Quick Setup

Before using the projector, make sure you read the safety instructions in the online User's Guide.

Connect the projector

Choose from the following connections. See the sections below or the online User's Guide for details.

Video device

Connect multiple video devices and use the Source button on the projector or one of the source buttons on the remote control to switch between them.

Mobile media device

Connect tablets, smartphones, and other devices that support the MHL™ standard to the HDMI1 MHL port.

Some devices may require an adapter or may not require an MHL cable. Not all features or functions may be supported. Check your device's documentation for more information.

Note: For information on wireless screen mirroring (PowerLite Home Cinema 2040/2045), see the online User's Guide.

Computer

Connect one end of an HDMI cable to one of the projector’s HDMI ports and the other end to an HDMI port on your computer.

Note: For information on connecting the projector to your computer or other devices (camera, USB flash drive, etc.), see the online User's Guide.

Connect audio

If you connected an HDMI video source, you can connect the projector to a set of external speakers or headphones through the Audio Out port. The connected device must be set to PCM output. The projector can be used to control the audio level.

Note: The internal speaker is disabled when an external audio device is connected.

External speakers

Connect your device’s audio output to your home theater receiver or powered speakers.

Home theater system

Powered speakers

Connect your device’s audio output to your home theater receiver or powered speakers.

Note: See your home theater receiver documentation for more information on connections.

Turn on your equipment

1. Turn on your computer or video source.

2. Plug in the projector. The power light on the projector turns blue.

3. Open the AV Mute slide all the way.

4. Press the power button on the projector or remote control. The Status light flashes blue and then stays on.

5. Use the arrow buttons on the remote control to highlight any of the options on the Home screen that appears, then press Enter to select it. You can switch between projection sources and quickly access various adjustment options from this screen.

6. Your projector automatically adjusts images that look like  or  but if necessary you can press the or buttons on the projector to correct it.

Using the remote control

Make sure the batteries are installed as shown (two AA batteries).

For more information on using the remote control, see the online User's Guide.

Viewing 3D images

To view 3D content, you must first connect a 3D-compatible video device to one of the HDMI ports on your projector. You also need a pair of Epson® (part number V12H548006) or Epson-compatible RF 3D active shutter glasses.

To view 3D content, you must first connect a 3D-compatible video device to one of the HDMI ports on your projector. You also need a pair of Epson® (part number V12H548006) or Epson-compatible RF 3D active shutter glasses.

For more information on using the remote control, see the online User's Guide.

To view 3D content, you must first connect a 3D-compatible video device to one of the HDMI ports on your projector. You also need a pair of Epson® (part number V12H548006) or Epson-compatible RF 3D active shutter glasses.

1. Turn on and begin playback on the 3D-compatible video device.

2. Press the 2D/3D button on the remote control, if necessary.

3. Slide the power switch on your 3D glasses to the On position.

4. Press the 3D button on the remote control to select the 3D mode.

5. If your image looks like  or , you may have placed the projector off to one side of the screen at an angle. Place the projector directly in front of the center of the screen, facing the screen squarely. If you can’t move the projector, use the horizontal keystone slider on the projector to correct the image shape.

6. If the glasses don’t automatically display 3D content, you may need to pair them with the projector. Move the glasses within 10 feet (3 m) of the projector, then press and hold the Pairing button on the 3D glasses for at least 3 seconds. The status light on the glasses will alternately flash green and red, then remain green for 10 seconds if pairing is successful.

Note: For information on wireless screen mirroring (PowerLite Home Cinema 2040/2045), see the online User’s Guide.

Quick Setup
Before using the projector, make sure you read the safety instructions in the online User’s Guide.

Connect the projector
Choose from the following connections. See the sections below or the online User’s Guide for details.

Video device
Connect multiple video devices and use the Source button on the projector or one of the source buttons on the remote control to switch between them.

Mobile media device
Connect tablets, smartphones, and other devices that support the MHL™ standard to the HDMI-MHL port.

