 PM, Pacific Time, Saturday
• Canada: (905) 709-3839, 6 AM to 8 PM, Pacific Time, Monday through Friday, and 7 AM to 4 PM, Pacific Time, Saturday

Days and hours of support are subject to change without notice. Toll or long distance charges may apply.

Purchase Supplies and Accessories
You can purchase genuine EPSON ink and paper at EPSON Supplies Central at www.epson.com/ink3 (U.S. sales) or www.epson.ca (Canadian sales). You can also purchase supplies from an EPSON authorized reseller. To find the nearest one, call 800-GO-EPSON (800-463-7766).

2 4.7 inch (120 mm) maximum outer margin

Note: Avoid printing in the clear plastic areas of discs to prevent staining the disc with ink.

Parent topic: Technical Specifications

Ink Cartridge Specifications

Note: We recommend that you use genuine EPSON cartridges and do not refill them. The use of other products may affect your print quality and could result in printer damage.

The cartridges included with the printer are designed for printer set up and not for resale. After some ink is used for priming, the rest is available for printing. Yields vary considerably based on images printed, print settings, paper type, frequency of use, and temperature. For print quality, a variable amount of ink remains in the cartridge after the "replace cartridge" indicator comes on.

<table>
<thead>
<tr>
<th>Color</th>
<th>Black, Photo Black, Cyan, Magenta, Yellow</th>

Safety and Approvals Specifications

United States Safety: UL60950-1
EMC: FCC part 15 Subpart B class B
Canada Safety: CAN/CSA C22.2 No. 60950-1
EMC: CAN/CSA-CEI/IEC CISPR 22 Class B

This equipment contains the following wireless module:
• Manufacturer: Askey Computer Corporation.
• Type: WLU6117-D69 (RoHS)

This product conforms to Part 15 of FCC Rules and RSS-210 of the IC Rules. Epson cannot accept responsibility for any failure to satisfy the protection requirements resulting from a non-recommended modification of the product. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation of the device.

To prevent radio interference to the licensed service, this device is intended to be operated indoors and away from windows to provide maximum shielding. Equipment (or its transmit antenna) that is installed outdoors is subject to licensing.

FCC Compliance Statement

For United States Users
This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio or television reception. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause interference to radio and television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

• Reorient or relocate the receiving antenna.
• Increase the separation between the equipment and receiver.
• Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
• Consult the dealer or an experienced radio/TV technician for help.

WARNING
The connection of a non-shielded equipment interface cable to this equipment will invalidate the FCC Certification or Declaration of this device and may cause interference levels which exceed the limits established by the FCC for this equipment. It is the responsibility of the user to obtain and use a shielded equipment interface cable with this device. If this equipment has more than one interface connector, do not leave cables connected to unused interfaces. Changes or modifications not expressly approved by the manufacturer could void the user’s authority to operate the equipment.
Software Notice

1. This printer product includes open source software programs listed in Section 6) according to the license terms of each open source software program.

2. We provide the source code of the GPL Programs, LGPL Programs, Apache License Program and ncftp license Program (each is defined in Section 6) until five (5) years after the discontinuation of same model of this printer product. If you desire to receive the source code above, please contact the customer support of your region. You shall comply with the license terms of each open source software program.

3. The open source software programs are WITHOUT ANY WARRANTY; without even the implied warranty of MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. See the license agreements of each open source software program for more details, which are described in OSS.pdf on your Printer Software CD.

4. OpenSSL toolkit
   This printer product includes software developed by the OpenSSL project for use in the OpenSSL Toolkit (http://www.openssl.org/).
   This product includes cryptographic software written by Eric Young (eay@cryptsoft.com).

5. The license terms of each open source software program are described in OSS.pdf on your Printer Software CD.

6. The list of open source software programs which this printer product includes are as follows.

   **GNU GPL**
   This printer product includes the open source software programs which apply the GNU General Public License Version 2 or later version ("GPL Programs").
   The list of GPL Programs:
   - linux-2.6.35-arm1-epson12
   - busybox-1.17.4
   - udhcp 0.9.8cvs20050124-5

---

For Canadian Users
This Class B digital apparatus meets all requirements of the Canadian Interference-Causing Equipment Regulations.

*Cet appareil numérique de la classe B respecte toutes les exigences du Règlement sur le matériel brouilleur du Canada.*
