**Parent topic:** Control Panel Buttons and Lights

**Navigating the Control Panel**

You can use the buttons on the control panel to navigate menus and select settings on the LCD screen.

1. Press the home button.
   - You see a screen like this:

```
  [AP] Copy
  [Scan] Scan
  [Select] Select
```

2. Press the up or down arrow buttons to scroll through menu items.
3. Press the **OK** button to select a menu item.

4. Press the **Home** button to return to the Home screen, or press the **Back** button to return to the previous screen.

**Parent topic:** Using the Control Panel

### Entering Characters on the LCD Screen

Follow these guidelines to enter characters for passwords and other settings.

<table>
<thead>
<tr>
<th>My_home's WiFi</th>
</tr>
</thead>
<tbody>
<tr>
<td>Enter Password</td>
</tr>
<tr>
<td>Move cursor</td>
</tr>
</tbody>
</table>

- To enter uppercase or lowercase letters, numbers, or symbols, press the corresponding button on the numeric keypad to scroll through characters.
- To move to the next character, press the right arrow button.
- To delete a character, press the left arrow button.

**Parent topic:** Using the Control Panel

### Changing LCD Screen Language

You can change the language used on the LCD screen.

1. Press the up or down arrow button, select **Setup**, and press the **OK** button.
You see a screen like this:

![Setup Screen](image)

2. Press the down arrow button, select **Common Settings**, and press the **OK** button.
3. Press the down arrow button, select **Language**, and press the **OK** button.
4. Select a language and press the **OK** button.

**Parent topic:** Using the Control Panel

### Turning Off Control Panel Sounds

You can turn off the sound heard when you press buttons on the control panel.

1. Press the home button, if necessary.
2. Press the up or down arrow button, select **Setup**, and press the **OK** button.
3. Press the down arrow button, select **Common Settings**, and press the **OK** button.
4. Select **Sound** and press the **OK** button.
5. Select **Button Press** and press the **OK** button.
6. Press the down arrow button until the sound is turned off, then press the **OK** button.
7. Press the home button to exit.

**Parent topic:** Using the Control Panel

### Adjusting the Screen Contrast

You can adjust the contrast of the LCD screen.

1. Press the up or down arrow button, select **Setup**, and press the **OK** button.
You see a screen like this:

2. Press the down arrow button, select **Common Settings**, and press the **OK** button.
3. Select **LCD Contrast** and press the **OK** button.
4. Press the up or down arrow button to adjust the screen contrast.
5. Press the **OK** button to exit.

**Parent topic:** Using the Control Panel

### Product Parts Locations

See these sections to identify the parts on your product.

- **Product Parts - Top and Front**

Using Eco Mode and Other Power Saving Settings

Your product enters sleep mode automatically and turns off the LCD screen if it is not used for a period of time. You can make the time period shorter and select other options to save energy and resources.

Changing the Eco Settings
Changing the Sleep Timer Settings
Changing the Power Off Timer Settings

Parent topic: Product Basics

Changing the Eco Settings

You can use the product control panel to change the Eco settings.
Note: The Sleep Timer setting in Eco Mode overrides the Sleep Timer setting in Common Settings. This setting can be locked by an administrator. If you cannot access or change this setting, contact your administrator for assistance.

1. Press the up or down arrow button, select **Eco Mode**, and press the **OK** button.
   
   You see a screen like this:

   ![Eco Mode Screen]

2. Select **On** and press the **OK** button.
3. Press the up arrow button.
4. Change settings as necessary.
5. Press the **OK** button to exit.

You see the [eco] icon in the corner of the LCD screen to indicate that Eco settings are enabled.

**Parent topic:** [Using Eco Mode and Other Power Saving Settings](#)

### Changing the Sleep Timer Settings

You can adjust the time period before your product enters sleep mode and turns off the LCD screen.

Note: The Sleep Timer setting in Eco Mode overrides the Sleep Timer setting in Common Settings. This setting can be locked by an administrator. If you cannot access or change this setting, contact your administrator for assistance.

1. Press the up or down arrow buttons, select **Setup**, and press the **OK** button.
2. Press the down arrow button, select **Common Settings**, and press the **OK** button.
3. Press the down arrow button, select **Sleep Timer**, and press the **OK** button.
You see a screen like this:

<table>
<thead>
<tr>
<th>Common Settings</th>
</tr>
</thead>
<tbody>
<tr>
<td>Sleep Timer (1-240)</td>
</tr>
<tr>
<td>001 minutes</td>
</tr>
<tr>
<td>⬤ Move cursor</td>
</tr>
</tbody>
</table>

4. Use the numeric keypad to enter the number of minutes.
5. Press the left or right arrow buttons to move the cursor as necessary.
6. Press the OK button.

Parent topic: Using Eco Mode and Other Power Saving Settings

Changing the Power Off Timer Settings

You can have the product turn off automatically if it is not used for a specified period of time.

1. Press the down arrow button, select Setup, and press the OK button.

   You see a screen like this:

<table>
<thead>
<tr>
<th>Setup</th>
</tr>
</thead>
<tbody>
<tr>
<td>Ink Levels</td>
</tr>
<tr>
<td></td>
</tr>
<tr>
<td>OK Proceed</td>
</tr>
</tbody>
</table>

2. Press the down arrow button, select Common Settings, and press the OK button.
3. Press the down arrow button, select Power Off Timer, and press the OK button.
4. Select a time period between 30 minutes and 12h (12 hours), and press the OK button.

Using Epson Email Print

With Epson Email Print, you can print from any device that can send email, such as your smartphone, tablet, or laptop. Just activate your product's unique email address. When you want to print, attach a PDF, Microsoft Office document, or photo to an email and send it to your product. Both the email and the attachments will print automatically.

1. Connect your product to your network. See the link below.
2. If you did not already set up Email Print when you installed your product software, see the link below to use your product control panel to activate your unique email address. Or visit epsonconnect.com to learn more about Email Print, create your Epson Connect account, and register your product to the Epson Connect service.
3. Now you are ready to send and print emails to your product's Email Print address.

Note: Go to epsonconnect.com and log into your Epson connect account to personalize your product's email, adjust print settings, and set up other Epson Connect services.
Using the Epson iPrint Mobile App

Use this free Apple and Android app to print and scan with networked Epson products. Epson iPrint lets you print PDFs, Microsoft Office documents, photos, and web pages over a wireless network. You can scan and save a file on your device, send it as an email, or upload it to an online service such as Box, Dropbox, Evernote, or Google Drive.

1. Connect your product to your wireless network. See the link below.
2. Visit epson.com/connect to learn more about Epson iPrint and check the compatibility of your mobile device.
3. Download Epson iPrint from the Apple App Store or Google Play.
4. Connect your mobile device to the same wireless network as your product.
5. Open Epson iPrint and select your Epson product.

Now you are ready to print or scan with your mobile device and your Epson product.

Using Epson Remote Print

With Epson Remote Print software, you can print from your laptop or desktop computer to an Epson Email-enabled product anywhere in the world.

1. Connect your Epson product to your wireless network. See the link below.
2. If you did not already set up an Epson Connect account when you installed your product software, visit epsonconnect.com to create your account and register your product to the Epson Connect service.

   Note: Make a note of your product's email address.

3. Visit epsonconnect.com to learn more about Remote Print and how to download the Remote Print Driver software.
4. Download and install the Remote Print software.
5. Enter the email address and optional access key of your Epson product during Remote Print setup.

6. Now you are ready to print remotely. Select the print command in your laptop or desktop computer application and choose the Remote Print option for your Epson product.

Using Epson Scan to Cloud

The Epson Scan to Cloud service allows you to scan and send a file as an email or upload it to an online service directly from your Epson product. Register an email address or online services such as Box, DropBox, Evernote, or Google Drive with your Epson Connect account.

1. Connect your Epson product to your network. See the link below.

2. If you did not already set up an Epson Connect account when you installed your product software, visit epsonconnect.com to create your account and register your product to the Epson Connect service.

   Note: Make a note of your product's email address and password.

3. Visit epsonconnect.com to sign into your account with the email address and password you selected.

4. Select your product, select Scan to Cloud, and select Destination List.

5. Click Add, then follow the instructions on the screen to create your destination list.

6. Now you are ready to use Scan to Cloud. Select the setting for scanning to Scan to Cloud on your Epson product control panel.

Using AirPrint

AirPrint enables instant wireless printing from iPhone, iPad, and iPod touch with the latest version of iOS, and Mac with the latest version of OS X.

1. Load paper in your product.
2. Set up your product for wireless printing. See the link below.
3. Connect your Apple device to the same wireless network that your product is using.
4. Print from your device to your product.

Note: For details, see the AirPrint page on the Apple website.

Wi-Fi Networking

Using Google Cloud Print

With a Google Account, you can print from your Apple or Android device to your Epson product. You can also print from Chromebooks and the Google Chrome browser without drivers or cables.

1. Connect your Epson product to your wireless network. See the link below.
2. Note your product's IP address by checking your network status. See the link below.
3. Connect your computer or your Apple or Android device to the same wireless network as your Epson product.
4. Enter your product's IP address into the address bar of a web browser.
5. Select the Google Cloud Print Services option.

Note: If you don't see the Google Cloud Print Services option, turn your product off and back on. If the option still doesn't appear, select the Firmware Update option and follow the on-screen instructions to update your product.
6. Click **Register**.
7. Select the checkbox to agree to the Usage Advisory and click **Next**.
8. Click **OK** to launch the sign-in page.

   A separate browser window opens.

9. Enter your Google Account username and password and click **Sign in**, or, if you don't have an account, click **Sign up for a new Google Account** and follow the on-screen instructions.

10. Click **Finish printer registration** to complete setup and print a test page.

Your product is now linked to your Google Account and can be accessed from any Chromebook, computer, Apple or Android device with Internet access. Visit Epson Support for more information on using Google Cloud Print, or the Google Cloud Print website for a list of supported apps.

---

**Setting Up Google Cloud Print on a Chromebook**

With a Google Account, you can print from a Chromebook without drivers or cables.

1. Connect your Epson product to your wireless network. See the link below.
2. Turn on your Chromebook and connect it to the same wireless network as your product.

   **Note:** See your Chromebook's documentation for details on connecting to a network.

3. Do one of the following:
   - Click **Add to Cloud Print** in the notification that appears in the corner of your Chromebook screen.

     **Note:** If you do not see a notification, check to see if a number appears in the status area at the lower-right corner of the screen. Click this number to open the notifications menu, then click **Add to Cloud Print**.

   - Open a web browser and enter `chrome://devices` in the address bar. Skip to step 4.
   - If you see a registration confirmation screen instead, click **Register**.

4. Click **Add Device**.
5. Click the **Register** button that appears next to your product.

6. Click **Register** on the confirmation screen. Your product’s LCD screen displays a confirmation message.

7. Select **OK** or press the **OK** button on your product to confirm the Google Cloud Print connection and print a test page.

Your product is now linked to your Google Account and can be accessed from any Chromebook, iPhone, or Android phone with Internet access. Visit Epson Support for more information on using Google Cloud Print, or the Google Cloud Print website for a list of **supported apps**

### Using the Mopria Print Service

You can use the Mopria Print Service to print from your Android phone or tablet (Android v4.4 or later) to your Epson product or any Mopria-certified product from other manufacturers. You can download the Mopria Print Service from Google Play.

**Note:** For details on the Mopria Print Service, [click here](#).

1. Connect your Epson product to your wireless network. See the link below.
2. On your Android device, download the Mopria Print Service from Google Play.
3. Go to **Settings** on your Android device, select **Printing**, and enable the Mopria Print Service.
4. Connect your Android device to the same wireless network as your product.
5. Now you are ready to print. From an Android application such as Chrome or Gmail, tap the menu icon and select **Print**. Then select **All printers**, select your Epson product, adjust your print settings, and print.

**Parent topic:** Product Basics

**Related topics**

- Wi-Fi Networking
Android Printing Using the Epson Print Enabler

You can wirelessly print your documents, emails, photos, and web pages right from your Android phone or tablet (Android v4.4 or later). With a few taps, your Android device will discover your nearby Epson product and print.

1. Connect your Epson product to your wireless network. See the link below.
2. On your Android device, download the Epson Print Enabler plug-in from Google Play.
3. Go to settings on your Android device, select printers, and enable the Epson plug-in.
4. Connect your Android device to the same wireless network as your product.
5. Now you are ready to print. From an Android application such as Chrome or Gmail, tap the menu icon and print whatever is on the screen.

**Note:** If you do not see your product, tap All Printers and select your product.

Wi-Fi Networking

Using Fire OS Printing

You can wirelessly print from Amazon Fire tablets and phones to your nearby networked Epson product. There is no software to download, no drivers to install, and no cables to connect. With just a few taps in Email, Calendar, Contacts, and WPS Office, you can send whatever is on the screen to an Epson product.

1. Connect your Epson product to your wireless network. See the link below.
2. Connect your Amazon device to the same wireless network as your product.
3. Now you are ready to print. From your Amazon application, tap the print option and select your product to print whatever is on the screen.

**Note:** If you see a message telling you that a plug-in is required, tap OK and tap Download. If your Amazon Fire product uses Fire OS 5 and above, your device automatically uses the built-in Mopria Print Service app to print.

Visit epson.com/connect to learn more about Fire OS Printing (one of many Epson Connect Partner Solutions) and check the compatibility of your mobile device.

Parent topic: Product Basics
Using Windows 10 Mobile Printing

You can wirelessly print from Windows 10 Mobile tablets and phones to your nearby networked Epson product. There is no software to download, no drivers to install, and no cables to connect. Look for the print option in your Windows 10 application to send whatever is on the screen to an Epson product.

1. Connect your Epson product to your wireless network. See the link below.
2. Connect your Windows 10 Mobile device to the same wireless network as your product.
3. Now you are ready to print. From your Windows 10 application, tap the print option and select your product to print whatever is on the screen.

Visit epson.com/connect to learn more about Windows 10 Mobile Printing (one of many Epson Connect Partner Solutions) and check the compatibility of your mobile device.

Using Epson Print and Scan App with Windows Tablets

You can use this free app to print photos and scan from your Windows (Windows 8 or higher) Surface RT or Pro tablet with networked Epson products. Epson Print and Scan App allows you to scan and capture images right to your tablet or to Microsoft OneDrive.

Note: The Epson Print and Scan App does not support Windows 10 Mobile printing.

1. Connect your Epson product to your wireless network. See the link below.
2. Download Epson Print and Scan App from the Microsoft Windows Store.
3. Connect your Windows tablet to the same wireless network as your product.
4. Open Epson Print and Scan App and select your Epson product.
   Now you are ready to print photos or scan.

Visit epson.com/connect to learn more about Epson Print and Scan App.

Changing or Updating Network Connections

Wi-Fi Infrastructure Mode Setup

You can set up your product to communicate with your computer using a wireless router or access point. The wireless router or access point can be connected to your computer over a wireless or wired network.

1  Epson product
2  Wireless router or access point
Selecting Wireless Network Settings From the Control Panel

Selecting Wireless Network Settings From the Control Panel

You can select or change wireless network settings using your product control panel. To install your product on a wireless network, follow the instructions on the Start Here sheet and install the necessary software. The installer program guides you through network setup.

Note: Breakdown or repair of this product may cause loss of fax and network data and settings. Epson is not responsible for backing up or recovering data and settings during or after the warranty period. We recommend that you make your own backup or print out your fax and network data and settings.

1. Press the up or down arrow button, select Wi-Fi Setup, and press the OK button.

You see this screen:

![Wi-Fi Setup screen]

2. Select Wi-Fi Setup Wizard and press the OK button.
3. Select the name of your wireless network and press the OK button.

Note: To enter the wireless network name manually, select Other Networks and press the OK button. Use the product's numeric keypad to enter your network name.
4. Enter your wireless password using the numeric keypad.

   ![Password Entry Screen]

   **Note:** The network name and password are case sensitive. Be sure to correctly enter uppercase and lowercase letters, and numeric or special characters.

   - To enter uppercase or lowercase letters, numbers, or symbols, press the corresponding button on the numeric keypad to scroll through characters.
   - To move to the next character, press the right arrow button.
   - To delete the previous character, press the left arrow button.

5. Press the **OK** button when you finish entering your password.
6. Confirm the displayed network settings and press the **OK** button to save them.

   **Note:** If you need to change a setting, press the back button.

7. If you want to print a network setup report, press one of the **Start** buttons. (Otherwise, press the **OK** button.)

   If the network connection is successful, the Wi-Fi icon appears in the upper-right corner of the LCD screen.

**Parent topic:** Wi-Fi Infrastructure Mode Setup

Entering Characters on the LCD Screen
Wi-Fi Direct Mode Setup

You can set up your product to communicate directly with your computer or another device without requiring a wireless router or access point.

1 Epson product
2 Computer with a wireless interface
3 Other wireless device

You can select one of these modes to communicate with your computer or device:

**Access point mode**

The product itself acts as the network access point for up to 4 devices. When operating in this mode, your product displays an **AP** connection symbol on the LCD screen.

**Peer-to-peer mode**

The product communicates one-to-one with another Wi-Fi Direct capable device. When operating in this mode, your product displays a **Direct** or **D** connection symbol on the LCD screen.

To disconnect a peer-to-peer mode connection, release the connection to your product from your computer or other device.

To enable peer-to-peer mode, you must select it from the Web Config Utility, under **WiFi/Network Settings > Services > Wi-Fi Direct**.

Enabling Wi-Fi Direct Mode

Parent topic: Wi-Fi Networking
Enabling Wi-Fi Direct Mode

You can enable Wi-Fi Direct mode to allow direct communication between your product and a computer or other devices without a wireless router or access point.

1. Press the up or down arrow button, select Wi-Fi Setup, and press the OK button.
   You see this screen:

   ![Wi-Fi Setup Screen]

2. Press the down arrow button, select Wi-Fi Direct Setup, and press the OK button.
3. Press the down arrow button, select Connection Setup, and press the OK button.
4. Press the down arrow button, select Change Password, and press the OK button.
5. Press the up arrow button.

**Note:** If you have already connected devices or computers to your product via Wi-Fi Direct, they will be disconnected when you change the password.
6. Enter a Wi-Fi Direct password using the numeric keypad.

   **Note:** Your password must be at least 8 and no more than 22 characters long.

   - To enter uppercase or lowercase letters, numbers, or symbols, press the corresponding button on the numeric keypad repeatedly to scroll through characters.
   - To move to the next character, press the right arrow button.
   - To delete the previous character, press the left arrow button.

