The Power Off and Sleep Timers

The product enters sleep mode or turns off automatically if it is not used for a period of time. You can adjust the time period before power management, but increasing the time reduces the product's energy efficiency.

Changing the Power Off and Sleep Timer Settings - Windows
Changing the Power Off and Sleep Timer Settings - OS X

Parent topic: Product Basics

Changing the Power Off and Sleep Timer Settings - Windows

You can use the printer software to change the time period before the printer enters sleep mode or turns off automatically.
1. Access the Windows Desktop, right-click the product icon in the Windows taskbar, and select **Printer Settings**.
2. Click the **Maintenance** tab.
3. Click the **Printer and Option Information** button.
   You see this window:

   ![Printer and Option Information window](image)

4. Select the time period you want as the **Power Off Timer** setting.
5. Click **Send**.
6. Select the time period you want as the **Sleep Timer** setting.
7. Click **Send**.
8. Click **OK** to close the open program windows.

**Parent topic:** [The Power Off and Sleep Timers](#)
Changing the Power Off and Sleep Timer Settings - OS X

You can use the printer software to change the time period before the printer enters sleep mode or turns off automatically.

1. Do one of the following:
   - **OS X 10.6/10.7/10.8/10.9**: In the Apple menu or the Dock, select **System Preferences**. Select **Print & Fax**, **Print & Scan**, or **Printers & Scanners**, select your product, and select **Options & Supplies**. Select **Utility** and select **Open Printer Utility**.
   - **OS X 10.5**: In the Apple menu or the Dock, select **System Preferences**. Select **Print & Fax**, select your product, and select **Open Print Queue** or **Print Queue**. Select **Utility**.

2. Select **Printer Settings**.

   You see this screen:

   ![Printer Utility Screen](image)

3. Select the time period you want as the **Power Off Timer** setting.
4. Select the time period you want as the **Sleep Timer** setting.
5. Click **Apply**.
6. If you see the confirmation message, click **Yes**, then close the Printer Settings window.

**Parent topic:** The Power Off and Sleep Timers
Loading Paper

Before you print, load paper for the type of printing you will do.

Loading Paper
Paper Loading Capacity

Loading Paper

You can print on plain paper in these sizes: Letter (8.5 × 11 inches [216 × 279 mm]), A4 (8.3 × 11.7 inches [210 × 297 mm]), and Legal (8.5 × 14 inches [216 × 357 mm]).

1. Pull up the paper support.
2. Slide the edge guide left.

3. Insert paper, printable side up and short edge first, against the right side. If you are inserting a stack of paper, fan the sheets first and tap the stack on a flat surface to even the edges.
4. Slide the edge guide against the paper, but not too tightly.

**Note:** Leave enough space in front of the product for the paper to be fully ejected.

Always follow these paper loading guidelines:
- Load only the recommended number of sheets.
- Load paper short edge first, no matter which way your document faces.
- Load letterhead or pre-printed paper top edge first.
- Do not load paper above the arrow mark inside the edge guide.
- Check the paper package for any additional loading instructions.

**Parent topic:** Loading Paper

Printing From a Computer

Before printing from your computer, make sure you have set up your product and installed its software as described on the Start Here sheet.

Note: If you have an Internet connection, it is a good idea to check for updates to your product software on Epson's support website. If you see a Software Update screen, select Enable automatic checking and click OK. The update scans your system to see if you have the latest product software. Follow the on-screen instructions.

Printing with Windows

You can print with your product using any Windows printing program, as described in these sections.

Selecting Basic Print Settings - Windows
Selecting Double-sided Printing Settings - Windows
Selecting Additional Layout and Print Options - Windows
Selecting a Printing Preset - Windows
Printing Your Document or Photo - Windows
Selecting Default Print Settings - Windows
Changing Automatic Update Options

Parent topic: Printing From a Computer

Selecting Basic Print Settings - Windows

Select the basic settings for the document or photo you want to print.

1. Open a document or photo for printing.
2. Select the print command in your application.

   **Note:** You may need to select a print icon on your screen, the Print option in the File menu, or another command. See your application's help utility for details.

3. If necessary, select your product name as the printer you want to use.

   **Note:** You may also need to select Properties or Preferences to view your print settings.

   You see the Main tab of your printer settings window:

   ![Printing Preferences window](image)

4. Select the size of the paper you loaded as the **Document Size** setting.

   **Note:** You can also select the User-Defined setting to create a custom paper size.

5. Select the orientation of your document.
6. Select the **Quality** setting that matches the print quality you want to use.

7. Select a Color option:
   - To print a color document or photo, select the **Color** setting.
   - To print text and graphics in black or shades of gray, select the **Black/Grayscale** setting.

8. To print on both sides of the paper, select the **2-Sided Printing** checkbox and select the options you want.

9. To print multiple pages on one sheet of paper, or print one image on multiple sheets of paper, select one of the settings in the **Multi-Page** menu and select the printing options you want.

10. To print multiple copies and arrange their print order, select the **Copies** options.

11. To preview your job before printing, select **Print Preview**.

12. To save your print job as a project that can be modified and combined with other print jobs, select **Job Arranger Lite**.

13. To reduce noise during printing, turn **Quiet Mode** on.

**Print Quality Options - Windows**

You can select any of the available Quality options to fine-tune the quality of your print.

- **Standard**
  - For everyday text and image printing.

- **High**
  - For photos and graphics with high print quality.

- **More Settings**
  - Opens a window that lets you choose among levels of speed and quality.

**Multi-Page Printing Options - Windows**

You can select any of the available options in the Multi-Page menu to set up your multi-page print job.
**2-Up and 4-Up**
Prints 2 or 4 pages on one sheet of paper. Click the **Page Order** button to select page layout and border options.

