Printer Features

The Epson SureColor P10000/P20000 Series printers include these special features:

High productivity
- Advanced PrecisionCore MicroTFP Piezo-based print head with 10 channels featuring 800 nozzles per channel
- 700 ml high-capacity ink cartridges
- Internal print server offloads print data from computer and network quickly

Reliability
- Fully automatic or user controlled nozzle checking and cleaning cycles for improved print head health over prolonged periods
- Ink repellent print head surface for reduced nozzle clogging

High resolution
- Prints at resolutions up to 2400 x 1200 dpi
- Supports variable-sized droplet technology as small as 3.5 picoliter

Easy-to-use setup and operation
- Intuitive, easy-to-read, color LCD display
- Front-loaded media for easy access
- Easy-to-use software

Optional Equipment and Replacement Parts

You can purchase genuine Epson ink, paper, and accessories from an Epson authorized reseller. To find the nearest reseller, visit proimaging.epson.com (U.S.) or proimaging.epson.ca (Canada), select your product series and product, and click the Where to Buy button. Or call 800-GO-EPSON (800-463-7766) in the U.S. or 800-807-7766 in Canada.

</tr>
</tbody>
</table>
Ink Cartridge Status

The ink cartridge status changes from normal to warning or error status if necessary.

- Ink cartridge error; check the displayed message and clear the error
- Ink cartridge is incompatible, or the printer does not recognize it, or the slider is unlocked
- Check the displayed ink cartridge message
- When not flashing, check the ink level in the ink cartridge, then replace the cartridge, if necessary. When flashing, replace the ink cartridge.

Maintenance tab

The maintenance box status indicates the maintenance box level and changes from normal (left) to warning or error status (right) if necessary. Press the Menu button to display the Maintenance menu.

- Maintenance box is almost full; prepare a new maintenance box
- Maintenance box is full; replace the maintenance box

Setup tab

Displays the product's IP address, current platen gap setting, and menus for various settings. Press the Menu button to display the Setup menu.

Roll Paper Handling

See these sections to load, cut, and remove roll paper in your product.

- Loading Roll Paper
- Cutting Roll Paper
- Removing Roll Paper

Parent topic: Media Handling

Loading Roll Paper

You can load roll paper with a 2- or 3-inch core and a width of up to 44 inches (112 cm) (SureColor P10000) or 64 inches (163 cm) (SureColor P20000).

Caution: Cut off any wavy or curled portions of the roll paper before loading it. Printing on wavy or curled paper may cause print head strikes that lead to repeated print head cleanings or permanent damage to the printer.
1. Open the roll paper cover.

2. Lift the roll lock lever all the way up.

**Note:** If the roll lock lever is not raised up all the way, the lock is still on.

3. Adjust the paper guides to the width of the paper.
4. Place the roll paper on top of the paper guides.

5. If necessary, slide the size levers on the roll paper adapters to the position that matches the core size of your roll paper.

2-inch core
6. Release the adapter lock on both roll paper adapters.

7. Push the adapters into the paper core at both ends of the roll.
8. Push down the adapter lock levers.

9. Lift the roll and slide it to the right until it meets the roll paper guide. Then slide the roll forward.

10. Press the load/remove paper button.

11. Make sure Roll Paper is selected and press the OK button.

12. Insert the leading edge of the roll paper into the feed slot until the printer beeps.

   **Note:** If the Auto Loading setting is set to Off, continue feeding the paper until it reaches the front edge of the printer.

   **Note:** If the cloth in the paper slot lifted up when paper was removed, press the cloth down with the leading edge of the paper.
13. Pull down the roll lock lever to lock the roll in place.

14. Press the **OK** button.

   **Note:** Press the ‡ cut/feed media button to cut off the edge of the paper, if necessary.

15. Close the roll paper cover.

   **Note:** To prevent dust from accumulating inside the printer, always keep the roll paper cover closed unless you are loading or unloading media.

16. Select one of these settings on the LCD screen:
   - If the paper settings are correct, select **Keep Settings Above**.
   - Select **Change Settings** and adjust the settings.
17. Press the **OK** button.
To avoid indenting or creasing the paper, remove it from the paper path and roll it up when you are not printing.

**Note:** Store roll paper on its end or horizontally (if the packaging end-caps are installed). Never store roll paper on its edge, as a flat spot can develop and lead to imaging artifacts on the prints.

**Parent topic:** Roll Paper Handling
**Related references**
Available Epson Papers
**Related tasks**
Removing Roll Paper

**Cutting Roll Paper**
The printer's built-in cutter can automatically cut most paper types, or you can cut your prints manually. You can switch between cutting methods on the control panel or in the printer driver. The setting selected in the printer driver overrides the control panel setting.

**Note:** If you are using the optional Auto Take-up Reel, disable the **Auto Cut** setting in the printer driver and on the control panel.

**Caution:** You should not use the built-in cutter with these paper types or you may damage or dull the built-in cutter:
• Fine art paper
• Canvas
• Vinyl
• Matte poster board
• Adhesive paper
• Banner media
When you print on these paper types, disable the **Auto Cut** setting and cut off your prints manually.
**Note:** For the SureColor P20000, the cut end of roll paper wider than 44 inches (112 cm) may bend. Raise the additional output support on the printer to prevent this and improve cutting.

Lower the support when it is not in use or if it catches on the paper.

**Cutting Roll Paper Manually**

**Printing Trim Lines**

**Parent topic:** Roll Paper Handling

**Related references**

Roll Paper Options - Windows

**Related tasks**

Selecting Roll Paper Settings - Mac

**Related topics**

Using the Optional Auto Take-up Reel

**Cutting Roll Paper Manually**

You can disable the **Auto Cut** option to keep your prints on the roll until you manually cut them.
Note: The built-in cutter may not be able to cut some types of media.

1. Before you print, select the Setup tab.
2. Press the Menu button.
3. Select Printer Setup and press the OK button.
4. Select Roll Paper Setup and press the OK button.
5. Select Auto Cut and press the OK button.
7. Press the OK button to save the setting.
8. Press the back button to exit the menu.
9. Run your print job.
10. Press the cut/feed media button.
11. Press and hold the down arrow button until your print is clear of the printer, then press the OK button to cut the print.

Note: If you cannot cut the paper using the built-in cutter, press the down arrow button until your print is clear of the printer and cut the print by hand.

Parent topic: Cutting Roll Paper

Printing Trim Lines

When you disable the Auto Cut setting, you can print a trim line (page line) between print jobs as a guide for manual cutting.

1. Before you print, select the Setup tab.
2. Press the Menu button.
3. Select Printer Setup and press the OK button.
4. Select Roll Paper Setup and press the OK button.
5. Select Page Line and press the OK button.
7. Press the OK button to save the setting.
8. Press the back button to exit the menu.
9. Run your print job.

Parent topic: Cutting Roll Paper

Setup Menu Settings

Removing Roll Paper

When you finish printing on roll paper, you should remove it from the printer to avoid indenting or creasing the paper.

1. Open the roll paper cover.

2. Press the load/remove paper button.

3. Select Remove Paper and press the OK button.

   If Roll Paper Remaining is set to On, the barcode and paper information is printed. If you are not using the optional Auto Take-Up Reel, the paper rewinds automatically.
4. If you are using the optional Auto Take-Up Reel, rewind the paper using the Manual switch.

5. Lift the roll lock lever all the way up.

Note: If the roll lock lever is not raised up all the way, the lock is still on.
6. Lift the roll out of the printer and place it on top of the paper guides.

7. Release the adapter lock levers on both roll paper adapters and remove the adapters from the ends of the paper roll.

8. Rewind the paper carefully and place it in its original packaging.

   **Note:** Store roll paper on its end or horizontally (if the packaging end-caps are installed). Never store roll paper on its edge, as a flat spot can develop and lead to imaging artifacts on the prints.

**Parent topic:** Roll Paper Handling  
**Related topics**  
Using the Optional Auto Take-up Reel
Cut Sheet Handling

You can load a variety of types and sizes of cut sheet paper in your product.

Loading Cut Sheets
Loading Poster Board

Parent topic: Media Handling

Loading Cut Sheets

Always load cut sheet paper short edge first. You can load photo and fine art sheet paper 31 mil (0.8 mm) or thinner directly into the paper path.

Note: Remove and roll up any roll paper before you load cut sheet paper.

Caution: Do not use wavy or curled paper. Only use paper that is stored flat in its original package. If you load wavy or curled paper, it may cause print head strikes that lead to repeated print head cleanings or permanent damage to the printer.

1. Make sure the printer is turned on and the roll paper cover is closed.
2. Press the load/remove paper button.
3. Select Cut Sheet and press the OK button.
4. Feed the sheet into the feed slot until it meets resistance and the leading edge rests inside the feed slot.
5. Align the right edge of the sheet with the vertical line on the roll paper cover.

6. Press the OK button.
   The sheet feeds into printing position automatically.

7. Select one of these settings on the LCD screen:
   • If the paper settings are correct, select Keep Settings Above.
   • Select Change Settings and adjust the settings.

8. Press the OK button.

9. Run your print job.
   After printing, the sheet stays in the printer.

10. To remove your print, hold the sheet and press the cut/feed media button.

   **Note:** Store cut sheet media flat in its original packaging. Storing sheet media unprotected or on its long or short edge can lead to excess paper curl, cause damage to the printer, and ruin your prints.
Loading Poster Board

Load poster board that is more than 31 mil (0.8 mm) thick into the front of the printer using the poster board support.

1. Make sure the printer is turned on and the roll paper cover is closed.
2. Press the load/remove paper button.
3. Select Poster Board and press the OK button.
4. Lift up the poster board support and pull it toward you.

5. Insert the poster board printable side up.

Note: Make sure the poster board passes under the rollers in the feed slot.
6. Slide the poster board into the feed slot until it is flush with the front of the printer as shown. Align the right edge with the poster board support.

\[\text{Image of the printer with the poster board inserted.}\]

**Note:** You may need to increase the suction by pressing the up arrow button. This helps hold the poster board in place during loading and printing.

7. Press the **OK** button.
   The poster board feeds into the printer.

8. Select one of these settings on the LCD screen:
   - If the paper settings are correct, select **Keep Settings Above**.
   - Select **Change Settings** and adjust the settings.

   **Note:** Make sure you select **Enhanced Board** as the **Media Type** setting in the **Others** menu.

9. Press the **OK** button.
10. Run your print job.
    After printing, the sheet stays in the printer.
11. To remove your print, hold the sheet and press the OK button.

   **Note:** Store cut sheet media flat in its original packaging. Storing sheet media unprotected or on its long or short edge can lead to excess paper curl, cause damage to the printer, and ruin your prints.

12. After removing your print, press the OK button.

Push the poster board support back into the printer.

---

### Adjusting the Platen Gap

If the print quality is not satisfactory when printing on very thin or very thick media, you may need to adjust the Platen Gap setting in the Printer Setup menu.

**Note:** If you notice scuffs on the first few inches of your prints, curled paper may be causing print head strikes. Paper curl may be more extreme in low humidity environments. Store the paper in its original package and load it just before printing. Make sure your paper is flat or try increasing the Platen Gap setting or the top margin until the problem disappears. Adjustments to both the Platen Gap and top margin may be necessary to prevent damage.

1. Select the Setup tab.
2. Press the Menu button.
3. Select Printer Setup and press the OK button.
4. For custom paper types, select Custom Paper Setting setting and press the OK button.
5. Select Platen Gap and press the OK button.
6. Select a platen gap setting and press the OK button.
7. Press the back button to exit the menu.

If print quality does not improve after increasing the Platen Gap, check the Paper Thickness setting in the driver. You may need to create a custom paper configuration for the loaded media.
Using the Paper Basket

The paper basket catches printouts and keeps them from getting dirty or scratched. The paper basket can only hold one print up to 44 inches (112 cm) wide and 62 inches (158 cm) long.

Caution: For fine art and other sensitive prints, do not allow media to gather in the paper basket.

Make sure the support bar is fully extended when using the paper basket.

Storing the Paper Basket

Store the paper basket whenever you do the following:

- Use the optional Auto Take-up Reel
- Move the printer

1. Unhook the plastic connectors on the paper basket from the metal pegs on the support bar.
2. Loosely roll the cloth and insert the loops on the basket into the clamps on the bottom of the printer.

Creating Paper Configurations

You can create and store up to 20 custom paper configurations for use in printing on non-Epson paper or paper not supported by the Epson printer driver. You can also create and manage custom paper configurations in the LFP Remote Panel 2 Utility.

**Note:** Custom paper configurations are based on the existing print head alignment. For best results, perform the head alignments on Epson Doubleweight Matte Paper.

1. Load the type of paper that you want to configure in the printer.
2. Select the Paper status tab.
3. Press the **Menu** button.
4. Select **Custom Paper Setting** and press the **OK** button.
5. Select a number for the custom paper configuration and press the **OK** button.
6. Select **Select Reference Paper** and press the **OK** button.
7. Select a paper preset that is similar to the paper that you loaded and press the **OK** button.

   **Note:** Use the following guidelines when selecting the reference paper that is closest to the paper you are using:
   - Glossy paper: **Photo Paper** or **Proofing Paper**.
   - Thick paper (non-glossy): **Matte Paper**.
   - Thin, soft paper (non-glossy): **Plain Paper**.
   - Cotton paper with a rough surface: **Fine Art Paper**.
   - Special media such as film, cloth, poster board, or tracing paper: **Others**.

8. Select **Platen Gap** and press the **OK** button.
9. Select a platen gap setting and press the **OK** button.

   **Note:** When you use a custom paper configuration, you cannot adjust the **Platen Gap** setting from the **Printer Setup** menu.

10. Select **Paper Thickness** and press the **OK** button.
11. Press the **OK** button.

    A paper thickness pattern prints.

12. Check the printed pattern and locate the pattern with the most evenly overlapping lines.

    1  2  3  4  5  6  7  8  9  10  11  12  13  14  15

13. Select the number of the most even pattern and press the **OK** button.
14. Select any additional settings in the Custom Paper Settings menu, as necessary.
15. When you finish, press back to exit the menu.

After you create paper configurations, you can print a list of the presets and the settings for each one.

*Printing a Paper Configuration List*

*Selecting Custom Paper Configurations*
Printing a Paper Configuration List
You can print a list of the settings for all the paper configurations that you have created.
1. Select the Paper status tab.
2. Press the Menu button.
3. Select Paper and press the OK button.
4. Select Print Paper List and press the OK button.
5. Press the OK button to print the list of your paper configurations.

