Powering Your Scanner

See these sections to learn about the power management options for your scanner.

If you connect your scanner using a USB connection, you can power the scanner through the USB port.

If you connect your scanner using a Wi-Fi connection, you must install the batteries or connect the optional AC adapter.

Installing Batteries
Using the Optional AC Adapter

Parent topic: Scanner Basics

Installing Batteries

You can use 4 AA batteries (Ni-MH, alkaline, or lithium) to power your scanner.

Caution: Use only the type of batteries specified in this manual. Do not install batteries of different types, or mix new and old batteries.
1. Slide off the battery cover.

2. Insert the batteries with the + and – ends facing as shown.
3. Slide the battery cover back on.

Parent topic: Powering Your Scanner

Battery Safety Instructions

Using the Optional AC Adapter
When scanning a large number of documents over a wireless connection, use the optional AC adapter (part number B12B867201) to avoid draining the batteries.

Note: The AC adapter does not recharge the batteries installed in the scanner.
Connect the AC adapter as shown below:

Caution: Use only the AC adapter model compatible with this product. Do not use the AC adapter with any other electronic device.

Parent topic: Powering Your Scanner

Changing the Power Off Setting

You can use the Epson Scan Settings utility to change the time period of inactivity before the scanner turns off automatically.

Note: The Energy Saving button is disabled when you connect to the scanner over a network. You can only modify the settings over a USB connection.

1. Use the provided USB cable to connect the scanner to your computer.
2. Do one of the following to access the Epson Scan Settings utility:
   - **Windows 10**: Click 📔 and select EPSON > EPSON Scan Settings.
   - **Windows 8.x**: Navigate to the Apps screen and select EPSON Scan Settings.
   - **Windows (other versions)**: Click 📔 or Start, and select All Programs or Programs. Select Epson, then EPSON Scan, then click EPSON Scan Settings.
• **Mac:** Open the Applications folder, then open the Epson Software folder and double-click the EPSON Scan Settings icon.

3. Click **Energy Saving**.

![Energy Saving dialog box](image)

4. Enter the time period of inactivity before the scanner turns off automatically as the **Power Off Timer** setting. If you enter a value of 0, the scanner will not turn off automatically.

5. Click **OK**.

**Parent topic:** Scanner Basics
Loading Originals

Follow the instructions here to load your originals into the scanner.

Loading Originals in the Input Slot
Original Document Loading Capacity
Plastic Card Loading Capacity

Loading Originals in the Input Slot

You can load an original that meets the document specifications in the input slot.

1. Slide the edge guide all the way out.

Caution: Do not load photos, or valuable original documents or artwork, directly into the scanner. This may wrinkle or damage the original.
2. Slide your original into the input slot against the right side as shown until it meets resistance. Make sure the printed side is face down and top edge first.

3. Slide the edge guide against the edge of the original.

Parent topic: Loading Originals

**Note:** The length of paper that can be scanned on Windows is 2.9 to 36.0 inches (73.7 to 914.4 mm). On a Mac, the maximum length is 16.5 inches (419 mm).

**Caution:** Do not load the following types of originals in the scanner, or they may be damaged or may damage the scanner:
- Folded paper
- Thermal paper
- Coated paper
• Originals with uneven surfaces, such as embossed documents
• Photos
• Originals with wet ink
• Ripped, curled, or wrinkled originals
• Originals containing staples or paper clips
• Originals with holes, other than standard hole-punched originals
• Originals that are bound
• Originals with carbon paper backing
• Transparencies
• Glossy originals
• Carbon-less paper
• Perforated originals
• Originals with labels or stickers
• Envelopes that are torn
• Envelopes with open flaps
• Envelopes with exposed sticky glue
• Envelopes sealed with sealing wax
• Envelopes with windows

Note: Scanning may not work properly for plastic cards with shiny surfaces.
Wi-Fi Networking
See these sections to use your scanner over a Wi-Fi network.
Network Security Recommendations
Connection Mode Switch
Connecting to an Existing Wi-Fi Network
Direct Wi-Fi Mode Setup
Epson DocumentScan App for iOS/Android

Network Security Recommendations
To help deter unauthorized access to your product over a network, you should protect your network environment using appropriate security measures.

Security measures such as these can help deter threats such as loss of user data, use of telephone and fax lines, and other intrusions:

• **Connect your product only to a network protected by a firewall**
  Connecting your product directly to the Internet may leave it vulnerable to security threats. Instead, connect it to a router or other network connection protected by a firewall. Your router may already have a firewall set up by your Internet service provider; check with your ISP for confirmation. For best results, set up and use a private IP address for your network connection.

• **Change the default administrator password on your product**
  If your product has an option to set an administrator password, change the default administrator password to deter access by unauthorized users to personal data stored on your product, such as IDs, passwords, and contact lists.

Parent topic: Wi-Fi Networking

Connection Mode Switch
The position of the connection mode switch determines which method you can use to connect the scanner to a wireless network or device, or to a computer.

- **AP mode**
- **Wi-Fi**
- **USB**

Connecting to an Existing Wi-Fi Network

You can set up your scanner to communicate with your computer using a wireless router. The wireless router can be connected to your computer over a wireless or wired network.

1 Epson scanner
2 Wireless router
3 Computer with a wireless interface
4 Computer
5 Internet
6 Ethernet cable (used only for wired connection to the wireless router)

Manually Connecting to a Wi-Fi Network
Wi-Fi Protected Setup (WPS)
Manually Connecting to a Wi-Fi Network

You can use the EpsonNet Config utility to connect the scanner to a Wi-Fi network.

Note: You must have a computer with a wireless adapter to set up the connection.

Note: The scanner powers off after 5 minutes of inactivity. If the scanner turns off during the procedure, you may need to repeat some of these steps.

1. Make sure the scanner is turned off.
2. Set the connection mode switch on the scanner to the AP mode position.

3. Turn on the scanner and wait for the ready and Wi-Fi lights to stop flashing.
4. From your computer or device, open the list of wireless networks and select the SSID shown on the label on the bottom of the scanner.
5. Enter the password shown on the label on the bottom of the scanner.
   When the ready and Wi-Fi lights on the scanner stay on, the connection is established.
6. Do one of the following to start EpsonNet Config:
   • Windows 10: Click > EpsonNet > EpsonNet Config.
   • Windows 8.x: Navigate to the Apps screen and select EpsonNet Config.
   • Windows (other versions): Click or Start, and select All Programs or Programs. Select EpsonNet > EpsonNet Config > EpsonNet Config.
• **Mac:** Open the Applications folder, select Epson Software > EpsonNet > EpsonNet Config > EpsonNet Config.

