Quick Setup

Before using the projector, make sure you read the safety instructions in the online User’s Guide.

Connect the projector

Choose from the following connections. See the sections below or the online User’s Guide for details.

**Computer**

- **USB port**
  - Connect the square end of a USB cable to the projector’s USB-B (square) port. Connect the flat end of the cable to any USB port on your computer.

  Windows XP or later: After turning on the projector, follow the on-screen instructions to install USB Display software. Only one of these applications (XP, USB XD, or only on first connection). If the software screen does not display automatically, open My Computer or Computer, then double-click EPSON_UDSE.EXE and follow the on-screen instructions to install the USB Display software (only on first connection).

- **HDMI port**
  - Connect one end of an HDMI cable to the projector’s HDMI port and the other end to an HDMI port on your computer.

**Wired network**

You can connect the projector to your network using an Ethernet cable. See “Project over a wired network” for instructions.

You can also connect an audio cable. If you are using a laptop, switch it to external display (see “Troubleshooting”).

**Camera, USB device, or Epson DC-06 document camera**

Connect a digital camera, USB flash drive, USB storage device, or Epson DC-06 document camera to the projector’s USB-A (flat) port.

If you connect a digital camera, USB flash drive, or USB storage device, you can use the projector’s PC Free feature. See the online User’s Guide for details.

**External monitor, external speakers, and microphone**

You can also connect an external monitor, external speakers, or a microphone to your projector to enhance your presentations. See the online User’s Guide for details.

Turn on your equipment

1. Turn on your computer or video source.
2. Plug in the projector. The power light on the projector turns blue.
3. Open the A/V Mute slide all the way.
4. Press the Power button on the projector or remote control. The projector keeps, and the Status light flashes blue and then stays on.

Adjust the image

1. If you don’t see an image, press the Source Search button on the projector or remote control to select the image source.

   **Note:** If you still see a blank screen or have other display problems, see the troubleshooting tips on the back of this sheet.

2. To raise the image, press the foot release button and lift the front of the projector. Release the button to lock the foot in position.
3. Turn the zoom ring to enlarge or reduce the image.
4. Turn the focus ring to sharpen the image.
5. If your image looks like this, you may have placed the projector off to one side of the screen at an angle. Place the projector directly in front of the center of the screen, facing the screen squarely. If you can’t move the projector, use the horizontal keystone slider to correct the image.
6. If you don’t see an image, press the Power button twice, then unplug it. You don’t have to wait for the projector to cool down.

Using the remote control

Make sure the batteries are installed as shown (two AA batteries).

1. To turn on remote control:

   - Turn projector on and off

2. To access projector menus:

   - Navigate projector menus

3. To turn off projector display:

   - Get solutions to common problems

4. To select which source to display:

   - Choose which source to display

Project wirelessly

Follow the steps here to connect the projector over a wireless network. You will need the optional wireless LAN module (part number V12H418P12).

1. To install the wireless LAN module, first remove the screw as shown.
2. Connect the wireless LAN module to the USB-A (flat) port.
3. To configure your projector for wireless projection, do one of the following:
   - If you’re using the optional Quick Wireless Connection USB key (Windows only, part number V12H005M09), press the LAN button on the remote control. When you see SSID and IP address information on the screen, remove the wireless LAN module and connect the key to the projector’s USB-A port. Look for the displayed message, remove the key, and connect it to a USB port on your computer. Follow the on-screen instructions to install the driver, then reconnect the wireless LAN module to the projector’s USB-A port. For details, see the online User’s Guide.
   - If you’re not using the key, continue with the steps on the next page.

Video device

Connect up to 5 video devices and use the Source Search button on the projector or remote control to switch between them.
Quick Setup

Connect the projector

Choose from the following connections. See the sections below or the online User's Guide for details.

Computer

USB port

Connect the square end of a USB cable to the projector’s USB-B (square) port. Connect the flat end of the cable to any USB port on your computer.

Windows® XP or later: After turning on the projector, follow the on-screen instructions to install the Epson® USB Display software (XP only; only on first connection). If the software screen does not display automatically, open My Computer or Computer, then double-click EPSON_PJ_UD, or EPSON_UDSE.EXE.

Mac OS X 10.5.1 or higher: After turning on the projector, the setup folder EPSON_USB_DISPLAY appears in the Finder. Double-click EPSON_USB_DISPLAY Installer and follow the on-screen instructions to install the Epson USB Display software (only on first connection).

HDMI port

Connect one end of an HDMI cable to the projector’s HDMI port and the other end to your computer’s HDMI port.

Wired network

You can connect the projector to your network using an Ethernet cable.

Video device

Connect up to 5 video devices and use the Source Search button on the projector or remote control to switch between them.

