Choose from the following connections. See the sections below or the online User’s Guide for details.

**Computer**

- **USB port** Connect the square end of a USB cable to the projector’s USB-B (square) port. Connect the flat end of the cable to any USB port on your computer.

**Windows® XP or later:** After turning on the projector, follow the onscreen instructions to install the Epson® USB Display software (USB-DEVICE.EXE, only on first connection). If the software screen does not display automatically, open My Computer or Computer, then double-click EPSON PJ_UD USB Display appears in the Finder, double-click USB Display Install and follow the on-screen instructions to install the Epson USB Display software (only on first connection).

**OS X 10.5.8 or higher:** After turning on the projector, the setup folder for USB Display appears in the Finder, double-click USB Display Installer and follow the on-screen instructions to install the Epson USB Display software (only on first connection).

- **Computer port** Connect one end of a VGA cable to the projector’s Computer1 or Computer2 port, and the other end to your computer’s monitor port. If you are using a laptop, switch it to external display (see “Troubleshooting”). You can also connect an audio cable.

**HDMI port** Connect one end of an HDMI cable to the projector’s HDMI port and the other end to an HDMI port on your computer.

**Wired network** You can connect the projector to your network using an Ethernet cable. See “Project over a wired network” for instructions.

**Camera, USB device, or Epson DC-06 document camera**

Connect a digital camera, USB flash drive, USB storage device, or Epson DC-06 document camera to the projector’s USB-A (flat) port. If you connect a digital camera, USB flash drive, or USB storage device, you can use the projector’s PC Free feature. You can also connect other Epson document cameras to the projector. See the online User’s Guide for details.

**Adjust the image**

1. If you don’t see an image, press the Source Search button on the projector or the remote control to switch between them.

2. To raise the image, press the foot release button and lift the front of the projector. Release the button to lock the foot in position.

3. Press the Wide or Tele buttons on the projector to reduce or enlarge the image.

4. Turn the focus ring to sharpen the image.

5. If your image looks like \[
\text{ } \]

you may have tilted the projector off to one side of the walls at an angle. Place the projector directly in front of the center of the screen, facing the screen squarely. If you can’t move the projector, press the \[
\text{ } \]

or \[
\text{ } \]

button on the projector to open the keystone correction menu, then use the Wide or Tele buttons to correct the image.

6. If your image looks like \[
\text{ } \]

you can press the \[
\text{ } \]

or \[
\text{ } \]

button on the projector to correct it.

**Using the remote control**

Make sure the batteries are installed as shown (two AA batteries).

1. Turn projector on and off

2. Connect the wireless LAN module to the USB-A (flat) port.

3. To configure your projector for wireless projection, do one of the following:

   - If you’re using the optional Quick Wireless Connection USB key (Windows only; part number V12H105900), press the LAN button on the remote control. When you see SSID and IP address information on the screen, remove the wireless LAN module and connect the key to your projector’s USB-A port. Look for the displayed message, remove the key, and connect it to a USB port on your computer. Follow your computer’s on-screen instructions to install the drivers, then reconnect the wireless LAN module to the projector’s USB-A port. For details, see the online User’s Guide.

   - If you’re not using the key, continue with step 4.

**Project wirelessly from a computer**

Follow the steps here to connect the projector over a wireless network. You will need the optional wireless LAN module (part number V12H105812).

1. To install the optional wireless LAN module, first remove the screw as shown.

2. Connect the wireless LAN module to the USB-A (flat) port.

3. To configure your projector for wireless projection, do one of the following:

   - If you’re using the optional Quick Wireless Connection USB key (Windows only; part number V12H105900), press the LAN button on the remote control. When you see SSID and IP address information on the screen, remove the wireless LAN module and connect the key to your projector’s USB-A port. Look for the displayed message, remove the key, and connect it to a USB port on your computer. Follow your computer’s on-screen instructions to install the drivers, then reconnect the wireless LAN module to the projector’s USB-A port. For details, see the online User’s Guide.

   - If you’re not using the key, continue with step 4.

**Turn on your equipment**

1. Turn on your computer or video source.

2. Plug in the projector. The power light on the projector turns blue.

3. Press the \( \text{ } \) power button on the projector or remote control. The projector beeps, and the Status light flashes blue and then stays on.

**Video device**

Connect multiple video devices and use the Source Search button on the projector or remote control to switch between them.

**Note:** If you still see a blank screen or have other display problems, see the troubleshooting tips on the back of this sheet.

