Parent topic: Media Handling

Loading Roll Paper

You can load roll paper with a 2- or 3-inch core and a width of up to 24 inches (61 cm) (SC-P6000/SC-P7000) or 44 inches (112 cm) (SC-P8000/SC-P9000).

1. Open the roll paper cover.
2. Firmly push down the lock lever on the roll paper holder and move the holder to the left.

**Note:** Make sure you push the lock lever all the way down to unlock it completely.
3. Place the roll paper on top of the printer.

4. If necessary, slide the tabs on the roll media adapters to the position that matches the core size of the roll paper.
   
   **2-inch core:**

   ![Diagram of 2-inch core](image)

   **3-inch core:**

   ![Diagram of 3-inch core](image)
5. Release the tension levers on both roll media adapters.
6. Push the adapters into the paper core at both ends of the roll. Then push down the tension levers.

7. Move the roll paper to the right side until it touches the roll paper guide.
8. Slide the roll paper holder until the left adapter aligns with the arrow on the holder.

9. Roll the paper slowly into position.
10. Slide the roll paper holder to the right to secure it in the printer. Make sure both ends of the roll paper are secured in the adapters.
11. Pull up the lock lever on the roll paper holder to it in place.

12. If the load paper light is not on, press the load paper button.
13. Insert the paper into the paper feed slot and pull it down until the edge of the paper is even with the center of the stand.

**Note:** If the paper does not feed through the slot, you may need to decrease the suction by pressing the ' suction' paper feed button. Make sure you return the suction to its default setting after the paper is loaded.
14. Close the roll paper cover.

Note: To prevent dust from accumulating inside the printer, always keep the roll paper cover closed unless you are loading or unloading media.

15. Press the load paper button.

Note: An uneven or damaged leading edge on the roll paper may cause loading issues. Press the paper cut button once within 3 seconds of pressing the load paper button to trim the edge of the roll paper.

16. Press the pause/cancel button to move the paper into printing position or wait for the paper to move into position automatically.

17. On the screen that appears, select one of the following settings:
   • If the paper settings are correct, select Keep Settings Above.
   • Select Change Settings so you can adjust the settings.

18. Press the OK button.

To avoid indenting or creasing the paper, remove it from the paper path and roll it up when you are not printing.

Note: Store roll paper on its end or horizontally (if the packaging end-caps are installed). Never store roll paper on its edge, as a flat spot can develop and lead to imaging artifacts on the prints.

Cutting Roll Paper

The printer has a built-in cutter that can automatically cut most paper types, or you can cut your prints manually. To switch between cutting methods, press the [paper source] button on the control panel or adjust the auto cut settings in the printer driver. The setting selected in the printer driver overrides the control panel setting.

**Note:** If you are using the optional Auto Take-up Reel, disable the auto cut setting in the printer driver and on the control panel.

**Caution:** Do not use the built-in cutter with these paper types or you may damage or dull the built-in cutter:

- Fine art paper
- Canvas
- Vinyl
- Matte poster board
- Adhesive paper
- Banner media

When you print on these paper types, you need to disable the Auto Cut setting and cut the print by hand.
Cutting Roll Paper Manually

You can disable the Auto Cut option to keep your prints on the roll until you manually cut them.

**Note:** The built-in cutter may not be able to cut some types of media. Heavy or thick media types may dull the cutter.

1. Before you print, press the **Menu** button.
2. Press the down arrow button to select **Paper** and press the right arrow button.
3. Select **Roll Paper Setup** and press the right arrow button.
4. Press the right arrow button to select **Auto Cut**.
5. Press the up or down arrow button to select **Off**.
6. Press the **OK** button to save the setting.
   A check mark appears next to the setting.
7. Press the **Pause/Cancel** button to exit the menu.
8. Run your print job.
9. Press the **Cut** paper cut button.

**Note:** If the paper cannot be cut by the built-in cutter, press the **Feed** paper feed button until your print is clear of the printer, then cut the print by hand.

1. Make sure the printer is turned on and the roll paper cover is closed.
2. Press the paper source button.
3. Select Cut Sheet and press the OK button.
4. Feed the sheet into the right side of the paper slot until it meets resistance. Align the sheet with the vertical line on the roll paper cover.

6. Adjust the paper until the right and top edges are aligned with the horizontal and vertical lines on the printer.

![Image of paper being aligned with printer lines](image)

**Note:** You may need to increase the suction by pressing the up arrow button. This helps hold the paper in place during loading and printing.

7. Press the load paper button.

8. Press the pause/cancel button to move the paper into printing position or wait for the paper to move into position automatically.

9. On the LCD screen, select one of the following:
   - If the paper settings are correct, select **Keep Settings Above**.

### Adjusting the Platen Gap

If the print quality is not satisfactory when printing on very thin or very thick media, you may need to adjust the Platen Gap setting.

**Note:** If you notice scuffs on the first few inches of your prints, this is caused by paper curl and print head strikes. Make sure your paper is flat. You can also try changing the Platen Gap setting to **Wide**. If that doesn’t solve the problem, try changing it to **Wider**.

1. Press the **Menu** button.
2. Press the down arrow button to select **Printer Setup** and press the right arrow button.
3. Press the right arrow button to select **Platen Gap**.
4. Press the up or down arrow to select a platen gap setting and press the **OK** button.

   **Note:** To avoid damaging the printer, do not select the **Narrow** setting when loading thick media.

   A check mark appears next to the selected setting.

5. Press the **II·□** pause/cancel button to exit the menu.

   The platen gap symbol on the LCD screen changes to match the new setting.