Parent topic: Creating Paper Configurations

Paper Menu Settings

Selecting Custom Paper Configurations
Once you have created a paper configuration, you can select the configuration whenever you print on the associated media.
1. Select the Paper status tab.
2. Press the Menu button.
3. Select Paper and press the OK button.
4. Select Select Paper Type and press the right arrow button.
5. Select Custom Paper and press the right arrow button.
6. Select the paper configuration you want to use and press the OK button.
7. Press the back button to exit the menu.
The custom paper configuration you selected is displayed on the LCD screen.

Available Epson Papers

You can purchase genuine Epson ink, paper, and accessories from an Epson authorized reseller. To find the nearest reseller, visit proimaging.epson.com (U.S.) or proimaging.epson.ca (Canada), select your product series and product, and click the Where to Buy button. Or call 800-GO-EPSON (800-463-7766) in the U.S. or 800-807-7766 in Canada.

Note: Paper/media availability varies by country.

Using the Optional Auto Take-up Reel

See these sections to use the optional auto take-up reel with your product.

- About the Optional Auto Take-up Reel
- Installing the Auto Take-up Reel
- Attaching the Roll Core to the Auto Take-up Reel
- Take Up with the Printable Side Out
- Take Up with the Printable Side In
- Assembling and Using the Tensioner
- Removing Media from the Optional Auto Take-up Reel

About the Optional Auto Take-up Reel

The optional auto take-up reel automatically rolls up printed media as you print.

You can use the auto take-up reel for media with the printable side in or printable side out.

It is best to do the following when using the auto take-up reel:

- Make sure that the end of the roll is cut straight across.
- Use the side of the take-up roll core holder that is the same width as your media core so the core does not bend or take up media incorrectly.

Parent topic: Using the Optional Auto Take-up Reel

Installing the Auto Take-up Reel

Before installing the optional auto take-up reel, you need to remove the paper basket from the support bar and store it under the printer.
**Note:** Use the hex wrench that came with the printer to install the auto take-up reel.

1. Attach a cable clamp to the side of the printer.

2. Move the support bar into the storage position and position the take-up reel mounting bracket on the side of the printer stand.
3. Use the hex wrench included with the auto take-up reel to secure the mounting bracket with two bolts.

4. Hook the auto-take up reel onto the pegs on the mounting bracket.
5. Use the hex wrench to secure the inside of the auto take-up reel to the mounting bracket with two bolts.

6. Use the hex wrench to secure the mounting bracket to the outside of the auto take-up reel with a bolt.
7. Remove the three thumb screws that hold the sensors in their packing position.

8. Remove the sensors.
9. Attach the inner and front take-up reel sensors to the mounting points on the side and front of the printer stand.

10. Secure the sensors to the printer stand with the thumb screws.
11. Lower the inner take-up reel sensor.

12. Attach a cable clamp to the bottom of the printer.
13. Remove the thumb screw from the paper stop.

14. Attach the paper stop to the left side of the printer stand's horizontal strut.

15. Secure the paper stop to the printer stand with a thumbscrew.
16. Connect the included USB cable to the **OPTION** port on the side of the printer.

17. Route the USB cable through the cable clamp on the side of the printer.
18. Connect the other end of the USB cable to the port on the back of the auto take-up reel.

19. Coil the excess cable and secure it using the cable clamp on the bottom of the printer stand.

20. Connect the power cord to the AC inlet on the back of the auto take-up reel and route the cord through the same cable clamp as the printer's power cord.

21. Plug the auto take-up reel power cord into an electrical outlet.

Parent topic: Using the Optional Auto Take-up Reel

Attaching the Roll Core to the Auto Take-up Reel

You need to attach the roll core to the auto-take up reel before you can load paper onto the take-up reel.
**Note:** Make sure the paper is the same width as the roll core. If the paper and roll core are different widths, the paper may not wind correctly.

1. Set the **Auto** switch on the take-up reel to the **Off** position.

2. Turn on the printer.
3. Load roll media in the printer.
4. Move the support bar to the storage position.
5. Make sure the inner take-up reel sensor is lowered and the caster is positioned parallel to the printer stand.

**Note:** If the caster is not positioned parallel to the printer stand, it may interfere with the take-up reel sensors.

![Diagram of the printer and take-up reel](image)

6. Install the roll core holder with the side that matches the size of the paper core facing out.

![Diagram of the roll core holder](image)

1. 2 inches (51 mm)
2. 3 inches (76 mm)
7. Attach the roll core holder to the paper stop and push it in until it clicks into place.
8. Unlock the paper stop and slide it to the left.
9. Insert the right roll core holder into the roll core until the raised edges on the roll core holder touch the roll core.

10. Attach the roll core to the auto take-up reel and push it in until it clicks into place.
11. Slide the paper stop to the right and insert the roll core holder into the left end of the roll core.

   **Note:** Make sure the raised edges on the roll core holder touch the roll core.

12. Lock the paper stop in place.

**Parent topic:** Using the Optional Auto Take-up Reel

**Take Up with the Printable Side Out**

After you attach the roll core on the optional auto take-up reel, follow these steps to take up media with the printable side out.
Note: Make sure **Auto Cut** is set to **Off** when you use the auto take-up reel.

1. Press the load/remove paper button on the printer.
2. Select **Use Take-up Unit** and press the **OK** button. 
   Paper automatically feeds until the edge of the roll media reaches the roll core.
3. Wind the edge of the media around the front of the roll core.
4. Tape the edge of the media to the center of the core, then tape the edge to the left and right ends.
5. Press the right arrow button on the printer.
6. Make sure the **Auto** switch on the take-up reel is in the **Off** position and press the **OK** button on the printer.
7. Press the **Manual** switch on the take-up reel to the **Forward** position and hold it there until the media wraps around the core at least two times. Then release the switch.

8. Press the **OK** button on the printer. Paper automatically feeds.

9. Make sure that there is some slack in the media and that it loads evenly on both sides.

   **Note:** The media will not take up correctly if it is looser on one side than the other.
10. Move the support bar to the position shown here.

11. Press the right arrow button on the printer.

12. If you are printing on one of these media, place the tensioner in the slack of the roll and press the right arrow button on the printer: Epson Singleweight Matte Paper, Epson Premium Glossy Photo Paper (170), or Epson Premium Semigloss Photo Paper (170).
13. Set the Auto switch on the take-up reel to the Backward position.

14. Press the OK button on the printer.
You are now ready to print with the auto take-up reel.

Setup Menu Settings

Take Up with the Printable Side In
After you attach the roll core on the optional auto take-up reel, follow these steps to take up media with the printable side in.

Note: Make sure Auto Cut is set to Off when you use the auto take-up reel.

1. Press the load/remove paper button on the printer.
2. Select Use Take-up Unit and press the OK button.
   Paper automatically feeds until the edge of the roll media reaches the roll core.
3. Wind the edge of the media around the back of the roll core.
4. Tape the edge of the media to the center of the core, then tape the edge to the left and right ends.

5. Press the right arrow button on the printer.

6. Make sure the **Auto** switch on the take-up reel is in the **Off** position and press the **OK** button on the printer.
7. Press the **Manual** switch on the take-up reel to the **Backward** position and hold it there until the media wraps around the core at least two times. Then release the switch.

8. Press the **OK** button on the printer.
   - Paper automatically feeds.
9. Make sure that there is some slack in the media and that it loads evenly on both sides.

   **Note:** The media will not take up correctly if it is looser on one side than the other.
10. Move the support bar to the position shown here.

11. Press the right arrow button on the printer.

12. If you are printing on one of these media, place the tensioner in the slack of the roll and press the right arrow button on the printer: Epson Singleweight Matte Paper, Epson Premium Glossy Photo Paper (170), or Epson Premium Semigloss Photo Paper (170).
13. Set the **Auto** switch on the take-up reel to the **Forward** position.

14. Press the **OK** button on the printer. 
You are now ready to print with the auto take-up reel.

**Parent topic:** Using the Optional Auto Take-up Reel

Setup Menu Settings 

---

**Assembling and Using the Tensioner**

The tensioner keeps the roll media from becoming too slack. Use the tensioner only when printing on these media types: Epson Singleweight Matte Paper, Epson Premium Glossy Photo Paper (170), Epson Premium Semigloss Photo Paper (170), and other thin media wider that 17 inches (432 mm). You need to adjust the width of the tensioner to match the roll paper you are using before inserting it.

1. Attach the right flange to the right end of the large tension pipe.
2. If the roll paper you are using is wider than 24 inches (610 mm), attach small tension pipes to the left end of the large tension pipe as necessary.

   **Note:** Each small tension pipe adds 10 inches (254 mm) of width to the tensioner. Add up to 4 small tension pipes to the large tension pipe, as necessary.

3. Attach the left flange to the left end of the tension pipe.

   **Note:** Make sure the flange is set wider than the width of the roll media.
4. Do one of the following:
   • If you attached media to the roll core with the printable side in, insert the tensioner as shown here.
• If you attached media to the roll core with printable side out, insert the tensioner as shown here.
5. Align the tensioner with the right edge of the paper as shown.
6. Adjust the flange on the left side of the tensioner so that there is a gap of about 0.25 inch (6 mm) between the flange and the roll paper.

**Removing Media from the Optional Auto Take-up Reel**

After printing on media loaded on the optional auto take-up reel, follow these steps to remove it.

**Note:** Two people are required to remove media from the auto take-up reel.

1. Remove the tensioner.
2. Move the support bar to the storage position.

3. Do one of the following:
   • If the Take-up After Cut setting is set to **On**, press the \( \equiv \downarrow \equiv \uparrow \) cut/feed media button to cut the media manually. Support the media with your hands to keep the prints off of the floor while it is automatically rolled onto the take-up reel.
   • If the Take-up After Cut setting is set to **Off**, move the **Auto** switch on the take-up reel to the **Off** position. Press the \( \equiv \downarrow \equiv \uparrow \) cut/feed media button to cut the media manually. Hold the **Manual** switch on the take-up reel in the **Forward** or **Backward** position depending on whether the printable side of the media faces outwards or inwards.

4. Tape the end of the roll to itself to prevent it from unwinding.
5. Unlock the paper stop and slide the paper holder to the left.

**Note:** Support the reel with one hand to keep it from falling.

6. Remove the roll core from the take-up reel.

**Parent topic:** Using the Optional Auto Take-up Reel
Printing from a Computer

Before printing from your computer, make sure you have set up your product and installed its software as described on the Start Here sheet.

**Note:** If you have an Internet connection, it is a good idea to check for updates to your product software on Epson's support website. If you see a Software Update screen, select **Enable automatic checking** and click **OK**. The update scans your system to see if you have the latest product software. Follow the on-screen instructions.

**Printing with Windows**

You can print with your product using any Windows application, as described in these sections.

- Selecting Basic Print Settings - Windows
- Selecting Print Layout Options - Windows
- Selecting Additional Settings - Windows
- Printing Your Document or Photo - Windows
- Saving, Sharing, and Customizing the Printer Settings
- Selecting Default Print Settings - Windows
- Changing the Language of the Printer Software Screens
- Changing Automatic Update Options

**Parent topic:** Printing from a Computer

**Selecting Basic Print Settings - Windows**

Select the basic settings for the photo or document you want to print.

1. Open a photo or document for printing.
2. Select the print command in your application.

**Note:** You may need to select a print icon on your screen, the **Print** option in the File menu, or another command. See your application's help utility for details.
3. If necessary, select your product name as the printer you want to use.

   **Note:** You may also need to select Preferences, Properties, Print Settings, or Printer Properties to view your print settings.

   You see the Main tab of your printer settings window:

4. Select the **Media Type** setting that matches the paper you loaded.

   **Note:** You can click Custom Settings to select a custom paper configuration.
5. If you are using non-Epson paper or media and you need to fine-tune its performance, select the **Media Type** setting that is closest to the paper you loaded, click the **Paper Config** button, and adjust the paper configuration options as necessary.

6. Select a **Color** option:
   - To print a color document or photo, select the **Color** setting.
   - To print text and graphics in black or shades of gray, select the **Advanced B&W Photo** or **Black** setting.

   **Note:** The **Black** setting is available only when you select **Plain Paper** as the **Media Type** setting.

7. For the **Print Quality** setting, select **Speed**, **Quality**, or **Max Quality** (available with certain media types only), or select **Quality Options** and choose the quality option that matches the print quality you want to use.

8. Select the desired color management option as the **Mode** setting.

9. Select the **Source** setting that matches the paper feeding method you are using.

10. Select the size of the paper you loaded as the **Size** setting.

   **Note:** You can also select the **User-Defined** setting to create a custom paper size.

11. If you are printing on roll paper, click the **Roll Paper Option** button and adjust the settings as necessary.

12. If you want to print a photo without borders, select **Borderless**.

   **Note:** You must select a compatible borderless paper type and size to print without borders. Check the borderless paper compatibility list for details.

13. To see a preview of how your document or photo will print, select **Print Preview**. (The preview appears after you click **Print** but before printing starts.)

   **Note:** The print preview shows the layout of your document or photo, but it may not accurately display the colors of your final print.

14. To layout multiple print jobs for printing all at once, select **Layout Manager**.

Borderless Paper Type Compatibility

Related tasks
Printing Your Document or Photo - Windows

Paper Configuration Options - Windows
Select any of the available Paper Configuration options to fine-tune the quality of your print.
**Note:** If you have high speed (bi-directional) printing enabled and small type or fine details appear too thick, you may need to adjust the **Paper Thickness** setting.

**Color Density**
Adjusts the ink saturation level.

**Drying Time per Print Head Pass**
Pauses print head movement for up to 5 seconds after each pass to allow ink to dry. This lets you print with non-Epson media and avoid smearing the ink.
Paper Feed Adjustment
Modifies the speed of the paper feeding to compensate for banding in the direction of the print head.

Paper Suction
Decreases the paper suction when printing on thin media, such as drafting paper or backlight film.

Paper Thickness
Adjusts the appearance of details in printouts based on paper thickness.

Roll Paper Back Tension
Increases or automatically controls the tension for cloth or thin paper, or if the roll paper wrinkles during printing.

Parent topic: Selecting Basic Print Settings - Windows

Advanced B&W Photo Options - Windows
If you select Advanced B&W Photo as the Color option, you can easily produce neutral and toned black-and-white prints. Whether your photo is color or grayscale, you can use this screening and color management technology to create stunning black-and-white prints. Select Custom as the Mode setting, then click Advanced and select any of the available options.

