Quick Setup

Before using the projector, make sure you read the safety instructions in the online User's Guide.

Connect the projector

Choose from the following connections. For additional connection types, see the online User's Guide.

Note: These illustrations show the PowerLite Home Cinema 3600e, but the instructions are the same for the PowerLite Home Cinema 3000/3500/3510 unless otherwise noted.

Connect up to 4 video devices and use the Source buttons on the remote control or the 4 option on the projector to switch between them.

Connect audio

Built-in speaker (PowerLite Home Cinema 3500/3510/3600e)

The projector has a built-in speaker that can play audio from a connected video source (DVI-D, HDMI, or MHL) through the built-in speaker (PowerLite Home Cinema 3500/3510/3600e).

Audio Out port (PowerLite Home Cinema 3500/3510/3600e)

You can connect the projector to external self-powered speakers through the Audio Out port.

Note: You can also connect external self-powered speakers to the Optical Out port on the WirelessHD Transmitter (PowerLite Home Cinema 3600e).

External speakers

Connect your device's audio output to your home theater receiver or powered speakers.

To shut down the projector, press the Power button on the projector or the Menu button on the remote control. The power light flashes blue, then stays on.

The default language of the menu system is English. To select another language, press the Settings button, then press the Language button. Select your language and press Enter. Press the Menu button to exit the menu system.

Adjust the image

1. If you don't see an image, press one of the Source buttons on the remote control or the 4 button on the projector to select the image source.

2. For the best image quality, place the projector directly in front of the center of the screen, facing the screen squarely. If this is not possible, turn the horizontal and vertical lens shift dials to adjust the image position and center it on the screen.

3. If the image is tilted, adjust the front feet as shown below.

4. Turn the zoom ring to reduce or enlarge the image.

5. If your image is uneven on the sides, you can use the keystoning correction feature to adjust the image. To use this feature, you must first set the lens to the center-top position using the lens shift dials.

6. Press the  menu button to display the keystoning correction screen. Then press the  or  buttons to correct for horizontal and vertical keystoning distortion.

Note: To exit the menu system, press the Menu button.
**Quick Setup**

Before using the projector, make sure you read the safety instructions in the online User's Guide.

**Connect the projector**

Choose from the following connections. For additional connection types, see the online User's Guide.

1. **Video device**
   - Connect up to 6 video devices and use the Source buttons on the remote control or the **Source** button on the projector to switch between them.

2. **Mobile media device (PowerLite Home Cinema 3000/3500/3510/3600e)**
   - Connect tablets, smartphones, and other devices that support the MHL™ standard to the HDMI port using a MHL compatible cable.
   - Note: Some devices may require an adapter or may not require an MHL cable. Not all features or functions may be supported. Check your device's documentation for more information.

3. **WirelessHD (PowerLite Home Cinema 3000/3500/3510/3600e)**
   - Follow these steps to set up the included WirelessHD Transmitter:
     1. Place the transmitter within 32 feet (10 m) of the projector. Make sure the transmitter and the projector are not placed on a metal surface, as this may interfere with the signal. Make sure there are no obstructions between the transmitter and the projector.
     2. Plug the AC adapter into the transmitter and a wall outlet.
     3. Connect up to 4 video devices and use the Source buttons on the transmitter or the **Source** button on the projector to switch between them.

4. **Audio Out port (PowerLite Home Cinema 3000/3500/3510/3600e)**
   - You can connect the projector to external self-powered speakers through the Audio Out port.
   - Note: You can also connect external self-powered speakers to the Optical Out port on the WirelessHD Transmitter (PowerLite Home Cinema 3500/3510/3600e).

5. **Built-in speaker (PowerLite Home Cinema 3000/3500/3510/3600e)**
   - The projector has a built-in speaker that can play audio from a connected video source (DVD player, streaming device, etc.) using an HDMI connection. If you do not use an HDMI connection, you can connect your device's audio output to the projector's audio input.
   - Note: If your image is tilted, adjust the front feet as shown below.

6. **Power button**
   - To turn on your equipment, press the **On** button on the projector to select the image source.
   - If you still see a blank screen or have other display problems, check your device's documentation for more information.