7. Select your scanner from the list and click **Configuration**.

8. Select **Network** > **Wi-Fi**.

9. Select the following settings for your infrastructure connection:
   • **Communication mode:** Select **Infrastructure**.
   • **SSID:** Enter the SSID of the wireless router.
   • **Security level:** Select the wireless connection's security protocol.
   • **WEP Settings** or **WPA Settings:** Enter the wireless connection's security key.

10. Click **Transmit**.

11. Open the **Device** menu and select **Quit**.

12. Turn off the scanner.

13. Connect the computer or device to the wireless network.

14. Set the connection mode switch on the scanner to the **Wi-Fi** position.

15. Turn on the scanner.

   When the ready and Wi-Fi lights on the scanner stay on, the scanner is connected to the network.

16. Select the link below to set up network scanning. You must set up network scanning to connect your computer and wireless scanner.

**Parent topic:** Connecting to an Existing Wi-Fi Network

**Related tasks**

Setting Up Network Scanning
Wi-Fi Protected Setup (WPS)

If your network uses a WPS-enabled wireless router, you can quickly connect your scanner to the network using Wi-Fi Protected Setup (WPS).

**Note:** To check if your router is WPS-enabled, look for a button labeled **WPS** on your router. If there is no hardware button, there may be a WPS setting in the software for the device. Check your network product documentation for details.

**Using WPS to Connect to a Network**

**Using WPS PIN Mode to Connect to a Network**

**Parent topic:** Connecting to an Existing Wi-Fi Network

**Using WPS to Connect to a Network**

If you have a WPS-enabled wireless router, you can use Wi-Fi Protected Setup (WPS) to connect your scanner to the network.

1. Make sure the scanner is turned off.
2. Set the connection mode switch on the scanner to the **Wi-Fi** position.
3. Enable WPS on your router by pressing the **WPS** button or enabling the WPS setting in your router firmware.
   - The router enters WPS discovery mode for 2 minutes.
4. Turn on the scanner.
5. Press and hold the **Connect** button on the scanner for at least 3 seconds, then release it when the ready and ⚡ Wi-Fi lights flash alternately.

![Connect button on scanner](image)

**Note:** If you do not complete this step within 2 minutes, repeat steps 1 to 5.

When the ready and ⚡ Wi-Fi lights on the scanner stay on, the scanner is connected to the network.

6. Select the link below to set up network scanning. You must set up network scanning to connect your computer and wireless scanner.

**Parent topic:** [Wi-Fi Protected Setup (WPS)]

**Related tasks**

[Setting Up Network Scanning](

**Using WPS PIN Mode to Connect to a Network**

If you have a WPS-enabled wireless router that supports PIN mode, you can use Wi-Fi Protected Setup (WPS) PIN mode to connect your scanner to the network.

1. Find the WPS PIN number setting in your router's firmware.
2. Make sure the scanner is turned off and set the connection mode switch on the scanner to the AP mode position.

3. Press and hold the Connect button as you press the power button to turn on the scanner. Release the Connect button when the ready and Wi-Fi lights flash alternately.

The scanner enters WPS discovery mode for two minutes.
4. Enter the PIN code 01234565 into the WPS PIN number setting in the router firmware within two minutes.

**Note:** If you do not enter the code within 2 minutes, repeat steps 1 to 4.

The ready and Wi-Fi lights on the scanner stay on, indicating that the scanner is connected to the network.

5. Turn off the scanner.
6. Set the connection mode switch on the scanner to the **Wi-Fi** position.

7. Press the power button to turn on the scanner.

   When the ready and Wi-Fi lights on the scanner stay on, the scanner is connected to the network.

8. Select the link below to set up network scanning. You must set up network scanning to connect your computer and wireless scanner.

   **Parent topic:** Wi-Fi Protected Setup (WPS)

   **Related tasks**

   Setting Up Network Scanning

### Setting Up Network Scanning

After manually configuring your scanner to connect to your network, you must set up the computer to connect to the scanner using the Epson Scan Settings utility. Your scanner must be turned on and connected to the network before you begin.

**Note:** The scanner powers off after 5 minutes of inactivity. If the scanner turns off during the procedure, you may need to repeat some of these steps.
Note: Make a note of the IP address or host name of the scanner so you can enter it in these steps.

1. Do one of the following to start Epson Scan Settings:
   - **Windows 10**: Click 📱 > EPSON > EPSON Scan Settings.
   - **Windows 8.x**: Navigate to the Apps screen and select EPSON Scan Settings.
   - **Windows (other versions)**: Click 📱 or Start > All Programs or Programs > EPSON > EPSON Scan > EPSON Scan Settings.
   - **Mac**: Open the Applications folder, click Epson Software, and click EPSON Scan Settings.

2. Select your scanner from the Select Scanner list.
3. Select the **Network** setting and click **Add**.
4. Do one of the following:
   • Under **Search for addresses**, select the IP address of your scanner, and click **OK**.
   • Select the **Enter address** setting, type in the IP address or host name of your scanner, and click **OK**.

5. Click the **Test** button to check the connection.
   You see a confirmation message.
Determining the Scanner’s IP Address

If you have multiple scanners on your network, you need to know the IP address of the scanner when setting up network scanning.

1. Do one of the following to start EpsonNet Config:

   - **Windows 10**: Click > EpsonNet > EpsonNet Config.
   - **Windows 8.x**: Navigate to the Apps screen and select EpsonNet Config.
   - **Windows (other versions)**: Click or Start, and select All Programs or Programs. Select EpsonNet > EpsonNet Config > EpsonNet Config.
   - **Mac**: Open the Applications folder and select Epson Software > EpsonNet > EpsonNet Config.

2. Locate your scanner in the list and write down the IP address.

Parent topic: Connecting to an Existing Wi-Fi Network

Direct Wi-Fi Mode Setup

You can set up your scanner to communicate directly with your computer or another device without requiring a wireless router. If your product is not already connected to a wireless network, it enters access point mode and the scanner itself acts as the network access point for up to 4 devices.
Enabling a Direct Wi-Fi Connection
Using WPS to Set Up a Direct Wi-Fi Connection

Parent topic: Wi-Fi Networking

Enabling a Direct Wi-Fi Connection
You can enable a direct Wi-Fi connection to allow direct communication between your scanner and computer or other devices without a wireless router.

Note: While you are connected to the scanner, your computer cannot access the internet.

1. Make sure the scanner is turned off.
2. Set the connection mode switch on the scanner to the **AP mode** position.
3. Turn on the scanner.
4. Wait for the ready and Wi-Fi lights to stop flashing.
5. From your computer or device, search for and select the SSID shown on the label on the bottom of the scanner.
6. Enter the password shown on the label on the bottom of the scanner.