**2×1 Poster, 2×2 Poster, 3×3 Poster, 4×4 Poster**
Prints one image on multiple sheets of paper to create a larger poster. Click the **Settings** button to select image layout and guideline options.

**Parent topic:** Selecting Basic Print Settings - Windows

---

**Selecting Double-sided Printing Settings - Windows**
You can print on both sides of the paper by selecting the **2-Sided Printing** checkbox on the Main tab.

![2-Sided Printing](image)

**Note:** Some options may be pre-selected or unavailable, depending on other settings you have chosen or if you are accessing the product over a network or as a shared printer.

1. Select the **2-Sided Printing** checkbox.
2. Click the **Settings** button.
   You see this window:
3. Select the double-sided printing options you want to use.
4. Click OK to return to the Main tab.
5. Print a test copy of your double-sided document to test the selected settings.
6. Follow any instructions displayed on the screen during printing.

**Note:** The surface of the paper may smear during double-sided printing. Make sure the ink has dried before reloading the paper.

**Double-sided Printing Options - Windows**

**Parent topic:** Printing with Windows

**Double-sided Printing Options - Windows**

You can select any of the available options on the 2-Sided Printing Settings window to set up your double-sided print job.
**Binding Edge Options**
Select a setting that orients double-sided print binding in the desired direction.

**Binding Margin Options**
Select options that define a wider margin to allow for binding.

**Booklet**
Select the **Booklet** checkbox to print double-sided pages as a booklet.

**Parent topic:** Selecting Double-sided Printing Settings - Windows

**Selecting Additional Layout and Print Options - Windows**
You can select a variety of additional layout and printing options for your document or photo on the More Options tab.

![Printing Preferences](image)
1. To change the size of your printed document or photo, select the **Reduce/Enlarge Document** checkbox and select one of these sizing options:
   - Select the **Fit to Page** option to size your image to fit the paper you loaded. Select the size of the your document or photo as the **Document Size** setting, and the size of your paper as the **Output Paper** setting. If you want to center your image on the paper, select the **Center** option.
   - Select the **Zoom to** option to reduce or enlarge your document or photo by a specific percentage. Select the percentage in the `%` menu.

2. Select one of the following Color Correction options:
   - Select **Automatic** to automatically adjust the sharpness, brightness, contrast, and color saturation for your image.
   - Select **Custom** and click the **Advanced** button to manually adjust the color correction settings or turn off color management in your printer software.
   - Select **Image Options** to access additional settings for improving printed images.

3. To add the following features, click the **Watermark Features** button:
   - **Watermark**: adds a visible watermark to your printout.
   - **Header/Footer**: adds information such as the date and time to the top or bottom of your printout.

   **Note**: Click the **Settings** button to customize the text and location of the header or footer.

4. Select any of the Additional Settings options to customize your print.

Custom Color Correction Options - Windows
Image Options and Additional Settings - Windows

Parent topic: Printing with Windows

**Custom Color Correction Options - Windows**

You can select any of the available options in the Color Correction window to customize the image colors for your print job.
Color Controls
Lets you select a Color Mode setting, individual settings for Brightness, Contrast, Saturation, and Density, and individual color tones. Depending on the selected color mode, you can also adjust the midtone density using the Gamma setting.

Fix Photo
Improves the color, contrast, and sharpness of flawed photos.

Note: Fix Photo uses a sophisticated face recognition technology to optimize photos that include faces. For this to work, both eyes and the nose must be visible in the subject's face. If your photo includes a face with an intentional color cast, such as a statue, you may want to turn off Fix Photo to retain the special color effects.

ICM
Lets you manage color using installed color printing profiles.

No Color Adjustment
Turns off color management in your printer software so you can manage color using only your application software.
You can select any of the Image Options and Additional Settings to customize your print. Some options may be pre-selected or unavailable, depending on other settings you have chosen.

**Image Options**

**Emphasize Text**
Adjusts the weight of printed text to increase readability.

**Emphasize Thin Lines**
Adjusts the weight of printed lines to increase visibility.

**Edge Smoothing**
Smooths jagged edges in low-resolution images such as screen captures or images from the Web.

**Fix Red-Eye**
Reduces or removes red-eye in photos.

**Additional Settings Options**

**Rotate 180°**
Prints the image rotated 180° from its original orientation.

**High Speed**
Speeds up printing, but may reduce print quality.

**Mirror Image**
Flips the printed image left to right.

**Selecting a Printing Preset - Windows**

For quick access to common groups of print settings, you can select a printing preset on the Main or More Options tab.

**Note:** You can create your own preset by clicking the Add/Remove Presets button.

1. Click the Main or More Options tab.
   You see the available Printing Presets on the left:
2. Place your cursor over one of the **Printing Presets** to view its list of settings.
3. Use any of the available options on the screen to control your printing presets.
4. To choose an option for printing, select it.
5. Click **OK**.

**Parent topic:** [Printing with Windows](#)

---

**Printing Your Document or Photo - Windows**

Once you have selected your print settings, you are ready to save your settings and print.
1. Click **OK** to save your settings.
   You see your application's Print window, such as this one:

2. Click **OK** or **Print** to start printing.

   **Checking Print Status - Windows**

   **Parent topic:** Printing with Windows

   **Checking Print Status - Windows**
   
   During printing, you can see the progress of your print job by right-clicking the printer icon in the Windows taskbar.
You can control printing using the options on the screen.

- To cancel printing, right-click on any print job and click **Cancel**.
- To pause printing, right-click on any print job and click **Pause**.
- To restart printing, right-click on any paused print job and click **Restart**.