7. Press the **OK** button when you’re finished entering your password.

   You see this screen:

8. Press the **OK** button to view the SSID (Wi-Fi network name) and password.

9. Use your computer or wireless device to select the Wi-Fi network name (SSID) displayed on the LCD screen, and enter the password shown.

10. Press the **OK** button to return to the Home screen.
You see the [Wi-Fi] connection symbol on the LCD screen and should be able to print directly to your product from your computer or device.

**Note:** If the [Wi-Fi] connection symbol is not displayed on the LCD screen, Wi-Fi Direct mode is not enabled. Repeat these steps to try again.

Entering Characters on the LCD Screen

**Wi-Fi Protected Setup (WPS)**

If your network uses a WPS-enabled wireless router or access point, you can quickly connect your product to the network using Wi-Fi Protected Setup (WPS).

**Note:** To check if your router is WPS-enabled, look for a button labeled **WPS** on your router or access point. If there is no hardware button, there may be a virtual WPS button in the software for the device. Check your network product documentation for details.

Using WPS to Connect to a Network

Parent topic: Wi-Fi Networking

**Using WPS to Connect to a Network**

If you have a WPS-enabled wireless router or access point, you can use Wi-Fi Protected Setup (WPS) to connect your product to the network.

1. Press the up or down arrow button, select **Wi-Fi Setup**, and press the **OK** button.

You see this screen:
2. Press the down arrow button, select **Push Button Setup (WPS)**, and press the **OK** button.
3. Follow the instructions on the LCD screen to complete WPS setup.
4. Press the back button to return to the Home screen.

If the network connection is successful, the Wi-Fi icon appears in the upper-right corner of the LCD screen.

**Parent topic:** [Wi-Fi Protected Setup (WPS)]

### Printing a Network Status Sheet

You can print a network status sheet to help you determine the causes of any problems you may have using your product on a network.

1. Press the up or down arrow button, select **Setup**, and press the **OK** button.

   You see this screen:

   ![Setup Menu](image1)

2. Press the down arrow button, select **Network Settings**, and press the **OK** button.
3. Press the down arrow button, select **Network Status**, and press the **OK** button.

   You see a screen like this:

   ![Network Status Menu](image2)
4. Press the down arrow button, select **Print Status Sheet**, and press the **OK** button.
5. Press one of the ◇ **Start** buttons to print the network status sheet.

Examine the settings shown on the network status sheet to diagnose any problems you have.

**Parent topic:** Wi-Fi Networking

## Changing or Updating Network Connections

See these sections to change or update how your product connects to a network.

- **Accessing the Web Config Utility**
- **Changing a USB Connection to a Wi-Fi Connection**
- **Connecting to a New Wi-Fi Router**
- **Disabling Wi-Fi Features**

**Parent topic:** Wi-Fi Networking

## Accessing the Web Config Utility

You can select your product’s network settings and confirm its operating status using a web browser. You do this by accessing your product’s built-in Web Config utility from a computer or other device that is connected to the same network as your product.

1. Print a network status sheet.
2. Locate the IP address for your product that is listed on the network status sheet.
3. On a computer or other device connected to the same network as your product, open a web browser.
4. Enter your product’s IP address into the address bar.

You see the available Web Config utility options.

**Parent topic:** Changing or Updating Network Connections

## Related tasks

- **Printing a Network Status Sheet**

## Changing a USB Connection to a Wi-Fi Connection

If you have already connected your product to your computer using a USB connection, you can change to a Wi-Fi connection.

1. Disconnect the USB cable from your product.
2. Uninstall your product software.
3. Download and install your product software from the Epson website using the instructions on the Start Here sheet.

Parent topic: Changing or Updating Network Connections

Connecting to a New Wi-Fi Router

If you change the wireless router you have been using on your network, you need to update your product's Wi-Fi connection to the new router.

Note: If you switch to a 5 GHz wireless router, set the router to operate in dual band (2.4 GHz and 5 GHz) mode. See your router documentation for instructions.

1. Do one of the following:
   • Windows: Uninstall your product software.
   • OS X: Go to the next step.
2. Download and install your product software from the Epson website using the instructions on the Start Here sheet.

Parent topic: Changing or Updating Network Connections

Related tasks
Uninstalling Product Software - Windows

Disabling Wi-Fi Features

You may need to disable your product's Wi-Fi features if you change your network connection type or need to solve a problem with your network connection.

Note: Before disabling Wi-Fi features, make a note of your product's SSID (network name) and password, and any network settings selected for the Epson Connect services you may use.

1. Press the up or down arrow button, select Wi-Fi Setup, and press the OK button.
You see this screen:

<table>
<thead>
<tr>
<th>Wi-Fi Setup</th>
</tr>
</thead>
<tbody>
<tr>
<td>Wi-Fi Setup Wizard</td>
</tr>
<tr>
<td>OK</td>
</tr>
<tr>
<td>Proceed</td>
</tr>
</tbody>
</table>

2. Press the down arrow button, select **Disable Wi-Fi**, and press the **OK** button.
3. Press the up arrow button to disable Wi-Fi.

**Parent topic:** Changing or Updating Network Connections
Loading Paper

Before you print, load paper for the type of printing you will do.

Loading Paper for Documents in the Cassette
Loading Paper for Photos in the Cassette
Loading Envelopes in the Cassette
Paper Loading Capacity
Available Epson Papers
Borderless Paper Type Compatibility
Paper or Media Type Settings - Printer Software
Selecting the Paper Settings - Control Panel
Selecting Universal Print Settings

Loading Paper for Documents in the Cassette

You can print documents on a variety of paper types and sizes.

1. Close the paper stopper and output tray, if necessary.
2. Pull out the paper cassette.

3. Slide the edge guides outward.
Note: If you are using legal-size paper or larger, press the button and extend the paper cassette.

4. Slide the edge guide to your paper size.
5. Load a stack of paper, printable side down, against the edge guide as shown.

![Image of paper being loaded](image)

**Note:** Make sure the paper is loaded against the edge guide and not sticking out from the end of the cassette.

6. Slide the edge guides against the paper, but not too tightly.

![Image of edge guides](image)

**Caution:** To prevent paper feeding problems, make sure the paper fits beneath the top edges of the guides and do not load too much paper in the cassette.
7. Gently insert the paper cassette.

Note: The paper may slide forward slightly as you insert the cassette. This is normal.

8. When prompted by the product's LCD screen, select the size and type of the paper you just loaded and press the OK button.
9. Extend the output tray and open the paper stopper.

**Note:** If you are using legal-size or longer paper, do not open the paper stopper. Do not remove or insert the paper cassette during printing.

Always follow these paper loading guidelines:
- Load only the recommended number of sheets.
- Load paper short edge first, no matter which way your document faces.
- Load the printable side facedown.
- Load letterhead or pre-printed paper top edge first.
- Do not load paper above the arrow mark inside the edge guide.
- Check the paper package for any additional loading instructions.

Loading Paper for Photos in the Cassette

You can print photos on a variety of paper types and sizes. You can load photo paper in these sizes: 4 × 6 inches (102 × 152 mm), 5 × 7 inches (127 × 178 mm), 8 × 10 inches (203 × 254 mm), A4 (8.3 × 11.7 inches [210 × 297 mm]), or Letter (8.5 × 11 inches [216 × 279 mm]).

1. Close the paper stopper and output tray, if necessary.
2. Pull out the paper cassette.

3. Slide the edge guides outward.
4. Slide the edge guide to your paper size.

5. Load photo paper, short edge first and printable side down, against the edge guide as shown.

**Note:** Make sure the paper is loaded against the edge guide and not sticking out from the end of the cassette.
6. Slide the edge guides against the paper, but not too tightly.

![Slide edge guides](image)

**Caution:** To prevent paper feeding problems, make sure the paper fits beneath the top edges of the guides and do not load too much paper in the cassette.

7. Gently insert the paper cassette.

![Insert paper cassette](image)

**Note:** The paper may slide forward slightly as you insert the cassette. This is normal.

8. When prompted by the product's LCD screen, select the size and type of the paper you just loaded and press the **OK** button.
9. Extend the output tray and open the paper stopper.

**Note:** If you are using legal-size or longer paper, do not open the paper stopper. Do not remove or insert the paper cassette during printing.

Always follow these paper loading guidelines:

- Load only the recommended number of sheets.
- Load paper short edge first, no matter which way your photo faces.
- Load the printable side facedown.
- Do not load paper above the arrow mark inside the edge guide.
- Check the paper package for any additional loading instructions.

- Loading Envelopes in the Cassette
Loading Envelopes in the Cassette

You can print on plain paper envelopes in this size: No. 10 (4.1 × 9.5 inches [105 × 241 mm]).

1. Close the paper stopper and output tray, if necessary.

2. Pull out the paper cassette.
3. Slide the edge guides outward.

4. Load envelopes printable side down and flap edge right as shown.

**Caution:** To prevent paper feeding problems, make sure you do not load too many envelopes in the cassette.

5. Slide the edge guides against the envelopes, but not too tightly.
Note: Make sure the envelopes are loaded against the edge guide and not sticking out from the end of the cassette.

6. Gently insert the paper cassette.

Note: The envelopes may slide forward slightly as you insert the cassette. This is normal.

7. When prompted by the product's LCD screen, select **Envelope #10** for the Paper Size and **Envelope** for the Paper Type, and press the **OK** button.
8. Extend the output tray and open the paper stopper.

Always follow these envelope loading guidelines:

- If you have trouble loading a stack of envelopes, press each envelope flat before loading it or load one envelope at a time.
- If print quality declines when printing multiple envelopes, try loading one envelope at a time.
- Do not load envelopes that are curled, folded, or too thin.

Placing Originals on the Product

Follow the instructions here to place your original documents or photos on the product.

**Caution:** Do not place anything on top of your product or use its cover as a writing surface to avoid damaging it.

Placing Originals on the Scanner Glass
Placing Originals in the Automatic Document Feeder

**Placing Originals on the Scanner Glass**

You can place originals up to this size on the scanner glass: Letter (8.5 × 11 inches [216 × 279 mm]) or A4 (8.3 × 11.7 inches [210 × 297 mm]).

1. Open the document cover.
2. Place your original facedown on the scanner glass with the top facing into the corner. Slide the original to the edges of the indicated corner.

![Scanner Glass Illustration]
Note: You can place multiple originals on the scanner glass. Just make sure they are at least 0.8 inch (20 mm) away from each other.

3. Close the document cover gently to keep your original in place.

Placing Originals in the Automatic Document Feeder
You can place multi-page original documents in the Automatic Document Feeder (ADF). Make sure the originals meet the Automatic Document Feeder specifications before loading them.

Caution: Make sure your originals are not creased or folded, and do not contain holes, staples, tape, or other materials that could obstruct the feeder.

1. Slide the ADF edge guide outward.
2. Fan your stack of originals and tap them gently on a flat surface to even the edges.

![Image of fanning and tapping originals]

3. Insert the originals into the ADF faceup and top-edge first.

![Image of inserting originals into ADF]

The ADF icon on the LCD screen appears.
4. Slide the ADF edge guide against the originals, but not too tightly.

Printing from a Computer

Before printing from your computer, make sure you have set up your product and installed its software as described on the Start Here sheet.

**Note:** If you have an Internet connection, it is a good idea to check for updates to your product software on Epson's support website. If you see a Software Update screen, select **Enable automatic checking** and click **OK**. The update scans your system to see if you have the latest product software. Follow the on-screen instructions.

Printing with Windows
Printing with OS X
Cancelling Printing Using a Product Button

Printing with Windows

You can print with your product using any Windows application, as described in these sections.

Selecting Basic Print Settings - Windows
Selecting Double-sided Printing Settings - Windows
Selecting Additional Layout and Print Options - Windows
Selecting a Printing Preset - Windows
Selecting Extended Settings - Windows
Printing Your Document or Photo - Windows
Selecting Default Print Settings - Windows
Changing Automatic Update Options

**Parent topic:** Printing from a Computer

Selecting Basic Print Settings - Windows

Select the basic settings for the document or photo you want to print.

1. Open a photo or document for printing.
2. Select the print command in your application.

**Note:** You may need to select a print icon on your screen, the Print option in the File menu, or another command. See your application's help utility for details.
3. If necessary, select your product name as the printer you want to use.

**Note:** You may also need to select Properties or Preferences to view your print settings.

You see the Main tab of your printer settings window:

4. Select the size of the paper you loaded as the **Document Size** setting.

**Note:** You can also select the **User-Defined** setting to create a custom paper size, but you cannot use the **Borderless** setting and the **Quality** setting will be set to **Standard**.

5. If you are printing a borderless photo, select **Borderless**. You can click **Settings** to access additional options for borderless printing.

**Note:** You must select a compatible borderless paper type and size to print without borders. Check the borderless paper compatibility list for details.
6. Select the orientation of your document.

   **Note:** If you are printing an envelope, select **Landscape**.

7. Select the type of paper you loaded as the **Paper Type** setting.

   **Note:** The setting may not exactly match the name of your paper. Check the paper type settings list for details.

8. Select the **Quality** setting that matches the print quality you want to use.

9. Select a Color option:
   - To print a color document or photo, select the **Color** setting.
   - To print text and graphics in black or shades of gray, select the **Black/Grayscale** setting.

10. To print on both sides of the paper, select the **2-Sided Printing** setting and select the options you want.

11. To print multiple pages on one sheet of paper, or print one image on multiple sheets of paper, select one of the settings in the **Multi-Page** menu and select the printing options you want.

12. To print multiple copies and arrange their print order, select the **Copies** options.

13. To preview your job before printing, select **Print Preview**.

14. To save your print job as a project that can be modified and combined with other print jobs, select **Job Arranger Lite**.

15. To reduce noise during printing when you select **Plain Paper/Bright White Paper**, select **On** in the **Quiet Mode** menu.

**Print Quality Options - Windows**
**Multi-Page Printing Options - Windows**

Printing Your Document or Photo - Windows
Selecting Double-sided Printing Settings - Windows
Print Quality Options - Windows

You can select any of the available Quality options to fine-tune the quality of your print. Some settings may be unavailable, depending on the paper type and border setting you have chosen.

Draft
For draft printing on plain paper.

Standard
For everyday text and image printing.

Standard - Vivid
For text and graphics with good quality and print speed.

High
For photos and graphics with high print quality.

More Settings
Opens a window that lets you choose among levels of speed and quality.

Parent topic: Selecting Basic Print Settings - Windows

Multi-Page Printing Options - Windows

You can select any of the available options in the Multi-Page menu to set up your multi-page print job.

2-Up and 4-Up
Prints 2 or 4 pages on one sheet of paper. Click the Page Order button to select page layout and border options.

2×1 Poster, 2×2 Poster, 3×3 Poster, 4×4 Poster
Prints one image on multiple sheets of paper to create a larger poster. Click the Settings button to select image layout and guideline options.

Parent topic: Selecting Basic Print Settings - Windows

Selecting Double-sided Printing Settings - Windows

You can print on both sides of the paper by selecting one of the 2-Sided Printing options on the Main tab.
Note: Some options may be pre-selected or unavailable, depending on other settings you have chosen or if you are accessing the product over a network.

1. Select one of the following options for 2-Sided Printing:
   • **Auto (Long-edge binding)** to print your double-sided print job by automatically flipping the paper on the long edge.
   • **Auto (Short-edge binding)** to print your double-sided print job by automatically flipping the paper on the short edge.
   • **Manual (Long-edge binding)** to print your double-sided print job by printing one side and prompting you to flip the paper over on the long edge to print the other side (recommended for paper types that do not support automatic duplexing).
   • **Manual (Short-edge binding)** to print your double-sided print job by printing one side and prompting you to flip the paper over on the short edge to print the other side (recommended for paper types that do not support automatic duplexing).

2. Click the Settings button.
You see this window:

3. Select the double-sided printing options you want to use.
4. Click **OK** to return to the Main tab.
5. Click the **Print Density** button.
   You see this window:

![Print Density Adjustment window](image)

6. Select the type of document you are printing as the Document Type setting. The software automatically sets the **Adjustments** options for that document type.

7. If necessary, select the **Adjustments** options you want to use.

8. Click **OK** to return to the Main tab.

9. Print a test copy of your double-sided document to test the selected settings.

10. Follow any instructions displayed on the screen during printing.

**Double-sided Printing Options - Windows**
**Print Density Adjustments - Windows**

**Parent topic:** Printing with Windows

**Related tasks**
- Selecting Basic Print Settings - Windows

**Double-sided Printing Options - Windows**

You can select any of the available options on the 2-Sided Printing Settings window to set up your double-sided print job.
Binding Edge Options
Select a setting that orients double-sided print binding in the desired direction.

Binding Margin Options
Select options that define a wider margin to allow for binding.

Start Page
Selects whether printing starts on the front or back page.

Create Folded Booklet Options
Select the Booklet checkbox and a binding option to print double-sided pages as a booklet.

Parent topic: Selecting Double-sided Printing Settings - Windows

Print Density Adjustments - Windows
You can select any of the available options on the Print Density Adjustment window to adjust the print quality of your double-sided print job.

Print Density
Sets the level of ink coverage for double-sided printing.

Increase Ink Drying Time
Sets the amount of time required for drying ink after printing on one side of the paper before printing the other side in double-sided printing to prevent ink smearing.

Parent topic: Selecting Double-sided Printing Settings - Windows
Selecting Additional Layout and Print Options - Windows

You can select a variety of additional layout and printing options for your document or photo on the More Options tab.

1. To change the size of your printed document or photo, select the Reduce/Enlarge Document checkbox and select one of these sizing options:
   - Select the Fit to Page option to size your image to fit the paper you loaded. Select the size of your document or photo as the Document Size setting, and the size of your paper as the Output Paper setting. If you want to center your image on the paper, select the Center option.
   - Select the Zoom to option to reduce or enlarge your document or photo by a specific percentage. Select the percentage in the % menu.

2. Select one of the following Color Correction options:
   - Select Automatic to automatically adjust the sharpness, brightness, contrast, and color saturation for your image.
• Select **Custom** and click the **Advanced** button to manually adjust the color correction settings or turn off color management in your printer software.

• Select **Image Options** to access additional settings for improving printed images.

  **Note:** You can also select **Color Universal Print** settings.

3. To add the following features, click the **Watermark Features** button:

  • **Anti-Copy Pattern:** adds a watermark that only appears when your printout is copied
  • **Watermark:** adds a visible watermark to your printout

    **Note:** Click the **Add/Delete** button to create your own watermark, and click the **Settings** button to customize the watermark.

