Remote Control Map

This Quick Reference card gives brief instructions on connecting your projector and using common features. For details, see the online User’s Guide.

Note: SDI is available for the Pro L1405U/L1500U/L1505U only.
Turning the Projector On
1. Turn on your computer or image source.
2. Remove the lens cover.
3. Press the 0 On button. After the status light stays blue, the projector is ready.
   **Note:** If the Direct Power On function is enabled, you can turn the projector on without pressing the 0 On button; just plug it in or flip the switch controlling the outlet to which the projector is connected. To turn on this feature, see the online User's Guide.
4. If your image does not appear, see “Switching Between Image Sources” or “Troubleshooting.”

Changing the Language of the Projector Menu
The default language of the projector’s menu system is English, but you can change it as necessary.
1. Press the Menu button to access the projector’s menu system.
2. Select Extended > Language.
3. Select your language.
4. When you’re done, press the Menu button to exit.

Switching Between Image Sources
Press the Search button or one of the source buttons (remote control) or the Source Search button (projector).

Selecting the Lens Type
Make sure the Lens Type setting is correct for the lens you are using.
1. Press the Menu button.
2. Select Extended > Operation > Advanced > Lens Type.
   **Note:** If the Lens Type setting is grayed out, the projector has automatically detected the installed lens and you can skip the remaining steps.
3. Select the lens you are using.
4. When you’re done, press the Menu button to exit.

Changing Screen Type
Set the Screen Type setting to the screen’s aspect ratio.
1. Press the Menu button.
2. Select Extended > Display > Screen > Screen Type.
3. Select the screen’s aspect ratio.
   **Note:** The displayed image should match the screen’s size and shape.

Making Other Image Adjustments
For help on using the projector’s features to improve the image quality, see the online User’s Guide. You can also view information on how to adjust the image color, position, and edges (Edge Blending) when projecting from multiple projectors to create one seamless widescreen image.

Tuning the Projector Off
Press the 0 Standby button to turn the projector off. If you see a confirmation message, press the 0 Standby button again.

**Note:** If the Direct Power Off function is enabled, you can unplug the projector or flip the switch controlling the outlet to which the projector is connected instead. To turn on this feature, see the online User’s Guide.

With Epson’s Instant Off® technology, you don’t have to wait for the projector to cool down; just turn it off or unplug it when you’re done.

Troubleshooting
If you see a blank screen or the message No signal:
• Make sure the status light on the projector is blue and not flashing, and the lens cover is removed.
• Make sure the cables are connected correctly. See the online User’s Guide.
• You may need to change the image source. See “Switching Between Image Sources.” Also make sure the source device is turned on.

If the projector and the notebook don’t display the same image:
**Windows®** Press the function key on your keyboard that lets you display on an external monitor. It may be labeled CRT/LCD or have an icon such as \( \cup \). You may have to hold down the Fn key while pressing it (such as Fn + F7). Wait a moment for the display to appear. You may need to press the keys again to display the image on both devices.

**Macintosh®** Open System Preferences and select Displays. Click the Arrangement tab and select the Mirror Displays checkbox.

Where to Get Help
**Manuals** Click the icons on your desktop to access the online manuals (requires an Internet connection). If you don’t have icon links to the manuals, you can install them from the projector CD or go to the Epson® website, as described below.

**Internet support** You can download utilities and documentation, get FAQs and troubleshooting advice, or e-mail Epson.

www.epson.com/support (U.S.)
www.epson.ca/support (Canada)

**Speak to a support representative** To use the Epson PrivateLine® Support service, call (800) 637-7661. This service is available for the duration of your warranty period. You may also speak with a projector support specialist by dialing (562) 276-4394 (U.S.) or (905) 709-3839 (Canada).

Support hours are 6 a.m. to 8 p.m., Pacific Time, Monday through Friday and 7 a.m. to 4 p.m., Pacific Time, Saturday. Days and hours of support are subject to change without notice. Toll or long distance charges may apply.

**Purchase supplies and accessories** You can purchase an air filter (V13H134A51), screens, and other accessories from an Epson authorized reseller. To find the nearest reseller, call 800-GO-EPSON (800-463-7766). Or you can purchase online at www.epsonstore.com (U.S. sales) or www.epson.ca (Canadian sales).
Changing the Language of the Projector Menus
The default language of the projector’s menu system is English, but you can change it as necessary.

1. Press the Menu button to access the projector’s menu system.
2. Select Extended > Language.
3. Select your language.
4. When you’re done, press the Menu button to exit.

Changing Screen Type
Set the Screen Type setting to the screen’s aspect ratio.

1. Press the Menu button.
2. Select Extended > Display > Screen > Screen Type.
3. Select the screen’s aspect ratio.

Note: The displayed image should match the screen’s size and shape.

Adjusting Image Position
1. Press the Lens Shift button (remote control) or the Lens button (projector).
2. Press the arrow buttons to adjust the position of the projected image.
3. When you’re done, press the Esc button to finish the adjustment.
4. If the projector is on a table, you can level the image by turning any of the lens adjustment screens is shown.

Note: After changing the screen type, you may need to change the aspect ratio of the projected image depending on the signal. Press the Aspect button on the remote control to change the aspect ratio, if necessary.

Correcting Image Shape
If your image is uneven on the sides, you can use the projector’s distortion correction features, such as H/V-Keystone and Quick Corner®, to adjust the shape. See the online User’s Guide.

Making Other Image Adjustments
For help on using the projector’s features to improve the image quality, see the online User’s Guide. You can also view information on how to adjust the image color, position, and edges (Edge Blending) when projecting from multiple projectors to create one seamless widescreen image.

Turning the Projector Off
Press the Standby button to turn off the projector. If you see a confirmation message, press the Standby button again.