PowerLite® 520/525W/530/535W

Quick Setup
Before using the projector, make sure you read the safety instructions in the online User’s Guide.

Connect the projector
Choose from the following connections. See the sections below or the online User’s Guide for details.

Computer
USB port
Connect the square end of a USB cable to the projector’s USB-B (square) port.

Computer port
Connect one end of a VGA cable to the projector’s Computer port (only on first connection).

HDMI port
Connect one end of an HDMI cable to the projector’s HDMI port and the other end to your computer’s HDMI port.

Wide network
You can connect the projector to your network using an Ethernet cable. See Wired network for details.

Camera, USB device, or Epson DC-06 document camera
Connect a digital camera, USB flash drive, USB storage device, or Epson DC-06 document camera to the projector’s USB-A (flat) port.

USB port
Connect the flat end of the cable to any USB port on your computer.

Video device
Connect multiple video devices and use the Source Search button on the projector or remote control to switch between them.

Turn on your equipment
1 Turn on your computer or video source.
2 Plug in the projector. The power light on the projector turns blue.
3 Press the power button on the projector or remote control. The projector beeps, and the Status light flashes blue and then stays on.

Adjust the image
1 If you don’t see an image, press the Source Search button on the projector or the remote control to select the image source
Note: If you still see a blank screen or have other display problems, see the troubleshooting tips on the back of this sheet.
2 To raise the image, press the foot release button and lift the front of the projector. Release the button to lock the foot in position.
3 Press the Wide or Tele buttons on the projector to reduce or enlarge the image.
4 Turn the focus ring to sharpen the image.
5 If your image looks like , you may have placed the projector off to one side of the screen at an angle. Place the projector directly in front of the center of the screen, facing the screen squarely. If you can’t move the projector, press the  or  button on the projector to open the Keystone correction menu then use the Wide or Tele buttons to correct the image.
6 If your image looks like , you can press the  or  button on the projector to correct it.

Using the remote control
Make sure the batteries are installed as shown (two AA batteries).

1 Turn projector on and off.
2 Animate projector screen.
3 Turn off projector display.
4 Set solutions to common problems.

Project wirelessly from a computer
Follow the steps here to connect the projector over a wireless network. You will need the optional wireless LAN module (part number V12H418P12).

1 To install the optional wireless LAN module, first remove the screw as shown.
2 Connect the wireless LAN module to the USB-A (flat) port.
3 To configure your projector for wireless projection, do one of the following:
   • If you’re using the optional Quick Wireless Connection USB key (Windows only, part number V12H005M09), press the LAN button on the remote control. When you see SSD and IP address information on the screen, remove the wireless LAN module and connect the key to the projector’s USB-A port. Look for the displayed message, remove the key, and connect it to a USB port on your computer. Follow your computer’s on-screen instructions to install the drivers, then reconnect the wireless LAN module to the projector’s USB-A port. For details, see the online User’s Guide.
   • If you’re not using the key, continue with step 4.

Note: To shut down the projector, press the power button twice, then unplug it. You don’t have to wait for the projector to cool down.

4 The default language of the menu system is English. To select another language, press the Menu button on the projector or remote control. Select Extended and press  Select Language and press . Select your language and press . Press the Menu button to exit the menu system.

Common problems
If your image looks like , you can press the  or  button on the projector to correct it.

Note: If you still see a blank screen or have other display problems, see the troubleshooting tips on the back of this sheet.
Attach the wireless LAN module cover and secure it using the screw you removed.

Press the Menu button on the remote control, select the Network menu, and press Esc.

Choose Network Configuration and press Esc.

Select the Wireless LAN menu and press Esc.

Choose Connection Mode, press Esc, select Quick (for a direct connection to a computer, tablet, or smartphone) or Advanced (for a connection to a router or access point), then press Esc again. When you're finished, press Esc to return to the Wireless LAN menu.

If you chose the Advanced connection mode, select Search Access Point, press Esc, and select your network from the list. If your network does not appear on the list, select SSID, press Esc, and enter your network name (SSID) on the screen that appears.

Select Network Configuration and press Esc.

Select the Basic menu and press Esc.

Select the Projector Name setting and enter a name (up to 16 characters long) to identify your projector over the network.

Use the displayed keyboard to enter characters. Press the arrow buttons on the remote control to highlight the characters and press Esc to select them.

Note: See the online User's Guide for information on adding passwords.

