**Adjusting Control Panel Position**

You can adjust the position of the control panel to make it easier to access. Raise or lower it to the desired angle as shown.
Changing Touch Screen Language
You can change the language used on the touch screen.
1. Press the home button, if necessary.
2. Press the setup button.
   You see a screen like this:

   ![Setup screen]

3. Select System Administration. Enter the administrator password, if necessary.
4. Select Common Settings.
5. Press the down arrow button and select Language.
6. Select a language.

Adjusting the Screen Brightness
You can adjust the brightness of the LCD screen.
1. Press the home button, if necessary.
2. Press the setup button.
You see a screen like this:

3. Select **System Administration**. Enter the administrator password, if necessary.
4. Select **Common Settings**.
5. Select **LCD Brightness**.
6. Tap the left or right arrows to adjust the screen brightness.
7. Select **OK** to exit.

The Power Off and Sleep Timers

The product enters sleep mode or turns off automatically if it is not used for a period of time. You can adjust the time period before power management, but increasing the time reduces the product's energy efficiency.
Changing the Power Off Timer Setting from the Control Panel

You can use the product’s control panel to change the time period before the printer turns off automatically.

1. Press the ☄️ home button, if necessary.
2. Press the 🔎 setup button.
   You see a screen like this:

3. Select System Administration.
4. Select Common Settings.
5. Select Power Off Timer.
6. Select the length of time after which you want the product to automatically turn off when it is not in use.

Parent topic: The Power Off and Sleep Timers
Changing the Sleep Timer Setting from the Control Panel

You can use the product's control panel to change the time period before the product enters sleep mode.

1. Press the home button, if necessary.
2. Press the setup button.
   
   You see a screen like this:

   ![Control Panel Screen](image)

   3. Select System Administration.
   4. Select Common Settings.
   5. Select Sleep Timer.
   6. Select + or – to select the time period you want before the product goes to sleep. Then select OK.

Parent topic: The Power Off and Sleep Timers

Changing the Power Off Timer Setting - Windows

You can use the printer software to change the time period before the printer turns off automatically.

1. Access the Windows Desktop, right-click the product icon in the Windows taskbar, and select Printer Settings.
2. Click the Utility tab and select Printer and Option Information.
3. In the drop-down menu, select the length of time after which you want the product to automatically turn off when it is not in use.

4. Click **Send**.

5. When you see the time you selected listed as the Current Printer Setting, click **OK**.

Parent topic: The Power Off and Sleep Timers

**Changing the Power Off Timer Setting - OS X**

You can use the printer software to change the time period before the printer turns off automatically.

1. In the Apple menu or the Dock, select **System Preferences**. Select **Print & Fax**, **Print & Scan**, or **Printers & Scanners**, select your product, and select **Options & Supplies**. Select **Utility** and select **Open Printer Utility**.

2. Select **Printer Settings**.
You see this window:

3. Select the length of time after which you want the product to automatically turn off when it is not in use as the **Power Off Timer** setting.

4. Click **Apply**.

5. Close the Printer Settings window.

**Parent topic:** The Power Off and Sleep Timers

**Epson Connect Solutions for Smartphones, Tablets, and More**

You can print documents, photos, and web pages from your home or office. You can use your smartphone, tablet, or computer. Epson offers these solutions to print from anywhere: Epson iPrint Mobile App and Epson Remote Print.

**Using the Epson iPrint Mobile App**

**Using Epson Remote Print**

**Parent topic:** Product Basics
Using the Epson iPrint Mobile App

Use this free Apple and Android app to print to nearby Epson networked products. The Epson iPrint Mobile App lets you print PDFs, Microsoft Office documents, photos, and web pages over a wireless network.

1. Set up your product on a network. See the link below.
2. Visit epson.com/connect to learn more about Epson iPrint and check the compatibility of your mobile device.
3. Download Epson iPrint from the Apple App Store or Google Play.
4. Connect your mobile device to the same wireless network that your product is using.
5. Print from your mobile device to your Epson product.

Related topics
Wi-Fi or Wired Networking

Using Epson Remote Print

With Epson Remote Print software on your Windows computer or laptop, you can print to an Epson Email-enabled product anywhere in the world.

1. Set up your product for network printing. See the link below.
2. Visit epson.com/connect to learn more about Remote Print and how to download the software.
3. Download and install the Remote Print software.
4. Obtain the email address and optional access key of the Epson product you want to use for printing, and enter this address during Remote Print setup.
5. Select the print command in your application and choose the Remote Print driver for your Epson product.

Using AirPrint

AirPrint enables instant wireless printing from iPhone, iPad, and iPod touch with the latest version of iOS, and Mac with the latest version of OS X.

Note: If you disabled paper configuration messages on your product control panel, you cannot use AirPrint. See the link below to enable the messages, if necessary.

1. Load paper in your product.
2. Set up your product for wireless printing. See the link below.
3. Connect your Apple device to the same wireless network that your product is using.
4. Print from your device to your product.

Note: For details, see the AirPrint page on the Apple website.

Using Google Cloud Print

With a Google Account, you can print from your Apple or Android device to your Epson product. You can also print from Chromebooks and the Google Chrome browser without drivers or cables.

Set up your Epson product for network printing. See the link below.

Note: Make sure your Epson printer and computer are connected to the same network before starting the Google Cloud Print setup.

1. Connect your device to the same network that your Epson product is using.
2. Print a network status sheet.
3. Locate your product's IP address on the network status sheet.
4. Enter the IP address into the address bar of a web browser.
5. Select the **Google Cloud Print Services** option.

   **Note:** If you don't see the **Google Cloud Print Services** option, turn your product off and back on. If the option still doesn't appear, select the **Firmware Update** option and follow the on-screen instructions to update your product.

6. Click **Register**.
7. Select the checkbox to agree to the Usage Advisory and click **Next**.
8. Click **OK** to launch the sign-in page.
   
   A separate browser window opens.
9. Enter your Google Account username and password and click **Sign in**, or, if you don't have an account, click **Sign up for a new Google Account** and follow the on-screen instructions.
10. Click **Finish printer registration** to complete setup and print a test page.

   Your product is now linked to your Google Account and can be accessed from any Chromebook, computer, Apple or Android device with Internet access. Visit Epson Support for more information on using Google Cloud Print, or the Google Cloud Print website for a list of supported apps.

   Wi-Fi or Wired Networking

   **Setting Up Google Cloud Print on a Chromebook**

   With a Google Account, you can print from a Chromebook without drivers or cables.

   Set up your Epson product for network printing. See the link below.

   **Note:** Make sure your Epson product is connected to your wireless network before starting the Google Cloud Print setup.

   1. Turn on your Chromebook and connect it to the same wireless network as your product.

      **Note:** See your Chromebook's documentation for details on connecting to a network.
2. Do one of the following:
   • Click **Add to Cloud Print** in the notification that appears in the corner of your Chromebook
     screen.

     **Note:** If you do not see a notification, check to see if a number appears in the status area at the
     lower-right corner of the screen. Click this number to open the notifications menu, then click **Add
     to Cloud Print**.

     • Open a web browser and enter `chrome://devices` in the address bar. Skip to step 4.

3. Click **Add Device**.

4. Click the **Register** button that appears next to your product.

5. Click **Register** on the confirmation screen. Your product's LCD screen displays a confirmation
   message.

6. Select **OK** or press the **OK** button on your product to confirm the Google Cloud Print connection and
   print a test page.

   Your product is now linked to your Google Account and can be accessed from any Chromebook,
   iPhone, or Android phone with Internet access. For more information on using Google Cloud Print,
   visit **Epson Support**.

Wi-Fi or Wired Networking

See these sections to use your product on a Wi-Fi or wired network.
- Wi-Fi Infrastructure Mode Setup
- Wi-Fi Direct Mode Setup
- Wi-Fi Protected Setup (WPS)
- Printing a Network Status Sheet
- Changing or Updating Network Connections

**Wi-Fi Infrastructure Mode Setup**

You can set up your product to communicate with your computer using a wireless router or access point. The wireless router or access point can be connected to your computer over a wireless or wired network.

1. Epson product
2. Wireless router or access point
Selecting Wireless Network Settings from the Control Panel

Parent topic: Wi-Fi or Wired Networking

Selecting Wireless Network Settings from the Control Panel

You can select or change wireless network settings using your product control panel.

To install your product on a wireless network, follow the instructions on the Start Here sheet and install the necessary software. The installer program guides you through network setup.

**Note:** Breakdown or repair of this product may cause loss of network data and settings. Epson is not responsible for backing up or recovering data and settings during or after the warranty period. We recommend that you make your own backup or print out your network data and settings.

1. Press the home button, if necessary.
2. Press the network status icon.
3. Select Wi-Fi Setup.
   
   You see a screen like this:
4. Select **Wi-Fi Setup Wizard**.

   **Note:** If you need to disable the wireless network to set up your product on an Ethernet network, press the down arrow button, select **Disable Wi-Fi**, and press the **OK** button. Then follow the instructions on changing to a wired network connection.

5. Select the name of your wireless network or enter the name manually.

   **Note:** To enter the wireless network name manually, select **Other Networks** and select the **Network (SSID)** field. Use the displayed keypad to enter your network name.

6. Select the **Password** field and enter your wireless password using the displayed keypad.

   ![Keypad Image]

   **Note:** The network name and password are case sensitive. Be sure to correctly enter uppercase and lowercase letters, and numeric or special characters.

   - Press [←] or [→] to move the cursor.
   - Press [↑] to change the case of letters.
   - Press [×] to delete the previous character.
   - Press [123#] to enter numbers and symbols.
   - Press [space] to enter a space.
7. Press when you finish entering your password and select Proceed.
8. Confirm the displayed network settings and select OK to save them.

**Note:** If you need to change a setting, press the back button.

9. If you want to print a network setup report, select Print. (Otherwise, select Done.)
10. Press the home button to exit.

Your product should now be connected to the network.

**Note:** If the WiFi connection symbol does not appear lit on the touch screen, you may have selected the wrong network name or entered the password incorrectly. Repeat these steps to try again.

**Parent topic:** Wi-Fi Infrastructure Mode Setup

**Wi-Fi Direct Mode Setup**

You can set up your product to communicate directly with your computer or another device without requiring a wireless router or access point.

1. Epson product
2. Computer with a wireless interface
3. Other wireless device
You can select one of these modes to communicate with your computer or device:

**Access point mode**
The product itself acts as the network access point for up to 4 devices. When operating in this mode, your product displays an AP connection symbol on the LCD screen.

**Peer-to-peer mode**
The product communicates one-to-one with another Wi-Fi Direct capable device. When operating in this mode, your product displays a Direct or D connection symbol on the LCD screen.

To disconnect a peer-to-peer mode connection, release the connection to your product from your computer or other device.

To enable peer-to-peer mode, you must select it from the Web Config Utility, under WiFi/Network Settings > Services > Wi-Fi Direct.

Enabling Wi-Fi Direct Mode

Parent topic: Wi-Fi or Wired Networking

### Enabling Wi-Fi Direct Mode

You can enable Wi-Fi Direct mode to allow direct communication between your product and a computer or other devices without a wireless router or access point.

**Note:** You may need to enable the Wi-Fi Direct setting in the Advanced Setup menu before you can enable Wi-Fi Direct mode.

1. Press the home button, if necessary.
2. Press the network status icon.
3. Select Wi-Fi Setup.
You see a screen like this:

4. Scroll down and select **Wi-Fi Direct Setup**.
5. Select **Connection Setup**.
6. Select **Change Password** and select **Yes**.

**Note:** If you have already connected devices or computers to your product via Wi-Fi Direct, they are disconnected when you change the password.

7. Enter your new Wi-Fi Direct password.
Note: Your password must be at least 8 and no more than 22 characters long.

- Press \[ \text{ } \] or \[ \text{ } \] to move the cursor.
- Press \[ \text{ } \] to change the case of letters.
- Press \[ \text{ } \] to delete the previous character.
- Press \[ 123\# \] to enter numbers and symbols.
- Press \[ \text{ } \] to enter a space.

8. Press \[ \text{ } \] when you finish entering your password.

You see a screen like this:

![Wi-Fi Direct Setup](image)

9. Scroll down to view the SSID (Wi-Fi network name) and password.

10. Use your computer or wireless device to select the Wi-Fi network name (SSID) displayed on the LCD screen, then enter the password shown.

11. Press the \( \text{ } \) home button to exit.

You see either an AP or Direct connection symbol on the LCD screen and should be able to print directly to your product from your computer or device.

Note: If the AP or Direct connection symbol is not displayed on the LCD screen, Wi-Fi Direct mode is not enabled. Repeat these steps to try again.
Wi-Fi Direct Mode Setup

Wi-Fi Protected Setup (WPS)

If your network uses a WPS-enabled wireless router or access point, you can quickly connect your product to the network using Wi-Fi Protected Setup (WPS).

Note: To check if your router is WPS-enabled, look for a button labeled WPS on your router or access point. If there is no hardware button, there may be a virtual WPS button in the software for the device. Check your network product documentation for details.