**Parent topic:** Printing Your Document or Photo - Windows

## Selecting Default Print Settings - Windows

When you change your print settings in a program, the changes apply only while you are printing in that program session. If you want to change the print settings you use in all your Windows programs, you can select new default print settings.

1. Access the Windows Desktop and right-click the product icon in the Windows taskbar.
2. Select **Printer Settings**.

You see the printer settings window:
3. Select the print settings you want to use as defaults in all your Windows programs.
4. Click OK.

These settings are now the defaults selected for printing. You can still change them as needed for printing in any program session.

Changing the Language of the Printer Software Screens

Parent topic: Printing with Windows

Changing the Language of the Printer Software Screens

You can change the language used on the Windows printer software screens.

1. Access the Windows Desktop and right-click the product icon in the Windows taskbar.
2. Select Printer Settings.
   You see the printer settings window.
3. Click the Maintenance tab.
You see the maintenance options:

![Image of maintenance options window]

4. Select the language you want to use as the **Language** setting.
5. Click **OK** to close the printer software window.

The printer software screens appear in the language you selected the next time you access them.

**Parent topic:** Selecting Default Print Settings - Windows

### Changing Automatic Update Options

Your printer software for Windows automatically checks for updates to the product software. You can change how often the software checks for updates or disable this feature.

1. Access the Windows Desktop and right-click the product icon in the Windows taskbar.
2. Select **Software Update Settings**.
   
   You see this window:
3. Do one of the following:
   • To change how often the software checks for updates, select a setting in the **Check every** menu.
   • To disable the automatic update feature, select the **Never** option.

4. Click **OK** to exit.

**Note:** If you choose to disable the automatic update feature, you can check for updates manually.

**Parent topic:** Printing with Windows

Checking for Software Updates

---

**Printing with OS X**

You can print with your product using any OS X printing program, as described in these sections.

**Note:** If you have an internet connection, it is a good idea to check for updates to your product software on Epson's support website.

**Selecting Basic Print Settings - OS X**
**Selecting Page Setup Settings - OS X**
**Selecting Print Layout Options - OS X**
**Sizing Printed Images - OS X**
Selecting Basic Print Settings - OS X

Select the basic settings for the document or photo you want to print.

1. Open a document or photo for printing.
2. Select the print command in your application.

   **Note:** You may need to select a print icon on your screen, the **Print** option in the File menu, or another command. See your application's help utility for details.

3. Select your product as the **Printer** setting.

   ![Printer Settings](image)

4. If necessary, click the arrow next to the Printer setting or the **Show Details** button to expand the print window.

   You see the expanded printer settings window for your product:
Note: The print window may look different, depending on the version of OS X and the application you are using.

5. Select the Copies and Pages settings as necessary.

   Note: If you do not see these settings in the print window, check for them in your application before printing.

   Note: If you do not see these settings in the print window, check for them in your application before printing. They may be accessible by selecting Page Setup from the File menu.
7. Select any application-specific settings that appear on the screen, such as those shown in the image above for the Preview application.

8. Select **Print Settings** from the pop-up menu.

![Print Settings menu]

You see these settings:

![Print Settings dialog]

9. Select the **Print Quality** setting you want to use.

10. Select any of the available print options.

**Print Quality Options - OS X**
**Print Options - OS X**

**Parent topic:** Printing with OS X
Related tasks
Selecting Page Setup Settings - OS X
Printing Your Document or Photo - OS X

Print Quality Options - OS X

You can select any of the available Print Quality options to fine-tune the quality of your print.

Normal
For everyday text and image printing.

Fine
For text and graphics with good quality and print speed.

Quality
For photos and graphics with good quality and print speed.

High Quality
For photos and graphics with high print quality.

Parent topic: Selecting Basic Print Settings - OS X

Print Options - OS X

You can select any of the print options to customize your print. Some options may be unavailable, depending on other settings you have chosen.

Grayscale
Prints text and graphics in black or shades of gray.

Mirror Image
Lets you flip the printed image horizontally.

Parent topic: Selecting Basic Print Settings - OS X

Selecting Page Setup Settings - OS X

Depending on your application, you may be able to select the paper size and orientation settings from the print window.

<table>
<thead>
<tr>
<th>Paper Size: A4</th>
<th>8.27 by 11.69 inches</th>
</tr>
</thead>
<tbody>
<tr>
<td>Orientation:</td>
<td></td>
</tr>
</tbody>
</table>
**Note:** If you do not see these settings in the print window, check for them in your application before printing. They may be accessible by selecting **Page Setup** from the File menu.

1. Select the size of the paper you loaded as the **Paper Size** setting. You can also select a custom setting to create a custom paper size.
2. Select the orientation of your document or photo as shown in the print window.

**Note:** You can reduce or enlarge the size of the printed image by selecting **Paper Handling** from the pop-up menu and selecting a scaling option.

**Parent topic:** Printing with OS X

### Selecting Print Layout Options - OS X

You can select a variety of layout options for your document or photo by selecting **Layout** from the pop-up menu on the print window.

![Layout window](image)

- To print multiple pages on one sheet of paper, select the number of pages in the **Pages per Sheet** pop-up menu. To arrange the print order of the pages, select a **Layout Direction** setting.
- To print borders around each page on the sheet, select a line setting from the **Border** pop-up menu.
- To invert or flip the printed image, select the **Reverse page orientation** or **Flip horizontally** settings.
Sizing Printed Images - OS X

You can adjust the size of the image as you print it by selecting **Paper Handling** from the pop-up menu on the Print window.

