Quick Setup

Before using the projector, make sure you read the safety instructions in the online User's Guide.

Connect the projector

Choose from the following connections. See the sections below or the online User's Guide for details.

Computer

USB port

Connect the square end of a USB cable to the projector’s USB-B (square) port. Connect the flat end of the cable to any USB port on your computer.

Windows® XP or later: After turning on the projector, follow the on-screen instructions to install the Epson® USB Display software (EMP_USSD.EXE; only on first connection). If the software screen does not display automatically, open My Computer or Computer, then double-click EPSON PJ UD.

OS X 10.5.8 or higher: After turning on the projector, the setup folder for USB Display appears in the Finder. Double-click USB Display Installer and follow the on-screen instructions to install the Epson USB Display software (only on first connection).

Note: If you have problems installing the USB Display software, make sure the USB Type B setting in the projector’s Extended menu is set to USB Display. See the online User’s Guide for instructions.

Camera, USB device, or Epson DC-06 document camera

Connect a digital camera, USB flash drive, USB storage device, or Epson DC-06 document camera to the projector’s USB-A (flat) port.

If you connect a digital camera, USB flash drive, or USB storage device, you can use the projector’s PC Free feature. You can also connect other Epson document cameras to the projector. See the online User’s Guide for details.

Video device

Connect multiple video devices and use the Source Search button on the projector or the remote control to switch between them.

Mobile media device

Connect tablets, smartphones, and other devices that support the MHL™ standard to the HDMI/MHL port.

Some devices may require an adapter or may not require an MHL cable. Not all features or functions may be supported. Check your device’s documentation for more information.

Turn on your equipment

1. Turn on your computer or video source.
2. Plug in the projector. The power light on the projector turns blue.
3. Open the A/V Mute slide all the way.
4. Press the power button on the projector or remote control. The projector beeps, the Status light flashes blue, and then stays on.

Note: To shut down the projector, press the power button twice, then unplug it. You don’t have to wait for the projector to cool down.

5. Use the arrow buttons on the remote control to highlight any of the options on the Home screen that appears, then press to select it. You can display a QR code, switch between projection sources, and quickly access various adjustment options from this screen.

Adjust the image

1. If you don’t see an image, press the Source Search button on the projector or the remote control to select the image source. Note: If you still see a blank screen or have other display problems, see the troubleshooting tips on the back of this sheet.
2. To raise the image, press the foot release button and lift the front of the projector. Release the button to lock the foot in position.

Project wirelessly

Follow the steps here to connect the projector over a wireless network. With the EX3240, you will need the optional wireless LAN module (part number V12H731P02). If you’re projecting from a computer, it must have a wireless card or built-in wireless interface, and be running Windows 8, Windows 7, Windows Vista®, Windows XP Professional x64, or Windows XP, or OS X 10.5.8 to 10.10.x.

Note: If you’re using the optional Quick Wireless Connection USB key (Windows only, part number V12H005M09), press the LAN button on the remote control. When you see SSID and IP address information on the screen, connect the key to the projector’s USB-A port. Look for the displayed message, remove the key, and connect it to a USB port on your computer. Follow the on-screen instructions on your computer to install the driver. For details, see the online User’s Guide.

1. Press the Menu button on the remote control, select the Network menu, and press .
2. Choose Network Configuration and press .

Using the remote control

Make sure the batteries are installed as shown (two AA batteries).

Before using the projector, make sure you read the safety instructions in the online User’s Guide.
Quick Setup

Before using the projector, make sure you read the safety instructions in the online User's Guide.

Connect the projector

Choose from the following connections. See the sections below or the online User’s Guide for details.

Computer

USB port
Connect the square end of a USB cable to the projector’s USB-B (square) port. Connect the flat end of the cable to any USB port on your computer.

Windows® XP or later: After turning on the projector, the setup folder for the projector’s USB-A (flat) port.

OS X 10.5.8 or higher: After turning on the projector, the setup folder for the projector’s USB-A (flat) port.