About the Optional Auto Take-up Reel

The optional auto take-up reel automatically rolls up printed media as you print.

You can use the auto take-up reel for media with the printable side in (on the left) or printable side out (on the right).

It is best to do the following when using the auto take-up reel:

- Make sure that the end of the roll is cut straight across.
- Load media with the printable side in.
- Use a take-up roll core that is the same width as your media so the core does not bend or take up media incorrectly.

10. Press and hold the paper feed button on the printer until it feeds enough media to wrap around the roll core three times.
11. Move the **Manual** switch on the take-up reel to the **Backward** position and hold it until the media wraps around the core three times.

Paper Configuration Options - Windows
Paper Configuration Options - Windows
Select any of the available Paper Configuration options to fine-tune the quality of your print.

Color Density
Adjusts the ink saturation level.
Drying Time per Print Head Pass
Pauses print head movement for up to 5 seconds after each pass to allow ink to dry. This lets you print with non-Epson media and avoid smearing the ink.

Paper Feed Adjustment
Modifies the speed of the paper feeding to compensate for banding in the direction of the print head.

Paper Suction
Lets you decrease the paper suction when printing on thin media, such as drafting paper or backlight film.

Paper Thickness
Lets you select the thickness of your paper or media.

Note: If you have high speed (bi-directional) printing enabled and small type or fine details appear too thick, you may need to adjust the paper thickness setting.

Platen Gap
Adjusts the distance from the paper to the print head. (Use a wider setting if you are seeing edge marks or scuffs on your prints.)

Roll Paper Back Tension
Lets you increase the tension for cloth or thin paper, or if the roll paper wrinkles during printing.

Advanced B&W Photo Options - Windows

If you select Advanced B&W Photo as the Color option, you can easily produce neutral and toned black-and-white prints. Whether your photo is color or grayscale, you can use this screening and color management technology to create stunning black-and-white prints. Select Custom as the Mode setting, then click Advanced and select any of the available options.

Note: Advanced B&W mode is not available for the SureColor P7000 and P9000 Commercial Edition printers (configured with the Violet ink).

Color Toning
Adds tone (hue) to your black-and-white output. The default is Neutral, which provides a neutral tonal scale print. You can also choose other popular presets such as Cool, Warm, and Sepia. Note that the presets affect the target found in the tone color circle.

Tone
Changes the entire tonal scale of your black-and-white output. While Darker is the default setting, you may see better results if you choose Dark. The tone color circle adjusts the hue of your black-and-
white print. Click on any portion of the color wheel or enter corresponding values to customize the tone (hue) to add to your print. The closer you select to the edge of the wheel, the more color you add.

**Brightness**
- Adjusts the overall lightness and darkness of your image.

**Contrast**
- Adjusts the difference between the light and dark areas of your image.

**Shadow Tonality**
- Controls tonality only in the shadow areas of your image.

**Highlight Tonality**
- Controls tonality only in the highlight areas of your image.

**Max Optical Density**
- Adjusts the overall density or focus of the print. Create a soft focus print by lowering the density setting.

**Highlight Point Shift**
- Helps reduce gloss differential on glossy media by adding density to the highlights of your image.

### Print Quality Options - Windows

You can use the Speed/Quality slider to set the desired quality level and select any of the available Quality options to fine-tune the quality of your print. Some settings may be unavailable, depending on the paper type and border setting you have chosen.

**High Speed**
- Speeds up printing but may reduce print quality.

**Edge Smoothing**
- Smooths jagged edges in low-resolution images such as screen captures or images from the Web.

**Finest Detail**
- Sharpens edges on vector-based data including text, graphics, and line art. (This setting does not affect photographs.)

### Color Management Options - Windows

You can adjust the **Mode** setting to fine-tune the colors in your printout or turn off color management in your printer software.

If you select **Automatic** as the **Mode** setting, you can choose from these options:
Charts and Graphs
Intensifies colors and lightens the midtones and highlights of an image.

EPSON Standard (sRGB)
Increases the contrast in images.

Adobe RGB
Matches image colors to the Adobe RGB color standard. Use this setting if your source file was captured in Adobe RGB.

If you select Custom as the Mode setting, you can choose from these options:

Color Controls
Lets you select a Color Mode setting, individual settings for Brightness, Contrast, Saturation, and Density, and individual color tones. Depending on the selected color mode, you can also adjust the midtone density using the Gamma setting.

PhotoEnhance
Lets you choose from various Scene Correction settings to automatically analyze your photos.

Note: PhotoEnhance uses a sophisticated face recognition technology to optimize photos that include faces. For this to work, both eyes and the nose must be visible in the subject's face. If your photo includes a face with an intentional color cast, such as a statue, you may want to turn off PhotoEnhance to retain the special color effects.

ICM
Automatically adjusts colors based on the printer’s ICC profile and the selected Media Type setting, using the Image Color Matching system. Click the Advanced button to choose the input profile and other settings.

Note: In most cases, you get better results by applying color management in your application, rather than in the printer driver.

Off (No Color Adjustment)
Turns off color management in your printer software so you can manage color using only your application software.

Note: An ICC profile is required if color management is turned off.

Replacing Ink Cartridges

If the Check ink light stays lit and the icon appears above an ink cartridge on the LCD screen, the cartridge is expended. When an ink cartridge is expended, you need to replace it.

You may also need to replace a cartridge that is more than six months old, or if your printouts do not look their best, even after cleaning and aligning the print head.

**Note**: Please dispose of your used Epson branded ink cartridges responsibly and in accordance with local requirements. If you would like to return your used ink cartridges to Epson for proper disposal, please go to epson.com/recycle for more information.

