Your Ink Tank System

You should visually check the ink levels in the product's ink tanks regularly. For optimum printing results, refill the ink tanks to the upper line at least once a year.

![Image of ink tank system]

**Note:** The product has a low ink alert system. The accuracy of this system depends on the user refilling the ink tanks correctly. The product cannot directly measure the ink levels in the tanks; instead it estimates the amount of ink remaining by internally monitoring ink usage. The low ink alert system may generate inaccurate messages if the ink tanks are not refilled according to these instructions. Visualy check the ink levels in the product's ink tanks to confirm the actual ink levels. Continued use of the product when the ink is expended could damage the product.

To refill the ink tanks and reset the ink levels, click the link below.

Using Eco Mode and Other Power Saving Settings

Your product enters sleep mode automatically and turns off the LCD screen if it is not used for a period of time. You can make the time period shorter and select other options to save energy and resources.

Changing the Eco Settings
Changing the Sleep Timer Settings
Changing the Power Off Timer Settings

Parent topic: Product Basics
Changing the Eco Settings

You can use the product control panel to change the Eco settings.

**Note:** The Sleep Timer setting in Eco Mode overrides the Sleep Timer setting in Common Settings. This setting can be locked by an administrator. If you cannot access or change this setting, contact your administrator for assistance.

1. Press the up or down arrow button, select **Eco Mode**, and press the **OK** button.
   
   You see a screen like this:

   ![Eco Mode settings screen]

2. Select **On** and press the **OK** button.
3. Press the up arrow button to select **Yes**.
4. Change the settings as necessary.
5. Press the **OK** button to exit.

You see the **eco** icon in the corner of the LCD screen to indicate that Eco settings are enabled.

**Parent topic:** Using Eco Mode and Other Power Saving Settings

Changing the Sleep Timer Settings

You can adjust the time period before your product enters sleep mode and turns off the LCD screen.

**Note:** The Sleep Timer setting in Eco Mode overrides the Sleep Timer setting in Common Settings. This setting can be locked by an administrator. If you cannot access or change this setting, contact your administrator for assistance.

1. Press the up or down arrow button, select **Setup**, and press the **OK** button.
2. Press the down arrow button, select **Common Settings**, and press the **OK** button.
3. Press the down arrow button, select **Sleep Timer**, and press the **OK** button.

You see a screen like this:

![Common Settings](image)

4. Use the numeric keypad to enter the number of minutes.
5. Press the left or right arrow button to move the cursor as necessary.
6. Press the **OK** button.

**Parent topic:** [Using Eco Mode and Other Power Saving Settings](#)

### Changing the Power Off Timer Settings

You can have the product turn off automatically if it is not used for a specified period of time.

**Note:** This setting can be locked by an administrator. If you cannot access or change this setting, contact your administrator for assistance.

1. Press the down arrow button, select **Setup**, and press the **OK** button.

You see a screen like this:

![Setup](image)

---

26
2. Press the down arrow button, select **Common Settings**, and press the **OK** button.
3. Press the down arrow button, select **Power Off Timer**, and press the **OK** button.
4. Press the down arrow button to select a time period between **30 minutes** and **12h** (12 hours), and press the **OK** button.
5. Press the ⏪ home button to exit.

**Parent topic:** Using Eco Mode and Other Power Saving Settings

### Epson Connect Solutions for Smartphones, Tablets, and More

You can print documents, photos, emails, and web pages from your home, office, or even across the globe. You can use your smartphone, tablet, or computer. Epson offers these solutions to print from anywhere: Epson Email Print, Epson iPrint Mobile App, Epson Remote Print, and Epson Scan to Cloud.

- Using Epson Email Print
- Using the Epson iPrint Mobile App
- Using Epson Remote Print
- Using Epson Scan to Cloud

**Parent topic:** Product Basics

**Related tasks**

- Using the Mopria Print Service

### Using Epson Email Print

With Epson Email Print, you can print from any device that can send email, such as your smartphone, tablet, or laptop. Just activate your product's unique email address. When you want to print, attach a PDF, Microsoft Office document, or photo to an email and send it to your product.

1. Set up your product for network printing. See the link below.
2. If you did not already set up Email Print when you installed your product software, visit latin.epson.com/connect (website available in Spanish only) to learn more about Email Print, check compatibility, and get detailed setup instructions.
3. Send an email with attachments to your product's Email Print address.

**Note:** Both the email and any attachments print by default. You can change these printing options by logging into your Epson Connect account.
Using the Epson iPrint Mobile App

Use this free Apple and Android app to print to nearby Epson networked products. The Epson iPrint Mobile App lets you print PDFs, Microsoft Office documents, photos, and web pages over a wireless network. You can even scan and save a file on your device, send it as an email, or upload it to an online service such as Box, Dropbox, Evernote, or Google Drive.

1. Set up your product on a network. See the link below.
2. Visit latin.epson.com/connect (website available in Spanish only) to learn more about Epson iPrint and check the compatibility of your mobile device.
3. Download Epson iPrint from the Apple App Store or Google Play.
4. Connect your mobile device to the same wireless network that your product is using.
5. Print from your mobile device to your Epson product.

Using Epson Remote Print

With Epson Remote Print software, you can print to an Epson Email-enabled product anywhere in the world.

1. Set up your product for network printing. See the link below.
2. Visit latin.epson.com/connect (website available in Spanish only) to learn more about Remote Print and how to download the software.
3. Download and install the Remote Print software.
4. Obtain the email address and optional access key of the Epson product you want to use for printing, and enter this address during Remote Print setup.
5. Select the print command in your application and choose the Remote Print driver for your Epson product.
Using Epson Scan to Cloud

The Epson Scan to Cloud service sends your scanned files to a destination that you have registered with Epson Connect.

1. Set up your product for network scanning. See the link below.
2. Visit latin.epson.com/connect (website available in Spanish only) for instructions on registering an account and your product with Epson Connect.
3. After registering, sign in to the Epson Connect web page with the email address and password you selected.
4. Select Destination List for Scan to Cloud.
5. Click Add, then follow the instructions on the screen to create your destination list.
6. When you're ready to scan, select the setting for the Scan to Cloud service on your product control panel.

### Using Google Cloud Print

With a Google Account, you can print from your Apple or Android device to your Epson product. You can also print from Chromebooks and the Google Chrome browser without drivers or cables.

Set up your Epson product for network printing. See the link below.

**Note:** Make sure your Epson printer and computer are connected to the same network before starting the Google Cloud Print setup.

1. Connect your device to the same network that your Epson product is using.
2. Print a network status sheet.
3. Locate your product's IP address on the network status sheet.
4. Enter the IP address into the address bar of a web browser.
5. Select the **Google Cloud Print Services** option.

**Note:** If you don’t see the **Google Cloud Print Services** option, turn your product off and back on. If the option still doesn't appear, select the **Firmware Update** option and follow the on-screen instructions to update your product.

6. Click **Register**.
7. Select the checkbox to agree to the Usage Advisory and click **Next**.
8. Click **OK** to launch the sign-in page.

   *A separate browser window opens.*

9. Enter your Google Account username and password and click **Sign in**, or, if you don't have an account, click **Sign up for a new Google Account** and follow the on-screen instructions.
10. Click **Finish printer registration** to complete setup and print a test page.

Your product is now linked to your Google Account and can be accessed from any Chromebook, computer, Apple or Android device with Internet access. Visit Epson Support for more information on using Google Cloud Print, or the Google Cloud Print website for a list of supported apps.

**Setting Up Google Cloud Print on a Chromebook**

With a Google Account, you can print from a Chromebook without drivers or cables.

Set up your Epson product for network printing. See the link below.

**Note:** Make sure your Epson product is connected to your wireless network before starting the Google Cloud Print setup.

1. Turn on your Chromebook and connect it to the same wireless network as your product.

   **Note:** See your Chromebook's documentation for details on connecting to a network.

2. Do one of the following:
   - **Click Add to Cloud Print** in the notification that appears in the corner of your Chromebook screen.
     
     **Note:** If you do not see a notification, check to see if a number appears in the status area at the lower-right corner of the screen. Click this number to open the notifications menu, then click **Add to Cloud Print**.
   - Open a web browser and enter `chrome://devices` in the address bar. Skip to step 4.
   - If you see a registration confirmation screen instead, click **Register**.

3. **Click Add Device**.

4. **Click the Register button** that appears next to your product.
5. Click Register on the confirmation screen. Your product's LCD screen displays a confirmation message.

6. Select OK or press the OK button on your product to confirm the Google Cloud Print connection and print a test page.

Your product is now linked to your Google Account and can be accessed from any Chromebook, iPhone, or Android phone with Internet access. For more information on using Google Cloud Print, visit Epson Support.

Wi-Fi or Wired Networking

See these sections to use your product on a Wi-Fi or wired network.

- Wi-Fi Infrastructure Mode Setup
- Wi-Fi Direct Mode Setup
- Wi-Fi Protected Setup (WPS)
- Printing a Network Status Sheet
- Changing or Updating Network Connections

**Wi-Fi Infrastructure Mode Setup**

You can set up your product to communicate with your computer using a wireless router or access point. The wireless router or access point can be connected to your computer over a wireless or wired network.

1. Epson product
2. Wireless router or access point
Selecting Wireless Network Settings From the Control Panel

You can select or change wireless network settings using your product control panel.

To install your product on a wireless network, follow the instructions on the Start Here sheet and install the necessary software. The installer program guides you through network setup.

Note: Breakdown or repair of this product may cause loss of fax and network data and settings. Epson is not responsible for backing up or recovering data and settings during or after the warranty period. We recommend that you make your own backup or print out your fax and network data and settings.

1. Press the up or down arrow button, select Wi-Fi Setup, and press the OK button.
   You see this screen:
   
   ![Wi-Fi Setup Screen]

2. Select Wi-Fi Setup Wizard and press the OK button.
3. Select the name of your wireless network and press the OK button.

   Note: To enter the wireless network name manually, select Other Networks and press the OK button. Use the product's numeric keypad to enter your network name.
4. Enter your wireless password using the numeric keypad.

Enter Password [A]  

Note: The network name and password are case sensitive. Be sure to correctly enter uppercase and lowercase letters, and numeric or special characters.

• To enter letters or symbols, press the buttons on the numeric keypad to scroll through characters.
• To enter numbers or change the case of letters, press the up or down arrow button.
• To delete the previous character, press the left arrow button.

5. Press the OK button when you finish entering your password.

6. Confirm the displayed network settings and press the OK button to save them.

Note: If you need to change a setting, press the back button.

7. If you want to print a network setup report, press one of the Iniciar buttons. (Otherwise, press the OK button.)

If the network connection is successful, the Wi-Fi icon appears in the upper-right corner of the LCD screen.

Note: If the Wi-Fi icon is not displayed on the LCD screen, you may have selected the wrong network name or entered the password incorrectly. Repeat these steps to try again.
Wi-Fi Direct Mode Setup

You can set up your product to communicate directly with your computer or another device without requiring a wireless router or access point.

1 Epson product
2 Computer with a wireless interface
3 Other wireless device

You can select one of these modes to communicate with your computer or device:

**Access point mode**

The product itself acts as the network access point for up to 4 devices. When operating in this mode, your product displays an **AP** connection symbol on the LCD screen.

**Peer-to-peer mode**

The product communicates one-to-one with another Wi-Fi Direct capable device. When operating in this mode, your product displays a **Direct** or **D** connection symbol on the LCD screen.

To disconnect a peer-to-peer mode connection, release the connection to your product from your computer or other device.

To enable peer-to-peer mode, you must select it from the Web Config Utility, under **WiFi/Network Settings > Services > Wi-Fi Direct**.

**Enabling Wi-Fi Direct Mode**

**Parent topic:** Wi-Fi or Wired Networking
Enabling Wi-Fi Direct Mode

You can enable Wi-Fi Direct mode to allow direct communication between your product and a computer or other devices without a wireless router or access point.

1. Press the up or down arrow button, select **Wi-Fi Setup**, and press the **OK** button.
   You see this screen:

   ![Wi-Fi Setup menu]

2. Press the down arrow button, select **Wi-Fi Direct Setup**, and press the **OK** button.
3. Press the down arrow button, select **Connection Setup**, and press the **OK** button.
4. Press the down arrow button, select **Change Password**, and press the **OK** button.
5. Press the up arrow button to select **Yes**.

   **Note:** If you have already connected devices or computers to your product via Wi-Fi Direct, they will be disconnected when you change the password.
6. Enter a Wi-Fi Direct password using the numeric keypad.

   **Note:** Your password must be at least 8 and no more than 22 characters long.

   • To enter letters or symbols, press the buttons on the numeric keypad repeatedly to scroll through characters.
   • To enter numbers or change the case of letters, press the up or down arrow button.
   • To delete the previous character, press the left arrow button.

7. Press the **OK** button when you’re finished entering your password.

   You see this screen:

   ![Wi-Fi Direct Setup](image)

8. Press the **OK** button to view the SSID (Wi-Fi network name) and password.

9. Use your computer or wireless device to select the Wi-Fi network name (SSID) displayed on the LCD screen, and enter the password shown.

10. Press the **OK** button to exit.
You see the [Wi-Fi] connection symbol on the LCD screen and should be able to print directly to your product from your computer or device.

**Note:** If the [Wi-Fi] connection symbol is not displayed on the LCD screen, Wi-Fi Direct mode is not enabled. Repeat these steps to try again.

**Parent topic:** Wi-Fi Direct Mode Setup

### Wi-Fi Protected Setup (WPS)

If your network uses a WPS-enabled wireless router or access point, you can quickly connect your product to the network using Wi-Fi Protected Setup (WPS).

**Note:** To check if your router is WPS-enabled, look for a button labeled WPS on your router or access point. If there is no hardware button, there may be a virtual WPS button in the software for the device. Check your network product documentation for details.

**Using WPS to Connect to a Network**

**Parent topic:** Wi-Fi or Wired Networking

### Using WPS to Connect to a Network

If you have a WPS-enabled wireless router or access point, you can use Wi-Fi Protected Setup (WPS) to connect your product to the network.

1. Press the up or down arrow button, select **Wi-Fi Setup**, and press the **OK** button.
   
   You see this screen:

   ![Wi-Fi Setup screen](image)

2. Press the down arrow button, select **Push Button Setup (WPS)**, and press the **OK** button.
3. Follow the instructions on the LCD screen to complete WPS setup.
4. Press the OK button to return to the Home screen.

If the network connection is successful, the Wi-Fi icon appears in the upper-right corner of the LCD screen.

**Parent topic:** Wi-Fi Protected Setup (WPS)

**Printing a Network Status Sheet**

You can print a network status sheet to help you determine the causes of any problems you may have using your product on a network.

1. Press the up or down arrow button, select **Setup**, and press the OK button.
   
   You see this screen:

   ![Setup Menu](image)

2. Press the down arrow button, select **Network Settings**, and press the OK button.
3. Press the down arrow button, select **Network Status**, and press the OK button.
4. Press the down arrow button, select **Print Status Sheet**, and press the OK button.

   You see a screen like this:

   ![Print Status Sheet Menu](image)
5. Press one of the **Iniciar** buttons to print the network status sheet. Examine the settings shown on the network status sheet to diagnose any problems you have.

- Printing a Network Status Sheet

### Changing a USB Connection to a Wi-Fi Connection

If you have already connected your product to your computer using a USB connection, you can change to a Wi-Fi connection.
1. Disconnect the USB cable from your product.
2. Uninstall your product software.
3. Download and install your product software from the Epson website using the instructions on the Start Here sheet.

Parent topic: Changing or Updating Network Connections

Changing a Wi-Fi Connection to a Wired Network Connection

If you have already connected your product to your computer wirelessly, you can change to a wired network connection if necessary.
1. Disable your product's Wi-Fi features.
2. Connect one end of an Ethernet network cable to the product's LAN port.
3. Connect the other end to any available LAN port on your router or access point.
4. Uninstall your product software.
5. Download and install your product software from the Epson website.
6. Follow the on-screen instructions to install the software.
7. When you see the Select Your Connection screen, select Wired network connection.
8. If you see a Select Setup Option screen, select Set up printer for the first time.
9. Continue following the rest of the on-screen instructions.

Parent topic: Changing or Updating Network Connections

Related tasks
Disabling Wi-Fi Features

Connecting to a New Wi-Fi Router

If you change the wireless router you have been using on your network, you need to update your product's Wi-Fi connection to the new router.

Note: If you switch to a 5 GHz wireless router, set the router to operate in dual band (2.4 GHz and 5 GHz) mode. See your router documentation for instructions.

1. Do one of the following:
   • Windows: Uninstall your product software.
   • OS X: Go to the next step.
2. Download and install your product software from the Epson website using the instructions on the Start Here sheet.

Loading Paper

Before you print, load paper for the type of printing you will do.

Loading Paper in the Cassette
Paper Loading Capacity
Available Epson Papers
Paper or Media Type Settings - Product Software
Selecting the Paper Settings - Control Panel

Loading Paper in the Cassette

You can print documents on a variety of paper types and sizes.