Select the Wired LAN menu and press Esc.

Choose IP Settings and press Esc.

If you're finished selecting settings in the Wireless LAN menu, press Esc.

If you're connecting the projector to a secure network, select the Security menu and press Esc. Then set settings and press Esc when you are finished.

Select Completes and press Esc, then select Yes and press Esc again to save your settings.

Now you’re finished, select Completes and press Esc, then press Esc again to save your settings.

Press the Menu button to exit the menu system.

See "Install network software" for additional instructions.

**Project over a wired network**

Follow the steps here to configure your projector for your wired network using the projector's menu system.

1. Plug in and turn on the projector.
2. Press the Menu button on the remote control, select the Network menu, and press Esc.
4. Select the Basic menu and press Esc.
5. Select the Projector Name setting and enter a name (up to 16 characters long) to identify your projector over the network.
6. Use the displayed keyboard to enter characters. Press the arrow buttons on the remote control to highlight the characters and press Esc to select them.

Note: See the online User's Guide for information on adding passwords.

7. Choose IP Settings and press Esc.
8. If your network assigns addresses automatically, turn on the DHCP setting. If not, turn off the DHCP setting and enter the projector’s IP Address, Subnet Mask, and Gateway Address, as needed. Then press Esc.
9. To prevent the IP address from appearing on the network standby screen, set the IP Address Display setting to Off.
10. When you are finished, select Completes and press Esc, then press Esc again to save your settings.
11. Press the Menu button to exit the menu system.
12. See "Install network software" for additional instructions.

**Install network software**

**Computer**

Install the EasyMP Network Projection software on each computer that will project over the network. Use the CD labeled EasyMP Projector Software to install the program.

For instructions on installing and using your network software, click the icon on your desktop to access the online EasyMP Network Projection Operation Guide (requires an Internet connection). If you don’t see the EasyMP Network Projection Guide icon, you can install it from the projector CD or go to the Epson website, as described on the right.

To monitor and control your projector over the network, download and install the EasyMP Monitor software and manual from the Epson support website. You can install a link to the downloads page from the projector CD or go to the Epson website, as described on the right.

**Mobile device**

To project from an iOS or Android™ device, download and install the Epson projection app. Visit epson.com/projectorapp (U.S.) or epson.ca/projectorapp (Canada) for more information.

**Troubleshooting**

If you see a blank screen or the No signal message after turning on your computer or video device, check the following:

- Make sure the Status light on the projector is blue and not flashing.
- Press the Source Search button on the projector or the remote control to switch to the correct image source, if necessary.
- If you’re using a Windows laptop, press the function key on your keyboard that lets you display on an external monitor. It may be labeled CRT/ LCD or have an icon such as [ ] . You may have to hold down the fn key while pressing the key (such as fn + F3). Wait a moment for the display to appear.
- If you’re using a Mac laptop, open System Preferences and select Displays. Click the Arrangement tab and select the Mirror Displays checkbox.

For a list of optional accessories, see the online User’s Guide. You can purchase screens or other accessories from an Epson authorized reseller. To find the nearest reseller, call 888-GO-EPSON (888-463-7766) or you can purchase online at epsonstore.com (U.S. sales) or epson.ca (Canadian sales).

Where to get help

**Manuals**

For more information about using the projector, click the icons on your desktop to access the online manuals (requires an Internet connection). If you don’t have icons to the manuals, you can install them from the projector CD or go to the Epson website, as described below.

**Telephone support services**

To use the Epson PrivateLine support service, call (800) 637-7665. This service is available for the duration of your warranty period. You may also speak with a support specialist by calling (562) 270-8808 (U.S.) or (905) 709-3600 (Canada). Support hours are 6 am to 8 pm, Pacific Time, Monday through Friday, and 7 am to 4 pm, Pacific Time, Saturday. Days and hours of support are subject to change without notice. Toll or long distance charges may apply.

**Internet support**

Visit epson.com/support (U.S.) or epson.ca/support (Canada) for solutions to common problems. You can download utilities and documentation, get FAQs and troubleshooting advice, or e-mail Epson.

**Registration**

Register today to get product updates and exclusive offers. You can use the CD included with your projector or register online at epson.com/webreg.

**Optional accessories**

For a list of optional accessories, see the online User’s Guide. You can purchase screens or other accessories from an Epson authorized reseller. To find the nearest reseller, call 888-GO-EPSON (888-463-7766). Or you can purchase online at epsonstore.com (U.S. sales) or epson.ca (Canadian sales).