**Purchase Epson Ink Cartridges**

You can purchase genuine Epson ink and accessories at [epson.com](http://epson.com) (U.S. sales) or [epson.ca](http://epson.ca) (Canadian sales). You can also purchase accessories from an Epson authorized reseller. To find the nearest one, call 800-GO-EPSON (800-463-7766).

**Note:** This product uses only genuine Epson-brand cartridges. Other brands of ink cartridges and ink supplies are not compatible and, even if described as compatible, may not function properly.

The cartridges included with the printer are designed for printer setup and not for resale. After some ink is used for charging, the rest is available for printing. Yields vary considerably based on images printed, print settings, paper type, frequency of use, and temperature. For print quality, a variable amount of ink remains in the cartridge after the "replace cartridge" indicator comes on.

Removing and Installing Ink Cartridges

Make sure you have your replacement cartridges handy before you begin. You must install new cartridges immediately after removing the old ones.

Note: Replace all expended ink cartridges. You cannot print if any of the ink cartridges are expended or any ink slots are empty.

1. Turn on your product.
2. Press the open ink cover button.
3. Do one of the following if necessary:
   • If any of the cartridges are completely expended, the corresponding ink cartridge cover unlocks.
   • If the cartridges are not completely expended, select the ink bay that you want to open, and press the OK button.
   The ink cartridge cover unlocks.
4. Open the ink cartridge cover.

Note: Do not try to open the ink cartridge cover until it unlocks.
5. Press in on the ink cartridge you want to replace. The ink cartridge pops out slightly.

6. Pull out the ink cartridge.

**Note:** Dispose of used cartridges carefully. Do not take the used cartridge apart or try to refill it.

**Warning:** If ink gets on your skin, wash it thoroughly with soap and water. If ink gets into your eyes, flush them immediately with water. If ink gets into your mouth, spit it out and see a doctor right away. Keep ink cartridges out of the reach of children.
7. Remove the new cartridge from the package. Then gently shake the cartridge for about five seconds.

Caution: Do not touch the green chip on the cartridge.

8. Insert the new cartridge with the arrow facing up and push it in until it clicks into place.

Caution: Do not remove and re-insert cartridges more often than necessary. Doing so can break the needle valve seal and allow air to enter the ink tubes, damaging the nozzles.

9. Close the ink cartridge cover and push it in until it clicks into place.

Your product begins charging the ink delivery system.

Note: Do not turn off the product during ink charging.
**Caution:** If you remove an ink cartridge for later use, protect the ink supply area from dirt and dust and store it in the same environment as the printer. The valve in the ink supply port is designed to contain any excess ink, but do not touch the ink supply port or surrounding area. Always store ink cartridges with the label facing up; do not store cartridges upside-down.

**Note:** If a cleaning cycle is initiated during the "Ink Low" status and the level of ink remaining in the cartridge is estimated to be less than required for a cleaning, the printer will prompt that there is “not enough ink to complete the process.” At this stage a fuller cartridge needs to be installed to complete the maintenance. At the end of the printer cleaning maintenance, the original cartridge can be re-inserted and used until its "Ink Cartridge Expended" status is reached. It does not have to be discarded.

### Replacing Maintenance Boxes

The maintenance box absorbs ink used in maintenance operations such as head cleaning and changing black ink. Replace the maintenance box when you see a message on the LCD screen. (The SC-P8000/SC-P9000 have two maintenance boxes.)

**Note:** Do not reuse maintenance boxes you have removed from the printer and exposed to air for a long period of time. The box will not absorb any more ink.

1. Check the LCD screen to determine which maintenance box needs to be replaced (SC-P8000/SC-P9000).
2. Turn off your product.
3. Remove the new maintenance box from the package.

  **Caution:** Do not touch the chip on the side of the maintenance box or you may damage the product.
4. Use the handle on the bottom of the maintenance box to carefully pull it out of the product without tilting the box.

5. Place the used maintenance box in the bag supplied with the new box and seal the bag.
6. Insert the new maintenance box in the slot.

Switch Black Ink Type

Your product comes with Matte Black and Photo Black ink cartridges. Although both cartridges must be installed for your product to work, it can print using only one type of black ink at a time.

Your product switches the black ink type automatically, depending on the type of media you load. Because this process consumes some ink, so you should avoid switching black ink more often than necessary and select a default black ink type for the type of media you print on most often.

Note: To disable automatic black ink switching, press the Menu button and select Printer Setup > Auto Black Ink Change > Off.

Before you align the print head, note the following:

• Alignment will vary based on the loaded media. Align the print head using the media on which you want to print and select the correct paper type as the Select Paper Type setting.

• Run a nozzle check before you align the print head. If there are any gaps in the nozzle check pattern, clean the print head.

• Automatic print head alignment cannot be performed on any transparent or colored paper or on these paper types: Plain paper, Epson Enhanced Matte Posterboard. Manually align from the printer control panel when using these media types.

• Make sure the printer is not exposed to direct, bright light (such as direct sunlight) while performing an automatic print head alignment.

Nothing Prints

If you have sent a print job and nothing prints, try these solutions:

• Make sure your printer is turned on.
• Make sure any interface cables are connected securely at both ends. If you have a spare cable, try connecting with the spare cable.
• Check the model and specifications of the interface cable to see if the cable is appropriate for your computer and printer.
• If you connected your printer to a USB hub, make sure it is a first-tier hub. If it still does not print, connect your printer directly to your computer instead of the hub.
• Make sure the USB hub is recognized correctly on the computer. Disconnect all USB hubs from the computer and connect the printer directly to the computer's USB port.
• Make sure the USB cable length does not exceed 10 feet (3 m).