Color Toning
Adds tone (hue) to your black-and-white output. The default is Neutral, which provides a neutral tonal scale print. You can also choose other popular presets such as Cool, Warm, and Sepia. Note that the presets affect the target in the tone color circle.

Tone
Changes the entire tonal scale of your black-and-white output. While Darker is the default setting, you may see better results if you choose Dark. The tone color circle adjusts the hue of your black-and-white print. Click on any portion of the color wheel or enter corresponding values to customize the tone (hue) to add to your print. The closer you select to the edge of the wheel, the more color you add.

Brightness
Adjusts the overall lightness and darkness of your image.

Contrast
Adjusts the difference between the light and dark areas of your image.

Shadow Tonality
Controls tonality only in the shadow areas of your image.

Highlight Tonality
Controls tonality only in the highlight areas of your image.

Max Optical Density
Adjusts the overall density or focus of the print. Create a soft focus print by lowering the density setting.
**Highlight Point Shift**  
Helps reduce gloss differential on glossy media by adding density to the highlights of your image.

Parent topic: Selecting Basic Print Settings - Windows

**Print Quality Options - Windows**  
You can use the Speed/Quality slider to set the desired quality level and select any of the available Quality options to fine-tune the quality of your print. Some settings may be unavailable, depending on the paper type and border setting you have chosen.

**High Speed**  
Speeds up printing but may reduce print quality.

**Edge Smoothing**  
Smooths jagged edges in low-resolution images such as screen captures or images from the Web.

**Finest Detail**  
Sharpens edges on vector-based data including text, graphics, and line art. (This setting does not affect photographs.)

**Note:** Enabling **Finest Detail** may decrease the print speed.

**Paper Edge Quality**  
Prevents images on the edge of the paper from appearing faint or scuffed but may increase the margins.

**Note:** Selecting **Optimize Media Edge Print Quality** will decrease the print speed.

Parent topic: Selecting Basic Print Settings - Windows

**Color Management Options - Windows**  
You can adjust the **Mode** setting to fine-tune the colors in your printout or turn off color management in your printer software.

If you select **Automatic** as the **Mode** setting, you can choose from these options:

**Charts and Graphs**  
Intensifies colors and lightens the midtones and highlights of an image.

**EPSON Standard (sRGB)**  
Increases the contrast in images.

**Note:** This is the standard mode for most photos and documents when not using an ICC profile.
Adobe RGB
Matches image colors to the Adobe RGB color standard. Use this setting if your source file was captured in Adobe RGB.

If you select **Custom** as the **Mode** setting, you can choose from these options:

**Color Controls**
- Lets you select a **Color Mode** setting, individual settings for **Brightness**, **Contrast**, **Saturation**, and **Density**, and individual color tones. Depending on the selected color mode, you can also adjust the midtone density using the **Gamma** setting.

**PhotoEnhance**
- Lets you choose from various Scene Correction settings to automatically analyze your photos.

**Note:** PhotoEnhance uses a sophisticated face recognition technology to optimize photos that include faces. For this to work, both eyes and the nose must be visible in the subject's face. If your photo includes a face with an intentional color cast, such as a statue, you may want to turn off **PhotoEnhance** to retain the special color effects.

**ICM**
- Automatically adjusts colors based on the printer’s ICC profile and the selected **Media Type** setting, using the Image Color Matching system. Click the **Advanced** button to choose the input profile and other settings.

**Note:** In most cases, you get better results by applying color management in your application, rather than in the printer driver.

**Off (No Color Adjustment)**
- Turns off color management in your printer software so you can manage color using only your application software.

**Note:** An ICC profile is required if color management is turned off.

Parent topic: Selecting Basic Print Settings - Windows
Advanced Color Controls - Windows

If you selected **Custom** as the **Mode** setting and **Color Controls** from the dropdown menu, you can click the **Advanced** button to select detailed settings.

The Color Controls screen lets you specify values for adjusting brightness, contrast, saturation, and individual Cyan, Magenta, and Yellow color tones. You can choose from two Printer Color Adjustment modes and two Gamma settings, and use either a color circle or slide bar to adjust color.

**Parent topic:** Selecting Basic Print Settings - Windows

Paper Source Options - Windows

You can select any of the available options in the paper Source menu to print on the paper loaded in that source.

**Roll Paper**

Selects roll paper loaded in the roll paper holder.
Roll Paper (Banner)
Selects roll paper loaded in the roll paper holder for a series of continuous images without any margin space between them.

Sheet
Selects sheets of paper loaded in the sheet feeder.

Front - Poster Board
Selects poster board or other thick media loaded on the front poster board support.

Parent topic: Selecting Basic Print Settings - Windows

Roll Paper Options - Windows
Select any of the available roll paper options.

![Roll Paper Option](image)

Note: Some settings may not be available, depending on the Roll Paper Option you selected for your paper size.

Auto Cut options:
- **Off**: Select this option to cut your prints manually.
• **Normal Cut**: Creates a margin at the top and bottom of your image. These margins vary by media type and may be changed from their defaults using custom media settings.

![Diagram of Normal Cut]

• **Single Cut**: Prints images within the same print job end-to-end with no gap between them. Borderless images may overlap slightly.

![Diagram of Single Cut]
• **Double Cut**: Increases the space between each image and trims each print individually, providing the cleanest edge with no image overlap for borderless printing.

![Diagram of Double Cut]

**Auto Rotate**
Automatically positions the image or file to fit the roll paper. When Auto Rotate is selected, select the width of the paper as the **Roll Width** setting.

**Print Page Line**
Prints lines between pages as a guide for manual cutting.

**Parent topic:** [Selecting Basic Print Settings - Windows](#)
Using Layout Manager - Windows

Layout Manager lets you create a poster or display by dragging multiple pieces of print data created in different applications onto one sheet of paper for printing.
You can also place the same print data multiple times as shown here.
You can place print data in different sizes and orientations to maximize media usage, as shown here.
You can place print data on roll paper as shown here.

1. Open the file you want to print in your application.
2. Select the print command in your application.
3. Select **Layout Manager** on the Main tab and choose an option for the **Size** setting that matches the size of the document in your application.

![Image of Printing Preferences with Layout Manager](image)

**Note:** You select the size of the paper you are printing on in a later step.

4. Click **OK** and then click **Print**, if necessary. The Layout Manager screen opens and displays one page in the layout.

5. Leave the Layout Manager screen open and repeat steps 1 to 4 to arrange additional print data. The pages are added to the Layout Manager screen.
6. Do the following to arrange objects on the Layout Manager screen:
   • Drag pages to move and resize them.
   • Use the tool buttons and the Object menu to align and rotate pages.
   • Resize and replace whole pages in the Preference or Arrangement Settings screens.

   **Note:** See the Layout Manager screen help for details.

7. Click **File > Properties**, then select your print settings, including the size of the paper you are printing on, on the Main tab.

8. Click the **File** menu on the Layout Manager screen and click **Print**.

   **Note:** To save the current job to a file, click the **File** menu on the Layout Manager screen, save the file, and close the Layout Manager screen. To open the saved file later for editing or reprinting, right-click the printer icon in the Windows taskbar, click **Layout Manager**, and open the file.

**Parent topic:** Selecting Basic Print Settings - Windows

### Selecting Print Layout Options - Windows

You can select a variety of sizing and layout options for your document or photo on the Page Layout tab.

- To change the orientation of your printed document or photo, select the **Portrait** or **Landscape** checkbox.
- To rotate or flip the printed image, select the **Rotate 180°** or **Mirror Image** checkbox.
- To select multiple copies and their print order, select the **Copies**, **Collate**, and **Reverse Order** options.
- To change the size of your printed document or photo, select the **Reduce/Enlarge** checkbox and select sizing options.
- To print multiple pages on one sheet of paper, or print one image on multiple sheets of paper, select the **Multi-Page** checkbox and select the options you want.
- To enlarge your image beyond the limits of your application program, select the **Optimize Enlargement** checkbox.

**Note:** The driver can increase the image size up to 650% and decrease the output resolution to stay within the pixel limitations. Depending on the resolution of the original image and the print size, you may see reduced print quality.
• To print a color background on the page, select the **Print Bckg Color** checkbox and click **Color Settings** to select the color you want to use.

• To print the time, date, and other information about your print job at the top or bottom of the page, select the **Job Settings** checkbox and click **Details** to select the settings you want to use.

**Reduce/Enlarge Options - Windows**

You can select any of the Reduce/Enlarge options to size your printed image.

**Fit to Page**
Sizes your printed image to fit on the paper you loaded and selected as the Output Paper setting.

**Fit to Roll Paper Width**
Sizes your printed image to fit the width of the roll paper you loaded.

**Custom**
Sizes your printed image by the percentage you select as the **Scale to** setting.

**Parent topic: Selecting Print Layout Options - Windows**

**Multi-Page Printing Options - Windows**

You can select these Multi-Page options to set up your multi-page print job.

**N-up**
Prints 2 (2-up) or 4 (4-up) pages on one sheet of paper.

**Poster**
Prints one image on multiple sheets of paper to create a large poster with or without borders. Click the **Settings** button to select the layout and guideline options.

**Parent topic: Selecting Print Layout Options - Windows**

**Selecting Additional Settings - Windows**

You can run maintenance utilities and select additional settings that apply to all the print jobs you send to your product.

1. Access the Windows Desktop and right-click the product icon in the Windows taskbar.
2. Select **Printer Settings**.
3. Click the **Utility** tab.
You see a window like this:

4. Select any of the following options, as necessary:
   - **Nozzle Check** to print a nozzle check pattern to check whether the print head nozzles are clogged.
   - **Head Cleaning** to clean the print head if you notice banding or gaps in your printouts.
   - **Print Head Alignment** to align the print head if printouts appear grainy or out of focus.
   - **Epson Status Monitor 3** to check the printer’s status.
• **Monitoring Preferences** to select the error notifications displayed on the Epson Status Monitor 3 screen, or add a shortcut to the utility in the Windows taskbar.

• **Print Queue** to display a list of all waiting print jobs, view information on the data waiting to be printed, and delete or reprint the jobs.

• **Language** to select the language you want to use for the printer software screens.

• **Speed and Progress** to select various printing options.

• **Menu Arrangement** to arrange the **Setting**, **Media Type**, and **Paper Size** options by frequency of use.

• **Export or Import** to save the print settings to a file or import them from a file. This is useful when you want to select the same print settings on multiple computers.

• **Epson LFP Remote Panel 2** to optimize printer settings and create and manage custom paper configurations. This option is available only if Epson LFP Remote Panel 2 is installed.

• **Epson Color Calibration Utility** to perform printer calibration. This option is available only if the Epson Color Calibration Utility is installed.

5. Click **OK** to close the printer software window.

### Changing the Language of the Printer Software Screens

You can change the language used on the Windows printer software screens.

1. Access the Windows Desktop and right-click the product icon in the Windows taskbar.
2. Select **Printer Settings**.
   
   You see the printer settings window.
3. Click the **Utility** tab.

---

107
You see these options:

4. Select the language you want to use as the **Language** setting.
5. Click **OK** to close the printer software window.

The printer software screens appear in the language you selected the next time you access them.

**Parent topic:** Printing with Windows
Changing Automatic Update Options

Your printer software for Windows automatically checks for updates to the product software. You can change how often the software checks for updates or disable this feature.

1. Access the Windows Desktop and right-click the product icon in the Windows taskbar.
2. Select Software Update Settings.
   You see this window:

   ![Software Update Settings window](image)

3. Do one of the following:
   - To change how often the software checks for updates, select a setting in the Check every menu.
   - To disable the automatic update feature, select the Never option.
4. Click OK to exit.

   Note: If you choose to disable the automatic update feature, you can check for updates manually.

Parent topic: Printing with Windows

Printing on a Mac

You can print with your product using any Mac printing program, as described in these sections.

   Note: If you have an Internet connection, it is a good idea to check for updates to your product software on Epson's support website.
Select the basic settings for the photo or document you want to print.

1. Open a photo or document for printing.
2. Select the print command in your application.

   **Note:** You may need to select a print icon on your screen, the **Print** option in the File menu, or another command. See your application's help utility for details.

3. Select your product as the **Printer** setting.

4. If necessary, click the arrow next to the Printer setting or the **Show Details** button to expand the print window.
You see the expanded printer settings window for your product:

![Printer Settings Window]

**Note:** The print window may look different, depending on the Mac OS version and the application you are using.

5. Select the **Copies** and **Pages** settings as necessary.

**Note:** If you do not see these settings in the print window, check for them in your application before printing. They may be accessible by selecting **Page Setup** from the File menu.
6. Select the size of the paper you loaded as the **Paper Size** setting.
   - To print a borderless photo, select the **Borderless** checkbox or a paper size with a **Borderless** option. You can also create a custom paper size.
   - To print on roll paper, select a roll paper size or one with a **Borderless** option.

   **Note:** For roll paper, make sure the maximum width of your image is set to 44 inches (1118 mm) for the SureColor P10000 or 64 inches (1626 mm) for the SureColor P20000 to fit in the width of your roll paper. Also set the margins to 0 in your application software.

   **Note:** You can reduce or enlarge the size of the printed image by selecting **Paper Handling** from the pop-up menu and selecting a scaling option.

7. Choose portrait or landscape as the **Orientation** setting.

8. Select any application-specific settings that appear on the screen, such as those shown in the image above for the Preview application.

9. Select **Printer Settings** from the pop-up menu.

   ![Preview]

   **Note:** In certain programs, you may need to select **Advanced** before you can select **Printer Settings**. For more information about printer settings, click the ? button.
You see these settings:

![Printer Settings](image)

10. Select the type of paper you loaded as the **Media Type** setting.

   **Note:** The setting may not exactly match the name of your paper. Check the media type settings list for details.

   **Note:** The **Ink** setting may change depending on the size and type of paper you select. To avoid changing black ink more often than necessary, set the printer to the type of black ink you usually use on the control panel.

11. Select one of the following as the **Print Mode** setting:
   - Select **EPSON Precision Dot** for any type of photographic printing.
   - Select **Advanced B&W Photo** to print black-and-white photos on certain types of photo paper. See the list of Advanced B&W Photo options for details. If your paper type does not support this option, print black-and-white photos using the **EPSON Precision Dot** setting.
   - Select **Grayscale** when using plain paper.
12. Select one of the following as the Color Mode setting:

- **Business Graphics**: Intensifies colors and lightens the midtones and highlights of an image. Click the Advanced Color Settings tab to use advanced color controls.