1. Close the paper stopper and output tray, if necessary.
2. Pull out the paper cassette.

3. Slide the edge guides outward.

Note: If you are using legal-size paper or larger, press the button and extend the paper cassette.
4. Slide the edge guide to your paper size.

5. Do one of the following:
   - Insert paper in the cassette with the glossy or printable side facedown.
• Insert up to 10 envelopes, printable side facedown and flap edge left, as shown.

Note: Do not select automatic 2-sided printing for this type of paper.

Note: Make sure the paper is loaded against the front edge guide and not sticking out from the rear end of the cassette.
6. Slide the edge guides against the paper, but not too tightly.

**Note:** Make sure the paper fits under the tabs on the edge guides.

7. Keep the cassette flat as you insert it.

**Note:** The paper may slide forward slightly as you insert the cassette. This is normal.

8. If prompted by the product's LCD screen, select the size and type of the paper you loaded and press the **OK** button.
9. Extend the output tray and open the paper stopper.

Note: If you are using legal-size or longer paper, do not open the paper stopper. Do not remove or insert the paper cassette during printing.

Always follow these paper loading guidelines:

- Load only the recommended number of sheets.
- Load paper short edge first and printable side facedown.
- Make sure the paper is under the tabs on the edge guides and not sticking out from the rear end of the cassette.
- If you have trouble loading a stack of envelopes, press each envelope flat before loading it or load one envelope at a time.
- If print quality declines when printing multiple envelopes, try loading one envelope at a time.
- Load letterhead or pre-printed paper top edge first.
- Check the paper package for any additional loading instructions.

Placing Originals on the Product

Follow the instructions here to place your original documents or photos on the product.

Caution: Do not place anything on top of your product or use its cover as a writing surface to avoid damaging it.

Placing Originals on the Scanner Glass
Placing Originals in the Automatic Document Feeder

Placing Originals on the Scanner Glass

You can place originals up to this size on the scanner glass: Letter (8.5 × 11 inches [216 × 279 mm]) or A4 (8.3 × 11.7 inches [210 × 297 mm]).

1. Open the document cover.
2. Place your original facedown on the scanner glass with the top facing into the corner. Slide the original to the edges of the indicated corner.

![Scanner Glass Diagram]

**Note:** You can place multiple originals on the scanner glass. Just make sure they are at least 0.8 inch (20 mm) away from each other.

**Note:** The edges of your original may be cropped by 0.06 inch (1.5 mm) from the edge of the scanner glass. If you are scanning in Full Auto mode or using thumbnail preview in another mode in Epson Scan, the edges of your original may be cropped by about 0.2 inch (4.5 mm) from the top and side edges. Manually position your original away from the edges to prevent cropping.

3. Close the document cover gently to keep your original in place.

**Note:** If originals are placed on the scanner glass and loaded in the ADF at the same time, the originals loaded in the ADF are processed first.

**Parent topic:** Placing Originals on the Product

**Related topics**

- Copying

Placing Originals in the Automatic Document Feeder

You can place multi-page original documents in the Automatic Document Feeder (ADF). Make sure the originals meet the Automatic Document Feeder specifications before loading them.

**Caution:** Make sure your originals are not creased or folded, and do not contain holes, staples, tape, or other materials that could obstruct the feeder.

1. Slide the ADF edge guide outward.

2. Fan your stack of originals and tap them gently on a flat surface to even the edges.
3. Insert the originals into the ADF faceup and top-edge first.

![Inserting originals into ADF](image)

The **ADF** icon on the LCD screen appears.

4. Slide the ADF edge guide against the originals, but not too tightly.

![Sliding ADF edge guide](image)

**Note:** If originals are placed on the scanner glass and loaded in the ADF at the same time, the originals loaded in the ADF are processed first.

**Parent topic:** Placing Originals on the Product

Printing from a Computer

Before printing from your computer, make sure you have set up your product and installed its software as described on the Start Here sheet.

**Note:** If you have an Internet connection, it is a good idea to check for updates to your product software on Epson’s support website. If you see a Software Update screen, select Enable automatic checking and click OK. The update scans your system to see if you have the latest product software. Follow the on-screen instructions.

Selecting Basic Print Settings - Windows

Select the basic settings for the document or photo you want to print.

1. Open a photo or document for printing.
2. Select the print command in your application.

**Note:** You may need to select a print icon on your screen, the Print option in the File menu, or another command. See your application’s help utility for details.
3. If necessary, select your product name as the printer you want to use.

   **Note:** You may also need to select **Properties** or **Preferences** to view your print settings.

You see the Main tab of your printer settings window:

![Printing Preferences](image)

4. Select the size of the paper you loaded as the **Document Size** setting.

   **Note:** You can also select the **User-Defined** setting to create a custom paper size.

5. Select the orientation of your document.

   **Note:** If you are printing an envelope, select **Landscape**.
6. Select the type of paper you loaded as the **Paper Type** setting.

   **Note:** The setting may not exactly match the name of your paper. Check the paper type settings list for details.

7. Select the **Quality** setting that matches the print quality you want to use.

8. Select a Color option:
   - To print a color document or photo, select the **Color** setting.
   - To print text and graphics in black or shades of gray, select the **Black/Grayscale** setting.

9. To print on both sides of the paper, select a **2-Sided Printing** option.

10. To print multiple pages on one sheet of paper, or print one image on multiple sheets of paper, select one of the settings in the **Multi-Page** menu and select the printing options you want.

11. To print multiple copies and arrange their print order, select the **Copies** options.

12. To reduce noise during printing when you select **Plain Paper/Bright White Paper**, select **Quiet Mode** (printing will be slower).

13. To preview your job before printing, select **Print Preview**.

14. To save your print job as a project that can be modified and combined with other print jobs, select **Job Arranger Lite**.

You can select any of the available Quality options to fine-tune the quality of your print. Some settings may be unavailable, depending on the paper type and border setting you have chosen.

**Draft**
   - For draft printing on plain paper.

**Standard**
   - For everyday text and image printing.
High
For photos and graphics with high print quality.

More Settings
Opens a window that lets you choose among levels of speed and quality.

Parent topic: Selecting Basic Print Settings - Windows

Multi-Page Printing Options - Windows
You can select any of the available options in the Multi-Page menu to set up your multi-page print job.

2-Up and 4-Up
Prints 2 or 4 pages on one sheet of paper. Click the Page Order button to select page layout and border options.

2×1 Poster, 2×2 Poster, 3×3 Poster, 4×4 Poster
Prints one image on multiple sheets of paper to create a larger poster. Click the Settings button to select image layout and guideline options.

Parent topic: Selecting Basic Print Settings - Windows

Selecting Double-sided Printing Settings - Windows
You can print on both sides of the paper by selecting one of the 2-Sided Printing options on the Main tab.

Note: Some options may be pre-selected or unavailable, depending on other settings you have chosen or if you are accessing the product over a network.

1. Select one of the following options for 2-Sided Printing:
   • Auto (Long-edge binding) to print your double-sided print job by automatically flipping the paper on the long edge.
   • Auto (Short-edge binding) to print your double-sided print job by automatically flipping the paper on the short edge.
• Manual (Long-edge binding) to print your double-sided print job by printing one side and prompting you to flip the paper over on the long edge to print the other side (recommended for paper types that do not support automatic duplexing).

• Manual (Short-edge binding) to print your double-sided print job by printing one side and prompting you to flip the paper over on the short edge to print the other side (recommended for paper types that do not support automatic duplexing).

2. Click the Settings button.
You see this window:

3. Select the double-sided printing options you want to use.
4. Click **OK** to return to the Main tab.
5. Click the **Print Density** button.
You see this window:

![Print Density Adjustment Window](image)

6. Select the type of document you are printing as the Document Type setting. The software automatically sets the Adjustments options for that document type.
7. If necessary, select the Adjustments options you want to use.
8. Click OK to return to the Main tab.
9. Print a test copy of your double-sided document to test the selected settings.
10. Follow any instructions displayed on the screen during printing.

Double-sided Printing Options - Windows

Selecting Basic Print Settings - Windows

Double-sided Printing Options - Windows

You can select any of the available options on the 2-Sided Printing Settings window to set up your double-sided print job.

- **Binding Edge Options**
  - Select a setting that orients double-sided print binding in the desired direction.
Binding Margin Options
Select options that define a wider margin to allow for binding.

Start Page
Selects whether printing starts on the front or back page.

Create Folded Booklet Options
Select the Booklet checkbox and a binding option to print double-sided pages as a booklet.

Parent topic: Selecting Double-sided Printing Settings - Windows

Selecting Additional Layout and Print Options - Windows
You can select a variety of additional layout and printing options for your document or photo on the More Options tab.
1. To change the size of your printed document or photo, select the **Reduce/Enlarge Document** checkbox and select one of these sizing options:
   - Select the **Fit to Page** option to size your image to fit the paper you loaded. Select the size of your document or photo as the **Document Size** setting, and the size of your paper as the **Output Paper** setting. If you want to center your image on the paper, select the **Center** option.
   - Select the **Zoom to** option to reduce or enlarge your document or photo by a specific percentage. Select the percentage in the % menu.

2. Select one of the following Color Correction options:
   - Select **Automatic** to automatically adjust the sharpness, brightness, contrast, and color saturation for your image.
   - Select **Custom** and click the **Advanced** button to manually adjust the color correction settings or turn off color management in your printer software.
   - Select **Image Options** to access additional settings for improving printed images.

   **Note:** You can also select **Color Universal Print** settings.

3. To add the following features, click the **Watermark Features** button:
   - **Anti-Copy Pattern**: adds a watermark that only appears when your printout is copied.
   - **Watermark**: adds a visible watermark to your printout

   **Note:** Click the **Add/Delete** button to create your own watermark, and click the **Settings** button to customize the watermark.

   - **Header/Footer**: adds information such as the date and time to the top or bottom of your printout

   **Note:** Click the **Settings** button to customize the text and location of the header or footer.

4. Select any of the Additional Settings options to customize your print.

Custom Color Correction Options - Windows
Image Options and Additional Settings - Windows
Header/Footer Settings - Windows

**Parent topic:** Printing with Windows
Custom Color Correction Options - Windows

You can select any of the available options in the Color Correction window to customize the image colors for your print job.

Color Controls

Lets you select a Color Mode setting, individual settings for Brightness, Contrast, Saturation, and Density, and individual color tones. Depending on the selected color mode, you can also adjust the midtone density using the Gamma setting.

Fix Photo

Improves the color, contrast, and sharpness of flawed photos.

Note: Fix Photo uses a sophisticated face recognition technology to optimize photos that include faces. For this to work, both eyes and the nose must be visible in the subject's face. If your photo includes a face with an intentional color cast, such as a statue, you may want to turn off Fix Photo to retain the special color effects.
ICM
Lets you manage color using installed color printing profiles.

No Color Adjustment
Turns off color management in your printer software so you can manage color using only your application software.

Parent topic: Selecting Additional Layout and Print Options - Windows

Image Options and Additional Settings - Windows
You can select any of the Image Options and Additional Settings to customize your print. Some options may be pre-selected or unavailable, depending on other settings you have chosen.

Image Options
Emphasize Text
Adjusts the weight of printed text to increase readability.

Emphasize Thin Lines
Adjusts the weight of printed lines to increase visibility.

Edge Smoothing
Smoothes jagged edges in low-resolution images such as screen captures or images from the Web.

Fix Red-Eye
Reduces or removes red-eye in photos.

Print Text in Black
Prints colored text in black.

For Color Text
Prints colored text on a background pattern or underlined.

For Color Graphs and Images
Prints colored graphics and images with overlay patterns.

For Color Text, Graphs, and Images
Prints colored text, graphics, and images with overlay patterns.

Enhancement Options
Specifies Color Universal Print enhancement settings for text, graphics, and images.

Additional Settings Options
Rotate 180°
Prints the image rotated 180° from its original orientation.
High Speed
Speeds up printing but may reduce print quality.

Mirr or Image
Flips the printed image left to right.

Parent topic: Selecting Additional Layout and Print Options - Windows

Header/Footer Settings - Windows
You can select any of the Header/Footer Settings options to add headers or footers when you print. The items are available to print at the top or bottom of your pages, in either the left, right, or center of the page.

Note: These settings are not saved with your document.

![Header/Footer Settings](image)

You can select to print the following information:

- User Name
- Computer Name
- Date
- Date/Time
- Collate Number (copy number)

Note: The user name, computer name, date, and time come from the Windows Control Panel on your computer.

Parent topic: Selecting Additional Layout and Print Options - Windows
Selecting a Printing Preset - Windows

For quick access to common groups of print settings, you can select a printing preset on the Main or More Options tab.

**Note:** You can create your own preset by clicking the *Add/Remove Presets* button.

1. Click the **Main** or **More Options** tab.

You see the available **Printing Presets** on the left:
2. Place your cursor over one of the Printing Presets to view its list of settings.
3. Click on a preset to change its settings, or use any of the available options on the screen to control your printing presets.
4. To choose a preset for printing, select it.
5. Click OK.

Parent topic: Printing with Windows

Selecting Extended Settings - Windows

You can select additional settings that apply to all the print jobs you send to your product.

1. Access the Windows Desktop and right-click the product icon in the Windows taskbar.
2. Select Printer Settings.
3. Click the Maintenance tab.
   
   You see the maintenance options:

![Maintenance tab in Printer Settings](image)

You can then select various options such as Nozzle Check, Head Cleaning, etc.
4. Click the Extended Settings button.
   You see this window:

![Extended Settings window]

5. Select any of the extended settings to customize your print.
6. Click OK to close the Extended Settings window.
7. Click OK to close the printer software window.

**Extended Settings - Windows**

Parent topic: Printing with Windows

**Extended Settings - Windows**

You can select from these settings on the Extended Settings window.

**Enable EPSON Status Monitor 3**

Enables product monitoring for ink and paper supplies and other issues.

**Separator Page**

Before each document, prints a separator page containing the title, user, date, and time.

**Always Spool RAW Datatype**

Increases print speed and may solve other printing problems.

**Page Rendering Mode**

Increases print speed when printing is extremely slow or the print head stops during printing.
Print as Bitmap
Increases print speed when printing is extremely slow or the print head stops during printing, and other settings do not help.

Skip Blank Page
Ensures that your product does not print pages that contain no text or images.

Change Standard Resolution
Reduces the resolution of print data to correct printing problems.

Refine screening pattern
Prints graphics with a finer screening pattern.

Allow Applications to Perform ICM Color Matching
Allows applications to perform ICM color matching.

Always Use the Driver's Paper Source Setting
Prints using the paper source setting in the printer driver, rather than the setting in your application.

Output 1 page documents facedown in 2-Sided mode
Outputs single-sided pages in a 2-sided print job facedown instead of faceup.

Parent topic: Selecting Extended Settings - Windows

Printing Your Document or Photo - Windows

Once you have selected your print settings, you are ready to save your settings and print.

1. Click OK to save your settings.
You see your application's Print window, such as this one:

2. Click **OK** or **Print** to start printing.

**Checking Print Status - Windows**

**Parent topic:** Printing with Windows
Checking Print Status - Windows

During printing, you see this window showing the progress of your print job. It allows you to control printing and check ink status.

- To cancel printing, click **Cancel**.
- To see print jobs lined up for printing, click **Print Queue**.

Parent topic: Printing Your Document or Photo - Windows

Selecting Default Print Settings - Windows

When you change your print settings in a program, the changes apply only while you are printing in that program session. If you want to change the print settings you use in all your Windows programs, you can select new default print settings.
1. Access the Windows Desktop and right-click the product icon in the Windows taskbar.
2. Select **Printer Settings**.
   You see the printer settings window:

![Printer Settings Window]

3. Select the print settings you want to use as defaults in all your Windows programs.
4. Click **OK**.
   These settings are now the defaults selected for printing. You can still change them as needed for printing in any program session.

**Changing the Language of the Printer Software Screens**

**Parent topic:** Printing with Windows

**Changing the Language of the Printer Software Screens**

You can change the language used on the Windows printer software screens.

1. Access the Windows Desktop and right-click the product icon in the Windows taskbar.
2. Select **Printer Settings**.
   You see the printer settings window.

3. Click the **Maintenance** tab.
   You see the maintenance options:

   ![Maintenance options](image)

4. Select the language you want to use as the **Language** setting.

5. Click **OK** to close the printer software window.
   The printer software screens appear in the language you selected the next time you access them.

Parent topic: **Selecting Default Print Settings - Windows**

**Changing Automatic Update Options**

Your printer software for Windows automatically checks for updates to the product software. You can change how often the software checks for updates or disable this feature.
1. Access the Windows Desktop and right-click the product icon in the Windows taskbar.
2. Select **Software Update Settings**.
   You see this window:

   ![Software Update Settings window](image)

3. Do one of the following:
   - To change how often the software checks for updates, select a setting in the **Check every** menu.
   - To disable the automatic update feature, select the **Never** option.
4. Click **OK** to exit.