Some devices may require an adapter or may not require an MHL cable. Not all features or functions may be supported. Check your device’s documentation for more information.

Note: For information on wireless screen mirroring (PowerLite Home Cinema 2040), see the online User’s Guide.

Computer
Connect one end of an HDMI cable to one of the projector’s HDMI ports and the other end to an HDMI port on your computer.

Note: For information on connecting the projector to your computer or other devices (camera, USB flash drive, etc.), see the online User’s Guide.

Connect audio
If you have connected an HDMI video source, you may need to reduce the projector speaker volume to zero (0), or make sure that the correct audio output is selected on your device.

Note: If the projector is connected using an HDMI connection, you may need to reduce the projector speaker volume to zero (0), or make sure that the correct audio output is selected on your device.

Built-in speaker
The projector has a built-in speaker that can play audio from a connected video source (DVD player, streaming device, etc.) using an HDMI cable. If you do not use an HDMI connection, you must connect your device’s audio output to the projector’s audio input.

Audio Out port
You can connect the projector to a set of external speakers or headphones through the Audio Out port. The connected device must be set to PCM output. The projector can be used to control the audio level.

Note: The internal speaker is disabled when an external audio device is connected.

External speakers
Connect your device’s audio output to your home theater receiver or powered speakers.

Home theater system
Connect the projector to your home theater system using an HDMI cable.

Powered speakers
Connect your device’s audio output to your home theater receiver or powered speakers.

The internal speaker is disabled when an external audio device is connected.

Turn on your equipment
1. Turn on your computer or video source.
2. Plug in the projector. The power light on the projector turns blue.
3. Open the AV Mute slide all the way.
4. Press the power button on the projector or remote control. The Status light flashes blue and then stays on.

Note: To shut down the projector, press the power button twice, then unplug it. You don’t have to wait for the projector to cool down.

5. Use the arrow buttons on the remote control to highlight any of the options on the Home screen that appears, then press Enter to select it. You can switch between projection sources and quickly access various adjustment options from this screen.

6. Your projector automatically adjusts images that look like or , but if necessary you can press the or buttons on the projector to correct it.

Adjust the image
1. If you don’t see an image, press the Source button on the projector or one of the source buttons on the remote control to select the image source.

Note: If you still see a blank screen or have other display problems, see the troubleshooting tips on the back of this sheet.

2. To raise the image, press the foot release button and lift the front of the projector. Release the button to lock the foot in position.

3. Turn the zoom ring to reduce or enlarge the image.

4. Turn the focus ring to sharpen the image.

5. If your image looks like or , you may have placed the projector off to one side of the screen at an angle. Place the projector directly in front of the center of the screen, facing the screen squarely. If you can’t move the projector, use the horizontal keystone slider on the projector to correct the image shape.

Using the remote control
Make sure the batteries are installed as shown (two AA batteries).

For more information on using the remote control, see the online User’s Guide.

The status light on the glasses will alternately flash green and red, then remain green for 10 seconds if pairing is successful.

2. Press the 2D/3D button on the remote control, if necessary.

3. Slide the power switch on your 3D glasses to the On position.

4. Press the Menu button on the projector or remote control. The Status light alternately flashes green and red, then remains green.

5. Press the Enter button on the projector or remote control. The Status light stays green.

6. Press the Menu button on the projector or remote control. The Status light flashes blue and then stays on.

7. Press the Extended button. The extended menu opens.

8. Use the arrows to select the 3D Source menu.

10. Press Enter to select one of the listed sources.

11. Use the arrow buttons to highlight 3D and press Enter. The projector automatically adjusts to the selected 3D source.

12. If the glasses don’t automatically display 3D content, press the Menu button on the projector or remote control. The Status light flashes blue and then stays on.

13. Press the Extended button. The extended menu opens.

14. Use the arrows to select the 3D Source menu.

15. Press Enter. A menu of available 3D sources appears.

16. Press Enter to select one of the listed sources.

17. Use the arrow buttons to highlight 3D and press Enter. The projector automatically adjusts to the selected 3D source.

