Quick Setup

Before using the projector, make sure you read the safety instructions in the online User’s Guide.

Connect the projector

Choose from the following connections. See the sections below or the online User’s Guide for details.

Computer

- **USB port**: Connect the square end of a USB cable to the projector’s USB-B (square) port and the other end to your computer. If you connect a digital camera, USB flash drive, or USB storage device, you can use the projector’s PC Free feature. You can also connect other Epson document cameras to the projector. See the online User’s Guide for instructions.
- **HDMI port**: Connect one end of an HDMI cable to the projector’s HDMI port and the other end to your computer. If you're projecting from a computer, it must have a wireless card or built-in wireless interface, and be running Windows 8, Windows 7, Windows Vista®, Windows XP Professional x64, or Windows XP, or OS X 10.5.8 to 10.10.x. Follow the steps here to connect the projector over a wireless network. With the PowerLite 1224, you will need the optional wireless LAN module (part number V12H73P702).

Camera, USB device, or Epson DC-06 document camera

Connect a digital camera, USB flash drive, USB storage device, or Epson DC-06 document camera to the projector’s USB-A (flat) port.

- **Audio cable**: Connect one end of an audio cable to the projector’s audio port and the other end to your computer. You can use the projector’s PC Free feature. You can also connect other Epson document cameras and Epson projectors to the projector. See the online User’s Guide for instructions.
- **USB Type B**: Connect one end of a USB cable to the projector’s USB-B (square) port and the other end to your computer. If you connect a digital camera, USB flash drive, or USB storage device, you can use the projector’s PC Free feature. You can also connect other Epson document cameras and Epson projectors to the projector.

Video device

Connect multiple video devices and use the Source Search button on the projector or the remote control to switch between them.

- **Component video to VGA cable**
- **RCA video cable (composite video)**
- **HDMI cable**
- **USB cable**

Adjust the image

1. If you don’t see an image, press the Source Search button on the projector or the remote control to select the image source.

2. To raise the image, press the foot release button and lift the front of the projector. Release the button to lock the foot in position.

3. To reduce or enlarge the image, turn the zoom ring.

4. Turn the focus ring to sharpen the image.

5. Use the arrow buttons on the remote control to highlight any of the options on the Home screen that appears, then press the button to select it. You can display a QR code, switch between projection sources, and quickly access various adjustment options from this screen.

Turn on your equipment

1. Turn on your computer or video source.

2. Plug in the projector. The power light on the projector turns blue.

3. Open the A/V Mute slide all the way.

4. Press the power button on the projector or remote control. The projector beeps, the Status light flashes blue, and then stays on.

5. If your image looks like or , you may have placed the projector off to one side of the screen at an angle. Place the projector directly in front of the center of the screen, facing the screen squarely. If you can’t move the projector, use the keystone slider on the projector to correct the image shape.

6. Your projector automatically adjusts images that look like or . If necessary, you can press the button on the projector to correct it.

Using the remote control

Make sure the batteries are installed as shown (two AA batteries).

1. Press the Menu button on the remote control, select the Wireless LAN menu, and press .

2. Choose Network Configuration and press .

4. Choose Connection Mode, press , select Quick (for a direct connection to a computer, tablet, or smartphone) or Advanced (for a connection to a router or access point), then press .

5. Open the Network Access Point menu, press , and select your network.

6. Turn on your computer or video source.

7. For more information on using the remote control, see the online User’s Guide.

Project wirelessly

Follow the steps here to connect the projector over a wireless network. With the PowerLite 1224, you will need the optional wireless LAN module (part number V12H73P702).

If you’re projecting from a computer, it must have a wireless card or built-in wireless interface, and be running Windows 8, Windows 7, Windows Vista®, Windows XP Professional x64, or Windows XP, or OS X 10.5.8 to 10.10.x.