   **Note:** If you choose to disable the automatic update feature, you can check for updates manually.

**Parent topic:** Printing with Windows

### Printing with OS X

You can print with your product using any OS X printing program, as described in these sections.

**Note:** If you have an Internet connection, it is a good idea to check for updates to your product software on Epson's support website.

- [Selecting Basic Print Settings - OS X](#)
- [Selecting Page Setup Settings - OS X](#)
- [Selecting Print Layout Options - OS X](#)
Selecting Basic Print Settings - OS X

Select the basic settings for the document or photo you want to print.

1. Open a photo or document for printing.
2. Select the print command in your application.

   **Note:** You may need to select a print icon on your screen, the **Print** option in the File menu, or another command. See your application's help utility for details.

3. Select your product as the **Printer** setting.

   ![Select your printer](image)

4. If necessary, click the arrow next to the Printer setting or the **Show Details** button to expand the print window.
You see the expanded printer settings window for your product:

![Printer Settings Window]

**Note:** The print window may look different, depending on the version of OS X and the application you are using.

5. Select the **Copies** and **Pages** settings as necessary.

**Note:** If you do not see these settings in the print window, check for them in your application before printing.
6. Select the page setup options: **Paper Size** and **Orientation**.

**Note:** If you do not see these settings in the print window, check for them in your application before printing. They may be accessible by selecting **Page Setup** from the File menu.

7. Select any application-specific settings that appear on the screen, such as those shown in the image above for the Preview application.

8. Select **Print Settings** from the pop-up menu.
You see these settings:

![Print Settings](image)

9. Select the type of paper you loaded as the **Media Type** setting.

   **Note:** The setting may not exactly match the name of your paper. Check the paper type settings list for details.

10. Select the **Print Quality** setting you want to use.

11. Select any of the available print options.

   - **Print Quality Options - OS X**
   - **Print Options - OS X**

   **Parent topic:** Printing with OS X

   **Related references**
   - Paper or Media Type Settings - Product Software

Print Options - OS X
You can select any of the print options to customize your print. Some options may be unavailable, depending on other settings you have chosen.

Grayscale
Prints text and graphics in black or shades of gray.

Mirror Image
Lets you flip the printed image horizontally.

Parent topic: Selecting Basic Print Settings - OS X

Selecting Page Setup Settings - OS X
Depending on your application, you may be able to select the paper size and orientation settings from the print window.
Note: If you do not see these settings in the print window, check for them in your application before printing. They may be accessible by selecting Page Setup from the File menu.

1. Select the size of the paper you loaded as the Paper Size setting.
2. Select the orientation of your document or photo as shown in the print window.

Note: If you are printing an envelope, select the icon.

Note: You can reduce or enlarge the size of the printed image by selecting Paper Handling from the pop-up menu and selecting a scaling option.

Parent topic: Printing with OS X

Selecting Print Layout Options - OS X

You can select a variety of layout options for your document or photo by selecting Layout from the pop-up menu on the print window.

- To print multiple pages on one sheet of paper, select the number of pages in the Pages per Sheet pop-up menu. To arrange the print order of the pages, select a Layout Direction setting.
- To print borders around each page on the sheet, select a line setting from the Border pop-up menu.
To invert or flip the printed image, select the Reverse page orientation or Flip horizontally settings.

Parent topic: Printing with OS X

Selecting Double-sided Printing Settings - OS X

You can print on both sides of the paper by selecting Two-sided Printing Settings from the pop-up menu on the print window.

Note: Some options may be pre-selected or unavailable, depending on other settings you have chosen or if you are accessing the product over a network. This screen may be different, depending on the version of OS X you are using.

1. Select one of the Two-sided Printing options.
2. Select the type of document you are printing as the **Document Type** setting. The software automatically sets the Adjustments options for that document type.

![Two-sided Printing Settings](image)

3. If necessary, customize the Adjustments settings as instructed on the screen.

4. Print a test copy of your double-sided document to test the selected settings.

5. Follow any instructions displayed on the screen during printing.

**Double-sided Printing Options and Adjustments - OS X**

**Parent topic:** Printing with OS X

**Double-sided Printing Options and Adjustments - OS X**

You can select any of the available options in the **Two-sided Printing Settings** or **Output Settings** pop-up menu to set up your double-sided print job.

**Two-sided Printing Options**

**Long-Edge binding**

Orients double-sided printed pages to be bound on the long edge of the paper.
Short-Edge binding
Orients double-sided printed pages to be bound on the short edge of the paper.

Adjustments

Print Density
Sets the level of ink coverage for double-sided printing.

Increased Ink Drying Time
Sets the amount of time required for drying ink after printing on one side of the paper before printing the other side in double-sided printing.

Parent topic: Selecting Double-sided Printing Settings - OS X

Sizing Printed Images - OS X

You can adjust print order and the size of the image as you print it by selecting Paper Handling from the pop-up menu on the Print window.

- To print only selected pages in a multi-page document, select an option from the Pages to Print pop-up menu.
- To adjust the order in which pages are printed, select an option from the Page Order pop-up menu.
- To scale the image to fit on a specific paper size, select the Scale to fit paper size checkbox and select a paper size from the Destination Paper Size pop-up menu.

Parent topic: Printing with OS X
Managing Color - OS X

You can adjust the Color Matching and Color Options settings to fine-tune the colors in your printout, or turn off color management in your printer software.

1. Select **Color Matching** from the pop-up menu in the print window.

![Color Matching](image1)

2. Select one of the available options.

3. Select **Color Options** from the pop-up menu in the print window.

![Color Options](image2)

**Note:** The available settings on the Color Options menu depend on the option you selected on the Color Matching menu.

4. Select one of the available options.

**Color Matching and Color Options - OS X**

**Parent topic:** Printing with OS X
Color Matching and Color Options - OS X

You can select from these settings on the Color Matching and Color Options menus.

**Color Matching Settings**

**EPSON Color Controls**

Lets you manage color using controls in your printer software or turn off color management.

**ColorSync**

Prints using standard color profiles for your product and paper to help match image colors. You can customize the conversion method and filter settings on the ColorSync pop-up menu in the print window.

**Color Options Settings**

**Manual Settings**

Lets you select manual color adjustments. Click the arrow next to Advanced Settings and select settings for Brightness, Contrast, Saturation, and individual color tones. You can also select a color Mode setting for printing photos and graphics and the Fix Red-Eye setting to reduce or remove red-eye in photos. Depending on the selected color mode, you can also adjust the midtone density using the Gamma setting.

**Fix Photo**

Improves the color, contrast, and sharpness of flawed photos. Click the arrow next to Advanced Settings and select the Fix Red-Eye setting to reduce or remove red-eye in photos.

**Note:** Fix Photo uses a sophisticated face recognition technology to optimize photos that include faces. For this to work, both eyes and the nose must be visible in the subject’s face. If your photo includes a face with an intentional color cast, such as a statue, you may want to turn off Fix Photo to retain the special color effects.

**Off (No Color Adjustment)**

Turns off color management in your printer software so you can manage color using only your application software.

**Note:** An ICC profile is required if color management is turned off.

**Parent topic:** Managing Color - OS X

Selecting Printing Preferences - OS X

You can select printing preferences that apply to all the print jobs you send to your product.
1. In the Apple menu or the Dock, select **System Preferences**.
2. Select **Print & Fax**, **Print & Scan**, or **Printers & Scanners**, select your product, and select **Options & Supplies**.
3. Select **Driver** or **Options**.
   
   You see a screen like this:

   ![Options screen](image)

   4. Select any of the available printing preferences.
5. Click **OK**.

**Printing Preferences - OS X**

**Parent topic:** Printing with OS X

**Printing Preferences - OS X**

You can select from these settings on the **Options** or **Driver** tab.

**Skip Blank Page**

Ensures that your product does not print pages that contain no text or images.

**Quiet Mode**

Lessens noise during printing when you select **Plain Paper/Bright White Paper** as the paper Type or Media Type setting.
**High Speed Printing**

Speeds up printing but may reduce print quality.

**Warning Notifications**

Lets you choose whether or not to receive warning notifications from the printer software for various operating conditions.

**Establish bidirectional communication**

Allows the product to communicate with the computer. Do not change the default setting unless you experience issues when using a shared printing pool.

Placing Originals on the Product

Starting a Scan Using the Product Control Panel

You can scan an image using your product's control panel buttons.

Your product automatically selects suitable default scan settings, but you can view or change them as necessary.

1. Make sure you installed the product software and connected the product to your computer or network.

   Note: Restart your computer after installing the product software to enable scanning from the control panel. Also make sure the Event Manager program is not being blocked by your firewall or security software.

2. Press the up or down arrow button, select Scan, and press the OK button.
The scan options are displayed:

3. Press the up or down arrow button to select a scan option and press the OK button.
   - **Cloud** sends your scanned files to a destination that you have registered with Epson Connect.
   - **Computer** saves your scan as a JPEG file to your computer or as an image capture in OS X.
   - **Computer (WSD)** lets you manage network scanning in Windows 8.x, Windows 7, or Windows Vista (English only).

   **Note:** To use this feature, you must first set up WSD (Web Services for Devices) on the Windows 7 or Windows Vista computer you want to scan to.

4. To scan to your computer, you first need to select how you connected your product to your computer:
   - If your product is connected directly to your computer with a USB cable, press the up or down arrow button to select **USB Connection**.
   - If your product is connected to your computer over a network, press the up or down arrow button to select the computer name from the list and press the OK button to begin scanning.

5. Press one of the **Iniciar** buttons to start scanning.

**Changing Default Scan Button Settings**

Scanning in Office Mode

When you scan in Office Mode, Epson Scan automatically saves your scanned file in JPEG format in your operating system's Pictures or My Pictures folder, or opens it in your scanning program. You can select settings, preview, and change the scanned file settings as necessary.

1. Start Epson Scan and select **Office Mode** as the Mode setting.
You see this window:

2. Select the **Image Type** setting that matches your original.
3. Select the **Document Source** setting indicating where you placed your original.

   **Note:** If you are using the ADF, remove any documents from the scanner glass.
4. Select the **Size** and **Orientation** settings that match your original.
5. Select the **Resolution** setting you want to use for your scan.
6. Click the **Preview** button.

   **Note:** If you are using the ADF, you can only preview one page at a time.

   Epson Scan previews your original and displays the result in a separate Preview window.
7. If you are using the ADF, reinsert your original into the ADF.
8. If desired, select the area in your preview image that you want to scan (scan area).
9. Select any of the image adjustment settings you want to use. Before making adjustments, click the image or scan area in the Preview window.
10. Click **Scan**.
    
    You see the File Save Settings window.
11. Change any of the necessary file save settings and click **OK**.

Epson Scan scans your original, and saves the file in the selected folder or opens it in your scanning program. If the file was saved directly to your computer, you see the file in the Windows Explorer or OS X Finder, where you can view and print the image, if desired.

Selecting a Scan Area - Office Mode

You can select a specific area in your preview image to include in your scanned image. You can select the entire image area or a portion of it. You can even select multiple scan areas to create multiple scanned images of different areas.

You can also use the scan area to select specific Image Adjustments settings for a scanned image. Just be sure to click inside the scan area before selecting the settings.
1. In the Preview window, click the Auto Locate icon to create a marquee (dotted line) on the preview image.

2. Do the following, as necessary, to work with the selected scan area:
   • If the marquee is correct, continue with the next step.
   • To move the marquee, click inside the scan area and drag the marquee where you want it.
• To resize the scan area, place your cursor over the edge or corner of the marquee, then click and drag the edges where you want them. (Hold down the **Shift** key as you resize the marquee to retain the same width/height proportions.)

• To create additional marquees (up to 50, if available), click the Copy Marquee icon to copy the existing marquee and paste it on the preview image.

  **Note:** If you draw multiple marquees, make sure you select the **All** button in the Preview window before you scan. Otherwise, only the area inside the currently selected marquee will be scanned.

• To delete a marquee, click the marquee, then click the Delete Marquee icon.

3. Click inside each scan area and make any necessary settings in the Epson Scan window.

**Available Image Adjustments - Office Mode**

You can select these Image Adjustments options in Epson Scan Office Mode. Not all adjustment settings may be available, depending on other settings you have chosen.

<table>
<thead>
<tr>
<th>Image Adjustments</th>
<th>Unsharp Mask</th>
<th>Descreening</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Image Option</strong></td>
<td>Text Enhancement</td>
<td>Auto Area Segmentation</td>
</tr>
<tr>
<td></td>
<td>Brightness:</td>
<td>0</td>
</tr>
<tr>
<td></td>
<td>Contrast:</td>
<td>0</td>
</tr>
</tbody>
</table>

**Note:** Select the **Image Option** checkbox if you need to set any of the grayed-out image adjustments beneath the checkbox. Not all adjustment settings may be available, depending on the Image Type setting.

**Unsharp Mask**

Makes the edges of certain image areas clearer. Turn off this option to leave softer edges.
Descreening
Removes the ripple pattern that might appear in subtly shaded image areas, such as skin tones. This option improves results when scanning magazines or newspapers. (The results of descreening do not appear in the preview image, only in your scanned image.)

Text Enhancement
Sharpens the appearance of letters in text documents.

Auto Area Segmentation
Makes grayscale images clearer and text recognition more accurate by separating the text from the graphics.

Color Enhance
Enhances the red, green, or blue shades in the scanned image.

Brightness
Adjusts the overall lightness and darkness of the scanned image.

Contrast
Adjusts the difference between the light and dark areas of the overall scanned image.

Threshold
Adjusts the level at which black areas in text and line art are delineated, improving text recognition in OCR (Optical Character Recognition) programs.

Parent topic: Scanning in Office Mode

Scanning in Home Mode
When you scan in Home Mode, Epson Scan automatically saves your scanned file in JPEG format in your operating system’s Pictures or My Pictures folder, or opens it in your scanning program. You can select settings, preview, and change the scanned file settings as necessary.

1. Start Epson Scan and select Home Mode as the Mode setting.
You see this window:

2. Select the **Document Type** setting that matches your original, such as **Photograph** or **Text/Line Art**.
3. Select the **Image Type** setting that matches your original.
4. Select the way you plan to use your scanned image as the **Destination** setting. (The Resolution setting is selected automatically based on the Destination setting you choose.)
   - **Screen/Web**: Select this option for images you will email, view on a computer screen, or post on the web.
   - **Printer**: Select this option for images you will print or documents you will convert to editable text using OCR (Optical Character Recognition) software.
   - **Other**: Select this option if you want to select a custom resolution for your image.

5. If you selected **Other** in the last step, select the **Resolution** setting you want to use for your scan.

6. Click the **Preview** button.
   
   Epson Scan previews your original and displays the result in a separate Preview window.

7. If desired, select the area in your preview image that you want to scan (scan area).

8. Select any of the image adjustment settings you want to use. Before making adjustments, click the image or scan area in the Preview window.

9. If you want to reduce or enlarge your image as you scan, select the **Target Size** setting you want to use.

10. Click **Scan**.
    
    You see the File Save Settings window.

11. Change any of the necessary file save settings and click **OK**.

Epson Scan scans your original, and saves the file in the selected folder or opens it in your scanning program. If the file was saved directly to your computer, you see the file in the Windows Explorer or OS X Finder, where you can view and print the image, if desired.

Selecting a Scan Area - Home Mode

You can select a specific area in your preview image to include in your scanned image. You can select the entire image area or a portion of it. You can even select multiple scan areas to create multiple scanned images of different areas (Normal Preview mode only).

You can also use the scan area to select specific Image Adjustments settings for a scanned image. Just be sure to click inside the scan area before selecting the settings.
1. Do one of the following to select your scan area in the Preview image:
   - **Thumbnail preview**: Your scan area is selected automatically, but you can change it. Place your cursor in one corner of the desired scan area, then click and drag the cursor to the opposite corner to create a marquee (dotted line) on the preview image.
2. Do the following, as necessary, to work with the selected scan area:
   - If the marquee is correct, continue with the next step.
   - To move the marquee, click inside the scan area and drag the marquee where you want it.
• To resize the scan area, place your cursor over the edge or corner of the marquee, then click and drag the edges where you want them. (Hold down the Shift key as you resize the marquee to retain the same width/height proportions.)

• **Normal preview**: To create additional marquees (up to 50), click the Copy Marquee icon to copy the existing marquee and paste it on the preview image.

  **Note**: If you draw multiple marquees, make sure you select the **All** button in the Preview window before you scan. Otherwise, only the area inside the currently selected marquee will be scanned.

• To delete a marquee, click the marquee, then click the Delete Marquee icon.

3. Click inside the scan area and make any necessary settings in the Epson Scan window.

### Available Image Adjustments - Home Mode

You can select these Image Adjustments options in Epson Scan Home Mode.

