**Quick Setup**

Before using the projector, make sure you read the safety instructions in the online User’s Guide (see the "Where to get help" section).

**Choose a location**

Keep the projector level and place it at a height so its lens is even with the top or bottom of the screen and is centered horizontally. If this isn’t possible, use the lens shift feature or the keystone correction button on the projector to reposition the image (see "Adjust the image").

To view 3D images correctly, RF 3D glasses must be worn within 32 feet (10 m) of the projector. Use the image to determine the viewing distance for 3D projection (the shading represents the 3D viewing area).

See the online User’s Guide for more information on where to place your projector.

**Connect the projector**

Choose from the following connections. For additional connection types, see the online User’s Guide.

1. **Video device**
   - **Lift the cable cover out of the grooves at the top.**
   - **Loosen the two screws at the bottom of the cable cover, then pull the cover forward.**

2. **Connect up to 4 video devices and use the Source buttons on the remote control or the projector to switch between them.**

   - **Turn projector on**
   - **Choose source to display**
   - **Control connected HDBT with HDBT link**
   - **Adjust zoom, focus and lens shift**
   - **Access projector menus**
   - **Change the 3D setup**
   - **Display test pattern**

   For more information on using the remote control, see the online User’s Guide.

3. **Press the Pattern button on the remote control or the Model button on the remote control.**

   - **The default language of the menu system is English.**
   - **To select another language, press the Menu button on the projector or remote control.**
   - **Select Language**
   - **Press Enter.**

   Select your language and press Enter. Press the Menu button to exit the menu system.

**Using the remote control**

Make sure the batteries are installed as shown (two AA batteries).

1. **Press the Pattern button on the remote control or the Model button on the remote control.**

2. **To relocate or reposition the image,**

   - **Press the Lens button on the remote control and use the ] and [ buttons to focus the image.**

3. **Press the Lens button on the remote control and use the [ and ] buttons to adjust the image as necessary.**

   - **Note:** Using the keystone adjustment can affect the size and effective resolution of your image. If possible, change the position of your projector to eliminate the keystep effect and use the lens shift option to position the image as necessary.

4. **Press the Lens button on the remote control and use the [ and ] buttons to reduce or enlarge the image.**

5. **If your image looks like [ or [ , you can use the  button on the projector to correct this.**

   - **Note:** Using the keystone adjustment can affect the size and effective resolution of your image. If possible, change the position of your projector to eliminate the keystep effect and use the lens shift option to position the image as necessary.

**Viewing 3D images**

To view 3D content, you must first connect a 3D-compatible video device to one of the HDMI ports on your projector.

1. **Turn on and begin playback on the 3D-compatible video device.**

   - **Note:** Make sure you set the video device to play content in 3D mode.

2. **Press the 2D/3D button on the remote control, if necessary.**

3. **Slide the power switch on your 3D glasses to the On position.**

   - **Note:** If the glasses don’t automatically display 3D content, you may need to pair them with the projector. Place the glasses within 10 feet (3 m) of the projector, then press and hold the pairing button on the 3D glasses for at least 3 seconds. The status light on the glasses will alternate flash green and red, then remain green for 10 seconds. If pairing is successful, the glasses will automatically display 3D content.

You can also automatically convert 2D HDMI content to 3D. To enable the 2D-to-3D Conversion option, press the 2D-to-3D Conversion button on the projector or remote control. Select Signal and press Enter. Then select 3D Setup and press Enter. Select 2D-to-3D Conversion and press Enter. Select the Weak, Medium, or Strong setting, then press Enter.

See the online User’s Guide for more information on adjusting 3D images.

**Troubleshooting**

If you see a blank screen or the No signal message after turning on your video device or computer, check the following:

- Make sure the power light on the projector is blue and not flashing.
- Press the – button on the projector or one of the Source buttons on the remote control to switch to the correct image source, if necessary.
- If you’re using a Windows® laptop, press the function key on your keyboard that lets you display on an external monitor. It may be labeled CRT/LCD or have an icon such as [ ]. You may have to hold down the Fn key while pressing it (such as Fn + F7). Wait a moment for the display to appear.
- If you’re using a Mac laptop, open System Preferences and select Displays. Click the Arrange tab and select the Mirror Displays checkbox.
- If 3D images aren’t displaying properly, check the following:
  - Press the 2D/3D button to switch to 3D viewing mode, if necessary.
  - Make sure that you are within the 3D viewing range. See “Choose a location” on the front of this sheet or the online User’s Guide for more information.
  - Press the 2D/3D button and use the [ and ] buttons to reposition the image.
Quick Setup

Before using the projector, make sure you read the safety instructions in the online User’s Guide (see the “Where to get help” section).