   The computer connects to the scanner's wireless network. If the connection is unsuccessful, make sure you entered the password correctly.
Using WPS to Set Up a Direct Wi-Fi Connection

You can use Wi-Fi Protected Setup (WPS) to create a direct Wi-Fi connection to a WPS-enabled computer or device.

**Note:** While you are connected to the scanner, your computer cannot access the internet.

1. Make sure the scanner is turned off.
2. Set the connection mode switch on the scanner to the **AP mode** position.
3. Enable WPS on your router by pressing the **WPS** button or enabling the WPS setting in your router firmware.
   The router enters WPS discovery mode for 2 minutes.
4. Turn on the scanner.
5. Press and hold the **Connect** button for at least 3 seconds until the ready and Wi-Fi lights flash alternately.
When the ready and Wi-Fi lights on the scanner stay on, the connection is established.

**Note:** If you do not complete this step within 2 minutes, start the procedure again.

**Parent topic:** Direct Wi-Fi Mode Setup

## Epson DocumentScan App for iOS/Android

You can use the Epson DocumentScan app to scan from a network scanner to an iOS or Android device over a direct Wi-Fi connection.

For more information about Epson DocumentScan, search for the app on the App Store (iOS) or Google Play (Android).

**Parent topic:** Wi-Fi Networking
Scanning

You can scan your originals and save them as digital files.

Starting a Scan from a Scanner Button

Starting a Scan from a Scanning Program

Scanning with Document Capture Pro or Document Capture

Scanning with Epson Scan

Scanning Special Projects

Starting a Scan from a Scanner Button

You can scan using a button on your scanner. This automatically starts the scanning program you have assigned to the button.

Your product automatically selects suitable default scan settings, but you can view or change them as necessary.

Note: Document Capture Pro (Windows) and Document Capture (Mac) do not support scanning from the scanner button over a wireless network. Launch Epson Scan before scanning from the scanner button.

1. Make sure you installed the scanner software and connected the scanner to your computer or network.
2. Load an original in your scanner.
3. Press the start button.
   The image is scanned and saved to the folder you have specified.

   Note: If your product is connected via USB, you can use Document Capture Pro (Windows) or Document Capture (Mac) to change the default scan settings when you scan using the start button.

Assigning Start Button Settings or Scan Jobs

Parent topic: Scanning
Assigning Start Button Settings or Scan Jobs

You can view or change the default scan settings when you scan using the start button. You do this using the Document Capture Pro (Windows) or Document Capture (Mac) program.

1. Start Document Capture Pro or Document Capture on a computer connected to the scanner.
2. Click the Manage Job icon from the toolbar at the top of the window.
3. On the Job Management window, click Add or the + icon.
4. Enter a name for the new job, then select the settings you want to view or change and change the settings as necessary, and click OK.

Note: See the Help information in Document Capture Pro or Document Capture for details.

5. Do one of the following:
   • Windows: On the Job Management window, click Event Settings.
   • Mac: Click the icon at the bottom of the window, then click Event Settings.
6. Select the job that you want to assign to the start button from the pull-down menu.
7. Click OK.

Parent topic: Starting a Scan from a Scanner Button

Scanning with Document Capture Pro or Document Capture

When you scan with Document Capture Pro (Windows) or Document Capture (Mac), the program automatically saves your scanned file on your computer in the folder you specify. You can select settings, preview, and change the scanned file settings as necessary.

Note: The settings may vary, depending on the software version you are using. See the Help information in Document Capture or Document Capture Pro for details.

1. Do one of the following to start Document Capture Pro (Windows) or Document Capture (Mac):
   • Windows 10: Click and select Epson Software > Document Capture Pro.
   • Windows 8.x: Navigate to the Apps screen and select Document Capture Pro.
   • Windows (other versions): Click Start, and select All Programs or Programs. Select Epson Software > Document Capture Pro.
• **Mac**: Open the **Applications** folder, open the **Epson Software** folder, and select **Document Capture**.

2. Select **Switch to Standard View**, if necessary.
   
   You see a window like this:
   
   ![Scan Window](image)

3. Click the **Scan** icon.
You see a window like this:

![Scan window](image)

**Note:** If you want to use a scan job that you created instead, select it from the Job list in the Document Capture Pro or Document Capture window, click the Start Job button, and skip the rest of these steps.

4. Select any displayed scan settings you want to use.

   **Note:** See the Help information in Document Capture Pro or Document Capture for details.

5. If you want to select detailed scan settings, do one of the following:
   - **Windows:** Click **Detailed Settings**. Select any displayed scan settings you want to use and click **OK**.
   - **Mac:** Close the Scan window. Open the **Scan** menu at the top of the screen and select **Displays the EPSON Scan Setup Screen**. Click the **Scan** icon. Select any displayed scan settings you want to use and click **OK**.
6. Click **Scan**.
   You see a preview of your scan in the Document Capture Pro (Windows) or Document Capture (Mac) window.

7. If you would like to scan additional originals and add them to the current captured images, click the **Add Page** button and repeat steps 2 through 5.

8. Check the scanned images and edit them as necessary.

9. Click one of the Destination icons to choose where to send your scanned files. (If you cannot see all of the icons below, click the arrow next to the icons.)

![Destination icons]

10. Depending on the destination you chose, click **OK** or **Send** to complete the operation.

**Parent topic:** Scanning

**Related tasks**

Scanning to a SharePoint Server or Cloud Service

**Scanning with Epson Scan**

Epson Scan automatically saves your scanned file on your computer in the format and folder you specify. You can select settings, preview, and change the scanned file settings as necessary.

1. Do one of the following to start Epson Scan:

   - **Windows 10**: Click and select **EPSON > Epson Scan**.
   - **Windows 8.x**: Navigate to the Apps screen and select **EPSON Scan** under EPSON or EPSON Software.
   - **Windows (other versions)**: Click or Start, and select All Programs or Programs. Select EPSON or EPSON Software and click **EPSON Scan**.
   - **Mac**: Open the Applications folder, open the Epson Software folder, and double-click the EPSON Scan icon.
You see a window like this:

2. Select options for each of the scan settings on the screen.
3. If necessary, click the **Preview** button.
   Epson Scan previews your original and displays the result in a separate Preview window. The scanner also ejects the page.
4. Reload the page in the scanner.
5. Click the **Image Adjustment** tab and select any of the image adjustment settings you want to use. Before making adjustments, click the image or scan area in the Preview window.

6. Click **Scan**.

   You see the File Save Settings window.

7. Change any of the necessary file save settings and click **OK**.

Epson Scan scans your original, and saves the file in the selected folder or opens it in your scanning program. If the file was saved directly to your computer, you see the file in the Windows Explorer or Mac Finder, where you can view and print the image, if desired.