<table>
<thead>
<tr>
<th>Image Adjustments</th>
</tr>
</thead>
<tbody>
<tr>
<td>☐ Descreening</td>
</tr>
<tr>
<td>☐ Backlight Correction</td>
</tr>
<tr>
<td>☐ Color Restoration</td>
</tr>
<tr>
<td>☐ Dust Removal</td>
</tr>
<tr>
<td>☐ Image Option</td>
</tr>
<tr>
<td>☐ Text Enhancement</td>
</tr>
<tr>
<td>☐ Auto Area Segmentation</td>
</tr>
<tr>
<td><img src="#" alt="Brightness..." /></td>
</tr>
</tbody>
</table>

**Note**: Select the **Image Option** checkbox if you need to set any of the grayed-out image adjustments. Not all adjustment settings may be available, depending on the Document Type and Image Type setting. Click the **Brightness** button to access additional settings.

**Descreening**

Removes the ripple pattern that might appear in subtly shaded image areas, such as skin tones. This option improves results when scanning magazines or newspapers. (The results of descreening do not appear in the preview image, only in your scanned image.)

**Color Restoration**

Restores the colors in faded photos automatically.
**Backlight Correction**  
Removes shadows from photos that have too much background light.

**Dust Removal**  
Removes dust marks from your originals automatically.

**Text Enhancement**  
Sharpens the appearance of letters in text documents.

**Auto Area Segmentation**  
Makes grayscale images clearer and text recognition more accurate by separating the text from the graphics.

**Brightness**  
Adjusts the overall lightness and darkness of the scanned image.

**Contrast**  
Adjusts the difference between the light and dark areas of the overall scanned image.

**Threshold**  
Adjusts the level at which black areas in text and line art are delineated, improving text recognition in OCR (Optical Character Recognition) programs.

**Parent topic:** Scanning in Home Mode

**Selecting a Scan Size - Home Mode**

You can reduce or enlarge the size of your image as you scan. You can also select a specific scan size, such as a common photo size like 4 × 6 inches (102 × 152 mm). This places a scan area of that size on the preview image so you can use it to help crop the image in the correct proportions.

1. Click the **Preview** button to preview your image.
2. In the Epson Scan window, select the size you want your scanned image to be from the **Target Size** list.

![Target Size](image)

**Note:** If you need to rotate the orientation of the target size for your image, click the **Orientation** icon.
A marquee (dotted line) appears on your preview image proportioned for the size you selected.

3. Do the following, as necessary, to work with the selected scan area:
   - To move the marquee, click inside the scan area and drag the marquee where you want it.
• To resize the scan area, place your cursor over the edge or corner of the marquee, then click and drag the edge where you want it.

Note: Manually adjusting the marquee will not change the target size of the scanned file. The marquee only indicates the area of the image that will be scanned.

4. To create a scanned image size that is not available in the Target Size list, click the **Customize** option.
   
   You see this window:

   ![Target Size Window](image)

   5. Name the custom size, enter the size, click **Save**, and click **OK**. Then adjust the marquee on the preview image.
      
      The marquee is automatically proportioned for your custom scan size.

Parent topic: Scanning in Home Mode
Scanning in Professional Mode

When you scan in Professional Mode, Epson Scan automatically saves your scanned file in PDF format in your operating system’s Documents or My Documents folder, or opens it in your scanning program. You can select settings, preview, and change the scanned file settings as necessary.

1. Start Epson Scan and select **Professional Mode** as the Mode setting.
You see this window:
2. Select the **Document Type** setting that matches your original, such as **Reflective** for documents or photos.

3. Select the **Document Source** setting indicating where you placed your original.

   **Note:** If you are using the ADF, remove any documents from the scanner glass.

4. Select the specific type of original you are scanning as the **Auto Exposure Type** setting: **Document** or **Photo**.

5. Select the details of your original and how you want it scanned as the **Image Type** setting.

6. Select the **Resolution** setting you want to use for your scan.

7. Click the **Preview** button.

   **Note:** If you are using the ADF, you can only preview one page at a time.

   Epson Scan previews your original and displays the result in a separate Preview window.

8. If you are using the ADF, reinsert your original into the ADF.

9. If desired, select the area in your preview image that you want to scan (scan area).

10. Select any of the image adjustment settings you want to use. Before making adjustments, click the image or scan area in the Preview window.

11. If you want to reduce or enlarge your image as you scan, select the **Target Size** setting you want to use.

12. Click **Scan**.

   You see the File Save Settings window.

13. Change any of the necessary file save settings and click **OK**.

Epson Scan scans your original, and saves the file in the selected folder or opens it in your scanning program. If the file was saved directly to your computer, you see the file in the Windows Explorer or OS X Finder, where you can view and print the image, if desired.

Selecting a Scan Size - Professional Mode
You can reduce or enlarge the size of your image as you scan. You can also select a specific scan size, such as a common photo size like 4 × 6 inches (102 × 152 mm). This places a scan area of that size on the preview image so you can use it to help crop the image in the correct proportions.

1. Click the Preview button to preview your image.
2. In the Epson Scan window, select the size you want your scanned image to be from the Target Size list.

![Target Size: 5 x 7 in.](image)

Note: If you need to rotate the orientation of the target size for your image, click the orientation icon.
A marquee (dotted line) appears on your preview image proportioned for the size you selected.

3. Do the following, as necessary, to work with the selected scan area:
   - To move the marquee, click inside the scan area and drag the marquee where you want it.
• To resize the scan area, place your cursor over the edge or corner of the marquee, then click and drag the edge where you want it.

**Note:** Manually adjusting the marquee will not change the target size of the scanned file. The marquee only indicates the area of the image that will be scanned.

4. To create a scanned image size that is not available in the Target Size list, click the **Customize** option.

You see this window:

![Target Size window](image)

5. Name the custom size, enter the size, click **Save**, and click **OK**. Then adjust the marquee on the preview image.

The marquee is automatically proportioned for your custom scan size.
6. To use additional sizing tools, click the + (Windows) or ▶ (OS X) icon next to the Target Size setting and select options as desired.

![Target Size settings](image)

- **Scale**: Reduces or enlarges your image by the percentage you enter.
- **Trimming**: Turns automatic image cropping on or off.
- **Unlock icon**: Unlocks the width/height proportions of the scanned image size so you can adjust it without constraint.

**Parent topic**: Scanning in Professional Mode

### Image Preview Guidelines

You can preview your scanned image so you can adjust the scan settings using the preview as a guide. There are two types of preview available, depending on the scan mode and selected settings:

- **Thumbnail preview**: A thumbnail preview displays your previewed images as thumbnails with the scanned image area and exposure automatically selected. If the **Thumbnail** checkbox is selected, clicking the **Preview** button opens a thumbnail preview.

- **Normal preview**: A normal preview displays your previewed images in their entirety so you can select the scanned image area and other settings manually. If the **Thumbnail** checkbox is deselected, clicking the **Preview** button opens a normal preview.

**Parent topic**: Selecting Epson Scan Settings

### Scan Resolution Guidelines

If you plan to enlarge a scanned image so you can print it at a larger size, you may need to increase the resolution from the default resolution set by Epson Scan. Follow these guidelines to determine the resolution setting you need:

- You will enlarge the image as you scan it.
If you will enlarge the image using Epson Scan's Target Size setting, you do not need to increase the Resolution setting.

- You will scan the image at its original size but enlarge it later in an image-editing program.
  Increase Epson Scan's Resolution setting in your scan. Increase the resolution by the same amount you will increase the image size to retain a high image quality. For example, if the resolution is 300 dpi (dots per inch) and you will double the image size later, change the Resolution setting to 600 dpi.

- You will scan the image at 100% or smaller size.
  Select Epson Scan's Resolution setting based on how you will use the scanned image:
  - Email/view on a computer screen/post on the web: 96 to 150 dpi
  - Print/convert to editable text (OCR): 300 dpi
  - Fax: 200 dpi

**Parent topic:** Selecting Epson Scan Settings
Selecting Scan File Settings

You can select the location, name, and format of your scan file on the File Save Settings window. You can also select various optional settings that control how Epson Scan behaves when you scan and save files.

The File Save Settings window may appear after you click Scan on the Epson Scan window. You may also be able to access the window by clicking the icon on the Epson Scan window.

1. Do one of the following to select the folder in which you want to save your scanned image:
   - Click the button for one of the displayed folders.
• Click the Other button, click the Browse or Choose button, and select a folder.

2. Type in a file name in the Prefix field. This name is used along with numbers to automatically name your scanned files.

3. Select a different number as the Start Number setting, if you like.

4. Select the file format you want to use in the Image Format Type menu.

5. If your file format provides optional settings, click the Options button to select them.

6. Choose any of the optional settings you want to use by selecting their checkboxes.

7. Click OK.

Available Scanned File Types and Optional Settings

Parent topic: Selecting Epson Scan Settings

Available Scanned File Types and Optional Settings

You can select from a variety of scanned file types and optional settings on the File Save Settings window in Epson Scan.

File Formats

Bitmap (*.bmp)
A standard image file format for most Windows programs.

JPEG (*.jpg)
An image format that lets you highly compress image data. However, the higher the compression, the lower the image quality. (The TIFF format is recommended when you need to modify or retouch your scanned image.)

Multi-TIFF (*.tif)
A TIFF file format when multiple pages are saved to the same file, allowing you to edit the images using a compatible program.

PDF (*.pdf)
A document format that is readable by Windows and OS X systems using Adobe Reader, Acrobat, or other programs. You can save multi-page documents in one PDF file.

PICT (*.pct)
A standard image file format for most OS X programs.

PRINT Image Matching II (*.jpg or *.tif)
File formats that include Epson PRINT Image Matching II data for enhanced quality and a wider color range (does not affect the way the image displays on the screen).
TIFF (*.tif)
A file format created for exchanging data between many programs, such as graphic and DTP software.

Optional Settings
Overwrite any files with the same name
Select to overwrite previous files with the same names.

Show this dialog box before next scan
Select to have the File Save Settings window appear automatically before you scan (in certain Epson Scan modes).

Open image folder after scanning
Select to have Windows Explorer or OS X Finder automatically open to the folder where your scanned image is saved after scanning.

Show Add Page dialog after scanning
If you are scanning a multi-page document using the PDF or Multi-TIFF format, select to display a prompt for scanning additional pages after the first page is scanned.

Parent topic: Selecting Scan File Settings

Scanning with OS X Using Image Capture
With OS X, you can scan with your product using an image-editing application such as Image Capture.

1. Open an image editing application, such as Image Capture.

2. Select your Epson product from the DEVICES or SHARED list in the Finder, if necessary. (You may need to hover over the DEVICES or SHARED list, click Show, and select your product.)

3. If you see the Show Details button, click it.
   If you are scanning an item on the scanner glass, your product begins a preview scan.
4. Select the **Scan Mode** setting indicating where you placed your original (if available). Select any other available scan settings as necessary.
5. Select the folder in which you want to save your scanned file in the **Scan To** pop-up menu.
6. Click **Scan**.
   Your scanned file is saved in the folder you selected.

**Available Scan Settings - OS X Image Capture**

**Parent topic:** Scanning

**Available Scan Settings - OS X Image Capture**

You can select these scan settings in your imaging editing application for OS X, if available.

**Image Correction**
Provides a graphical interface for adjusting brightness, tint, temperature, and saturation.

**Unsharp Mask**
Makes the edges of certain image areas clearer. Turn off this option to leave softer edges.

**Descreening**
Removes the ripple pattern that might appear in subtly shaded image areas, such as skin tones. This option improves results when scanning magazines or newspapers. (The results of descreening do not appear in the preview image, only in your scanned image.)

**Backlight Correction**
Removes shadows from photos that have too much background light.

**Scanning to a PDF File**

**Restoring Photo Colors as You Scan**

**Parent topic:** Scanning
Scanning to a PDF File

Using Epson Scan in Office, Home, or Professional Mode, you can scan a multi-page document and save it in one PDF (Portable Document Format) file on your computer.

1. Place your original on your product for scanning.
2. Start Epson Scan.
3. Select the scan mode you want to use.
4. Select the scan settings for your scan.
5. Preview your image.
6. When you finish selecting all your settings, click Scan.
You see the File Save Settings window.

7. Select **PDF** as the Type setting.

8. Select any other settings you want to use on the File Save Settings window. Click the **Options** button to access additional settings.

9. Click **OK**.
Epson Scan scans your document and you see this window:

10. Choose one of the following options:
   • If you are scanning only one page, click Save File.
   • If you need to scan additional pages in a document, click Add page. Place additional pages on
     the product for scanning, click Scan, and repeat until you have scanned all the pages. When you
     are finished, click Save File.
   • If you need to delete or reorder the scanned pages, click Edit page. Delete or reorder the pages
     using the icons that appear on the bottom of the editing window. When you are finished, click OK.

   **Note:** If you installed an OCR (Optical Character Recognition) program, you may see a screen
   indicating the program is converting your page to text. Wait until the program re-scans the page and
   close the program, if necessary.

11. Click Close to exit the Epson Scan window, if necessary.

Epson Scan scans your original, and saves the PDF file in the selected folder or opens it in your
scanning program. If the file was saved directly to your computer, you see the file in the Windows
Explorer or OS X Finder, where you can view and print the document, if desired.

Faxing

See these sections to fax using your product.

**Note:** This product allows you to store names, telephone numbers, and fax data in its memory even when the power is turned off. Make sure you restore all of the default settings if you give away or dispose of the product. This will erase all of your network settings and fax data.

Connecting a Telephone or Answering Machine
Setting Up Fax Features
Setting Up Contacts and Contact Groups
Sending Faxes
Receiving Faxes

**Connecting a Telephone or Answering Machine**

You must connect your product to a telephone wall jack to send or receive faxes. If you want to use the same telephone line to receive calls, you can connect a telephone or answering machine to your product using an additional phone cable.

**Note:** If you do not connect a telephone to your product, make sure Receive Mode is set to **Auto**. Otherwise, you cannot receive faxes.
1. Connect a phone cable to your telephone wall jack and to the **LINE** port on your product.

**Note:** If you have a DSL or ISDN connection, you must connect the appropriate DSL filter, or ISDN terminal adapter or router to the wall jack to be able to use the line for faxing or voice calls using your product. Contact your DSL or ISDN provider for the necessary equipment.
2. If you are connecting a telephone or answering machine to your product using a second phone cable, remove the cap from the **EXT** port on your product.

3. Connect a second phone cable to your telephone or answering machine and to the **EXT** port on your product.

**Note:** If you connect an answering machine and Receive Mode is set to **Auto**, set the number of rings before your product answers a call to a number that is higher than your answering machine's setting for the number of rings.

Any phone or answering machine must be connected to the **EXT** port for your product to detect an incoming fax call when the phone is picked up. Epson cannot guarantee compatibility with VoIP, cable phone systems, or fiberoptic digital services such as FIOS.

**Parent topic:** Faxing
Setting Up Fax Features

Before faxing with your product, set up your fax header and select the fax features you want to use.

**Note:** If you leave your product unplugged for a long period of time, you may need to reset the date and time settings for faxes.