Note: If you have problems installing the USB Display software, make sure the USB Type B setting in the projector’s Extended menu is set to USB Display. See the online User’s Guide for instructions.

Computer port
Connect one end of a VGA cable to the projector’s Computer port, and the other end to your computer’s monitor port. If you are using a laptop, switch it to external display (see “Troubleshooting”). You can also connect an audio cable.

HDMI port
Connect one end of an HDMI cable to the projector’s HDMI port and the other end to an HDMI port on your computer.

Video device
Connect multiple video devices and use the Source Search button on the projector or the remote control to switch between them.

Mobile media device
Connect tablets, smartphones, and other devices that support the MHL™ standard to the HDMI/MHL port.

Some devices may require an adapter or may not require an MHL cable. Not all features or functions may be supported. Check your device’s documentation for more information.

Camera, USB device, or Epson DC-06 document camera
Connect a digital camera, USB flash drive, USB storage device, or Epson DC-06 document camera to the projector’s USB-A (flat) port.

If you connect a digital camera, USB flash drive, or USB storage device, you can use the projector’s PC Free feature. You can also connect other Epson document cameras to the projector. See the online User’s Guide for details.

Turn on your equipment

1 Turn on your computer or video source.
2 Plug in the projector. The power light on the projector turns blue.
3 Open the A/V Mute slide all the way.
4 Press the power button on the projector or remote control. The projector beeps, the Status light flashes blue, and then stays on.

Note: To shut down the projector, press the power button twice, then unplug it. You don’t have to wait for the projector to cool down.

5 Use the arrow buttons on the remote control to highlight any of the options on the Home screen that appears, then press OK to select it. You can display a QR code, switch between projection sources, and quickly access various adjustment options from this screen.

Using the remote control

Make sure the batteries are installed as shown (two AA batteries).

Select the Wireless LAN menu and press OK.
2 Choose Network Configuration and press OK.
3 Press the Menu button on the remote control, select the Network menu, and press O.K.
4 Turn the focus ring to sharpen the image.
5 If your image looks like or , you may have placed the projector off to one side of the screen at an angle. Place the projector directly in front of the center of the screen, facing the screen squarely. If you can’t move the projector, use the horizontal keystone slider on the projector to correct the image shape.
6 Your projector automatically adjusts images that look like or , but if necessary you can press the or button on the projector to correct it.

Adjust the image

1 If you don’t see an image, press the Source Search button on the projector or the remote control to select the image source.
2 To raise the image, press the foot release button and lift the front of the projector. Release the button to lock the foot in position.

Project wirelessly

Follow the steps here to connect the projector over a wireless network. With the EX3240, you will need the optional wireless LAN module (part number V12H731P02).

If you’re projecting from a computer, it must have a wireless card or built-in wireless interface, and be running Windows 8, Windows 7, Windows Vista®, Windows XP Professional x64, or Windows XP, or OS X 10.5.8 to 10.10.

Note: If you’re using the optional Quick Wireless Connection USB key (Windows only, part number V12H730M02), press the LAN button on the remote control. When you see SSID and IP address information on the screen, connect the key to the projector’s USB-A port. Look for the displayed message, remove the key, and connect it to a USB port on your computer. Follow the on-screen instructions on your computer to install the driver. For details, see the online User’s Guide.

Press the Menu button on the remote control, select the Network menu, and press O.K.
2 Choose Network Configuration and press O.K.
3 Press the Menu button on the remote control, select the Network menu, and press O.K.
4 Turn the focus ring to sharpen the image.
5 If your image looks like or , you may have placed the projector off to one side of the screen at an angle. Direct wireless connection
Make sure your device and Epson projector are not connected to a network and your Epson projector's Connection Mode is set to Quick.