1. Press the Menu button on the remote control, select the Network menu, and press .

2. Choose Network Configuration and press .

4. Choose Connection Mode, press , select Quick (for a direct connection to a computer, tablet, or smartphone) or Advanced (for a connection to a router or access point), then press again. When you’re finished, press Esc to return to the Wireless LAN menu.
Quick Setup

Before using the projector, make sure you read the safety instructions in the online User’s Guide.

Connect the projector

Choose from the following connections. See the sections below or the online User’s Guide for details.

**Computer**

**USB port**
- Connect the square end of a USB cable to the projector’s USB-B (square) port.
- Connect the flat end of the cable to any USB port on your computer.
- If you have problems installing the USB Display software, make sure the EPSON Pj_UD USB cable is connected to the projector.

**HDMI port**
- Connect one end of an HDMI cable to the projector’s HDMI port and the other end to your computer’s HDMI port, and the PC Free feature.
- If you see a blank screen or have other display problems, see the troubleshooting tips on the back of this sheet.

**Camera, USB device, or Epson DC-06 document camera**
- Connect a digital camera, USB flash drive, USB storage device, or Epson DC-06 document camera to the projector’s USB-A (flat) port.

**Video device**
- Connect multiple video devices and use the Source Search button on the projector or the remote control to switch between them.

Mobile media device (PowerLite 1264 only)
- Connect tablets, smartphones, and other devices that support the MHL™ standard to the HDMI/MHL port.

If you connect a digital camera, USB flash drive, or USB storage device, you can use the projector’s PC Free feature. You can also connect other Epson document cameras to the projector. See the online User’s Guide for details.

Turn on your equipment

1. Turn on your computer or video source.
2. Plug in the projector. The power light on the projector turns blue.
3. Open the A/V Mute slide all the way.
4. Press the power button on the projector or remote control. The projector beeps, the Status light flashes blue, and then stays on.
5. Use the arrow buttons on the remote control to highlight any of the options on the Home screen that appears, then press  to select it. You can display a QR code, switch between projection sources, and quickly access various adjustment options from this screen.

Adjust the image

1. If you don’t see an image, press the Source Search button on the projector or the remote control to select the image source.
   - Note: If you still see a blank screen or have other display problems, see the troubleshooting tips on the back of this sheet.
2. To raise the image, press the foot release button and lift the front of the projector. Release the button to lock the foot in position.
3. To reduce or enlarge the image, turn the zoom ring.
4. Turn the focus ring to sharpen the image.
5. If your image looks like or you may have placed the projector off to one side of the screen at an angle. Place the projector directly in front of the center of the screen, facing the screen squarely. If you can’t move the projector, use the horizontal keystone slider on the projector to correct the image shape.
6. Your projector automatically adjusts images that look like or . But if necessary you can press the or button on the projector to correct it.

Using the remote control

Make sure the batteries are installed as shown (two AA batteries).

1. Press the Menu button on the remote control, select the Network menu, and press 2.
4. Choose Connection Mode, press 2, select Quick (for a direct connection to a computer, tablet, or smartphone) or Advanced (for a connection to a router or access point), then press 2 again. When you’re finished, press Esc to return to the Wireless LAN menu.

For more information on using the remote control, see the online User’s Guide.

Project wirelessly

Follow the steps here to connect the projector over a wireless network. With the PowerLite 1224, you will need the optional wireless LAN module (part number V12H719012).

1. If you’re projecting from a computer, it must have a wireless card or built-in wireless interface, and be running Windows 8, Windows 7, Windows Vista®, Windows XP Professional 64, or Windows XP, or OS X 10.5.8 to 10.10.x.
2. Press the Menu button on the remote control, select the Network menu, and press 2.
5. Choose Connection Mode, press 2, select Quick (for a direct connection to a computer, tablet, or smartphone) or Advanced (for a connection to a router or access point), then press 2 again. When you’re finished, press Esc to return to the Wireless LAN menu.

1224/1264
Direct wireless connection
Make sure your device and Epson projector are not connected to a network and your Epson projector’s Connection Mode is set to Quick.