OK Proceed
```

3. Press the up or down arrow button, select Fax Setting Wizard, and press the OK button.
4. Press the up arrow button to start setting up your fax settings.
5. Use the numeric keypad to enter the sender name for your fax source, such as your name or a business name. You can enter up to 40 characters. Press the OK button when you are done.
6. Use the numeric keypad to enter your fax number, up to 20 characters. Press the OK button when you are done.
7. On the Distinctive Ring Setting screen, do one of the following:
   • If you have subscribed to a distinctive ring service from your telephone company, press the up arrow button. Then, select the ring pattern to be used for incoming faxes and go to step 10.
   • If you do not have distinctive ring service, press the down arrow button and go to the next step.

   **Note:**
   • Distinctive ring service allows you to have several phone numbers on one phone line. Each number is assigned a different ring pattern. You can use one number for voice calls and another for fax calls. Select the ring pattern assigned to fax calls in the DRD Setting.
   • If you select On or one of the ring patterns other than All, Receive Mode is automatically set to Auto.
8. Do one of the following:
   • If you connected an external telephone or answering machine to the product's EXT port, press the up arrow button and go to the next step.
   • If you did not connect an external telephone or answering machine, press the down arrow button and go to step 11.

9. Do one of the following:
   • If you connected an external telephone or answering machine to the product's EXT port, press the up arrow button to receive faxes automatically or press the down arrow to receive them manually.
     
     **Note:** If you have connected an external answering machine and selected to receive faxes automatically, make sure the **Rings to Answer** setting is correct. If you select to receive faxes manually, you need to answer every call and use the product's control panel or your phone to receive faxes.

   • If you did not connect an external telephone or answering machine, press the up arrow button to receive faxes automatically.
     
     **Note:** When no external telephone is connected to the product, Receive Mode must be set to **Auto**; otherwise you cannot receive faxes.

10. Press the **OK** button.

11. On the Confirm Settings screen, confirm the displayed settings and press the OK button. (Press the back button if you need to correct or change the settings.)

12. Press the **OK** button to check the fax connection and print a report of the check result. If there are any errors reported, try the solutions on the report, and run the check again.

**Note:**
   • If the Select Line Type screen is displayed, select the correct line type.
   • If the Select Dial Tone Detection screen is displayed, select **Disable**. However, disabling the dial tone detection function may drop the first digit of a fax number and send the fax to the wrong number.

**Parent topic:** Setting Up Fax Features Using the Product Control Panel
Selecting the Line Type

If you connect the product to a PBX (Private Branch Exchange) phone system or terminal adapter, you must change the product's line type. PBX is used in office environments where an external access code such as “9” must be dialed to call an outside line. The default Line Type setting is PSTN (Public Switched Telephone Network), which is a standard phone line, similar to the one in your home.

**Note:** This setting can be locked by an administrator. If you cannot access or change this setting, contact your administrator for assistance.

1. Press the up or down arrow button, select **Setup**, and press the **OK** button.
2. Press the up or down arrow button, select **Fax Settings**, and press the **OK** button.
3. Press the up or down arrow button, select **Basic Settings**, and press the **OK** button.
4. Press the up or down arrow button, select **Line Type**, and press the **OK** button.
   
   You see this screen:

   ![Basic Settings](image)

5. If you connected the product to a PBX phone system, select **PBX**.
   
   You see this screen:

   ![Basic Settings](image)
6. Select **Use** and press the **OK** button.
7. To enter an access code number (9 for example), use the numeric keypad to enter the code number and press the **OK** button.

**Parent topic:** Setting Up Fax Features Using the Product Control Panel

## Setting the Number of Rings to Answer

If you connect an external answering machine and select to receive faxes automatically, make sure the **Rings to Answer** setting is correct. The number of rings should be higher than the number of rings your answering machine is set to for answering a call.

1. Press the up or down arrow button, select **Setup**, and press the **OK** button.
2. Press the up or down arrow button, select **Fax Settings**, and press the **OK** button.
3. Press the up or down arrow button, select **Receive Settings**, and press the **OK** button.
4. Select **Rings to Answer** and press the **OK** button.

   You see this screen:

   ![Receive Settings screen](image)

5. Select the number of rings and press the **OK** button. Make sure to select a number higher than the number of rings your answering machine is set to for answering a call.

   **Note:** The answering machine picks up every call faster than the product, but the product can detect fax tones and start receiving faxes. If you answer the phone and hear a fax tone, check that the product has started receiving the fax, then hang up.

**Parent topic:** Setting Up Fax Features Using the Product Control Panel

## Selecting Advanced Fax Settings

You can use the product's control panel to select settings for sending, receiving, and printing faxes.
1. Press the up or down arrow button, select **Setup**, and press the **OK** button.
2. Press the up or down arrow button, select **Fax Settings**, and press the **OK** button.

   You see this screen:

   ![Fax Settings Screen](image)

3. Select the group of settings you want to change.

Dialing Fax Numbers from a Connected Telephone

If you have connected a telephone to the EXT port on your product, you can send a fax by dialing the number from the connected telephone. If the recipient’s phone number and fax number are the same, you can speak to the recipient before sending the fax.

1. Place your original on the product for faxing.

   **Note:** You can send up to 100 pages in a single transmission.

2. Pick up the handset of the connected phone.

3. Select **Send** and dial the fax number from the connected telephone. Speak to the recipient if necessary.

   **Note:** If you are using a pre-paid calling card, enter the number and password required to use the card before entering the destination fax number.

4. Press the **OK** button and select your fax settings.

5. When you hear a fax tone, press one of the **Iniciar** buttons to start sending the fax.

6. Hang up the telephone.

   **Note:** If your recipient's fax machine does not print in color, your fax is automatically sent in black-and-white.

Parent topic: Sending Faxes from the Product Control Panel
Sending a Fax at a Specified Time

You can send a fax at a time of your choice.

**Note:** You can send faxes only in black-and-white when you use this option.

1. Place your original on the product for faxing.
2. Press the up or down arrow button, select Fax, and press the OK button.
   You see a screen like this:

   ![Fax screen example](image)

3. Enter a fax number or select a number from the Contacts list and press the OK button.

   **Note:** If necessary, enter an outside line access code (such as 9) at the beginning of the fax number. If the access code has been set up in the Line Type setting, enter the # pound sign instead of the code.

4. Press the OK button to change the fax settings.
5. Select **Send Fax Later** and press the OK button.
6. Select **On**, use the buttons on the numeric keypad to enter your desired time, and press the **OK** button.

**Note:** You cannot send another fax until the delayed fax is sent.

7. Press the 🔄 back button.
8. Press one of the **Iniciar** buttons.

**Note:** To cancel faxing, press the 🔄 **Cancelar/Reiniciar** button and then press the up arrow button.

After scanning your originals, your product dials the number and sends the fax at the specified time.

**Note:** If the product is turned off at the specified time, the fax is sent when you turn it back on.

**Sending Faxes Using the Fax Utility - Windows**

You can send a fax from a printing program in Windows. You can fax up to 100 pages at a time, including a cover sheet.

1. Open the file you want to fax and select the print command.
2. Select your product with the **FAX** option as the printer.

3. To change the Paper Size, Orientation, Color, Image Quality, or Character Density settings, click the **Preferences** or **Properties** button.

   **Note:** If you see a **Setup, Printer, or Options** button, click it. Then click **Preferences** or **Properties** on the next screen. For more information about selecting fax print settings, click **Help**.

4. Select the Page Range as necessary. (Leave the Number of copies set to 1.)

5. Click **Print** or **OK**.
If you’re faxing for the first time, you see a window like this one:

6. Enter your sender information so that recipients can identify the origin of the fax. Then click **OK** to save the sender information.
7. Enter the recipient’s name and fax number or select a recipient from the phonebook, then click **Next**.

   **Note:** For detailed instructions on using the Epson FAX Utility, click **Help**.

8. Select a cover sheet and enter a subject and message, then click **Next**.
9. Click **Send** to transmit your fax.

**Parent topic:** Sending Faxes

### Sending Faxes Using the Fax Utility - OS X

You can send a fax from an OS X printing program using the FAX Utility. You can fax up to 100 pages at a time, including a cover sheet.

1. Open the file you want to fax.
2. Select the print command in your application.

   **Note:** You may need to select a print icon on your screen, the Print option in the File menu, or another command. See your application's help utility for details.

![Printer Settings](image)

3. Select your product **FAX** option as the Printer setting.
4. If necessary, click the arrow next to the Printer setting or the **Show Details** button to expand the print window.
5. Select the number of pages you are faxing as the Pages setting.

   **Note:** Leave the Copies setting set to 1.

6. Select **Recipient Settings** from the pop-up menu.
7. Do one of the following to choose your recipient:
   - Select a name or group from the **Recipient List**.
   - Enter a name, company, and fax number and click the + button.
   - Click the icon and select a recipient from your address book.

8. Select **Fax Settings** from the pop-up menu.
You see this window:

![Fax Settings window]

9. Select the **Color** and **Image Quality** settings you want to use for your fax.
10. Click **Fax**.

**Parent topic:** Sending Faxes

## Receiving Faxes

See these sections to receive faxes with your product.

**Note:** Do not turn the product off while it is receiving a fax. Otherwise, the fax transmission will be lost.

- Fax Reception
- Receiving Faxes Automatically
- Receiving Faxes Manually
- Receiving a Fax by Polling

**Parent topic:** Faxing

## Fax Reception

Your product will automatically receive and print faxes when you set the Receive Mode to **Auto**.
If you connected a telephone to your product so you can use the same phone line for faxes and voice calls, you can also set your product to receive faxes manually. This allows you to check for a fax tone using the telephone and press a button on your product to receive the fax.

Make sure to load paper in your product and select your fax settings before receiving a fax.

**Note:** If you run out of paper during fax printing, load more paper and press the button indicated on your product’s LCD screen to continue.

**Note:** Do not turn the product off while it is receiving a fax. Otherwise, the fax transmission will be lost.

**Parent topic:** Receiving Faxes

### Receiving Faxes Automatically

To receive faxes automatically, make sure Receive Mode is set to **Auto** (the default setting for the product).

To change the Receive Mode setting if necessary, select **Setup > Fax Settings > Receive Settings > Receive Mode**.

If an answering machine is connected, make sure the product's **Rings to Answer** setting is set higher than the number of rings your answering machine is set to answer a call. For example, if the answering machine is set to pick up on the fourth ring, set the product to pick up on the fifth ring or later.

**Parent topic:** Receiving Faxes

**Related tasks**

- Receiving Faxes Manually

### Receiving Faxes Manually

You can set up your product to receive faxes manually by setting the Receive Mode to **Manual**. This lets you check for a fax tone on the connected telephone before receiving a fax.

1. When the connected telephone rings, answer the call.
2. If you hear a fax tone, select **Receive** on the product control panel.
3. Press one of the **Iniciar** buttons to start receiving the fax.
4. Hang up the telephone.

**Parent topic:** Receiving Faxes
Receiving a Fax by Polling

You can use polling to receive a fax from another fax machine (such as a fax information service).

1. Press the up or down arrow button, select Fax, and press the OK button.

   You see a screen like this:

   ![Fax screen](image)

   - Fax
   - 15:18
   - Enter a fax number.
   - OK Menu

2. Press the OK button.
3. Press the up or down arrow button, select Polling Receive, and select On.
4. Press the 3 back button.
5. Enter the fax number.
6. Press one of the Iniciar buttons to start receiving the fax.

Refilling Ink

Periodically check the ink tanks to see if they need to be refilled.
Before checking the ink level or refilling an ink tank as described here, be sure to read the ink safety precautions.

Caution: Visually check the ink levels in the product’s ink tanks to confirm the actual ink levels. Continued use of the product when the ink is expended could damage the product.

Ink Safety Precautions

Check Ink Levels
Purchase Epson Ink
Refilling the Ink Tanks

Ink Safety Precautions

Note: The product has a low ink alert system. The accuracy of this system depends on the user refilling the ink tanks correctly. The product cannot directly measure the ink levels in the tanks; instead it estimates the amount of ink remaining by internally monitoring ink usage. The low ink alert system may generate inaccurate messages if the ink tanks are not refilled according to these instructions.

Visually check the ink levels in the product’s ink tanks to confirm the actual ink levels. Continued use of the product when the ink is expended could damage the product.

Ink Handling Precautions

• Keep ink bottles and the ink tank unit out of the reach of children. Do not allow children to drink from or handle the ink bottles and bottle caps.
• Do not tilt or shake an ink bottle after removing its seal; otherwise, ink may leak.
• If ink gets on your skin, wash it thoroughly with soap and water. If ink gets into your eyes, flush them immediately with water. If ink gets into your mouth, spit it out immediately. Seek medical advice if problems persist.

Ink Refilling Precautions

• Use ink bottles with the correct part number for this product.
• Do not mix with other Epson ink types.
• The use of non-Epson ink may cause damage that is not covered by Epson’s warranty, and under certain circumstances, may cause erratic product behavior.

• This product requires careful handling of ink. Ink may splatter when the ink tanks are filled or refilled with ink. If ink gets on your clothes or belongings, it may not come off.

• Do not open the ink bottle package until you are ready to fill an ink tank. Ink bottles are vacuum packed to maintain reliability. If you leave an ink bottle unpacked for a long time before using it, print quality may be affected.

• Visually check the ink levels in the product’s ink tanks to confirm the actual ink levels. Continued use of the product when the ink is expended could damage the product.

• Epson recommends filling an ink tank to the upper line before resetting the ink level.

• For optimum printing results, refill the ink tanks to the upper line at least once a year.

• After bringing an ink bottle inside from a cold storage site, allow it to warm up at room temperature for at least three hours before using it.

• Store ink bottles in a cool, dark place.

• Store the ink bottles in the same environment as the product. When storing or transporting an ink bottle after removing its seal, do not tilt the bottle and do not subject it to impacts or temperature changes. Otherwise, ink may leak even if the cap on the ink bottle is tightened securely. Be sure to keep the ink bottle upright when tightening the cap, and take measures to prevent ink from leaking when you transport the bottle.

**Ink Bottle and Ink Tank Information**

• To maintain optimum print head performance, some ink is consumed from all ink tanks during printing and when performing maintenance operations, such as cleaning the print head.

• The ink bottles may contain recycled materials, but this does not affect product function or performance.

• When printing in monochrome or grayscale, color ink may be used instead of black ink, depending on the paper type or print quality settings. This is because a mixture of color inks is used to create black.

**Parent topic:** Refilling Ink

## Check Ink Levels

Your product and its printing software will let you know when an ink tank is low or expended.

Related tasks
Refilling the Ink Tanks

Checking Ink Levels with Windows

A low ink reminder appears if you try to print when ink is low, and you can check your ink levels at any time using a utility on your Windows computer.

1. To check your ink levels, access the Windows Desktop and double-click the product icon in the Windows taskbar.
You see a window like this:

2. Refill any ink tank as needed.

   **Note:** The ink levels displayed are an estimate and may differ from the actual ink remaining in the ink tanks. To confirm the actual remaining ink, visually check the ink levels in the ink tanks. Continued use of the product when the ink level is below the lower line on the tank could damage the product.

**Parent topic:** Check Ink Levels  
**Related tasks**  
Refilling the Ink Tanks
Checking Ink Levels with OS X

You can check your ink levels using a utility on your Mac.

1. In the Apple menu or the Dock, select System Preferences. Select Print & Fax, Print & Scan, or Printers & Scanners, select your product, and select Options & Supplies. Select Utility and select Open Printer Utility.

2. Select EPSON Status Monitor.

You see a window like this:

![EPSON Status Monitor](image)

3. Refill any ink tank as needed.

**Note:** To update or refresh the displayed ink levels, click Update.

**Note:** The ink levels displayed are an estimate and may differ from the actual ink remaining in the ink tanks. To confirm the actual remaining ink, visually check the ink levels in the ink tanks. Continued use of the product when the ink level is below the lower line on the tank could damage the product.
Disabling Special Offers with Windows

You can disable special offers messages from Epson using a utility on your Windows computer.

**Note:** You may see the Epson Special Offers screen every time you print (if your computer is connected to the Internet). Select *Do not display this message again* and click *Decline* to disable online offers. Promotional offers are not valid in Latin America.

1. Right-click the product icon in the Windows taskbar and select *Monitoring Preferences*.
You see this window:

2. To disable promotional offers, deselect the **Display Epson Offers** checkbox. (Promotional offers not available in Latin America.)

*Parent topic: Check Ink Levels*
Purchase Epson Ink

You can purchase genuine Epson ink and paper from an Epson authorized reseller. To find the nearest reseller, visit global.latin.epson.com or call your nearest Epson sales office (website available in Spanish and Portuguese only).

Note: This product was originally designed to work with genuine Epson inks. Your product may not function properly if you use other types of ink and may affect Epson's warranty.

The included ink bottles must be used for printer setup and are not for resale. The printer ships with full ink bottles and part of the ink from the first bottles is used to charge the print head. Yields vary considerably based on images printed, print settings, paper type, frequency of use, and temperature.

The ink bottles that came with your printer have a lower yield due to the ink charging process. This process is carried out the first time you turn on the printer and guarantees better performance. Do not load paper before refilling the ink tanks.

Ink Bottle Part Numbers

Use these part numbers when you order or purchase new ink bottles, and use the ink by the date printed on the package:

<table>
<thead>
<tr>
<th>Ink color</th>
<th>Part number</th>
</tr>
</thead>
<tbody>
<tr>
<td>Black</td>
<td>774</td>
</tr>
<tr>
<td>Cyan</td>
<td>664</td>
</tr>
<tr>
<td>Magenta</td>
<td>664</td>
</tr>
<tr>
<td>Yellow</td>
<td>664</td>
</tr>
</tbody>
</table>

Refilling the Ink Tanks

Make sure you have new ink bottles handy and have read the ink safety precautions before you begin.