Cannot Print Over a Network

If you cannot print over a network, try these solutions:

• Make sure that your printer is turned on.
• Make sure you installed your printer's network software as described in the Network Guide.
• If you are using TCP/IP, make sure the printer's IP address is set correctly for your network. If your network does not assign IP addresses using DHCP, set the IP address manually.
• Check your wired LAN router or access point to see if the LED for the port to which your printer is connected is on or flashing. If the link LED is off, try the following:
  • Make sure the Ethernet cable is securely connected to your printer and to your router, access point, switch, or hub.
• Try connecting your printer to a different port or a different router, access point, switch, or hub.
• Try connecting with a different Ethernet cable.
• Try printing to your printer from another computer on the network.

Print Head Moves But Nothing Prints
If the print head is moving and nothing prints, try these solutions:
• Print a nozzle check pattern. If the pattern does not print correctly, clean the print head again. (If the printer has not been used for a long time the nozzles may be clogged.)
• If you see the message Motor Self Adjustment on the product’s LCD screen, the printer is adjusting its internal motor. Wait a few moments for the message to disappear and do not turn off the printer.

Paper Feeding Problems

If you have problems feeding paper, try these solutions:

• Make sure paper is loaded in the correct orientation. Load cut sheets vertically.
• For best results, follow these guidelines:
  • Use new, smooth, high-quality paper that is not damp, curled, creased, old, too thin, or too thick.
  • Follow any special loading instructions that came with the paper.
• If roll paper does not feed, cut the end straight across and uncurl it by rolling it backward, if necessary. Then reload the paper.
• If you cannot insert paper easily into the paper feed slot, make sure the paper is perfectly flat and not curled.
• Do not load more than one piece of cut sheet paper.
• Make sure your paper meets the specifications for your product.
• If thick media does not feed, make sure you are loading it straight into the product, not at an angle.
• If paper does not eject correctly, decrease the Paper Suction setting for the loaded paper type.
• Make sure that paper is not jammed inside the product.

Roll Paper Jam Problems

If roll paper has jammed in the printer, follow the steps here to clear the jam.

1. Open the roll paper cover.
2. Cut the paper above the paper feed slot.
3. Check that the \( \text{II} \cdot \text{C} \) pause/cancel light is not flashing and press the \( \% \) load paper button.

4. Rewind the roll paper.
5. Open the front cover.

Caution: Do not touch the ribbon cable inside the printer.

6. Carefully move the print head away from the paper jam.
Caution: Do not touch the print head unless you are removing a paper jam. Touching the print head may cause a static shock that damages the printer.
7. Remove the jammed paper.

8. Close the front cover.

9. Turn the printer off and back on again.

10. Cut the edge of the roll paper straight horizontally, then reload the roll paper.

2. Carefully move the print head to the opposite side of the printer from the paper jam.

**Caution:** Do not touch the print head unless you are removing a paper jam. Touching the print head may cause a static shock that damages the printer.
3. Remove the jammed paper.

4. Close the front cover.

5. Turn the printer off and back on again.

Paper Does Not Collect in the Basket or is Creased

If paper does not collect correctly in the paper basket, try these solutions:

• If paper does not collect in the basket, gently press on the paper basket as paper is ejected from the printer. This prevents the paper from catching on the basket.

• If the paper folds after cutting, set the Auto Cut setting to Off. Cut the paper manually while supporting the print.

• If the paper creases and does not collect in the basket, close the basket and resume printing. Before the paper reaches floor, hold the paper with both hands and continue to support it until printing is complete. Do not load more than one piece of cut sheet paper at a time.

Parent topic: Solving Print Quality Problems

Nozzle Check Pattern Prints Incorrectly

If the nozzle check pattern does not print correctly, try these solutions:

• Clean the print head and print the check pattern again. If cleaning the print head several times does not solve the problem, use a stronger print head cleaning level.

• If the printer has not been used for a long time, nozzles may be dried and clogged. Turn the printer on at least once every two weeks to prevent the nozzles from clogging.

Parent topic: Solving Print Quality Problems
Overall Print Quality is Poor

If you notice that your print quality is uneven, too light, too dark, or there are lines in the print (banding), try these solutions:

- Run a nozzle check to see if any of the print head nozzles are clogged. Then clean the print head, if necessary.
- Align the print head.
- Make sure you are using genuine Epson ink cartridges. If you use non-Epson ink cartridges, the print result may be faint or the color of the printed image may be inaccurate because the remaining ink level is not correctly detected.
- Make sure your ink cartridges have not expired. For best results, use ink cartridges before the expiration date printed on the package (within six months of installation in the printer). Replace expired cartridges with new ones.
- Shake the cartridges before installing them in the printer. To maintain optimum print quality, remove and shake the installed cartridges if the printer has not been used in the last three months.
- Make sure you selected the correct Media Type setting in the printer driver that matches the paper loaded in the printer.
- Compare the print result with the image on your computer screen. Since monitors and printers produce colors differently, printed colors and screen colors do not always look the same.
- Make sure that the printer cover is closed during printing.
- Check the ink levels on the LCD screen. Replace any cartridges that are low on ink.
- Enable color management in the software application or in the printer driver.
- If you are using non-Epson media, make sure you create a custom paper configuration for the media.
- Check the quality setting that you selected in the printer driver. Using a faster printing method may decrease the overall print quality.