Using WPS to Connect to a Network

Using WPS to Connect to a Network

If you have a WPS-enabled wireless router or access point, you can use Wi-Fi Protected Setup (WPS) to connect your product to the network.

1. Press the home button, if necessary.
2. Press the network status icon.
3. Select Wi-Fi Setup.
   You see a screen like this:

4. Select Push Button Setup (WPS) and select Proceed.
5. Follow the instructions on the LCD screen to complete WPS setup.

6. Press the ⌘️ home button to exit.

Your product should now be connected to the network.

**Parent topic:** Wi-Fi Protected Setup (WPS)

---

### Printing a Network Status Sheet

You can print a network status sheet to help you determine the causes of any problems you may have using your product on a network.

1. Press the ⌘️ home button, if necessary.
2. Press the ⏩ setup button.
3. Select **Network Status**.
4. Select **Wi-Fi/Network Status**.

You see a screen like this:

![Wi-Fi/Network Status](image)

**Note:** If you are connected to a wireless network, the signal strength is also displayed.

5. Select **Print**.
6. Select **Print** again to print the network status sheet.

Examine the settings shown on the network status sheet to diagnose any problems you have.

**Parent topic:** Wi-Fi or Wired Networking
Changing or Updating Network Connections

See these sections to change or update how your product connects to a network.

- Accessing the Web Config Utility
- Changing a USB Connection to a Wi-Fi Connection
- Changing a Wi-Fi Connection to a Wired Network Connection
- Connecting to a New Wi-Fi Router
- Disabling Wi-Fi Features

Parent topic: Wi-Fi or Wired Networking

Accessing the Web Config Utility

You can select your product's network settings and confirm its operating status using a web browser. You do this by accessing your product's built-in Web Config utility from a computer or other device that is connected to the same network as your product.

1. Print a network status sheet.
2. Locate the IP Address for your product that is listed on the network status sheet.
3. On a computer or other device connected to the same network as your product, open a web browser.
4. Enter your product's IP address into the address bar.
   - You see the available Web Config utility options.

Parent topic: Changing or Updating Network Connections

Related tasks
- Printing a Network Status Sheet

Changing a USB Connection to a Wi-Fi Connection

If you have already connected your product to your computer using a USB connection, you can change to a Wi-Fi connection.

1. Disconnect the USB cable from your product.
2. Uninstall your product software.
3. Download and install your product software from the Epson website using the instructions on the Start Here sheet.

Parent topic: Changing or Updating Network Connections
Changing a Wi-Fi Connection to a Wired Network Connection

If you have already connected your product to your computer wirelessly, you can change to a wired network connection if necessary.

1. Disable your product's Wi-Fi features.
2. Connect one end of an Ethernet network cable to the product's LAN port.
3. Connect the other end to any available LAN port on your router or access point.
4. Uninstall your product software.
5. Download and install your product software from the Epson website.
6. Follow the on-screen instructions to install the software.
7. When you see the Select Your Connection screen, select **Wired network connection**.
8. If you see a Select Setup Option screen, select **Set up printer for the first time**.
9. Continue following the rest of the on-screen instructions.

Parent topic: Changing or Updating Network Connections

Disabling Wi-Fi Features

Connecting to a New Wi-Fi Router

If you change the wireless router you have been using on your network, you need to update your product's Wi-Fi connection to the new router.

**Note:** If you switch to a 5 GHz wireless router, set the router to operate in dual band (2.4 GHz and 5 GHz) mode. See your router documentation for instructions.

1. Do one of the following:
   - **Windows**: Uninstall your product software.
   - **OS X**: Go to the next step.
2. Download and install your product software from the Epson website using the instructions on the Start Here sheet.

Parent topic: Changing or Updating Network Connections

Related tasks

Uninstalling Printing Software - Windows
Disabling Wi-Fi Features

You may need to disable your product's Wi-Fi features if you change your network connection type or need to solve a problem with your network connection.

Note: Before disabling Wi-Fi features, make a note of your product's SSID (network name) and password, and any network settings selected for the Epson Connect services you may use.

1. Press the home button, if necessary.
2. Press the network status icon.
3. Select Wi-Fi Setup.
   You see this screen:

4. Scroll down and select Disable Wi-Fi.
5. Select Yes to disable Wi-Fi.

Parent topic: Changing or Updating Network Connections
Loading Media

Before you print, load media for the type of printing you will do.

**Note:** Loading media automatically displays the setup screen for media type and size. To turn this display off, press the setup button, select **System Administration > Printer Settings > Paper Source Settings > Paper Setup Display > Off**.

- Loading Paper in the Sheet Feeder
- Loading Fine Art Media
- Loading Posterboard and Thick Media
- Loading Roll Paper
- Cut Sheet Media Loading Capacity
- Available Epson Papers
- Borderless Paper Type Compatibility
- Paper or Media Type Settings - Product Software
- Selecting the Paper Settings for Each Source - Control Panel
- Selecting the Default Paper Setup Display and Error Notice Settings

**Loading Paper in the Sheet Feeder**

You can print on a variety of paper types and sizes from paper loaded in the sheet feeder.

1. Turn on your product.
2. Open the paper support and pull up the extensions.
3. Open the front cover.

4. Extend the output tray.
5. Insert paper, glossy or printable side up, short edge first, against the right edge and behind the tab.

6. Press the button on the edge guide and slide it to the edge of the paper.

7. When prompted by the product's LCD screen, select the size and type of the paper you loaded and select OK.

Always follow these paper loading guidelines:
• Load only the recommended number of sheets.
• Load paper short edge first, no matter which way your document faces.
• Load the printable side faceup.
• Load letterhead or pre-printed paper top edge first.
• Do not load paper above the arrow mark inside the edge guide.
• Check the paper package for any additional loading instructions.

Loading Fine Art Media

Use the front manual feed tray and the rear paper support to load fine art media.

Note: You can load fine art media with a thickness of 0.012 to 0.028 inch (0.3 to 0.7 mm).

1. Turn on your product.
2. Remove any paper from the sheet feeder and close the paper support.
3. Remove any roll paper and the roll paper holders.
4. Open the rear paper support.
5. Pull out the rear paper support extensions.

6. Open the front cover.

7. Press the center of the manual feed tray and release it to extend the tray.
8. Insert a single sheet of fine art paper into the manual feed tray. Insert it short edge first with the printable side up.

9. Feed the paper up to the line near the end of the tray. Make sure the paper is flush against the right side.

10. Select **Load** on the touch screen. The paper loads into your product.
11. When you see a message telling you to extend the output tray, pull out and extend the tray fully.

12. When prompted by the product's touch screen, select the size and type of the paper you loaded and select OK.

**Note:** To eject paper, select **Eject** on the touch screen and select **Yes** to confirm.

Always follow these paper loading guidelines:
- Load only one sheet at a time.
- Load fine art media short edge first, no matter which way your document faces.
- Load the printable side faceup.
- Check the paper package for any additional loading instructions.

**Parent topic:** Loading Media

- Loading Posterboard and Thick Media
- Selecting the Paper Settings for Each Source - Control Panel
- Selecting the Default Paper Setup Display and Error Notice Settings

### Loading Posterboard and Thick Media

Use the front manual feed tray to load media with a thickness of 0.028 to 0.051 inch (0.7 to 1.3 mm).

**Note:** Be sure to leave at least 13 inches (32 cm) of space behind your product for the media to feed through.

1. Turn on your product.
2. Remove any paper from the sheet feeder and close the paper support.
3. Remove any roll paper and the roll paper holders.
4. Close the rear paper support.

5. Open the front cover.

6. Press the center of the manual feed tray and release it to extend the tray.
7. Insert a single sheet of posterboard or thick media into the manual feed tray. Insert it short edge first with the printable side up.

Note: Never try to load media from the rear, or you could damage your product.

8. Feed the paper up to the line near the end of the tray. Make sure the paper is flush against the right side.

9. Select **Poster Board - Load** on the touch screen. The paper loads into your product.
10. When you see a message on the screen, push in the manual feed tray until it latches.

11. Fully extend the output tray.

**Note:** To eject paper, select **Eject** on the touch screen and follow the displayed instructions. Do not extend the manual feed tray during printing, or you may damage your product.
Loading Roll Paper

You can load 13-inch (330 mm) wide roll paper for printing large or panoramic images, or multiple photos (with or without borders).

**Note:** It's a good idea to check the ink status and replace cartridges, if necessary, before printing a large print job. If you need to replace a cartridge during printing, you can continue to print but you might notice a color difference in your printout depending on drying conditions.

1. Turn on your product.
2. Remove any paper from the sheet feeder and close the paper support.
3. Open the front cover.
4. Fully extend the output tray.

5. Remove any tape and protective paper from the end of the roll. Make sure the paper is cut straight across to avoid paper feeding problems.

   **Note:** Avoid touching the surface of your paper. With canvas media that you have previously loaded, cut the edge straight each time you reload it for best results.

6. Place the roll paper holders on each end of the paper roll as shown. The holders are labeled L and R (for left and right), as viewed from the front of the printer.
7. Open the rear paper support but do not extend it.

8. Attach the roll paper holders as shown. Hook the holders onto the attachment points marked with orange labels.

**Note:** Make sure the roll paper holders are firmly secured to your product.
9. Feed the paper into your product until it meets resistance. In a few seconds, the paper loads automatically.

Note: When loading canvas media, leave slack in the roll as it feeds and prints for the best results.

10. When prompted by the product's touch screen, select the size and type of the paper you loaded and select OK.

Cutting and Removing Roll Paper
After printing on roll paper, use scissors as described here to cut the roll paper from your printout.
1. When printing is finished, you see this screen:

![Information Screen](image)

2. Select **Cut** to print a cut line and feed the paper.

   **Note:** If you select **No Cut**, you return to the main screen.

3. Use scissors to cut the paper along the cut line.
4. Follow the instructions on the screen to unload the roll paper. Turn the knobs on the roll paper holders backward as the paper unloads, then remove the paper and holders from your product.

Note: You can also unload roll paper by selecting **Cut/Eject > Eject** on the touch screen.

### Manual Feed Tray

You can load one sheet of posterboard or other thick media 0.028 to 0.051 inch (0.7 to 1.3 mm) thick in this size in the front manual feed tray: 13 × 19 inches (330 × 483 mm). You can also load one sheet of the following types of media:

- Epson Velvet Fine Art Paper
Available Epson Papers

You can purchase genuine Epson ink and paper at epson.com/ink3 (U.S. sales) or epson.ca (Canadian sales). You can also purchase supplies from an Epson authorized reseller. To find the nearest one, call 800-GO-EPSON (800-463-7766).

Note: Paper/media availability varies by country.

Selecting the Paper Settings for Each Source - Control Panel

You can change the default paper size and paper type for each source using the control panel on the product.

1. Press the home button, if necessary.
2. Select Load Guide.
3. Select the paper source you want to change.
5. Select the paper size you loaded.
6. Select Paper Type.
7. Select the paper type for the paper you loaded following the guidelines in the link here.
8. Select OK.
9. Repeat these steps to select another paper source to change.

**Parent topic:** [Selecting the Paper Settings for Each Source - Control Panel](#)

## Selecting the Default Paper Setup Display and Error Notice Settings

You can select default paper setup display and error notice settings that apply to all print jobs using the control panel on your product.

**Note:** These settings can be locked by an administrator. If you cannot access these settings, contact your administrator for assistance.

1. Press the ⌘ home button, if necessary.
2. Press the ⏹️ setup button.

   You see a screen like this:

   ![Setup Screen](image)

3. Select **System Administration**. Enter the administrator password, if necessary.
4. Select **Printer Settings**.
5. Select **Paper Source Settings**.
6. Select **Paper Setup Display**.
7. Select one of these options:
   • Select **On** to display the media setup screen when paper is loaded.
   • Select **Off** if you do not want the media setup screen displayed when paper is loaded.

   **Note:** When this setting is off, AirPrint is unavailable.

8. Select **Error Notice**.

9. Select one of these options:
   • Select **On** to display an error if the loaded paper size or paper type differs from the product settings.
   • Select **Off** if you do not want an error to display.

   **Note:** This setting is turned off automatically if you set the **Paper Setup Display** setting to **Off**.

10. When you are finished, press the home button to exit.

Printing from a Computer

Before printing from your computer, make sure you have set up your product and installed its software as described on the Start Here sheet.

Note: If you have an Internet connection, it is a good idea to check for updates to your product software on Epson's support website. If you see a Software Update screen, select Enable automatic checking and click OK. The update scans your system to see if you have the latest product software. Follow the on-screen instructions.

Printing with Windows
Printing with OS X

Printing with Windows

You can print with your product using any Windows application, as described in these sections.