- **EPSON Standard (sRGB)**: Increases the contrast in images. Click the Advanced Color Settings tab to use advanced color controls.

- **Adobe RGB**: Matches image colors to the Adobe RGB color standard. Use this setting if your source file was captured in Adobe RGB. Click the Advanced Color Settings tab to use advanced color controls.

- **Off (No Color Adjustment)**: Turns off color management in your printer software so you can manage color using only your application software.

**Note**: If desired, you can instead use ColorSync to manage colors. In most cases, you get better results by applying color management in your application, rather than in the printer driver.

13. Select the Output Resolution setting you want to use.

14. Select any of the available print options.

Advanced Color Settings - Mac
Output Resolution Settings - Mac
Print Options - Mac

**Related tasks**

Selecting Roll Paper Settings - Mac

**Advanced Color Settings - Mac**

When you click the Advanced Color Settings tab, you see one of the screens below depending on the Print Mode you selected.

- **EPSON Precision Dot**
You can specify values for adjusting brightness, contrast, saturation, and individual Cyan, Magenta, and Yellow color tones.

- Advanced B&W Photo
You can select any of the available options.

Color Toning
Adds tone (hue) to your black-and-white output. The default is Neutral, which provides a neutral tonal scale print. You can also choose other popular presets such as Cool, Warm, and Sepia. Note that the presets affect the target in the tone color circle.

Tone
Changes the entire tonal scale of your black-and-white output. While Darker is the default setting, you may see better results if you choose Dark. The tone color circle adjusts the hue of your black-and-white print. Click on any portion of the color wheel or enter corresponding values to customize the tone (hue) to add to your print. The closer you select to the edge of the wheel, the more color you add.

Brightness
Adjusts the overall lightness and darkness of your image.

Contrast
Adjusts the difference between the light and dark areas of the overall image.

Shadow Tonality
Controls tonality only in the shadow areas of your image.
Highlight Tonality
Controls tonality only in the highlight areas of your image.

Max Optical Density
Adjusts the overall density or focus of the print. Create a soft focus print by lowering the density setting.

Highlight Point Shift
Helps reduce gloss differential on glossy media by adding density to the highlights of your image.

Parent topic: Selecting Basic Print Settings - Mac

Output Resolution Settings - Mac
You can select any of the Output Resolution settings to fine-tune the quality of your print. Some settings may be unavailable, depending on the paper type and border setting you have chosen.

Draft - 300 dpi
For draft printing on plain or matte paper.

Fine - 700 dpi
For everyday text and image printing.

Super Photo - 1200 dpi
For photos and graphics with good print quality and speed.

Super Photo - 2400 dpi
For the best print quality but the slowest print speed.

Parent topic: Selecting Basic Print Settings - Mac

Print Options - Mac
You can select any of the print options to customize your print. Some options may be unavailable, depending on other settings you have chosen.

Super Microweave
Increases detail but may reduce print speed.

High Speed
Speeds up printing but may reduce print quality.

Finest Detail
Sharpens edges on vector-based data including text, graphics, and line art. (This setting does not affect photographs.)

Note: Enabling Finest Detail may decrease the print speed.
Paper Edge Quality
Prevents images on the edge of the paper from appearing faint or scuffed but may increase the margins.

Note: Selecting Optimize Media Edge Print Quality will decrease the print speed.

Parent topic: Selecting Basic Print Settings - Mac

Selecting Roll Paper Settings - Mac

To print on roll paper, you select the roll paper size and roll paper options from the Printer Settings menu.

1. Select Manage Custom Sizes as the Paper Size setting.
2. Click +, double-click Untitled, and enter a name for your roll paper size.
3. Enter the width of the roll paper image as the Width setting.
   
   Note: Make sure your image fits within the width of your roll paper.

4. Enter the length of your roll paper image as the Height setting.
   
   Note: Select your product from the Non-Printable Area menu to automatically select the largest paper size for your product.

5. Set the margin setting to 0.
6. Click OK.
7. Select your new custom roll paper size as the Paper Size setting.
You see this window:

![Roll Paper Settings window](image)

**Note:** Some settings may not be available, depending on the Roll Paper option you selected for your Paper Size.

9. Click **Save Roll Paper** to minimize the amount of blank paper wasted when you print on banner paper.

10. Adjust the amount of image expansion when printing borderless images.

   **Note:** This option is available only when you choose a Paper Size setting with a **Borderless** option.

11. Click **Print**.

---

**Roll Paper Options - Mac**

**Parent topic:** Printing on a Mac

**Related references**

- Borderless Paper Type Compatibility
**Roll Paper Options - Mac**

Select any of the available roll paper options.

**Auto Cut** options:

- **Off**: Select this option to cut your prints manually.
- **Normal Cut**: Creates a margin and the top and bottom of your image.
• **Single Cut**: Prints images end-to-end with no gap between them. Borderless images may overlap slightly.

![Single Cut Diagram]

• **Double Cut**: Increases the space between each image and trims each print individually, providing the cleanest edge for borderless printing.

![Double Cut Diagram]

**Auto Rotate**
Automatically positions the image or file to fit the roll paper. When Auto Rotate is selected, select the width of the paper as the **Roll Width** setting.

**Print Page Line**
Prints lines between pages as a guide for manual cutting.

**Parent topic**: Selecting Roll Paper Settings - Mac
Selecting Paper Configuration Settings - Mac

If you are using non-Epson media and need to fine-tune its print quality, select Advanced Media Control from the pop-up menu. Select the available options as necessary.

**Note:** Before adjusting the Advanced Media Control settings, select the Media Type setting that is closest to the paper you are using.

![Advanced Media Control Options - Mac](image)

**Advanced Media Control Options - Mac**

Select any of the available Advanced Media Control options to fine-tune the quality of your printouts.

**Note:** If you have high speed (bi-directional) printing enabled and small type or fine details appear too thick, you may need to adjust the paper thickness setting.

**Color Density**

Adjusts the ink saturation level.
Drying Time per Print Head Pass
Pauses print head movement for up to 5 seconds after each pass to allow ink to dry. This lets you print with non-Epson media and avoid smearing the ink.

Paper Feed Adjustment
Modifies the speed of the paper feeding to compensate for banding in the direction of the print head.

Paper Thickness
Adjusts the appearance of details in printouts based on paper thickness.

Paper Suction
Decreases the paper suction when printing on thin media, such as drafting paper or backlight film.

Roll Paper Back Tension
Increases or automatically controls the tension for cloth or thin paper, or if the roll paper wrinkles during printing.

Parent topic: Selecting Paper Configuration Settings - Mac

Selecting Print Layout Options - Mac
You can select a variety of layout options by selecting Layout from the pop-up menu on the print window.

- To print multiple pages on one sheet of paper, select the number of pages in the Pages per Sheet pop-up menu. To arrange the print order of the pages, select a Layout Direction setting.
- To print borders around each page on the sheet, select a line setting from the Border pop-up menu.
- To invert or flip the printed image, select the Reverse page orientation or Flip horizontally settings.
Managing Color - Mac

You can adjust the Color Matching settings to fine-tune the colors in your printout, or turn off color management in your printer software.

1. Select **Color Matching** from the pop-up menu in the print window.

2. Select one of the available options.

**Color Matching Options - Mac**

**Note:** If you want to use Advanced Black And White mode, select **EPSON Color Controls**.

- **ColorSync**
  Prints using standard color profiles for your product and paper to help match image colors. You can customize the conversion method and filter settings on the ColorSync pop-up menu in the print window.

- **EPSON Color Controls**
  Lets you manage color using controls in your printer software or turn off color management.

Parent topic: Printing on a Mac
**Sizing Printed Images - Mac**

You can adjust the size of the image as you print it by selecting **Paper Handling** from the pop-up menu on the Print window.

- To collate multiple copies into sets of documents, select the **Collate pages** checkbox.
- To print only selected pages in a multi-page document, select an option from the **Pages to Print** pop-up menu.
- To adjust the order in which pages are printed, select an option from the **Page Order** pop-up menu.
- To scale the image to fit on a specific paper size, select the **Scale to fit paper size** checkbox and select a paper size from the **Destination Paper Size** pop-up menu.
- To restrict scaling of the image to reduced sizing, select the **Scale down only** checkbox. (Deselect this checkbox when enlarging the image.)

*Parent topic: Printing on a Mac*

**Selecting Printing Preferences - Mac**

You can select printing preferences that apply to all the print jobs you send to your product.

1. In the Apple menu or the Dock, select **System Preferences**.
2. Select **Print & Fax**, **Print & Scan**, or **Printers & Scanners**, select your product, and select **Options & Supplies**.
3. Select **Options**.
You see a screen like this:

![Options tab on Mac printing preferences]

4. Select any of the available printing options.
5. Click **OK**.

**Printing Preferences - Mac**

**Parent topic:** Printing on a Mac

**Printing Preferences - Mac**

You can select from these settings on the **Options** tab.

**Warning Notifications**

- Lets you choose whether or not to receive warning notifications from the printer software for various operating conditions.

**Establish bidirectional communication**

- Allows the product to communicate with the computer. Do not change the default setting unless you experience issues when using a shared printing pool.

**Parent topic:** Selecting Printing Preferences - Mac
Printing Your Document or Photo - Mac

Once you have selected your print settings, you are ready to print.

Click **Print** at the bottom of the print window.

Replacing Ink Cartridges

If the icon appears above an ink cartridge on the LCD screen and an ink cartridge expended message appears, the cartridge is expended. When an ink cartridge is expended, you need to replace it.

You may also need to replace a cartridge that is more than six months old, or if your printouts do not look their best, even after cleaning and aligning the print head.

**Note:** Please dispose of your used Epson branded ink cartridges responsibly and in accordance with local requirements. If you would like to return your used ink cartridges to Epson for proper disposal, please go to epson.com/recycle for more information.

Replacing Maintenance Boxes

**Checking Ink and Maintenance Box Status with Windows**

You can check your ink or maintenance box status at any time using a utility on your Windows computer.

1. To check your status, access the Windows Desktop, double-click the product icon in the Windows taskbar, and click Details.

You see this window:
2. Replace or reinstall the maintenance box or ink cartridge as indicated on the screen.

**Note:** If any of the ink cartridges installed in the product is broken, incompatible with the product model, or improperly installed, Epson Status Monitor will not display an accurate ink status.

**Parent topic:** Replacing Ink Cartridges

---

### Checking Cartridge Status - Mac

You can check your cartridge status using a utility on your Mac.

1. In the Apple menu or the Dock, select **System Preferences**. Select **Print & Fax**, **Print & Scan**, or **Printers & Scanners**, select your product, and select **Options & Supplies**. Select **Utility** and select **Open Printer Utility**.

2. Select **EPSON Status Monitor**.

   You see a window like this:

3. Do the following as necessary:

   - To update the ink cartridge status, click **Update**.
   - Replace or reinstall any ink cartridge indicated on the screen.

**Note:** If any of the cartridges installed in the product is broken, incompatible with the product model, or improperly installed, Epson Status Monitor will not display an accurate cartridge status.
Purchase Epson Ink Cartridges and Maintenance Boxes

You can purchase genuine Epson ink, paper, and accessories from an Epson authorized reseller. To find the nearest reseller, visit proimaging.epson.com (U.S.) or proimaging.epson.ca (Canada), select your product series and product, and click the Where to Buy button. Or call 800-GO-EPSON (800-463-7766) in the U.S. or 800-807-7766 in Canada.

Note: This product uses only genuine Epson-brand cartridges. Other brands of ink cartridges and ink supplies are not compatible and, even if described as compatible, may not function properly.

The cartridges included with the printer are designed for printer setup and not for resale. After some ink is used for charging, the rest is available for printing. Yields vary considerably based on images printed, print settings, paper type, frequency of use, and temperature. For print quality, a variable amount of ink remains in the cartridge after the "replace cartridge" indicator comes on.

Ink Cartridge and Maintenance Box Part Numbers

Ink Cartridge and Maintenance Box Part Numbers

Use these part numbers when you order or purchase a new maintenance box or ink cartridges.

Note: For best printing results, use up a cartridge within 6 months of opening the package.

Removing and Installing Ink Cartridges

Make sure you have your replacement cartridges handy before you begin. You must install new cartridges immediately after removing the old ones.

Note: Replace all expended ink cartridges. You cannot print if any of the ink cartridges are expended or any ink slots are empty.

1. Turn on your product.
2. Open the ink cartridge cover.

3. Insert your finger into the notch in the top of the cartridge and pull it straight out of the printer.
Note: Dispose of used cartridges carefully. Do not take the used cartridge apart or try to refill it.

Warning: If ink gets on your skin, wash it thoroughly with soap and water. If ink gets into your eyes, flush them immediately with water. If ink gets into your mouth, spit it out and see a doctor right away. Keep ink cartridges out of the reach of children.

4. Remove the new cartridge from the package. Then gently shake the cartridge for about ten seconds.

Caution: Do not touch the green chip on the cartridge.
5. Insert the new cartridge with the arrow facing up and push it in until it clicks into place.

Caution: Do not remove and re-insert cartridges more often than necessary. Doing so can break the needle valve seal and allow air to enter the ink tubes, damaging the nozzles.

Note: Shake ink cartridges every 3 months after installation.

6. Close the ink cartridge cover.

Your product begins charging the ink delivery system. Do not turn off the product during ink charging.

Caution: If you remove an ink cartridge for later use, protect the ink supply area from dirt and dust and store it in the same environment as the printer. The valve in the ink supply port is designed to contain any excess ink, but do not touch the ink supply port or surrounding area. Always store ink cartridges with the label facing up; do not store cartridges upside-down.

Note: If a cleaning cycle starts when the printer is in a "Ink Low" status and the level of ink is less than that required for a cleaning, you see a prompt telling you that there is not enough ink to clean the print head. Install a full cartridge to complete the cleaning cycle. At the end you can reinstall the original cartridge.

Purchase Epson Ink Cartridges and Maintenance Boxes

Replacing Maintenance Boxes

The maintenance boxes absorb ink used in maintenance operations such as head cleaning. Replace the maintenance boxes when you see a message on the LCD screen.

Note: Do not reuse maintenance boxes you have removed from the printer and exposed to air for a long period of time. The box will not absorb any more ink.

1. Check the LCD screen to determine which maintenance box needs to be replaced.
2. Turn off your product.
3. Remove the new maintenance box from the package.

Caution: Do not touch the chip on the side of the maintenance box or you may damage the product.