1. Tap Projection on your device's Home screen.
2. Tap Projector to open the Search Projector menu.
3. Tap Read QR code.
4. Point your device's camera at the QR code your projector displays; the QR code is read automatically.
5. Tap OK to register your projector's Wi-Fi profile.
6. Tap Install to install your projector's Wi-Fi profile.
7. Tap Install Now at the Unsynchronized Profile notification.
8. Tap Done to exit the Profile Installed screen.
9. Tap OK to confirm the connection to the projector.
10. Note the projector network name (SSID) shown on your device's screen. Then go to the Wi-Fi settings on your device to select that network. Your device and Epson projector are now connected.

Network connection
Make sure your projector and mobile device are connected to the same network.

1. Tap Projection on your device's Home screen.
2. Tap Projector to open the Search Projector menu.
3. Tap Read QR code.
4. Point your device's camera at the QR code your projector displays; the QR code is read automatically.

Troubleshooting
If you see a black screen or the No signal message after turning on your computer or video device, check the following:
- Make sure the Status light on the projector is blue and not flashing, and the A/V Mute slide is open.
- Press the Source Search button on the projector or the remote control to switch to the correct image source, if necessary.
- If you're using a Windows laptop, press the function key on your keyboard that lets you display on an external monitor. It may be labeled CRT/PC or have an icon such as

Where to get help
Manuals
For more information about using the projector, click the icons on your desktop to access the online manuals (requires an Internet connection). If you don't see icons to the manuals, you can install them from the projector CD or go to the Epson website, as described below.

Telephone support services
To use the Epson PrivateLine® Support service, call (800) 637-7661. This service is available for the duration of your warranty period. You may also speak with a support specialist by calling (952) 276-4394 (U.S.) or (952) 709-3839 (Canada).

Support hours are 6 AM to 8 PM, Pacific Time, Monday through Friday, and 7 AM to 4 PM, Pacific Time, Saturday. Days and hours of support are subject to change without notice. Toll or long distance charges may apply.

Internet support
Visit epson.com/support (U.S.) or epson.ca/support (Canada) for solutions to common problems. You can download utilities and documentation, get FAQs and troubleshooting advice, or e-mail Epson.

Registration
Register today to get product updates and exclusive offers. You can use the CD included with your projector or register online at epson.com/webreg.

Project wirelessly from a mobile device
You can connect your mobile device and projector using Epson Projection™ or a QR code. Make sure the wireless LAN module is installed in your projector and the latest version of Epson Projection is installed on your device.

Install the Epson iProjection app
To project from an iOS or Android™ device, download and install the Epson iProjection app.
Visit epson.com/projectorapp (U.S.) or epson.ca/projectorapp (Canada) for more information.
Direct wireless connection

Make sure your device and Epson projector are not connected to a network and your Epson projector’s Connection Mode is set to Quick.

1. Tap Projection on your device’s Home screen.
2. Tap Projector to open the Search Projector menu.
3. Tap Read QR code.
4. Point your device’s camera at the QR code your projector displays; the QR code is read automatically.
5. Tap OK to register your projector’s Wi-Fi profile.
6. Tap Install to install your projector’s Wi-Fi profile.
7. Tap Install Now at the Unsigned Profile notification.
8. Tap Done to exit the Profile Installed screen.
9. Tap OK to confirm the connection to the projector.
10. Note the projector network name (SSID) shown on your device’s screen.

Your device and Epson projector are now connected.

Network connection

Make sure your projector and mobile device are connected to the same network.

1. Tap Projection on your device’s Home screen.
2. Tap Projector to open the Search Projector menu.
3. Tap Read QR code.
4. Point your device’s camera at the QR code your projector displays; the QR code is read automatically.

Your device and Epson projector are now connected.

Troubleshooting

If you see a blank screen or the No signal message after turning on your computer or video device, check the following:

• Make sure the Status light on the projector is blue and not flashing, and the A/V Mute slide is open.
• Press the Source Search button on the projector or the remote control to switch to the correct image source, if necessary.
• If you’re using a Windows laptop, press the function key on your keyboard that lets you display on an external monitor. It may be labeled CRT/LCD or have an icon such as