1. To print only selected pages in a multi-page document, select an option from the **Pages to Print** pop-up menu.
2. To adjust the order in which pages are printed, select an option from the **Page Order** pop-up menu.
3. To scale the image to fit on a specific paper size, select the **Scale to fit paper size** checkbox and select a paper size from the **Destination Paper Size** pop-up menu.

Managing Color - OS X

You can adjust the Color Matching and Color Options settings to fine-tune the colors in your printout, or turn off color management in your printer software.

1. Select **Color Matching** from the pop-up menu in the print window.
2. Select one of the available options.
3. Select **Color Options** from the pop-up menu in the print window.

![Color Options menu](image)

**Note:** The available settings on the Color Options menu depend on the option you selected on the Color Matching menu.

4. Select one of the available options.

**Color Matching and Color Options - OS X**

**Parent topic:** Printing with OS X

You can select from these settings on the **Color Matching** and **Color Options** menus.

**Color Matching Settings**

**EPSON Color Controls**
- Lets you manage color using controls in your printer software, or turn off color management.

**ColorSync**
- Prints using standard color profiles for your product and paper to help match image colors. You can customize the conversion method and filter settings on the ColorSync pop-up menu in the print window.
Color Options Settings

Manual Settings
Lets you select manual color adjustments. Click the arrow next to Advanced Settings and select settings for Brightness, Contrast, Saturation, and individual color tones. You can also select a color Mode setting for printing photos and graphics and the Fix Red-Eye setting to reduce or remove red-eye in photos. Depending on the selected color mode, you can also adjust the midtone density using the Gamma setting.

Fix Photo
Improves the color, contrast, and sharpness of flawed photos. Click the arrow next to Advanced Settings and select the Fix Red-Eye setting to reduce or remove red-eye in photos.

Note: Fix Photo uses a sophisticated face recognition technology to optimize photos that include faces. For this to work, both eyes and the nose must be visible in the subject’s face. If your photo includes a face with an intentional color cast, such as a statue, you may want to turn off Fix Photo to retain the special color effects.

Off (No Color Adjustment)
Turns off color management in your printer software so you can manage color using only your application software.

Refilling Ink

When the ink level in an ink tank is low, you need to refill it.
Before checking the ink level or refilling an ink tank as described here, be sure to read the ink safety precautions.

Caution: If the ink level is below the lower line on the ink tank, fill it to the upper line on the ink tank. Continued use of the product when the ink level is below the lower line on the tank could damage the product.

Ink Safety Precautions

Ink Handling Precautions
Observe the following when handling the ink:

• Keep ink bottles and the ink tank unit out of the reach of children. Do not allow children to drink from or handle the ink bottles and bottle caps.
• Do not tilt or shake an ink bottle after removing its seal; otherwise, ink may leak.

Ink Refilling Precautions

• Use ink bottles with the correct part number for this product.
• The use of non-Epson ink may cause damage that is not covered by Epson’s warranty, and under certain circumstances, may cause erratic product behavior.
• This product requires careful handling of ink. Ink may splatter when the ink tanks are filled or refilled with ink. If ink gets on your clothes or belongings, it may not come off.
• Do not open the ink bottle package until you are ready to fill an ink tank. Ink bottles are vacuum packed to maintain reliability. If you leave an ink bottle unpacked for a long time before using it, print quality may be affected.
• If the ink level is below the lower line on the ink tank, refill the ink soon. Continued use of the product when the ink level is below the lower line on the ink tank could damage the product.
• After bringing an ink bottle inside from a cold storage site, allow it to warm up at room temperature for at least three hours before using it.
• Store ink bottles in a cool, dark place.
• Store the ink bottles in the same environment as the product. When storing or transporting an ink bottle after removing its seal, do not tilt the bottle and do not subject it to impacts or temperature changes. Otherwise, ink may leak even if the cap on the ink bottle is tightened securely. Be sure to keep the ink bottle upright when tightening the cap, and take measures to prevent ink from leaking when you transport the bottle.

Ink Bottle and Ink Tank Information
• To maintain optimum print head performance, some ink is consumed from all ink tanks during printing and when performing maintenance operations, such as cleaning the print head.
• The ink bottles may contain recycled materials, but this does not affect product function or performance.
• When printing in monochrome or grayscale, color ink may be used, instead of black ink, depending on the paper type or print quality settings. This is because a mixture of color inks is used to create black.

Parent topic: Refilling Ink

Check Ink Levels
To confirm the actual ink remaining, visually check the ink levels in the product’s ink tanks. Make sure the ink levels are above the lower lines on the ink tanks.

Caution: If the ink level is below the lower line on the ink tank, fill it to the upper line on the ink tank. Continued use of the product when the ink level is below the lower line on the tank could damage the product.
Disabling Special Offers with Windows

You can disable special offers messages from Epson using a utility on your Windows computer.

**Note:** You may see the Epson Special Offers screen every time you print (if your computer is connected to the Internet). Select **Do not display this message again** and click **Decline** to disable online offers. Promotional offers are not valid in Latin America.

1. Right-click the product icon in the Windows taskbar and select **Monitoring Preferences**.

   You see this window:
2. To disable promotional offers, deselect the **Display Epson Offers** checkbox. (Promotional offers not available in Latin America.)

**Parent topic:** Check Ink Levels

**Purchase Epson Ink**

You can purchase genuine Epson ink and paper from an Epson authorized reseller. To find the nearest reseller, visit [global.latin.epson.com](http://global.latin.epson.com) or call your nearest Epson sales office (website available in Spanish and Portuguese only).
**Note:** This product was originally designed to work with genuine Epson inks. Your product may not function properly if you use other types of ink and may affect Epson's warranty.

The included ink bottles must be used for printer setup and are not for resale. The printer ships with full ink bottles and part of the ink from the first bottles is used to charge the print head. Yields vary considerably based on images printed, print settings, paper type, frequency of use, and temperature.