**Available Image Adjustments**

Parent topic: **Scanning**

---

**Available Image Adjustments**

You can select these options from the Image Adjustments tab in Epson Scan.

**Note:** Not all adjustment settings may be available, depending on the Image Type setting.

Select the **Image Option** checkbox to access additional settings.

**Unsharp Mask**

Makes the edges of certain image areas clearer. Turn off this option to leave softer edges.

**Descreening**

Removes the ripple pattern that might appear in subtly shaded image areas, such as skin tones. This option improves results when scanning magazines or newspapers. (The results of descreening do not appear in the preview image, only in your scanned image.)

**Text Enhancement**

Sharpens the appearance of letters in text documents.

**Auto Area Segmentation**

Makes grayscale images clearer and text recognition more accurate by separating the text from the graphics.

**Dropout**

The scan will not pick up the color you select. This setting is only available if you select an Image Type of Grayscale or Black & White.

**Color Enhance**

Enhances the red, green, or blue shades in the scanned image.
**Edge Fill**
Corrects shadowing around the edges of the image by filling the shadows with the color you select.

**Brightness**
Adjusts the overall lightness and darkness of the scanned image.

**Contrast**
Adjusts the difference between the light and dark areas of the overall scanned image.

**Threshold**
Adjusts the level at which black areas in text and line art are delineated, improving text recognition in OCR (Optical Character Recognition) programs.

**Parent topic:** Scanning with Epson Scan

---

### Starting a Scan from a Scanning Program

You can start Epson Scan from a TWAIN-compliant scanning program to select scan settings, scan, and open the scanned image in the program.

1. Open your scanning program and select its scanning option. (See your scanning program help for instructions.)
2. Select your product.

**Note:** In certain programs, you may need to select your product as the "source" first. If you see a **Select Source** option, choose it and select your product. With Windows, do not select a **WIA** option for your product; it will not work correctly.
You see an Epson Scan window like this:

![Epson Scan window](image)

**Note:** In certain programs, you may see the program's scan window instead of the Epson Scan window. Select scanning options as necessary.

**Parent topic:** Scanning
Scanning Special Projects

Your product's scanning software offers various options to help you quickly complete special scan projects.

Convert Scanned Documents to Editable Text (OCR)

You can scan a document and convert the text into data that you can edit with a word processing, spreadsheet, or HTML-editing program. This process is called OCR (Optical Character Recognition). To scan and use OCR, you need to install an OCR program, such as ABBYY FineReader.

Scanning Using OCR - Windows

You can use the ABBYY FineReader OCR program to convert scanned documents to editable text.

1. Load your original in the scanner.
2. Do one of the following to open ABBYY FineReader:
   - **Windows 8.x**: Navigate to the Apps screen and select **ABBYY FineReader 9.0 Sprint**.
   - **Windows (other versions)**: Click or Start, and select All Programs or Programs. Select ABBYY FineReader 9.0 Sprint > ABBYY FineReader 9.0 Sprint.
You see a window like this:

3. Select the language used in the document you are going to scan as the Document Language setting.
4. Click the icon that corresponds with the program or format you want to scan to.
5. If you see the Select Scanner window, select your product and click OK.

   **Note:** Do not select a WIA option for your product; it will not work correctly.

You see the scan settings window.

6. Select your scan settings.
7. Click Preview and adjust the area you want to scan, if necessary.
8. Click Scan.

   **Note:** To scan a multi-page document, select settings in the Multi-Page Scanning section and click Scan for each page.

9. When you are finished scanning, click Close.
Your document is scanned and processed into editable text, then you see the Save As window.

10. Select a name and a file format for your document and click **Save**.

   The file is saved and then opened in an application associated with the file type you selected, if available on your system.

**Parent topic:** Convert Scanned Documents to Editable Text (OCR)

**Related tasks**

Scanning with Epson Scan

**Scanning Using OCR - Mac**

You can use the ABBYY FineReader OCR program to convert scanned documents to editable text.

1. Load your original in the scanner.

2. Open the **Applications** folder and click the **ABBYY FineReader Sprint** icon.
You see a window like this:

3. Open the **Get Images From** pop-up menu and select your product.
4. Select the language used in the document you are going to scan as the **Document Language** setting.
5. Select the type of document you are going to scan.
   Epson Scan starts in the last scan mode you used.
6. Select your scan settings and click **Scan**.
   Your document is scanned and you see the Epson Scan window while your document is converted to editable text.
7. Click **Close** to close the Epson Scan window and Preview window, if necessary.
   You see the Save Converted File As window:

8. Click the **Save** button.
   The file is saved and then opened in an application associated with the file type you selected, if available on your system.

### Scanning to a SharePoint Server or Cloud Service

You can use Document Capture Pro (Windows) or Document Capture (Mac) to upload scanned images to a SharePoint server or a cloud service.

1. Do one of the following to start Document Capture Pro (Windows) or Document Capture (Mac):
   - **Windows 10**: Click ![Start](#) and select **Epson Software > Document Capture Pro**.
   - **Windows 8.x**: Navigate to the **Apps** screen and select **Document Capture Pro**.
   - **Windows (other versions)**: Click ![Start](#) or **Start**, and select **All Programs** or **Programs**. Select **Epson Software > Document Capture Pro**.
   - **Mac**: Open the **Applications** folder, open the **Epson Software** folder, and select **Document Capture**.
You see a window like this:

2. Click the **Scan** icon.
3. Select any displayed scan settings you want to use.

   **Note:** See the Help information in Document Capture Pro or Document Capture for details.

4. Click **Scan**.
   You see a preview of your scan in the Document Capture Pro or Document Capture window.

5. Click one of the cloud service Destination icons to choose where to save your scanned file. (If you cannot see all of the icons below, the service software may not be installed, the service may not be available on your platform, or you need to click the arrow next to the icons.)
   - Web Folder (WebDAV)
   - Microsoft SharePoint server (Windows only)
   - Evernote (Windows only)
- Microsoft OneNote (Windows only)
- Google Drive
- SugarSync

You see the Transfer Settings window.

6. Enter any required information to set up the destination. If you have previously created a saved setting for the destination, select it from the drop-down list.

7. Adjust any save settings, then click OK or Send, depending on the destination.

Your originals are scanned and uploaded to the indicated server.

Cleaning and Transporting Your Scanner

See these sections if you need to clean or transport your scanner.

Cleaning Your Scanner
Cleaning Inside Your Scanner
Replacing Batteries
Calibrating Your Scanner
Transporting Your Scanner

Cleaning Your Scanner

To keep your product working at its best, you should clean it several times a year.

Caution: Do not use a hard brush, alcohol, or paint thinner to clean the product or you may damage it. Do not use oil or other lubricants inside the product or let water get inside it. Do not open the product's outer case.