  • **Header/Footer:** adds information such as the date and time to the top or bottom of your printout

    **Note:** Click the **Settings** button to customize the text and location of the header or footer.

4. Select any of the Additional Settings options to customize your print.

**Custom Color Correction Options - Windows**
**Image Options and Additional Settings - Windows**
**Header/Footer Settings - Windows**

**Parent topic:** Printing with Windows

**Related tasks**

**Printing Your Document or Photo - Windows**
Custom Color Correction Options - Windows

You can select any of the available options in the Color Correction window to customize the image colors for your print job.

![Color Correction Window](image)

Color Controls

Lets you select a Color Mode setting, individual settings for Brightness, Contrast, Saturation, and Density, and individual color tones. Depending on the selected color mode, you can also adjust the midtone density using the Gamma setting.

Fix Photo

Improves the color, contrast, and sharpness of flawed photos.

**Note:** Fix Photo uses a sophisticated face recognition technology to optimize photos that include faces. For this to work, both eyes and the nose must be visible in the subject's face. If your photo includes a face with an intentional color cast, such as a statue, you may want to turn off Fix Photo to retain the special color effects.
ICM
Lets you manage color using installed color printing profiles.

No Color Adjustment
Turns off color management in your printer software so you can manage color using only your application software.

Parent topic: Selecting Additional Layout and Print Options - Windows

Image Options and Additional Settings - Windows
You can select any of the Image Options and Additional Settings to customize your print. Some options may be pre-selected or unavailable, depending on other settings you have chosen.

Image Options

Emphasize Text
Adjusts the weight of printed text to increase readability.

Emphasize Thin Lines
Adjusts the weight of printed lines to increase visibility.

Edge Smoothing
Smooths jagged edges in low-resolution images such as screen captures or images from the Web.

Fix Red-Eye
Reduces or removes red-eye in photos.

Print Text in Black
Prints colored text in black.

For Color Text
Prints colored text on a background pattern or underlined.

For Color Graphs and Images
Prints colored graphics and images with overlay patterns.

For Color Text, Graphs, and Images
Prints colored text, graphics, and images with overlay patterns.

Enhancement Options
Specifies Color Universal Print enhancement settings for text, graphics, and images.

Additional Settings Options

Rotate 180°
Prints the image rotated 180° from its original orientation.
High Speed
   Speeds up printing but may reduce print quality.

Mirror Image
   Flips the printed image left to right.

Parent topic: Selecting Additional Layout and Print Options - Windows

Header/Footer Settings - Windows

You can select any of the Header/Footer Settings options to add headers or footers when you print. The items are available to print at the top or bottom of your pages, in either the left, right, or center of the page.

Note: These settings are not saved with your document.

You can select to print the following information:

• User Name
• Computer Name
• Date
• Date/Time
• Collate Number (copy number)

Note: The user name, computer name, date, and time come from the Windows Control Panel on your computer.

Parent topic: Selecting Additional Layout and Print Options - Windows
Selecting a Printing Preset - Windows

For quick access to common groups of print settings, you can select a printing preset on the Main or More Options tab.

**Note:** You can create your own preset by clicking the *Add/Remove Presets* button.

1. Click the **Main** or **More Options** tab.
   
   You see the available **Printing Presets** on the left:
2. Place your cursor over one of the **Printing Presets** to view its list of settings.
3. Click on a preset to change its settings, or use any of the available options on the screen to control your printing presets.
4. To choose a preset for printing, select it.
5. Click **OK**.

**Parent topic:** Printing with Windows

### Selecting Extended Settings - Windows

You can select additional settings that apply to all the print jobs you send to your product.

1. Access the Windows Desktop and right-click the product icon in the Windows taskbar.
2. Select **Printer Settings**.
3. Click the **Maintenance** tab.

You see the maintenance options:

![Printing Preferences window](image)
4. Click the **Extended Settings** button. 
   You see this window:

![Extended Settings window]

5. Select any of the extended settings to customize your print.
6. Click **OK** to close the Extended Settings window.
7. Click **OK** to close the printer software window.

Extended Settings - Windows

Parent topic: Printing with Windows

Extended Settings - Windows

You can select from these settings on the Extended Settings window.

**Enable EPSON Status Monitor 3**
   Enables product monitoring for ink and paper supplies and other issues.

**Check Paper Width Before Printing**
   Prevents printing beyond the edges of the paper if the paper size setting is incorrect; may reduce print speed.

**Separator Page**
   Before each document, prints a separator page containing the title, user, date, and time.

**Remove white borders**
   Removes white margins that may appear when you print borderless photos.
Always Spool RAW Datatype
Increases print speed and may solve other printing problems.

Page Rendering Mode
Increases print speed when printing is extremely slow or the print head stops during printing.

Print as Bitmap
Increases print speed when printing is extremely slow or the print head stops during printing, and other settings do not help.

Skip Blank Page
Ensures that your product does not print pages that contain no text or images.

Change Standard Resolution
Reduces the resolution of print data to correct printing problems.

Refine screening pattern
Prints graphics with a finer screening pattern.

Allow Applications to Perform ICM Color Matching
Allows applications to perform ICM color matching.

Always Use the Driver's Paper Source Setting
Prints using the paper source setting in the printer driver, rather than the setting in your application.

Output 1 page documents facedown in 2-Sided mode
Outputs single-sided pages in a 2-sided print job facedown instead of faceup.

Parent topic: Selecting Extended Settings - Windows

Printing Your Document or Photo - Windows

Once you have selected your print settings, you are ready to save your settings and print.

1. Click **OK** to save your settings.
You see your application's Print window, such as this one:

2. Click **OK** or **Print** to start printing.

*Checking Print Status - Windows*

*Parent topic: Printing with Windows*
Checking Print Status - Windows
During printing, you see this window showing the progress of your print job. It allows you to control printing and check ink cartridge status.

- To see print jobs waiting to print or to cancel printing, click **Print Queue**.
- To close the status window, click **OK**.
- To check ink status, click **Show Ink Levels**.

**Parent topic:** Printing Your Document or Photo - Windows

## Selecting Default Print Settings - Windows
When you change your print settings in a program, the changes apply only while you are printing in that program session. If you want to change the print settings you use in all your Windows programs, you can select new default print settings.

1. Access the Windows Desktop and right-click the product icon in the Windows taskbar.
2. Select **Printer Settings**.
You see the printer settings window:

![Printer Settings Window]

3. Select the print settings you want to use as defaults in all your Windows programs.
4. Click OK.
These settings are now the defaults selected for printing. You can still change them as needed for printing in any program session.

Changing the Language of the Printer Software Screens

Parent topic: Printing with Windows

Changing the Language of the Printer Software Screens

You can change the language used on the Windows printer software screens.

1. Access the Windows Desktop and right-click the product icon in the Windows taskbar.
2. Select Printer Settings.
   You see the printer settings window.
3. Click the **Maintenance** tab.
   You see the maintenance options:

   ![Maintenance tab](image)

4. Select the language you want to use as the **Language** setting.
5. Click **OK** to close the printer software window.

   The printer software screens appear in the language you selected the next time you access them.

**Parent topic:** [Selecting Default Print Settings - Windows](#)

### Changing Automatic Update Options

Your printer software for Windows automatically checks for updates to the product software. You can change how often the software checks for updates or disable this feature.

1. Access the Windows Desktop and right-click the product icon in the Windows taskbar.
2. Select **Software Update Settings**.
You see this window:

![Software Update Settings](image)

3. Do one of the following:
   - To change how often the software checks for updates, select a setting in the **Check every** menu.
   - To disable the automatic update feature, select the **Never** option.

4. Click **OK** to exit.

**Note:** If you choose to disable the automatic update feature, you can check for updates manually.

**Parent topic:** Printing with Windows

**Related tasks**

Checking for Software Updates

**Printing with OS X**

You can print with your product using any OS X printing program, as described in these sections.

**Note:** If you have an Internet connection, it is a good idea to check for updates to your product software on Epson’s support website.

[Selecting Basic Print Settings - OS X](#)
[Selecting Page Setup Settings - OS X](#)
[Selecting Print Layout Options - OS X](#)
Selecting Basic Print Settings - OS X

Select the basic settings for the document or photo you want to print.

1. Open a photo or document for printing.
2. Select the print command in your application.

   **Note:** You may need to select a print icon on your screen, the **Print** option in the File menu, or another command. See your application's help utility for details.

3. Select your product as the **Printer** setting.

4. If necessary, click the arrow next to the Printer setting or the **Show Details** button to expand the print window.
You see the expanded printer settings window for your product:

![Printer Settings Window]

**Note:** The print window may look different, depending on the version of OS X and the application you are using.

5. Select the **Copies** and **Pages** settings as necessary.

**Note:** If you do not see these settings in the print window, check for them in your application before printing.
6. Select the page setup options: **Paper Size** and **Orientation**.

   **Note:** If you do not see these settings in the print window, check for them in your application before printing. They may be accessible by selecting **Page Setup** from the File menu.

7. Select any application-specific settings that appear on the screen, such as those shown in the image above for the Preview application.

8. Select **Print Settings** from the pop-up menu.
You see these settings:

9. Select the type of paper you loaded as the **Media Type** setting.

   **Note:** The setting may not exactly match the name of your paper. Check the paper type settings list for details.

10. Select the **Print Quality** setting you want to use.
11. Select any of the available print options.

You can select from these settings on the **Color Matching** and **Color Options** menus.

**Color Matching Settings**

**EPSON Color Controls**

Lets you manage color using controls in your printer software or turn off color management.

**ColorSync**

Prints using standard color profiles for your product and paper to help match image colors. You can customize the conversion method and filter settings on the ColorSync pop-up menu in the print window.
Color Options Settings

Manual Settings

Lets you select manual color adjustments. Click the arrow next to Advanced Settings and select settings for Brightness, Contrast, Saturation, and individual color tones. You can also select a color Mode setting for printing photos and graphics and the Fix Red-Eye setting to reduce or remove red-eye in photos. Depending on the selected color mode, you can also adjust the midtone density using the Gamma setting.

Fix Photo

Improves the color, contrast, and sharpness of flawed photos. Click the arrow next to Advanced Settings and select the Fix Red-Eye setting to reduce or remove red-eye in photos.

Note: Fix Photo uses a sophisticated face recognition technology to optimize photos that include faces. For this to work, both eyes and the nose must be visible in the subject’s face. If your photo includes a face with an intentional color cast, such as a statue, you may want to turn off Fix Photo to retain the special color effects.

Off (No Color Adjustment)

Turns off color management in your printer software so you can manage color using only your application software.

Note: An ICC profile is required if color management is turned off.

Parent topic: Managing Color - OS X

Selecting Printing Preferences - OS X

You can select printing preferences that apply to all the print jobs you send to your product.

1. In the Apple menu or the Dock, select System Preferences.
2. Select Print & Fax, Print & Scan, or Printers & Scanners, select your product, and select Options & Supplies.
3. Select Driver or Options.
You see a screen like this:

![Image of printer settings]

4. Select any of the available printing preferences.
5. Click OK.

**Printing Preferences - OS X**

**Parent topic:** Printing with OS X

**Printing Preferences - OS X**

You can select from these settings on the **Options** or **Driver** tab.

**Skip Blank Page**
Ensures that your product does not print pages that contain no text or images.

**Quiet Mode**
Lessens noise during printing but may decrease print speed.

**Permit temporary black printing**
Allows you to print using black ink when color ink is expended.

**High Speed Printing**
Speeds up printing but may reduce print quality.
Remove white borders
Removes white margins that may appear when you print borderless photos.

Warning Notifications
Lets you choose whether or not to receive warning notifications from the printer software for various operating conditions.

Establish bidirectional communication
Allows the product to communicate with the computer. Do not change the default setting unless you experience issues when using a shared printing pool.

Placing Originals on the Product

Starting a Scan Using the Product Control Panel

You can scan an image using your product's control panel buttons.

Your product automatically selects suitable default scan settings, but you can view or change them as necessary.

1. Make sure you installed the product software and connected the product to your computer or network.
2. Press the up or down arrow button, select Scan, and press the OK button.
The scan options are displayed:

3. Press the up or down arrow button to select a scan option and press the OK button.
   - **Cloud** sends your scanned files to a destination that you have registered with Epson Connect.
   - **Computer** saves your scan as a JPEG file to your computer or as an image capture in OS X.
   - **Computer (WSD)** lets you manage network scanning in Windows 10, Windows 8.x, Windows 7, or Windows Vista (English only).

   **Note:** To use this feature, you must first set up WSD (Web Services for Devices) on the Windows 7 or Windows Vista computer you want to scan to.

4. To scan to your computer, you first need to select how you connected your product to your computer:
   - If your product is connected directly to your computer with a USB cable, press the up or down arrow buttons to select **USB Connection**.
   - If your product is connected to your computer over a network, press the up or down arrow buttons to select the computer name from the list and press the OK button to begin scanning.

5. Press the **OK** button to select **Format**.
6. Press the up or down arrow button to select **JPEG**, **PDF**, or **Email** as the format of the scanned file.
7. Press the **OK** button.
8. Press one of the **Start** buttons to start scanning.

**Changing Default Scan Button Settings**

**Parent topic:** Starting a Scan
Changing Default Scan Button Settings

You can view or change the default scan settings your product uses when you scan to your computer using the product buttons. You do this using the Event Manager program.

1. Do one of the following to open Event Manager:
   - **Windows 10:** Click , select All apps, select EPSON Software, and select Event Manager.
   - **Windows 8.x:** Navigate to the Apps screen and select Event Manager.
   - **Windows (other versions):** Click or Start > All Programs or Programs > EPSON Software > Event Manager.
   - **OS X:** Open the Applications folder, click Epson Software, and click Event Manager.

2. Open the Scanner (Windows) or Select Scanner (OS X) drop-down list and select your product, if necessary.

3. Click Make Job Settings.

4. Open the Edit Job Settings drop-down list and select the scan button settings you want to view or change.

5. Change the settings as necessary.

6. Click OK.

7. Click Close to close the Event Manager window.

Parent topic: Starting a Scan Using the Product Control Panel

Starting a Scan Using the Epson Scan Icon

You can start the Epson Scan program to select scan settings, scan, and save the scanned image to a file.

- **Windows 10:** Click and select All apps. Select EPSON Software, then select EPSON Scan.
- **Windows 8.x:** Navigate to the Apps screen and select EPSON Scan under EPSON or EPSON Software.
• **Windows (other versions):** Click 🔄 or **Start**, and select **All Programs** or **Programs**. Select **EPSON** or **EPSON Software** and click **EPSON Scan**.

• **OS X:** Open the **Applications** folder, open the **Epson Software** folder, and double-click the **EPSON Scan** icon.

  **Note:** With OS X, in addition to scanning with Image Capture, you can download and install Epson Scan scanning software. Epson Scan provides additional image adjustment and photo correction features for enhancing scanned images, and provides an interface for TWAIN-compliant OCR scanning software. To download Epson Scan, visit Epson's driver download site (*U.S. downloads* or *Canadian downloads*).

  **Note:** In OS X 10.11, if you see a message asking if you want to use TWAIN to scan with your product, select **Yes** to scan using Epson Scan.
You see an Epson Scan window like this:

Scanning in Office Mode

When you scan in Office Mode, Epson Scan automatically saves your scanned file in PDF format in your operating system's Documents or My Documents folder, or opens it in your scanning program. You can select settings, preview, and change the scanned file settings as necessary.

1. Start Epson Scan and select **Office Mode** as the Mode setting.
You see this window:

2. Select the **Document Source** setting indicating where you placed your original.

   **Note:** If you are using the ADF, remove any documents from the scanner glass.
3. Select the **Size** and **Orientation** settings that match your original.
4. To allow Epson Scan to detect and correct any skew in your original, select **Correct Document Skew**.
5. To rotate your original in your scan, select a **Rotate** setting.
6. Select the **Image Type** setting that matches your original.
7. Select the **Resolution** setting you want to use for your scan.
8. Click the **Preview** button.
    Epson Scan previews your original and displays the result in a separate Preview window.
9. If you are using the ADF, reinsert your original into the ADF.
10. If desired, select the area in your preview image that you want to scan (scan area).
11. Click the **Image Adjustment** tab and select any of the image adjustment settings you want to use. Before making adjustments, click the image or scan area in the Preview window.
12. Click **Scan**.
    You see the File Save Settings window.
13. Change any of the necessary file save settings and click **OK**.
Epson Scan scans your original, and saves the file in the selected folder or opens it in your scanning program. If the file was saved directly to your computer, you see the file in the Windows Explorer or OS X Finder, where you can view and print the image, if desired.

Automatically detects where the originals are placed on your product for scanning.

Parent topic: Scanning in Office Mode

Selecting a Scan Area - Office Mode
You can select a specific area in your preview image to include in your scanned image. You can select the entire image area or a portion of it. You can even select multiple scan areas to create multiple scanned images of different areas.

You can also use the scan area to select specific Image Adjustments settings for a scanned image. Just be sure to click inside the scan area before selecting the settings.
1. In the Preview window, click the Auto Locate icon to create a marquee (dotted line) on the preview image.

2. Do the following, as necessary, to work with the selected scan area:
   - If the marquee is correct, continue with the next step.
   - To move the marquee, click inside the scan area and drag the marquee where you want it.
• To resize the scan area, place your cursor over the edge or corner of the marquee, then click and drag the edges where you want them. (Hold down the Shift key as you resize the marquee to retain the same width/height proportions.)

• To create additional marquees (up to 50, if available), click the Copy Marquee icon to copy the existing marquee and paste it on the preview image.

  **Note:** If you draw multiple marquees, make sure you select the All button in the Preview window before you scan. Otherwise, only the area inside the currently selected marquee will be scanned.

• To delete a marquee, click the marquee, then click the Delete Marquee icon.
• To rotate your original in your scan, click one of the Rotate icons.

3. Click inside each scan area and make any necessary settings in the Epson Scan window.

Selecting Scan File Settings
Available Image Adjustments - Office Mode

You can select these Image Adjustments options in Epson Scan Office Mode. Not all adjustment settings may be available, depending on other settings you have chosen.

Note: Select the Image Option checkbox if you need to set any of the grayed-out image adjustments beneath the checkbox. Not all adjustment settings may be available, depending on the Image Type setting.

Unsharp Mask
Makes the edges of certain image areas clearer. Turn off this option to leave softer edges.

Descreening
Removes the ripple pattern that might appear in subtly shaded image areas, such as skin tones. This option improves results when scanning magazines or newspapers. (The results of descreening do not appear in the preview image, only in your scanned image.)