4. Open the maintenance box cover.
5. Use the handle on the bottom of the maintenance box to carefully lift it straight up, then pull it out of the product without tilting the box.

6. Place the used maintenance box in the bag supplied with the new box and seal the bag.

7. Insert the new maintenance box in the slot.

Adjusting Print Quality

If your print quality declines, you may need to run a utility to clean or align the print head. If running these utilities does not solve the problem, you may need to replace the ink cartridges.

Print Head Maintenance
Print Head Alignment

Print Head Maintenance

If your printouts become too light, or you see dark or light bands across them, you may need to clean the print head nozzles. Cleaning uses ink, so clean the nozzles only if print quality declines.

You can check for clogged nozzles before you clean them so you don’t clean them unnecessarily.

**Note:** You cannot clean the print head if an ink cartridge is expended, and may not be able to clean it when a cartridge is low. You must replace the cartridge first.

Cleaning the Print Head Using a Computer Utility

You can clean the print head using a utility on your Windows computer or Mac.

1. Make sure roll or cut sheet paper is loaded in the printer.
2. Make sure the correct paper type is selected on the product control panel.
3. Do one of the following:
   • Windows: Access the Windows Desktop and right-click the product icon in the Windows taskbar.
   • In the Apple menu or the Dock, select System Preferences. Select Print & Fax, Print & Scan, or Printers & Scanners, select your product, and select Options & Supplies. Select Utility and select Open Printer Utility.
4. Select Head Cleaning.
You see a window like this:

5. Click **Start** to begin the cleaning cycle.
   When the cleaning cycle is finished, the power light stops flashing and a confirmation screen appears.

   **Caution:** Never turn off the product during a cleaning cycle or you may damage it.

6. Click **Nozzle Check**.
7. Click **OK**.
   The nozzle pattern prints.
8. Check the printed pattern to see if there are gaps in the lines.

   **Note:** Use at least a 10× eye loupe to examine the pattern for any missing or deflected dots or segments.
Print Head Alignment

If your printouts become grainy or blurry, you notice misalignment of vertical lines, or you see dark or light horizontal bands, you may need to align the print head.

Before you align the print head, note the following:

• Alignment varies depending on the loaded media. Align the print head using the media on which you want to print and select the correct paper type as the setting.
• Run a nozzle check before you align the print head. If there are any gaps in the nozzle check pattern, clean the print head.
• Manually align the print head on any transparent or colored paper or on these paper types: Plain paper, Epson Enhanced Matte Posterboard.

Aligning the Print Head Automatically Using the Product Control Panel
Aligning the Print Head Automatically Using a Computer Utility
Aligning the Print Head Manually Using the Product Control Panel
Aligning the Print Head Automatically Using the Product Control Panel

You can automatically align the print head using the control panel on your product.

**Note:** Make sure the printer is not exposed to direct, bright light (such as direct sunlight) while performing an automatic print head alignment.

1. Load roll paper or cut sheet paper in this size or larger: A3 (11.7 × 16.5 inches [297 × 420 mm]).
   **Note:** For best results, use the paper included with the product: Epson Doubleweight Matte Paper.

2. Make sure the correct paper type is selected.
3. Press the maintenance button.
4. Select **Head Alignment** and press the **OK** button.
5. Select **Auto (Bi-D)** and press the **OK** button.
6. Press the **OK** button.
   The alignment process starts.

   **Note:** Do not open the front cover or turn off the printer during alignment.

   **Note:** When aligning on cut sheet paper, the alignment sheet is printed across multiple pages. Once
   the first sheet prints, load another sheet of paper.
7. Select a color, then find the pattern in which the white lines are the most evenly spaced. Note the number of this pattern.

8. Repeat step 7 for that color's alignment pattern in each set.
9. Average the numbers of the patterns you selected in steps 7 and 8.

\[ \frac{(3+4)}{2} = 3.5 \rightarrow 4 \]
10. On the LCD screen, enter that average for that color's alignment patterns. Then press the OK button.
11. Repeat steps 7 through 10 for each color.
12. When you're done, press the OK button.

Cleaning Your Product
Cleaning the Paper Feed Slot
Cleaning Around the Print Head
Replacing the Cutter

Cleaning Your Product

To keep your product working at its best, you should clean it regularly (about once a month).

Note: Do not use a hard brush, benzene, alcohol, or paint thinner to clean the product or you may damage it. Do not use oil or other lubricants inside the product or let water get inside.

1. Turn off the product.
2. Unplug the power cable.
3. Disconnect any connected cables.
4. Remove any paper from the product.
5. Open the front cover and carefully clean the inside of the product with a soft, clean cloth.
6. Gently wipe the light gray areas in the direction indicated by the arrows.

**Note:** If you see dust or paper particles on the dark gray areas (the rollers or ink absorption pads), use a cleaning stick to gently clean them. Do not use too much force when cleaning or touch the rollers or the ink absorption pads with your bare hands or your prints may be affected. Do not use cotton swabs to clean these areas.

**Caution:** Be careful not to touch the gears or ink tubes inside the product.

7. If your product is still dirty, dampen the cloth with a small amount of water and a mild detergent and repeat the previous step. Wipe away any moisture with a soft, dry cloth.
8. Use a cotton swab to gently wipe away any dust or smudges on the sensor. To avoid spreading any dust, only wipe in the direction indicated by the arrows.

**Note:** Do not touch the rollers or any metallic parts or your prints may be affected.

9. If the sensor is still dirty, dampen the swab with a small amount of water and a mild detergent and repeat the previous step. Wipe away any moisture with a dry cotton swab.
10. If paper particles have accumulated in the holes on the platen, use a toothpick or similar tool to push them through.

11. Close the front cover.

12. Use a soft, clean cloth to remove any dust or dirt from the outside of the product.

13. Plug in the power cord and connect any interface cables.

14. Turn on the product.

15. Load roll paper in the printer.

16. Press the \( \text{Cut/feed media} \) button, then press the down arrow button several times to feed blank paper through the paper path and clean the rollers.

**Parent topic:** Maintenance

## Cleaning the Paper Feed Slot

To keep your product working at its best, you should clean the paper feed slot once a year using a cleaning sheet.

You can purchase genuine Epson ink, paper, and accessories from an Epson authorized reseller. To find the nearest reseller, visit proimaging.epson.com (U.S.) or proimaging.epson.ca (Canada), select your product series and product, and click the **Where to Buy** button. Or call 800-GO-EPSON (800-463-7766) in the U.S. or 800-807-7766 in Canada.

1. Turn off the printer.
2. Remove the protective film from the cleaning sheet.

![Image showing protective film being removed](image)

**Note:** Do not touch the adhesive on the sheet (the dark gray area).

3. With the adhesive facing towards you, insert the cleaning sheet about 0.4 inch (1 cm) into the paper feed slot, then pull it out. Repeat this two to three times.

![Diagram showing cleaning sheet being inserted and pulled out](image)
4. Move the cleaning sheet to the left and repeat step 3 to clean the remainder of the paper feed slot.

Note: You can only use a cleaning sheet once.

Parent topic: Maintenance

Cleaning Around the Print Head

If your prints are scuffed or smeared, you can clean around the print head to improve print quality.

Note: Check the following when cleaning around the print head:
- Remove any paper from the printer before cleaning.
- Always use new cleaning sticks.
- Do not touch the tip of the cleaning stick with your bare hand. The oils from your hand can affect print quality.
- Make sure to touch a metal object to discharge any static electricity before you clean around the print head.
- Do not move the print head by hand.
- Do not touch any parts inside the printer except for the print head, caps, and wipers that you are cleaning.
- Do not wipe the caps with alcohol or other organic solvents.

1. Turn off the product.
2. Press and hold both the \textbullet\textbullet maintenance button and the \textcircled{power} button at the same time.

3. When the \textcircled{power} light turns on, release the \textcircled{power} button.

4. When the Head Maintenance message appears on the screen, release the \textbullet\textbullet maintenance button.

5. Press the \textbf{OK} button.
   The print head moves into the maintenance position.

6. Open the left ink cartridge cover.
7. Remove the thumb screws.
8. Slide the upper cover to the left and remove it.
9. Close the ink cartridge cover.
10. Use a cleaning stick to clean the front and back edges on the bottom of the print head.
Note: Do not touch the areas shown in the image below or you may damage your product.

11. Use a cleaning stick to clean the gaps on the bottom of the print head.

Note: Use a mirror if you cannot see the bottom of the print head.
12. Open the ink cartridge cover and attach the upper cover.
13. Secure the upper cover with the thumb screws and close the ink cartridge cover.
14. Open the front cover and use a cleaning stick to clean the top edges of the print head cap.
15. Use a cleaning stick to clean the outside of the front print head wipers.
16. Use a cleaning stick to clean the outside of the rear print head wiper.

17. Use a cleaning stick to clean the top edges of the front and rear print head wipers.
18. Close the front cover.
19. Press the **OK** button.
   The print head returns to the printing position and the printer cleans the print head.
20. When the print head cleaning is complete, turn the printer off.

   **Note:** If you see an error message on the LCD screen, select **Cancel** and clean the print head manually. Then turn the printer off and back on.

**Parent topic:** Maintenance

## Replacing the Cutter

If you notice that your paper does not cut cleanly, you may need to replace the cutter.

1. Remove any paper from the printer.
2. Select the **Maintenance** tab
3. Press the **Menu** button.
4. Select **Cutter Maintenance** and press the **OK** button.
5. Select **Replace Cutter** and press the **OK** button.
6. Press the **OK** button.
   The cutter moves to the replacement position.
7. Using a Phillips head screwdriver, loosen the screw holding the cutter in place.

8. Carefully remove the cutter from the product.

**Warning**: Keep the cutter out of the reach of children. The blade is sharp and can cause injury.
9. Align the pin on the new cutter with the hole in the product and insert it into your product.

10. Tighten the cutter screw securely.

   **Note:** Make sure you completely tighten the screw or the cutter may shift and cut unevenly.

11. Press the **OK** button.

    The cutter moves back to the home position.

Moving or Transporting the Product

See these sections to prepare and move the printer.

Moving the Product Short Distances
Moving the Product Long Distances

Moving the Product Short Distances

If you need to move the product a short distance, such as within the same building, you can roll the product on its casters.

**Note:** When moving or storing the product in temperatures at or below 14 °F (–10 °C), enable the **Transportation/Storage** option.

**Caution:** During transportation and storage, follow these guidelines to avoid damaging your product:

- Do not roll the product on angled or uneven surfaces.
- Leave the ink cartridges installed to prevent the print head from drying out.

1. Turn off the product.
2. Unplug the power cable.
3. Disconnect any connected cables.
4. Remove any paper from the product.
5. Close the roll paper cover.
6. Store the paper basket.
7. Unlock the front casters.
8. Carefully roll the product to its new location.
9. Lock the front casters.

Moving the Product Long Distances

If you need to move the product a long distance or ship it, you should remove the product from its stand.

**Note:** When moving or storing the product in temperatures at or below 14 °F (–10 °C), enable the **Transportation/Storage** option.

**Caution:** During transportation and storage, leave the ink cartridges installed to prevent the print head from drying out.

1. Turn off the product.
2. Unplug the power cable.
3. Disconnect any connected cables.
4. Remove any paper from the product.
5. Close the roll paper cover.
6. Remove the paper basket.
7. Remove the optional Auto Take-Up Reel, if it is installed.
8. Lock the front casters.
9. Remove the three bolts and washers securing the product to the stand and keep them in a safe place.
10. Lift the product using the hand grips as shown.

![Hand grips illustration]

**Warning:** Four or more people are required to lift the product.

**Caution:** Keep the printer level while moving it.

11. If you are shipping the product, repack it in the original box using the packing materials that came with the product.

When the product reaches its new location, re-assemble it using the instructions in the *Setup* guide.

Product Status Messages

You can often diagnose problems with your product by checking the messages on the LCD screen.

<table>
<thead>
<tr>
<th>LCD screen message</th>
<th>Condition/solution</th>
</tr>
</thead>
<tbody>
<tr>
<td>Ink Cartridge Error</td>
<td>The ink cartridges have a problem.</td>
</tr>
<tr>
<td>Ink cartridge cannot be recognized. Insert again or replace ink cartridge.</td>
<td>• Check that the cartridge is the same color as the color displayed on the control panel and ink cartridge cover label, and reinstall the cartridge, if necessary. If the message persists, insert a new ink cartridge.</td>
</tr>
<tr>
<td>Ink Cartridge Error</td>
<td>• Condensation may have occurred in the ink cartridge. Remove the cartridge, leave it for four hours or more at room temperature, and reinstall it.</td>
</tr>
<tr>
<td>Ink cartridge cannot be detected. Insert again or replace ink cartridge.</td>
<td></td>
</tr>
<tr>
<td>Ink Cartridge Error</td>
<td>Insert a genuine Epson ink cartridge that is approved for use in the printer.</td>
</tr>
<tr>
<td>Please install the correct ink cartridge.</td>
<td></td>
</tr>
<tr>
<td>Ink Low</td>
<td>The ink is low. Make sure you have a replacement ink cartridge handy.</td>
</tr>
<tr>
<td>Cleaning Error</td>
<td>The print head nozzles are still clogged even after running automatic head cleaning. Select one of the following on the LCD screen:</td>
</tr>
<tr>
<td>Clogged nozzles were not fixed.</td>
<td>• To run another automatic head cleaning, select <strong>Clean Head Again.</strong></td>
</tr>
<tr>
<td></td>
<td>• To continue printing with clogged nozzles, select <strong>Continue Printing.</strong></td>