Selecting Basic Print Settings - Windows
Selecting Print Layout Options - Windows
Selecting Additional Settings - Windows
Printing Your Document or Photo - Windows
Saving, Sharing, and Customizing the Printer Settings
Selecting Default Print Settings - Windows
Changing the Language of the Printer Software Screens
Changing Automatic Update Options

Parent topic: Printing from a Computer

Selecting Basic Print Settings - Windows

Select the basic settings for the photo or document you want to print.

1. Open a photo or document for printing.
2. Select the print command in your application.

Note: You may need to select a print icon on your screen, the Print option in the File menu, or another command. See your application's help utility for details.
3. If necessary, select your product name as the printer you want to use.

**Note:** You may also need to select **Properties** or **Preferences** to view your print settings.

You see the Main tab of your printer settings window:

4. Select the **Media Type** setting that matches the paper you loaded.

5. If you are using non-Epson paper or media and you need to fine-tune its performance, click the **Paper Config** button and adjust paper configuration options as necessary.
6. When using plain paper, select an **Ink** option:
   • To print using the previous print job’s setting, select **Last-Used**.
   • Select the **Photo Black Ink** or **Matte Black Ink** setting according to the media type you are using.

   **Note:** To avoid changing black ink more often than necessary, you can set the default black ink type to the one you usually use. See the link at the end of these steps.

7. Select a **Color** option:
   • To print a color document or photo, select the **Color** setting.
   • To print text and graphics in black or shades of gray, select the **Advanced B&W Photo** or **Grayscale** setting.

   **Note:** The **Grayscale** setting is only available when plain paper is selected as the **Media Type**.

8. For the **Print Quality** setting, select **Speed**, **Quality**, or **Max Quality**, or select **Quality Options** and choose the quality option that matches the print quality you want to use.

9. Select the desired color management option as the **Mode** setting.

10. Select the **Source** setting that matches the paper feeding method you are using.

11. Select the size of the paper you loaded as the **Size** setting.

   **Note:** You can also select the **User-Defined** setting to create a custom paper size.

12. If you want to print a photo without borders, select **Borderless**.

   **Note:** You must select a compatible borderless paper type and size to print without borders. Check the borderless paper compatibility list for details.

13. To see a preview of how your document or photo will print, select **Print Preview**. (The preview appears after you click **Print** but before printing starts.)

14. To layout multiple print jobs for printing all at once, select **Layout Manager**.

---

**Paper Configuration Options - Windows**
**Advanced B&W Photo Options - Windows**
**Print Quality Options - Windows**
**Color Management Options - Windows**
Paper Configuration Options - Windows

Select any of the available Paper Configuration options to fine-tune the quality of your print.

![Paper Configuration Options](image)

- **Color Density**
  - Adjust the color density using the slider from -50 to 50.
  - Default: 0%

- **Drying Time per Print Head Pass**
  - Adjust the drying time using the slider from 0 to 50.
  - Default: 0.1 sec

- **Paper Thickness**
  - Choose the paper thickness from the list: 3 (0.1mm)

- **Platen Gap**
  - Select from the list: Standard

- **Default**, **OK**, **Cancel**, **Help**
**Color Density**
Adjusts the ink saturation level.

**Drying Time per Print Head Pass**
Pauses print head movement for up to 5 seconds after each pass to allow ink to dry. This lets you print with non-Epson media and avoid smearing the ink.

**Paper Thickness**
Lets you select the thickness of your paper or media.

**Platen Gap**
Adjusts the distance from the paper to the print head. (Use a wider setting if you are seeing edge marks or scuffs on your prints.)

Parent topic: Selecting Basic Print Settings - Windows

---

**Advanced B&W Photo Options - Windows**

If you select Advanced B&W Photo as the Color option, you can easily produce neutral and toned black-and-white prints. Whether your photo is color or grayscale, you can use this screening and color management technology to create stunning black-and-white prints. You can select any of the available options.

**Color Toning**
Adds tone (hue) to your black-and-white output. The default is Neutral, which provides a neutral tonal scale print. You can also choose other popular presets such as Cool, Warm, and Sepia. Note that the presets affect the target found in the tone color circle.

**Tone**
Changes the entire tonal scale of your black-and-white output. While Darker is the default setting, you may see better results if you choose Dark. The tone color circle adjusts the hue of your black-and-white print. Click on any portion of the color wheel or enter corresponding values to customize the tone (hue) to add to your print. The closer you select to the edge of the wheel, the more color you add.

**Brightness**
Adjusts the overall lightness and darkness of your image.

**Contrast**
Adjusts the difference between the light and dark areas of your image.

**Shadow Tonality**
Controls tonality only in the shadow areas of your image.

**Highlight Tonality**
Controls tonality only in the highlight areas of your image.
**Max Optical Density**  
Adjusts the overall density or focus of the print. Create a soft focus print by lowering the density setting.

**Highlight Point Shift**  
Helps reduce gloss differential on glossy media by adding density to the highlights of your image.

**Print Quality Options - Windows**

You can use the Speed/Quality slider to set the desired quality level, and select any of the available Quality options to fine-tune the quality of your print. Some settings may be unavailable, depending on the paper type and border setting you have chosen.

**High Speed**  
Speeds up printing but may reduce print quality.

**Edge Smoothing**  
Smoothes jagged edges in low-resolution images such as screen captures or images from the Web.

**Finest Detail**  
Sharpens edges on vector-based data including text, graphics, and line art. (This setting does not affect photographs.)

**Parent topic:** Selecting Basic Print Settings - Windows

**Color Management Options - Windows**

You can adjust the Mode setting to fine-tune the colors in your printout, or turn off color management in your printer software.

**EPSON Standard (sRGB)**  
Increases the contrast in images. Click the Advanced button to use advanced color controls.

**Adobe RGB**  
Matches image colors to the Adobe RGB color standard. Use this setting if your source file was captured in Adobe RGB. Click the Advanced button to use advanced color controls.

**PhotoEnhance**  
Lets you choose from various Scene Correction settings to automatically analyze your photos.

**Note:** PhotoEnhance uses a sophisticated face recognition technology to optimize photos that include faces. For this to work, both eyes and the nose must be visible in the subject's face. If your photo includes a face with an intentional color cast, such as a statue, you may want to turn off PhotoEnhance to retain the special color effects.
ICM
Automatically adjusts colors based on the printer’s ICC profile and the selected Media Type setting, using the Image Color Matching system. Click the Advanced button to choose the input profile and other settings.

Note: In most cases, you get better results by applying color management in your application, rather than in the printer driver.

Off (No Color Adjustment)
Turns off color management in your printer software so you can manage color using only your application software.

Note: An ICC profile is required if color management is turned off.

Parent topic: Selecting Basic Print Settings - Windows
Advanced Color Controls - Windows

If you selected EPSON Standard (RGB) or Adobe RGB as the Mode setting, you can click the Advanced button to select detailed settings.

![Color Controls Screen](image)

The Color Controls screen lets you specify values for adjusting brightness, contrast, saturation, and individual Cyan, Magenta, and Yellow color tones. You can choose from two Printer Color Adjustment modes and two Gamma settings, and use either a color circle or slide bar to adjust color.

Parent topic: Selecting Basic Print Settings - Windows

Paper Source Options - Windows

You can select any of the available options in the paper Source menu to print on the paper loaded in that source.

**Sheet**

Selects sheets of paper loaded in the sheet feeder.
Roll Paper
Selects roll paper loaded in the roll paper holder for photos or panoramics up to 27 inches (68.6 cm) long. Click Print page frame to print a cutting guideline around each photo.

Roll Paper (Banner)
Selects roll paper loaded in the roll paper holder for photos or banners over 27 inches (68.6 cm) long.

Front - Fine Art
Selects fine art paper loaded in the front manual feed tray.

Front - Poster Board
Selects poster board or other thick media loaded in the front manual feed tray.

CD/DVD
Selects the CD or DVD loaded as the source.

Parent topic: Selecting Basic Print Settings - Windows
Using Layout Manager - Windows Only

Layout Manager lets you create a poster or display by dragging multiple pieces of print data created in different applications onto one sheet of paper for printing.
You can also place the same print data multiple times as shown here.
You can place print data in different sizes and orientations to maximize media usage, as shown here.
You can place print data on roll paper as shown here.

1. Open the file you want to print in your application.
2. Select the print command in your application.
3. Select **Layout Manager** on the Main tab and choose an option for the **Size** setting that matches the size of the document in the application.

![Layout Manager screen](image)

**Note:** You select the size of the paper you are printing on in a later step.

4. Click **OK** and then click **Print**, if necessary.

   The Layout Manager screen opens and displays one page in the layout.

5. Leave the Layout Manager screen open and repeat steps 1 to 4 to arrange additional print data. The pages are added to the Layout Manager screen.
6. Do the following to arrange objects on the Layout Manager screen:
   • Drag pages to move and resize them.
   • Use the tool buttons and the Object menu to align and rotate pages.
   • Resize and replace whole pages in the Preference or Arrangement Settings screens.

   **Note:** See the Layout Manager screen help for more details.

7. Click **File > Properties**, then select your print settings on the Main tab.

8. Click the **File** menu on the Layout Manager screen and click **Print**.

   **Note:** To save the current job to a file, click the **File** menu on the Layout Manager screen, save the file, and close the Layout Manager screen. To open the saved file later for editing or reprinting, right-click the printer icon in the Windows taskbar, select Layout Manager, and open the file.

**Parent topic:** Selecting Basic Print Settings - Windows
Selecting Print Layout Options - Windows

You can select a variety of sizing and layout options for your document or photo on the Page Layout tab.

- To change the orientation of your printed document or photo, select the Portrait or Landscape checkbox.
- To rotate or flip the printed image, select the Rotate 180° or Mirror Image checkbox.
- To select multiple copies and their print order, select the Copies, Collate, and Reverse Order options.
• To change the size of your printed document or photo, select the **Reduce/Enlarge** checkbox and select sizing options.

• To print multiple pages on one sheet of paper, or print one image on multiple sheets of paper, select the **Multi-Page** checkbox and select the options you want.

• To print on both sides of your paper, select the **Double-Sided Printing** options.

  **Note:** Your product software prompts you to reinsert your paper when it is time to print on the reverse side.

• To enlarge your image beyond the limits of your application program, select **Optimize Enlargement**.

  **Note:** The driver can increase the image size up to 650% and decrease the output resolution to stay within the pixel limitations. Depending on the resolution of the original image and the print size, you may see reduced print quality.

• To print a color background on the page, select **Print Bckg Color** and click **Color Settings** to select the color you want to use.

• To print the time, date, and other information about your print job at the top or bottom of the page, select **Job Settings** and click **Details** to select the settings you want to use.

**Reduce/Enlarge Options - Windows**

**Multi-Page Printing Options - Windows**

**Double-sided Printing Options - Windows**

**Parent topic:** Printing with Windows

**Reduce/Enlarge Options - Windows**

You can select any of the Reduce/Enlarge options to size your printed image.

**Fit to Page**

Sizes your printed image to fit on the paper you loaded and selected as the Output Paper setting.

**Fit to Roll Paper Width**

Sizes your printed image to fit the width of the roll paper you loaded.

**Custom**

Sizes your printed image by the percentage you select as the **Scale to** setting.

**Parent topic:** Selecting Print Layout Options - Windows

**Multi-Page Printing Options - Windows**

You can select these Multi-Page options to set up your multi-page print job.
N-up
Prints 2 (2-up) or 4 (4-up) pages on one sheet of paper.

Poster
Prints one image on multiple sheets of paper to create a large poster with or without borders. Click the Settings button to select the layout and guideline options.

Parent topic: Selecting Print Layout Options - Windows

Double-sided Printing Options - Windows
You can select any of the double-sided options to set up your double-sided print job.

Margins
Click Margins to customize the margins used during double-sided printing.

Binding Edge Options
Select a setting that orients double-sided print binding in the desired direction.

Binding Margin Options
Select options that define a wider margin to allow for binding.

Folded Booklet Option
Select a binding option to use when creating a folded booklet.

Parent topic: Selecting Print Layout Options - Windows

Selecting Additional Settings - Windows
You can run maintenance utilities and select additional settings that apply to all the print jobs you send to your product.

1. Access the Windows Desktop and right-click the product icon in the Windows taskbar.
2. Select Printer Settings.
3. Click the Utility tab.
4. Select any of the following options, as necessary:
   - **Nozzle Check** to print a nozzle check pattern to check whether the print head nozzles are clogged.
   - **Head Cleaning** to clean the print head if you notice banding or gaps in your printouts.
   - **Print Head Alignment** to align the print head if printouts appear grainy or out of focus.
   - **Epson Status Monitor 3** to check the printer’s status.
• **Monitoring Preferences** to select the error notifications displayed on the Epson Status Monitor 3 screen, or add a shortcut to the utility in the Windows taskbar.

• **Print Queue** to display a list of all waiting print jobs, view information on the data waiting to be printed, and delete or reprint the jobs.

• **Language** to select the language you want to use for the printer software screens.

• **Printer and Option Information** to set the time to turn off the printer automatically.

• **Speed and Progress** to select various printing options.