The ink bottles that came with your printer have a lower yield due to the ink charging process. This process is carried out the first time you turn on the printer and guarantees better performance. Do not load paper before refilling the ink tanks.

**Ink Bottle Part Numbers**

**Parent topic:** Refilling Ink

**Ink Bottle Part Numbers**

Use these part numbers when you purchase new ink bottles, and use the ink by the date printed on the package:

<table>
<thead>
<tr>
<th>Ink color</th>
<th>Part number</th>
</tr>
</thead>
<tbody>
<tr>
<td>Black</td>
<td>T6641</td>
</tr>
<tr>
<td>Cyan</td>
<td>T6642</td>
</tr>
<tr>
<td>Magenta</td>
<td>T6643</td>
</tr>
<tr>
<td>Yellow</td>
<td>T6644</td>
</tr>
</tbody>
</table>

**Parent topic:** Purchase Epson Ink

**Refilling the Ink Tanks**

Make sure you have new ink bottles handy and have read the ink safety precautions before you begin.

You can continue to use the product even if one or more ink tanks are not filled all the way. However, to keep your product operating at its best, fill all the ink tanks up to the top line.

**Caution:** Wear plastic gloves while refilling the ink tanks to avoid staining your hands.

1. Place a sheet of paper under the ink tank area in case of spills.
2. Turn on your product.
3. Make sure the power light is on, but not flashing.
4. Remove the ink tank’s cap.

Note: Make sure the color of the ink tank matches the ink color you want to refill, and only remove the cap from that ink tank. Be careful not to spill any ink.

5. Snap off the tip of the bottle cap, but do not dispose of the bottle cap tip so you can use it to seal the bottle cap later, if necessary. Then remove the cap, remove the seal from the bottle, and replace the cap on the bottle.

Note: Make sure the color of the ink bottle matches the ink color you want to refill.
Caution: Install the bottle cap tightly; otherwise, ink may leak.

6. Refill the ink tank with the correct color ink up to the upper line on the ink tank.
7. If any ink remains in the ink bottle after filling the ink tank, place the bottle cap tip securely on the bottle cap and store the ink bottle upright for later use.

8. Place the cap securely on the ink tank.

9. Repeat the previous steps as necessary for each ink color you need to refill.

The power light flashes throughout the cleaning cycle and stays on when the cleaning cycle is finished.

**Caution:** Never turn off the product during a cleaning cycle or you may damage it.

6. When the power light stops flashing and remains on, you can check to see if the nozzles are clean; click **Print Nozzle Check Pattern** and click **Print**.

7. Check the printed pattern to see if there are gaps in the lines.  

**Print head is clean**
Print head needs cleaning

• If there are no gaps, click Finish.
• If there are gaps or the pattern is faint, click Clean to clean the print head again.

If you don’t see any improvement after cleaning the print head up to 3 times, turn off the product and wait at least 12 hours. Then check the print head nozzles and try cleaning the print head again, if necessary. If quality still does not improve, flush the ink tubes.

Parent topic: Print Head Cleaning
If you still see white or dark lines or missing colors in your printouts, even after cleaning the print head several times, you can flush the ink tubes.

Flushing the ink tubes replaces all the ink inside the tubes, so flush the ink only if you cannot improve print quality by cleaning the print head several times.

Note: After flushing the ink tubes, you must turn off the product and wait at least 12 hours before printing again.

Caution: Flushing the ink tubes consumes a lot of ink. Before flushing the ink tubes, make sure there is enough ink in the ink tanks. If necessary, refill the ink tanks before flushing the ink tubes.

Flushing the ink tubes affects the service life of the ink pads by causing them to reach their capacity sooner. Contact Epson to purchase replacement ink pads before they reach the end of their service life. When the ink pads reach the end of their service life, the product stops printing and you must contact Epson for support.

Cleaning and Transporting the Product

If your product gets dirty or you need to move it some distance, follow the instructions in these sections.

Cleaning the Product
Transporting Your Product

Cleaning the Product

To keep your product working at its best, you should clean it several times a year.

**Caution:** Do not use a hard brush, benzene, alcohol, or paint thinner to clean the product or you may damage it. Do not place anything on top of the cover or use the cover as a writing surface, or it could get permanently scratched. Do not use oil or other lubricants inside the product or let water get inside.

1. Turn off the product.
2. Unplug the power cable.
3. Disconnect any connected cables.
4. Remove all the paper.
5. Clean the outer case with a soft, dry cloth. Do not use any liquid or chemical cleansers.

Parent topic: Cleaning and Transporting the Product

Transporting Your Product

If you need to ship your product or transport it some distance, prepare it for transportation as described here.

**Caution:** During transportation and storage, follow these guidelines:

- Avoid tilting the product, placing it vertically, or turning it upside down; otherwise ink may leak.
- When storing or transporting an ink bottle after removing its seal, do not tilt the bottle and do not subject it to impacts or temperature changes. Otherwise, ink may leak even if the cap on the ink bottle is tightened securely. Be sure to keep the ink bottle upright when tightening the cap, and take measures to prevent ink from leaking when transporting the ink bottles.

1. Turn off the product.
2. Open the front cover and check to see if the print head is in the far right position (the home position). If not, turn on the product, wait for the print head to move to the far right, then turn the product off again.

3. Disconnect any connected cables.

4. Unplug the power cable.

5. Remove all the paper from the product.

6. Close the paper support.
7. Remove the paper support and detach its mount.

8. Open the front cover and secure the print head to the case with tape.
Caution: Do not touch or place tape on the white flat cable inside the product; otherwise, you may damage your product.