Choose a location

Keep the projector level and place it at a height so its lens is even with the top or bottom of the screen and is centered horizontally. If this isn't possible, use the lens shift feature or the keystone correction button on the projector to reposition the image (see “Adjust the image”).

To view 3D images correctly, RF 3D glasses must be worn within 32 feet (10 m) of the projector. Use the image to determine the viewing distance for 3D projection (the shading represents the 3D viewing area).

See the online User’s Guide for more information on where to place your projector.

Connect the projector

Choose from the following connections. For additional connection types, see the online User’s Guide.

Video device

1. Loosen the two screws at the bottom of the cable cover, then pull the cover forward.

2. Lift the cable cover out of the grooves at the top.

3. Connect up to 4 video devices and use the Source buttons on the remote control or the on the remote control to switch between them.

Using the remote control

Make sure the batteries are installed as shown (two AA batteries).

1. Turn on your video source.

2. Plug in the projector.

3. Press the power button on the projector or the button on the remote control. The shutter opens and the power light flashes blue, then stays on.

Note: To shut down the projector, press the power button on the projector or the standby button on the remote control.

4. The default language of the menu system is English. To select another language, press the Menu button on the projector or remote control, select Settings and press Enter. Select Language and press Enter. Select your language and press Enter. Press the Menu button to exit the menu system.

5. Press the Lens button on the remote control and use the and buttons to focus the image.

6. If your image looks like or , you can use the button on the projector to correct this.

Note: Using the keystone adjustment can affect the size and effective resolution of your image. If possible, change the position of your projector to eliminate the Keystone effect and use the lens shift option to position the image as necessary.

Viewing 3D images

To view 3D content, you must first connect a 3D-compatible video device to one of the HDMI ports on your projector.

1. Turn on and begin playback on the 3D-compatible video device.

Note: Make sure you set the video device to play content in 3D mode.

2. Press the 2D/3D button on the remote control, if necessary.

3. Slide the power switch on your 3D glasses to the on position.

Note: If the glasses don’t automatically display 3D content, you may need to pair them with the projector. After the glasses are fully charged, press the RF button on the front of the glasses. Make sure the pair button is pressed once and remain green for 10 seconds if pairing is successful.

You can also automatically convert 2D HDMI content to 3D. To enable the 2D-to-3D Conversion option, press the Menu button on the projector or remote control, select Signal and press Enter. Then select 3D Setup and press Enter. Select the Weak, Medium, or Strong setting, then press Enter.

See the online User’s Guide for more information on adjusting 3D images.

Troubleshooting

If you see a blank screen or the No signal message after turning on your video device or computer, check the following:

• Make sure the power light on the projector is blue and not flashing.

• Press the button on the projector or one of the Source buttons on the remote control to switch to the correct image source, if necessary.

• If you’re using a Windows laptop, press the function key on your keyboard that lets you display on an external monitor. It may be labeled CRT/LCD or have an icon such as . You may have to hold down the Fn key while pressing it (such as F1+ F7). Wait a moment for the display to appear.

• If you’re using a Mac laptop, open System Preferences and select Displays. Click the Arrangement tab and select the Mirror Displays checkbox.

If 3D images aren’t displaying properly, check the following:

• Press the 2D/3D button to switch to 2D viewing mode, if necessary.

• Make sure that you are within the 3D viewing range. See “Choose a location” on the front of this sheet or the online User’s Guide for more information.

Turn on your equipment

1. Turn on your video source.

2. Plug in the projector.

3. Connect up to 4 video devices and use the Source buttons on the remote control or the on the remote control to switch between them.

4. Lift the cable cover out of the grooves at the top.

5. Loosen the two screws at the bottom of the cable cover, then pull the cover forward.

6. Connect a 3D-compatible video device to one of the HDMI ports on your projector.

7. Turn on and begin playback on the 3D-compatible video device.

Note: Make sure you set the video device to play content in 3D mode.