1. Tap [Projection] on your device’s Home screen.
2. Tap [Projector] to open the Search Projector menu.
3. Tap Read QR code.
4. Point your device’s camera at the QR code on your projector’s display; the QR code is read automatically.
5. Tap [OK] to register your projector’s Wi-Fi profile.
6. Tap [Install] to install your projector’s Wi-Fi profile.
7. Tap [Install Now] at the Unsigned Profile notification.
8. Tap [Done] to exit the Profile Installed screen.
9. Tap [OK] to confirm the connection to the projector.
10. Note the projector network name (SSID) shown on your device’s screen. Then go to the Wi-Fi settings on your device to select that network.

Network connection
Make sure your projector and mobile device are connected to the same network.

1. Tap [Projection] on your device’s Home screen.
2. Tap [Projector] to open the Search Projector menu.
3. Tap Read QR code.
4. Point your device’s camera at the QR code on your projector’s display; the QR code is read automatically.

Your device and Epson projector are now connected.

Troubleshooting
If you see a blank screen or the No signal message after turning on your computer or video device, check the following:

• Make sure the Status light on the projector is blue and not flashing, and the A/V Mute slide is open.
• Press the Source Search button on the projector or the remote control to switch to the correct image source, if necessary.
• If you’re using a Windows laptop, press the function key on your keyboard that lets you display on an external monitor. It may be labeled CRT/LCD or have an icon such as . You may have to hold down the Fn key while pressing it (such as Fn + F7). Wait a moment for the display to appear.
• If you’re using a Mac laptop, open System Preferences and select Displays. Click the Arrangement tab and select the Mirroring Displays checkbox.

Project wirelessly from a mobile device
You can connect your mobile device and projector using Epson Projection™ and a QR code. Make sure the latest version of Epson Projection is installed on your device and the optional wireless LAN module is installed in your projector with the PowerLite 1224.

Install the Epson iProjection app
To project from an iOS or Android® device, download and install the Epson iProjection app. Visit epson.com/projectorapp (U.S.) or epson.ca/projectorapp (Canada) for more information.

Where to get help
Manuals
For more information about using the projector, click the icons on your desktop to access the online manuals (requires an Internet connection). If you don’t see icons to the manuals, you can install them from the projector CD or go to the Epson website, as described below.

Telephone support services
To use the Epson® PrivateLine® Support service, call (800) 637-7661. This service is available for the duration of your warranty period. You may also speak with a support specialist by calling (962) 276-4394 (U.S.) or (905) 709-3839 (Canada).

Support hours are 6 AM to 8 PM, Pacific Time, Monday through Friday, and 7 AM to 4 PM, Pacific Time, Saturday. Days and hours of support are subject to change without notice. Toll or long distance charges may apply.

Internet support
Visit epson.com/support (U.S.) or epson.ca/support (Canada) for solutions to common problems. You can download utilities and documentation, get FAQs and troubleshooting advice, or e-mail Epson.

For more information on wireless projection, visit epson.com/wirelessprojectors.

Registration
Register today to get product updates and exclusive offers. You can use the CD included with your projector or register online at epson.com/wsbreg.

Optional accessories
For a list of optional accessories, see the online User’s Guide.

You can purchase screens or other accessories from an Epson authorized reseller.

To find the nearest reseller, call 800-GO-EPSON (800-463-7766). Or you can purchase online at epsonstores.com (U.S. sales) or epson.ca (Canadian sales).

Wireless notice (PowerLite 1264 only)
Contains wireless LAN 802.11ghz module
Model: WLT1262EP
This document provides safety instructions and describes the specifications. Read this document carefully before use to ensure your safety and product performance.

The grantee is not responsible for any changes or modifications not expressly approved by the party responsible for compliance. Such modifications could void the user’s authority to operate the equipment. This equipment should be installed and operated keeping the radiator at least 7.9 inches (20 cm) or more away from person’s body. This device is restricted to indoor operations only.