• **Menu Arrangement** to arrange the **Setting**, **Media Type**, and **Paper Size** options by frequency of use.

• **Export or Import** to save the print settings to a file or import them from a file. This is useful when you want to select the same print settings on multiple computers.

• **Driver Update** to check the Epson website for any available printer software updates and install them automatically.

5. Click **OK** to close the printer software window.

Saving, Sharing, and Customizing the Printer Settings

You can save groups of print settings or media settings so you can reuse them for future print jobs. You can export these settings as a file so you can share them with other users. You can also edit the settings displayed in the printer software screens.

- Saving and Sharing Print Settings - Windows
- Saving and Sharing Media Settings - Windows
- Editing Print Setting Displays - Windows

**Parent topic:** Printing with Windows
Saving and Sharing Print Settings - Windows

You can save your print settings so you can use them for future print jobs.

1. Select the print settings you want to save.
2. Click **Save/Del** at the top of the Main or Page Layout tab in your printer software. You see a window like this:

3. Verify that your settings are correct, enter a name for the group of settings in the **Name** field, and click **Save**.

   **Note**: If you need to delete a group of settings you have created, select the name of the group of settings from the list and click **Delete**.

4. Do the following as necessary:
   - Select the name of the group of settings from the Select Setting list and use them to print.
   - To export the settings, click **Save/Del**, select the name of the group of settings, click **Export**, select a location, and enter a file name.
• To import a group of settings, click **Save/Del**, click **Import**, select the file you want to use, and click **Open**. Then use the settings to print.

Parent topic: **Saving, Sharing, and Customizing the Printer Settings**

**Saving and Sharing Media Settings - Windows**

You can save and share settings you have selected for a particular media type so you can use them for future print jobs.

1. Select the Media Settings you want to save on the Main tab, as necessary.
2. Click **Custom Settings**.

You see a window like this:

![Screenshot of Custom Media Settings window](image)

3. Verify that your settings are correct, enter a name for the media settings in the **Name** field, and click **Save**.

   **Note:** If you need to delete a group of settings you have created, select the name of the settings from the list and click **Delete**.
4. Do the following as necessary:
   - Select the name of a media setting as the Media Type setting and use it to print.
   - To export the settings, click Custom Settings, select the name of the media settings, click Export, select a location, and enter a file name.
   - To import settings, click Custom Settings, select the name of the media settings, click Import, select the file you want to use, and click Open. Then use these settings to print.

**Parent topic:** Saving, Sharing, and Customizing the Printer Settings

**Editing Print Setting Displays - Windows**

You can arrange the displayed print settings so you can easily select the settings you use most often.

1. Click the Utility tab in the printer software.
2. Select Menu Arrangement.
3. Select the item you want to edit.
4. Order or group items in the List box.
   • To move and reorder items, drag and drop them in the list.
   • To add a new group (folder), click Add Group.
   • To delete a group (folder), select the group and click Delete Group.
• To hide a group, drag and drop it to Not Display.

**Note:** If you delete a group, the group folder is deleted but the items within the folder remain.

5. Click **Save**.

**Parent topic:** Saving, Sharing, and Customizing the Printer Settings

**Selecting Default Print Settings - Windows**

When you change your print settings in a program, the changes apply only while you are printing in that program session. If you want to change the print settings you use in all your Windows programs, you can select new default print settings.

1. Access the Windows Desktop and right-click the product icon in the Windows taskbar.
2. Select **Printer Settings**.
You see the printer settings window:

3. Select the print settings you want to use as defaults in all your Windows programs.
4. Click **OK**.

These settings are now the defaults selected for printing. You can still change them as needed for printing in any program session.

Sizing Printed Images - OS X
Selecting Printing Preferences - OS X
Printing Your Document or Photo - OS X

Parent topic: Printing from a Computer

Selecting Basic Print Settings - OS X
Select the basic settings for the photo or document you want to print.

1. Open a photo or document for printing.
2. Select the print command in your application.

Note: You may need to select a print icon on your screen, the Print option in the File menu, or another command. See your application's help utility for details.
3. Select your product as the **Printer** setting.

4. If necessary, click the arrow next to the Printer setting or the **Show Details** button to expand the print window.
You see the expanded printer settings window for your product:

![Print settings window](image)

**Note:** The print window may look different, depending on the version of OS X and the application you are using.

5. Select the **Copies** and **Pages** settings as necessary.

**Note:** If you do not see these settings in the print window, check for them in your application before printing.
6. Select the size of the paper you loaded as the **Paper Size** setting.
   - To print a borderless photo, select the **Borderless** checkbox or a paper size with a **Borderless** option. You can also create a custom paper size, but the highest available **Output Resolution** setting is limited to **Fine - 720 dpi**.
   - To print on roll paper, select a roll paper size or one with a **Borderless** option.

   **Note:** For roll paper, make sure the maximum width of your photo is set to 13 inches to fit in the width of your roll paper (set the margins to 0 in your application software).

   - To print on paper loaded in the manual feed tray, select a paper size with a **Front Fine Art** option.

   **Note:** You can reduce or enlarge the size of the printed image by selecting **Paper Handling** from the pop-up menu and selecting a scaling option.

   **Note:** If you do not see these settings in the print window, check for them in your application before printing. They may be accessible by selecting **Page Setup** from the File menu.

7. Choose portrait or landscape as the **Orientation** setting.

8. Select any application-specific settings that appear on the screen, such as those shown in the image above for the Preview application.

9. Select **Printer Settings** from the pop-up menu.
Note: In certain programs, you may need to select Advanced before you can select Printer Settings. For more information about printer settings, click the ? button.

You see these settings:

![Printer Settings](image)

10. Select the type of paper you loaded as the Media Type setting.

Note: The setting may not exactly match the name of your paper. Check the media type settings list for details.

Note: The ink type may change depending on the size and type of paper you select. To avoid changing black ink more often than necessary, set the printer to the type of black ink you usually use.
11. Select one of the following as the **Print Mode** setting:
   - Select **AccuPhoto HD** for any type of photographic printing.
   - Select **Advanced B&W Photo** to print black-and-white photos on certain types of photo paper. See the list of Advanced B&W Photo options for details. If your paper type does not support this option, print black-and-white photos using the **AccuPhoto HD** setting.
   - Select **Black/Grayscale** when using plain paper.

12. Click **Color Mode** and select **Manual Settings**.

13. Select one of the following as the **Color Mode** setting:
   - **EPSON Standard (sRGB)**: Increases the contrast in images. Click the **Advanced Color Settings** tab to use advanced color controls.
   - **Adobe RGB**: Matches image colors to the Adobe RGB color standard. Use this setting if your source file was captured in Adobe RGB. Click the **Advanced Color Settings** tab to use advanced color controls.
   - **Off (No Color Adjustment)**: Turns off color management in your printer software so you can manage color using only your application software.

   **Note:** If desired, you can instead use ColorSync to manage colors. In most cases, you get better results by applying color management in your application, rather than in the printer driver.

14. Select the **Output Resolution** setting you want to use.

15. Select any of the available print options.

   - [Advanced Color Settings - OS X]
   - [Output Resolution Settings - OS X]
   - [Print Options - OS X]

**Parent topic:** Printing with OS X

**Related references**

**Related tasks**

- [Printing Your Document or Photo - OS X](#)
- [Selecting Roll Paper Settings - OS X](#)
When you click the Advanced Color Settings tab, you see one of the screens below depending on the Print Mode you selected.

- **AccuPhoto HD**
  You can specify values for adjusting brightness, contrast, saturation, and individual Cyan, Magenta, and Yellow color tones.

- **Advanced B&W Photo**
You can select any of the available options.

**Color Toning**
Adds tone (hue) to your black-and-white output. The default is **Neutral**, which provides a neutral tonal scale print. You can also choose other popular presets such as **Cool**, **Warm**, and **Sepia**. Note that the presets affect the target found in the tone color circle.

**Brightness**
Adjusts the overall lightness and darkness of your image.

**Contrast**
Adjusts the difference between the light and dark areas of the overall image.

**Shadow Tonality**
Controls tonality only in the shadow areas of your image.
Highlight Tonality
Controls tonality only in the highlight areas of your image.

Max Optical Density
Adjusts the overall density or focus of the print. Create a soft focus print by lowering the density setting.

Tone
Changes the entire tonal scale of your black-and-white output. While Darker is the default setting, you may see better results if you choose Dark. The tone color circle adjusts the hue of your black-and-white print. Click on any portion of the color wheel or enter corresponding values to customize the tone (hue) to add to your print. The closer you select to the edge of the wheel, the more color you add.

Highlight Point Shift
Helps reduce gloss differential on glossy media by adding density to the highlights of your image.

Parent topic: Selecting Basic Print Settings - OS X

Output Resolution Settings - OS X
You can select any of the Output Resolution settings to fine-tune the quality of your print. Some settings may be unavailable, depending on the paper type and border setting you have chosen.

Draft
For draft printing on photo paper.

Fine - 720 dpi
For everyday text and image printing.

Super Fine - 1440 dpi
For photos and graphics with good print quality and speed.

Photo - 1440 dpi
For photos and graphics with high print quality and slower speed.

SuperPhoto - 5760 dpi
For the best print quality but the slowest print speed.

Parent topic: Selecting Basic Print Settings - OS X

Print Options - OS X
You can select any of the print options to customize your print. Some options may be unavailable, depending on other settings you have chosen.

High Speed
Speeds up printing but may reduce print quality.
**Mirror Image**
Flips the printed image left to right.

**Parent topic:** Selecting Basic Print Settings - OS X

**Selecting Roll Paper Settings - OS X**

To print on roll paper, you select the roll paper size and roll paper options from the Printer Settings menu.

1. Select **Manage Custom Sizes** as the **Paper Size** setting.
2. Click +, double-click **Untitled**, and enter a name for your roll paper size.
3. Enter one of the following as the **Width** setting:
   - **8.3** for 8.3-inch (211 mm) wide roll paper
   - **12.95** for 13-inch (330 mm) wide roll paper

   **Note:** Make sure your image fits within the width of your roll paper.

4. Enter the length of your roll paper image as the **Height** setting (up to 44 inches [1118 mm]).
5. Set the margin setting to **0**.
6. Click **OK**.
7. Select your new custom roll paper size as the **Paper Size** setting.
8. Select **Roll Paper Settings**.
You see this window:

![Roll Paper Settings dialog box](image)

**Note:** Some settings may not be available, depending on the Roll Paper option you selected for your Paper Size.

9. Select the following settings as necessary:
   - Click **Print page frame** to print a cutting guideline around images.
   - Adjust the amount of image expansion when printing borderless images.

   **Note:** This option is available only when you choose a Paper Size setting with a **Borderless** option.

10. Click **Print**.

Selecting Paper Configuration Settings - OS X

If you are using non-Epson media and need to fine-tune its print quality, select Advanced Media Control from the pop-up menu. Select the available options as necessary.

Advanced Media Control Options - OS X

Parent topic: Printing with OS X

Advanced Media Control Options - OS X

Select any of the available Advanced Media Control options to fine-tune the quality of your printouts.

**Color Density**

Adjusts the ink saturation level.

**Drying Time per Print Head Pass**

Pauses print head movement for up to 5 seconds after each pass to allow ink to dry. This lets you print with non-Epson media and avoid smearing the ink.

**Paper Thickness**

Lets you select the thickness of your paper or media.
Platen Gap
Adjusts the distance from the paper to the print head. (Use a wider setting if you are seeing edge marks or scuffs on your prints.)

Parent topic: Selecting Paper Configuration Settings - OS X

Selecting Print Layout Options - OS X
You can select a variety of layout options by selecting Layout from the pop-up menu on the print window.

- To print multiple pages on one sheet of paper, select the number of pages in the Pages per Sheet pop-up menu. To arrange the print order of the pages, select a Layout Direction setting.
- To print borders around each page on the sheet, select a line setting from the Border pop-up menu.
- To invert or flip the printed image, select the Reverse page orientation or Flip horizontally settings.

Parent topic: Printing with OS X

Managing Color - OS X
You can adjust the Color Matching settings to fine-tune the colors in your printout, or turn off color management in your printer software.
1. Select **Color Matching** from the pop-up menu in the print window.

![Color Matching menu](image)

2. Select one of the available options.

   - **ColorSync**
     - Prints using standard color profiles for your product and paper to help match image colors. You can customize the conversion method and filter settings on the ColorSync pop-up menu in the print window.

   - **EPSON Color Controls**
     - Lets you manage color using controls in your printer software or turn off color management.

**Color Matching Options - OS X**

You can select from these settings on the **Color Matching** menu.

**ColorSync**

- Prints using standard color profiles for your product and paper to help match image colors. You can customize the conversion method and filter settings on the ColorSync pop-up menu in the print window.

**EPSON Color Controls**

- Lets you manage color using controls in your printer software or turn off color management.

Printing on CDs/DVDs

Follow the instructions here to print a design onto ink jet-printable CDs or DVDs to create a custom label.