Prints are Scuffed or Smeared
If your prints are scuffed or smeared, try these solutions:
• Make sure your paper meets the specifications for your product.
• Do not use paper with folds or creases and always use new media.
• If you are using cut sheet paper, check that changes in humidity and temperature have not made the paper wavy. Flatten the paper before loading it or use new paper.
• If the surface of the paper is scuffed, select a wider Platen Gap setting.
• If the bottom edge is scuffed, try widening the bottom margin.
• If ink is smeared on your prints, clean the rollers. Load blank paper and press the paper feed button to feed it through the printer.
• If you are using non-Epson media, make sure you create a custom paper configuration for the media.
• Make sure the Paper Size Check setting is set to On, or the printer may print outside the edges of the loaded paper and smear ink on the back of the print.
• Depending on the print density and type of paper you are using, the ink may take a while to dry. Do not stack the prints until the ink is completely dry.

Margins Appear in Borderless Prints

If borderless prints still have margins, try these solutions:
• Check the print settings selected in your print application you are using, as well as the printer driver.
• Make sure that the paper settings on the LCD screen match the paper you loaded.
• Make sure borderless enlargement is not set to Min in the printer driver.
• Paper that is stored incorrectly may expand or contract. Make sure you have stored the paper according to the manufacturer's specifications.
• Check that the paper you are using supports borderless printing.
• If you are using roll paper, change the Adjust Cut Position setting. This may reduce the margins at the top and bottom of the print.

If your printer is consuming too much ink during printing, try these solutions:

- Lower the density of ink in the Paper Configuration menu in the printer driver.

# Ink Cartridge Specifications

**Note:** This product uses only genuine Epson-brand cartridges. Other brands of ink cartridges and ink supplies are not compatible and, even if described as compatible, may not function properly.

The cartridges included with the printer are designed for printer setup and not for resale. After some ink is used for charging, the rest is available for printing. Yields vary considerably based on images printed, print settings, paper type, frequency of use, and temperature. For print quality, a variable amount of ink remains in the cartridge after the "replace cartridge" indicator comes on.

**General Product Safety Instructions**

- Be sure to follow all warnings and instructions marked on the product.
- Do not attempt to service this product yourself.
- Use only the type of power source indicated on the product's label.
- Use only the power cord that comes with the product. Use of another cord may cause fires or shock. Do not use the cord with any other equipment.
- Place the product near a wall outlet where the plug can be easily unplugged.
- Connect your product to a properly grounded power outlet. Avoid plugging the product into an outlet on the same circuit as a photo copier or air control system that regularly switches on and off, or on an outlet controlled by a wall switch or timer.
- Do not let the power cord become damaged or frayed. Place it to avoid abrasions, cuts, fraying, crimping, and kinking. Do not place objects on top of it and do not allow it to be stepped on or run over. Be careful to keep the cord straight at each end.
• If you use an extension cord with the product, make sure the total ampere rating of the devices plugged into the extension cord does not exceed the cord's ampere rating. Also, make sure the total ampere rating of all devices plugged into the wall outlet does not exceed the wall outlet's ampere rating.

• If damage occurs to the plug, replace the cord set or consult a qualified electrician. If there are fuses in the plug, make sure you replace them with fuses of the correct size and rating.

• Always turn off the product using the power button, and wait until the power light stops flashing before unplugging the product or cutting off power to the electrical outlet.

• If you will not be using the product for a long period, unplug the power cord from the electrical outlet.

• Place the product on a flat, stable surface that extends beyond its base in all directions. It will not operate properly if it is tilted or at an angle.

• Avoid locations that are subject to rapid changes in heat or humidity, shocks or vibrations, or dust.

• Do not place or store the product outdoors.

• Do not place the product near excessive heat sources or in direct sunlight.

• Leave enough room around the product for sufficient ventilation. Do not block or cover openings in the cabinet or insert objects through the slots.

• Keep the product away from potential sources of electromagnetic interference, such as loudspeakers or the base units of cordless telephones.

• When connecting the product to a computer or other device with a cable, ensure the correct orientation of the connectors. Each connector has only one correct orientation. Inserting a connector in the wrong orientation may damage both devices connected by the cable.

• Do not put your hands inside the product or touch the ink cartridges while printing.

• Do not move the print head by hand; this may damage the product.

• Do not spill liquid on the product or use the product with wet hands.

• Do not use aerosol products that contain flammable gases inside or around the product. Doing so may cause fire.

• Except as specifically explained in your documentation, do not attempt to service the product yourself.

• Unplug the product and refer servicing to qualified service personnel under the following conditions: if the power cord or plug is damaged; if liquid has entered the product; if the product has been dropped or the cabinet damaged; if the product does not operate normally or exhibits a distinct change in performance. Adjust only those controls that are covered by the operating instructions.

• When storing or transporting the product, do not tilt it, stand it on its side, or turn it upside down; otherwise ink may leak.
Note: The lithium batteries in this product contain Perchlorate Material - special handling may apply. Click here for details.

