Remote Control Operation

The remote control lets you control the projector from almost anywhere in the room, up to 19.7 feet (6 m) away. You can point it at the screen, or the front or back of the projector.

Make sure that you aim the remote control at the projector’s receivers within the angles listed below.

1. 19.7 feet (6 m)
2. 30°
3. 60°

Note: Avoid using the remote control in conditions with bright fluorescent lights or in direct sunlight, or the projector may not respond to commands. If you will not use the remote control for a long time, remove the batteries.
Using the Remote Control as a Wireless Mouse

You can use the projector’s remote control as a wireless mouse so you can control your computer presentation from a distance.

**Note:** You cannot use the remote control’s wireless mouse function when you use your projector’s USB Type B port to project video.

1. Connect the projector to a computer using the projector’s **Computer** or **HDMI** port.
2. Using a USB cable, connect the projector’s USB **Type B** port to a USB port on your computer (for wireless mouse support).
3. Press the **Menu** button, select the **Extended** menu, and select **Link21L** as the **USB Type B** setting.
4. Start your presentation.
5. Use the following buttons on the remote control to control your presentation:
   • To move through PowerPoint slides, press the **Up** and **Down Page** buttons.
   • To move the cursor on the screen, use the arrow buttons.
   • To left-click, press the **Enter** button once (press it twice to double-click).
   • To right-click, press the **Esc** button.
   • To drag-and-drop, hold the **Enter** button as you move the cursor with the arrow buttons, then release **Enter** at the destination.

Using the Remote Control as a Presentation Pointer

You can use the projector’s remote control as a pointer to help you call out important information during a presentation. The default pointer shape is an arrow, but you can select an alternative shape using the **Settings** menu.

1. Press the **Pointer** button on the remote control.
2. Use the arrow buttons on the remote control to move the pointer on the screen.

3. Press Esc to clear the pointer from the screen.

Selecting an Image Source

If you connected multiple image sources to the projector, such as a computer and DVD player, you may want to switch from one image source to the other.

1. Make sure the connected image source you want to use is turned on.
2. For video image sources, insert a DVD or other video media and press Play (if necessary).
3. Do one of the following:
   • Press the Source Search button on the projector or remote control until you see the image from the source you want.
Remote Control Information

- Press the button for the source you want on the remote control. If there is more than one port for that source, press the button again to select the other source.

1 Computer port source
2 Video and HDMI sources
3 USB port sources (computer display and external devices)
4 Network source

4. If you see a blank screen or a "No Signal" message, try the following:
   - Check that the device cables are securely connected to the projector and the device.
   - Make sure the projector is turned on and its lens cover is open.
   - For laptop computers, make sure you have set up your laptop to output its display properly.

Projection Modes

Depending on how you positioned the projector, you may need to change the projection mode so your images project correctly.

- **Front** (default setting) lets you project from a table in front of the screen.
- **Front/Ceiling** flips the image over top-to-bottom to project upside-down from a ceiling or wall mount.
- **Rear** flips the image horizontally to project from behind a translucent screen.
- **Rear/Ceiling** flips the image over top-to-bottom and horizontally to project from the ceiling and the rear.

You can change the projection mode using the remote control or by changing a menu setting.
Changing the Projection Mode Using the Remote Control

You can change the projection mode to flip the image over top-to-bottom.

1. Turn on the projector and display an image.
2. Hold down the A/V Mute button on the remote control for five seconds.
   The image disappears briefly and reappears flipped top-to-bottom.

3. To change projection back to the original mode, hold down the A/V Mute button for five seconds again.

Changing the Projection Mode Using the Menus

You can change the projection mode to flip the image over top-to-bottom and/or left-to-right using the projector menus.

1. Turn on the projector and display an image.
2. Press the Menu button.
3. Select the Extended menu and press Enter.

4. Select the Projection setting and press Enter.
5. Select a projection mode and press Enter.
6. Press Menu to exit.
Changing the Image Aspect Ratio

You can change the aspect ratio of the displayed image to resize it.

1. Turn on the projector and switch to the image source you want to use.
2. Press the Aspect button on the remote control.

The shape and size of the displayed image changes, and the name of the aspect ratio appears briefly on the screen.

3. To cycle through the available aspect ratios for your input signal, press the Aspect button repeatedly.

Changing the Color Mode

You can change the projector’s Color Mode using the remote control to optimize the image for your viewing environment.

1. Turn on the projector and switch to the image source you want to use.
2. If you are projecting from a DVD player or other video source, insert a disc or other video media and press the Play button, if necessary.
3. Press the Color Mode button on the remote control to change the Color Mode.

The image quality changes and the name of the Color Mode appears briefly on the screen.

4. To cycle through all the available Color Modes for your input signal, press the Color Mode button repeatedly.