Camera, USB device, or Epson DC-06 document camera

Connect a digital camera, USB flash drive, USB storage device, or Epson DC-06 document camera to the projector’s USB-A (flat) port.

External monitor, external speakers, and microphone

You can also connect an external monitor, external speakers, or a microphone to your projector to enhance your presentations. See the online User’s Guide for details.

Turn on your equipment

1. Turn on your computer or video source.

2. Plug in the projector. The power light on the projector turns blue.

3. Open the A/V Mute slide all the way.

4. Press the power button on the projector or remote control. The projector beeps, and the Status light flashes blue and then stays on.

Note: To shut down the projector, press the power button twice, then unplug it. You don’t have to wait for the projector to cool down.

5. The default language of the menu system is English. To select another language, press the Menu button on the projector or remote control. Select Extended and press →. Select Language and press →. Select your language and press →. Press the Menu button to exit the menu system.

Adjust the image

1. If you don’t see an image, press the Source Search button on the projector or the remote control to select the image source.

Note: If you still see a blank screen or have other display problems, see the troubleshooting tips on the back of this sheet.

2. To raise the image, press the foot release button and lift the front of the projector. Release the button to lock the foot in position.

3. Turn the zoom ring to enlarge or reduce the image.

4. Turn the focus ring to sharpen the image.

5. If your image looks like or , you may have placed the projector off to one side of the screen at an angle. Place the projector directly in front of the center of the screen, facing the screen squarely. If you can’t move the projector, use the horizontal keystone slider to correct the image.

6. Your projector automatically adjusts images that look like or , but if necessary you can press the or button on the projector to correct it.

Project wirelessly

Follow the steps here to connect the projector over a wireless network. You will need the optional wireless LAN module (part number V12H418P12).

1. To install the wireless LAN module, first remove the screw as shown.

2. Follow the on-screen instructions to install the driver, then reconnect the wireless LAN module to the projector’s USB-A port. For details, see the online User’s Guide.

3. To configure your projector for wireless projection, do one of the following:
   - If you’re using the optional Quick Wireless Connection USB key (Windows only, part number V12H005M09), press the LAN button on the remote control. When you see SSD and IP address information on the screen, remove the wireless LAN module and connect the key to the projector’s USB-A port. Look for the displayed message, remove the key, and connect it to a USB port on your computer. Follow the on-screen instructions to install the driver, then reconnect the wireless LAN module to the projector’s USB-A port. For details, see the online User’s Guide.
   - If you’re not using the key, continue with the steps on the next page.
4. Attach the wireless LAN module cover and secure it using the screws you removed.

5. Press the Menu button on the remote control, select the Network menu, and press \( \text{Esc} \).

6. Choose Network Configuration and press \( \text{Esc} \).

7. Select the Wireless LAN menu and press \( \text{Esc} \).

8. Choose Connection Mode, press \( \text{Esc} \), select Quick (for a direct connection to a computer, tablet, or smartphone) or Advanced (for a connection to a router or access point), and press \( \text{Esc} \) again. When you’re finished, press Esc to return to the Wireless LAN menu.

9. If you chose the Advanced connection mode, select SSID, press \( \text{Esc} \), and enter your network name (SSID) on the screen that appears.

10. To prevent the SSID and IP address from appearing on the network standby screen, set the SSID Display and IP Address Display settings to Off.

12. If you are connecting the projector to a secure network, select the Security menu and press \( \text{Esc} \). Then select settings and press Esc when you’re finished.

13. Complete and press \( \text{Esc} \), then select Yes and press \( \text{Esc} \) again to save your settings.

15. See “Install network software” for additional instructions.

Project over a wired network
Follow the steps here to configure your projector for your wired network using the projector’s menu system.

1. Plug in and turn on the projector.

2. Press the Menu button on the remote control, select the Network menu, and press \( \text{Esc} \).

3. Select Network Configuration and press \( \text{Esc} \).

4. Select the Basic menu and press \( \text{Esc} \).

5. Select the Projector Name setting and enter a name (up to 16 characters long) to identify your projector over the network.

6. To use the displayed keyboard to enter characters, press the arrow buttons on the remote control to highlight it, then press \( \text{Esc} \).

7. To switch between uppercase and lowercase letters, select \( \text{CAPS} \) and press \( \text{Esc} \) again.

8. To change the displayed symbols, select \( \text{SYMB} \) or \( \text{SYM2} \) and press \( \text{Esc} \) again.

9. When you’re finished entering the SSID, select \( \text{Finish} \) and press \( \text{Esc} \).

10. To select a number or character, use the arrow buttons on the remote control to highlight it, then press \( \text{Esc} \).

11. To prevent the IP address from appearing on the network standby screen, set the IP Address Display setting to Off.

12. When you’re finished, select \( \text{Complete} \) and press \( \text{Esc} \), then press \( \text{Esc} \) again to save your settings.