<td>The printer driver sent an invalid or incorrect command to the printer.</td>
</tr>
<tr>
<td>Check driver settings.</td>
<td>Press the II· pause/cancel button and select <strong>Job Cancel</strong>. Make sure that the driver you are using supports your product.</td>
</tr>
<tr>
<td>Reel Unit Error</td>
<td>Turn off the printer, wait a few minutes, and turn on the printer.</td>
</tr>
<tr>
<td>Check Auto Take-up Reel Unit and restart printer.</td>
<td>If the message still appears, contact Epson for support.</td>
</tr>
<tr>
<td>Reel Unit Error</td>
<td>Reconnect the cable that runs from the optional Auto Take-up Reel to the printer.</td>
</tr>
<tr>
<td>Check Auto Take-up Reel Unit cable and restart printer.</td>
<td></td>
</tr>
<tr>
<td>LCD screen message</td>
<td>Condition/solution</td>
</tr>
<tr>
<td>----------------------------------------</td>
<td>---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------</td>
</tr>
<tr>
<td>Reel Unit Disconnected Auto Take-up Reel Unit is disconnected. Do you continue?</td>
<td>The optional Auto Take-up Reel is not connected. Reconnect the unit and select <strong>No</strong> on the LCD screen to turn off the printer. Wait a moment, then turn the printer on. To continue printing without the Auto Take-up Reel, select <strong>Yes</strong> on the control panel.</td>
</tr>
<tr>
<td>Take-Up Error Is anything obstructing the take-up reel sensor system?</td>
<td>The optional Auto Take-up Reel cannot take up media. Check the optional Auto Take-up Reel sensor and clear any obstructions, then press the <strong>OK</strong> button on the control panel. If there is any loose paper on the Auto Take-up Reel roll core, set the Auto switch to <strong>Off</strong> and hold the Manual switch in the take-up direction to remove slack in the roll paper. Confirm that the paper is attached to the roll core correctly, then return the Auto switch to the original position and press the <strong>OK</strong> button.</td>
</tr>
<tr>
<td>HDD Error HDD used for another printer needs to be formatted. Continue?</td>
<td>The inserted hard drive is not formatted or is formatted for another printer. You must format an internal print server that has been used with another printer before using it with your product. Select <strong>Yes</strong> on the LCD screen to format the drive or you will not be able to print with the internal print server.</td>
</tr>
<tr>
<td>Storage Error Check if hard disk unit is correctly installed.</td>
<td>The internal print server cannot store the current print job. Press the <strong>II · pause/cancel</strong> button and select <strong>Job Cancel</strong>, then remove and reinstall the internal print server. If the message still appears, contact Epson for support. To continue printing regardless of the internal printer server's status, select <strong>Print only</strong> from the <strong>Hard Disk Unit</strong> menu in the printer driver.</td>
</tr>
<tr>
<td>Data Size Error Data size of print job is too large. Check on print job.</td>
<td>The internal print server can store individual print jobs that are up to 100GB in size. To print larger jobs, select <strong>Print Only</strong> from the <strong>Hard Disk Unit</strong> menu in the printer driver.</td>
</tr>
<tr>
<td>LCD screen message</td>
<td>Condition/solution</td>
</tr>
<tr>
<td>------------------------</td>
<td>-----------------------------------------------------------------------------------------------------------------------------------------------------</td>
</tr>
<tr>
<td>HDD Store Error</td>
<td>There is insufficient space on the internal print server. Delete some print jobs from the internal print server using the Remote Manager or LFP HDD Utility (Windows only).</td>
</tr>
<tr>
<td>Hard disk does not have enough space.</td>
<td></td>
</tr>
<tr>
<td>See documentation for how to delete stored print jobs.</td>
<td></td>
</tr>
<tr>
<td>HDD Boot Error</td>
<td>Press the OK button. If the message still appears, contact Epson for support. To continue printing regardless of the internal printer server's status, select <strong>Print only</strong> from the <strong>Hard Disk Unit</strong> menu in the printer driver.</td>
</tr>
<tr>
<td>Hard disk error. Hard disk cannot be used.</td>
<td></td>
</tr>
<tr>
<td>Held Jobs Limit</td>
<td>The internal print server has reached the limit of 200 held jobs. Press the OK button on the control panel and select <strong>Resume All Jobs</strong>.</td>
</tr>
<tr>
<td>Held job queue full.</td>
<td></td>
</tr>
<tr>
<td>Checking hard disk</td>
<td>Data on the internal print server is currently being checked. If the results of the check show that data restoration is necessary, the internal print server will start the restoration process. This may take up to 20 minutes. If the internal print server cannot restore the data, the <strong>Format Hard Disk</strong> option appears on the LCD screen. Format the internal print server to continue using it. If you do not format the disk, you will not be able to print with the internal print server.</td>
</tr>
<tr>
<td>Firmware Error</td>
<td>Download and install the latest firmware for the printer and the optional expansion unit.</td>
</tr>
<tr>
<td>Firmware mismatch between Adobe PostScript 3 Expansion Unit and printer. Refer to manual for details.</td>
<td></td>
</tr>
<tr>
<td>Feed Stabilizer Error</td>
<td>The paper feed stabilizer is not functioning. To continue printing temporarily without the paper feed stabilizer, select <strong>Yes</strong>. Contact Epson for support.</td>
</tr>
<tr>
<td>Paper Feed Stabilizer is not available.</td>
<td></td>
</tr>
<tr>
<td>Continue printing?</td>
<td></td>
</tr>
<tr>
<td>LCD screen message</td>
<td>Condition/solution</td>
</tr>
<tr>
<td>----------------------------------------</td>
<td>-------------------------------------------------------------------------------------</td>
</tr>
<tr>
<td>Paper Feed Sensor Error</td>
<td>The paper feed sensor is dirty. Clean the sensor.</td>
</tr>
<tr>
<td>Refer to the manual to find out how to solve the problem.</td>
<td></td>
</tr>
<tr>
<td>Perform Powerful Cleaning on all nozzles.</td>
<td>You have not cleaned the print head nozzles in six months and Timer Cleaning is set to Off. Perform Powerful Cleaning on all nozzles.</td>
</tr>
<tr>
<td>Maintenance Request Replace Part Soon/Replace Part Now (maintenance request code)</td>
<td>A part used in the printer is nearing the end of its service life. Contact Epson for support and provide them with the displayed maintenance request code. The error persists until you replace the requested part.</td>
</tr>
</tbody>
</table>
| Call For Service (service code) Power off and then on. If this doesn't work, note the code and call for service. | A call for service occurs when:  
  • The power cable is not connected securely  
  • An error occurs that cannot be cleared  
When a call for service has occurred, the printer automatically stops printing. Turn off the printer, disconnect the power cable from both the outlet and the printer, and reconnect them. Turn the printer on and off several times. If the same call for service is displayed on the LCD screen, contact Epson for support and provide them with the displayed service code. |

Solving Printer Problems

Check these sections if you have problems operating your product.

Printer Does Not Turn On
If the printer does not turn on, try these solutions:

• Make sure the power cable is securely connected.
• Make sure the power outlet works by connecting the power cable for another electronic device.

Parent topic: Solving Printer Problems

LCD Screen Shuts Off
If the LCD screen shuts off intermittently, the printer may be in Sleep Mode. Try these solutions:

• Press any of the buttons on the control panel to exit sleep mode.
• You can adjust the delay time before the product enters sleep mode in the Preferences menu.

Parent topic: Solving Printer Problems

Solving Printing Problems
Check these sections if you have problems printing with your product.
Nothing Prints

If you have sent a print job and nothing prints, try these solutions:

- Make sure your printer is turned on.
- Make sure any interface cables are connected securely at both ends. If you have a spare cable, try connecting with the spare cable.
- Check the model and specifications of the interface cable to see if the cable is appropriate for your computer and printer.
- If you connected your printer to a USB hub, make sure it is a first-tier hub. If it still does not print, connect your printer directly to your computer instead of the hub.
- Make sure the USB hub is recognized correctly on the computer. Disconnect all USB hubs from the computer and connect the printer directly to the computer's USB port.
- Make sure you have not selected **Save only** from the **Hard Disk Unit** menu in the printer driver.
- Make sure the USB cable length does not exceed 10 feet (3 m).

Interface Specifications

Cannot Print Over a Network

If you cannot print over a network, try these solutions:

- Make sure that your printer is turned on.
- If you are using TCP/IP, make sure the printer's IP address is set correctly for your network. If your network does not assign IP addresses using DHCP, set the IP address manually.
- Check your wired LAN router or access point to see if the LED for the port to which your printer is connected is on or flashing. If the link LED is off, try the following:
  - Make sure the Ethernet cable is securely connected to your printer and to your router, access point, switch, or hub.
• Try connecting your printer to a different port or a different router, access point, switch, or hub.
• Try connecting with a different Ethernet cable.
• Try printing to your printer from another computer on the network.

Paper Feeding Problems
Roll Paper Jam Problems
Cut Sheet Paper Jam Problems
Paper Does Not Collect in the Basket or is Creased

Parent topic: Solving Problems
Paper Feeding Problems

If you have problems feeding paper, try these solutions:

- Make sure paper is loaded in the correct orientation. Load cut sheets vertically (short edge first).
- For best results, follow these guidelines:
  - Use new, smooth, high-quality paper that is not damp, curled, creased, old, too thin, or too thick.
  - Follow any special loading instructions that came with the paper.
- If roll paper does not feed, cut the end straight across and uncurl it by rolling it backward, if necessary. Then reload the paper.
- If you cannot insert paper easily into the paper feed slot, make sure the paper is perfectly flat and not curled.
- Do not load more than one piece of cut sheet paper.
- Make sure your paper meets the specifications for your product.
- If poster board does not feed, make sure you are loading it straight into the product, not at an angle.
- Make sure that paper is not jammed inside the product.
- If you are using pre-printed paper, such as a certificate, disable the Paper Size Check setting.

Roll Paper Jam Problems

If roll paper has jammed in the printer, follow the steps here to clear the jam.

1. Turn the printer off and back on again.
2. Open the front cover.

Caution: Do not touch the ribbon cable inside the printer.
3. Carefully move the print head away from the paper jam.

**Caution:** Do not touch the print head unless you are removing a paper jam. Touching the print head may cause a static shock that damages the printer.
4. Cut the paper above the paper feed slot.

5. Remove the jammed paper in the direction shown.
6. Close the front cover.
7. Unlock the roll paper lock lever and rewind the roll paper.
8. Cut the edge of the roll paper straight horizontally and reload the roll paper.

   **Note:** Make sure to cut off any jagged or folded sections of paper.

Paper Does Not Collect in the Basket or is Creased

If paper does not collect correctly in the paper basket, try these solutions:

• If paper does not collect in the basket, gently press on the paper basket as paper is ejected from the printer. This prevents the paper from catching on the basket.

• If the paper folds after cutting, set the Auto Cut setting to Off. Cut the paper manually while supporting the print.

• If the paper creases and does not collect in the basket, close the basket and resume printing. Before the paper reaches floor, hold the paper with both hands and continue to support it until printing is complete. Do not load more than one piece of cut sheet paper at a time.

Solving Print Quality Problems

Check these sections if you have problems with print quality.
Nozzle Check Pattern Prints Incorrectly
Overall Print Quality is Poor
Lines Are Misaligned
Prints are Scuffed or Smeared
Margins Appear in Borderless Prints
Too Much Ink is Consumed

Parent topic: Solving Problems

Nozzle Check Pattern Prints Incorrectly
If the nozzle check pattern does not print correctly, try these solutions:

• Clean the print head and print the check pattern again. If cleaning the print head several times does not solve the problem, use a stronger print head cleaning level.

• If the printer has not been used for a long time, nozzles may be dried and clogged. Turn the printer on at least once every two weeks to prevent the nozzles from clogging.

Parent topic: Solving Print Quality Problems

Related concepts
Print Head Nozzle Check
Print Head Cleaning

Setup Menu Settings

Overall Print Quality is Poor
If you notice that your print quality is uneven, too light, too dark, or there are lines in the print (banding), try these solutions:

• Run a nozzle check to see if any of the print head nozzles are clogged. Then clean the print head, if necessary.

• Align the print head.

• Make sure you are using genuine Epson ink cartridges. If you use non-Epson ink cartridges, the print result may be faint or the color of the printed image may be inaccurate because the remaining ink level is not correctly detected.

• Make sure your ink cartridges have not expired. For best results, use ink cartridges before the expiration date printed on the package (within six months of installation in the printer). Replace expired cartridges with new ones.
• Shake the cartridges before installing them in the printer. To maintain optimum print quality, remove and shake the installed cartridges every three months.

• Make sure you selected the correct Media Type setting in the printer driver that matches the paper loaded in the printer.

• Compare the print result with the image on your computer screen. Since monitors and printers produce colors differently, printed colors and screen colors do not always look the same.

• Make sure that the front cover is closed during printing.

• Check the ink levels on the LCD screen. Replace any cartridges that are low on ink.

• Enable color management in the software application or in the printer driver.

• If you are using non-Epson media, make sure you created a custom paper configuration for the media.

• Check the quality setting that you selected in the printer driver. Using a faster printing method may decrease the overall print quality.

• If you are printing on roll paper, cut approximately 3 inches (76 mm) off the end of the roll. Because the leading edge is in contact with the air, the paper quality may decline over time.

• Enable the Optimize media edge print quality setting in the printer driver.

• Check the paper feed sensor. If the sensor is dirty, clean it.

• Make sure the Paper Feed Stabilizer setting on the LCD screen is set to On.

• Check the cloth in the paper slot. If you see dust or paper particles, clean it with a cleaning sheet.

Lines Are Misaligned

If you see vertical lines in the print output when you use bi-directional printing, try these solutions:

• Align the print head.
• You may encounter issues if you did the following:
  • Created a custom paper configuration for non-Epson media.
  • Aligned the print head with the non-Epson media, but did not correctly adjust the Paper Thickness setting.
  • Removed the non-Epson media, then loaded Epson media and selected a default paper type.

To correct this issue, select Restore Settings in the Head Alignment menu.

Prints are Scuffed or Smearred

If your prints are scuffed or smeared, try these solutions:

• Make sure your paper meets the specifications for your product.
• Do not use paper with folds or creases and always use new paper.
• If you are using cut sheet paper, check that changes in humidity and temperature have not made the paper wavy. Flatten the paper before loading it or use new paper.
• If the surface of the paper is scuffed, select a wider Platen Gap setting. If the paper is still scuffed, set Use Paper Eject Roller setting to On.

  Note: Do not enable the Use Paper Eject Roller setting when printing on glossy media.

• If an edge of the print is scuffed, try widening the corresponding margin.
• If ink is smeared on your prints, clean the rollers. Load blank paper and press the 
  cut/feed media button to feed it through the printer.
• If you are using non-Epson media, make sure you created a custom paper configuration for the media.
• Make sure the Paper Size Check setting is set to On, or the printer may print outside the edges of the loaded paper and smear ink on the back of the print.
• If the Auto Cut setting is set to Off, try setting the Margin Per Page setting to 65mm.
• Depending on the print density and type of paper you are using, the ink may take a while to dry. Do not stack prints until the ink is completely dry.
• Clean around the print head.

