This Quick Reference card gives brief instructions on connecting your PowerLite projector and using common features. For details, see the online User’s Guide.

**Remote Control Map**

- **Turn the projector on**
- **Turn the projector off**
- **Select a source**
- **Automatically adjust computer image**
- **Change the aspect ratio**
- **Display a test pattern**
- **Freeze the image**
- **Open projector menus**
- **Navigate through menu settings; move pointer**
- **Select menu settings; left mouse button**
- **Activate split screen**
- **Move to next or previous image when projecting from a computer over the network**
- **Control volume**
- **Open menus assigned by user**
- **Use numeric keys to enter passwords, IP settings, etc.**
- **Hold down and use numeric keys to select projector to control**
- **Control one or all projectors**
- **Port to connect remote control cable**

**Replacement Parts**

You can purchase replacement parts from an Epson authorized reseller. See “Where to Get Help” inside this card for more information.

**PowerLite 4650/4750W/4770W/4855WU**

**Quick Reference**
Turning the Projector On

1. Turn on your computer or image source.
2. Remove the lens cover.
3. Press the power button (projector) or On button (remote control). After the power light stays green, the projector is ready.

Note: If the Direct Power On function is enabled, you can turn on the projector without pressing the power button; just plug it in or flip the switch controlling the outlet to which the projector is connected. To turn on this feature, see the online User’s Guide.
4. If your image does not appear, see “Switching Between Image Sources” or “Troubleshooting.”

Changing the Language of the Projector Menu

The default language of the projector’s menu system is English, but you can change it as necessary.

1. Press the Menu button to access the projector’s menu system.
2. Select Extended > Language.
3. Select your language.
4. When you’re done, press Menu to exit.

Switching Between Image Sources

Press the Search button or one of the source buttons (remote control), or the Source Search button (projector).

Changing Screen Type

Set the Screen Type setting to the screen’s aspect ratio.

1. Press the Menu button.
2. Select Extended > Display > Screen > Screen Type.
3. Select the screen’s aspect ratio.

Note: The displayed image should match the screen’s size and shape.
4. When you’re done, press Menu to exit.

Adjusting Image Position

1. Release the lens shift dial lock.

2. Turn the vertical and horizontal lens shift dials on the projector to adjust the position of the projected image.

3. When you are done making adjustments, secure the lens shift dial lock.

Correcting Image Shape

If your image is uneven on the sides, you can use the projector’s distortion correction features such as H/V-Keystone and Quick Corner to adjust the shape. See the online User’s Guide.

Making Other Image Adjustments

For help on using the projector’s features to improve the image quality, see the online User’s Guide.

Turning the Projector Off

Press the (power (projector) or Standby (remote control) button to turn the projector off. If you see a confirmation message, press the power/Standby button again.

Note: If the Direct Power On function is enabled, you can unplug the projector or flip the switch controlling the outlet to which the projector is connected instead. To turn on this feature, see the online User’s Guide.

Troubleshooting

If you see a blank screen or the message No signal

• Make sure the light on the projector is green and not flashing, and the lens cover is removed.
• Make sure the cables are connected correctly. See the online User’s Guide.
• You may need to change the image source. See “Switching Between Image Sources.” Also make sure the device is turned on.

If the projector and the laptop don’t display the same image

Windows®

Press the function key on your keyboard that lets you display on an external monitor. It may be labeled CRT/LCD or have an icon such as F7. You may have to hold down the Fn key while pressing it (such as Fn + F7). Wait a moment for the display to appear. You may need to press the keys again to display the image on both devices.

OS X

Open System Preferences and select Displays. Click the Arrangement tab and select the Mirror Displays checkbox.

Internet Support

Visit epson.com/support (U.S. or epson.ca/support (Canada) to download utilities and documentation, get FAQs and troubleshooting advice, or e-mail Epson.

Speak to a support representative

To use the Epson PrivateLine® Support service, call (800) 637-7661. This service is available for the duration of your warranty period. You may also speak with a projector support specialist by dialing (562) 276-4394 (U.S.) or (905) 708-3839 (Canada).

Support hours are 6 am to 8 pm, Pacific Time, Monday through Friday and 7 am to 4 pm, Pacific Time, Saturday.

Days and hours of support are subject to change without notice. Toll or long distance charges may apply.

Purchase supplies and accessories

You can purchase screens and other accessories from an Epson authorized reseller. To find the nearest reseller, call 800-GO-EPSON (800-463-7766). Or you can purchase online at epsonstore.com (U.S. sales) or epson.ca (Canadian sales).

Where to Get Help

Manuals

For more information about using the projector, click the icons on your desktop to access the online manuals (requires an Internet connection). If you don’t have icon links to the manuals, you can install them from the projector CD or go to the Epson website, as described below.