1. Turn off the scanner and unplug the optional AC adapter.
2. Disconnect any connected cables.
3. Clean the outer case with a soft, dry cloth. Do not use liquid or chemical cleansers.

Note: If the outer case still requires additional cleaning, use a slightly damp cloth to wipe the outer case. Then wipe the case with a soft, dry cloth.

Parent topic: Cleaning and Transporting Your Scanner

Cleaning Inside Your Scanner

Clean your scanner regularly using the wet and dry cleaning sheets that came with your scanner. Dust on the scanning surface can cause spots or lines in your scanned images.

Caution: Use the wet and dry cleaning sheets to clean your scanner. Do not use a hard brush, alcohol, or paint thinner to clean the product or you may damage it. Do not use oil or other lubricants inside the product or let water get inside it.
You can purchase genuine Epson accessories at epson.com (U.S. sales), epson.ca (Canadian sales), or epson.com.jm (Caribbean sales). You can also purchase accessories from an Epson authorized reseller. To find the nearest one, call 800-GO-EPSON (800-463-7766) in the U.S. or 800-807-7766 in Canada.

1. Turn on the scanner and make sure it is connected to the computer.

2. Load the dry cleaning sheet into the scanner.

3. Do one of the following to start Epson Scan Settings:
   - **Windows 8.x**: Navigate to the Apps screen and select EPSON Scan Settings.
   - **Windows (other versions)**: Click or Start > All Programs or Programs > EPSON > EPSON Scan > EPSON Scan Settings.
   - **Mac**: Open the Applications folder, click Epson Software, and click EPSON Scan Settings.

4. Click Maintenance.

5. Click Cleaning. Cleaning takes about 30 seconds.
   The scanner feeds and ejects the cleaning sheet.

6. If the scanner is not clean, repeat these steps to clean it again.

   **Note**: You can use the same dry cleaning sheet multiple times.

7. If the scanner is not clean after multiple cleanings with the dry cleaning sheet, repeat these steps using the wet cleaning sheet.

   **Note**: You can use the wet cleaning sheet only once.
Replacing Batteries

When the low battery light is on, you need to replace the batteries. You can use 4 AA batteries (Ni-MH, alkaline, or lithium) to power your scanner.

Caution: Use only the type of batteries specified in this manual. Do not install batteries of different types, or mix new and old batteries.

1. Slide off the battery cover.
2. Remove the old batteries and recycle them appropriately.

3. Insert the batteries with the + and – ends facing as shown.
4. Slide the battery cover back on.

Calibrating Your Scanner

If you notice any of the following image quality problems, you can calibrate the scanner using the calibration sheet that came with it.

- Scanned images are blurry
- Scanned colors differ from the colors in the original.
- Scanned image are darker or lighter than the original.
- Scanned images contain vertical lines.

Note: You can use the calibration sheet multiple times. If calibrating the scanner does not improve the image quality, contact Epson for support. Make sure the scanner batteries are not low or calibration will not start.

1. Turn on the scanner and make sure it is connected to the computer.
2. Load the calibration sheet into the scanner.

3. Do one of the following to start Epson Scan Settings:
   - **Windows 8.x**: Navigate to the **Apps** screen and select **EPSON Scan Settings**.
   - **Windows (other versions)**: Click or Start > All Programs or Programs > EPSON > EPSON Scan > EPSON Scan Settings.
   - **Mac**: Open the **Applications** folder, click **Epson Software**, and click **EPSON Scan Settings**.

4. Click **Maintenance**.

5. Click **Calibration**.
   The scanner feeds the calibration sheet, calibrates the scanner for about one minute, and then ejects the sheet.

**Solving Scanning Problems**

Check these solutions if you have problems scanning with your product.

- **Scanner Does Not Turn On or Turns Off Unexpectedly**
- **Scanner Button Does Not Work as Expected**
- **Scanning Software Does Not Operate Correctly**
- **Cannot Start Epson Scan**
- **Original Feeds Incorrectly in Scanner**
- **Original Jams in Scanner**
- **Scanning is Slow**

Parent topic: Solving Problems

**Scanner Does Not Turn On or Turns Off Unexpectedly**

If the scanner does not turn on or if it turns off unexpectedly, try these solutions:

- Make sure the optional AC adapter is securely connected to the scanner and to a working electrical outlet.
- If the scanner turns off unexpectedly, you may need to adjust the **Energy Saving > Power Off Timer** setting in Epson Scan Settings. The scanner must be connected via USB to change this setting.
- Try pressing the **power button for approximately one second.**
• If you are using a USB connection, make sure the connection mode switch is set to **USB**.
• If you are using a wireless connection, make sure that charged batteries are installed or the optional AC adapter is connected.

**Scanner Button Does Not Work as Expected**

If the scanner button does not start the correct program or perform the correct action, try these solutions:

• Document Capture Pro (Windows) and Document Capture (Mac) do not support using the button to scan over a wireless connection. Connect the scanner using a USB cable.
• On Windows, be sure that the scanner is listed under **Imaging Devices** in the Device Manager.
• Make sure Document Capture Pro (Windows) or Document Capture (Mac) is installed correctly. If necessary, uninstall and reinstall it.
• Make sure you have assigned the correct job to the scanner button and change it, if necessary.
• If you selected **Keep Blocking** in a Windows Security Alert window during or after installation of Document Capture Pro, unblock the EEventManager Application program in the Windows security settings; see Windows help for details.
• Check the status of the lights and make sure the scanner is ready to scan.
• Make sure the connection mode switch is set correctly (ES-300W).
• When using a wireless connection, start Epson Scan on your computer before scanning from the product.
• On a Mac, make sure you are logged in as the user who installed the scanner software. Other users must run Epson Scanner Monitor in the Applications folder before using the button to scan.

**Parent topic:** Solving Scanning Problems

Uninstall Your Scanner Software
Scanning Software Does Not Operate Correctly

If your scanning software does not operate correctly, try these solutions:

• Make sure your computer has adequate memory and meets the system requirements for your operating system.
• Make sure your computer is not running in a power-saving mode, such as sleep or standby. If so, wake your system and restart your scanning software.
• Make sure the scanner is turned on.
• Make sure the connection between the scanner and your computer is secure.
• If you upgraded your operating system but did not reinstall your scanning software, try reinstalling it.
• On Windows, be sure that the scanner is listed under Imaging Devices in the Device Manager.
• Connect the scanner directly to the computer. The scanner may not work properly when connected through a USB hub.
• If you are scanning on a Mac, make sure no other Epson scanner drivers are installed. If other drivers are installed, uninstall them, then reinstall this scanner's software.
• If you are using a TWAIN-compliant program, make sure that the correct product is selected as the Scanner or Source setting.