Loading a CD/DVD

Removing a Printed CD/DVD

Printing on CDs/DVDs from a Computer

Loading a CD/DVD

You can use your printer and the Epson Print CD software that came with it to print label designs directly onto ink jet-printable CDs or DVDs. To prevent errors, you should burn files, music, or video onto your CD or DVD before printing.

1. Turn on the printer.
2. Remove any roll paper or paper loaded in the sheet feeder. Close the rear support if it’s open.
3. Open the front cover.
4. Push the center of the manual feed tray to extend it.

5. Place your disc on the included CD/DVD tray with the label side up.

6. Place the CD/DVD tray on the front manual feed tray.
7. Line up the arrows on the CD/DVD tray with the line on the manual feed tray. Make sure the CD/DVD tray is flush against the right.

8. Press **CD/DVD - Load** on the touch screen. The CD/DVD tray loads inside the printer.

*Note:* If you want to remove the CD/DVD tray without printing, press **Eject** on the touch screen and follow the on-screen instructions.

**Removing a Printed CD/DVD**

After your CD or DVD is printed, the tray ejects partially from the printer. Pull out the tray and remove the disc.

*Note:* If you want to remove the CD/DVD tray without printing, press **Eject** on the touch screen and follow the on-screen instructions.

---

**Purchase Epson Ink Cartridges**

You can purchase genuine Epson ink and paper at epson.com/ink3 (U.S. sales) or epson.ca (Canadian sales). You can also purchase supplies from an Epson authorized reseller. To find the nearest one, call 800-GO-EPSON (800-463-7766).

**Note:** We recommend that you use genuine Epson cartridges and do not refill them. The use of other products may affect your print quality and could result in printer damage.

The cartridges included with the printer are designed for printer setup and not for resale. After some ink is used for charging, the rest is available for printing. Yields vary considerably based on images printed, print settings, paper type, frequency of use, and temperature. For print quality, a variable amount of ink remains in the cartridge after the "replace cartridge" indicator comes on.

Removing and Installing Ink Cartridges

Make sure you have your replacement cartridges handy before you begin. You must install new cartridges immediately after removing the old ones.

**Caution:** Leave your old cartridges in the printer until you are ready to replace them to prevent the print head nozzles from drying out. Do not open ink cartridge packages until you are ready to install the ink. Cartridges are vacuum packed to maintain reliability.

1. Turn on your product.
2. Lift up the printer cover.

<table>

</tbody>
</table>
3. Press the latch and open the ink cartridge cover as shown.

4. Squeeze the tab on the cartridge and lift the cartridge straight up to remove it.

**Note:** Dispose of used cartridges carefully. Do not take the used cartridge apart or try to refill it.

**Warning:** If ink gets on your skin, wash it thoroughly with soap and water. If ink gets into your eyes, flush them immediately with water. If ink gets into your mouth, spit it out and see a doctor right away. Keep ink cartridges out of the reach of children.
5. Gently shake the new cartridge four or five times as shown. Then remove the cartridge from the package and remove the yellow tape from the bottom of the cartridge.

![Shaking cartridge](image)

**Caution:** Cartridges may make a clicking sound when you shake them. Do not remove any labels or seals, or ink will leak. Do not touch the green chip on the cartridge.

6. Insert the new cartridge into the holder and push it down until it clicks into place.

![Inserting cartridge](image)
7. Close the cartridge cover and push it down until it clicks into place.

8. Close the printer cover.

**Note:** Wait for your product to check the ink cartridges and charge the ink delivery system, if necessary. Do not turn off the product during ink charging.

**Caution:** If you remove an ink cartridge for later use, protect the ink supply area from dirt and dust and store it in the same environment as the printer. The valve in the ink supply port is designed to contain any excess ink, but do not touch the ink supply port or surrounding area. Always store ink cartridges with the label facing up; do not store cartridges upside-down.

**Parent topic:** Replacing Ink Cartridges
Switch Black Ink Type

Your product comes with Matte Black and Photo Black ink cartridges. Although both cartridges must be installed for your product to work, it can print using only one type of black ink at a time.

Your product switches the black ink type automatically, depending on the type of media you load. Because this process consumes some ink, so you should avoid switching black ink more often than necessary and select a default black ink type for the type of media you print on most often.

Note: To disable automatic black ink switching, press the **setup button and select System Administration > Printer Settings > BK Ink Auto Change > Off.**

Black Ink Type Media List

---

### Switching the Black Ink Type

Switching the black ink type takes several minutes and consumes some ink. Check the black ink type media list to select the correct ink type for the media you loaded.

1. Press the ⬇️ home button.
2. Press the ▶️ black ink change button.
3. Select **Proceed** and select one of these types of black ink to switch to:
   - Photo Black to Matte Black; switching takes about 1.5 minutes
   - Matte Black to Photo Black; switching takes about 3.5 minutes

Adjusting Print Quality

If your print quality declines, you may need to run a utility to clean or align the print head. If running these utilities does not solve the problem, you may need to replace the ink cartridges.

- Print Head Maintenance
- Print Head Alignment
- Cleaning the Paper Guide

Print Head Maintenance

If your printouts become too light, or you see dark or light bands across them, you may need to clean the print head nozzles. Cleaning uses ink, so clean the nozzles only if print quality declines.

You can check for clogged nozzles before you clean them so you don’t clean them unnecessarily.

**Note:** You cannot clean the print head if an ink cartridge is expended, and may not be able to clean it when a cartridge is low. You must replace the cartridge first.

Checking the Nozzles Using the Product Control Panel

You can check the print head nozzles using the control panel on your product.

1. Press the home button, if necessary.
2. Press the setup button.
You see this screen:

3. Select **Maintenance**.
4. Select **Print Head Nozzle Check**.
5. Load a few sheets of plain paper in the sheet feeder.
6. Select **Print**.
   
   The nozzle pattern prints.
7. Check the printed pattern to see if there are gaps in the lines.
   
   **Print head is clean**

   ![Print head is clean](image)

   **Print head needs cleaning**

   ![Print head needs cleaning](image)
8. Do one of the following:
   • If there are no gaps, select **Done**.
   • If there are gaps or the pattern is faint, select **Clean the Print Head** and continue.

9. Follow the instructions on the screen to clean the print head, check the nozzles, and repeat the process as necessary.

   If you don’t see any improvement after cleaning the print head up to 4 times, wait at least 6 hours. Then try cleaning the print head again. If quality still does not improve, one of the ink cartridges may be old or damaged and needs to be replaced.

**Parent topic:** Adjusting Print Quality
Aligning the Print Head Using the Product Control Panel

You can align the print head using the control panel on your product.

1. Press the home button, if necessary.
2. Press the setup button.
   
   You see this screen:

   ![Setup Menu]

3. Select Maintenance.
4. Press the down arrow and select Head Alignment.
5. Load a few sheets of plain paper in the sheet feeder.
6. Select Print to print an alignment sheet.

   **Note:** Do not cancel printing while you are printing head alignment patterns.

   After the alignment sheet is printed, you see a series of screens asking you to select the best square in each pattern set.

7. Check the printed patterns and choose the number representing the best square for each set, then select Proceed.
8. After you have selected the number for all the sets, select Done.

**Parent topic:** Print Head Alignment
Aligning the Print Head Using a Computer Utility

You can align the print head using a utility on your Windows computer or Mac.

1. Load a few sheets of plain paper in the sheet feeder.
2. Do one of the following:
   • **Windows**: Access the Windows Desktop and right-click the product icon in the Windows taskbar.
   • In the Apple menu or the Dock, select **System Preferences**. Select **Print & Fax, Print & Scan**, or **Printers & Scanners**, select your product, and select **Options & Supplies**. Select **Utility** and select **Open Printer Utility**.
3. Select **Print Head Alignment**.
   You see a window like this:

   ![Print Head Alignment window](image)

   - The Print Head Alignment utility fixes vertical misalignment, horizontal banding, and blurry printouts.
   - Make sure that the CD/DVD tray is removed and that the front manual feed tray is closed; otherwise, "Print Head Alignment" cannot be performed.

4. Click **Next** then click **Print** to print an alignment sheet.

   **Note**: Do not cancel printing while you are printing a head alignment pattern.
You see a window like this:

5. Check the printed pattern and follow the instructions on the screen to choose the number representing the best printed pattern for each set.
   - After choosing each pattern number, click **Next**.
   - If no patterns are aligned in one or more of the sets, choose the closest one in each set and click **Realignment**. Then print another alignment sheet and check it.

**Note:** Click **Skip** (where available) if you want to skip a particular alignment sheet.

6. When you are done, click **Finish**.

**Parent topic:** Print Head Alignment
Cleaning the Paper Guide

If you see ink on the back of a printout, you can clean the paper guide rollers to remove any excess ink.

1. Load several sheets of plain paper (or a cleaning sheet) in the sheet feeder.
2. Press the home button, if necessary.
3. Press the setup button.
   You see this screen:

![Setup Menu]

4. Select Maintenance.
   The paper feeds through your product.
7. Repeat these steps as necessary until no ink appears on the back of your printouts.

Cleaning and Transporting Your Product

See these sections if you need to clean or transport your product.

Cleaning Your Product
Transporting Your Product

Cleaning Your Product

To keep your product working at its best, you should clean it several times a year.

Caution: Do not use a hard brush, benzene, alcohol, or paint thinner to clean the product or you may damage it. Do not place anything on top of the cover or use the cover as a writing surface, or it could get permanently scratched. Do not use oil or other lubricants inside the product or let water get inside.

1. Turn off the product.
2. Unplug the power cable.
3. Disconnect any connected cables.
4. Remove all the paper and the roll paper holders from the product.
5. Clean the paper support and manual feed tray using a soft brush or a dry microfiber cloth.
6. Close the paper support, manual feed tray, output tray, and any covers.
7. Clean the outer case with a soft cloth dampened with a mild detergent.
8. Plug the power cable back in and turn on the product.
9. Load several sheets of plain paper (or a cleaning sheet) in the sheet feeder and clean the paper guide.

Close the rear paper support and output tray when you are not using the product to help keep it clean.

Parent topic: Cleaning and Transporting Your Product

Transporting Your Product

If you need to store your product or transport it a long distance, prepare it for transportation as described here.

Caution: During transportation and storage, follow these guidelines:

- Avoid tilting the product, placing it vertically, or turning it upside down; otherwise ink may leak.
• Leave the ink cartridges installed. Removing the cartridges can dry out the print head and may prevent the product from printing.

1. Turn off the product.
2. Unplug the power cable.
3. Disconnect any connected cables.
4. Remove all the paper from the product.
5. Remove the roll paper holders.
6. Close the rear paper support and the output tray.
7. Open the printer cover.

8. If you changed the control panel angle, push it down to return it to its original position.
9. Secure the ink cartridge holder to the case with tape. Leave the ink cartridges installed to avoid damaging the product.

**Note:** Some tape may be difficult to remove if left in place for a long time. Remove the tape immediately after transporting the product.

10. Close the printer cover.
11. Open the front cover.
12. Attach the transportation lock that comes with your product to the lower right of the front manual feed tray and secure it with tape.
13. Attach the transportation lock shown here to the top of the front manual feed tray and secure it with tape.
14. Attach the transportation lock shown here to the bottom of the front manual feed tray and secure it with tape.

15. Close the front cover and secure it with tape.
16. Place the product in its original packing materials, if possible, or use equivalent materials with cushioning around the product. Make sure the box adequately protects the product control panel.

17. After unpacking the product, be sure to remove all of the tape.

Keep the product level during transportation. If print quality has declined when you print again, clean and align the print head.

Checking for Software Updates

Periodically, it's a good idea to check Epson's support website for free updates to your product software. Visit the driver download site at (U.S. downloads or Canadian downloads).

• Windows: Your printer software automatically checks for updates. You can also manually update the software by:
  • Accessing the Windows Desktop, right-clicking the product icon in the Windows taskbar, then clicking Software Update.
  • Clicking on the Utility tab in the printer settings window and selecting Driver Update
You can also update the software by selecting EPSON Software Updater in the EPSON or EPSON Software program group, accessible by the Start button, or on the Start or Apps screens, depending on your version of Windows.

• OS X: You can manually update the software by opening the Applications > Epson Software folder and selecting EPSON Software Updater.

# Product Status Messages

You can often diagnose problems with your product by checking the messages on its LCD screen.