You can continue to use the product even if one or more ink tanks are not filled all the way. However, for the most accurate ink level monitoring, fill all the ink tanks up to the top line. For optimum printing results, refill the ink tanks to the upper line at least once a year.
Caution: Wear disposable gloves while refilling the ink tanks to avoid staining your hands. If ink spills, wipe it off immediately with a damp towel to avoid permanent stains. If ink gets on your clothes or belongings, it may not come off.

1. Place a sheet of paper under the ink tank unit, as ink may splatter.
2. Turn on your product.
3. If you see a message on the LCD screen telling you to reset the ink levels, note the ink tanks that need refilling and press the OK button. Otherwise, select Setup > Maintenance > Reset Ink Levels and press the Iniciar Color button.
4. Open the ink tank unit cover, then remove the ink tank cap and place it in the holder shown here.
Note: Make sure the color of the ink tank label matches the ink color you want to refill, and only remove the cap from that ink tank. Be careful not to spill any ink.

5. Snap off the tip of the bottle cap, but do not dispose of it so you can use it to seal the bottle cap later, if necessary. Then remove the bottle cap and carefully remove the protective seal (avoid touching the ink underneath the seal). Close the bottle cap tightly.

Caution: Close the bottle cap tightly; otherwise, ink may leak.

Warning: If ink gets on your skin, wash it thoroughly with soap and water. If ink gets into your eyes, flush them immediately with water. If ink gets into your mouth, spit it out immediately. Seek medical advice if problems persist. Keep the ink bottles out of the reach of children and do not drink the ink.
6. Refill the ink tank with the correct color ink up to the upper line on the ink tank.

7. If any ink remains in the ink bottle after filling the ink tank, place the bottle cap tip securely on the bottle cap and store the ink bottle upright for later use.

8. Replace the ink tank cap securely.
9. Repeat the previous steps as necessary for each ink tank you need to refill.

10. Close the ink tank unit cover.

11. Press the **OK** button twice.

   You see this screen:

   ![Screen with ink levels information]

12. Press the left or right arrow buttons to highlight the ink tank you refilled and press the **OK** button to select it. Repeat for each ink tank color you refilled.

13. Press the **Iniciar Color** button when you are done to reset the ink levels.

**Note:** The product has a low ink alert system. The accuracy of this system depends on the user refilling the ink tanks correctly. The product cannot directly measure the ink levels in the tanks; instead it estimates the amount of ink remaining by internally monitoring ink usage. The low ink alert system may generate inaccurate messages if the ink tanks are not refilled according to these instructions.
Visually check the ink levels in the product's ink tanks to confirm the actual ink levels. Continued use of the product when the ink is expended could damage the product.

1. In the Apple menu or the Dock, select System Preferences. Select Print & Fax, Print & Scan, or Printers & Scanners, select your product, and select Options & Supplies. Select Utility and select Open Printer Utility.
2. Select Printer and Option Information.

5. After checking the number of sheets fed into the printer, click OK to close the window.

   **Note:** The number of sheets is displayed only when Epson Status Monitor 3 is enabled.

**Parent topic:** Checking the Number of Sheets

### Checking the Sheet Counter - OS X

You can check the number of sheets of paper that have fed through the product by checking the sheet counter.

1. In the Apple menu or the Dock, select System Preferences. Select Print & Fax, Print & Scan, or Printers & Scanners, select your product, and select Options & Supplies. Select Utility and select Open Printer Utility.
2. Select Printer and Option Information.

**Note:** The number of sheets is displayed only when Epson Status Monitor 3 is enabled.
You see this window:

3. After checking the number of sheets fed into the printer, click OK to close the window.

Parent topic: Checking the Number of Sheets
Cleaning and Transporting Your Product

See these sections if you need to clean or transport your product.

Cleaning Your Product
Transporting Your Product

Cleaning Your Product

To keep your product working at its best, you should clean it several times a year.
Close the output tray and paper support when you are not using the product to protect it from dust.

Caution: Do not use a hard brush, alcohol, or paint thinner to clean the product or you may damage it. Do not use oil or other lubricants inside the product or let water get inside it.

1. Turn off the product.
2. Unplug the power cable.
3. Disconnect any connected cables.
4. Remove all the paper.
5. Clean the scanner glass with a soft, lint-free cloth (microfiber is recommended), moistened with a little glass cleaner. If you see lines in your scans or copies, clean the left side of the glass carefully.

**Caution:** Do not spray glass cleaner directly on the glass and do not press the glass surface with any force.
6. Open the ADF cover and use a soft, dry, lint-free cloth (microfiber is recommended) to clean the rollers and the interior of the ADF.

7. Clean the outer case and control panel with a soft, dry, lint-free cloth. Do not use liquid or chemical cleansers.

Parent topic: Cleaning and Transporting Your Product

Transporting Your Product

If you need to store your product or transport it some distance, prepare it for transportation as described here.

Caution: During transportation and storage, follow these guidelines:
• Avoid tilting the product, placing it vertically, or turning it upside down; otherwise ink may leak.
• When storing or transporting an ink bottle after removing its seal, do not tilt the bottle and do not subject it to impacts or temperature changes. Otherwise, ink may leak even if the cap on the ink bottle is tightened securely. Be sure to keep the ink bottle upright when tightening the cap, and take measures to prevent ink from leaking when transporting the ink bottles.

• Do not put opened ink bottles in the box with product.

**Note:** Before storing your product for a long period, replace low, expended, or expired ink to help prevent the print head from drying out. Store your product in a cool, dry place.

1. Turn off the product.
2. Lift up the scanner unit and check to see if the print head is in the far right position (the home position). If not, turn on the product, wait for the print head to move to the far right, then turn the product off again.
3. Secure the print head to the case with tape.

**Caution:** Do not place tape on the white flat cable inside the product; otherwise, you may damage your product.

4. Lower the scanner unit.
5. Remove all the paper from the product.
6. Close the output tray, if necessary.

7. Unplug the power cable.
8. Disconnect any connected cables.
9. Open the ink tank unit cover and check to make sure that the ink tank caps are installed securely.

10. Place the product in its original packaging materials, if possible, or use equivalent cushioning around the product.

Be sure to remove the tape from the print head before turning on your product. If print quality has declined when you print again, clean and align the print head.

Checking for Software Updates

Periodically, it's a good idea to check Epson's support website for free updates to your product software. Visit the driver download site at global.latin.epson.com/Support/L655 or global.latin.epson.com/Support/L656.

• **Windows**: Your printer software automatically checks for updates. You can also manually update the software by selecting *Software Update* here:
  • Accessing the Windows Desktop and right-clicking the product icon in the Windows taskbar
  • On the *Maintenance* tab in the printer settings window

You can also update the software by selecting *EPSON Software Updater* in the *EPSON* or *EPSON Software* program group, accessible by the *Start* button, or on the *Start* or *Apps* screens, depending on your version of Windows.
**OS X:** You can manually update the software by opening the Applications > Epson Software folder and selecting EPSON Software Updater.

**Parent topic:** Solving Problems

## Product Status Messages

You can often diagnose problems with your product by checking the messages on its LCD screen.

<table>
<thead>
<tr>
<th>LCD screen message</th>
<th>Condition/solution</th>
</tr>
</thead>
<tbody>
<tr>
<td>Printer error 0xXX</td>
<td>Turn off the product, make sure no paper is jammed, then turn it back on again. If the error continues, contact Epson for support.</td>
</tr>
<tr>
<td>A printer's ink pad is nearing the end of its service life.</td>
<td>The ink pad is near the end of its service life, contact Epson for support. (To continue printing, press one of the Iniciar buttons.)</td>
</tr>
<tr>
<td>A printer's ink pad is at the end of its service life.</td>
<td>The ink pad is at the end of its service life. Turn off the product and contact Epson for support.</td>
</tr>
<tr>
<td>Communication error</td>
<td>Make sure the computer is connected to your product and your software is installed correctly.</td>
</tr>
<tr>
<td>Paper jam</td>
<td>Paper is jammed in the product. Remove the jammed paper and press the OK button to clear the error.</td>
</tr>
<tr>
<td>Invalid IP address and subnet mask</td>
<td>Enter the IP address and subnet mask correctly.</td>
</tr>
<tr>
<td>No dial tone</td>
<td>Make sure the phone cable is connected correctly and the phone line works. If you connected the product to a PBX (Private Branch Exchange) phone line or Terminal Adapter, turn off the Dial Tone Detection setting.</td>
</tr>
<tr>
<td>Recovery mode</td>
<td>An error has occurred during firmware updating. Connect your product using a USB cable and try updating the firmware again. If you still receive this error message, contact Epson for support.</td>
</tr>
</tbody>
</table>

**Note:** The ink pads in the printer collect, distribute, and contain the ink that is not used on printed pages. During the life of your product it may reach a condition where either satisfactory print quality cannot be maintained or the ink pads have reached the end of their usable life. The Epson Status Monitor, your LCD screen, or lights on the control panel will advise you when these parts need replacing. If this happens during the standard warranty of the product, the exchange of the product or replacement of the pads is covered under the standard warranty. If the product is out of warranty, the pads can be replaced by any Epson authorized service provider. The waste ink pads are not a user-replaceable part.
Running a Product Check

Running a product check helps you determine if your product is operating properly.

1. Disconnect any interface cables connected to your product.
2. Load a few sheets of plain paper in the product.
3. Press the up or down arrow button, select Setup, and press the OK button.
   
   You see this screen:

   ![Setup screen]

   Setup
   - Maintenance
   - OK Proceed

   4. Press the up or down arrow button, select Maintenance, and press the OK button.
   5. Press the up or down arrow button, to select Print Head Nozzle Check, and press the OK button.
   6. Press one of the Iniciar buttons.
7. Do the following, depending on the results of the product check:
   • If the page prints and the nozzle check pattern is complete, the product is operating properly. Any operation problem you may have could be caused by your computer, cable, software, or selected settings. Check the other available solutions or try uninstalling and reinstalling your printer software.
   • If the page prints but the nozzle check pattern has gaps, clean or align the print head.
   • If the page does not print, the product may have a problem. Check the other solutions in this manual. If they do not work, contact Epson.

Resetting Control Panel Defaults
If you have a problem with settings on the product control panel, you can reset them to their factory defaults. You can choose which settings to reset or reset them all.

1. Press the up or down arrow button, select **Setup**, and press the **OK** button.
2. Press the up or down arrow button, select **Restore Default Settings**, and press the **OK** button.

You see this screen:
3. Press the up or down arrow button to select one of these options and press the OK button.
   • **Network Settings**: Restores all of the default network settings.
   • **Fax Settings**: Restores all of the fax settings.
   • **Clear All Data and Settings**: Restores all of the default settings and resets contact and network data on the control panel.

   You see a confirmation screen.

4. Press the up arrow button to reset the selected settings. Press the down arrow button if you want to cancel the operation.

### Solving Setup Problems

Check these sections if you have problems while setting up your product.

- **Noise After Filling the Ink**
- **Software Installation Problems**
- **Control Panel Setup Problems**
- **USB Connection Problems**

**Parent topic:** Solving Problems

---

### Noise After Filling the Ink

If you hear noises from your product after filling the ink tanks with ink, check these explanations:

- The first time you fill the tanks with ink, the product must charge its print head. Wait until charging finishes before you turn off the product, or it may charge improperly and use excess ink the next time you turn it on.

- If the product's print head stops moving or making noise, and the charging process has not finished after approximately 20 minutes, turn off your product. Turn it back on and check to see if charging is still in progress. If it is still in progress, contact Epson for help.

**Parent topic:** Solving Setup Problems
Software Installation Problems

If you have problems while installing your product software, try these solutions:

- Make sure your product is turned on and any necessary cables are securely connected at both ends. If you still have problems installing software, disconnect the cable and carefully follow the instructions on the Start Here sheet. Also make sure your system meets the requirements for your operating system.
- Close any other programs, including screen savers and virus protection software, and install your product software again.
- In Windows, make sure your product is selected as the default printer and the correct port is shown in the printer properties.
- If you see any error message or your software does not install correctly in Windows, you may not have software installation privileges. Contact your System Administrator.

USB Connection Problems

If you used a USB cable to connect to a computer that has multiple peripherals, make sure the computer is grounded. Otherwise, you may feel a slight electric shock when touching your product.

Parent topic: Solving Setup Problems
Solving Network Problems

Check these solutions if you have problems setting up or using your product on a network.

**Note**: Breakdown or repair of this product may cause loss of fax and network data and settings. Epson is not responsible for backing up or recovering data and settings during or after the warranty period. We recommend that you make your own backup or print out your fax and network data and settings.

**Product Cannot Connect to a Wireless Router or Access Point**

If your product has trouble finding or connecting to a wireless router or access point, try these solutions:

- If you are connecting the product via Wi-Fi Protected Setup (WPS) and the Wi-Fi icon on your product's LCD screen is not lit or does not appear, make sure you select one of the WPS options from the product control panel within 2 minutes of pressing the WPS button on your router.
- Make sure to place your product within contact range of your 2.4 GHz router or access point. Avoid placing your product near a microwave oven, 2.4 GHz cordless phone, or large metal object, such as a filing cabinet.

**Note**: If you are using a 5 GHz wireless router, set the router to operate in dual band (2.4 GHz and 5 GHz) mode. See your router documentation for instructions.

- Verify that your router or access point is operating correctly by connecting to it from your computer or another device.
- You may need to disable the firewall and any anti-virus software on your wireless router or access point.
- Check to see if access restrictions, such as MAC address filtering, are set on the router or access point. If access restrictions are set, add your product's MAC address to your router's address list. To obtain your product's MAC address, print a network status sheet. Then follow the instructions in your router or access point documentation to add the address to the list.
• If your router or access point does not broadcast its network name (SSID), follow the instructions that came with your product to enter your wireless network name manually.

• If your router or access point has security enabled, determine the kind of security it is using and any required password or passphrase for connection. Then make sure to enter the exact WEP key or WPA passphrase correctly.

• Check if your computer is restricting the available wireless channels. If so, verify that your wireless access point is using one of the usable channels and change to a usable channel, if necessary.

• If you are using a Wi-Fi Direct connection that suddenly disconnects, the Wi-Fi direct password on your device may have been changed. If necessary, delete the existing DIRECT-xxxxxxx connection settings from your device and enter a new password. See your device documentation for instructions.

• If you connected your product to a Windows computer using Wi-Fi Direct and it automatically selected Access Point Mode, you may have trouble accessing a low-priority Internet connection. Check the network connection or adapter settings in the Windows Control Panel and set the Internet metric setting to 100 for your version of the Internet Protocol.

Cannot Print Over a Network

If you cannot print over a network, try these solutions:

• Make sure that your product is turned on.

• Make sure you install your product’s network software as described in your product documentation.

• Print a network status sheet and verify that the network settings are correct. If the network status is Disconnected, check any cable connections and turn your product off and then on again.

• If you are using TCP/IP, make sure the product’s IP address is set correctly for your network. If your network does not assign IP addresses using DHCP, set the IP address manually.

• Make sure your computer and product are both using the same wireless network.
• If network printing is slow, print a network status sheet and check the signal strength. If it is poor, place your product closer to your router or access point. Avoid placing your product near a microwave oven, 2.4 GHz cordless phone, or large metal object, such as a filing cabinet.

**Note:** If you are using a 5 GHz wireless router, set the router to operate in dual band (2.4 GHz and 5 GHz) mode. See your router documentation for instructions.

• Check to see if your wireless router or access point has an enabled Privacy Separator function that is preventing printing from a device over the network. See your router or access point documentation for instructions on disabling the Privacy Separator function.

• If you are connecting the product via Wi-Fi Protected Setup (WPS) and the Wi-Fi icon does not appear on your product’s LCD screen, make sure you select one of the WPS options from the product control panel within 2 minutes of pressing the WPS button on your router.

• Check your wired LAN router or access point to see if the LED for the port to which your product is connected is on or flashing. If the link LED is off, try the following:
  • Make sure the Ethernet cable is securely connected to your product and to your router, access point, switch, or hub.
  • Try connecting your product to a different port or a different router, access point, switch, or hub.
  • Try connecting with a different Ethernet cable.
  • Try printing to your product from another computer on the network.

**Note:** If you are using a 5 GHz wireless router, set the router to operate in dual band (2.4 GHz and 5 GHz) mode. See your router documentation for instructions.

• If you are connecting the product via EpsonNet Setup and the Wi-Fi icon does not appear on the LCD, make sure your product software was installed correctly. If necessary, reinstall your software.

Network Software Cannot Find Product on a Network

If EpsonNet Setup cannot find your product on a network, try these solutions:

• Make sure your product is turned on and connected to your network. Verify connection using your product control panel.

• Check if your network name (SSID) contains non-ASCII characters. Your product cannot display non-ASCII characters.

• Make sure your product is not connected to a guest network.

• If necessary, reinstall your product software and try running EpsonNet Setup again:
  1. Reset your product’s network settings to their factory defaults.
  2. Windows only: uninstall your product software.
  3. Initialize your router following the instructions in your router documentation.

  **Note:** If you are reading these instructions online, you will lose your Internet connection when you initialize your router, so note the next step before initializing it.

  4. Download your product software from the Epson website using the instructions on the *Start Here* sheet.

• If you have replaced your router, reinstall your product software to connect to the new router.