Note: If the Direct Power On function is enabled, you can unplug the projector or flip the switch controlling the outlet to which the projector is connected. To turn on this feature, see the online User’s Guide.

With Epson’s Instant Off® technology, you don’t have to wait for the projector to cool down; just turn it off or unplug it when you’re done.

Troubleshooting
If you see a blank screen or the message No signal:
- Make sure the status light on the projector is blue and not flashing, and the lens cover is removed.
- Make sure the cables are connected correctly. See the online User’s Guide.
- You may need to change the image source. See “Switching Between Image Sources.” Also make sure the source device is turned on.

If the projector and the notebook don’t display the same image:
- Windows®
  Press the function key on your keyboard that lets you display an external monitor. It may be labeled CRT/LCD or have an icon such as .
  You may have to hold down the Fn key while pressing it (such as Fn + F7). Wait a moment for the display to appear. You may need to press the keys again to display the image on both devices.

OS X
Open System Preferences and select Displays. Click the Arrange tab and select the Mirror Displays checkbox.

You can purchase an air filter (V13H134A51), screens, and other accessories from an Epson authorized reseller. To find the nearest reseller, call 800-GO-EPSON (800-463-7766). Or you can purchase online at www.epsonstore.com (U.S. sales) or www.epson.ca (Canadian sales).

Where to Get Help
Manuals
Click the icons on your desktop to access the online manuals (requires an Internet connection). If you don’t have icon links to the manuals, you can install them from the projector CD or go to the Epson® website, as described below.
Turning the Projector On
1. Turn on your computer or image source.
2. Remove the lens cover.
3. Press the (O) On button. After the status light stays blue, the projector is ready.

Note: If the Direct Power On function is enabled, you can turn the projector on without pressing the (O) On button; just plug it in or flip the switch controlling the outlet to which the projector is connected. To turn on this feature, see the online User’s Guide.

4. If your image does not appear, see “Switching Between Image Sources” or “Troubleshooting.”

Changing the Language of the Projector Menu
The default language of the projector’s menu system is English, but you can change it as necessary.
1. Press the Menu button to access the projector’s menu system.
2. Select Extended > Language.
3. Select your language.
4. When you’re done, press the Menu button to exit.

Switching Between Image Sources
Press the Search button or one of the source buttons (remote control) or the Source Search button (projector).

Selecting the Lens Type
Make sure the Lens Type setting is correct for the lens you are using.
1. Press the Menu button.
2. Select Extended > Operation > Advanced > Lens Type.

Note: If the Lens Type setting is greyed out, the projector has automatically detected the installed lens and you can skip the remaining steps.
3. Select the lens you are using.
4. When you’re done, press the Menu button to exit.

Changing Screen Type
Set the Screen Type setting to the screen’s aspect ratio.
1. Press the Menu button.
2. Select Extended > Display > Screen > Screen Type.
3. Select the screen’s aspect ratio.

Note: The displayed image should match the screen’s size and shape.

Adjusting Image Position
1. Press the Lens Shift button (remote control) or the Lens button (projector).
2. Press the arrow buttons to adjust the position of the projected image.
3. When you’re done, press the Esc button to finish the adjustment.

If the projector is on a table, you can level the image by turning any of the projector’s adjustable feet.

Focusing and Zooming
1. Focus: Press the Focus button (remote control) or repeatedly press the Lens button (projector) until the focus adjustment screen is shown.
2. Zoom: Press the Zoom button (remote control) or repeatedly press the Lens button (projector) until the zoom adjustment screen is shown.

Note: If the Direct Power On function is enabled, you can unplug the projector or flip the switch controlling the outlet to which the projector is connected instead. To turn on this feature, see the online User’s Guide.

With Epson’s Instant Off™ technology, you don’t have to wait to cool down; just turn it off or unplug it when you’re done.

Adjusting Screen Type
1. Press the Menu button.
2. Select Extended > Display > Screen > Screen Type.
3. Select the screen’s aspect ratio.

Note: The displayed image should match the screen’s size and shape.

4. When you’re done, press the Menu button to exit.

Note: After changing the screen type, you may need to change the aspect ratio of the projected image depending on the selected signal. Press the Aspect button on the remote control to change the aspect ratio, if necessary.

Adjusting Image Position
1. Press the Lens Shift button (remote control) or the Lens button (projector).
2. Press the arrow buttons to adjust the position of the projected image.
3. When you’re done, press the Esc button to finish the adjustment.

Correcting Image Shape
If your image is uneven on the sides, you can use the projector’s distortion correction features, such as H/V-Keystone and Quick Corner®, to adjust the shape. See the online User’s Guide.

When the image is not square, you may need to change the source. See “Switching Between Image Sources.” Also make sure the source device is turned on.

If the projector and the notebook don’t display the same image
Windows®
Press the function key on your keyboard that lets you display an external monitor. It may be labeled CRT/LCD or have an icon such as 

You may have to hold down the Fn key while pressing it (such as Fn + F7). Wait a moment for the display to appear. You may need to press the keys again to display the image on both devices.

OS X
Open System Preferences and select Displays. Click the Arrangement tab and select the Mirror Displays checkbox.

Troubleshooting
If you see a blank screen or the message No signal
• Make sure the status light on the projector is blue and not flashing, and the lens cover is removed.
• Make sure the cables are connected correctly. See the online User’s Guide.

When you’re done, press the Esc button to turn the projector off. If you see a confirmation message, press the Esc button again.

Note: If the Direct Power On function is enabled, you can unplug the projector or flip the switch controlling the outlet to which the projector is connected instead. To turn on this feature, see the online User’s Guide.

With Epson’s Instant Off™ technology, you don’t have to wait to cool down; just turn it off or unplug it when you’re done.