Text Enhancement
Sharpens the appearance of letters in text documents.

Auto Area Segmentation
Makes grayscale images clearer and text recognition more accurate by separating the text from the graphics.

Color Enhance
Enhances the red, green, or blue shades in the scanned image.
Skip Blank Pages
Ensures that your product does not scan pages that contain no text or images.

Edge Fill
Corrects shadowing around the edges of the image by filling the shadows with the color you select.

Brightness
Adjusts the overall lightness and darkness of the scanned image.

Contrast
Adjusts the difference between the light and dark areas of the overall scanned image.

Threshold
Adjusts the level at which black areas in text and line art are delineated, improving text recognition in OCR (Optical Character Recognition) programs.

Parent topic: Scanning in Office Mode

Scanning in Professional Mode
When you scan in Professional Mode, Epson Scan automatically saves your scanned file in PDF format in your operating system's Documents or My Documents folder, or opens it in your scanning program. You can select settings, preview, and change the scanned file settings as necessary.

1. Start Epson Scan and select Professional Mode as the Mode setting.
You see this window:
2. Select the **Document Type** setting that matches your original, such as **Reflective** for documents or photos.

3. Select the **Document Source** setting indicating where you placed your original.
   
   **Note:** If you are using the ADF, remove any documents from the scanner glass.

4. Select the specific type of original you are scanning as the **Auto Exposure Type** setting: Document or Photo.

5. Select the details of your original and how you want it scanned as the **Image Type** setting.

6. Select the **Resolution** setting you want to use for your scan.

7. Click the **Preview** button.
   
   Epson Scan previews your original and displays the result in a separate Preview window.

8. If you are using the ADF, reinsert your original into the ADF.

9. If desired, select the area in your preview image that you want to scan (scan area).

10. Select any of the image adjustment settings you want to use. Before making adjustments, click the image or scan area in the Preview window.

11. If you want to reduce or enlarge your image as you scan, select the **Target Size** setting you want to use.

12. Click **Scan**.

   You see the File Save Settings window.

13. Change any of the necessary file save settings and click **OK**.

   Epson Scan scans your original, and saves the file in the selected folder or opens it in your scanning program. If the file was saved directly to your computer, you see the file in the Windows Explorer or OS X Finder, where you can view and print the image, if desired.

Selecting a Scan Area - Professional Mode
You can select a specific area in your preview image to include in your scanned image. You can select the entire image area or a portion of it. You can even select multiple scan areas to create multiple scanned images of different areas (Normal Preview mode only).

You can also use the scan area to select specific image Adjustments settings for a scanned image. Just be sure to click inside the scan area before selecting the settings.

Note: In Professional Mode, the default Preview mode is Normal Preview mode. To use Thumbnail Preview mode instead, click the Thumbnail tab.
1. Do one of the following to select your scan area in the Preview image:

- **Normal preview**: Click the Auto Locate icon to create a marquee (dotted line) on the preview image.
• **Thumbnail preview**: Your scan area is selected automatically, but you can change it. Place your cursor in one corner of the desired scan area, then click and drag the cursor to the opposite corner to create a marquee (dotted line) on the preview image.

2. Do the following, as necessary, to work with the selected scan area:
   - If the marquee is correct, continue with the next step.
   - To move the marquee, click inside the scan area and drag the marquee where you want it.
• To resize the scan area, place your cursor over the edge or corner of the marquee, then click and drag the edges where you want them. (Hold down the Shift key as you resize the marquee to retain the same width/height proportions.)

• **Normal preview**: To create additional marquees (up to 50, if available), click the Copy Marquee icon to copy the existing marquee and paste it on the preview image.

• To delete a marquee, click the marquee, then click the Delete Marquee icon.

• **Thumbnail preview**: To change the preview style, click one of the Size icons.

  **Note**: If you draw multiple marquees, make sure you select the All button in the Preview window before you scan. Otherwise, only the area inside the currently selected marquee will be scanned.

3. Click inside the scan area and make any necessary settings in the Epson Scan window.

**Parent topic**: Scanning in Professional Mode

### Available Image Adjustments - Professional Mode

You can select these Adjustments options in Epson Scan Professional Mode. Not all adjustment settings may be available, depending on other settings you have chosen.

![Adjustments](image)

**Note**: Select the Image Option checkbox if you need to set any of the grayed-out image adjustments beneath the checkbox.

Click the image adjustment icon to access additional settings.
Click the + (Windows) or ▶ (OS X) icon next to a setting to change the level of adjustment.

Unsharp Mask
Makes the edges of certain image areas clearer. Turn off this option to leave softer edges.

Descreening
Removes the ripple pattern that might appear in subtly shaded image areas, such as skin tones. This option improves results when scanning magazines or newspapers. (The results of descreening do not appear in the preview image, only in your scanned image.)

Color Restoration
Restores the colors in faded photos automatically.

Backlight Correction
Removes shadows from photos that have too much background light.

Dust Removal
Removes dust marks from your originals automatically.

Color Enhance
Enhances the red, green, or blue shades in the scanned image.

Edge Fill
Corrects shadowing around the edges of the image by filling the shadows with the color you select.

Auto Exposure
Automatically adjusts the image exposure settings when you click the Auto Exposure icon. To automatically adjust image exposure settings continuously, click the Configuration button, click the Color tab, and select Continuous auto exposure. You can adjust the level of auto exposure using a slider.

Histogram Adjustment
Provides a graphical interface for adjusting highlight, shadow, and gamma levels individually. (For advanced users only.) Click the histogram icon to access the settings.

Tone Correction
Provides a graphical interface for adjusting tone levels individually. (For advanced users only.) Click the tone correction icon to access the settings.

Brightness
Adjusts the overall lightness and darkness of the scanned image.

Contrast
Adjusts the difference between the light and dark areas of the overall scanned image.
Saturation  
Adjusts the density of colors in the overall image.

Color Balance  
Adjusts the balance of colors in the overall image.

Color Palette  
Provides a graphical interface for adjusting mid-tone levels, such as skin tones, without affecting the highlight and shadow areas of the image. (For advanced users only.) Click the Color Palette icon to access the settings.

Threshold  
Adjusts the level at which black areas in text and line art are delineated, improving text recognition in OCR (Optical Character Recognition) programs.

Parent topic: Scanning in Professional Mode

Selecting a Scan Size - Professional Mode

You can reduce or enlarge the size of your image as you scan. You can also select a specific scan size, such as a common photo size like 4 × 6 inches (102 × 152 mm). This places a scan area of that size on the preview image so you can use it to help crop the image in the correct proportions.

1. Click the Preview button to preview your image.
2. In the Epson Scan window, select the size you want your scanned image to be from the Target Size list.

![Target Size](image)

Note: If you need to rotate the orientation of the target size for your image, click the orientation icon.
A marquee (dotted line) appears on your preview image proportioned for the size you selected.

3. Do the following, as necessary, to work with the selected scan area:
   • To move the marquee, click inside the scan area and drag the marquee where you want it.
   • To resize the scan area, place your cursor over the edge or corner of the marquee, then click and drag the edge where you want it.

**Note:** Manually adjusting the marquee will not change the target size of the scanned file. The marquee only indicates the area of the image that will be scanned.
4. To create a scanned image size that is not available in the Target Size list, click the **Customize** option.

   You see this window:

   ![Target Size Window]

   5. Name the custom size, enter the size, click **Save**, and click **OK**. Then adjust the marquee on the preview image.

   The marquee is automatically proportioned for your custom scan size.
6. To use additional sizing tools, click the + (Windows) or ▶ (OS X) icon next to the Target Size setting and select options as desired.

![Target Size Settings](image)

- **Scale**: Reduces or enlarges your image by the percentage you enter.
- **Trimming**: Turns automatic image cropping on or off.
- **Unlock icon**: Unlocks the width/height proportions of the scanned image size so you can adjust it without constraint.

**Parent topic:** Scanning in Professional Mode

**Image Preview Guidelines**

You can preview your scanned image so you can adjust the scan settings using the preview as a guide. There are two types of preview available, depending on the scan mode and selected settings:

- **Thumbnail preview**: A thumbnail preview displays your previewed images as thumbnails with the scanned image area and exposure automatically selected.
- **Normal preview**: A normal preview displays your previewed images in their entirety so you can select the scanned image area and other settings manually.

**Parent topic:** Selecting Epson Scan Settings

**Scan Resolution Guidelines**

If you plan to enlarge a scanned image so you can print it at a larger size, you may need to increase the resolution from the default resolution set by Epson Scan. Follow these guidelines to determine the resolution setting you need:

- You will enlarge the image as you scan it.
If you will enlarge the image using Epson Scan's Target Size setting, you do not need to increase the Resolution setting.

- You will scan the image at its original size but enlarge it later in an image-editing program.

  Increase Epson Scan's Resolution setting in your scan. Increase the resolution by the same amount you will increase the image size to retain a high image quality. For example, if the resolution is 300 dpi (dots per inch) and you will double the image size later, change the Resolution setting to 600 dpi.

- You will scan the image at 100% or smaller size.

  Select Epson Scan's Resolution setting based on how you will use the scanned image:
  - Email/view on a computer screen/post on the web: 96 to 150 dpi
  - Print/convert to editable text (OCR): 300 dpi
  - Fax: 200 dpi

**Parent topic:** Selecting Epson Scan Settings
Selecting Scan File Settings

You can select the location, name, and format of your scan file on the File Save Settings window. You can also select various optional settings that control how Epson Scan behaves when you scan and save files.

The File Save Settings window may appear after you click **Scan** on the Epson Scan window. You may also be able to access the window by clicking the icon on the Epson Scan window.

1. Do one of the following to select the folder in which you want to save your scanned image:
   - Click the button for one of the displayed folders.
• Click the Other button, click the Browse or Choose button, and select a folder.

2. If you want to change the default name for your scanned image, click Edit and select the options you want.

3. Select the file format you want to use in the Image Format Type menu.

4. If your file format provides optional settings, click the Options button to select them.

5. Choose any of the optional settings you want to use by selecting their checkboxes.

6. Click OK.

   If you selected PDF or Multi-TIFF as the Type setting, you see this window after Epson Scan scans your document:

   ![Add Page Confirmation window]

   Scanning complete.
   Do you want to continue scanning and add more pages?

   Select Edit Page to finish scanning and edit the pages before saving the file.
   Select Save File to finish scanning and save the file without editing the pages.

   ![Add page, Edit page, Save File buttons]

7. Choose one of the following options:
   • If you are scanning only one page, click Save File.
   • If you need to scan additional pages in a document, click Add page. Place additional pages on the product for scanning, click Scan, and repeat until you have scanned all the pages. When you are finished, click Save File.
• If you need to delete or reorder the scanned pages, click **Edit page.** Delete or reorder the pages using the icons that appear on the bottom of the editing window. When you are finished, click **OK.**

**Note:** If you installed an OCR (Optical Character Recognition) program, you may see a screen indicating the program is converting your page to text. Wait until the program re-scans the page and close the program, if necessary.

**Available Scanned File Types and Optional Settings**

**Parent topic:** Selecting Epson Scan Settings

### Available Scanned File Types and Optional Settings

You can select from a variety of scanned file types and optional settings on the File Save Settings window in Epson Scan.

#### File Formats

**Bitmap (*.bmp)**
A standard image file format for most Windows programs.

**JPEG (*.jpg)**
An image format that lets you highly compress image data. However, the higher the compression, the lower the image quality. (The TIFF format is recommended when you need to modify or retouch your scanned image.)

**Multi-TIFF (*.tif)**
A TIFF file format when multiple pages are saved to the same file, allowing you to edit the images using a compatible program.

**PDF (*.pdf)**
A document format that is readable by Windows and OS X systems using Adobe Reader, Acrobat, or other programs. You can save multi-page documents in one PDF file.

**PICT (*.pct)**
A standard image file format for most OS X programs.

**TIFF (*.tif)**
A file format created for exchanging data between many programs, such as graphic and DTP software.

#### Optional Settings

**Overwrite any files with the same name**
Select to overwrite previous files with the same names.
Show this dialog box before next scan
Select to have the File Save Settings window appear automatically before you scan (in certain Epson Scan modes).

Open image folder after scanning
Select to have Windows Explorer or OS X Finder automatically open to the folder where your scanned image is saved after scanning.

Show Add Page dialog after scanning
If you are scanning a multi-page document using the PDF or Multi-TIFF format, select to display a prompt for scanning additional pages after the first page is scanned.

Parent topic: Selecting Scan File Settings

Scanning with OS X Using Image Capture
With OS X, you can scan with your product using an image-editing application such as Image Capture.

Note: With OS X, in addition to scanning with Image Capture, you can download and install Epson Scan scanning software. Epson Scan provides additional image adjustment and photo correction features for enhancing scanned images, and provides an interface for TWAIN-compliant OCR scanning software. To download Epson Scan, visit Epson's driver download site (U.S. downloads or Canadian downloads).

1. Open an image editing application, such as Image Capture.
2. Select your Epson product from the DEVICES or SHARED list in the Finder, if necessary. (You may need to hover over the DEVICES or SHARED list, click Show, and select your product.)
3. If you see the Show Details button, click it.
   If you are scanning an item on the scanner glass, your product begins a preview scan.
4. Select the **Scan Mode** setting indicating where you placed your original (if available). Select any other available scan settings as necessary.
5. Select the folder in which you want to save your scanned file in the **Scan To** pop-up menu.

6. Click **Scan**.

   Your scanned file is saved in the folder you selected.

Faxing

See these sections to fax using your product.

**Note:** This product allows you to store names, telephone numbers, and fax data in its memory even when the power is turned off. Make sure you restore all of the default settings if you give away or dispose of the product. This will erase all of your network settings and fax data.

- Connecting a Telephone or Answering Machine
- Setting Up Fax Features
- Setting Up Contacts and Contact Groups
- Sending Faxes
- Receiving Faxes

**Connecting a Telephone or Answering Machine**

You must connect your product to a telephone wall jack to send or receive faxes. If you want to use the same telephone line to receive calls, you can connect a telephone or answering machine to your product using an additional phone cable.

**Note:** If you do not connect a telephone to your product, make sure Receive Mode is set to **Auto**. Otherwise, you cannot receive faxes.
1. Connect a phone cable to your telephone wall jack and to the **LINE** port on your product.

**Note:** If you have a DSL or ISDN connection, you must connect the appropriate DSL filter, or ISDN terminal adapter or router to the wall jack to be able to use the line for faxing or voice calls using your product. Contact your DSL or ISDN provider for the necessary equipment.
1 Telephone wall jack
2 DSL filter
3 DSL modem
ISDN connection

1  ISDN wall jack
2  Terminal adapter or ISDN router
2. If you are connecting a telephone or answering machine to your product using a second phone cable, remove the cap from the **EXT** port on your product.
3. Connect a second phone cable to your telephone or answering machine and to the **EXT** port on your product.

**Note:** If you connect an answering machine and Receive Mode is set to **Auto**, set the number of rings before your product answers a call to a number that is higher than your answering machine’s setting for the number of rings.

Any phone or answering machine must be connected to the **EXT** port for your product to detect an incoming fax call when the phone is picked up. Epson cannot guarantee compatibility with VoIP, cable phone systems, or fiberoptic digital services such as FIOS.

Selecting Your Country or Region

Before faxing, select the country or region in which you are using your product.
Note: If you change the country or region, your fax settings return to their defaults and you must select them again. This setting can be locked by an administrator. If you cannot access or change this setting, contact your administrator for assistance.

1. Press the home button, if necessary.
2. Press the up or down arrow button, select Setup, and press the OK button.
3. Select Common Settings and press the OK button.
   You see this screen:
   ![Common Settings menu]

4. Select Country/Region and press the OK button.
5. Scroll up or down, if necessary, to select your country or region.
   You see a confirmation screen.
6. If the setting is correct, press the up arrow button. (If not, press the down arrow button and retry.)

   Note: Changing the country or region restores the fax settings to their defaults.

Parent topic: Setting Up Fax Features Using the Product Control Panel

Selecting the Date and Time

Before faxing, select the current date, time, and daylight saving phase in your area, and choose your preferred date and time format.

1. Press the home button, if necessary.
2. Press the up or down arrow button, select Setup, and press the OK button.
3. Select Common Settings and press the OK button.
4. Select Date/Time Settings and press the OK button.
You see a screen like this:

```
Date/Time Settings

Date/Time

OK
```

5. Select the date format you want to use.
6. Use the numeric keypad to enter the current date and press the OK button.
7. Select the time format you want to use and press the OK button.
8. Use the numeric keypad to enter the current time and press the OK button.
9. Select Date/Time Settings and press the down arrow button.
10. Select Daylight Saving Time and press the OK button.
11. Select the setting that applies to your area:
    - **Winter**: it is winter or your region does not use Daylight Saving Time (DST)
    - **Summer**: it is spring or summer and your region uses Daylight Saving Time (DST)

**Note:** If your region uses Daylight Saving Time (DST), you must change this setting to match the season. When you change from Winter to Summer, your product automatically sets its clock ahead one hour. When you change from Summer to Winter, it sets its clock back one hour.

12. If necessary, select Time Difference and use the icons on the screen to set the difference between UTC (Coordinated Universal Time) and your time zone.

**Parent topic:** Setting Up Fax Features Using the Product Control Panel

Using the Fax Setup Wizard

You can set up the product's basic fax settings using the Fax Setting Wizard. This wizard is automatically displayed when the product is turned on for the first time. You can also change these settings individually from the Fax Settings menu.

1. Press the 🏠 home button, if necessary.
2. Press the up or down arrow button, select **Setup**, and press the **OK** button.
3. Select **Fax Settings** and press the **OK** button.
   
   You see this screen:

   ![Fax Settings Screen](image)

4. Select **Fax Setting Wizard** and press the **OK** button.
5. Press the up arrow button to start setting up your fax settings.
6. Use the numeric keypad to enter the sender name for your fax source, such as your name or a business name. You can enter up to 40 characters. Press the **OK** button when you are done.
7. Use the numeric keypad to enter your fax number, up to 20 characters. Press the **OK** button when you are done.
8. On the Distinctive Ring Setting screen, do one of the following:
   - If you have subscribed to a distinctive ring service from your telephone company, press the up arrow button. Then, select the ring pattern to be used for incoming faxes and go to step 13.
   - If you do not have distinctive ring service, press the down arrow button and go to the next step.