  **Note:** If you are using a 5 GHz wireless router, set the router to operate in dual band (2.4 GHz and 5 GHz) mode. See your router documentation for instructions.

Uninstall Your Product Software

## Cannot Scan Over a Network

If you cannot start Epson Scan for scanning over a network, try these solutions:

• If you cannot scan from your product control panel, make sure you restarted your computer after installing the product software. Make sure the Event Manager program is not being blocked by your firewall or security software.

  **Note:** If you are using a 5 GHz wireless router, set the router to operate in dual band (2.4 GHz and 5 GHz) mode. See your router documentation for instructions.

• If you are scanning a large original at a high resolution, a network communication error may occur. Try scanning again at a lower resolution.

• If network communication was interrupted while starting Epson Scan, exit Epson Scan, wait a few seconds, and restart it. If Epson Scan cannot restart, turn off your product, turn it back on, and try restarting Epson Scan again.

• Check the connection setting and test the connection using Epson Scan Settings:

  **Windows 8.x:** Navigate to the Apps screen and select **EPSON Scan Settings**. Make sure the Connection setting is set to **Network**, then click the **Test** button.

  **Windows (other versions):** Click 🔄 or Start > All Programs or Programs > EPSON > EPSON Scan > EPSON Scan Settings. Make sure the Connection setting is set to **Network**, then click the Test button.
OS X: Open the Applications folder, click Epson Software, and click EPSON Scan Settings. Make sure the Connection setting is set to Network, then click the Test button.

• Make sure the option selected as the Timeout Setting in the Epson Scan Settings program is long enough to complete scanning over a network.

• You may need to disable the firewall and any anti-virus software on your wireless router or access point.

**Parent topic:** Solving Problems

Paper Feeding Problems

If you have problems feeding paper, try these solutions:

- If paper does not feed for printing, remove it. Then reload it in the sheet feeder against the right side and beneath the tab. Slide the edge guide against the edge of the paper, making sure that the paper stack is not above the arrow mark on the edge guide.

- If multiple pages feed at once, remove the paper, fan the edges to separate the sheets, and reload it.

- If paper jams when you load only one or two sheets, try loading more sheets at a time. Do not load more than the recommended number of sheets.

- If paper jams when you print on both sides of the paper, try loading fewer sheets.

- Make sure your paper meets the specifications for your product.

- For best results, follow these guidelines:
  - Use new, smooth, high-quality paper that is not curled, creased, old, too thin, or too thick.
  - Load paper in the sheet feeder printable side up.
  - Follow any special loading instructions that came with the paper.

Paper Jam Problems Inside the Product

If paper has jammed inside the product, follow the steps here to clear the jam.
1. Cancel the print job, if necessary.
2. Lift the scanner unit.

Caution: Do not touch the flat white cable inside the printer. Do not lift the scanner unit while the document cover is open.
3. Remove any paper inside, including torn pieces.

4. Close the scanner unit.

5. Follow the prompts on the LCD screen to clear any error messages. If you still see a paper jam message, check the other paper jam solutions.

Paper Jam Problems in the Paper Cassette

If paper has jammed in a paper cassette, follow the steps here to clear the jam.

1. Cancel the print job, if necessary.
2. Pull out the paper cassette.

3. Carefully remove any paper jammed inside the product.

4. Gently insert the paper cassette.

5. Follow the prompts on the LCD screen to clear any error messages. If you still see a paper jam message, check the other paper jam solutions.
Paper Jam Problems in the Duplexer (Rear Cover)

If paper has jammed in the duplexer (rear cover), follow the steps here to clear the jam.

1. Cancel the print job, if necessary.
2. Press the tabs and remove the duplexer.
3. Carefully remove any jammed paper.
4. Remove any jammed paper from the duplexer.

5. Open the duplexer and carefully remove any jammed paper stuck inside.
6. Reattach the duplexer.

7. Follow the prompts on the LCD screen to clear any error messages. If you still see a paper jam message, check the other paper jam solutions.

Document Jams in the Automatic Document Feeder

Document Jams in the Automatic Document Feeder

If you have problems with document jams in the automatic document feeder (ADF), follow the steps here to clear the jam.

1. Cancel the print job, if necessary.
2. Remove your originals from the ADF.
3. Open the ADF cover.

**Caution:** Make sure you open the ADF cover before removing any jammed pages. Otherwise the product may be damaged.

4. Carefully remove any jammed pages.
5. Close the ADF cover, then open the document cover.

6. Carefully remove any jammed pages in the direction shown.

7. Close the document cover.
8. Raise the ADF input tray and carefully remove any jammed pages.

9. Lower the ADF input tray to its original position.

10. Reload your originals.

**Caution:** Make sure you do not load the ADF beyond its capacity for your paper size. Also make sure your originals are not bent, folded, or curled and do not have tape, staples, or other materials that could obstruct the feeder.

11. Follow the prompts on the LCD screen to clear any error messages. If you still see a paper jam message, check the other paper jam solutions.

Solving Problems Printing from a Computer

Check these sections if you have problems while printing from your computer.

Note: When printing using AirPrint, the available print settings are different from those covered in this manual. See the Apple website for details.

Nothing Prints
Product Icon Does Not Appear in Windows Taskbar
Printing is Slow

Parent topic: Solving Problems
Nothing Prints

If you have sent a print job and nothing prints, try these solutions:

- Make sure your product is turned on.
- Make sure any interface cables are connected securely at both ends.
- If you connected your product to a USB hub, make sure it is a first-tier hub. If it still does not print, connect your product directly to your computer instead of the hub.
- Run a product check to see if a test page prints. If the test page prints, check to see if your product software is installed correctly.
- If you are printing a large image, the computer may not have enough memory. Print the image at a lower resolution or a smaller file size.
- In Windows, click Print Queue on the Maintenance tab in the printer settings window and check for the following:
  - Check for any stalled or paused print jobs. Cancel or unpause any jobs as necessary.
  - Open the Printer menu and make sure the product is not offline.
  - Open the Printer menu and set the product as the default printer, if necessary.
- In OS X, select System Preferences from the Apple menu or Dock, select Print & Scan or Printers & Scanners, then double-click your printer icon. Check to see if any jobs are paused. Cancel or resume any jobs as necessary.

Parent topic: Solving Problems Printing from a Computer

Related tasks
Running a Product Check

Product Icon Does Not Appear in Windows Taskbar

If you do not see your product icon in the Windows taskbar, first try restarting your computer. If that does not work, try this solution:

1. Do one of the following:
   - Windows 8.x: Navigate to the Apps screen and select Control Panel > Hardware and Sound > Devices and Printers.
   - Windows 7: Click and select Devices and Printers.
   - Windows Vista: Click , select Control Panel, and click Printer under Hardware and Sound.
• **Windows XP**: Click **Start** and select **Printers and Faxes**. (Or open the **Control Panel**, select **Printers and Other Hardware**, if necessary, and **Printers and Faxes**.)

2. Right-click your product name, select **Printing Preferences**, and select your product name again if necessary.

3. Click the **Maintenance** tab.

4. Click the **Extended Settings** button.

5. Select **Enable EPSON Status Monitor 3**, then click **OK**.

6. Click the **Monitoring Preferences** button.

7. Click the checkbox for the option that adds the shortcut icon to the taskbar.

8. Click **OK** to close the open program windows.

**Parent topic:** Solving Problems Printing from a Computer

---

**Printing is Slow**

If printing becomes slow, try these solutions:

• Make sure your system meets the requirements for your operating system. If you are printing a high-resolution image, you may need more than the minimum requirements. If necessary, increase your system's memory.

• If you are using Windows 7, close the **Devices and Printers** window before you print.

• If you are using OS X, make sure you download and install the Epson printer driver.

• Make sure **Quiet Mode** is turned off.

• Clear space on your hard drive or run a defragmentation utility to free up existing space.

• Close any programs you are not using when you print.

• If your product is connected to a USB hub, connect it directly to your computer instead.

• If printing becomes slower after printing continuously for a long time, the product may have automatically slowed down to protect the print mechanism from overheating or becoming damaged. Let the product rest with the power on for 30 minutes, then try printing again.

For the fastest printing, select the following settings in your product software:

• Make sure the paper type setting matches the type of paper you loaded.

• Turn on any high speed settings in your product software.

• Select a lower print quality setting.
• Make sure the ink drying time has not been increased for double-sided printing.

• **Windows**: Click the **Maintenance** or **Utility** tab, select **Extended Settings** or **Speed and Progress**, and select the following settings:
  • **Always Spool RAW Datatype**
  • **Page Rendering Mode**
  • **Print as Bitmap**

**Solving Page Layout and Content Problems**

Check these sections if you have problems with the layout or content of your printed pages.

**Note**: When printing using AirPrint, the available print settings are different from those covered in this manual. See the Apple website for details.

Inverted Image
Too Many Copies Print
Blank Pages Print
Incorrect Margins on Printout
Incorrect Characters Print
Incorrect Image Size or Position
Slanted Printout

Parent topic: Solving Problems
Inverted Image

If your printed image is inverted unexpectedly, try these solutions:

• Turn off any mirror or inversion settings in your printing application.

• Turn off the **Mirror Image**, **Flip horizontally**, or **Reverse page orientation** settings in your printer software. (This option has different names, depending on your operating system version.)

**Parent topic:** Solving Page Layout and Content Problems

**Related tasks**

- Selecting Additional Layout and Print Options - Windows
- Selecting Basic Print Settings - OS X

Too Many Copies Print

Make sure that the **Copies** setting in your printing program or printer software is not set for multiple copies.

**Parent topic:** Solving Page Layout and Content Problems

Blank Pages Print

If blank pages print unexpectedly, try these solutions:

• Make sure you selected the correct paper size settings in your printing program and printer software.

• If a blank page exists in a document you are printing and you want to skip printing it, select the **Skip Blank Page** setting in your printer software.

• Run a print head nozzle check to see if any of the nozzles are clogged. Then clean the print head, if necessary.

• Make sure your product is selected as the printer in your printing program.

• You may need to refill the ink. Visually check the ink levels.

**Parent topic:** Solving Page Layout and Content Problems

Incorrect Margins on Printout

If your printed page has incorrect margins, try these solutions:

- Make sure you selected the correct paper size settings in your printing program and printer software.
- Make sure you selected the correct margins for your paper size in your printing program.
- Make sure your paper is positioned correctly for feeding into the printer.

You can use the preview option in your printer software to check your margins before you print.

Incorrect Characters Print

If incorrect characters appear in your prints, try these solutions before reprinting:

- Make sure any cables are securely connected at both ends.
- In Windows, delete all jobs from the Windows Spooler. Click Print Queue on the Maintenance tab in the printer settings window, and cancel any stalled print jobs.
- If your product is connected to a USB hub, connect it directly to your computer instead.
- If your computer entered sleep mode the last time you printed, the next print job after your computer exits sleep mode may contain garbled characters. Print your document again.
- If incorrect characters still appear in your prints, try connecting your product using a different cable.

Incorrect Image Size or Position

If your printed image is the wrong size or in the wrong position, try these solutions:

• Make sure you selected the correct paper size and layout settings in your printing program and printer software.
• Make sure you selected the correct paper size on the control panel.
• Make sure your paper is positioned correctly for feeding into the printer.
• Clean the scanner glass and document cover.

You can use the preview option in your printer software to check your margins before you print.

Slanted Printout

If your printouts are slanted, try these solutions:

• Slide the edge guides against the edges of the paper.
• Select a higher print quality setting in your printer software.
• Turn off any high speed settings in your product software.
• Align the print head.
• Make sure the product is not printing while tilted or at an angle.

Solving Scanned Image Quality Problems

---

**White or Dark Lines in Printout**

If you notice white or dark lines in your prints (also called banding), try these solutions before you reprint:

- Run a nozzle check to see if any of the print head nozzles are clogged. Then clean the print head, if necessary.
- Make sure the paper type setting matches the type of paper you loaded.
- Make sure you loaded the printable side of the paper correctly for your product.
- Turn off any high speed settings in your product software.
- Align the print head.
- You may need to refill the ink. Visually check the ink levels.
- If you have not used the product for a long time, run the Power Ink Flushing utility.

**Note:** Flushing the ink tubes replaces all the ink inside the tubes, so flush the ink only if you cannot improve print quality by other means. See the ink flushing section for details.

**Parent topic:** Solving Print Quality Problems

**Related concepts**

Print Head Nozzle Check
Blurry or Smeared Printout

If your printouts are blurry or smeared, try these solutions:

- Make sure your paper is not damp, curled, old, or loaded incorrectly in your product.
- Use a support sheet with special paper, or load special paper one sheet at a time.
- Make sure your paper meets the specifications for your product.
- Use Epson papers to ensure proper saturation and absorption of genuine Epson inks.
- Make sure the paper type setting in your product software matches the type of paper you loaded.
- Make sure you loaded the printable side of the paper correctly for your product.
- Remove each sheet from the output tray as it is printed.
- Avoid handling printouts on glossy paper right after printing to allow the ink to set.
- Turn off any high speed settings in your product software.
- If you print on both sides of a sheet of paper, smudges may appear on the reverse side of heavily saturated or dark images. If one side of a sheet will contain a lighter image or text, print that side first. Adjust the Print Density and/or Increase Ink Drying Time settings.
- If printed copies are smeared, lower the copy density setting on the product control panel.
- Run a nozzle check to see if any of the print head nozzles are clogged. Then clean the print head, if necessary.
- Align the print head.
- Clean the paper path.
• If you have not used the product for a long time, run the Power Ink Flushing utility.

**Note:** Flushing the ink tubes replaces all the ink inside the tubes, so flush the ink only if you cannot improve print quality by other means. See the ink flushing section for details.

**Note:** Your product will not operate properly while tilted at an angle. Place it on a flat, stable surface that extends beyond the base of the product in all directions.

**Faint Printout or Printout Has Gaps**

If your printouts are faint or have gaps, try these solutions:

• Run a nozzle check to see if any of the print head nozzles are clogged. Then clean the print head, if necessary.

• The ink levels may be low. Visually check the ink levels.

• Make sure the paper type setting matches the type of paper you loaded.

• Make sure your paper is not damp, curled, old, or loaded incorrectly in your product.
• Align the print head.
• Clean the paper path.

### Grainy Printout

If your printouts are grainy, try these solutions:

- Make sure you loaded the printable side of the paper correctly for your product.
- Select a higher print quality setting and turn off any high speed settings in your product software.
- Run a nozzle check to see if any of the print head nozzles are clogged. Then clean the print head, if necessary.
- Align the print head.
- You may need to increase the image resolution or print a smaller size; see your software documentation.

**Note:** Images from the Internet may be low resolution and not result in a high quality printout.

- If you enlarged the image in an image-editing program, you need to increase the resolution setting to retain a high image quality. Increase the resolution by the same amount you increased the image size. For example, if the resolution is 300 dpi (dots per inch) and you will double the image size later, change the resolution setting to 600 dpi.
**Note:** Higher resolution settings result in larger file sizes, which take longer to process and print. Consider the limitations of your computer system when selecting a resolution, and select the lowest possible resolution that produces acceptable quality to keep file sizes manageable.

**Parent topic:** Solving Print Quality Problems

**Related concepts**

**Incorrect Colors**

If your printouts have incorrect colors, try these solutions:

- Make sure the paper type setting matches the paper you loaded.
- Make sure the **Black/Grayscale** or **Grayscale** setting is not selected in your printer software.
- If you selected **Standard-Vivid** (Windows) or **Normal-Vivid** (OS X) as the quality setting in the printer software, try selecting **Standard** (Windows) or **Normal** (OS X) instead.
- Run a nozzle check to see if any of the print head nozzles are clogged. Then clean the print head, if necessary.
- The ink levels may be low and you may need to refill the ink. Visually check the ink levels. Also make sure you filled the tanks with the correct colors of ink.
- After you print, the colors in your printout need time to set as the ink dries. During this time, the colors may look different than you expect. To speed up drying time, do not stack your printouts on top of each other.
- Your printed colors can never exactly match your on-screen colors. However, you can use a color management system to get as close as possible. Try using the color management options in your printer software.
- For best results, use genuine Epson ink and paper.
- If you have not used the product for a long time, run the Power Ink Flushing utility.
Note: Flushing the ink tubes replaces all the ink inside the tubes, so flush the ink only if you cannot improve print quality by other means. See the ink flushing section for details.

Solving Scanning Problems
Check these solutions if you have problems scanning with your product.

Scanning Software Does Not Operate Correctly
Cannot Start Epson Scan

Parent topic: Solving Problems

Scanning Software Does Not Operate Correctly
If your scanning software does not operate correctly, try these solutions:

• Make sure your computer has adequate memory and meets the system requirements for your operating system.

• Make sure your computer is not running in a power-saving mode, such as sleep or standby. If so, wake your system and restart your scanning software.

• If you upgraded your operating system but did not reinstall your scanning software, try reinstalling it.

Parent topic: Solving Scanning Problems
Cannot Start Epson Scan

If you cannot start Epson Scan, try these solutions:

• Make sure your product is turned on and any interface cables are securely connected at both ends.
• Make sure Epson Scan is selected in your scanning program.
• Make sure your computer is not running in a power-saving mode, such as sleep or standby. If so, wake your system and restart Epson Scan.
• Check the connection setting and test the connection using Epson Scan Settings:
  
  **Windows 8.x:** Navigate to the Apps screen and select EPSON Scan Settings. Make sure the correct Connection setting is selected, then click the Test button.

  **Windows (other versions):** Click or Start > All Programs or Programs > EPSON > EPSON Scan > EPSON Scan Settings. Make sure the correct Connection setting is selected, then click the Test button.

  **OS X:** Open the Applications folder, click Epson Software, and click EPSON Scan Settings. Make sure the correct Connection setting is selected, then click the Test button.

• Make sure you do not have multiple versions of Epson Scan installed. If you do, uninstall both versions and install one version.