Where to get help
Manuals
For more information about using the projector, click the icons on your desktop to access the online manuals (requires an Internet connection). If you don’t have icons to the manuals, you can install them from the projector CD or go to the Epson website, as described below.

Telephone support services
To use the Epson PrivateLine Support service, call (800) 637-7661. This service is available for the duration of your warranty period. You may also speak with a support specialist by calling (562) 276-4394 (U.S.) or (905) 793-3819 (Canada). Support hours are 6 am to 8 pm, Pacific Time, Monday through Friday, and 7 am to 4 pm Pacific Time, Saturday. Days and hours of support are subject to change without notice. Toll or long distance charges may apply.

Internet support
Visit www.epson.com/support (U.S.) or www.epson.ca/support (Canada) for solutions to common problems. You can download utilities and documentation, get FAQs and troubleshooting advice, or e-mail Epson.

Registration
Register today to get product updates and exclusive offers. You can use the CD included with your projector or register online at www.epson.com/webreg.

Install network software
Computer
Install the EasyMP Network Projection software on each computer that will project over the network. Use the labeled Epson Projector Software to install the program.

For instructions on installing and using your network software, click the icon on your desktop to access the online EasyMP Network Projection Operation Guide (requires an Internet connection). If you don’t see the EasyMP Network Projection Guide icon, you can install it from the projector CD or go to the Epson website, as described on the right.

To monitor and control your projector over the network, download and install the EasyMP Monitor software and manual from the Epson support web site. You can install the link to the downloads page from the projector CD or go to the Epson website, as described on the right.

Mobile device
To project from an iOS or AndroidTM device, download and install the EasyMP Monitor app. Visit www.epson.com/projectmonitor (U.S.) or www.epson.ca/projectorapp (Canada) for more information.

Troubleshooting
If you see a blank screen or the No signal message after turning on your computer or video device, check the following:
• Make sure the Status light on the projector is blue and not flashing, and the AV Mute slide is open.
• Press the Source Search button on the projector or the remote control to switch to the correct image source, if necessary.
• If you’re using a Windows laptop, press the function key on your keyboard that lets you display an external monitor. It may be labeled CRT/LCD or have an icon such as \( \text{CRT/LCD} \). You may have to hold down the Fn key while pressing it (such as \( \text{Fn + F7} \)). Wait a moment for the display to appear.

Optional accessories
For a list of optional accessories, see the online User’s Guide.

You can purchase screens or other accessories from an Epson authorized reseller. To find the nearest reseller, call 800-GO-EPSON (800-463-7766). Or you can purchase online at www.epsonstore.com (U.S. sales) or www.epson.ca (Canadian sales).

If you’re using a Mac laptop, open System Preferences and select Displays. Select the Display or Color LCD option if necessary, then click the Arrange or Arrange & Stacking tab, and select the Mirror Displays checkbox.

4. Attach the wireless LAN module cover and secure it using the screw you removed.

5. Press the Menu button on the remote control, select the Network menu, and press Esc.

7. Select the Wireless LAN menu and press Esc.

8. Choose Connection Mode, press Esc, select Quick (for a direct connection to a computer, tablet, or smartphone) or Advanced (for a connection to a router or access point), then press Esc again. When you’re finished, press Esc to return to the Wireless LAN menu.

9. If you chose the Advanced connection mode, select SSID, press Esc, and enter your network name (SSID) on the screen that appears.

10. To select a network name, press Esc to highlight it, then press Esc again.

11. To select a number or character, use the arrow buttons on the remote control to highlight it, then press Esc.

12. To switch between uppercase and lowercase letters, select the basic symbol menu, then press Esc.

13. To select a number or character, use the arrow buttons on the remote control to highlight it, then press Esc.

14. To change the displayed symbols, select the basic symbol menu, then press Esc.

15. To select a number or character, use the arrow buttons on the remote control to highlight it, then press Esc.

16. To select “Install network software” for additional instructions.

**Project over a wired network**

Follow the steps here to configure your projector for your wired network using the projector’s menu system.

1. Plug in and turn on the projector.

2. Press the Menu button on the remote control, select the Network menu, and press Esc.

4. Select the Basic menu and press Esc.

5. Select the Projector Name setting and enter a name (up to 16 characters long) to identify your projector over the network.

6. To use the displayed keyboard to enter characters, use the arrow buttons on the remote control to highlight the characters and press Esc to select them.

7. Note: See the online User’s Guide for information on adding passwords.

8. Press Esc when finished entering the SSID.

9. Press Esc again to save your settings.

10. Complete the setup and press Esc again to save your settings.

11. Press the Menu button to exit the menu system.

12. To prevent the IP address and SSID from appearing on the network standby screen, select the Standby setting and press Esc.