**Connect audio**

**Home theater system**

**Powered speakers**

**Adjust the image**

1. If you don't see an image, press one of the Source buttons on the remote control or the **Source** button on the projector to select the image source.

2. For the best image quality, place the projector directly in front of the center of the screen, facing the screen squarely. If this is not possible, turn the horizontal and vertical lens shift dials to adjust the image position and center it on the screen.

3. Remove the lens cap.

4. Press the **Enter** button on the projector or the **On** button on the remote control. The projector light flashes blue, then stays on.

5. Turn the focus ring to sharpen the image.

6. If your image is uneven on the sides, you can use the keystone correction feature to adjust the image. To use this feature, you must first set the lens to the center-top position using the lens shift dials.

7. If you are using a blank screen or have other display problems, see “Troubleshooting.”

---

**Viewing WirelessHD content**

To use the transmitter as a pass-through device to a television or other display, connect an HDMI cable to the display device and the HDMI output port on the rear of the transmitter. See “Viewing WirelessHD content” for information on switching between wireless and wired display modes.
Using the remote control

Make sure the batteries are installed as shown (two AA batteries).

**Viewing WirelessHD content (PowerLite Home Cinema 3600e)**

1. Turn on your video device and begin playback.
2. Turn on the power switch on the side of the WirelessHD Transmitter.
3. Pair the wireless control.
4. If you have connected a television or other display to the output port on the transmitter and want to switch between wired and wireless display modes, press the Output button on the remote control or transmitter. The WHD light on the transmitter will light up when the wireless display mode is active.
5. Press the WirelessHD button on the remote control.

**Viewing 3D images**

To view 3D content, you must first connect a 3D-compatible video device to one of the HDMI ports on your projector. You will also need a pair of Epson® 3D glasses. For more information on adjusting 3D images, refer to the online User’s Guide.

**Troubleshooting**

If you see a blank screen or the No Signal message after turning on your video device or computer, check the following:

- Make sure the power light on the projector is blue and not flashing.
- Make sure the power switch on the side of the WirelessHD Transmitter is within 32 feet (10 m) of the projector, is fixed in the horizontal center position, isn't obstructed by any large objects, and is not placed on a metal surface.
- If you are viewing wireless content, make sure that the WHD light on the transmitter is on. If it isn't, press the Input button on the remote control or transmitter.
- If the keystone correction feature doesn’t correct the image, make sure you set the lens to the center-top position using the horizontal and vertical lens shift dials.

**Where to get help**

**Manuals**

For more information about using the Epson 3D glasses, visit the Epson website or download the Epson User’s Guide for more information.

**Telephone support services**

To use the Epson Productivity Support service, call (866) 637-7661. This service is available for the duration of your warranty period. You may also speak with a support specialist by calling Epson Canada at (800) 877-7731 (U.S.) or (893) 773-5859 (Canada).

Support hours are 6 to 8 AM, Pacific Time, Monday through Friday, and 7 AM to 4 PM, Pacific Time, Saturday. Days and hours of support are subject to change without notice. For long distance charges may apply.

**Internet support**

Visit epson.com/support (U.S.) or epson.ca/support (Canada) for solutions to common problems. You can download utilities and documentation, get FAQs and troubleshooting advice, or e-mail Epson.

**Registration**

Register today to get product updates and exclusive offers. You can use the CD included with your projector or register online at epson.com/webreg.

**Optional accessories**

For a list of optional accessories, see the online User’s Guide.

You can purchase 3D glasses (part number V12H547003) or other accessories from an Epson authorized reseller. To find the nearest reseller, call (800) 877-7731 (U.S.) or (893) 773-5859 (Canada).

This device provides safety instructions and describes the specifications. Read this document carefully before use to ensure your safety and product performance.

**U.S.**

FCC Notice

Contains FCC ID: BKMAE-E207

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Changes or modifications not expressly approved by the party responsible for compliance could void the user’s authority to operate this equipment.

This transmitter must be located or operated in conjunction with any other antennas or transmitters. Properly shielded cables must be used for connections to any computer or projector as required by FCC/IC regulations.

This equipment is not intended to be used with wireless mice.

