Cleaning the Air Filter and Vent

Your projector includes an air filter to ensure the best performance. If dust collects on the air filter (on the side of the projector) or vent (on the front of the projector), clean them as described below. Dust clogs prevent proper ventilation and can cause overheating and damage the projector.

Follow these steps:

1. Turn off the projector. Wait for the power light to stop flashing, then unplug the power cord.

2. To clean the intake vent and filter, use a small vacuum cleaner designed for computers and other office equipment. If you don’t have one, gently clean the vent with a soft brush (such as an artist’s paintbrush).

   You can remove the air filter to clean both sides.

3. If the dirt is difficult to remove or the filter is broken, replace the filter as described on page 120. Contact your dealer or call Epson at 800-GO-EPSON (800-463-7766) to obtain a new filter.
Replacing the Lamp and Air Filter

The life span of the projection lamp is up to 3000 hours if Brightness Control in the Setting menu is set to High (default), and 4000 hours if Brightness Control is set to Low.

It is time to replace the lamp when:

- The projected image gets darker or starts to deteriorate.
- The message Replace the lamp appears on the screen when the lamp comes on and the lamp warning light 🛡️ flashes orange. To maintain projector brightness and image quality, replace the lamp as soon as possible.
- The lamp warning light 🛡️ flashes red (the lamp is burnt out).

Contact your dealer or call Epson at 800-GO-EPSON (800-463-7766). Request part number V13H010L48.

Follow these steps to replace the lamp and air filter:

1. Turn off the projector.
2. When the P power light stops flashing, unplug the power cord.
3. Let the projector cool for at least an hour (if it has been on). The lamp is extremely hot immediately after use.
4. Remove the lamp cover screw. Then slide the lamp cover to the side and lift it off of the projector.

5. Loosen the two screws holding the lamp in place (you can’t remove them).
6. Hold the lamp as shown and pull it straight out.

7. Gently insert the new lamp. (If it doesn’t fit easily, make sure it is facing the right way.)

8. Push down the side marked PUSH until it snaps in.

9. Once the lamp is fully inserted, tighten its screws.

10. Replace the lamp cover, then tighten its screw.

11. Slide out the air filter on the bottom of the projector and remove it.

12. Slide in the new air filter until it clicks in place.

13. Reset the lamp timer as described in the next section.
Resetting the Lamp Timer

After you replace the lamp, you need to reset the lamp timer using the projector’s menus.

1. Press the Menu button on the remote control or on the projector’s control panel. You see the main menu.

2. Use the buttons on the remote control (or the arrow buttons on the projector) to highlight Reset, then press Enter.

You see this screen:

3. Select Reset Lamp Hours and press Enter.

4. When you see the prompt, select Yes and press Enter.

5. When you’re finished, press Esc or Menu to exit the Menu system.