Ink Cartridge Safety Instructions

• Keep ink cartridges out of the reach of children and do not drink the ink.
• Be careful when you handle used ink cartridges; there may be ink remaining around the ink supply port. If ink gets on your skin, wash it off with soap and water. If it gets in your eyes, flush them immediately with water.
• Do not put your hand inside the product or touch any cartridges during printing.
• Install a new ink cartridge immediately after removing an expended one. Leaving cartridges uninstalled can dry out the print head and may prevent the product from printing.
• Install ink cartridges in all the ink cartridge slots. You cannot print if any of the slots are empty.
• Dried ink on the supply port may cause ink leaks when the cartridge is reinserted and used. Wipe off any excess ink before reinserting.
• Do not insert or remove replacement cartridges during printing.
• Do not remove the transparent seal from the ink supply port. This may cause the cartridge to become unusable.
• The green IC chip on this ink cartridge retains a variety of cartridge-related information, such as the ink cartridge status, so that the cartridge may be removed and reinserted freely. Do not touch the green IC chip on the side of the cartridge. This may prevent normal operation and printing.
• If you remove an ink cartridge for later use, protect the ink supply area from dirt and dust and store it in the same environment as the product. Note that there is a valve in the ink supply port, making covers or plugs unnecessary, but care is needed to prevent the ink from staining items that the cartridge touches. Do not touch the ink cartridge ink supply port or surrounding area.
• To insure print quality, use an ink cartridge before the date printed on its package.
• Do not dismantle or alter an ink cartridge. This could damage the print head and may prevent the product from printing.
• Do not drop cartridges or bump them against hard objects; otherwise, the ink may leak.
• Store ink cartridges at room temperature in a location that is not exposed to direct sunlight.
• After bringing an ink cartridge inside from a cold storage site, allow it to warm up at room temperature for at least four hours before using it.

APPLE PUBLIC SOURCE LICENSE

Version 2.0 - August 6, 2003

1. General; Definitions. This License applies to any program or other work which Apple Computer, Inc. ("Apple") makes publicly available and which contains a notice placed by Apple identifying such program or work as "Original Code" and stating that it is subject to the terms of this Apple Public Source License version 2.0 ("License"). As used in this License:

1.1 "Applicable Patent Rights" mean: (a) in the case where Apple is the grantor of rights, (I) claims of patents that are now or hereafter acquired, owned by or assigned to Apple and (ii) that cover subject matter contained in the Original Code, but only to the extent necessary to use, reproduce and/or distribute the Original Code without infringement; and (b) in the case where You are the grantor of rights, (I) claims of patents that are now or hereafter acquired, owned by or assigned to You and (ii) that cover subject matter in Your Modifications, taken alone or in combination with Original Code.

1.2 "Contributor" means any person or entity that creates or contributes to the creation of Modifications.

1.3 "Covered Code" means the Original Code, Modifications, the combination of Original Code and any Modifications, and/or any respective portions thereof.

1.4 "Externally Deploy" means: (a) to sublicense, distribute or otherwise make Covered Code available, directly or indirectly, to anyone other than You; and/or (b) to use Covered Code, alone or as part of a Larger Work, in any way to provide a service, including but not limited to delivery of content, through electronic communication with a client other than You.

1.5 "Larger Work" means a work which combines Covered Code or portions thereof with code not governed by the terms of this License.

1.6 "Modifications" mean any addition to, deletion from, and/or change to, the substance and/or structure of the Original Code, any previous Modifications, the combination of Original Code and any previous Modifications, and/or any respective portions thereof. When code is released as a series of files, a Modification is: (a) any addition to or deletion from the contents of a file containing Covered Code; and/or
(b) any new file or other representation of computer program statements that contains any part of Covered Code.

1.7 "Original Code" means (a) the Source Code of a program or other work as originally made available by Apple under this License, including the Source Code of any updates or upgrades to such programs or works made available by Apple under this License, and that has been expressly identified by Apple as such in the header file(s) of such work; and (b) the object code compiled from such Source Code and originally made available by Apple under this License.

1.8 "Source Code" means the human readable form of a program or other work that is suitable for making modifications to it, including all modules it contains, plus any associated interface definition files, scripts used to control compilation and installation of an executable (object code).

1.9 "You" or "Your" means an individual or a legal entity exercising rights under this License. For legal entities, "You" or "Your" includes any entity which controls, is controlled by, or is under common control with, You, where "control" means (a) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (b) ownership of fifty percent (50%) or more of the outstanding shares or beneficial ownership of such entity.

2. Permitted Uses; Conditions & Restrictions. Subject to the terms and conditions of this License, Apple hereby grants You, effective on the date You accept this License and download the Original Code, a world-wide, royalty-free, non-exclusive license, to the extent of Apple's Applicable Patent Rights and copyrights covering the Original Code, to do the following:

2.1 Unmodified Code. You may use, reproduce, display, perform, internally distribute within Your organization, and Externally Deploy verbatim, unmodified copies of the Original Code, for commercial or non-commercial purposes, provided that in each instance:

(a) You must retain and reproduce in all copies of Original Code the copyright and other proprietary notices and disclaimers of Apple as they appear in the Original Code, and keep intact all notices in the Original Code that refer to this License; and

(b) You must include a copy of this License with every copy of Source Code of Covered Code and documentation You distribute or Externally Deploy, and You may not offer or impose any terms on such Source Code that alter or restrict this License or the recipients' rights hereunder, except as permitted under Section 6.

2.2 Modified Code. You may modify Covered Code and use, reproduce, display, perform, internally distribute within Your organization, and Externally Deploy Your Modifications and Covered Code, for commercial or non-commercial purposes, provided that in each instance You also meet all of these conditions:

(a) You must satisfy all the conditions of Section 2.1 with respect to the Source Code of the Covered Code;
(b) You must duplicate, to the extent it does not already exist, the notice in Exhibit A in each file of the Source Code of all Your Modifications, and cause the modified files to carry prominent notices stating that You changed the files and the date of any change; and

(c) If You Externally Deploy Your Modifications, You must make Source Code of all Your Externally Deployed Modifications either available to those to whom You have Externally Deployed Your Modifications, or publicly available. Source Code of Your Externally Deployed Modifications must be released under the terms set forth in this License, including the license grants set forth in Section 3 below, for as long as you Externally Deploy the Covered Code or twelve (12) months from the date of initial External Deployment, whichever is longer. You should preferably distribute the Source Code of Your Externally Deployed Modifications electronically (e.g. download from a web site).