9. Close the front cover and secure it with tape.

10. Check to make sure that the ink tank caps are installed securely.
11. Place the product in its original packaging materials, if possible, or use equivalent cushioning around the product.

**Caution:**
- Keep the product level during transport. Otherwise, ink may leak.
- Do not put opened ink bottles in the box with the product.

Before using the product, be sure to remove the tape from the print head.
If print quality has declined when you print again, clean and align the print head.

Checking for Software Updates

Periodically, it's a good idea to check Epson's support website for free updates to your product software. Visit the driver download site at global.latin.epson.com/Soporte (website available in Spanish and Portuguese only).

- **Windows**: Your printer software automatically checks for updates. You can also manually update the software by selecting Software Update here:
  - Accessing the Windows Desktop and right-clicking the product icon in the Windows taskbar
  - On the Maintenance tab in the printer settings window

  You can also update the software by selecting **EPSON Software Updater** in the **EPSON** or **EPSON Software** program group, accessible by the Start button, or on the Start or Apps screens, depending on your version of Windows.

- **OS X**: You can manually update the software by opening the Applications > Epson Software folder and selecting **EPSON Software Updater**.

### Running a Product Check

Running a product check helps you determine if your product is operating properly.

1. Press the power button to turn the product off.
2. Disconnect any interface cables connected to your product.
3. Load plain paper in the product.
4. Hold down the cancel button and press the power button to turn the product on.
5. When the product turns on, release both buttons.
   The product begins printing a nozzle check pattern.
6. Do the following, depending on the results of the product check:
   - If the page prints and the nozzle check pattern is complete, the product is operating properly. Any operation problem you may have could be caused by your computer, cable, software, or selected settings. Check the other solutions in this manual or try uninstalling and reinstalling your printer software.
   - If the page prints but the nozzle check pattern has gaps, clean or align the print head.

Noise After Filling the Ink
Software Installation Problems
Product Lights Turn On and then Turn Off

Parent topic: Solving Setup Problems

Noise After Filling the Ink
If you hear noises from your product after filling the ink tanks with ink, check these explanations:

• The first time you fill the tanks with ink, the product must charge its print head. Wait until charging finishes before you turn off the product, or it may charge improperly and use excess ink the next time you turn it on. Your product is finished charging the print head when the power light stops flashing.

• If the product’s print head stops moving or making noise, and the charging process has not finished after approximately 20 minutes, turn off your product. Turn it back on and check to see if charging is still in progress. If it is still in progress, contact Epson for help.

Refilling Ink
Software Installation Problems

If you have problems while installing your product software, try these solutions:

• Make sure your product is turned on and any necessary cables are securely connected at both ends. If you still have problems installing software, disconnect the cable and carefully follow the instructions on the Start Here sheet. Also make sure your system meets the requirements for your operating system.

• Close any other programs, including screen savers and virus protection software, and install your product software again.

• In Windows, make sure your product is selected as the default printer and the correct port is shown in the printer properties.

• If you see any error message or your software does not install correctly in Windows, you may not have software installation privileges. Contact your System Administrator.

Solving Paper Problems

Check these sections if you have problems using paper with your product.

Paper Feeding Problems
Paper Jam Problems
Paper Ejection Problems

Parent topic: Solving Problems

Paper Feeding Problems

If you have problems feeding paper, try these solutions:

• If paper does not feed for printing, remove it. Then reload it in the sheet feeder against the right side and beneath the tab. Slide the edge guide against the edge of the paper, making sure that the paper stack is not above the arrow mark on the edge guide.

• If multiple pages feed at once, remove the paper, fan the edges to separate the sheets, and reload it.

• If paper jams when you load only one or two sheets, try loading more sheets at a time. Do not load more than the recommended number of sheets.

• If paper jams when you print on both sides of the paper, try loading fewer sheets.

• Make sure your paper meets the specifications for your product.

• For best results, follow these guidelines:
  • Use new, smooth, high-quality paper that is not curled, creased, old, too thin, or too thick.
  • Load paper in the sheet feeder printable side up.
  • Do not load paper with holes punched in it.
  • Follow any special loading instructions that came with the paper.

Printing is Slow

Parent topic: Solving Problems

Nothing Prints

If you have sent a print job and nothing prints, try these solutions:

• Make sure your product is turned on.
• Make sure any interface cables are connected securely at both ends.
• If you connected your product to a USB hub, make sure it is a first-tier hub. If it still does not print, connect your product directly to your computer instead of the hub.
• Run a product check to see if a test page prints. If the test page prints, check to see if your product software is installed correctly.
• In Windows, make sure your product is selected as the default printer.
• In Windows, clear any stalled print jobs from the Windows Spooler:
  • Windows 8.x: Navigate to the Apps screen and select Control Panel > Hardware and Sound > Devices and Printers. Right-click your product name, select See what's printing, and select your product name again if necessary. Right-click the stalled print job, click Cancel, and click Yes.
  • Windows 7: Click and select Devices and Printers. Right-click your product name, select See what's printing, and select your product name again, if necessary. Right-click the stalled print job, click Cancel, and click Yes.
  • Windows Vista: Click and select Control Panel. Click Printer under Hardware and Sound, right-click your product name, and select Open. Right click the stalled print job, click Cancel, and click Yes.
  • Windows XP: Click Start and select Printers and Faxes. (Or open the Control Panel, select Printers and Other Hardware, if necessary, and select Printers and Faxes.) Right-click your product name, select Open, right-click the stalled print job, click Cancel, and click Yes.