For more information on 3D content, see the online User’s Guide.
Troubleshooting
If you see a blank screen or the No signal message after turning on your video device or video cable, check the following:
• Make sure the Status light on the projector is blue and not flashing, and the A/V Mute switch is off.
• Press the Power button on the projector or remote control to verify source input and settings.
• Press the Source button on the projector or one of the source buttons on the remote control to switch to the correct input source if necessary.
• If you’re using a Windows® laptop, press the function key on your keyboard that lets you display on an external monitor. It may be labeled CRT/LED or have an icon such as \[\text{CRT/LED}]. If you may have to hold down the function key while pressing it (such as \[\text{Fn} + \text{F7}]). Wait a moment for the display to appear.
• If you’re using a Mac laptop, open System Preferences and select Displays. Click the Arrange tab and select the Mirror Displays check box.

If 3D images aren’t displaying properly, check the following:
• Press the 2D/3D button to switch to 3D viewing mode, if necessary.
• Make sure that you are within the 3D viewing range. See the online documentation that came with your projector or register online at epson.com/support. Register today to get product updates and exclusive offers. You can use the CD included with your projector or go to the epson.com/support website.

Telephone support services
To contact your Epson PrivateLine® Support service, call (800) 637-7661. This service is available for the duration of your warranty period. You may also speak with a support specialist by calling (562) 275-4949 (U.S.) or (905) 709-3839 (Canada).

Registration
Register today to get product updates and exclusive offers. You can use the CD included with your projector or register online at epson.com/webreg.

Optional accessories
For a list of optional accessories, see the online User’s Guide.

You can purchase Epson RF 3D glasses (part number V12H548006) or other accessories from an Epson authorized reseller. To find the nearest reseller, call 800-GO-EPSON (800-463-7766). Or you can purchase online at epsonstore.com (U.S. sales) or epson.ca (Canadian sales).

Built-in Wireless LAN
Contains Wireless LAN module Model: WN1722BEPP (PowerLite Home Cinema 2045)

Epson® Wireless products are intended for use in the 2.4 GHz band and are not compatible with the 5GHz band. To use Epson wireless products, both the Epson projector and the video device must be compatible with the 2.4 GHz band wireless communications standard.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one of the following measures:
• Reorient or relocate the receiving antenna.
• Increase the separation between the equipment and receiver.
• Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
• Consult the dealer or an experienced radio/TV technician for help.

Epson recommends using a 3D glasses receiver that is compatible with your projector. The Epson iProjection™ receiver must be connected to the projector and the video device.

To use the Epson wireless feature, both the Epson projector and the video device must be compatible with the 2.4 GHz band communications standard. This equipment is certified as compliant to the FCC CFR Title 47, Part 15, Subpart B, Class B with an effective radiation pattern of 30 degrees.

Epson wireless products are intended for use in the 2.4 GHz band and are not compatible with the 5GHz band. To use Epson wireless products, both the Epson projector and the video device must be compatible with the 2.4 GHz band wireless communications standard.

Where to get help

Manual
For more information about using the projector, check the on-screen documentation to access the online manual (requires an Internet connection). If you don’t have a User’s Guide icon, you can install it from the projector CD or go to the Epson website, as described below.

Telephone support services
To contact Epson PrivateLine® Support service, call (800) 637-7661. This service is available for the duration of your warranty period. You may also speak with a support specialist by calling (562) 273-4094 (U.S.) or (905) 798-3393 (Canada).

Support hours are 6 am to 8 pm, Pacific Time, Monday through Friday, and 7 am to 4 pm, Pacific Time, Saturday. Days and hours of support are subject to change without notice. Toll or long distance charges may apply.

Internet support
Visit epson.com/support (U.S.) or epson.ca/support (Canada) for solutions to common problems. You can download utilities and documentation, get FAQs and troubleshooting advice, or e-mail Epson.

Registration
Register today to get product updates and exclusive offers. You can use the CD included with your projector or register online at epson.com/webreg.