Starting a Scan from a Scanning Program

Cannot Start Epson Scan

If you cannot start Epson Scan, try these solutions:

• Make sure your scanner is turned on and any interface cables are securely connected at both ends.
• Make sure Epson Scan is selected in your scanning program.
• Make sure your computer is not running in a power-saving mode, such as sleep or standby. If so, wake your system and restart Epson Scan.
• If you connected the scanner using a USB cable, make sure it is connected directly to your computer or through only one USB hub.

• Check the connection setting and test the connection using Epson Scan Settings:

  • **Windows 10**: Click and select **EPSON > EPSON Scan Settings**. Make sure the correct **Connection** setting is selected, then click the **Test** button.

  • **Windows 8.x**: Navigate to the **Apps** screen and select **EPSON Scan Settings**. Make sure the correct **Connection** setting is selected, then click the **Test** button.

  • **Windows (other versions)**: Click or **Start > All Programs or Programs > EPSON > EPSON Scan > EPSON Scan Settings**. Make sure the correct **Connection** setting is selected, then click the **Test** button.

  • **Mac**: Open the **Applications** folder, click **Epson Software**, and click **EPSON Scan Settings**. Make sure the correct **Connection** setting is selected, then click the **Test** button.

• Make sure you do not have multiple versions of Epson Scan installed. If you do, uninstall both versions and install one version.

• If you upgraded your operating system but did not reinstall Epson Scan, try reinstalling it.

• If you are using a TWAIN-compliant program, make sure that the correct product is selected as the **Scanner** or **Source** setting.

Solving Network Scanning Problems
Check these solutions if you have problems scanning over a network.
Cannot Scan Over a Network
Scanner Cannot Connect to a Wireless Router

Parent topic: Solving Problems

Cannot Scan Over a Network
If you cannot start Epson Scan for scanning over a network, try these solutions:

Note: Document Capture Pro (Windows) and Document Capture (Mac) do not support starting a scan from the scanner button over a wireless network. Launch Epson Scan before scanning from the scanner button.

• If you did not successfully connect to a network while installing your product software, select the link at the end of this topic and follow the steps in "Manually Connecting to a Wi-Fi Network". If you are still unable to connect to a network, try the other solutions in this topic.
• If you are scanning a large original at a high resolution, a network communication error may occur. Try scanning again at a lower resolution.

• If network communication was interrupted while starting Epson Scan, exit Epson Scan, wait a few seconds, and restart it. If Epson Scan cannot restart, turn off your scanner, turn it back on, and try restarting Epson Scan again.

• Check the connection setting and test the connection using Epson Scan Settings:

  **Windows 10:** Click 📐 > EPSON > EPSON Scan Settings. Make sure the Connection setting is set to Network, then select your scanner and click the Test button.

  **Windows 8.x:** Navigate to the Apps screen and select EPSON Scan Settings. Make sure the Connection setting is set to Network, then click the Test button.

  **Windows (other versions):** Click 📐 or Start > All Programs or Programs > EPSON > EPSON Scan > EPSON Scan Settings. Make sure the Connection setting is set to Network, then click the Test button.

  **Mac:** Open the Applications folder, click Epson Software, and click EPSON Scan Settings. Make sure the Connection setting is set to Network, then click the Test button.

• You may need to disable the firewall and any anti-virus software on your wireless router.

• If you see the message "Network product is not available: currently being used by user", there may be a communication error between the scanner and computer. Restart the scanner.

• Epson Scan does not support networks that use only IPv6. Use Epson Scan on a network that supports IPv4.

• If the Firewall function is active on Windows XP or later, the scanner may not be discovered by Epson Scan Settings. Open Epson Scan Settings, click Add, and enter the IP address for your scanner.

• On a Mac, if you have previously used the scanner with Image Capture, you may need to release the scanner in Image Capture before you can scan with Epson Scan.

Parent topic: Solving Network Scanning Problems

Related tasks
- Manually Connecting to a Wi-Fi Network
- Setting Up Network Scanning
- Starting a Scan from a Scanner Button
Scanner Cannot Connect to a Wireless Router

If your scanner has trouble finding or connecting to a wireless router, try these solutions:

- If you did not successfully connect to a network while installing your product software, select the link at the end of this topic and follow the steps in "Manually Connecting to a Wi-Fi Network". If you are still unable to connect to a network, try the other solutions in this topic.

- If you are connecting the scanner via Wi-Fi Protected Setup (WPS), make sure you activate WPS on your scanner within 2 minutes of activating WPS discovery mode on the router by pressing the WPS button or enabling the WPS setting in your router firmware.

- Make sure to place your scanner within contact range of your router. Avoid placing your scanner near a microwave oven, 2.4 GHz cordless phone, or large metal object, such as a filing cabinet.

**Note:** If you are using a 5 GHz wireless router, set the router to operate in dual band (2.4 GHz and 5 GHz) mode. If your router uses a single network name (SSID) for both the 2.4 GHz and 5 GHz band, give each band its own network name (SSID) instead, such as Home Network 2.4 GHz and Home Network 5 GHz. See your router documentation or contact your internet service provider for instructions.

- Verify that your router is operating correctly by connecting to it from your computer or another device.

- You may need to disable the firewall and any anti-virus software on your wireless router.

- Check to see if access restrictions, such as MAC address filtering, are set on the router. If access restrictions are set, add your scanner's MAC address to your router's address list. To obtain your scanner's MAC address, check the label on the back or bottom of your scanner. Then follow the instructions in your router documentation to add the address to the list.

- If your router does not broadcast its network name (SSID), follow the instructions that came with your scanner to enter your wireless network name manually.

- If your router has security enabled, determine the kind of security it is using and any required password or passphrase for connection. Then make sure to enter the exact WEP key or WPA passphrase correctly.

- Check if your computer is restricting the available wireless channels. If so, verify that your wireless access point is using one of the usable channels and change to a usable channel, if necessary.

- The scanner may not be able to communicate with a computer with multiple network interfaces. Disable all network interfaces except for the interface connected to the scanner.

- Enable the DHCP function on the access point or router.

- Check that the scanner’s IP address is set correctly.
Solving Scanned Image Quality Problems

Check these sections if a scanned image on your computer screen has a quality problem.

- **Back of Original Image Appears in Scanned Image**
- **Scanned Characters are Blurry**
- **Characters are not Recognized During Conversion to Editable Text (OCR)**
- **Ripple Patterns Appear in an Image**
- **Spots or Lines Appear in All Scanned Images**
- **Scanned Image Edges are Cropped**

**Back of Original Image Appears in Scanned Image**

If an image from the back of a thin original appears in your scanned image, make sure you selected the correct Image Type setting for your original and select the **Text Enhancement** setting in Epson Scan. You can also select the **Remove Background** setting in Epson Scan.