**Epson Support**

For more information, call the support phone numbers listed below.

USA: 800-GO-EPSON (800-463-7766)
Canada: 800-463-7766

Respond: (562) 270-8808

Fax: (562) 270-2389

Hours of Support

Monday to Friday: 6 am to 8 pm, Pacific Time
Saturday: 7 am to 4 pm, Pacific Time

Online Support

Visit epson.com/support (U.S.) or epson.ca/support (Canada) for solutions to common problems. You can download software and documentation, get FAQs and troubleshooting advice, or e-mail Epson.

Purchase Epson accessories and supplies from an Epson authorized reseller. To find the nearest reseller, call 888-GO-EPSON (888-463-7766). Or you can purchase online at epsonstore.com (U.S. sales) or epson.ca (Canada).

**Support hours**

USA and Canada: Mon-Fri: 6 am to 8 pm, Sat: 7 am to 4 pm, Pacific Time
For more information, call the support phone numbers listed below.

Toll or long distance charges may apply.

**Internet support**

Visit epson.com/support (U.S.) or epson.ca/support (Canada) for solutions to common problems. You can download utilities and documentation, get FAQs and troubleshooting advice, or e-mail Epson.

**Registration**

Register today to get product updates and exclusive offers. You can use the CD included with your projector or register online at epson.com/webreg.

**Optional accessories**

For a list of optional accessories, see the online User’s Guide. You can purchase screens or other accessories from an Epson authorized reseller. To find the nearest reseller, call 888-GO-EPSON (888-463-7766). Or you can purchase online at epsonstore.com (U.S. sales) or epson.ca (Canadian sales).
To select a number or character, use the arrow buttons on the remote control to highlight it, then press the corresponding button.

To enter numbers, use the arrow buttons on the remote control to highlight the characters and press the corresponding button to select them.

Note: See the online User's Guide for information on adding passwords.

5 Select the Projector Name setting and enter a name (up to 16 characters long) to identify your projector over the network.

Use the displayed keyboard to enter characters. Press the arrow buttons on the remote control to highlight the characters and press the corresponding button to select them.

6 Select the Wired LAN menu and press Enter.

7 Choose IP Settings and press Enter.

8 If your network assigns addresses automatically, turn on the DHCP setting. If not, turn off the DHCP setting and enter the projector’s IP Address, Subnet Mask, and Gateway Address, as needed. Then press Enter.

9 To prevent the IP address from appearing on the network standby screen, set the IP Address Display setting to Off.

10 When you are finished, select Complete and press Enter, then press Esc again to save your settings.

11 Press the Menu button to exit the menus.

12 See “Install network software” for additional instructions.

Install network software

Computer

Install the EasyMP® Network Projection software on each computer that will project over the network. Use the CD labeled Epson Projector Software to install the program.

For instructions on installing and using your network software, click the icon on your desktop to access the online EasyMP Network Projection Operation Guide (requires an Internet connection). If you don’t see the EasyMP Network Projection Guide icon, you can install it from the projector CD or go to the Epson website, as described on the right.

To monitor and control your projector over the network, download and install the EasyMP Monitor software and manual from the Epson support web site. You can install a link to the download page from the projector CD or go to the Epson website, as described on the right.

Mobile device

To project from an iOS or Android™ device, download and install the Epson Projection™ app. Visit epson.com/projectorapp (U.S.) or epson.ca/projectorapp (Canada) for more information.

Troubleshooting

If you see a black screen or the No signal message after turning on your computer or video device, check the following:

Make sure the Status light on the projector is blue and not flashing.

Press the Source Search button on the projector or the remote control to switch to the correct image source, if necessary.

If you’re using a Windows laptop, press the function key on your keyboard that lets you display on an external monitor. It may be labeled CRT/LCD or have an icon such as . You may have to hold down the key while pressing it (such as for CRT). Wait a moment for the display to appear.

If you’re using a Mac laptop, open System Preferences and select Displays: Click the Arrangement tab and select the Mirror Displays checkbox.

Optional accessories

For a list of optional accessories, see the online User’s Guide.

You can purchase accessories or other accessories from an Epson authorized reseller. To find nearest reseller, call 888-GO-EPSON (888-463-7766). Or you can purchase online at epsonstore.com (U.S. sales) or epson.ca (Canadian sales).