Margins Appear in Borderless Prints

If borderless prints still have margins, try these solutions:
• Check the print settings selected in your print application you are using, as well as the printer driver.
• Make sure that the paper settings on the LCD screen match the paper you loaded.
• Paper that is stored incorrectly may expand or contract. Make sure you have stored the paper according to the manufacturer's specifications.
• Check that the paper you are using supports borderless printing.
• If you are using roll paper, change the Adjust Cut Position setting. This may reduce the margins at the leading edge of the print.

Too Much Ink is Consumed

If your printer is consuming too much ink during printing, try these solutions:

- Make sure you selected the Media Type setting in the printer driver that matches the paper you loaded in the printer. The amount of ink used during printing is controlled by the Media Type setting.
- Lower the density of ink in the Paper Configuration menu in the printer driver.

Where to Get Help

Epson provides technical support and information on the installation, configuration, and operation of professional printing products through the Epson Preferred Limited Warranty Plan. Dial (888) 377-6611, 6 AM to 6 PM, Pacific Time, Monday through Friday. Days and hours of support are subject to change without notice.

Note: If you experience difficulty with the toll-free number, call (562) 276-1305 (U.S.) or (905) 709-3481 (Canada).

Before you call, make sure you have your printer serial number and proof of purchase.

Visit epson.com/support (U.S.) or epson.ca/support (Canada) and select your product for solutions to common problems. You can download drivers, firmware, and documentation, get FAQs and troubleshooting advice, or e-mail Epson with your questions.

Note: For help using any other software on your system, see the documentation for that software for technical support information.
Purchase Supplies and Accessories

You can purchase genuine Epson ink, paper, and accessories from an Epson authorized reseller. To find the nearest reseller, visit proimaging.epson.com (U.S.) or proimaging.epson.ca (Canada), select your product series and product, and click the Where to Buy button. Or call 800-GO-EPSON (800-463-7766) in the U.S. or 800-807-7766 in Canada.

Printable Area Specifications

Note: When printing borderless, quality may decline in the expanded printable area.
Cut sheet paper

Note: When printing borderless, the left and right margins are 0.

1 Left/right/bottom margin: 0.12 inch (3 mm) minimum
2 Top margin: 0.55 inch (14 mm) minimum
3 Printable width: 8.3 inches (210 mm) to 44 inches (1118 mm)
4 Printable length: 11 inches (279 mm) to 62.2 inches (1580 mm)
   Poster board printable length: 11 inches (279 mm) to 40.5 inches (1030 mm)
Roll paper

Note: Margins may change depending on the Roll Paper Margin setting that you select. The numbers below are the default settings. When printing with the left and right borderless setting, the left and right margins are 0. When printing with the borderless on all sides setting, all margins are 0.

1. Bottom margin: 0.59 inch (15 mm) minimum*
2. Left margin: 0.12 inch (3 mm) minimum
3. Top margin: 0.59 inch (15 mm) minimum*
4. Right margin: 0.12 inch (3 mm) minimum
5. Printable length: 0.9 feet (0.28 m) to 49.2 feet (15 m)
6. **SureColor P10000:**
   - Printable width: 10 inches (254 mm) to 44 inches (1118 mm)
7. **SureColor P20000:**
   - Printable width: 10 inches (254 mm) to 64 inches (1626 mm)

* For these paper types the default top and bottom margins are 0.8 inch (20 mm): Epson Premium Glossy Photo Paper (250), Epson Premium Semigloss Photo Paper (250), Epson Premium Luster Photo
Paper (260), and Epson Premium Semimatte Photo Paper (250). For these paper types the default top and bottom margins are 1.8 inches (45 mm): Epson UltraSmooth Fine Art Paper.

**Parent topic:** Technical Specifications

## Ink Cartridge Specifications

**Note:** This product uses only genuine Epson-brand cartridges. Other brands of ink cartridges and ink supplies are not compatible and, even if described as compatible, may not function properly.

The cartridges included with the printer are designed for printer setup and not for resale. After some ink is used for charging, the rest is available for printing. Yields vary considerably based on images printed, print settings, paper type, frequency of use, and temperature. For print quality, a variable amount of ink remains in the cartridge after the "replace cartridge" indicator comes on.

### Pigment ink

- **Black:** Dark Gray, Light Gray, Gray, Photo Black, Matte Black
- **Color:** Cyan, Light Cyan, Vivid Magenta, Vivid Light Magenta, Yellow

### Cartridge life

- **Unopened package:** do not use if the date on the package has expired

### Print quality guarantee

- **After installation:** 1 year

**Note:** Shake ink cartridges every 3 months after installation.

### Temperature

- **In transit (unopened):** −4 to 140 °F (−20 to 60 °C)
- **Storage:** −4 to 104 °F (−20 to 40 °C)
- 72 hours at 140 °F (60 °C)
- 4 days at −4 °F (−20 °C)
- 1 month at 104 °F (40 °C)
- Ink freezes at 5 °F (−15 °C)
- Ink thaws and is usable after 4 hours at 77 °F (25 °C)

**Note:** For best printing results, use up a cartridge within 6 months of opening the package.

Important Safety Instructions

Before using your Epson product, read and follow these safety instructions.

General Product Safety Instructions
Ink Cartridge Safety Instructions

Parent topic: Notices

General Product Safety Instructions

- Be sure to follow all warnings and instructions marked on the product.
- Do not attempt to service this product yourself.
- Use only the type of power source indicated on the product's label.
- Use only the power cord that comes with the product. Use of another cord may cause fires or shock. Do not use the cord with any other equipment.
- Place the product near a wall outlet where the plug can be easily unplugged.
- Connect your product to a properly grounded power outlet. Avoid plugging the product into an outlet on the same circuit as a photo copier or air control system that regularly switches on and off, or on an outlet controlled by a wall switch or timer.
- Do not let the power cord become damaged or frayed. Place it to avoid abrasions, cuts, fraying, crimping, and kinking. Do not place objects on top of it and do not allow it to be stepped on or run over. Be careful to keep the cord straight at each end.
• If you use an extension cord with the product, make sure the total ampere rating of the devices plugged into the extension cord does not exceed the cord's ampere rating. Also, make sure the total ampere rating of all devices plugged into the wall outlet does not exceed the wall outlet's ampere rating.

• If damage occurs to the plug, replace the cord set or consult a qualified electrician. If there are fuses in the plug, make sure you replace them with fuses of the correct size and rating.

• Always turn off the product using the power button, and wait until the power light stops flashing before unplugging the product or cutting off power to the electrical outlet.

• If you will not be using the product for a long period, unplug the power cord from the electrical outlet.

• Place the product on a flat, stable surface that extends beyond its base in all directions. It will not operate properly if it is tilted or at an angle.

• Avoid locations that are subject to rapid changes in heat or humidity, shocks or vibrations, or dust.

• Do not place or store the product outdoors.

• Do not place the product near excessive heat sources or in direct sunlight.

• Leave enough room around the product for sufficient ventilation. Do not block or cover openings in the cabinet or insert objects through the slots.

• Keep the product away from potential sources of electromagnetic interference, such as loudspeakers or the base units of cordless telephones.

• When connecting the product to a computer or other device with a cable, ensure the correct orientation of the connectors. Each connector has only one correct orientation. Inserting a connector in the wrong orientation may damage both devices connected by the cable.

• Do not put your hands inside the product or touch the ink cartridges while printing.

• Do not move the print head by hand; this may damage the product.

• Do not spill liquid on the product or use the product with wet hands.

• Do not use aerosol products that contain flammable gases inside or around the product. Doing so may cause fire.

• Except as specifically explained in your documentation, do not attempt to service the product yourself.

• Unplug the product and refer servicing to qualified service personnel under the following conditions: if the power cord or plug is damaged; if liquid has entered the product; if the product has been dropped or the cabinet damaged; if the product does not operate normally or exhibits a distinct change in performance. Adjust only those controls that are covered by the operating instructions.

• When storing or transporting the product, do not tilt it, stand it on its side, or turn it upside down; otherwise ink may leak.
Note: The lithium batteries in this product contain Perchlorate Material - special handling may apply. Click here for details.

Parent topic: Important Safety Instructions

Ink Cartridge Safety Instructions

• Keep ink cartridges out of the reach of children and do not drink the ink.

• Be careful when you handle used ink cartridges; there may be ink remaining around the ink supply port. If ink gets on your skin, wash it off with soap and water. If it gets in your eyes, flush them immediately with water.

• Do not put your hand inside the product or touch any cartridges during printing.

• Install a new ink cartridge immediately after removing an expended one. Leaving cartridges uninstalled can dry out the print head and may prevent the product from printing.

• Install ink cartridges in all the ink cartridge slots. You cannot print if any of the slots are empty.

• Dried ink on the supply port may cause ink leaks when the cartridge is reinserted and used. Wipe off any excess ink before reinserting.

• Do not insert or remove replacement cartridges during printing.

• Do not remove the transparent seal from the ink supply port. This may cause the cartridge to become unusable.

• The green IC chip on this ink cartridge retains a variety of cartridge-related information, such as the ink cartridge status, so that the cartridge may be removed and reinserted freely. Do not touch the green IC chip on the side of the cartridge. This may prevent normal operation and printing.

• If you remove an ink cartridge for later use, protect the ink supply area from dirt and dust and store it in the same environment as the product. Note that there is a valve in the ink supply port, making covers or plugs unnecessary, but care is needed to prevent the ink from staining items that the cartridge touches. Do not touch the ink cartridge ink supply port or surrounding area.

• To ensure print quality, use an ink cartridge before the date printed on its package.

• Do not dismantle or alter an ink cartridge. This could damage the print head and may prevent the product from printing.

• Do not drop cartridges or bump them against hard objects; otherwise, the ink may leak.

• Store ink cartridges at room temperature in a location that is not exposed to direct sunlight.

• After bringing an ink cartridge inside from a cold storage site, allow it to warm up at room temperature for at least four hours before using it.
FCC Compliance Statement

For United States Users
This equipment has been tested and found to comply with the limits for a Class A digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instruction manual, may cause harmful interference to radio communications. Operation of this equipment in a residential area is likely to cause harmful interference, in which case the user will be required to correct the interference at his own expense.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:
1. this device may not cause harmful interference, and
2. this device must accept any interference received, including interference that may cause undesired operation.

WARNING
The connection of a non-shielded equipment interface cable to this equipment will invalidate the FCC Certification of this device and may cause interference levels which exceed the limits established by the FCC for this equipment. It is the responsibility of the user to obtain and use a shielded equipment interface cable with this device. If this equipment has more than one interface connector, do not leave cables connected to unused interfaces. Changes or modifications not expressly approved by the manufacturer could void the user’s authority to operate the equipment.

For Canadian Users
This Class A digital apparatus complies with Canadian ICES-003.

Cet appareil numérique de la classe A est conforme à la norme NMB-003 du Canada.

WARNING
This is a Class A product. In a domestic environment this product may cause radio interference, in which case the user may be required to take adequate measures.

These Bonjour Programs are WITHOUT ANY WARRANTY; without even the implied warranty of MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE.

The Apple Public Source License Version 1.2 is as follows. You also can see the Apple Public Source License Version 1.2 at http://www.opensource.apple.com/apsl/.

APPLE PUBLIC SOURCE LICENSE

Version 2.0 - August 6, 2003

1. General; Definitions. This License applies to any program or other work which Apple Computer, Inc. ("Apple") makes publicly available and which contains a notice placed by Apple identifying such program or work as "Original Code" and stating that it is subject to the terms of this Apple Public Source License version 2.0 ("License"). As used in this License:

1.1 "Applicable Patent Rights" mean:(a) in the case where Apple is the grantor of rights, (i) claims of patents that are now or hereafter acquired, owned by or assigned to Apple and (ii) that cover subject matter contained in the Original Code, but only to the extent necessary to use, reproduce and/or distribute the Original Code without infringement; and (b) in the case where You are the grantor of rights, (i) claims of patents that are now or hereafter acquired, owned by or assigned to You and (ii) that cover subject matter in Your Modifications, taken alone or in combination with Original Code.

1.5 "Larger Work" means a work which combines Covered Code or portions thereof with code not governed by the terms of this License.

1.2 "Contributor" means any person or entity that creates or contributes to the creation of Modifications.

1.3 "Covered Code" means the Original Code, Modifications, the combination of Original Code and any Modifications, and/or any respective portions thereof.

1.4 "Externally Deploy" means:(a) to sublicense, distribute or otherwise make Covered Code available, directly or indirectly, to anyone other than You; and/or (b) to use Covered Code, alone or as part of a Larger Work, in any way to provide a service, including but not limited to delivery of content, through electronic communication with a client other than You.

1.5 "Larger Work" means a work which combines Covered Code or portions thereof with code not governed by the terms of this License.
1.6 "Modifications" mean any addition to, deletion from, and/or change to, the substance and/or structure of the Original Code, any previous Modifications, the combination of Original Code and any previous Modifications, and/or any respective portions thereof. When code is released as a series of files, a Modification is: (a) any addition to or deletion from the contents of a file containing Covered Code; and/or (b) any new file or other representation of computer program statements that contains any part of Covered Code.

1.7 "Original Code" means (a) the Source Code of a program or other work as originally made available by Apple under this License, including the Source Code of any updates or upgrades to such programs or works made available by Apple under this License, and that has been expressly identified by Apple as such in the header file(s) of such work; and (b) the object code compiled from such Source Code and originally made available by Apple under this License.

1.8 "Source Code" means the human readable form of a program or other work that is suitable for making modifications to it, including all modules it contains, plus any associated interface definition files, scripts used to control compilation and installation of an executable (object code).

1.9 "You" or "Your" means an individual or a legal entity exercising rights under this License. For legal entities, "You" or "Your" includes any entity which controls, is controlled by, or is under common control with, You, where "control" means (a) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (b) ownership of fifty percent (50%) or more of the outstanding shares or beneficial ownership of such entity.

2. Permitted Uses; Conditions & Restrictions. Subject to the terms and conditions of this License, Apple hereby grants You, effective on the date You accept this License and download the Original Code, a world-wide, royalty-free, non-exclusive license, to the extent of Apple's Applicable Patent Rights and copyrights covering the Original Code, to do the following:

2.1 Unmodified Code. You may use, reproduce, display, perform, internally distribute within Your organization, and Externally Deploy verbatim, unmodified copies of the Original Code, for commercial or non-commercial purposes, provided that in each instance:

(a) You must retain and reproduce in all copies of Original Code the copyright and other proprietary notices and disclaimers of Apple as they appear in the Original Code, and keep intact all notices in the Original Code that refer to this License; and

(b) You must include a copy of this License with every copy of Source Code of Covered Code and documentation You distribute or Externally Deploy, and You may not offer or impose any terms on such Source Code that alter or restrict this License or the recipients' rights hereunder, except as permitted under Section 6.