**Note:** If you select **Color** as the Image Type setting, you can change the level from Standard to High to remove more of the background.

**Parent topic:** Solving Scanned Image Quality Problems

**Related tasks**
Scanning with Epson Scan
Scanned Characters are Blurry

If characters in your scanned images are blurry, try these solutions:

• Make sure you do not move the scanner or original while scanning.
• Operate the scanner on a flat, stable surface.
• Adjust these Epson Scan settings (if available) and try scanning again:
  • Select the **Text Enhancement** setting.
  • Adjust the **Threshold** setting.
  • Increase the **Resolution** setting.

Related tasks
Scanning with Epson Scan

Characters are not Recognized During Conversion to Editable Text (OCR)

If characters in your scanned images are not recognized during OCR conversion, try these solutions:

• Make sure your original is straight.
• Adjust these Epson Scan settings (if available) and try scanning again:
  • Select **Text Enhancement**
  • Select the correct **Image Type** setting
  • Adjust the **Threshold** setting
• Set the scanning resolution between 200 and 600 dpi.
• If you are using OCR software, check the manual for any additional adjustments.

Related tasks
Scanning Using OCR - Windows
Scanning Using OCR - Mac
Ripple Patterns Appear in an Image

You may see a ripple pattern (called a moiré) in scanned images of printed documents. This is caused by interference from differing pitches in the scanner's screen and your original's halftone screen. To reduce this effect, adjust these Epson Scan settings (if available) and try scanning again:

- Select the Descreening setting.
- Select a lower Resolution setting.

Parent topic: Solving Scanned Image Quality Problems

Related tasks
Scanning with Epson Scan

Spots or Lines Appear in All Scanned Images

If spots or lines appear in all your scanned images, try these solutions:

- Clean the scanner glass.
- Calibrate the scanner.

Note: If you are scanning a plastic card with a shiny surface, it can create a line in the scan.

Parent topic: Solving Scanned Image Quality Problems

Related tasks
Cleaning Inside Your Scanner
Calibrating Your Scanner

Scanned Image Edges are Cropped

If the edges of a scanned image are cropped, try the following solutions:

- Select Auto Detect as the Size setting (Epson Scan) or the Document Size setting (Document Capture Pro or Document Capture).
- Adjust the cropping area shown in the Crop Margins for Size "Auto" setting in Epson Scan.
- **Document Capture Pro (Windows):** Select Detailed Settings from the Scan window. Click Configuration and select the Document tab. Adjust the cropping area shown in the Crop Margins for Size "Auto" setting.
- **Document Capture (Mac):** Open the Scan menu and select Display the EPSON Scan Setup Screen. Click the Scan button. Select Main Settings from the Scan window. Click
Configuration and select the Document tab. Adjust the cropping area shown in the Crop Margins for Size "Auto" setting.

Uninstall Your Scanner Software
If you have a problem that requires you to uninstall and re-install your software, follow the instructions for your operating system.

Uninstalling Scanner Software - Windows
Uninstalling Scanner Software - Mac

Parent topic: Solving Problems

Uninstalling Scanner Software - Windows
You can uninstall and then re-install your scanner software to solve certain problems.

1. Turn off the scanner.
2. Disconnect any interface cables.
3. Do the following to uninstall each of your scanning software programs, then follow any on-screen instructions:
   - **Windows 10**: Click and select (Settings) > Apps > Apps & features. Select the scanner software program and click Uninstall.
   - **Windows 8.x**: Navigate to the Apps screen and select Control Panel > Programs > Programs and Features. Select the scanner software program and click Uninstall/Change.
   - **Windows 7 or Windows Vista**: Open the Windows Control Panel utility. Select Programs and Features. (In Classic view, select Programs and click Uninstall a program.) Select the scanner software program and click Uninstall/Change.
   - **Windows XP**: Open the Windows Control Panel utility. Double-click Add or Remove Programs. Select the scanner software program and click Change/Remove.
4. Restart your computer, then see the Start Here sheet to re-install your software.

Note: If you find that re-installing your scanner software does not solve a problem, contact Epson.

Parent topic: Uninstall Your Scanner Software
Uninstalling Scanner Software - Mac

In most cases, you do not need to uninstall your scanner software before re-installing it. However, you can download the Uninstaller utility from the Epson support website to uninstall your scanner software as described here.

1. To download the Uninstaller utility, visit epson.com/support (U.S.), epson.ca/support (Canada), or epson.com.jm/support (Caribbean) and select your product.
2. Follow the instructions on the screen to install the Uninstaller utility.
3. Quit all applications currently running on your Mac.
4. Double-click the Uninstaller icon.
5. In the Epson Uninstaller screen, select the checkbox for each software program you want to uninstall.
6. Click Uninstall.
7. Follow the on-screen instructions to uninstall the software.
8. To reinstall your scanner software, see the Start Here sheet for instructions.

Note: If you find that re-installing your scanner software does not solve a problem, contact Epson.

Where to Get Help

If you need to contact Epson for technical support services, use the following support options.

Internet Support
Visit Epson’s support website at epson.com/support (U.S.), epson.ca/support (Canada), or epson.com.jm/support (Caribbean) and select your product for solutions to common problems with your product. You can download utilities and documentation, get FAQs and troubleshooting advice, or e-mail Epson with your questions.

Speak to a Support Representative
Before you call Epson for support, please have the following information ready:
• Product name
• Product serial number (located on a label on the product)
• Proof of purchase (such as a store receipt) and date of purchase
- Computer configuration
- Description of the problem

Then call:
- U.S.: (562) 276-4382, 6 AM to 8 PM, Pacific Time, Monday through Friday, and 7 AM to 4 PM, Pacific Time, Saturday
- Canada: (905) 709-3839, 6 AM to 8 PM, Pacific Time, Monday through Friday, and 7 AM to 4 PM, Pacific Time, Saturday

Days and hours of support are subject to change without notice. Toll or long distance charges may apply.

**Note:** For help using any other software on your system, see the documentation for that software for technical support.

**Purchase Supplies and Accessories**
You can purchase genuine Epson accessories at epson.com (U.S. sales), epson.ca (Canadian sales), or epson.com.jm (Caribbean sales). You can also purchase accessories from an Epson authorized reseller. To find the nearest one, call 800-GO-EPSON (800-463-7766) in the U.S. or 800-807-7766 in Canada.

Electrical Specifications

Note: Power consumption varies depending on operating conditions or whether an option is installed.