   **Note:**
   - Distinctive ring service allows you to have several phone numbers on one phone line. Each number is assigned a different ring pattern. You can use one number for voice calls and another for fax calls. Select the ring pattern assigned to fax calls in the DRD Setting.
   - If you select **On** or one of the ring patterns other than **All**, Receive Mode is automatically set to **Auto**.
9. Do one of the following:
   - If you connected an external telephone or answering machine to the product's **EXT** port, press the up arrow button and go to the next step.
• If you did not connect an external telephone or answering machine, press the down arrow button and go to step 11.

10. Do one of the following:
• If you connected an external telephone or answering machine to the product’s EXT port, press the up arrow button to receive faxes manually or press the down arrow to receive them automatically.

  **Note:** If you have connected an external answering machine and selected to receive faxes automatically, make sure the Rings to Answer setting is correct. If you select to receive faxes manually, you need to answer every call and use the product’s control panel or your phone to receive faxes.

• If you did not connect an external telephone or answering machine, press the down arrow button to receive faxes automatically.

  **Note:** When no external telephone is connected to the product, Receive Mode must be set to Auto; otherwise you cannot receive faxes.

11. Press the **OK** button.

12. On the Confirm Settings screen, confirm the displayed settings and press the **OK** button. (Press the **back** button if you need to correct or change the settings.)

13. On the Confirmation screen, press the **OK** button to check the fax connection and print a report of the check result. If there are any errors reported, try the solutions on the report, and run the check again.

  **Note:**
  • If the Select Line Type screen is displayed, select the correct line type.
  • If the Select Dial Tone Detection screen is displayed, select **Disable**. However, disabling the dial tone detection function may drop the first digit of a fax number and send the fax to the wrong number.

**Parent topic:** Setting Up Fax Features Using the Product Control Panel

**Related tasks**

**Entering Characters on the LCD Screen**
Selecting the Line Type

If you connect the product to a PBX (Private Branch Exchange) phone system or terminal adapter, you must change the product's line type. PBX is used in office environments where an external access code such as “9” must be dialed to call an outside line. The default Line Type setting is PSTN (Public Switched Telephone Network), which is a standard phone line, similar to the one in your home.

1. Press the home button, if necessary.
2. Press the up or down arrow button, select Setup, and press the OK button.
3. Select Fax Settings and press the OK button.
4. Select Basic Settings and press the OK button.
5. Select Line Type and press the OK button.

   You see this screen:

   ![Basic Settings Screen]

   6. If you connected the product to a PBX phone system, select PBX.

   You see this screen:

   ![Basic Settings Screen with PBX Selected]

   7. Select Use and press the OK button.
8. To select an access code number (9 for example), use the numeric keypad to enter the code number and press the OK button.

**Parent topic:** Setting Up Fax Features Using the Product Control Panel

### Setting the Number of Rings to Answer

If you connect an external answering machine and select to receive faxes automatically, make sure the **Rings to Answer** setting is correct. The number of rings should be higher than the number of rings your answering machine is set to for answering a call.

1. Press the home button, if necessary.
2. Press the up or down arrow button, select **Setup**, and press the OK button.
3. Select **Fax Settings** and press the OK button.
4. Select **Receive Settings** and press the OK button.
5. Select **Rings to Answer** and press the OK button.

You see this screen:

![Receive Settings screen](image)

6. Select the number of rings and press the OK button. Make sure to select a number higher than the number of rings your answering machine is set to for answering a call.

**Note:** The answering machine picks up every call faster than the product, but the product can detect fax tones and start receiving faxes. If you answer the phone and hear a fax tone, check that the product has started receiving the fax, then hang up.

**Parent topic:** Setting Up Fax Features Using the Product Control Panel

### Selecting Advanced Fax Settings

You can use the product's control panel to select settings for sending, receiving, and printing faxes.
1. Press the home button, if necessary.
2. Press the up or down arrow, select Setup, and press the OK button.
3. Select Fax Settings and press the OK button.
   You see this screen:

![Fax Settings](image)

4. Select the group of settings you want to change.

Setting Up Speed/Group Dial Lists Using the Fax Utility - Windows

You can set up your speed dial and group dial lists using the FAX Utility for Windows. The utility also lets you import fax numbers from the Windows Address Book and back up fax numbers stored in your product's memory.

Note: You can create up to 60 speed dial and group dial entries combined.

1. Do one of the following:
   • Windows 10: Click and select All apps > EPSON Software.
   • Windows 8.x: Navigate to the Apps screen.
   • Windows (other versions): Click or Start > Programs or All Programs > EPSON Software.

2. Select FAX Utility.
You see this window:

3. Select **Fax Settings for Printer**. (Select your product, if prompted.)
4. Select **Speed Dial/Group Dial List**.
You see this window:

5. Select an empty entry and click the icon.

   **Note:** To edit an entry, select it and click the icon. To delete an entry, select it and click the icon.

6. Do one of the following:
   - To create a speed dial entry, select **Speed Dial**, enter a name and fax number, and click **OK**.
   - To create a group dial entry, select **Group**, enter a name, select your desired fax numbers, and click **OK**.

7. Repeat the previous steps as necessary to add all your speed dial or group dial entries.

8. When you are finished, click the icon to save the entries to your product's memory.

Faxing from the Control Panel

You can send a fax from your product control panel by entering the fax number or selecting the number from either the contact list or fax history. If direct dialing has been restricted, you can only select the number from the contact list or fax history. You can send black and white faxes to multiple recipients, but not color faxes.

1. Place your original on the product for faxing.
2. Press the home button, if necessary.
3. Press the up or down arrow button, select Fax, and press the OK button.
You see a screen like this:

![Fax screen](image)

4. Do one of the following:
   • Enter the fax number using the buttons on the numeric keypad.
     
     **Note:** If necessary, enter an outside line access code (such as 9) at the beginning of the fax number. If the access code has been set up in the **Line Type** setting, enter the # pound sign instead of the code.
   
   • Press the **Contacts** button, select one or more recipients from the list, and press the **OK** button.
   • Press the **Redial/Pause** button to redial the last dialed fax number.

5. If you need to change any fax settings, press the **OK** button and select your settings.

   **Note:** If your recipient's fax machine does not print in color, your fax is automatically sent in black-and-white.

6. Press one of the **Start** buttons.

   **Note:** To cancel faxing, press the **Stop/Reset** button.

   Your product scans your original and prompts you to place additional pages, if necessary. After scanning your originals, your product dials the number and sends the fax.

**Dialing Fax Numbers from a Connected Telephone**

If you have connected a telephone to the EXT port on your product, you can send a fax by dialing the number from the connected telephone. If the recipient's phone number and fax number are the same, you speak to the recipient before sending the fax.

1. Place your original on the product for faxing.
2. Press the home button, if necessary.
3. Dial the fax number from the connected telephone. Speak to the recipient if necessary.

    **Note:** If you are using a pre-paid calling card, enter the number and password required to use the card before entering the destination fax number.

4. Press one of the Start buttons to select **Send Fax**.

    **Note:** Your product communicates with the recipient's fax machine. Do not hang up the telephone yet.

5. Press one of the Start buttons to select **Send**.
6. When you hear a fax tone, press one of the Start buttons to start sending the fax.
7. Hang up the telephone.

    **Note:** If your recipient's fax machine does not print in color, your fax is automatically sent in black-and-white.

Placing Originals on the Product

Sending a Fax at a Specified Time

You can send a fax at a time of your choice.

**Note:** You can send faxes only in black-and-white when you use this option.

1. Place your original on the product for faxing.
2. Press the home button, if necessary.
3. Press the up or down arrow button, select Fax, and press the OK button.
   You see a screen like this:

![Fax screen](image)

4. Enter a fax number or select a number from the Contacts list, and press the OK button.

   **Note:** If necessary, enter an outside line access code (such as 9) at the beginning of the fax number. If the access code has been set up in the Line Type setting, enter the # pound sign instead of the code.

5. Press the OK button again.
6. Select Send Fax Later, and press the OK button.
7. Select On, and press the OK button.
8. Use the buttons on the numeric keypad to enter your desired time, and press the OK button.
9. Press the back button.
10. Press one of the Start buttons.

Note: To cancel faxing, press the Stop/Reset button.

After scanning your originals, your product dials the number and sends the fax at the specified time.

Note: If the product is turned off at the specified time, the fax is sent when you turn it back on.

Sending Faxes Using the Fax Utility - Windows
You can send a fax from a printing program in Windows. You can fax up to 100 pages at a time, including a cover sheet.

1. Open the file you want to fax and select the print command.
2. Select your product with the FAX option as the printer.
3. To change the Paper Size, Orientation, Color, Image Quality, or Character Density settings, click the Preferences or Properties button.

   Note: If you see a Setup, Printer, or Options button, click it. Then click Preferences or Properties on the next screen. For more information about selecting fax print settings, click Help.

4. Select the Page Range as necessary. (Leave the Number of copies set to 1.)
5. Click Print or OK.
If you’re faxing for the first time, you see a window like this one:

6. Enter your sender information so that recipients can identify the origin of the fax. Then click **OK** to save the sender information.
You see a window like this:

![Recipient Settings (1/3) window](image)

7. Enter the recipient's name and fax number or select a recipient from the phonebook, then click **Next**.

   **Note:** For detailed instructions on using the Epson FAX Utility, click **Help**.

8. Select a cover sheet and enter a subject and message, then click **Next**.

9. Click **Send** to transmit your fax.

**Parent topic:** Sending Faxes

### Sending Faxes Using the Fax Utility - OS X

You can send a fax from an OS X printing program using the FAX Utility. You can fax up to 100 pages at a time, including a cover sheet.

1. Open the file you want to fax.
2. Select the print command in your application.

**Note:** You may need to select a print icon on your screen, the **Print** option in the **File** menu, or another command. See your application's help utility for details.

![Print settings](image)

3. Select your product **FAX** option as the **Printer** setting.
4. If necessary, click the arrow next to the Printer setting or the **Show Details** button to expand the print window.
5. Select the number of pages you are faxing as the **Pages** setting.

**Note:** Leave the **Copies** setting set to 1.

6. Select **Recipient Settings** from the pop-up menu.
You see this window:

7. Do one of the following to choose your recipient:
   • Select a name or group from the **Recipient List**.
   • Enter a name, company, and fax number and click the + button.
   • Click the icon and select a recipient from your address book.
8. Select **Fax Settings** from the pop-up menu.
You see this window:

9. Select the **Color** and **Image Quality** settings you want to use for your fax.
10. Click **Fax**.

**Parent topic:** Sending Faxes

### Receiving Faxes

See these sections to receive faxes with your product.

- Fax Reception
- Receiving Faxes Automatically
- Receiving Faxes Manually
- Receiving a Fax by Polling

**Parent topic:** Faxing

### Fax Reception

Your product will automatically receive and print faxes when you set the Receive Mode to **Auto**.

If you connected a telephone to your product so you can use the same phone line for faxes and voice calls, you can also set your product to receive faxes manually. This allows you to check for a fax tone using the telephone and press a button on your product to receive the fax.

Make sure to load paper in your product and select your fax settings before receiving a fax.
Note: If you run out of paper during fax printing, load more paper and press the button indicated on your product’s LCD screen to continue.

Parent topic: Receiving Faxes

Receiving Faxes Automatically

To receive faxes automatically, make sure Receive Mode is set to Auto (the default setting for the product).

To change the Receive Mode setting if necessary, select Setup > Fax Settings > Receive Settings > Receive Mode.

If an answering machine is connected, make sure the product's Rings to Answer setting is set higher than the number of rings your answering machine is set to answer a call. For example, if the answering machine is set to pick up on the fourth ring, set the product to pick up on the fifth ring or later.

Parent topic: Receiving Faxes

Related tasks
Receiving Faxes Manually

Receiving Faxes Manually

You can set up your product to receive faxes manually by setting the Receive Mode to Manual. This lets you check for a fax tone on the connected telephone before receiving a fax.

2. When the connected telephone rings, answer the call.
3. If you hear a fax tone, select Receive on the product control panel.
4. Press the one of the Start buttons to start receiving the fax.
5. Hang up the telephone.

Parent topic: Receiving Faxes

Removing and Installing Ink Cartridges

**Purchase Epson Ink Cartridges**

You can purchase genuine Epson ink and paper at epson.com/ink3 (U.S. sales) or epson.ca (Canadian sales). You can also purchase supplies from an Epson authorized reseller. To find the nearest one, call 800-GO-EPSON (800-463-7766).

**Note:** This product uses only genuine Epson-brand cartridges. Other brands of ink cartridges and ink supplies are not compatible and, even if described as compatible, may not function properly.

The cartridges included with the printer are designed for printer setup and not for resale. After some ink is used for charging, the rest is available for printing. Yields vary considerably based on images printed, print settings, paper type, frequency of use, and temperature. For print quality, a variable amount of ink remains in the cartridge after the "replace cartridge" indicator comes on.

**Ink Cartridge Part Numbers**

### Removing and Installing Ink Cartridges

Make sure you have your replacement cartridges handy before you begin. You must install new cartridges immediately after removing the old ones.

**Caution:** Leave your old cartridges in the printer until you are ready to replace them to prevent the print head nozzles from drying out. Do not open ink cartridge packages until you are ready to install the ink. Cartridges are vacuum packed to maintain reliability.

1. Turn on your product.
   - If an ink cartridge is expended, you see a message on the LCD screen. Note which cartridges need to be replaced, then select **OK** and press the up arrow button.
   - If you are replacing a cartridge before you see a message on the LCD screen, press the up or down arrow button to select **Setup** and press the **OK** button. Then select **Maintenance > Ink Cartridge(s) Replacement** and press one of the **Start** buttons.
2. Lift up the scanner unit.

**Caution:** Do not touch the flat white cable inside the printer. Do not lift the scanner unit while the document cover is open.

3. Squeeze the tab on the cartridge and lift the cartridge straight up to remove it.

**Note:** Dispose of used cartridges carefully. Do not take the used cartridge apart or try to refill it.
Warning: If ink gets on your skin, wash it thoroughly with soap and water. If ink gets into your eyes, flush them immediately with water. If ink gets into your mouth, spit it out and see a doctor right away. Keep ink cartridges out of the reach of children.

4. Gently shake the new cartridge four or five times as shown. Then remove the cartridge from the package.

Caution: Do not remove any labels or seals, or ink will leak. Do not touch the green chip on the cartridge. Install the new cartridge immediately after removing the old one; if you do not, the print head may dry out and be unable to print.

5. Remove only the yellow tape.
6. Insert the new cartridge into the holder and push it all the way down until it clicks into place.

7. Press the Color button to make sure the cartridges are installed correctly.

   **Caution:** If you see a message that an ink cartridge is installed incorrectly, lift up the scanner unit, and press the ink cartridge down until it clicks into place.

8. Close the scanner unit.
   The product starts charging the ink. This takes a few minutes. When you see a completion message on the LCD screen, ink replacement is complete.

   **Note:** Do not turn off the product while charging or you will waste ink.

   **Caution:** If you remove an ink cartridge for later use, protect the ink supply area from dirt and dust and store it in the same environment as the printer. The valve in the ink supply port is designed to contain any excess ink, but do not touch the ink supply port or surrounding area. Always store ink cartridges with the label facing up; do not store cartridges upside-down.

2. Do one of the following:
   - **Windows:** Access the Windows Desktop and right-click the product icon in the Windows taskbar.
• **OS X**: In the Apple menu or the Dock, select **System Preferences**. Select **Print & Fax, Print & Scan**, or **Printers & Scanners**, select your product, and select **Options & Supplies**. Select **Utility** and select **Open Printer Utility**.

3. Select **Print Head Alignment**.

4. Click **Next**, then click **Print** to print an alignment sheet.

**Note**: Do not cancel printing while you are printing a head alignment pattern.

You see a window like this:
5. Check the printed pattern and follow the instructions on the screen to choose the number of the best printed pattern for each set.

   **Vertical alignment**

   ![Vertical alignment pattern](image)

   **Horizontal alignment**

   ![Horizontal alignment pattern](image)

   - After choosing a pattern number, click **Next**.
   - If no patterns are aligned in one or more of the sets, choose the closest one in each set and click **Realignment**. Then print another alignment sheet and check it.

   **Note:** Click **Skip** (where available) if you want to skip a particular alignment sheet.

6. When you are done, click **Finish**.

   **Parent topic:** [Print Head Alignment](#)

**Cleaning the Paper Path**

If you see ink on the back of a printout, you can clean the paper path to remove any excess ink.

1. Load a few sheets of plain paper in the product.
2. Use the product control panel to make a copy, but without placing a document on the scanner glass.

   **Note:** Make sure there is no dust or stains on the scanner glass or document cover.
3. Check the back of the ejected paper to see if it is clean.
4. Repeat as necessary until the paper comes out clean.

**Parent topic:** Adjusting Print Quality
Cleaning and Transporting Your Product

See these sections if you need to clean or transport your product.

Cleaning Your Product
Transporting Your Product

Cleaning Your Product

To keep your product working at its best, you should clean it several times a year.

**Caution:** Do not use a hard brush, alcohol, or paint thinner to clean the product or you may damage it. Do not use oil or other lubricants inside the product or let water get inside it. Close the rear paper feed slot when you are not using it, to keep out dust.

1. Turn off the product.
2. Unplug the power cable.
3. Disconnect any connected cables.
4. Remove all the paper from the product.
5. Clean the outer case and control panel with a soft, dry cloth. Do not use liquid or chemical cleansers.
6. Clean the paper cassette using a soft brush.
7. Clean the scanner glass and the glass area on the left with a soft, lint-free cloth (microfiber is recommended), moistened with a little glass cleaner.

**Caution:** Do not spray glass cleaner directly on the glass and do not press the glass surface with any force.

**Note:** If lines appear on the printout or in scanned images, carefully clean the scanner glass on the left.
8. Open the ADF cover and use a soft, dry, lint-free cloth (microfiber is recommended), to clean the rollers and the interior of the ADF.

Parent topic: Cleaning and Transporting Your Product

Transporting Your Product

If you need to store your product or transport it a long distance, prepare it for transportation as described here.

Caution: During transportation and storage, follow these guidelines:

- Avoid tilting the product, placing it vertically, or turning it upside down; otherwise ink may leak.
- Leave the ink cartridges installed. Removing the cartridges can dry out the print head and may prevent the product from printing.

Note: Before storing your product for a long period, replace low, expended, or expired ink to help prevent the print head from drying out. Store your product in a cool, dry place.
1. Turn off the product.
2. Lift up the scanner unit and check to see if the ink cartridge holder is in the far right position (the home position). If not, turn on the product, wait for the ink cartridge holder to move, then turn the product off again.