Running a Product Check
Product Icon Does Not Appear in Windows Taskbar

If you do not see your product icon in the Windows taskbar, first try restarting your computer. If that does not work, try this solution:

1. Do one of the following:
   - **Windows 8.x**: Navigate to the Apps screen and select Control Panel > Hardware and Sound > Devices and Printers.
   - **Windows 7**: Click and select Devices and Printers.
   - **Windows Vista**: Click , select Control Panel, and click Printer under Hardware and Sound.
   - **Windows XP**: Click Start and select Printers and Faxes. (Or open the Control Panel, select Printers and Other Hardware, if necessary, and Printers and Faxes.)

2. Right-click your product name, select Printing Preferences, and select your product name again if necessary.
3. Click the Maintenance tab.
4. Click the Extended Settings button.
5. Select Enable EPSON Status Monitor 3, then click OK.
6. Click the Monitoring Preferences button.
7. Click the checkbox for the option that adds the shortcut icon to the taskbar.
8. Click OK to close the open program windows.

Parent topic: Solving Problems Printing from a Computer

Printing is Slow

If printing becomes slow, try these solutions:

- Make sure your system meets the requirements for your operating system. If you are printing a high-resolution image, you may need more than the minimum requirements. If necessary, increase your system's memory.
- If you are using Windows 7, close the Devices and Printers window before you print.
- Clear space on your hard drive or run a defragmentation utility to free up existing space.
- Close any programs you are not using when you print.
- If your product is connected to a USB hub, connect it directly to your computer instead.
• If printing becomes slower after printing continuously for a long time, the product may have automatically slowed down to protect the print mechanism from overheating or becoming damaged. Let the product rest with the power on for 30 minutes, then try printing again.

For the fastest printing, select the following settings in your product software:

• Turn on any high speed settings in your product software.
• Select a lower print quality setting.
• **Windows**: Click the **Maintenance** tab, select **Extended Settings**, and select the following settings:
  • **Always Spool RAW Datatype**
  • **Page Rendering Mode**
  • **Print as Bitmap**

Slanted Printout

Parent topic: Solving Problems
Inverted Image

If your printed image is inverted unexpectedly, try these solutions:

- Turn off any mirror or inversion settings in your printing application.
- Turn off the Mirror Image, Flip horizontally, or Reverse page orientation settings in your printer software. (This option has different names, depending on your operating system version.)

Blank Pages Print

If blank pages print unexpectedly, try these solutions:

- Make sure you selected the correct paper size settings in your printing program and printer software.
- If a blank page exists in a document you are printing and you want to skip printing it, select the Skip Blank Page setting in your printer software.
- Run a print head nozzle check to see if any of the nozzles are clogged. Then clean the print head, if necessary.
- Make sure your product is selected as the printer in your printing program.
- You may need to refill the ink. Visually check the ink levels.

Incorrect Margins on Printout
If your printed page has incorrect margins, try these solutions:
• Make sure you selected the correct paper size settings in your printing program and printer software.
• Make sure you selected the correct margins for your paper size in your printing program.
• Make sure your paper is positioned correctly for feeding into the printer.
You can use the preview option in your printer software to check your margins before you print.

Incorrect Characters Print
If incorrect characters appear in your prints, try these solutions before reprinting:
• Make sure any cables are securely connected at both ends.
• In Windows, delete all print jobs from the Windows Spooler:
  • Windows 8.x: Navigate to the Apps screen and select Control Panel > Hardware and Sound > Devices and Printers. Right-click your product name, select See what’s printing, and select your product name again, if necessary. Right-click the stalled print job, click Cancel, and click Yes.
  • Windows 7: Click and select Devices and Printers. Right-click your product name, select See what’s printing, and select your product name again, if necessary. Right-click the stalled print job, click Cancel, and click Yes.
  • Windows Vista: Click and select Control Panel. Click Printer under Hardware and Sound, right-click your product name, and select Open. Right click the stalled print job, click Cancel, and click Yes.
• **Windows XP**: Click **Start** and select **Printers and Faxes**. (Or open the **Control Panel**, select **Printers and Other Hardware** if necessary, and select **Printers and Faxes**.) Right-click your product name, select **Open**, right-click the stalled print job, click **Cancel**, and click **Yes**.

• Make sure your product is selected as the printer in your printing program.

• If your product is connected to a USB hub, connect it directly to your computer instead.

**Parent topic:** Solving Page Layout and Content Problems

### Incorrect Image Size or Position

If your printed image is the wrong size or in the wrong position, try these solutions:

• Make sure you selected the correct paper size and layout settings in your printing program and printer software.

• Make sure your paper is positioned correctly for feeding into the printer.

You can use the preview option in your printer software to check your margins before you print.

Solving Print Quality Problems

Check these sections if your printouts have problems with print quality, but your image looks fine on your computer screen.

White or Dark Lines in Printout
Blurry or Smeared Printout
Faint Printout or Printout Has Gaps
Grainy Printout
Incorrect Colors

Parent topic: Solving Problems

White or Dark Lines in Printout

If you notice white or dark lines in your prints (also called banding), try these solutions before you reprint:

• Run a nozzle check to see if any of the print head nozzles are clogged. Then clean the print head, if necessary.
• Turn off any high speed settings in your product software.
• Align the print head.
• You may need to refill the ink. Visually check the ink levels.

Related tasks
Selecting Basic Print Settings - Windows
Blurry or Smeared Printout

If your printouts are blurry or smeared, try these solutions:

- Make sure your paper is not damp, curled, old, or loaded incorrectly in your product.
- Make sure your paper meets the specifications for your product.
- Remove each sheet from the output tray as it is printed.
- Turn off any high speed settings in your product software.
- If you print on both sides of a sheet of paper, smudges may appear on the reverse side of heavily saturated or dark images. If one side of a sheet will contain a lighter image or text, print that side first. Make sure the ink has dried before reloading the paper to print on the other side.
- Run a nozzle check to see if any of the print head nozzles are clogged. Then clean the print head, if necessary.
- Align the print head.
- Clean the paper path.