**Note:** If the LCD screen is dark, press the screen to wake the product from sleep mode.

<table>
<thead>
<tr>
<th>LCD screen message</th>
<th>Condition/solution</th>
</tr>
</thead>
<tbody>
<tr>
<td>Close the printer cover. See your documentation for details.</td>
<td>Paper may be jammed in the product. If paper is jammed in the product, follow the instructions in this guide to remove the jammed paper from the indicated area.</td>
</tr>
<tr>
<td>Printer Error. Turn power off and then on again. For details, see your documentation.</td>
<td>A serious error has occurred. Turn the product off and then back on again. If the error continues, check for a paper jam. If there is no paper jam, contact Epson for support.</td>
</tr>
<tr>
<td>A printer's ink pad is nearing the end of its service life. Please contact Epson Support.</td>
<td>The ink pads are near the end of their service life and the message will be displayed until the ink pad is replaced. Contact Epson to replace ink pads before the end of their service life.</td>
</tr>
<tr>
<td>A printer's ink pad is at the end of its service life. Please contact Epson Support.</td>
<td>The ink pad is at the end of its service life. Turn off the product and contact Epson for support.</td>
</tr>
<tr>
<td>Combination of IP address and subnet mask is invalid. See your documentation.</td>
<td>There is a problem with the network configuration of your product.</td>
</tr>
<tr>
<td>Some functions may not be available. For details, see your documentation.</td>
<td>When Paper Setup Display is set to Off, the Error Notice setting automatically defaults to Off and AirPrint is not available. Set the Paper Setup Display setting to On to use AirPrint.</td>
</tr>
</tbody>
</table>

**Note:** The ink pads in the printer collect, distribute, and contain the ink that is not used on printed pages. During the life of your product it may reach a condition where either satisfactory print quality cannot be maintained or the ink pads have reached the end of their usable life. The Epson Status Monitor, your LCD, or lights on the control panel will advise you when these parts need replacing. If this happens during the standard warranty of the product, the exchange of the product or replacement of the pads is covered under the standard warranty. If the product is out of warranty, the pads can be replaced by any Epson authorized service provider. The waste ink pads are not a user-replaceable part.

**Parent topic:** [Solving Problems](#)
Running a Product Check

Running a product check helps you determine if your product is operating properly.

1. Disconnect any interface cables connected to your product.
2. Make sure plain paper is loaded in the sheet feeder.
3. Press the home button, if necessary.
4. Press the setup button.

You see this screen:
5. Select **Maintenance**.
6. Select **Print Head Nozzle Check**.
7. Select **Print**.
   The nozzle pattern prints.
8. Do one of the following, depending on the results of the product check:
   - If the page prints and the nozzle check pattern is complete, the product is operating properly. Any operation problem you may have could be caused by your computer, cable, software, or selected settings. Check the other solutions in this manual or try uninstalling and reinstalling your printer software.
   - If the page prints but the nozzle check pattern has gaps, clean or align the print head.
   - If the page does not print, the product may have a problem. Check the other solutions in this manual. If they do not work, contact Epson.

## Resetting Control Panel Defaults

If you have a problem with settings on the product control panel, you can reset them to their factory defaults. You can choose which settings to reset or reset them all.

1. Press the 🏡 home button, if necessary.
2. Press the ☰ setup button.
You see this screen:

3. Select **System Administration**.
4. Press the down arrow button and select **Restore Default Settings**.
5. Select one of these options:
   - **Network Settings**: Resets all network settings.
   - **All except Network Settings**: Resets all except network settings.
   - **All Settings**: Resets all control panel settings.
   You see a confirmation screen.
6. Select **Yes** to reset the selected settings. (Select **No** if you want to cancel the operation.)

**Parent topic:** Solving Problems

**Solving Setup Problems**

Check these sections if you have problems while setting up your product.

- **Noise After Ink Installation**
- **Software Installation Problems**

**Parent topic:** Solving Problems
Noise After Ink Installation

If you hear noises from your product after installing ink, check the following:

- The first time you install ink cartridges, the product must charge its print head. Wait until charging finishes before you turn off the product, or it may charge improperly and use excess ink the next time you turn it on. Your product is finished charging the print head when the power light stops flashing.
- If the product’s print head stops moving or making noise, and the charging process has not finished after approximately 5 minutes, turn off your product. Turn it back on and check to see if charging is still in progress. If it is still in progress, contact Epson for help.
- Turn off the product, then make sure the ink cartridges are inserted completely and the ink cartridge cover is closed completely. Also make sure no packing material remains in the product. Wait a moment, then turn the product back on to clear the error.

Parent topic: Solving Setup Problems

Software Installation Problems

If you have problems while installing your product software, try these solutions:

- Make sure your product is turned on and any necessary cables are securely connected at both ends. If you still have problems installing software, disconnect the cable and carefully follow the instructions on the Start Here sheet. Also make sure your system meets the requirements for your operating system.
- Close any other programs, including screen savers and virus protection software, and install your product software again.
- In Windows, make sure your product is selected as the default printer and the correct port is shown in the printer properties.
- If you see any error message or your software does not install correctly in Windows, you may not have software installation privileges. Contact your System Administrator.
- If you are printing over a network, make sure your product is set up properly on the network.

Product Cannot Connect to a Wireless Router or Access Point
Network Software Cannot Find Product on a Network
Product Does Not Appear in OS X Printer Window
Cannot Print Over a Network

Parent topic: Solving Problems

Product Cannot Connect to a Wireless Router or Access Point

If your product has trouble finding or connecting to a wireless router or access point, try these solutions:

• If you are connecting the product via Wi-Fi Protected Setup (WPS) and the Wi-Fi icon on your product's LCD screen is not lit or does not appear, make sure you select one of the WPS options from the product control panel within 2 minutes of pressing the WPS button on your router.

• Make sure to place your product within contact range of your 2.4 GHz router or access point. Avoid placing your product near a microwave oven, 2.4 GHz cordless phone, or large metal object, such as a filing cabinet.

Note: If you are using a 5 GHz wireless router, set the router to operate in dual band (2.4 GHz and 5 GHz) mode. See your router documentation for instructions.

• Verify that your router or access point is operating correctly by connecting to it from your computer or another device.

• You may need to disable the firewall and any anti-virus software on your wireless router or access point.

• Check to see if access restrictions, such as MAC address filtering, are set on the router or access point. If access restrictions are set, add your product's MAC address to your router's address list. To obtain your product's MAC address, print a network status sheet. Then follow the instructions in your router or access point documentation to add the address to the list.

• If your router or access point does not broadcast its network name (SSID), follow the instructions that came with your product to enter your wireless network name manually.
• If your router or access point has security enabled, determine the kind of security it is using and any required password or passphrase for connection. Then make sure to enter the exact WEP key or WPA passphrase correctly.

• Check if your computer is restricting the available wireless channels. If so, verify that your wireless access point is using one of the usable channels and change to a usable channel, if necessary.

• If you are using a Wi-Fi Direct connection that suddenly disconnects, the Wi-Fi direct password on your device may have been changed. If necessary, delete the existing DIRECT-xxxxxxx connection settings from your device and enter a new password. See your device documentation for instructions.

• If you connected your product to a Windows computer using Wi-Fi Direct and it automatically selected Access Point Mode, you may have trouble accessing a low-priority Internet connection. Check the network connection or adapter settings in the Windows Control Panel and set the Internet metric setting to 100 for your version of the Internet Protocol.

**Network Software Cannot Find Product on a Network**

If EpsonNet Setup cannot find your product on a network, try these solutions:

• Make sure your product is turned on and connected to your network. Verify connection using your product control panel.

• Check if your network name (SSID) contains non-ASCII characters. Your product cannot display non-ASCII characters.

• Make sure your product is not connected to a guest network.

• If necessary, reinstall your product software and try running EpsonNet Setup again:
  1. Reset your product's network settings to their factory defaults.
  2. Windows only: uninstall your product software.
  3. Initialize your router following the instructions in your router documentation.
**Note:** If you are reading these instructions online, you will lose your Internet connection when you initialize your router, so note the next step before initializing it.

4. Download your product software from the Epson website using the instructions on the *Start Here* sheet.
   - If you have replaced your router, reinstall your product software to connect to the new router.

**Note:** If you are using a 5 GHz wireless router, set the router to operate in dual band (2.4 GHz and 5 GHz) mode. See your router documentation for instructions.

**Product Does Not Appear in OS X Printer Window**

If your product does not appear in the OS X printer window, try these solutions:

- Turn your product off, wait 30 seconds, then turn it back on again.
- If you are connecting the product wirelessly via EpsonNet Setup and a WiFi symbol is not displayed on the product's LCD screen, make sure your product software was installed correctly. If necessary, reinstall your software.
- Make sure you installed your product software correctly for your network. See the *Start Here* sheet for instructions.
- If your Mac includes both wired and wireless network services, make sure the network to which you connected your product is at the top of the Set Service Order list. Check your Mac documentation for instructions.

**Note:** If you are using a 5 GHz wireless router, set the router to operate in dual band (2.4 GHz and 5 GHz) mode. See your router documentation for instructions.

**Parent topic:** Solving Network Problems

**Related concepts**

- Uninstall Your Product Software
Cannot Print Over a Network

If you cannot print over a network, try these solutions:

• Make sure that your product is turned on.
• Make sure you install your product’s network software as described in your product documentation.
• Print a network status sheet and verify that the network settings are correct. If the network status is **Disconnected**, check any cable connections and turn your product off and then on again.
• If you are using TCP/IP, make sure the product's IP address is set correctly for your network. If your network does not assign IP addresses using DHCP, set the IP address manually.
• Make sure your computer and product are both using the same wireless network.
• If network printing is slow, print a network status sheet and check the signal strength. If it is poor, place your product closer to your router or access point. Avoid placing your product near a microwave oven, 2.4 GHz cordless phone, or large metal object, such as a filing cabinet.

**Note:** If you are using a 5 GHz wireless router, set the router to operate in dual band (2.4 GHz and 5 GHz) mode. See your router documentation for instructions.

• Check to see if your wireless router or access point has an enabled Privacy Separator function that is preventing printing from a device over the network. See your router or access point documentation for instructions on disabling the Privacy Separator function.
• If you are connecting the product via Wi-Fi Protected Setup (WPS) and the Wi-Fi icon does not appear on your product's LCD screen, make sure you select one of the WPS options from the product control panel within 2 minutes of pressing the WPS button on your router.
• Check your wired LAN router or access point to see if the LED for the port to which your product is connected is on or flashing. If the link LED is off, try the following:
  • Make sure the Ethernet cable is securely connected to your product and to your router, access point, switch, or hub.
  • Try connecting your product to a different port or a different router, access point, switch, or hub.
  • Try connecting with a different Ethernet cable.
  • Try printing to your product from another computer on the network.

**Note:** If you are using a 5 GHz wireless router, set the router to operate in dual band (2.4 GHz and 5 GHz) mode. See your router documentation for instructions.
• If you are connecting the product via EpsonNet Setup and the Wi-Fi icon does not appear on the LCD, make sure your product software was installed correctly. If necessary, reinstall your software.

**Solving Paper Problems**

Check these sections if you have problems using paper with your product.

**Paper Feeding Problems**

If you have problems feeding paper, try these solutions:

• If paper does not feed into the sheet feeder, remove the paper and fan the edges to separate the sheets. Reload paper against the right side and slide the edge guide against it. Do not load too many sheets in the sheet feeder at once and make sure the product cover is closed.

• When using the sheet feeder, do not load paper above the arrow mark on the left edge guide. Load only one sheet of compatible paper when using the front manual feed tray.

• Load only one sheet of media in the front manual feed tray. For posterboard, make sure there is enough space behind the product for the media to feed through.

• If multiple pages feed at once, remove the paper, fan the edges to separate the sheets, and reload it.

• If you can not insert paper easily into the front manual feed tray, make sure the paper is perfectly flat and not curled.
If you are printing on roll paper or with the sheet feeder, make sure the manual feed tray is not extended. Extend it only to load fine art paper or posterboard. Once the media is fed into the product and you see a message on the LCD screen, close the manual feed tray.

If paper loaded using the front manual feed tray does not feed, make sure you installed the paper correctly and guided it all the way into the product.

Do not load more than the recommended number of sheets.

Make sure paper is loaded in the correct orientation. Load cut sheets in the sheet feeder vertically.

Make sure your paper meets the specifications for your product.

If paper dust builds up on the rollers, they may lose traction and become unable to feed paper properly. Clean the paper guide.

If roll paper does not feed, cut the end straight across and uncurl it by rolling it backward, if necessary. Then reload the paper.

If thick media does not feed, make sure you are loading it straight into the product, not at an angle.

Make sure the transportation lock is removed from the front manual feed tray.

If paper jams when you print on both sides of the paper, try loading fewer sheets.

For best results, follow these guidelines:

- Use new, smooth, high-quality paper that is not damp, curled, creased, old, too thin, or too thick.
- Load paper printable side up.
- Follow any special loading instructions that came with the paper.

Paper Jam Problems in the Sheet Feeder

If paper has jammed in the sheet feeder, try this solution:

1. Carefully remove any paper jammed in the sheet feeder or the front output area.

2. Open the printer cover and slowly pull any jammed paper out of the product.

3. Close the printer cover and select **Restart**.

4. If an error is still displayed, turn off the product, then turn it back on.

5. If you are unable to remove the paper, contact Epson for support.
Paper Jam Problems in the Front Manual Feed Tray

If paper has jammed in the front manual feed tray, try these solutions:
1. Cancel the print job from your computer, if necessary.
2. Carefully remove the jammed paper from the front or back as shown (whichever is easier).
3. Open the printer cover and slowly pull any jammed paper out of the product.