• If you upgraded your operating system but did not reinstall Epson Scan, try reinstalling it.

- Image is Scanned Upside-Down
- Scanned Image Colors Do Not Match Original Colors
- Scan Area is Not Adjustable in Thumbnail Preview
- Scanned Image Edges are Cropped

Parent topic: Solving Problems

Image Consists of a Few Dots Only

If your scanned image consists only of a few dots, try these solutions:

- Make sure you placed your original for scanning facing the correct way.
- If you are scanning using the Epson Scan Black & White setting, adjust the Threshold setting and scan again.

Parent topic: Solving Scanned Image Quality Problems

Cleaning Your Product

Straight Lines in an Image Appear Crooked
If straight lines in an original appear crooked in a scanned image, make sure to place your original straight when you scan it.

Parent topic: Solving Scanned Image Quality Problems
Related tasks
Placing Originals on the Scanner Glass

Image is Distorted or Blurry
If a scanned image appears distorted or blurry, try these solutions:

- Make sure your original is not wrinkled or warped. This may prevent the original from laying flat on the scanner glass.
- Do not move your original or your product during scanning.
- Your product will not operate properly while tilted at an angle. Place your product on a flat, stable surface that extends beyond its base in all directions.
- Adjust these Epson Scan settings (if available) and try scanning again:
  - Select the Unsharp Mask setting.
  - Adjust the Auto Exposure setting.
  - Increase the Resolution setting.

Parent topic: Solving Scanned Image Quality Problems
Related topics
Selecting Epson Scan Settings
Image Colors are Patchy at the Edges
If you are scanning a thick or warped original, cover its edges with paper to block external light as you scan it.

Parent topic: Solving Scanned Image Quality Problems

Image is Too Dark
If your scanned image is too dark, try these solutions:
• Adjust these Epson Scan settings (if available) and try scanning again:
  • Auto Exposure
  • Brightness
  • Histogram Adjustment
• Check the brightness and contrast settings of your computer monitor.

Parent topic: Solving Scanned Image Quality Problems
Related topics
Selecting Epson Scan Settings

Back of Original Image Appears in Scanned Image
If an image from the back of a thin original appears in your scanned image, place a piece of black paper on the back of the original and scan it again.

Parent topic: Solving Scanned Image Quality Problems

Ripple Patterns Appear in an Image
You may see a ripple pattern (called a moiré) in scanned images of printed documents. This is caused by interference from differing pitches in the scanner's screen and your original's halftone screen. To reduce this effect, adjust these Epson Scan settings (if available) and try scanning again:
• Select the Descreening setting.
• Select a lower Resolution setting.

Parent topic: Solving Scanned Image Quality Problems
Related topics
Selecting Epson Scan Settings
Image is Scanned Upside-Down

Your product scans using the Auto Photo Orientation setting. This setting checks the preview image for faces, the sky, and other features, and then correctly rotates the photo when it is scanned, if necessary. If your photo is not oriented correctly using this option, deselect the Auto Photo Orientation setting and scan again.

Note: Auto Photo Orientation will not work when you scan newspapers, magazines, documents, illustrations, or line art, or images smaller than 2 inches (5.1 cm) on any side.

Parent topic: Solving Scanned Image Quality Problems

Scanned Image Colors Do Not Match Original Colors

Printed colors can never exactly match the colors on your computer monitor because printers and monitors use different color systems: monitors use RGB (red, green, and blue) and printers typically use CMYK (cyan, magenta, yellow, and black).

Check the color matching and color management capabilities of your computer, display adapter, and the software you are using to see if they are affecting the palette of colors you see on your screen.

To adjust the colors in your scanned image, adjust these Epson Scan settings (if available) and try scanning again:

- Change the Image Type setting and experiment with different combinations of the next settings.
- Adjust the Tone Correction setting.
- Adjust the Auto Exposure setting.

Parent topic: Solving Scanned Image Quality Problems

Related topics
Selecting Epson Scan Settings

Scan Area is Not Adjustable in Thumbnail Preview

If you cannot adjust the scan area while viewing a Thumbnail preview in Epson Scan, try these solutions:

- Create a scan area by drawing a marquee on your preview image and adjusting it as necessary.
- Switch to Normal preview mode, if available, and preview your image again.

Solving Faxing Problems
Check these solutions if you have problems faxing with your product.

Cannot Send or Receive Faxes
Cannot Receive Faxes with a Telephone Connected to Your Product

Parent topic: Solving Problems

Cannot Send or Receive Faxes
If you cannot send or receive faxes, try these solutions:

• If you are faxing from a computer, use the Epson FAX Utility to send your fax.
• Make sure the recipient's fax machine is turned on and working.
• Make sure paper is loaded correctly in your product.
• Make sure you have set up your header information and have not blocked your caller ID. Otherwise, your faxes might be rejected by the recipient's fax machine.
• If you did not connect a telephone to your product, set the Receive Mode setting to Auto so you can receive faxes automatically.
• Check that the cable connecting your telephone wall jack to your product's LINE port is secure.
• Print a fax connection report using your product control panel or fax software to help diagnose the problem.
• Verify that the telephone wall jack works by connecting a phone to it and testing it.
• If there is no dial tone and you connected the product to a PBX (Private Branch Exchange) phone line or Terminal Adapter, change the Line Type setting to PBX. If you still cannot send a fax, turn off the turn off the product's dial tone detection setting. (Turning off the dial tone setting may cause the product to drop the first digit of a fax number.)

• If you connected your product to a DSL phone line, you must connect a DSL filter to the phone jack to enable faxing over the line. Contact your DSL provider for the necessary filter.

• If your telephone line has static, turn off your product's error correction mode fax communication setting and try faxing again.

• Try lowering your product's fax speed setting.

• Make sure the error correction mode (ECM) setting is turned on if you are trying to send or receive a color fax.

• If your telephone line uses call waiting and you have trouble receiving faxes, turn off call waiting to prevent disruption of incoming faxes.

• If you have subscribed to a call forwarding service, the product may not be able to receive faxes. Contact your service provider for assistance.

Note: If your product is connected to a VoIP (Voice over Internet Protocol) phone line, keep in mind that fax machines are designed to work over analog phone lines. Epson cannot guarantee that fax transmission will work when using VoIP.

If your phone line includes voice mail answering services, calls or faxes may be inadvertently received by your voice mail service.

Connecting a Telephone or Answering Machine

Message Appears Prompting You to Reset Ink Levels

If you see a message on the LCD screen prompting you to reset the ink levels, do the following:

1. Refill all of the ink tanks or the ink tanks indicated on the LCD screen all the way to the top.

   **Note:** Depending on the operating conditions, you may see the ink reset message even when there is still ink in the tanks.

2. Select the colors that you refilled on the LCD screen.

3. Follow the instructions on the LCD screen to reset the ink levels.

**Note:** The product has a low ink alert system. The accuracy of this system depends on the user refilling the ink tanks correctly. The product cannot directly measure the ink levels in the tanks; instead it estimates the amount of ink remaining by internally monitoring ink usage. The low ink alert system may generate inaccurate messages if the ink tanks are not refilled according to these instructions. Visually check the ink levels in the product's ink tanks to confirm the actual ink levels. Continued use of the product when the ink is expended could damage the product.

Parent topic: Solving Problems

Refilling the Ink Tanks
Uninstall Your Product Software

If you have a problem that requires you to uninstall and re-install your software, follow the instructions for your operating system.

Uninstalling Product Software - Windows
Uninstalling Product Software - OS X

Parent topic: Solving Problems

Uninstalling Product Software - Windows

You can uninstall and then re-install your product software to solve certain problems.

1. Turn off the product.
2. Disconnect any interface cables.
3. Do one of the following:

   - **Windows 8.x**: Navigate to the Apps screen and select Control Panel > Programs > Programs and Features. Select the uninstall option for your Epson product, then select Uninstall/Change.

     **Note**: If you see a User Account Control window, click Yes or Continue.

     Select your product again, if necessary, then select OK, and click Yes to confirm the uninstallation.

   - **Windows (other versions)**: Click or Start, and select All Programs or Programs. Select EPSON, select your product, then click EPSON Printer Software Uninstall.

     **Note**: If you see a User Account Control window, click Yes or Continue.

     In the next window, select your product and click OK. Then follow any on-screen instructions.

4. Do one of the following to uninstall Epson Event Manager, then follow any on-screen instructions:

   - **Windows 8.x**: Select Epson Event Manager and click Uninstall.

   - **Windows 7/Windows Vista**: Open the Windows Control Panel utility. Select Programs and Features. (In Classic view, select Programs and click Uninstall a program.) Select Epson Event Manager and click Uninstall/Change.

   - **Windows XP**: Open the Windows Control Panel utility. Double-click Add or Remove Programs. Select Epson Event Manager and click Change/Remove.
5. Do one of the following to uninstall Epson Scan, then follow any on-screen instructions:
   • **Windows 8.x/Windows 7/Windows Vista:** Select **EPSON Scan** and click **Uninstall/Change.**
   • **Windows XP:** Select **EPSON Scan** and click **Change/Remove.**
6. Restart your computer, then see the **Start Here** sheet to re-install your software.

**Note:** If you find that re-installing your product software does not solve a problem, contact Epson.

**Parent topic:** Uninstall Your Product Software

### Uninstalling Product Software - OS X

In most cases, you do not need to uninstall your product software before re-installing it. However, you can download the Uninstaller utility from the Epson support website to uninstall your product software as described here.

**Note:** If you find that re-installing your product software does not solve a problem, contact Epson.

1. To download the Uninstaller utility, visit the Epson download site at global.latin.epson.com/Support/L655 or global.latin.epson.com/Support/L656.
2. Click **Drivers & Software.**
3. Scroll down to locate the Uninstaller utility and click **Download.**
4. Run the file you downloaded.
5. Double-click the **Uninstaller** icon.
6. Select the checkbox for each software program you want to uninstall.
7. Click **Uninstall.**
8. Follow the on-screen instructions to uninstall the software.
9. To reinstall your product software, see the **Start Here** sheet for instructions.

**Note:** If you uninstall the printer driver and your product name remains in the **Print & Fax, Print & Scan,** or **Printers & Scanners** window, select your product name and click the – (remove) icon to remove it.

**Parent topic:** Uninstall Your Product Software
Where to Get Help

If you need additional help with your Epson product, contact Epson.

Epson provides these technical support services:

Internet Support
Visit Epson’s support website at global.latin.epson.com/Support/L655 or global.latin.epson.com/Support/L656 for solutions to common problems. You can download drivers and documentation, get FAQs and troubleshooting advice, or e-mail Epson with your questions.

Speak to a Support Representative
Before you call Epson for support, please have the following information ready:

• Product name
• Product serial number (located on a label on the product)
• Proof of purchase (such as a store receipt) and date of purchase
• Computer configuration
• Description of the problem

Then call:

Ink Specifications

Note: This product was originally designed to work with genuine Epson inks. Your product may not function properly if you use other types of ink and may affect Epson's warranty.

The included ink bottles must be used for printer setup and are not for resale. The printer ships with full ink bottles and part of the ink from the first bottles is used to charge the print head. Yields vary considerably based on images printed, print settings, paper type, frequency of use, and temperature.

The ink bottles that came with your printer have a lower yield due to the ink charging process. This process is carried out the first time you turn on the printer and guarantees better performance. Do not load paper before refilling the ink tanks.

Color Black, Cyan, Magenta, Yellow

Ink life For best results, use up ink within 6 months of removing the seal from an ink bottle
Temperature
Storage: –4 to 104 °F (–20 to 40 °C)
1 month at 104 °F (40 °C)
Ink freezes at 5 °F (–15 °C)
Ink thaws and is usable after 2 hours at 77 °F (25 °C)

Safety and Approvals Specifications

United States
Safety: UL60950-1
EMC: FCC part 15 Subpart B class B

Canada
Safety: CAN/CSA C22.2 No. 60950-1
EMC: CAN/CSA-CEI/IEC CISPR 22 Class B

This equipment contains the following wireless module:
• Manufacturer: Askey Computer Corporation.
• Type: WLU6320-D69 (RoHS)

This product conforms to Part 15 of FCC Rules and RSS-210 of the IC Rules. Epson cannot accept responsibility for any failure to satisfy the protection requirements resulting from a non-recommended modification of the product. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation of the device.

To prevent radio interference to the licensed service, this device is intended to be operated indoors and away from windows to provide maximum shielding. Equipment (or its transmit antenna) that is installed outdoors is subject to licensing.

This equipment complies with FCC/IC radiation exposure limits set forth for an uncontrolled environment and meets the FCC radio frequency (RF) Exposure Guidelines in Supplement C to OET65 and RSS-102 of the IC radio frequency (RF) Exposure rules. This equipment should be installed and operated so that the radiator is kept at least 7.9 inches (20 cm) or more away from a person's body (excluding extremities: hands, wrists, feet and ankles).

FCC Compliance Statement

For United States Users

This equipment complies with Part 68 of the FCC rules and the requirements adopted by the Administrative Council for Terminal Attachments ("ACTA"). On the surface of this equipment is a label that contains, among other information, a product identifier in the format US:AAAEQ##TXXXX. If requested, this number must be provided to the telephone company.

Applicable certification jack Universal Service Order Codes ("USOC") for the equipment: RJ11C.

A plug and jack used to connect this equipment to the premises wiring and telephone network must comply with the applicable FCC Part 68 rules and requirements adopted by the ACTA. A compliant telephone cord and modular plug is provided with this product. It is designed to be connected to a compatible modular jack that is also compliant. See installation instructions for details.

The REN is used to determine the number of devices that may be connected to a telephone line. Excessive RENs on a telephone line may result in the devices not ringing in response to an incoming call. In most but not all areas, the sum of RENs should not exceed five (5.0). To be certain of the number of devices that may be connected to a line, as determined by the total RENs, contact the local telephone company. For products approved after July 23, 2001, the REN for this product is part of the product identifier that has the format US:AAAEQ##TXXXX. The digits represented by ## are the REN without a decimal point (e.g., 03 is a REN of 0.3). For earlier products, the REN is separately shown on the label.

If this equipment causes harm to the telephone network, the telephone company will notify you in advance that temporary discontinuance of service may be required. But if advance notice isn’t practical, the telephone company will notify the customer as soon as possible. Also, you will be advised of your right to file a complaint with the FCC if you believe it is necessary.

The telephone company may make changes in its facilities, equipment, operations or procedures that could affect the operation of the equipment. If this happens the telephone company will provide advance notice in order for you to make necessary modifications to maintain uninterrupted service.

If you have problems with this product and require technical or customer support, please visit www.epson.com for more information.
This product is not intended to be repaired by the customer. If you experience trouble connecting this equipment to a telephone line, please contact:

Name: Epson America, Inc.
Address: 3840 Kilroy Airport Way, Long Beach, CA 90806 U.S.A.
Telephone: (562) 981-3840

If the equipment is causing harm to the telephone network, the telephone company may request that you disconnect the equipment until the problem is resolved.

This equipment may not be used on coin service provided by the telephone company. Connection to party line service is subject to state tariffs. Contact the state public utility commission, public service commission or corporation commission for information.

If your home has specially wired alarm equipment connected to the telephone line, ensure the installation of this equipment does not disable your alarm equipment. If you have questions about what will disable alarm equipment, consult your telephone company or a qualified installer.

The Telephone Consumer Protection Act of 1991 makes it unlawful for any person to use a computer or other electronic device, including fax machines, to send any message unless such message clearly contains in a margin at the top or bottom of each transmitted page or on the first page of the transmission, the date and time it is sent and an identification of the business or other entity, or other individual sending the message and the telephone number of the sending machine or such business, other entity, or individual. (The telephone number provided may not be a 900 number or any other number for which charges exceed local or long-distance transmission charges.)

In order to program this information into your fax machine, click the link below for instructions on entering fax header information.

According to the FCC’s electrical safety advisory, we recommend that you may install an AC surge arrester in the AC outlet to which this equipment is connected. Telephone companies report that electrical surges, typically lightning transients, are very destructive to customer terminal equipment connected to AC power sources and that this is a major nationwide problem.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio or television reception. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause interference to radio and television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
• Increase the separation between the equipment and receiver.
• Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
• Consult the dealer or an experienced radio/TV technician for help.

**WARNING**
The connection of a non-shielded equipment interface cable to this equipment will invalidate the FCC Certification or Declaration of this device and may cause interference levels which exceed the limits established by the FCC for this equipment. It is the responsibility of the user to obtain and use a shielded equipment interface cable with this device. If this equipment has more than one interface connector, do not leave cables connected to unused interfaces. Changes or modifications not expressly approved by the manufacturer could void the user's authority to operate the equipment.

**For Canadian Users**
1. This product meets the applicable Industry Canada technical specifications.
2. The Ringer Equivalence Number is an indication of the maximum number of devices allowed to be connected to a telephone interface. The termination on an interface may consist of any combination of devices subject only to the requirement that the sum of the RENs of all the devices does not exceed five.

   CAN ICES-3(B)/NMB-3(B)

Le présent matériel est conforme aux spécifications techniques applicables d'Industrie Canada.

L'indice d'équivalence de la sonnerie (IES) sert à indiquer le nombre maximal de terminaux qui peuvent être raccordés à une interface téléphonique. La terminaison d'une interface peut consister en une combinaison quelconque de dispositifs, à la seule condition que la somme d'indices d'équivalence de la sonnerie de tous les dispositifs n'excède pas 5.