8. Press the 2D/3D button on the remote control, if necessary.

9. Slide the power switch on your 3D glasses to the on position.

Note: If the glasses don’t automatically display 3D content, you may need to pair them with the projector. After the glasses are fully charged, press the RF button on the front of the glasses. Make sure the pair button is pressed once and remain green for 10 seconds if pairing is successful.

You can also automatically convert 2D HDMI content to 3D. To enable the 2D-to-3D Conversion option, press the Menu button on the projector or remote control, select Signal and press Enter. Then select 3D Setup and press Enter. Select the Weak, Medium, or Strong setting, then press Enter.

See the online User’s Guide for more information on adjusting 3D images.
Check that your 3D glasses are charged and have not entered standby mode. Slide the power switch on the 3D glasses to the OFF position, then back to the ON position.

Press the Menu button on your remote control, select the Signal menu, select 3D Setup, and then select 3D Format. Make sure that the Auto Detect option is selected.

Check that your video device and media are 3D-compatible. Refer to the documentation that came with your video device for more information.

Where to get help

Manual
For more information about using the projector, click the icon on your desktop to access the online manual (requires an internet connection). If you don’t have a User's Guide icon, you can install it from the projector CD or go to the Epson website, as described below.

Telephone support services
To use the Epson ProductLine® Support service, call (800) 637-7661. This service is available for the duration of your warranty period. You may also speak with a support specialist by calling (562) 276-4394 (US) or (905) 709-3839 (Canada).

Support hours are 6 a.m. to 4 p.m., Pacific Time, Monday through Friday, and 7 a.m. to 4 p.m., Pacific Time, Saturday. Days and hours of support are subject to change without notice. Toll or long distance charges may apply.

Internet support
Visit epson.com/support (U.S.) or epson.ca/support (Canada) for solutions to common problems. You can download utilities and documentation, get FAQs and troubleshooting advice, or e-mail Epson.

Registration
Register today to get product updates and exclusive offers. You can use the CD included with your projector or register online at epson.com/webreg.

Optional accessories
For a list of optional accessories, see the online User’s Guide.

You may purchase additional 3D glasses (part number V12H456020) or other accessories from an Epson authorized reseller. To find the nearest reseller, call 800-637-EPSON (800-436-7766). Or you can purchase online at epsonstore.com (U.S. sales) or epson.ca (Canadian sales).

Notices

Laser
Complies with FDA performance standards for laser products except for emissions, for which no standards apply.

Bluetooth Safety and Specifications
Contains Bluetooth module model: DBM-E207
This document provides safety instructions and describes the specifications. Read this document carefully before use to ensure your safety and product performance.

U.S.
Complies with FCC 15B: BSMI-CE207
This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy, and if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one of the following measures:

• Reorient or relocate the receiving antenna.
• Increase the separation between the equipment and receiver.
• Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
• Consult the dealer or an experienced radio/TV technician for help.

Caution: Changes or modifications not expressly approved by the party responsible for compliance could void the user’s authority to operate this equipment.

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with a minimum distance of 7.8 inches (20 cm) between the radiator and your body.

Canada
Contains IC: 10523-E207
This Class B digital apparatus complies with Canadian ICES-003.

This device complies with IC RSS-210 of the Industry Canada Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Radiation Exposure Statement:
This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with a minimum distance of 7.8 inches (20 cm) between the radiator and your body.

Declaration of Conformity
According to 14CFR, Part 20, and 15, Class B Personal Computers and Peripherals, and/or CbO Boards and Power Supplies used with Class B Personal Computers:

Epson America, Inc.
Located at: 3840 K瘿o Airport Way, M/S 3-13
Long Beach, CA 90804
Tel: (562) 981-3840
Declare under sole responsibility that the product identified herein, complies with 47CFR Part 2 and 15 of the FCC Rules as a Class B digital device. Each product marketed, is identical to the representation unit tested and found to be compliant with the standards. Records maintained continue to reflect the equipment being produced can be expected to be within the variation accepted, due to quantity production and testing on a statistical basis as required by 47CFR 2.909. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Trade Name: Epson
Type of Product: Projector
Model: H680A
Marketing Name: PowerLite Pro Cinema LS1080

Epson America, Inc. Limited Warranty

Three-Year Projector, and 1-year 3D Glasses Limited Warranty

What it Covers: Epson America, Inc. (“Epson”) warrants to the original retail purchaser of the Epson projector product enclosed with this limited warranty statement that the projector, if purchased new and operated in the United States, Canada, or Puerto Rico, will be free from defects in material and workmanship, in accordance with the limited warranty period of three (3) years from the date of original purchase. This limited warranty applies only to the projector and not to the 3D glasses. The 3D glasses carry a limited warranty period of one (1) year from the date of original purchase. For warranty service, you must provide proof of the date of original purchase.