This device can be used with the WirelessHD Transmitter only. The transmitter must not be co-located or operating in conjunction with any other antennas or transmitters.

To purchase the WirelessHD Transmitter, visit epson.com/wirelesshd (U.S.) or epson.ca/wireless-hd (Canada).

For more information on using the remote control, see the online User’s Guide.
Viewing WirelessHD content (PowerLite Home Cinema 3600e)

1. Turn on your video device and begin playback.
2. Press the 3D Format button on the remote control, if necessary.
3. Slide the power switch on your 3D glasses to the On position.
4. If you have connected a television or other display to the output port on the transmitter and want to switch between wired and wireless display modes, press the Output button on the remote control or transmitter. The WirelessHD light on the transmitter will light up when the wireless display mode is active.
5. Press the WirelessHD button on the remote control.

For more information on using the remote control, see the online User’s Guide.

Viewing 3D images

To view 3D content, you must first connect a 3D-compatible video device to one of the HDMI ports on your projector. You will also need a pair of Epson RF 3D glasses (part number EP8000) or Epson-compatible RF 3D active shutter glasses (for use with PowerLite Home Cinema 3500/3510/3600e).

1. Turn on and begin playback on the 3D-compatible video device.
2. Press the 3D Format button on the remote control, if necessary.
3. Slide the power switch on your 3D glasses to the On position.

Note: If the glasses don’t automatically display 3D content, you may need to pair them with the projector. Move the glasses within 10 feet (3 m) of the projector, then press and hold the Pairing button on the remote control for at least 3 seconds. The status light on the glasses will alternately flash green and red, then remain green for 10 seconds if pairing is successful.

4. If 3D images aren’t displaying properly, check the following:
   - Press the 3D Format button to switch to 3D viewing mode, if necessary.
   - Make sure to wear the 3D glasses within 32 feet (10 m) of the projector.
   - Check that your video device and media are both 3D-compatible. Refer to the documentation that came with your video device for more information.
   - If WirelessHD content isn’t displaying properly, check the following:
     - If the Link light on the transmitter is off, if the light is flashing slowly, the transmitter could not connect with the projector and has entered standby mode. Verify that the projector is turned on and that all cables are properly connected as shown in the “Connect the WirelessHD Transmitter” section. Make sure you also need to press the Input button several times before the Link light turns on.
     - Make sure the WirelessHD Transmitter is within 32 feet (10 m) of the projector, is facing the front of the projector, isn’t obstructed by any large objects, and is not placed on a metal surface.
     - If you are viewing wireless content, make sure that the WirelessHD light on the transmitter is on. If it isn’t, press the Output button on the remote control or transmitter.
     - If the keypads correction feature doesn’t correct the image, make sure you first set the lens to the center-top position using the horizontal and vertical lens shift dials.

Where to get help

Manuals

For more information about using the projector, visit the Epson website, as described below.

Telephone support services

To use the Epson PrecisionCare Support service, call 866-805-7641. This service is available for the duration of your warranty period. You may also speak with a support specialist by calling Epson (800-270-3434) or (562) 981-3700 (Canada).

Support hours are 6 a.m. to 8 p.m., Pacific Time, Monday through Friday, and 7 a.m. to 4 p.m., Pacific Time, Saturday. Days and hours of support are subject to change without notice. If long-distance charges may apply.

Internet support

Visit epson.com/support (U.S.) or epson.ca/support (Canada) for solutions to common problems. You can download utilities and documentation, get FAQs and troubleshooting advice, or e-mail Epson.

Registration

Register today to get product updates and exclusive offers. You can use the CD included with your projector or register online at epson.com/webregister.

Optional accessories

For a list of optional accessories, see the online User’s Guide.

You can purchase RF 3D glasses (part number V12H5480E) or other accessories from an Epson authorized reseller. To find the nearest reseller, call 866-GO-EPSON (866-463-7766) or you can purchase online at epsonstore.com (U.S. sales) or epson.ca (Canadian sales).

Epson provides information as an additional service, and you may download and use it for your own personal use. However, you may not reproduce it, or distribute it to any third party, without the prior written consent from Epson.