2.3 Distribution of Executable Versions. In addition, if You Externally Deploy Covered Code (Original Code and/or Modifications) in object code, executable form only, You must include a prominent notice, in the code itself as well as in related documentation, stating that Source Code of the Covered Code is available under the terms of this License with information on how and where to obtain such Source Code.

2.4 Third Party Rights. You expressly acknowledge and agree that although Apple and each Contributor grants the licenses to their respective portions of the Covered Code set forth herein, no assurances are provided by Apple or any Contributor that the Covered Code does not infringe the patent or other intellectual property rights of any other entity. Apple and each Contributor disclaim any liability to You for claims brought by any other entity based on infringement of intellectual property rights or otherwise. As a condition to exercising the rights and licenses granted hereunder, You hereby assume sole responsibility to secure any other intellectual property rights needed, if any. For example, if a third party patent license is required to allow You to distribute the Covered Code, it is Your responsibility to acquire that license before distributing the Covered Code.

3. Your Grants. In consideration of, and as a condition to, the licenses granted to You under this License, You hereby grant to any person or entity receiving or distributing Covered Code under this License a non-exclusive, royalty-free, perpetual, irrevocable license, under Your Applicable Patent Rights and other intellectual property rights (other than patent) owned or controlled by You, to use, reproduce, display, perform, modify, sublicense, distribute and Externally Deploy Your Modifications of the same scope and extent as Apple’s licenses under Sections 2.1 and 2.2 above.

4. Larger Works. You may create a Larger Work by combining Covered Code with other code not governed by the terms of this License and distribute the Larger Work as a single product. In each such instance, You must make sure the requirements of this License are fulfilled for the Covered Code or any portion thereof.

5. Limitations on Patent License. Except as expressly stated in Section 2, no other patent rights, express or implied, are granted by Apple herein. Modifications and/or Larger Works may require additional patent licenses from Apple which Apple may grant in its sole discretion.
6. Additional Terms. You may choose to offer, and to charge a fee for, warranty, support, indemnity or liability obligations and/or other rights consistent with the scope of the license granted herein ("Additional Terms") to one or more recipients of Covered Code. However, You may do so only on Your own behalf and as Your sole responsibility, and not on behalf of Apple or any Contributor. You must obtain the recipient's agreement that any such Additional Terms are offered by You alone, and You hereby agree to indemnify, defend and hold Apple and every Contributor harmless for any liability incurred by or claims asserted against Apple or such Contributor by reason of any such Additional Terms.

7. Versions of the License. Apple may publish revised and/or new versions of this License from time to time. Each version will be given a distinguishing version number. Once Original Code has been published under a particular version of this License, You may continue to use it under the terms of that version. You may also choose to use such Original Code under the terms of any subsequent version of this License published by Apple. No one other than Apple has the right to modify the terms applicable to Covered Code created under this License.

8. NO WARRANTY OR SUPPORT. The Covered Code may contain in whole or in part pre-release, untested, or not fully tested works. The Covered Code may contain errors that could cause failures or loss of data, and may be incomplete or contain inaccuracies. You expressly acknowledge and agree that use of the Covered Code, or any portion thereof, is at Your sole and entire risk. THE COVERED CODE IS PROVIDED "AS IS" AND WITHOUT WARRANTY, UPGRADES OR SUPPORT OF ANY KIND AND APPLE AND APPLE'S LICENSOR(S) (COLLECTIVELY REFERRED TO AS "APPLE" FOR THE PURPOSES OF SECTIONS 8 AND 9) AND ALL CONTRIBUTORS EXPRESSLY DISCLAIM ALL WARRANTIES AND/OR CONDITIONS, EXPRESS OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES AND/OR CONDITIONS OF MERCHANTABILITY, OF SATISFACTORY QUALITY, OF FITNESS FOR A PARTICULAR PURPOSE, OF ACCURACY, OF QUIET ENJOYMENT, AND NONINFRINGEMENT OF THIRD PARTY RIGHTS. APPLE AND EACH CONTRIBUTOR DOES NOT WARRANT AGAINST INTERFERENCE WITH YOUR ENJOYMENT OF THE COVERED CODE, THAT THE FUNCTIONS CONTAINED IN THE COVERED CODE WILL MEET YOUR REQUIREMENTS, THAT THE OPERATION OF THE COVERED CODE WILL BE UNINTERRUPTED OR ERROR-FREE, OR THAT DEFECTS IN THE COVERED CODE WILL BE CORRECTED. NO ORAL OR WRITTEN INFORMATION OR ADVICE GIVEN BY APPLE, AN APPLE AUTHORIZED REPRESENTATIVE OR ANY CONTRIBUTOR SHALL CREATE A WARRANTY. You acknowledge that the Covered Code is not intended for use in the operation of nuclear facilities, aircraft navigation, communication systems, or air traffic control machines in which case the failure of the Covered Code could lead to death, personal injury, or severe physical or environmental damage.