4. Close the printer cover and select **Restart**.

5. If an error is still displayed, turn off the product, then turn it back on.

6. If you are unable to remove the paper, contact Epson for support.

Paper Jam Problems - Roll Paper

If roll paper has jammed inside the product, try these solutions:

1. Cancel the print job from your computer, if necessary.
2. Cut the paper close to the roll paper feeder and the output tray as shown.
3. Carefully remove the jammed paper from the front or back as shown (whichever is easier).
4. Open the printer cover and slowly pull any jammed paper out of the product.

5. Close the printer cover and select **Restart**.

6. If an error is still displayed, turn off the product, then turn it back on.

7. If you are unable to remove the paper, contact Epson for support.

**Parent topic:** Solving Paper Problems

- Paper Jam Problems in the Front Manual Feed Tray
- Paper Ejection Problems

**Paper Ejection Problems**

If you have problems with paper ejecting properly, try these solutions:

- If paper does not eject fully, you may have set the wrong paper size. Cancel printing using the product control panel, then select **Eject** or **Cut/Eject** (roll paper) to eject the paper. Remove any paper remaining in the product. Select the correct size when you reprint.

- If paper is wrinkled when it ejects, it may be damp or too thin. Load new paper and be sure to select the correct paper type setting in your printer software when you reprint.

**Parent topic:** Solving Paper Problems
Solving Problems Printing from a Computer

Check these sections if you have problems while printing from your computer.

Note: When printing using AirPrint, the available print settings are different from those covered in this manual. See the Apple website for details.

Nothing Prints
Product Icon Does Not Appear in Windows Taskbar
Error After Cartridge Replacement
Printing is Slow

Parent topic: Solving Problems

Nothing Prints

If you have sent a print job and nothing prints, try these solutions:

• Make sure your product is turned on.
• Make sure any interface cables are connected securely at both ends.
• Make sure the interface specifications match the specifications for the printer and the computer.
• If you connected your product to a USB hub, make sure it is a first-tier hub. If it still does not print, connect your product directly to your computer instead of the hub.
• Run a product check to see if a test page prints. If the test page prints, check to see if your product software is installed correctly.
• In Windows, make sure your product is selected as the default printer.
• In Windows, make sure the printer port setting matches the printer connection port.

• In Windows, clear any stalled print jobs from the Windows Spooler:
  • **Windows 8.x**: Navigate to the Apps screen and select **Control Panel > Hardware and Sound > Devices and Printers**. Right-click your product name, select **See what's printing**, and select your product name again if necessary. Right-click the stalled print job, click **Cancel**, and click **Yes**.
  
  • **Windows 7**: Click and select **Devices and Printers**. Right-click your product name, select **See what's printing**, and select your product name again, if necessary. Right-click the stalled print job, click **Cancel**, and click **Yes**.

• In OS X, make sure the printer is added to the printer list.

**Parent topic:** Solving Problems Printing from a Computer

**Related tasks**

Running a Product Check

### Product Icon Does Not Appear in Windows Taskbar

If you do not see your product icon in the Windows taskbar, first try restarting your computer. If that does not work, try this solution:

1. Do one of the following:
   • **Windows 8.x**: Navigate to the Apps screen and select **Control Panel > Hardware and Sound > Devices and Printers**.
   
   • **Windows 7**: Click and select **Devices and Printers**.

2. Right-click your product name, select **Printing Preferences**, and select your product name again if necessary.

3. Click the **Utility** tab.

4. Click the **Monitoring Preferences** button.

5. Click the checkbox for the option that adds the shortcut icon to the taskbar.

6. Click **OK** to close the open program windows.

**Parent topic:** Solving Problems Printing from a Computer

### Error After Cartridge Replacement

If you see an error message after you replace an ink cartridge, follow these steps:

1. Remove and reinsert the replaced ink cartridge, making sure to push it all the way into its slot.
2. Complete the ink cartridge installation steps.

Parent topic: Solving Problems Printing from a Computer

Printing is Slow

If printing becomes slow, try these solutions:

- Make sure your system meets the requirements for your operating system. If you are printing a high-resolution image, you may need more than the minimum requirements. If necessary, increase your system's memory.
- If you are using Windows 7, close the Devices and Printers window before you print.
- If you are using OS X, make sure you download and install the Epson printer driver.
- Clear space on your hard drive or run a defragmentation utility to free up existing space.
- Close any programs you are not using when you print.
- If your product is connected to a USB hub, connect it directly to your computer instead.
- If printing becomes slower after printing continuously for a long time, the product may have automatically slowed down to protect the print mechanism from overheating or becoming damaged. Let the product rest with the power on for 30 minutes, then try printing again.

For the fastest printing, select the following settings in your product software:

- Make sure the paper type setting matches the type of paper you loaded.
- Turn on any high speed settings in your product software.
- Select a lower print quality setting.
- **Windows**: Click the Maintenance or Utility tab, select Extended Settings or Speed and Progress, and select the following settings:
  - High Speed Copies
  - Always Spool RAW Datatype
  - Page Rendering Mode
  - Print as Bitmap

Solving Page Layout and Content Problems
Check these sections if you have problems with the layout or content of your printed pages.

**Note:** When printing using AirPrint, the available print settings are different from those covered in this manual. See the Apple website for details.

**Inverted Image**
Such problems may be caused by:

- Targeting by setting the page orientation on your computer to the opposite of the page orientation on your printer.
- Using multiple frames or other graphic objects on a single page.
- Using the mirror image or reverse page orientation settings in your printer software.

If your printed image is inverted unexpectedly, try these solutions:

- Turn off any mirror or inversion settings in your printing application.
- Turn off the **Mirror Image**, **Flip horizontally**, or **Reverse page orientation** settings in your printer software. (This option has different names, depending on your operating system version.)

**Note:** Leave these options turned on when you print on Epson Iron-on Cool Peel Transfer paper, if available for your product.

Blank Pages Print
If blank pages print unexpectedly, try these solutions:
• Make sure you selected the correct paper size settings in your printing program and printer software.
• If a blank page exists in a document you are printing and you want to skip printing it, select the Skip Blank Page setting in your printer software, if available.
• Run a print head nozzle check to see if any of the nozzles are clogged. Then clean the print head, if necessary.
• Make sure your product is selected as the printer in your printing program.

Border Appears on Borderless Prints
If you see a border on borderless prints, try these solutions:
• Make sure you are printing on a compatible borderless paper type and size.

  Note: For custom paper sizes, make sure you select a supported borderless page width.

• **Windows**: Make sure you selected the **Borderless** setting in your printer software.
• **OS X**: Make sure you selected the **Borderless** checkbox or a paper size with a **Borderless** option in your printer software.
• Adjust the **Expansion** setting to adjust the amount of image expansion on the edges of borderless prints.
• Make sure the image size and the paper size are set correctly; if the image is small, the enlargement may not be enough to cover the paper.

Parent topic: Solving Page Layout and Content Problems

Incorrect Characters Print
If incorrect characters appear in your prints, try these solutions before reprinting:
• Make sure any cables are securely connected at both ends.
• In Windows, delete all jobs from the Windows Spooler. Click Print Queue on the Utility tab in the printer settings window, and cancel any stalled print jobs.

• If your product is connected to a USB hub, connect it directly to your computer instead.

• If incorrect characters still appear in your prints, try connecting your product using a different cable.

Parent topic: Solving Page Layout and Content Problems

Incorrect Image Size or Position

If your printed image is the wrong size or in the wrong position, try these solutions:

• Make sure you selected the correct paper size and layout settings in your printing program and printer software.

• Make sure you selected the correct paper size on the control panel.

• Make sure your paper is positioned correctly for feeding into the printer.

You can use the preview option in your printer software to check your margins before you print.

Slanted Printout

If your printouts are slanted, try these solutions:

• Slide the edge guide against the edge of the paper.

• Make sure the paper support edge guide is flipped down.

• Select a higher print quality setting in your printer software.

• Turn off any high speed settings in your product software.

• Align the print head.

• Make sure the product is not printing while tilted or at an angle.

Parent topic: Solving Page Layout and Content Problems
Solving Print Quality Problems

Check these sections if your printouts have problems with print quality, but your image looks fine on your computer screen.

Note: When printing using AirPrint, the available print settings are different from those covered in this manual. See the Apple website for details.

- White or Dark Lines in Printout
- Blurry or Smearred Printout
- Faint Printout or Printout Has Gaps
- Grainy Printout
- Incorrect Colors

Parent topic: Solving Problems

White or Dark Lines in Printout

If you notice white or dark lines in your prints (also called banding), try these solutions before you reprint:

- Run a nozzle check to see if any of the print head nozzles are clogged. Then clean the print head, if necessary.
- Make sure the paper type setting matches the type of paper you loaded.
- Make sure you loaded the printable side of the paper correctly for your product.
- Turn off any high speed settings in your product software.
- Align the print head.
- You may need to replace the ink cartridges.

Parent topic: Solving Print Quality Problems

Related concepts

- Print Head Nozzle Check
Blurry or Smeared Printout

If your printouts are blurry or smeared, try these solutions:

- Make sure your paper is not damp, curled, old, or loaded incorrectly in your product.
- Use a support sheet with special paper, or load special paper one sheet at a time.
- Make sure your paper meets the specifications for your product.
- Use Epson papers to ensure proper saturation and absorption of genuine Epson inks.
- Make sure the paper type setting in your product software matches the type of paper you loaded.
- Make sure you loaded the printable side of the paper correctly for your product.
- If you are printing on thick paper or poster board, make sure you select the appropriate settings.
- Remove each sheet from the output tray as it is printed.
- Avoid handling printouts on glossy paper right after printing to allow the ink to set.
- Turn off any high speed settings in your product software.
- If you print on both sides of a sheet of paper, smudges may appear on the reverse side of heavily saturated or dark images. If one side of a sheet will contain a lighter image or text, print that side first. Adjust the **Print Density** and/or **Increased Ink Drying Time** settings.
- Run a nozzle check to see if any of the print head nozzles are clogged. Then clean the print head, if necessary.
- Align the print head.
- Clean the paper path.
Note: Your product will not operate properly while tilted at an angle. Place it on a flat, stable surface that extends beyond the base of the product in all directions.

**Faint Printout or Printout Has Gaps**

If your printouts are faint or have gaps, try these solutions:

- Run a nozzle check to see if any of the print head nozzles are clogged. Then clean the print head, if necessary.
- The ink cartridges may be old or low on ink, and you may need to replace them.
- Make sure the paper type setting matches the type of paper you loaded.
- Make sure your paper is not damp, curled, old, or loaded incorrectly in your product.
- Align the print head.
- Clean the paper path.

**Parent topic:** Solving Print Quality Problems
Grainy Printout

If your printouts are grainy, try these solutions:

• Make sure you loaded the printable side of the paper correctly for your product.
• Select a higher print quality setting and turn off any high speed settings in your product software.
• Run a nozzle check to see if any of the print head nozzles are clogged. Then clean the print head, if necessary.
• Align the print head.
• You may need to increase the image resolution or print a smaller size; see your software documentation.

**Note**: Images from the Internet may be low resolution and not result in a high quality printout.

• If you enlarged the image in an image-editing program, you need to increase the resolution setting to retain a high image quality. Increase the resolution by the same amount you increased the image size. For example, if the resolution is 300 dpi (dots per inch) and you will double the image size later, change the resolution setting to 600 dpi.

**Note**: Higher resolution settings result in larger file sizes, which take longer to process and print. Consider the limitations of your computer system when selecting a resolution, and select the lowest possible resolution that produces acceptable quality to keep file sizes manageable.
Incorrect Colors

If your printouts have incorrect colors, try these solutions:

- Make sure the Advanced B&W Photo, Black/Grayscale or Grayscale setting is not selected in your printer software.
- Run a nozzle check to see if any of the print head nozzles are clogged. Then clean the print head, if necessary.
- The ink cartridges may be old or low on ink, and you may need to replace them.
- Your printed colors can never exactly match your on-screen colors. However, you can use a color management system to get as close as possible. Try using the color management options in your printer software.
- Try turning off the PhotoEnhance setting in Windows.
- Try adjusting the Gamma setting.
- For best results, use genuine Epson ink and paper.

Solving CD/DVD Problems

Check these sections if you have problems printing on a CD/DVD with your product.

CD/DVD Jam Problems
Image Not Centered on CD/DVD
Image Does Not Cover Printable Area of Disc
Ink Smears on CD/DVD
Faint Image on CD/DVD

Parent topic: Solving Problems

CD/DVD Jam Problems

If a CD/DVD has jammed in the product, follow these steps to remove the CD/DVD tray:

1. Cancel the print job from your computer, if necessary.
2. Slowly pull the CD/DVD tray out of the product.
3. Select Restart.
4. If an error is still displayed, turn off the product, then turn it back on.
5. If you are unable to remove the CD/DVD tray, contact Epson for support.
Image Not Centered on CD/DVD
If your printed image is not centered on the disc, adjust the print position using the Epson Print CD software. See the Epson Print CD help utility for details.