   ![Image showing the ink cartridge holder and scanner unit]

   **Caution:** Do not place tape on the white flat cable inside the product; otherwise, you may damage your product.

4. Lower the scanner unit.
5. Remove all the paper from the product.
6. Unplug the power cable.
7. Disconnect any connected cables.
8. Close the output tray and paper support.
9. Place the product in its original packing materials, if possible, or use equivalent materials with cushioning around the product.

   Keep the product level during transportation. Be sure to remove the tape from the ink cartridge holder before turning on your product. If print quality has declined when you print again, clean and align the print head.

Checking for Software Updates

Periodically, it's a good idea to check Epson's support website for free updates to your product software. Visit the driver download site at (U.S. downloads or Canadian downloads).

- **Windows**: Your printer software automatically checks for updates. You can also manually update the software by selecting **Software Update** here:
  - Accessing the Windows Desktop and right-clicking the product icon in the Windows taskbar
  - On the **Maintenance** tab in the printer settings window

You can also update the software by selecting **EPSON Software Updater** in the **EPSON** or **EPSON Software** program group, accessible by the **Start** button, or on the **Start** or **Apps** screens, depending on your version of Windows.

- **OS X**: You can manually update the software by opening the **Applications > Epson Software** folder and selecting **EPSON Software Updater**.
Parent topic: Solving Problems

Product Status Messages

You can often diagnose problems with your product by checking the messages on its LCD screen.

<table>
<thead>
<tr>
<th>LCD screen message</th>
<th>Condition/solution</th>
</tr>
</thead>
<tbody>
<tr>
<td>Paper jam</td>
<td>Paper is jammed in the product. Remove the jammed paper and press the <strong>OK</strong> button to clear the error.</td>
</tr>
<tr>
<td>Paper jam in the ADF</td>
<td>Paper is jammed in the ADF or an object is blocking the hole in the front left corner of the product next to the scanner glass. Remove the object or jammed paper and follow the prompts on the LCD screen to clear any error messages.</td>
</tr>
<tr>
<td>You need to replace the following ink cartridge(s).</td>
<td>Replace the indicated ink cartridge.</td>
</tr>
<tr>
<td>Communication error</td>
<td>Make sure the computer is connected to your product and your software is installed correctly.</td>

</tr>
<tr>
<td>A printer's ink pad is nearing the end of its service life.</td>
<td>The ink pad is near the end of its service life. Contact Epson for support. (To continue printing, press the <strong>OK</strong> button.)</td>
</tr>
<tr>
<td>A printer's ink pad is at the end of its service life.</td>
<td>The ink pad is at the end of its service life. Turn off the product and contact Epson for support.</td>
</tr>
<tr>
<td>No dial tone</td>
<td>Make sure the phone cable is connected correctly and the phone line works. If you connected the product to a PBX (Private Branch Exchange) phone line or Terminal Adapter, turn off the <strong>Dial Tone Detection</strong> setting.</td>
</tr>
<tr>
<td>Recovery mode</td>
<td>An error has occurred during firmware updating. Connect your product using a USB cable and try updating the firmware again. If you still receive this error message, contact Epson for support.</td>
</tr>
</tbody>
</table>
Note: The ink pads in the printer collect, distribute, and contain the ink that is not used on printed pages. During the life of your product it may reach a condition where either satisfactory print quality cannot be maintained or the ink pads have reached the end of their usable life. The Epson Status Monitor, your LCD screen, or lights on the control panel will advise you when these parts need replacing. If this happens during the standard warranty of the product, the exchange of the product or replacement of the pads is covered under the standard warranty. If the product is out of warranty, the pads can be replaced by any Epson authorized service provider. The waste ink pads are not a user-replaceable part.

Running a Product Check
Running a product check helps you determine if your product is operating properly.

1. Disconnect any interface cables connected to your product.
2. Load a few sheets of plain paper in the product.
3. Press the up or down arrow button to select Setup and press the OK button.
You see this screen:

4. Press the up or down arrow button to select **Maintenance** and press the **OK** button.
5. Press the up or down arrow button to select **Print Head Nozzle Check** and press the **OK** button.
6. Press one of the ◀ **Start** buttons.
7. Do the following, depending on the results of the product check:
   - If the page prints and the nozzle check pattern is complete, the product is operating properly. Any operation problem you may have could be caused by your computer, cable, software, or selected settings. Check the other solutions in this book or try uninstalling and reinstalling your printer software.
   - If the page prints but the nozzle check pattern has gaps, clean or align the print head.
   - If the page does not print, the product may have a problem. Check the other solutions in this manual. If they do not work, contact Epson.

**Resetting Control Panel Defaults**

If you have a problem with settings on the product control panel, you can reset them to their factory defaults. You can choose which settings to reset or reset them all.
1. Press the up or down arrow button, select **Setup**, and press the **OK** button.
2. Press the up or down arrow button, select **Restore Default Settings**, and press the **OK** button.

   You see this screen:

   ![Restore Default Settings screen](image)

3. Press the up or down arrow button to select one of these options and press the **OK** button.
   - **Network Settings**: Restores all of the default network settings.
   - **Fax Settings**: Restores all of the fax settings.
   - **Clear All Data and Settings**: Restores all of the default settings and resets contact and network data on the control panel.

   You see a confirmation screen.

4. Press the up arrow button to reset the selected settings. Press the down arrow button if you want to cancel the operation.

### Solving Setup Problems

Check these sections if you have problems while setting up your product.

- **Noise After Ink Installation**
- **Software Installation Problems**

**Parent topic:** Solving Problems
Noise After Ink Installation

If you hear noises from your product after installing ink, try these solutions:

• The first time you install ink cartridges, the product must charge its print head. Wait until charging finishes before you turn off the product, or it may charge improperly and use excess ink the next time you turn it on.

• If the product's print head stops moving or making noise, and the charging process has not finished after 6 minutes, turn off your product. Turn it back on and check to see if charging is still in progress. If it is still in progress, contact Epson for help.

Parent topic: Solving Setup Problems

Software Installation Problems

If you have problems while installing your product software, try these solutions:

• Make sure your product is turned on and any necessary cables are securely connected at both ends. If you still have problems installing software, disconnect the cable and carefully follow the instructions on the Start Here sheet. Also make sure your system meets the requirements for your operating system.

• Close any other programs, including screen savers and virus protection software, and install your product software again.

• In Windows, make sure your product is selected as the default printer and the correct port is shown in the printer properties.

• If you see any error message or your software does not install correctly in Windows, you may not have software installation privileges. Contact your System Administrator.

Solving Network Problems

Check these solutions if you have problems setting up or using your product on a network.
Note: Breakdown or repair of this product may cause loss of fax and network data and settings. Epson is not responsible for backing up or recovering data and settings during or after the warranty period. We recommend that you make your own backup or print out your fax and network data and settings.

Product Cannot Connect to a Wireless Router or Access Point
Network Software Cannot Find Product on a Network
Product Does Not Appear in OS X Printer Window
Cannot Print Over a Network
Cannot Scan Over a Network

Parent topic: Solving Problems

**Product Cannot Connect to a Wireless Router or Access Point**

If your product has trouble finding or connecting to a wireless router or access point, try these solutions:

- If you are connecting the product via Wi-Fi Protected Setup (WPS) and the Wi-Fi icon on your product's LCD screen is not lit or does not appear, make sure you select one of the WPS options from the product control panel within 2 minutes of pressing the WPS button on your router.

- Make sure to place your product within contact range of your 2.4 GHz router or access point. Avoid placing your product near a microwave oven, 2.4 GHz cordless phone, or large metal object, such as a filing cabinet.

  **Note:** If you are using a 5 GHz wireless router, set the router to operate in dual band (2.4 GHz and 5 GHz) mode. If your router uses a single network name (SSID) for both the 2.4 GHz and 5 GHz band, give each band its own network name (SSID) instead, such as Home Network 2.4 GHz and Home Network 5 GHz. See your router documentation or contact your internet service provider for instructions.

- Verify that your router or access point is operating correctly by connecting to it from your computer or another device.

- You may need to disable the firewall and any anti-virus software on your wireless router or access point.

- Check to see if access restrictions, such as MAC address filtering, are set on the router or access point. If access restrictions are set, add your product's MAC address to your router's address list. To obtain your product's MAC address, print a network status sheet. Then follow the instructions in your router or access point documentation to add the address to the list.

- If your router or access point does not broadcast its network name (SSID), follow the instructions that came with your product to enter your wireless network name manually.
• If your router or access point has security enabled, determine the kind of security it is using and any required password or passphrase for connection. Then make sure to enter the exact WEP key or WPA passphrase correctly.

• Check if your computer is restricting the available wireless channels. If so, verify that your wireless access point is using one of the usable channels and change to a usable channel, if necessary.

• If you are using a Wi-Fi Direct connection that suddenly disconnects, the Wi-Fi direct password on your device may have been changed. If necessary, delete the existing DIRECT-xxxxxxxx connection settings from your device and enter a new password. See your device documentation for instructions.

• If you connected your product to a Windows computer using Wi-Fi Direct and it automatically selected Access Point Mode, you may have trouble accessing a low-priority Internet connection. Check the network connection or adapter settings in the Windows Control Panel and set the Internet metric setting to 100 for your version of the Internet Protocol.

Network Software Cannot Find Product on a Network

If EpsonNet Setup cannot find your product on a network, try these solutions:

• Make sure your product is turned on and connected to your network. Verify connection using your product control panel.

• Check if your network name (SSID) contains non-ASCII characters. Your product cannot display non-ASCII characters.

• Make sure your product is not connected to a guest network.

• If necessary, reinstall your product software and try running EpsonNet Setup again:
  1. Reset your product’s network settings to their factory defaults.
  2. Windows only: uninstall your product software.
  3. Initialize your router following the instructions in your router documentation.
If you are reading these instructions online, you will lose your Internet connection when you initialize your router, so note the next step before initializing it.

4. Download your product software from the Epson website using the instructions on the Start Here sheet.

- If you have replaced your router, reinstall your product software to connect to the new router.

Note: If you are using a 5 GHz wireless router, set the router to operate in dual band (2.4 GHz and 5 GHz) mode. If your router uses a single network name (SSID) for both the 2.4 GHz and 5 GHz band, give each band its own network name (SSID) instead, such as Home Network 2.4 GHz and Home Network 5 GHz. See your router documentation or contact your internet service provider for instructions.

Wi-Fi Networking

Product Does Not Appear in OS X Printer Window

If your product does not appear in the OS X printer window, try these solutions:

- Turn your product off, wait 30 seconds, then turn it back on again.
- If you are connecting the product via Wi-Fi Protected Setup (WPS) and the Wi-Fi icon does not appear on your product’s LCD screen, make sure you select one of the WPS options from the product control panel within 2 minutes of pressing the WPS button on your router.
- If you are connecting the product wirelessly via EpsonNet Setup and the Wi-Fi icon does not appear on your LCD screen, make sure your product software was installed correctly. If necessary, reinstall your software.

Note: If you are using a 5 GHz wireless router, set the router to operate in dual band (2.4 GHz and 5 GHz) mode. If your router uses a single network name (SSID) for both the 2.4 GHz and 5 GHz band, give each band its own network name (SSID) instead, such as Home Network 2.4 GHz and Home Network 5 GHz. See your router documentation or contact your internet service provider for instructions.

Uninstall Your Product Software
Cannot Print Over a Network

If you cannot print over a network, try these solutions:

• Make sure that your product is turned on.
• Make sure you install your product’s network software as described in your product documentation.
• Print a network status sheet and verify that the network settings are correct. If the network status is **Disconnected**, check any cable connections and turn your product off and then on again.
• If you are using TCP/IP, make sure the product’s IP address is set correctly for your network. If your network does not assign IP addresses using DHCP, set the IP address manually.
• Make sure your computer and product are both using the same wireless network.
• If network printing is slow, print a network status sheet and check the signal strength. If it is poor, place your product closer to your router or access point. Avoid placing your product near a microwave oven, 2.4 GHz cordless phone, or large metal object, such as a filing cabinet.

**Note:** If you are using a 5 GHz wireless router, set the router to operate in dual band (2.4 GHz and 5 GHz) mode. If your router uses a single network name (SSID) for both the 2.4 GHz and 5 GHz band, give each band its own network name (SSID) instead, such as Home Network 2.4 GHz and Home Network 5 GHz. See your router documentation or contact your internet service provider for instructions.

• Check to see if your wireless router or access point has an enabled Privacy Separator function that is preventing printing from a device over the network. See your router or access point documentation for instructions on disabling the Privacy Separator function.
• If you are connecting the product via Wi-Fi Protected Setup (WPS) and the light on your product is not solid green, make sure you press the **Wi-Fi** button on the product within 2 minutes of pressing the WPS button on your router. Hold down the button on the product for 3 seconds.

Wi-Fi Networking
Cannot Scan Over a Network

If you cannot start Epson Scan for scanning over a network, try these solutions:

• If you cannot scan from your product control panel, make sure you restarted your computer after installing the product software. Make sure the Event Manager program is not being blocked by your firewall or security software.

  **Note:** If you are using a 5 GHz wireless router, set the router to operate in dual band (2.4 GHz and 5 GHz) mode. If your router uses a single network name (SSID) for both the 2.4 GHz and 5 GHz band, give each band its own network name (SSID) instead, such as Home Network 2.4 GHz and Home Network 5 GHz. See your router documentation or contact your internet service provider for instructions.

• If you are scanning a large original at a high resolution, a network communication error may occur. Try scanning again at a lower resolution.

• If network communication was interrupted while starting Epson Scan, exit Epson Scan, wait a few seconds, and restart it. If Epson Scan cannot restart, turn off your product, turn it back on, and try restarting Epson Scan again.

• Check the connection setting and test the connection using Epson Scan Settings:
  
  **Windows 10:** Click , select All apps, and select EPSON Scan Settings. Make sure the Connection setting is set to Network, then click the Test button.

  **Windows 8.x:** Navigate to the Apps screen and select EPSON Scan Settings. Make sure the Connection setting is set to Network, then click the Test button.

  **Windows (other versions):** Click or Start > All Programs or Programs > EPSON > EPSON Scan > EPSON Scan Settings. Make sure the Connection setting is set to Network, then click the Test button.

  **OS X:** Open the Applications folder, click Epson Software, and click EPSON Scan Settings. Make sure the Connection setting is set to Network, then click the Test button.

• Make sure the option selected as the Timeout Setting in the Epson Scan Settings program is long enough to complete scanning over a network.

• You may need to disable the firewall and any anti-virus software on your wireless router or access point.

  **Note:** With OS X, in addition to scanning with Image Capture, you can download and install Epson Scan scanning software. Epson Scan provides additional image adjustment and photo correction features for
enhancing scanned images, and provides an interface for TWAIN-compliant OCR scanning software. To
download Epson Scan, visit Epson's driver download site (U.S. downloads or Canadian downloads).

Solving Paper Problems
Check these sections if you have problems using paper with your product.
Paper Feeding Problems

If you have problems feeding paper, try these solutions:

- Make sure the paper cassette is inserted all the way in the printer.
- If paper does not feed correctly, remove and reload it in the cassette and adjust the edge guides. Make sure the paper stack is not above the tab on the edge guides inside the cassette.
- If multiple pages feed at once, remove the paper, fan the edges to separate the sheets, and reload it.
- Do not load more than the recommended number of sheets.
- Make sure your paper meets the specifications for your product.
- If paper jams when you print on both sides of the paper, try loading fewer sheets.
- For best results, follow these guidelines:
  - Use new, smooth, high-quality paper that is not curled, creased, old, too thin, or too thick.
  - Load paper in the cassette printable side down.
  - Follow any special loading instructions that came with the paper.

Paper Jam Problems Inside the Product

If paper has jammed inside the product, follow the steps here to clear the jam.

1. Cancel the print job, if necessary.
2. Lift the scanner unit.

**Caution:** Do not touch the flat white cable inside the printer. Do not lift the scanner unit while the document cover is open.
3. Remove any paper inside, including torn pieces.

4. Close the scanner unit.

5. Follow the prompts on the LCD screen to clear any error messages. If you still see a paper jam message, check the other paper jam solutions.

**Parent topic:** Solving Paper Problems

**Related references**

- Paper Jam Problems in the Paper Cassette

### Paper Jam Problems in the Duplexer (Rear Cover)

If paper has jammed in the duplexer (rear cover), follow the steps here to clear the jam.
1. Cancel the print job, if necessary.
2. Press the tabs and remove the duplexer.
3. Carefully remove any jammed paper.

**Note:** Do not touch the paper rollers.

4. Remove any jammed paper from the duplexer.
5. Open the duplexer cover, and carefully remove any jammed paper stuck inside.

6. Reattach the duplexer.
7. Follow the prompts on the LCD screen to clear any error messages. If you still see a paper jam message, check the other paper jam solutions.

**Parent topic:** Solving Paper Problems

**Related references**
- Paper Jam Problems Inside the Product

- Document Jams in the Automatic Document Feeder

**Document Jams in the Automatic Document Feeder**

If you have problems with document jams in the automatic document feeder (ADF), follow the steps here to clear the jam.

1. Cancel the print job, if necessary.
2. Remove your originals from the ADF.
3. Open the ADF cover.

![Diagram of ADF cover being opened](image)

**Caution:** Make sure you open the ADF cover before removing any jammed pages. Otherwise the product may be damaged.
4. Carefully remove any jammed paper.

5. Close the ADF cover.
6. Open the document cover.
7. Carefully remove any jammed paper in the direction shown.

8. Close the document cover.
9. Raise the ADF input tray and carefully remove any jammed pages.

![Image of ADF input tray]

10. Lower the ADF input tray to its original position.
11. Reload your originals.

**Caution:** Make sure you do not load the ADF beyond its capacity for your paper size. Also make sure your originals are not bent, folded, or curled and do not have tape, staples, or other materials that could obstruct the feeder.

12. Follow the prompts on the LCD screen to clear any error messages. If you still see a paper jam message, check the other paper jam solutions.

Solving Problems Printing from a Computer

Check these sections if you have problems while printing from your computer.

Note: When printing using AirPrint, the available print settings are different from those covered in this manual. See the Apple website for details.