What Epson Will Do: To Correct Problems: If your product requires service during the limited warranty period, please call Epson at the number on the bottom of this statement and be prepared to provide the model, serial number, and date of original purchase. Epson will, at its option, repair or replace the defective unit, without charge for parts or labor. If Epson authorizes an exchange for the defective projector, Epson will ship a replacement product to you, freight prepaid, so long as you are an address in the United States, Canada, or Puerto Rico. You are responsible for securely packaging the defective unit and returning it to Epson within 5 working days of receipt of the replacement. Epson requires a debit or credit card number to secure the cost of the replacement product in the event that you fail to return the defective one. When Epson authorizes an exchange for defective 3D glasses, you must first send in the defective glasses to Epson. Once we have received your defective glasses Epson will ship a replacement product to you, freight prepaid, so long as you are an address in the United States, Canada, or Puerto Rico. If Epson authorizes repair instead of exchange, Epson will direct you to send your product to Epson or its authorized service center, where the product will be repaired and sent back to you. You are responsible for packing the product and for all costs to and from the Epson authorized service center. When warranty service involves the exchange of the product or part of a product, the item replaced becomes Epson property. The exchanged product or part may be new or reconditioned, if reconditioned meet or exceed Epson standards of quality, and at Epson’s option, the replacement may be another model of like kind and quality. Epson liability for replacement of the covered product will not exceed the original retail selling price of the covered product. Exchange or replacement products or parts assume the remaining warranty period of the product covered by this limited warranty.

What This Warranty Does Not Cover: This warranty covers only normal use in the United States, Canada, or Puerto Rico. Extended use, continuous use is not considered normal use. This warranty does not cover consumables such as filters. This warranty is not transferable. Epson is not responsible for service should the Epson label or logo or the rating label or serial number be removed. Epson is not responsible for warranty service should the product fail to be properly maintained or fail to function properly as a result of misuse, abuse, improper installation, neglect, improper shipping, damage caused by disasters such as fire, flood, and lightning, improper electrical current, software problems, add-on cards or cables, interaction with non-Epson products, or service other than by Epson or an Epson Authorized Service. Postage, insurance, or shipping costs incurred in sending your Epson product for carry-in warranty service are your responsibility. If a claimed fault cannot be identified or reproduced in service, you will be held responsible for costs incurred.

DISCLAIMER OF WARRANTIES: THE WARRANTY AND REMEDY PROVIDED ABOVE ARE EXCLUSIVE AND IN LIEU OF ALL OTHER EXPRESSED OR IMPLIED WARRANTIES INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE AND NON-INFRINGEMENT, UNLESS STATED HEREIN. ANY STATEMENTS OR REPRESENTATION MADE BY ANY OTHER PERSON OR FIRM ARE VOID.

Remedies: Your exclusive remedy and Epson’s entire liability for a material breach of this Agreement will be limited to a refund of the price paid for the Epson products purchased by this Agreement. Any action for breach of warranty must be brought within 3 months of the expiration date of the warranty. Epson is not liable for performance delays or for nonperformance due to causes beyond its reasonable control. Except as provided in this written warranty, neither Epson nor its affiliates shall be liable for any loss, inconvenience, or damage, including direct, special, incidental or consequential damages, including lost profits, arising out of the use of or inability to use the Epson products; whether resulting from breach of warranty or any other legal theory. Some jurisdictions do not allow limits on warranties or remedies or remedies for breach in contracts. In such jurisdictions, the laws in this paragraph and the preceding paragraph may not apply.

In Canada, warranties include both warranties and conditions.

Arbitration: Governing Law: Any disputes arising out of this Agreement will be settled by arbitration to be conducted before a single arbitrator in Los Angeles, California, in accordance with the commercial Arbitration Rules of the American Arbitration Association, and judgment upon the award rendered by the arbitrator may be entered in any court having jurisdiction thereof. This Agreement shall be construed in accordance with the laws of the State of California, except for arbitration which shall be conducted in accordance with the Federal Arbitration Act.