Power supply  Four AA-size alkaline, Ni-MH, or lithium batteries
External power supply

USB bus power: DC5V, 0.5 A
Optional AC adapter model: SYS1319-1005

Power consumption

USB connection:
Operating: 2.5 W
Ready mode: 1.3 W
Sleep mode: 1.3 W
Power off mode: 0.0125 W

Wireless network connection:
Operating: 5.5 W
Ready mode: 3.5 W
Sleep mode: 3.0 W
Power off mode: 0.4 W

Parent topic: Technical Specifications

Environmental Specifications

Temperature
Operating: 50 to 95 °F (10 to 35 °C)
Storage: –13 to 140 °F (–25 to 60 °C)

Humidity
Operating: 10 to 80% RH (non-condensing)
Storage: 10 to 90% RH

Operating conditions
Ordinary office or home conditions

Note: Avoid operating the scanner in direct sunlight, near a strong light source, or in extremely dusty conditions.

USB Interface Specifications

Interface type
Universal Serial Bus Specifications Revision 2.0
**Electrical standard**
Hi-Speed mode (480 Mbits per second)

**Connector type**
One Type B port

**Note:** The product may not operate if connected to a computer USB port on a keyboard or monitor, or if connected using a long USB cable.

**Parent topic:** Technical Specifications

---

**Network Interface Specifications**

**Wireless LAN standard**
IEEE 802.11 b/g/n

**Wireless security**
WEP (64/128 bit)
WPA-PSK (TKIP/AES); WPA2 compliant with support for WPA/WPA2 personal

**Frequency band**
2.4 GHz

**Communication mode**
Infrastructure mode
Direct Wi-Fi connection (access point mode)

**Note:** Wireless LAN standard complies with either IEEE 802.11 b/g or IEEE 802.11 b/g/n, depending on purchase location.

**Parent topic:** Technical Specifications

---

**Safety and Approvals Specifications**

**United States**
EMC: FCC part 15 Subpart B class B

**Canada**
EMC: CAN/CSA-CEI/IEC CISPR 22 Class B

This equipment contains the following wireless module:
- Manufacturer: Askey Computer Corporation.
- Type: WLU6117-D69 (RoHS)

This product conforms to Part 15 of FCC Rules and RSS-210 of the IC Rules. Epson cannot accept responsibility for any failure to satisfy the protection requirements resulting from a non-recommended
modification of the product. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation of the device.

To prevent radio interference to the licensed service, this device is intended to be operated indoors and away from windows to provide maximum shielding. Equipment (or its transmit antenna) that is installed outdoors is subject to licensing.

Important Safety Instructions

Follow these safety instructions when setting up and using the scanner:

• Read all these instructions, and follow all warnings and instructions marked on the scanner.
• Place the scanner close enough to the computer for the interface cable to reach it easily.
• Do not use with wet hands.
• When connecting this product to a computer or other device with a cable, ensure the correct orientation of the connectors. Each connector has only one correct orientation. Inserting a connector in the wrong orientation may damage both devices connected by the cable.
• Do not insert objects into any opening as they may touch dangerous voltage points or short out parts. Beware of electrical shock hazards.
• Place the product on a flat, stable surface that extends beyond the base of the product in all directions. If you place the product by the wall, leave enough room between the back of the product and the wall so that the scanned document can be ejected. The product will not operate properly if it is tilted at an angle.
• After replacing consumable parts, dispose of them correctly following the rules of your local authority. Do not disassemble them.
• If you notice any unusual effects such as noise, overheating, smoke, odor, discoloration, or deformation, immediately turn off the scanner, unplug the cables (if any), and stop using the scanner.
• Do not subject the scanner to physical impacts or drop the scanner.
• Do not place or store the scanner outdoors, in a car, near excessive dirt or dust, water, heat sources, or in locations subject to shocks, vibrations, condensation, high temperature or humidity, direct sunlight, strong light sources, or rapid changes in temperature or humidity.

• Never disassemble, modify, or attempt to repair the scanner or a scanner option by yourself except as specifically explained in this guide.

**Caution:** Radio waves from this product may adversely affect the operation of medical equipment, airplanes, or automatically controlled devices, such as pacemakers, automatic doors, or fire alarms. When using this product near such devices or inside a medical facility, follow the directions from authorized staff members at the facility, and follow all posted warnings and directions on the device to avoid causing an accident.

**Warning:** The cords included with this product contain chemicals, including lead, known to the State of California to cause birth defects or other reproductive harm. *Wash hands after handling.* (This notice is provided in accordance with Proposition 65 in Cal. Health & Safety Code § 25249.5 and following.)

**USB**

• The USB cable should be placed to avoid abrasions, cuts, fraying, crimping, and kinking.

• Do not place objects on top of the USB cable and do not allow the cable to be stepped on or run over. Be particularly careful to keep the USB cable straight at the end.

• Unplug the scanner and the USB cable, and refer servicing to qualified service personnel under the following conditions: Liquid has entered the scanner; the scanner has been dropped or the case has been damaged; the scanner does not operate normally or exhibits a distinct change in performance. (Do not adjust controls that are not covered by the operating instructions.)

**Battery Safety Instructions**

• Use batteries properly to avoid injury or fire caused by leaking, overheating, explosion, erosion, or any other damage to the product.

• If you are not going to use the scanner for a long period, be sure to remove the batteries.

• Keep batteries out of reach of children. If battery acid gets into your eyes or on your skin, immediately rinse the affected area thoroughly with water and seek medical treatment. If a battery is swallowed, seek medical treatment immediately.

• If battery acid leaks from a battery, wipe it off with a cloth and replace the battery with a new one.

• Use AA Ni-MH, alkaline, or lithium batteries.
• Do not use new and old batteries together or mix different types of batteries.
• Insert batteries so that the polarities (+ and –) are correct.
• Remove dead batteries promptly.
• Do not heat batteries or throw them in fire or water.
• Do not remove batteries with metal objects such as tweezers or the tip of a pen.
• Cover the ends of the batteries with tape to prevent combustion or explosion when disposing of them.
• Make sure to follow local battery disposal regulations.

Restrictions on Copying
Observe the following restrictions to ensure responsible and legal use of your scanner.

Copying of the following items is prohibited by law:
• Bank bills, coins, government-issued marketable securities, government bond securities, and municipal securities
• Unused postage stamps, pre-stamped postcards, and other official postal items bearing valid postage
• Government-issued revenue stamps, and securities issued according to legal procedure

Exercise caution when copying the following items:
• Private marketable securities (stock certificates, negotiable notes, checks, etc.), monthly passes, concession tickets, etc.
• Passports, driver's licenses, warrants of fitness, road passes, food stamps, tickets, etc.

Note: Copying these items may also be prohibited by law.

Restriction on disassembling and decompiling
You may not disassemble, decompile or otherwise attempt to derive the source code of any software included with this product.