2.2 Modified Code. You may modify Covered Code and use, reproduce, display, perform, internally distribute within Your organization, and Externally Deploy Your Modifications and Covered Code, for commercial or non-commercial purposes, provided that in each instance You also meet all of these conditions:
(a) You must satisfy all the conditions of Section 2.1 with respect to the Source Code of the Covered Code;

(b) You must duplicate, to the extent it does not already exist, the notice in Exhibit A in each file of the Source Code of all Your Modifications, and cause the modified files to carry prominent notices stating that You changed the files and the date of any change; and

(c) If You Externally Deploy Your Modifications, You must make Source Code of all Your Externally Deployed Modifications either available to those to whom You have Externally Deployed Your Modifications, or publicly available. Source Code of Your Externally Deployed Modifications must be released under the terms set forth in this License, including the license grants set forth in Section 3 below, for as long as you Externally Deploy the Covered Code or twelve (12) months from the date of initial External Deployment, whichever is longer. You should preferably distribute the Source Code of Your Externally Deployed Modifications electronically (e.g. download from a web site).

2.3 Distribution of Executable Versions. In addition, if You Externally Deploy Covered Code (Original Code and/or Modifications) in object code, executable form only, You must include a prominent notice, in the code itself as well as in related documentation, stating that Source Code of the Covered Code is available under the terms of this License with information on how and where to obtain such Source Code.

2.4 Third Party Rights. You expressly acknowledge and agree that although Apple and each Contributor grants the licenses to their respective portions of the Covered Code set forth herein, no assurances are provided by Apple or any Contributor that the Covered Code does not infringe the patent or other intellectual property rights of any other entity. Apple and each Contributor disclaim any liability to You for claims brought by any other entity based on infringement of intellectual property rights or otherwise. As a condition to exercising the rights and licenses granted hereunder, You hereby assume sole responsibility to secure any other intellectual property rights needed, if any. For example, if a third party patent license is required to allow You to distribute the Covered Code, it is Your responsibility to acquire that license before distributing the Covered Code.

3. Your Grants. In consideration of, and as a condition to, the licenses granted to You under this License, You hereby grant to any person or entity receiving or distributing Covered Code under this License a non-exclusive, royalty-free, perpetual, irrevocable license, under Your Applicable Patent Rights and other intellectual property rights (other than patent) owned or controlled by You, to use, reproduce, display, perform, modify, sublicense, distribute and Externally Deploy Your Modifications of the same scope and extent as Apple's licenses under Sections 2.1 and 2.2 above.

4. Larger Works. You may create a Larger Work by combining Covered Code with other code not governed by the terms of this License and distribute the Larger Work as a single product. In each such instance, You must make sure the requirements of this License are fulfilled for the Covered Code or any portion thereof.
5. Limitations on Patent License. Except as expressly stated in Section 2, no other patent rights, express or implied, are granted by Apple herein. Modifications and/or Larger Works may require additional patent licenses from Apple which Apple may grant in its sole discretion.

6. Additional Terms. You may choose to offer, and to charge a fee for, warranty, support, indemnity or liability obligations and/or other rights consistent with the scope of the license granted herein ("Additional Terms") to one or more recipients of Covered Code. However, You may do so only on Your own behalf and as Your sole responsibility, and not on behalf of Apple or any Contributor. You must obtain the recipient's agreement that any such Additional Terms are offered by You alone, and You hereby agree to indemnify, defend and hold Apple and every Contributor harmless for any liability incurred by or claims asserted against Apple or such Contributor by reason of any such Additional Terms.

7. Versions of the License. Apple may publish revised and/or new versions of this License from time to time. Each version will be given a distinguishing version number. Once Original Code has been published under a particular version of this License, You may continue to use it under the terms of that version. You may also choose to use such Original Code under the terms of any subsequent version of this License published by Apple. No one other than Apple has the right to modify the terms applicable to Covered Code created under this License.

8. NO WARRANTY OR SUPPORT. The Covered Code may contain in whole or in part pre-release, untested, or not fully tested works. The Covered Code may contain errors that could cause failures or loss of data, and may be incomplete or contain inaccuracies. You expressly acknowledge and agree that use of the Covered Code, or any portion thereof, is at Your sole and entire risk. THE COVERED CODE IS PROVIDED "AS IS" AND WITHOUT WARRANTY, UPGRADES OR SUPPORT OF ANY KIND AND APPLE AND APPLE'S LICENSOR(S) (COLLECTIVELY REFERRED TO AS "APPLE" FOR THE PURPOSES OF SECTIONS 8 AND 9) AND ALL CONTRIBUTORS EXPRESSLY DISCLAIM ALL WARRANTIES AND/OR CONDITIONS, EXPRESS OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES AND/OR CONDITIONS OF MERCHANTABILITY, OF SATISFACTORY QUALITY, OF FITNESS FOR A PARTICULAR PURPOSE, OF ACCURACY, OF QUIET ENJOYMENT, AND NONINFRINGEMENT OF THIRD PARTY RIGHTS. APPLE AND EACH CONTRIBUTOR DOES NOT WARRANT AGAINST INTERFERENCE WITH YOUR ENJOYMENT OF THE COVERED CODE, THAT THE FUNCTIONS CONTAINED IN THE COVERED CODE WILL MEET YOUR REQUIREMENTS, THAT THE OPERATION OF THE COVERED CODE WILL BE UNINTERRUPTED OR ERROR-FREE, OR THAT DEFECTS IN THE COVERED CODE WILL BE CORRECTED. NO ORAL OR WRITTEN INFORMATION OR ADVICE GIVEN BY APPLE, AN APPLE AUTHORIZED REPRESENTATIVE OR ANY CONTRIBUTOR SHALL CREATE A WARRANTY. You acknowledge that the Covered Code is not intended for use in the operation of nuclear facilities, aircraft navigation, communication systems, or air traffic control machines in which case the failure of the Covered Code could lead to death, personal injury, or severe physical or environmental damage.

9. LIMITATION OF LIABILITY. TO THE EXTENT NOT PROHIBITED BY LAW, IN NO EVENT SHALL APPLE OR ANY CONTRIBUTOR BE LIABLE FOR ANY INCIDENTAL, SPECIAL, INDIRECT OR CONSEQUENTIAL DAMAGES ARISING OUT OF OR RELATING TO THIS LICENSE OR YOUR USE
OR INABILITY TO USE THE COVERED CODE, OR ANY PORTION THEREOF, WHETHER UNDER A
THEORY OF CONTRACT, WARRANTY, TORT (INCLUDING NEGLIGENCE), PRODUCTS LIABILITY
OR OTHERWISE, EVEN IF APPLE OR SUCH CONTRIBUTOR HAS BEEN ADVISED OF THE
POSSIBILITY OF SUCH DAMAGES AND NOTWITHSTANDING THE FAILURE OF ESSENTIAL
PURPOSE OF ANY REMEDY. SOME JURISDICTIONS DO NOT ALLOW THE LIMITATION OF
LIABILITY OF INCIDENTAL OR CONSEQUENTIAL DAMAGES, SO THIS LIMITATION MAY NOT
APPLY TO YOU. In no event shall Apple's total liability to You for all damages (other than as may be
required by applicable law) under this License exceed the amount of fifty dollars ($50.00).

10. Trademarks. This License does not grant any rights to use the trademarks or trade names "Apple",
"Apple Computer", "Mac", "Mac OS", "QuickTime", "QuickTime Streaming Server" or any other
trademarks, service marks, logos or trade names belonging to Apple (collectively "Apple Marks") or to
any trademark, service mark, logo or trade name belonging to any Contributor. You agree not to use any
Apple Marks in or as part of the name of products derived from the Original Code or to endorse or
promote products derived from the Original Code other than as expressly permitted by and in strict
compliance at all times with Apple's third party trademark usage guidelines which are posted at

11. Ownership. Subject to the licenses granted under this License, each Contributor retains all rights,
title and interest in and to any Modifications made by such Contributor. Apple retains all rights, title and
interest in and to the Original Code and any Modifications made by or on behalf of Apple ("Apple
Modifications"), and such Apple Modifications will not be automatically subject to this License. Apple
may, at its sole discretion, choose to license such Apple Modifications under this License, or on different
terms from those contained in this License or may choose not to license them at all.

12. Termination.
12.1 Termination. This License and the rights granted hereunder will terminate:
(a) automatically without notice from Apple if You fail to comply with any term(s) of this License and fail
to cure such breach within 30 days of becoming aware of such breach;
(b) immediately in the event of the circumstances described in Section 13.5(b); or
(c) automatically without notice from Apple if You, at any time during the term of this License, commence
an action for patent infringement against Apple; provided that Apple did not first commence an action for
patent infringement against You in that instance.

12.2 Effect of Termination. Upon termination, You agree to immediately stop any further use,
reproduction, modification, sublicensing and distribution of the Covered Code. All sublicenses to the
Covered Code which have been properly granted prior to termination shall survive any termination of this
License. Provisions which, by their nature, should remain in effect beyond the termination of this License
shall survive, including but not limited to Sections 3, 5, 8, 9, 10, 11, 12.2 and 13. No party will be liable to
any other for compensation, indemnity or damages of any sort solely as a result of terminating this
License in accordance with its terms, and termination of this License will be without prejudice to any other right or remedy of any party.

13.1 Government End Users. The Covered Code is a "commercial item" as defined in FAR 2.101. Government software and technical data rights in the Covered Code include only those rights customarily provided to the public as defined in this License. This customary commercial license in technical data and software is provided in accordance with FAR 12.211 (Technical Data) and 12.212 (Computer Software) and, for Department of Defense purchases, DFAR 252.227-7015 (Technical Data - Commercial Items) and 227.7202-3 (Rights in Commercial Computer Software or Computer Software Documentation). Accordingly, all U.S. Government End Users acquire Covered Code with only those rights set forth herein.

13.2 Relationship of Parties. This License will not be construed as creating an agency, partnership, joint venture or any other form of legal association between or among You, Apple or any Contributor, and You will not represent to the contrary, whether expressly, by implication, appearance or otherwise.

13.3 Independent Development. Nothing in this License will impair Apple's right to acquire, license, develop, have others develop for it, market and/or distribute technology or products that perform the same or similar functions as, or otherwise compete with, Modifications, Larger Works, technology or products that You may develop, produce, market or distribute.

13.4 Waiver; Construction. Failure by Apple or any Contributor to enforce any provision of this License will not be deemed a waiver of future enforcement of that or any other provision. Any law or regulation which provides that the language of a contract shall be construed against the drafter will not apply to this License.

13.5 Severability. (a) If for any reason a court of competent jurisdiction finds any provision of this License, or portion thereof, to be unenforceable, that provision of the License will be enforced to the maximum extent permissible so as to effect the economic benefits and intent of the parties, and the remainder of this License will continue in full force and effect. (b) Notwithstanding the foregoing, if applicable law prohibits or restricts You from fully and/or specifically complying with Sections 2 and/or 3 or prevents the enforceability of either of those Sections, this License will immediately terminate and You must immediately discontinue any use of the Covered Code and destroy all copies of it that are in your possession or control.

13.6 Dispute Resolution. Any litigation or other dispute resolution between You and Apple relating to this License shall take place in the Northern District of California, and You and Apple hereby consent to the personal jurisdiction of, and venue in, the state and federal courts within that District with respect to this License. The application of the United Nations Convention on Contracts for the International Sale of Goods is expressly excluded.
13.7 Entire Agreement; Governing Law. This License constitutes the entire agreement between the parties with respect to the subject matter hereof. This License shall be governed by the laws of the United States and the State of California, except that body of California law concerning conflicts of law.

Where You are located in the province of Quebec, Canada, the following clause applies: The parties hereby confirm that they have requested that this License and all related documents be drafted in English.

Les parties ont exigé que le présent contrat et tous les documents connexes soient rédigés en anglais.

EXHIBIT A.

"Portions Copyright © 1999-2003 Apple Computer, Inc. All Rights Reserved.

This file contains Original Code and/or Modifications of Original Code as defined in and that are subject to the Apple Public Source License Version 2.0 (the 'License'). You may not use this file except in compliance with the License. Please obtain a copy of the License at http://www.opensource.apple.com/apsl/ and read it before using this file.

The Original Code and all software distributed under the License are distributed on an 'AS IS' basis, WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESS OR IMPLIED, AND APPLE HEREBY DISCLAIMS ALL SUCH WARRANTIES, INCLUDING WITHOUT LIMITATION, ANY WARRANTIES OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE, QUIET ENJOYMENT OR NON-INFRINGEMENT. Please see the License for the specific language governing rights and limitations under the License."

**Info-ZIP copyright and license**

Copyright © 1990-2007 Info-ZIP. All rights reserved.

For the purposes of this copyright and license, "Info-ZIP" is defined as the following set of individuals:

Permission is granted to anyone to use this software for any purpose, including commercial applications, and to alter it and redistribute it freely, subject to the above disclaimer and the following restrictions:
1. Redistributions of source code (in whole or in part) must retain the above copyright notice, definition, disclaimer, and this list of conditions.

2. Redistributions in binary form (compiled executables and libraries) must reproduce the above copyright notice, definition, disclaimer, and this list of conditions in documentation and/or other materials provided with the distribution. The sole exception to this condition is redistribution of a standard UnZipSFX binary (including SFXWiz) as part of a self-extracting archive; that is permitted without inclusion of this license, as long as the normal SFX banner has not been removed from the binary or disabled.

3. Altered versions—including, but not limited to, ports to new operating systems, existing ports with new graphical interfaces, versions with modified or added functionality, and dynamic, shared, or static library versions not from Info-ZIP—must be plainly marked as such and must not be misrepresented as being the original source or, if binaries, compiled from the original source. Such altered versions also must not be misrepresented as being Info-ZIP releases—including, but not limited to, labeling of the altered versions with the names "Info-ZIP" (or any variation thereof, including, but not limited to, different capitalizations), "Pocket UnZip," "WiZ" or "MacZip" without the explicit permission of Info-ZIP. Such altered versions are further prohibited from misrepresentative use of the Zip-Bugs or Info-ZIP e-mail addresses or the Info-ZIP URL(s), such as to imply Info-ZIP will provide support for the altered versions.