Image Does Not Cover Printable Area of Disc
If you are using discs where the printable area extends to within 0.16 inch (4 mm) of the edge of the center hole, you may need to adjust the Inner/Outer Diameter Setting in the Epson Print CD software. See the Epson Print CD help utility for details.

Ink Smears on CD/DVD
If you notice smeared ink on your disc, try these solutions:
- Make sure you are printing on ink jet-printable CDs or DVDs and that the surface of the disc is dry.
- Handle printed discs carefully and let them dry for 24 hours before inserting them in a drive.
- Adjust the print quality using the Epson Print CD software. See the Epson Print CD help utility for details.

Faint Image on CD/DVD
If your printed image is faint, adjust the print quality using the Epson Print CD software. See the Epson Print CD help utility for details.

Uninstall Your Product Software
If you have a problem that requires you to uninstall and re-install your software, follow the instructions for your operating system.

Uninstalling Printing Software - Windows
Uninstalling Product Software - OS X

Parent topic: Solving Problems
Uninstalling Printing Software - Windows

You can uninstall and then re-install your printer software to solve certain problems.

1. Turn off the product.
2. Disconnect any interface cables.
3. Do one of the following:
   • Windows 8.x: Navigate to the Apps screen and select Control Panel > Programs > Programs and Features. Select the uninstall option for your Epson product, then select Uninstall/Change.
     
     **Note:** If you see a User Account Control window, click Yes or Continue.
     
     In the next window, select your product, if necessary, and click OK. Then follow any on-screen instructions.
   
   • Windows (other versions): Click or Start, and select All Programs or Programs. Select Epson, select your product, then click EPSON Printer Software Uninstall.
     
     **Note:** If you see a User Account Control window, click Yes or Continue.
     
     In the next window, select your product, if necessary, and click OK. Then follow any on-screen instructions.
4. Restart your computer, then re-install your software.

**Note:** If you find that re-installing your product software does not solve a problem, contact Epson.

Parent topic: Uninstall Your Product Software

Uninstalling Product Software - OS X

In most cases, you do not need to uninstall your product software before re-installing it. However, you can download the Uninstaller utility from the Epson support website to uninstall your product software as described here.

**Note:** If you find that re-installing your product software does not solve a problem, contact Epson.

1. To download the Uninstaller utility, visit the Epson download site (U.S. downloads or Canadian downloads).
2. Follow the instructions on the screen to install the Uninstaller utility.
3. Quit all applications currently running on your Mac.
4. Double-click the Uninstaller icon.
5. Select the checkbox for each software program you want to uninstall.
6. Click Uninstall.
7. Follow the on-screen instructions to uninstall the software.
8. To reinstall your product software, see the Start Here sheet for instructions.

**Note:** If you uninstall the printer driver and your product name remains in the Print & Fax, Print & Scan, or Printers & Scanners window, select your product name and click the – (remove) icon to remove it.

**Parent topic:** Uninstall Your Product Software

**Where to Get Help**

If you need to contact Epson for technical support services, use the following support options.

**Internet Support**

Visit Epson’s support website at epson.com/support (U.S.) or epson.ca/support (Canada) for solutions to common problems. You can download drivers and documentation, get FAQs and troubleshooting advice, or e-mail Epson with your questions.

**Speak to a Support Representative**

Before you call Epson for support, please have the following information ready:

- Product name
- Product serial number (located on a label on the product)
- Proof of purchase (such as a store receipt) and date of purchase
- Computer configuration
- Description of the problem

Then call:

- U.S.: (562) 276-7272, 6 AM to 8 PM, Pacific Time, Monday through Friday, and 7 AM to 4 PM, Pacific Time, Saturday
• Canada: (905) 709-2567, 6 AM to 8 PM, Pacific Time, Monday through Friday, and 7 AM to 4 PM, Pacific Time, Saturday

Days and hours of support are subject to change without notice. Toll or long distance charges may apply.

**Purchase Supplies and Accessories**

You can purchase genuine Epson ink and paper at epson.com/ink3 (U.S. sales) or epson.ca (Canadian sales). You can also purchase supplies from an Epson authorized reseller. To find the nearest one, call 800-GO-EPSON (800-463-7766).

Printable Area Specifications

Note: When printing borderless, quality may decline in the expanded printable area.
Cut sheets - normal printing

1. Top and side margins: 0.12 inch (3 mm) minimum
2. Top/reduced print quality area: 1.30 inches (33 mm) minimum
3. Bottom/reduced print quality area: 1.42 inches (36 mm) minimum

**Note:** Poster board margins are 0.79 inch (20 mm) for sizes smaller than 13 × 19 inches (330 × 483 mm).
Cut sheets - borderless printing

1  Side/reduced print quality area: 0.12 inch (3 mm) minimum
2  Top/reduced print quality area: 1.42 inches (36 mm) minimum
3  Bottom/reduced print quality area: 1.54 inches (39 mm) minimum

Note: You cannot print borderless on poster board.
Roll paper - normal printing

1 Side margins: 0.12 inch (3 mm) minimum
2 Top margin: 1.97 inches (50 mm) minimum
3 Bottom margin: 0.55 inch (14 mm) minimum
Roll paper - borderless printing

1. Top margin: 1.97 inches (50 mm) minimum
2. Bottom margin: 0.55 inch (14 mm) minimum

**Note:** For continuous printing on roll paper, there is no margin between printed images (normal and borderless printing).
CD/DVD

1  Minimum inner margin: 0.83 inch (21 mm)
2  Maximum outer margin: 4.72 inch (120 mm)

Ink Cartridge Specifications

**Note:** We recommend that you use genuine Epson cartridges and do not refill them. The use of other products may affect your print quality and could result in printer damage.

The cartridges included with the printer are designed for printer setup and not for resale. After some ink is used for charging, the rest is available for printing. Yields vary considerably based on images printed, print settings, paper type, frequency of use, and temperature. For print quality, a variable amount of ink remains in the cartridge after the "replace cartridge" indicator comes on.

**Color**

- Black cartridge: Photo Black, Matte Black, Light Black, and Light Light Black inks
- Color cartridge: Yellow, Cyan, Light Cyan, Vivid Magenta, and Vivid Light Magenta inks
Cartridge life

Opened package: 6 months
Unopened package: do not use if the date on the package has expired

Temperature

Storage: –4 to 104 °F (–20 to 40 °C)
Within a month at 104 °F (40 °C)
Ink freezes at 5 °F (–15 °C); if left for a long time
Ink thaws and is usable after 3 hours at 77 °F (25 °C) with no condensation

Note: For best printing results, use up a cartridge within 6 months of opening the package.

This equipment contains the following wireless module:

- Manufacturer: Askey Computer Corporation.
- Type: WLU6117-D69 (RoHS)
This product conforms to Part 15 of FCC Rules and RSS-210 of the IC Rules. Epson cannot accept responsibility for any failure to satisfy the protection requirements resulting from a non-recommended modification of the product. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation of the device.

To prevent radio interference to the licensed service, this device is intended to be operated indoors and away from windows to provide maximum shielding. Equipment (or its transmit antenna) that is installed outdoors is subject to licensing.

Important Safety Instructions
Before using your Epson product, read and follow these safety instructions.

General Printer Safety Instructions

• Be sure to follow all warnings and instructions marked on the printer.
• Use only the type of power source indicated on the printer's label.
• Use only the power cord that comes with the printer. Use of another cord may cause fires or shock. Do not use the cord with any other equipment.
• Place the printer near a wall outlet where the plug can be easily unplugged.
• Avoid plugging the printer into an outlet on the same circuit as a photo copier or air control system that regularly switches on and off, or on an outlet controlled by a wall switch or timer.
• Do not let the power cord become damaged or frayed.
• If you use an extension cord with the printer, make sure the total ampere rating of the devices plugged into the extension cord does not exceed the cord's ampere rating. Also, make sure the total ampere rating of all devices plugged into the wall outlet does not exceed the wall outlet's ampere rating.
• Always turn off the printer using the power button, and wait until the power light stops flashing before unplugging the printer or cutting off power to the electrical outlet.

• Place the printer on a flat, stable surface that extends beyond its base in all directions. It will not operate properly if it is tilted or at an angle.

• Leave enough space in front of the printer for the paper to be fully ejected.

• Avoid locations that are subject to rapid changes in heat or humidity, shocks or vibrations, or dust.

• Do not place the printer near a radiator or heating vent or in direct sunlight.

• Leave enough room around the printer for sufficient ventilation. Do not block or cover openings in the case or insert objects through the slots.

• Keep the printer away from potential sources of electromagnetic interference, such as loudspeakers or the base units of cordless telephones.

• When connecting the printer to a computer or other device with a cable, ensure the correct orientation of the connectors. Each connector has only one correct orientation. Inserting a connector in the wrong orientation may damage both devices connected by the cable.

• Do not touch the flat white cable inside the printer.

• Do not move the print head by hand; this may damage the printer.

• Do not spill liquid on the printer.

• Do not use aerosol products that contain flammable gases inside or around the printer. Doing so may cause fire.

• Except as specifically explained in your documentation, do not attempt to service the printer yourself.

• Unplug the printer and refer servicing to qualified service personnel under the following conditions: if the power cord or plug is damaged; if liquid has entered the product; if the product has been dropped or the case damaged; if the product does not operate normally or exhibits a distinct change in performance. Adjust only those controls that are covered by the operating instructions.

• If damage occurs to the plug, replace the cord set or consult a qualified electrician. If there are fuses in the plug, make sure you replace them with fuses of the correct size and rating.

• Leave the ink cartridges installed. Removing the cartridges can dehydrate the print head and may prevent the printer from printing.

• Before transporting the printer, make sure that the print head is in the home (far right) position and the ink cartridges are in place.

• When storing or transporting the printer, do not tilt it, stand it on its side, or turn it upside down; otherwise ink may leak from the cartridges.
Ink Cartridge Safety Instructions

- Keep ink cartridges out of the reach of children and do not drink the ink.
- Be careful when you handle used ink cartridges; there may be ink remaining around the ink supply port. If ink gets on your skin, wash it off with soap and water. If it gets in your eyes, flush them immediately with water.
- Do not put your hand inside the product or touch any cartridges during printing.
- Install a new ink cartridge immediately after removing an expended one. Leaving cartridges uninstalled can dry out the print head and may prevent the product from printing.
- Do not remove or tear the label on the cartridge; this can cause leakage.
- Do not remove the transparent seal from the bottom of the cartridge. This may cause the cartridge to become unusable.
- Do not break the hooks on the side of the cartridge when removing it from the packaging.
- Do not touch the green IC chip on the side of the cartridge. This may prevent normal operation.
- Do not shake cartridges after opening their packages; this can cause them to leak.
- If you remove an ink cartridge for later use, protect the ink supply area from dirt and dust and store it in the same environment as the product. Note that there is a valve in the ink supply port, making covers or plugs unnecessary, but care is needed to prevent the ink from staining items that the cartridge touches. Do not touch the ink cartridge ink supply port or surrounding area.
- Use an ink cartridge before the date printed on its package.
- Do not dismantle an ink cartridge. This could damage the print head.
- Store ink cartridges in a cool, dark place.
- After bringing an ink cartridge inside from a cold storage site, allow it to warm up at room temperature for at least three hours before using it.
- Store ink cartridges with their labels facing upward. Do not store cartridges upside down.

LCD Screen Safety Instructions

- Use only a dry, soft cloth to clean the LCD screen. Do not use liquid or chemical cleansers.
- If the LCD screen is damaged, contact Epson. If the liquid crystal solution gets on your hands, wash them thoroughly with soap and water. If the liquid crystal solution gets into your eyes, flush them...
immediately with water. If discomfort or vision problems remain after a thorough flushing, see a doctor immediately.

• Do not press too hard on the LCD screen.
• Do not use a pointy or sharp object, such as a pen or your fingernail, to operate the LCD screen.

Wireless Connection Safety Instructions

Radio waves from this product may adversely affect the operation of medical equipment or automatically controlled devices, such as pacemakers, automatic doors or fire alarms. When using this product near such devices or inside a medical facility, follow the directions from authorized staff members at the facility, and follow all posted warnings and directions on the device to avoid causing an accident.

FCC Compliance Statement

For United States Users

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio or television reception. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause interference to radio and television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

• Reorient or relocate the receiving antenna.
• Increase the separation between the equipment and receiver.
• Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
• Consult the dealer or an experienced radio/TV technician for help.

WARNING

The connection of a non-shielded equipment interface cable to this equipment will invalidate the FCC Certification or Declaration of this device and may cause interference levels which exceed the limits established by the FCC for this equipment. It is the responsibility of the user to obtain and use a shielded equipment interface cable with this device. If this equipment has more than one interface connector, do
not leave cables connected to unused interfaces. Changes or modifications not expressly approved by the manufacturer could void the user’s authority to operate the equipment.