Nothing Prints
Product Icon Does Not Appear in Windows Taskbar
Error After Cartridge Replacement
Printing is Slow

Parent topic: Solving Problems
Nothing Prints

If you have sent a print job and nothing prints, try these solutions:

• Make sure your product is turned on.
• Make sure any interface cables are connected securely at both ends.
• If you connected your product to a USB hub, make sure it is a first-tier hub. If it still does not print, connect your product directly to your computer instead of the hub.
• Run a product check to see if a test page prints. If the test page prints, check to see if your product software is installed correctly.
• In Windows, make sure your product is selected as the default printer.
• In Windows, delete all jobs from the Windows Spooler. Click Print Queue on the Maintenance tab in the printer settings window, and cancel and stalled print jobs.

Parent topic: Solving Problems Printing from a Computer

Related tasks
Running a Product Check

Product Icon Does Not Appear in Windows Taskbar

If you do not see your product icon in the Windows taskbar, first try restarting your computer. If that does not work, try this solution:

1. Do one of the following:
   • **Windows 10**: Right-click and select Control Panel > Hardware and Sound > Devices and Printers.
   • **Windows 8.x**: Navigate to the Apps screen and select Control Panel > Hardware and Sound > Devices and Printers.
   • **Windows 7**: Click and select Devices and Printers.
   • **Windows Vista**: Click , select Control Panel, and click Printer under Hardware and Sound.
   • **Windows XP**: Click Start and select Printers and Faxes. (Or open the Control Panel, select Printers and Other Hardware, if necessary, and Printers and Faxes.)

2. Right-click your product name, select Printing Preferences, and select your product name again if necessary.
3. Click the Maintenance tab.
4. Click the **Monitoring Preferences** button.
5. Click the checkbox for the option that adds the shortcut icon to the taskbar.
6. Click **OK** to close the open program windows.

**Parent topic:** Solving Problems Printing from a Computer

### Error After Cartridge Replacement

If you see an error light or error message after you replace an ink cartridge, follow these steps:

1. Make sure the print head is in the ink cartridge replacement position. (The ink cartridge holder should be beneath the cutout in the product case.)

   **Note:** If the print head is not in the ink cartridge replacement position, follow the instructions on replacing an ink cartridge in this manual to move it.

2. Remove and reinsert the replaced ink cartridge, making sure to push it all the way into its slot.
3. Complete the ink cartridge installation steps.

Removing and Installing Ink Cartridges

### Printing is Slow

If printing becomes slow, try these solutions:

- Make sure your system meets the requirements for your operating system. If you are printing a high-resolution image, you may need more than the minimum requirements. If necessary, increase your system's memory.
- If you are using Windows 7, close the **Devices and Printers** window before you print.
- If you are using OS X, make sure you download and install the Epson printer driver.
- Make sure **Quiet Mode** is turned off.
- Clear space on your hard drive or run a defragmentation utility to free up existing space.
- Close any programs you are not using when you print.
- If your product is connected to a USB hub, connect it directly to your computer instead.
• If printing becomes slower after printing continuously for a long time, the product may have automatically slowed down to protect the print mechanism from overheating or becoming damaged. Let the product rest with the power on for 30 minutes, then try printing again.

For the fastest printing, select the following settings in your product software:

• Make sure the paper type setting matches the type of paper you loaded.
• Turn on any high speed settings in your product software.
• Select a lower print quality setting.

**Windows**: Click the **Maintenance** or **Utility** tab, select **Extended Settings** or **Speed and Progress**, and select the following settings:

• **High Speed Copies**
• **Always Spool RAW Datatype**
• **Page Rendering Mode**
• **Print as Bitmap**

**Solving Page Layout and Content Problems**

Check these sections if you have problems with the layout or content of your printed pages.

**Note**: When printing using AirPrint, the available print settings are different from those covered in this manual. See the Apple website for details.

- Inverted Image
- Too Many Copies Print
- Blank Pages Print
Incorrect Margins on Printout
Border Appears on Borderless Prints
Incorrect Characters Print
Incorrect Image Size or Position
Slanted Printout

Parent topic: Solving Problems

Inverted Image
If your printed image is inverted unexpectedly, try these solutions:
• Turn off any mirror or inversion settings in your printing application.
• Turn off the Mirror Image, Flip horizontally, or Reverse page orientation settings in your printer software. (This option has different names, depending on your operating system version.)

Note: Leave these options turned on when you print on Epson Iron-on Cool Peel Transfer paper, if available for your product.

Blank Pages Print
If blank pages print unexpectedly, try these solutions:
• Make sure you selected the correct paper size settings in your printing program and printer software.
• If a blank page exists in a document you are printing and you want to skip printing it, select the **Skip Blank Page** setting in your printer software.

• Run a print head nozzle check to see if any of the nozzles are clogged. Then clean the print head, if necessary.

• Make sure your product is selected as the printer in your printing program.

**Parent topic:** Solving Page Layout and Content Problems

### Incorrect Margins on Printout

If your printed page has incorrect margins, try these solutions:

• Make sure you selected the correct paper size settings in your printing program and printer software.

• Make sure you selected the correct margins for your paper size in your printing program.

• Make sure your paper is positioned correctly for feeding into the printer.

You can use the preview option in your printer software to check your margins before you print.

### Border Appears on Borderless Prints

If you see a border on borderless prints, try these solutions:

• Make sure you are printing on a compatible borderless paper type and size.
**Note:** For custom paper sizes, make sure you select a supported borderless page width.

- **Windows:** Make sure you selected the **Borderless** setting in your printer software.
- **OS X:** Make sure you selected the **Borderless** checkbox or a paper size with a **Borderless** option in your printer software.
- Adjust the **Expansion** setting to adjust the amount of image expansion on the edges of borderless prints.
- Make sure the image size and the paper size are set correctly; if the image is small, the enlargement may not be enough to cover the paper.
- Access the Extended Settings (Windows) or Printing Preferences (OS X) and select **Remove White Borders**.

**Incorrect Characters Print**

If incorrect characters appear in your prints, try these solutions before reprinting:

- Make sure any cables are securely connected at both ends.
- In Windows, delete all jobs from the Windows Spooler. Click **Print Queue** on the Maintenance tab in the printer settings window, and cancel any stalled print jobs.
- If your product is connected to a USB hub, connect it directly to your computer instead.
- If your computer entered sleep mode the last time you printed, the next print job after your computer exits sleep mode may contain garbled characters. Print your document again.
- If incorrect characters still appear in your prints, try connecting your product using a different cable.

**Parent topic:** Solving Page Layout and Content Problems
Incorrect Image Size or Position

If your printed image is the wrong size or in the wrong position, try these solutions:

- Make sure you selected the correct paper size and layout settings in your printing program and printer software.
- Make sure your paper is positioned correctly for feeding into the printer.

You can use the preview option in your printer software to check your margins before you print.

Slanted Printout

If your printouts are slanted, try these solutions:

- Slide the edge guides against the edges of the paper.
- Select a higher print quality setting in your printer software.
- Turn off any high speed settings in your product software.
- Align the print head.
- Make sure the product is not printing while tilted or at an angle.

Solving Print Quality Problems

Check these sections if your printouts have problems with print quality, but your image looks fine on your computer screen.
Note: When printing using AirPrint, the available print settings are different from those covered in this manual. See the Apple website for details.

White or Dark Lines in Printout
Blurry or Smeared Printout
Faint Printout or Printout Has Gaps
Grainy Printout
Incorrect Colors

Parent topic: Solving Problems

White or Dark Lines in Printout
If you notice white or dark lines in your prints (also called banding), try these solutions before you reprint:

• Run a nozzle check to see if any of the print head nozzles are clogged. Then clean the print head, if necessary.
• Make sure the paper type setting matches the type of paper you loaded.
• Make sure you loaded the printable side of the paper correctly for your product.
• Turn off any high speed settings in your product software.
• Align the print head.
• You may need to replace the ink cartridges.

Loading Paper
Blurry or Smeared Printout

If your printouts are blurry or smeared, try these solutions:
- Make sure your paper is not damp, curled, old, or loaded incorrectly in your product.
- Use a support sheet with special paper, or load special paper one sheet at a time.
- Make sure your paper meets the specifications for your product.
- Use Epson papers to ensure proper saturation and absorption of genuine Epson inks.
- Make sure the paper type setting in your product software matches the type of paper you loaded.
- Make sure you loaded the printable side of the paper correctly for your product.
- Remove each sheet from the output tray as it is printed.
- Avoid handling printouts on glossy paper right after printing to allow the ink to set.
- Turn off any high speed settings in your product software.
- If you print on both sides of a sheet of paper, smudges may appear on the reverse side of heavily saturated or dark images. If one side of a sheet will contain a lighter image or text, print that side first.
- Run a nozzle check to see if any of the print head nozzles are clogged. Then clean the print head, if necessary.
- Align the print head.
- Clean the paper path.

Note: Your product will not operate properly while tilted at an angle. Place it on a flat, stable surface that extends beyond the base of the product in all directions.

Grainy Printout

If your printouts are grainy, try these solutions:

• Make sure you loaded the printable side of the paper correctly for your product.
• Select a higher print quality setting and turn off any high speed settings in your product software.
• Run a nozzle check to see if any of the print head nozzles are clogged. Then clean the print head, if necessary.
• Align the print head.
• You may need to increase the image resolution or print a smaller size; see your software documentation.

**Note:** Images from the Internet may be low resolution and not result in a high quality printout.

• If you enlarged the image in an image-editing program, you need to increase the resolution setting to retain a high image quality. Increase the resolution by the same amount you increased the image size. For example, if the resolution is 300 dpi (dots per inch) and you will double the image size later, change the resolution setting to 600 dpi.

**Note:** Higher resolution settings result in larger file sizes, which take longer to process and print. Consider the limitations of your computer system when selecting a resolution, and select the lowest possible resolution that produces acceptable quality to keep file sizes manageable.

Incorrect Colors

If your printouts have incorrect colors, try these solutions:

- Make sure the paper type setting matches the paper you loaded.
- Make sure the Black/Grayscale or Grayscale setting is not selected in your printer software.
- If you selected Standard-Vivid (Windows) or Normal-Vivid (OS X) as the quality setting in the printer software, try selecting Standard (Windows) or Normal (OS X) instead.
- Run a nozzle check to see if any of the print head nozzles are clogged. Then clean the print head, if necessary.
- The ink cartridges may be old or low on ink, and you may need to replace them.
- After you print, the colors in your printout need time to set as the ink dries. During this time, the colors may look different than you expect. To speed up drying time, do not stack your printouts on top of each other.
- Your printed colors can never exactly match your on-screen colors. However, you can use a color management system to get as close as possible. Try using the color management options in your printer software.
- For best results, use genuine Epson ink and paper.

Solving Scanning Problems

Check these solutions if you have problems scanning with your product.
Scanning Software Does Not Operate Correctly
Cannot Start Epson Scan

Parent topic: Solving Problems

Scanning Software Does Not Operate Correctly
If your scanning software does not operate correctly, try these solutions:

• Make sure your computer has adequate memory and meets the system requirements for your operating system.
• Make sure your computer is not running in a power-saving mode, such as sleep or standby. If so, wake your system and restart your scanning software.
• If you upgraded your operating system but did not reinstall your scanning software, try reinstalling it.

Note: With OS X, in addition to scanning with Image Capture, you can download and install Epson Scan scanning software. Epson Scan provides additional image adjustment and photo correction features for enhancing scanned images, and provides an interface for TWAIN-compliant OCR scanning software. To download Epson Scan, visit Epson's driver download site (U.S. downloads or Canadian downloads).

Scanning with OS X Using Image Capture

Cannot Start Epson Scan
If you cannot start Epson Scan, try these solutions:

• Make sure your product is turned on and any interface cables are securely connected at both ends.
• Make sure Epson Scan is selected in your scanning program.
• Make sure your computer is not running in a power-saving mode, such as sleep or standby. If so, wake your system and restart Epson Scan.
• Check the connection setting and test the connection using Epson Scan Settings:
  
  **Windows 10:** Click and select **All apps**. Select **EPSON**, then select **EPSON Scan Settings**. Make sure the correct **Connection** setting is selected, then click the **Test** button.
  
  **Windows 8.x:** Navigate to the **Apps** screen and select **EPSON Scan Settings**. Make sure the correct **Connection** setting is selected, then click the **Test** button.
  
  **Windows (other versions):** Click or Start > All Programs or Programs > EPSON > EPSON Scan > EPSON Scan Settings. Make sure the correct **Connection** setting is selected, then click the **Test** button.
  
  **OS X:** Open the **Applications** folder, click **Epson Software**, and click **EPSON Scan Settings**. Make sure the correct **Connection** setting is selected, then click the **Test** button.
  
• Make sure you do not have multiple versions of Epson Scan installed. If you do, uninstall both versions and install one version.

• If you upgraded your operating system but did not reinstall Epson Scan, try reinstalling it.

  **Note:** With OS X, in addition to scanning with Image Capture, you can download and install Epson Scan scanning software. Epson Scan provides additional image adjustment and photo correction features for enhancing scanned images, and provides an interface for TWAIN-compliant OCR scanning software. To download Epson Scan, visit Epson's driver download site (U.S. downloads or Canadian downloads).

**Solving Scanned Image Quality Problems**

Check these sections if a scanned image on your computer screen has a quality problem.

- Image Consists of a Few Dots Only
- Line of Dots Appears in All Scanned Images
- Straight Lines in an Image Appear Crooked
- Image is Distorted or Blurry
- Image Colors are Patchy at the Edges
- Image is Too Dark
- Back of Original Image Appears in Scanned Image
Ripple Patterns Appear in an Image
Scanned Image Colors Do Not Match Original Colors
Scan Area is Not Adjustable in Thumbnail Preview
Scanned Image Edges are Cropped

**Parent topic:** Solving Problems

### Image Consists of a Few Dots Only

If your scanned image consists only of a few dots, try these solutions:

- Make sure you placed your original for scanning facing the correct way.
- If you are scanning using the Epson Scan **Black & White** setting, adjust the **Threshold** setting and scan again.

**Parent topic:** Solving Scanned Image Quality Problems

**Related references**
- Available Image Adjustments - Office Mode

- Placing Originals on the Product

### Line of Dots Appears in All Scanned Images

If a line of dots appears in all your scanned images, clean the scanner glass with a soft, dry, lint-free cloth or use a small amount of glass cleaner on the cloth, if necessary. Paper towels are not recommended.

**Caution:** Do not spray glass cleaner directly on the scanner glass.

**Parent topic:** Solving Scanned Image Quality Problems

**Related tasks**
- Cleaning Your Product

### Straight Lines in an Image Appear Crooked

If straight lines in an original appear crooked in a scanned image, make sure to place your original straight when you scan it.

**Parent topic:** Solving Scanned Image Quality Problems
Image is Distorted or Blurry
If a scanned image appears distorted or blurry, try these solutions:
- Make sure your original is not wrinkled or warped. This may prevent the original from laying flat on the scanner glass.
- Do not move your original or your product during scanning.
- Your product will not operate properly while tilted at an angle. Place your product on a flat, stable surface that extends beyond its base in all directions.
- Adjust these Epson Scan settings (if available) and try scanning again:
  - Select the **Unsharp Mask** setting.
  - Adjust the **Auto Exposure** setting.
  - Increase the **Resolution** setting.

Parent topic: Solving Scanned Image Quality Problems
Related topics
Selecting Epson Scan Settings

Image Colors are Patchy at the Edges
If you are scanning a thick or warped original, cover its edges with paper to block external light as you scan it.

Parent topic: Solving Scanned Image Quality Problems

Image is Too Dark
If your scanned image is too dark, try these solutions:
- Adjust these Epson Scan settings (if available) and try scanning again:
  - **Auto Exposure**
  - **Brightness**
  - **Histogram Adjustment**
- Check the brightness and contrast settings of your computer monitor.

Parent topic: Solving Scanned Image Quality Problems
Related topics
Selecting Epson Scan Settings

Back of Original Image Appears in Scanned Image
If an image from the back of a thin original appears in your scanned image, place a piece of black paper on the back of the original and scan it again.

Parent topic: Solving Scanned Image Quality Problems

Ripple Patterns Appear in an Image
You may see a ripple pattern (called a moiré) in scanned images of printed documents. This is caused by interference from differing pitches in the scanner's screen and your original's halftone screen. To reduce this effect, adjust these Epson Scan settings (if available) and try scanning again:

- Select the **Descreening** setting.
- Select a lower **Resolution** setting.

Parent topic: Solving Scanned Image Quality Problems
Related topics
Selecting Epson Scan Settings

Scanned Image Colors Do Not Match Original Colors
Printed colors can never exactly match the colors on your computer monitor because printers and monitors use different color systems: monitors use RGB (red, green, and blue) and printers typically use CMYK (cyan, magenta, yellow, and black).

Check the color matching and color management capabilities of your computer, display adapter, and the software you are using to see if they are affecting the palette of colors you see on your screen.

To adjust the colors in your scanned image, adjust these Epson Scan settings (if available) and try scanning again:

- Change the **Image Type** setting and experiment with different combinations of the next settings.
- Adjust the **Tone Correction** setting.
- Adjust the **Auto Exposure** setting.

Parent topic: Solving Scanned Image Quality Problems
Related topics
Selecting Epson Scan Settings
Scan Area is Not Adjustable in Thumbnail Preview

If you cannot adjust the scan area while viewing a Thumbnail preview in Epson Scan, try these solutions:

• Create a scan area by drawing a marquee on your preview image and adjusting it as necessary.
• Switch to Normal preview mode, if available, and preview your image again.

Solving Faxing Problems

Check these solutions if you have problems faxing with your product.

Cannot Send or Receive Faxes
Cannot Receive Faxes with a Telephone Connected to Your Product

Parent topic: Solving Problems

Cannot Send or Receive Faxes

If you cannot send or receive faxes, try these solutions:

• Make sure the recipient's fax machine is turned on and working.
• Make sure paper is loaded correctly in your product.
• Make sure you have set up your header information and have not blocked your caller ID. Otherwise, your faxes might be rejected by the recipient's fax machine.
• Make sure Auto Answer mode is turned on to receive faxes automatically. Check your product control panel to see if this mode is turned on.
• Make sure Receive Mode is set to Auto so you can receive faxes automatically.
• Check that the cable connecting your telephone wall jack to your product's LINE port is secure.
• Print a fax connection report using your product control panel or fax software to help diagnose the problem.
• Verify that the telephone wall jack works by connecting a phone to it and testing it.
• If there is no dial tone and you connected the product to a PBX (Private Branch Exchange) phone line or Terminal Adapter, change the Line Type setting to PBX. If you still cannot send a fax, turn off the turn off the product's dial tone detection setting. (Turning off the dial tone setting may cause the product to drop the first digit of a fax number.)
• If you connected your product to a DSL phone line, you must connect a DSL filter to the phone jack to enable faxing over the line. Contact your DSL provider for the necessary filter.
• If your telephone line has static, turn off your product's error correction mode fax communication setting and try faxing again.
• Try lowering your product's fax speed setting.
• Make sure the error correction mode (ECM) setting is turned on if you are trying to send or receive a color fax.
• If your telephone line uses call waiting and you have trouble receiving faxes, turn off call waiting to prevent disruption of incoming faxes.
• If you have subscribed to a call forwarding service, the product may not be able to receive faxes. Contact your service provider for assistance.