9. LIMITATION OF LIABILITY. TO THE EXTENT NOT PROHIBITED BY LAW, IN NO EVENT SHALL APPLE OR ANY CONTRIBUTOR BE LIABLE FOR ANY INCIDENTAL, SPECIAL, INDIRECT OR CONSEQUENTIAL DAMAGES ARISING OUT OF OR RELATING TO THIS LICENSE OR YOUR USE OR INABILITY TO USE THE COVERED CODE, OR ANY PORTION THEREOF, WHETHER UNDER A THEORY OF CONTRACT, WARRANTY, TORT (INCLUDING NEGLIGENCE), PRODUCTS LIABILITY OR OTHERWISE, EVEN IF APPLE OR SUCH CONTRIBUTOR HAS BEEN ADVISED OF THE
POSSIBILITY OF SUCH DAMAGES AND NOTWITHSTANDING THE FAILURE OF ESSENTIAL PURPOSE OF ANY REMEDY. SOME JURISDICTIONS DO NOT ALLOW THE LIMITATION OF LIABILITY OF INCIDENTAL OR CONSEQUENTIAL DAMAGES, SO THIS LIMITATION MAY NOT APPLY TO YOU. In no event shall Apple’s total liability to You for all damages (other than as may be required by applicable law) under this License exceed the amount of fifty dollars ($50.00).

10. Trademarks. This License does not grant any rights to use the trademarks or trade names "Apple", "Apple Computer", "Mac", "Mac OS", "QuickTime", "QuickTime Streaming Server" or any other trademarks, service marks, logos or trade names belonging to Apple (collectively "Apple Marks") or to any trademark, service mark, logo or trade name belonging to any Contributor. You agree not to use any Apple Marks in or as part of the name of products derived from the Original Code or to endorse or promote products derived from the Original Code other than as expressly permitted by and in strict compliance at all times with Apple's third party trademark usage guidelines which are posted at http://www.apple.com/legal/guidelinesfor3rdparties.html.

11. Ownership. Subject to the licenses granted under this License, each Contributor retains all rights, title and interest in and to any Modifications made by such Contributor. Apple retains all rights, title and interest in and to the Original Code and any Modifications made by or on behalf of Apple ("Apple Modifications"), and such Apple Modifications will not be automatically subject to this License. Apple may, at its sole discretion, choose to license such Apple Modifications under this License, or on different terms from those contained in this License or may choose not to license them at all.

12. Termination.

12.1 Termination. This License and the rights granted hereunder will terminate:
(a) automatically without notice from Apple if You fail to comply with any term(s) of this License and fail to cure such breach within 30 days of becoming aware of such breach;
(b) immediately in the event of the circumstances described in Section 13.5(b); or
(c) automatically without notice from Apple if You, at any time during the term of this License, commence an action for patent infringement against Apple; provided that Apple did not first commence an action for patent infringement against You in that instance.

12.2 Effect of Termination. Upon termination, You agree to immediately stop any further use, reproduction, modification, sublicensing and distribution of the Covered Code. All sublicenses to the Covered Code which have been properly granted prior to termination shall survive any termination of this License. Provisions which, by their nature, should remain in effect beyond the termination of this License shall survive, including but not limited to Sections 3, 5, 8, 9, 10, 11, 12.2 and 13. No party will be liable to any other for compensation, indemnity or damages of any sort solely as a result of terminating this License in accordance with its terms, and termination of this License will be without prejudice to any other right or remedy of any party.

13.1 Government End Users. The Covered Code is a "commercial item" as defined in FAR 2.101. Government software and technical data rights in the Covered Code include only those rights customarily provided to the public as defined in this License. This customary commercial license in technical data and software is provided in accordance with FAR 12.211 (Technical Data) and 12.212 (Computer Software) and, for Department of Defense purchases, DFAR 252.227-7015 (Technical Data - Commercial Items) and 227.7202-3 (Rights in Commercial Computer Software or Computer Software Documentation). Accordingly, all U.S. Government End Users acquire Covered Code with only those rights set forth herein.

13.2 Relationship of Parties. This License will not be construed as creating an agency, partnership, joint venture or any other form of legal association between or among You, Apple or any Contributor, and You will not represent to the contrary, whether expressly, by implication, appearance or otherwise.

13.3 Independent Development. Nothing in this License will impair Apple's right to acquire, license, develop, have others develop for it, market and/or distribute technology or products that perform the same or similar functions as, or otherwise compete with, Modifications, Larger Works, technology or products that You may develop, produce, market or distribute.

13.4 Waiver; Construction. Failure by Apple or any Contributor to enforce any provision of this License will not be deemed a waiver of future enforcement of that or any other provision. Any law or regulation which provides that the language of a contract shall be construed against the drafter will not apply to this License.

13.5 Severability. (a) If for any reason a court of competent jurisdiction finds any provision of this License, or portion thereof, to be unenforceable, that provision of the License will be enforced to the maximum extent permissible so as to effect the economic benefits and intent of the parties, and the remainder of this License will continue in full force and effect. (b) Notwithstanding the foregoing, if applicable law prohibits or restricts You from fully and/or specifically complying with Sections 2 and/or 3 or prevents the enforceability of either of those Sections, this License will immediately terminate and You must immediately discontinue any use of the Covered Code and destroy all copies of it that are in your possession or control.

13.6 Dispute Resolution. Any litigation or other dispute resolution between You and Apple relating to this License shall take place in the Northern District of California, and You and Apple hereby consent to the personal jurisdiction of, and venue in, the state and federal courts within that District with respect to this License. The application of the United Nations Convention on Contracts for the International Sale of Goods is expressly excluded.

13.7 Entire Agreement; Governing Law. This License constitutes the entire agreement between the parties with respect to the subject matter hereof. This License shall be governed by the laws of the United States and the State of California, except that body of California law concerning conflicts of law.

Where You are located in the province of Quebec, Canada, the following clause applies: The parties hereby confirm that they have requested that this License and all related documents be drafted in English.
Les parties ont exigé que le présent contrat et tous les documents connexes soient rédigés en anglais.