Note: Your product will not operate properly while tilted at an angle. Place it on a flat, stable surface that extends beyond the base of the product in all directions.

Grainy Printout

If your printouts are grainy, try these solutions:

• Select a higher print quality setting and turn off any high speed settings in your product software.
• Run a nozzle check to see if any of the print head nozzles are clogged. Then clean the print head, if necessary.
• Align the print head.
• You may need to increase the image resolution or print a smaller size; see your software documentation.
• If you enlarged the image in an image-editing program, you need to increase the resolution setting to retain a high image quality. Increase the resolution by the same amount you increased the image size.
For example, if the resolution is 300 dpi (dots per inch) and you will double the image size later, change the resolution setting to 600 dpi.

**Note:** Higher resolution settings result in larger file sizes, which take longer to process and print. Consider the limitations of your computer system when selecting a resolution, and select the lowest possible resolution that produces acceptable quality to keep file sizes manageable.

### Incorrect Colors

If your printouts have incorrect colors, try these solutions:

- Make sure the **Black/Grayscale** or **Grayscale** setting is not selected in your printer software.
- Run a nozzle check to see if any of the print head nozzles are clogged. Then clean the print head, if necessary.
- The ink levels may be low and you may need to refill the ink. Visually check the ink levels. Also make sure you filled the tanks with the correct colors of ink.
- Your printed colors can never exactly match your on-screen colors. However, you can use a color management system to get as close as possible. Try using the color management options in your printer software.
- For best results, use genuine Epson ink.

When to Uninstall Your Product Software

If you have a problem that requires you to uninstall and re-install your software, follow the instructions for your operating system.

Uninstalling Printing Software - Windows
Uninstalling Product Software - OS X

Parent topic: Solving Problems

Uninstalling Printing Software - Windows

You can uninstall and then re-install your printer software to solve certain problems.

1. Turn off the product.
2. Disconnect any interface cables.
3. Do one of the following:
   - **Windows 8.x**: Navigate to the Apps screen and select Control Panel > Programs > Programs and Features. Select the uninstall option for your Epson product, then select Uninstall/Change.
     
     **Note:** If you see a User Account Control window, click Yes or Continue.

     In the next window, select your product, if necessary, and click OK. Then follow any on-screen instructions.
   - **Windows (other versions)**: Click or Start, and select All Programs or Programs. Select Epson, select your product, then click EPSON Printer Software Uninstall.
     
     **Note:** If you see a User Account Control window, click Yes or Continue.
In the next window, select your product, if necessary, and click OK. Then follow any on-screen instructions.

4. Restart your computer, then see the Start Here sheet to re-install your software.

**Note:** If you find that re-installing your product software does not solve a problem, contact Epson.

**Parent topic:** When to Uninstall Your Product Software

### Uninstalling Product Software - OS X

In most cases, you do not need to uninstall your product software before re-installing it. However, you can download the Uninstaller utility from the Epson support website to uninstall your product software as described here.

**Note:** If you find that re-installing your product software does not solve a problem, contact Epson.

1. To download the Uninstaller utility, visit the Epson download site at global.latin.epson.com/Soporte.
2. Select your product category.
3. Select your product.
4. Click Controladores y Software, locate the Uninstaller utility, and click the Descarga button.
5. Run the file you downloaded.
6. Double-click the Uninstaller icon.
7. Select the checkbox for each software program you want to uninstall.
8. Click Uninstall.
9. Follow the on-screen instructions to uninstall the software.
10. To reinstall your product software, see the Start Here sheet for instructions.

**Note:** If you uninstall the printer driver and your product name remains in the Print & Fax, Print & Scan, or Printers & Scanners window, select your product name and click the – (remove) icon to remove it.

**Parent topic:** When to Uninstall Your Product Software

### Where to Get Help

If you need additional help with your Epson product, contact Epson.
Epson provides these technical support services:

**Internet Support**
Visit Epson’s support website at [global.latin.epson.com/Soporte](http://global.latin.epson.com/Soporte) for solutions to common problems. You can download drivers and documentation, get FAQs and troubleshooting advice, or e-mail Epson with your questions. (Website available in Spanish and Portuguese only.)

**Speak to a Support Representative**
Before you call Epson for support, please have the following information ready:
- Product name
- Product serial number (located on a label on the product)
- Proof of purchase (such as a store receipt) and date of purchase
- Computer configuration
- Description of the problem

Then call:

Ink Specifications

Note: This product was originally designed to work with genuine Epson inks. Your product may not function properly if you use other types of ink and may affect Epson's warranty.

The included ink bottles must be used for printer setup and are not for resale. The printer ships with full ink bottles and part of the ink from the first bottles is used to charge the print head. Yields vary considerably based on images printed, print settings, paper type, frequency of use, and temperature.

The ink bottles that came with your printer have a lower yield due to the ink charging process. This process is carried out the first time you turn on the printer and guarantees better performance. Do not load paper before refilling the ink tanks.

FCC Compliance Statement

For United States Users
This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio or television reception. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause interference to radio and television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

WARNING
The connection of a non-shielded equipment interface cable to this equipment will invalidate the FCC Certification or Declaration of this device and may cause interference levels which exceed the limits established by the FCC for this equipment. It is the responsibility of the user to obtain and use a shielded equipment interface cable with this device. If this equipment has more than one interface connector, do not leave cables connected to unused interfaces. Changes or modifications not expressly approved by the manufacturer could void the user’s authority to operate the equipment.