**Note:** If your product is connected to a VoIP (Voice over Internet Protocol) phone line, keep in mind that fax machines are designed to work over analog phone lines. Epson cannot guarantee that fax transmission will work when using VoIP.

If your phone line includes voice mail answering services, calls or faxes may be inadvertently received by your voice mail service.

**Parent topic:** Solving Faxing Problems

**Related tasks**

- Connecting a Telephone or Answering Machine

Uninstall Your Product Software

If you have a problem that requires you to uninstall and re-install your software, follow the instructions for your operating system.

Uninstalling Product Software - Windows
Uninstalling Product Software - OS X

Parent topic: Solving Problems

Uninstalling Product Software - Windows

You can uninstall and then re-install your product software to solve certain problems.

1. Turn off the product.
2. Disconnect any interface cables.
3. Do one of the following:
   - **Windows 10**: Right click and select Control Panel > Programs > Programs and Features. Select the uninstall option for your Epson product, then select Uninstall/Change.

     **Note**: If you see a User Account Control window, click Yes or Continue.

     Select your product again, if necessary, then select OK, and click Yes to confirm the uninstallation.

   - **Windows 8.x**: Navigate to the Apps screen and select Control Panel > Programs > Programs and Features. Select the uninstall option for your Epson product, then select Uninstall/Change.

     **Note**: If you see a User Account Control window, click Yes or Continue.

     Select your product again, if necessary, then select OK, and click Yes to confirm the uninstallation.

   - **Windows (other versions)**: Click or Start, and select All Programs or Programs. Select EPSON, select your product, then click EPSON Printer Software Uninstall.

     **Note**: If you see a User Account Control window, click Yes or Continue.

     In the next window, select your product and click OK. Then follow any on-screen instructions.

4. Do one of the following to uninstall Epson Event Manager, then follow any on-screen instructions:
   - **Windows 10**: Select Epson Event Manager and click Uninstall.

   - **Windows 8.x**: Select Epson Event Manager and click Uninstall.

   - **Windows 7/Windows Vista**: Open the Windows Control Panel utility. Select Programs and Features. (In Classic view, select Programs and click Uninstall a program.) Select Epson Event Manager and click Uninstall/Change.

   - **Windows XP**: Open the Windows Control Panel utility. Double-click Add or Remove Programs. Select Epson Event Manager and click Change/Remove.

5. Do one of the following to uninstall Epson Scan, then follow any on-screen instructions:
   - **Windows 10**: Select EPSON Scan and click Uninstall.

   - **Windows 8.x/Windows 7/Windows Vista**: Select EPSON Scan and click Uninstall/Change.

   - **Windows XP**: Select EPSON Scan and click Change/Remove.
6. Restart your computer, then see the Start Here sheet to re-install your software.

Note: If you find that re-installing your product software does not solve a problem, contact Epson.

Parent topic: Uninstall Your Product Software

Uninstalling Product Software - OS X

In most cases, you do not need to uninstall your product software before re-installing it. However, you can download the Uninstaller utility from the Epson support website to uninstall your product software as described here.

Note: If you find that re-installing your product software does not solve a problem, contact Epson.

1. To download the Uninstaller utility, visit the Epson download site (U.S. downloads or Canadian downloads).
2. Follow the instructions on the screen to install the Uninstaller utility.
3. Quit all applications currently running on your Mac.
4. Double-click the Uninstaller icon.
5. Select the checkbox for each software program you want to uninstall.
6. Click Uninstall.
7. Follow the on-screen instructions to uninstall the software.
8. Reinstall your product software.

Note: If you uninstall the printer driver and your product name remains in the Print & Fax, Print & Scan, or Printers & Scanners window, select your product name and click the – (remove) icon to remove it.

Parent topic: Uninstall Your Product Software

Where to Get Help

If you need to contact Epson for technical support services, use the following support options.

Internet Support

Visit Epson’s support website at epson.com/support (U.S.) or epson.ca/support (Canada) for solutions to common problems. You can download drivers and documentation, get FAQs and troubleshooting advice, or e-mail Epson with your questions.
Speak to a Support Representative

Before you call Epson for support, please have the following information ready:

- Product name
- Product serial number (located on a label on the product)
- Proof of purchase (such as a store receipt) and date of purchase
- Computer configuration
- Description of the problem

Then call:

- U.S.: (562) 276-4382, 6 AM to 8 PM, Pacific Time, Monday through Friday, and 7 AM to 4 PM, Pacific Time, Saturday
- Canada: (905) 709-3839, 6 AM to 8 PM, Pacific Time, Monday through Friday, and 7 AM to 4 PM, Pacific Time, Saturday

Days and hours of support are subject to change without notice. Toll or long distance charges may apply.

Purchase Supplies and Accessories

You can purchase genuine Epson ink and paper at epson.com/ink3 (U.S. sales) or epson.ca (Canadian sales). You can also purchase supplies from an Epson authorized reseller. To find the nearest one, call 800-GO-EPSON (800-463-7766).

### Ink Cartridge Specifications

**Note:** This product uses only genuine Epson-brand cartridges. Other brands of ink cartridges and ink supplies are not compatible and, even if described as compatible, may not function properly.

The cartridges included with the printer are designed for printer setup and not for resale. After some ink is used for charging, the rest is available for printing. Yields vary considerably based on images printed, print settings, paper type, frequency of use, and temperature. For print quality, a variable amount of ink remains in the cartridge after the "replace cartridge" indicator comes on.

**Color**
- Cyan, Magenta, Yellow, Black
### Cartridge life
- **Opened package:** 6 months
- **Unopened package:** do not use if the date on the package has expired

### Temperature
- **Storage:** –22 to 104 °F (–30 to 40 °C)
- 1 month at 104 °F (40 °C)
- **Ink freezes at:** 3.2 °F (–16 °C)
- **Ink thaws and is usable after:** 3 hours at 77 °F (25 °C)

**Note:** For best printing results, use up a cartridge within 6 months of opening the package.

Safety and Approvals Specifications

United States
Safety: UL60950-1
EMC: FCC part 15 Subpart B class B

Canada
Safety: CAN/CSA C22.2 No. 60950-1
EMC: CAN/CSA-CEI/IEC CISPR 22 Class B

This equipment contains the following wireless module:

- Manufacturer: Askey Computer Corporation
- Type: WLU6320-D69 (RoHS)

This product conforms to Part 15 of FCC Rules and RSS-210 of the IC Rules. Epson cannot accept responsibility for any failure to satisfy the protection requirements resulting from a non-recommended modification of the product. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation of the device.

To prevent radio interference to the licensed service, this device is intended to be operated indoors and away from windows to provide maximum shielding. Equipment (or its transmit antenna) that is installed outdoors is subject to licensing.

This equipment complies with FCC/IC radiation exposure limits set forth for an uncontrolled environment and meets the FCC radio frequency (RF) Exposure Guidelines in Supplement C to OET65 and RSS-102 of the IC radio frequency (RF) Exposure rules. This equipment should be installed and operated so that the radiator is kept at least 7.9 inches (20 cm) or more away from a person's body (excluding extremities: hands, wrists, feet and ankles).

Important Safety Instructions

Before using your Epson product, read and follow these safety instructions.

General Product Safety Instructions
Ink Cartridge Safety Instructions
Wireless Connection Safety Instructions
Telephone Equipment Safety Instructions
LCD Screen Safety Instructions

Parent topic: Notices

General Product Safety Instructions

- Be sure to follow all warnings and instructions marked on the product.
- Use only the type of power source indicated on the product's label.
- Use only the power cord that comes with the product. Use of another cord may cause fires or shock. Do not use the cord with any other equipment.
- Place the product near a wall outlet where the plug can be easily unplugged.
- Avoid plugging the product into an outlet on the same circuit as a photo copier or air control system that regularly switches on and off, or on an outlet controlled by a wall switch or timer.
- Do not let the power cord become damaged or frayed. Place it to avoid abrasions, cuts, fraying, crimping, and kinking. Do not place objects on top of it and do not allow it to be stepped on or run over. Be careful to keep the cord straight at each end.
• If you use an extension cord with the product, make sure the total ampere rating of the devices plugged into the extension cord does not exceed the cord's ampere rating. Also, make sure the total ampere rating of all devices plugged into the wall outlet does not exceed the wall outlet's ampere rating.

• Always turn off the product using the power button, and wait until the power light stops flashing before unplugging the product or cutting off power to the electrical outlet.

• If you will not be using the product for a long period, unplug the power cord from the electrical outlet.

• Place the product on a flat, stable surface that extends beyond its base in all directions. It will not operate properly if it is tilted or at an angle.

• Allow space behind the product for the cables, and space above the product so that you can fully raise the document cover.

• Leave enough space in front of the product for the paper to be fully ejected.

• Avoid locations that are subject to rapid changes in heat or humidity, shocks or vibrations, or dust.

• Do not place or store the product outdoors.

• Do not place the product near excessive heat sources or in direct sunlight.

• Leave enough room around the product for sufficient ventilation. Do not block or cover openings in the case or insert objects through the slots.

• Keep the product away from potential sources of electromagnetic interference, such as loudspeakers or the base units of cordless telephones.

• When connecting the product to a computer or other device with a cable, ensure the correct orientation of the connectors. Each connector has only one correct orientation. Inserting a connector in the wrong orientation may damage both devices connected by the cable.

• Do not touch the flat white cable inside the product.

• Do not move the print head by hand; this may damage the product.

• Do not spill liquid on the product or use the product with wet hands.

• Do not use aerosol products that contain flammable gases inside or around the product. Doing so may cause fire.

• Do not press too hard on the document table when placing originals.

• Do not open the scanner section while the product is copying, printing, scanning, or performing any other functions.

• Be careful not to trap your fingers when closing the document cover or scanner.

• Except as specifically explained in your documentation, do not attempt to service the product yourself.
• Unplug the product and refer servicing to qualified service personnel under the following conditions: if the power cord or plug is damaged; if liquid has entered the product; if the product has been dropped or the case damaged; if the product does not operate normally or exhibits a distinct change in performance. Adjust only those controls that are covered by the operating instructions.

• Leave the ink cartridges installed. Removing the cartridges can dehydrate the print head and may prevent the product from printing.

• Before transporting the product, make sure that the print head is in the home (far right) position and the ink cartridges are in place.

• When storing or transporting the product, do not tilt it, stand it on its side, or turn it upside down; otherwise ink may leak.

Parent topic: Important Safety Instructions

Ink Cartridge Safety Instructions

• Keep ink cartridges out of the reach of children and do not drink the ink.

• Be careful when you handle used ink cartridges; there may be ink remaining around the ink supply port. If ink gets on your skin, wash it off with soap and water. If it gets in your eyes, flush them immediately with water.

• Do not put your hand inside the product or touch any cartridges during printing.

• Install a new ink cartridge immediately after removing an expended one. Leaving cartridges uninstalled can dry out the print head and may prevent the product from printing.

• Do not remove or tear the label on the cartridge; this can cause leakage.

• Do not remove the transparent seal from the bottom of the cartridge. This may cause the cartridge to become unusable.

• Do not break the hooks on the side of the cartridge when removing it from the packaging.

• Do not touch the green IC chip on the side of the cartridge. This may prevent normal operation.

• Do not shake cartridges after opening their packages; this can cause them to leak.

• If you remove an ink cartridge for later use, protect the ink supply area from dirt and dust and store it in the same environment as the product. Note that there is a valve in the ink supply port, making covers or plugs unnecessary, but care is needed to prevent the ink from staining items that the cartridge touches. Do not touch the ink cartridge ink supply port or surrounding area.

• Use an ink cartridge before the date printed on its package.

• Do not dismantle an ink cartridge. This could damage the print head.

• Store ink cartridges in a cool, dark place.
• After bringing an ink cartridge inside from a cold storage site, allow it to warm up at room temperature for at least three hours before using it.

• Store ink cartridges with their labels facing upward. Do not store cartridges upside down.

Wireless Connection Safety Instructions

Radio waves from this product may adversely affect the operation of medical equipment or automatically controlled devices, such as pacemakers, automatic doors or fire alarms. When using this product near such devices or inside a medical facility, follow the directions from authorized staff members at the facility, and follow all posted warnings and directions on the device to avoid causing an accident.

Parent topic: Important Safety Instructions

Telephone Equipment Safety Instructions

When using telephone equipment, you should always follow basic safety precautions to reduce the risk of fire, electric shock, and personal injury, including the following:

• Do not use the Epson product near water.
• Avoid using a telephone during an electrical storm. There may be a remote risk of electric shock from lightning.
• Do not use a telephone to report a gas leak in the vicinity of the leak.

Caution: To reduce the risk of fire, use only a No. 26 AWG or larger telecommunication line cord.

Parent topic: Important Safety Instructions

LCD Screen Safety Instructions

• Use only a dry, soft cloth to clean the LCD screen. Do not use liquid or chemical cleansers.
• If the LCD screen is damaged, contact Epson. If the liquid crystal solution gets on your hands, wash them thoroughly with soap and water. If the liquid crystal solution gets into your eyes, flush them immediately with water. If discomfort or vision problems remain after a thorough flushing, see a doctor immediately.
• Do not press too hard on the LCD screen.
• Do not use a pointy or sharp object, such as a pen or your fingernail, to operate the LCD screen.

FCC Compliance Statement

For United States Users

This equipment complies with Part 68 of the FCC rules and the requirements adopted by the Administrative Council for Terminal Attachments ("ACTA"). On the surface of this equipment is a label that contains, among other information, a product identifier in the format US:AAAEQ##TXXXX. If requested, this number must be provided to the telephone company.

Applicable certification jack Universal Service Order Codes ("USOC") for the equipment: RJ11C.

A plug and jack used to connect this equipment to the premises wiring and telephone network must comply with the applicable FCC Part 68 rules and requirements adopted by the ACTA. A compliant telephone cord and modular plug is provided with this product. It is designed to be connected to a compatible modular jack that is also compliant. See installation instructions for details.

The REN is used to determine the number of devices that may be connected to a telephone line. Excessive RENs on a telephone line may result in the devices not ringing in response to an incoming call. In most but not all areas, the sum of RENs should not exceed five (5.0). To be certain of the number of devices that may be connected to a line, as determined by the total RENs, contact the local telephone company. For products approved after July 23, 2001, the REN for this product is part of the product identifier that has the format US:AAAEQ##TXXXX. The digits represented by ## are the REN without a decimal point (e.g., 03 is a REN of 0.3). For earlier products, the REN is separately shown on the label.

If this equipment causes harm to the telephone network, the telephone company will notify you in advance that temporary discontinuance of service may be required. But if advance notice isn't practical, the telephone company will notify the customer as soon as possible. Also, you will be advised of your right to file a complaint with the FCC if you believe it is necessary.

The telephone company may make changes in its facilities, equipment, operations or procedures that could affect the operation of the equipment. If this happens the telephone company will provide advance notice in order for you to make necessary modifications to maintain uninterrupted service.

If you have problems with this product and require technical or customer support, please visit www.epson.com for more information.

This product is not intended to be repaired by the customer. If you experience trouble connecting this equipment to a telephone line, please contact:

Name: Epson America, Inc.
Address: 3840 Kilroy Airport Way, Long Beach, CA 90806 U.S.A.
Telephone: (562) 981-3840

If the equipment is causing harm to the telephone network, the telephone company may request that you disconnect the equipment until the problem is resolved.
This equipment may not be used on coin service provided by the telephone company. Connection to party line service is subject to state tariffs. Contact the state public utility commission, public service commission or corporation commission for information.

If your home has specially wired alarm equipment connected to the telephone line, ensure the installation of this equipment does not disable your alarm equipment. If you have questions about what will disable alarm equipment, consult your telephone company or a qualified installer.

The Telephone Consumer Protection Act of 1991 makes it unlawful for any person to use a computer or other electronic device, including fax machines, to send any message unless such message clearly contains in a margin at the top or bottom of each transmitted page or on the first page of the transmission, the date and time it is sent and an identification of the business or other entity, or other individual sending the message and the telephone number of the sending machine or such business, other entity, or individual. (The telephone number provided may not be a 900 number or any other number for which charges exceed local or long-distance transmission charges.)

In order to program this information into your fax machine, click the link below for instructions on entering fax header information.

According to the FCC's electrical safety advisory, we recommend that you may install an AC surge arrester in the AC outlet to which this equipment is connected. Telephone companies report that electrical surges, typically lightning transients, are very destructive to customer terminal equipment connected to AC power sources and that this is a major nationwide problem.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio or television reception. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause interference to radio and television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

• Reorient or relocate the receiving antenna.
• Increase the separation between the equipment and receiver.
• Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
• Consult the dealer or an experienced radio/TV technician for help.

WARNING

The connection of a non-shielded equipment interface cable to this equipment will invalidate the FCC Certification or Declaration of this device and may cause interference levels which exceed the limits established by the FCC for this equipment. It is the responsibility of the user to obtain and use a shielded
equipment interface cable with this device. If this equipment has more than one interface connector, do not leave cables connected to unused interfaces. Changes or modifications not expressly approved by the manufacturer could void the user’s authority to operate the equipment.

For Canadian Users
1. This product meets the applicable Innovation, Science and Economic Development Canada technical specifications.
2. The Ringer Equivalence Number indicates the maximum number of devices allowed to be connected to a telephone interface. The termination of an interface may consist of any combination of devices subject only to the requirement that the sum of the RENs of all the devices does not exceed five.

CAN ICES-3(B)/NMB-3(B)

Le présent produit est conforme aux spécifications techniques applicables d’Innovation, Sciences et Développement économique Canada.

L’indice d’équivalence de la sonnerie (IES) sert à indiquer le nombre maximal de dispositifs qui peuvent être raccordés à une interface téléphonique. La terminaison d’une interface peut consister en une combinaison quelconque de dispositifs, à la seule condition que la somme des IES de tous les dispositifs n’excède pas cinq.

CAN ICES-3(B)/NMB-3(B)
