Quick Setup

Before using the projector, make sure you read the safety instructions in the online User’s Guide.

Choose a location

Keep the projector level and place it at a height so its lens is even with the top or bottom of the screen and is centered horizontally. If it isn’t possible, use the lens shift feature or the keystone correction button on the projector to reposition the image (see “Adjust the image”).

In order to view 3D images correctly, RF 3D glasses must be worn within 32 feet (10 m) of the projector. Use the image below to determine the viewing distance for 3D projection (the shading represents the 3D viewing area):

Note: Do not place the transmitter on a metal surface, as this may interfere with the signal. Make sure there are no obstructions between the transmitter and the projector.

Connect the projector

Choose from the following connections. For additional connection types, see the online User’s Guide.

Video device

1. **PowerLite Home Cinema 5040UB/5040UBe:** Remove the cover as shown below.

2. Connect multiple video devices and use the Source buttons on the remote control or the **Source** button on the projector to switch between them.

   ![Image](image1.png)

   Note: When connecting a source that requires HDCP 2.2, you must use the HDMI port.

3. Connect the HDMI cables to your video input devices and the HDMI ports on the side and back of the transmitter. You can connect up to four input devices to the transmitter. See “Viewing WirelessHD content” on the back of this sheet for information on switching between input sources.

   ![Image](image2.png)

   Note: You can connect tablets, smartphones, and other devices that support the MHL™ standard to the HDMI port on the side of the WirelessHD Transmitter. Some devices may require an adapter or may not require an MHL cable. Not all features or functions may be supported. Check your device’s documentation for more information.

4. To use the transmitter as a pass-through device to a television or other display, connect an HDMI cable to the display device and the HDMI output port on the rear of the transmitter. See “Viewing WirelessHD content” on the back of this sheet for information on switching between wireless and wired display modes.

   ![Image](image3.png)

   Note: To shut down the projector, press the **power button** on the projector or the **Standby button** on the remote control, then press the button again to confirm, if necessary. Wait for cooldown to complete before unplugging the projector.

   Use the arrow buttons on the remote control to highlight any of the options on the Home screen that appears, then press **Enter** to select it. You can display a QR code, switch between projection sources, and quickly access various adjustment options from this screen.

   ![Image](image4.png)

   The default language of the menu system is English. To select another language, press the **Menu button** on the projector or remote control. The shutter opens and the **power light** flashes blue, then stays on.

   ![Image](image5.png)

   Turn on your equipment

   1. Turn on your video source.

   2. Plug in the projector.

   3. Press the **power button** on the projector or the **On button** on the remote control. The shutter opens and the **power light** flashes blue, then stays on.

   4. Use the arrow buttons on the remote control to highlight any of the options on the Home screen that appears, then press **Enter** to select it. You can display a QR code, switch between projection sources, and quickly access various adjustment options from this screen.

   5. The default language of the menu system is English. To select another language, press the **Menu button** on the projector or remote control. Select **Extended** and press **Enter**. Select **Language** and press **Enter**. Select your language and press **Enter**. Press the **Menu** button to exit the menu system.

Adjust the image

1. Press the **Pattern button** on the remote control to display a test pattern.

   ![Image](image6.png)

2. To raise the image or correct a tilted image, adjust the front feet as shown below:

   ![Image](image7.png)

3. Press the **Lens button** on the remote control and use the **<** and **>** buttons to focus the image.

Using the remote control

Install the batteries as shown (two AA batteries).

Note: Do not place the transmitter on a metal surface, as this may interfere with the signal. Make sure there are no obstructions between the transmitter and the projector.

Connect the projector

Choose from the following connections. For additional connection types, see the online User’s Guide.

Video device

1 PowerLite Home Cinema 5040UBe: Remove the cover as shown below.

2 Connect multiple video devices and use the Source buttons on the remote control to switch between them.

Note: When connecting a source that requires HDCP 2.2, you must use the HDMI port.

3 Connect the HDMI cables to your video input devices and the HDMI ports on the back of the transmitter. See “Viewing WirelessHD content” on the back of this sheet for information on switching between input sources.

Note: You can connect tablets, smartphones, and other devices that support the MHL™ standard to the HDMI port on the side of the WirelessHD Transmitter. Some devices may require an adapter or may not require an MHL cable. Not all features or functions may be supported. Check your device’s documentation for more information.

4 To use the transmitter as a pass-through device to a television or other display, connect an HDMI cable to the display device and the HDMI output port on the rear of the transmitter. See “Viewing WirelessHD content” on the back of this sheet for information on switching between wireless and wired display modes.

Connect the projector (PowerLite Home Cinema 5040UBe only)

Follow these steps to set up the included WirelessHD Transmitter.

1 Place the transmitter within 32 feet (10 m) of the projector. Make sure the front of the transmitter faces the front of the projector. See the online User’s Guide for more information on the WirelessHD transmission range.

Use the image below to determine the viewing distance for 3D projection (the shading represents the 3D viewing area):

![3D Viewing Area Diagram]

2 Plug the AC adapter into the transmitter and a wall outlet.

3 Remove the cover as shown below.

4 Plug in the projector.

5 The default language of the menu system is English. To select another language, press the Menu button on the projector or remote control. Select Language and press Enter. Press the Menu button to exit the menu system.

Turn on your equipment

1 Turn on your video source.

2 Plug in the projector.

3 Press the power button on the projector or the On button on the remote control. The shutter opens and the power light flashes blue, then stays on.

Note: To shut down the projector, press the power button on the projector or the Standby button on the remote control, then press the button again to confirm, if necessary. Wait for cooldown to complete before unpluging the projector.

4 Use the arrow buttons on the remote control to highlight any of the options on the Home screen that appears, then press Enter to select it. You can display a QR code, switch between projection sources, and quickly access various adjustment options from this screen.

Adjust the image

1 Press the Pattern button on the remote control to display a test pattern.

2 To raise the image or correct a tilted image, adjust the front feet as shown below.

3 Press the Lens button on the remote control and use the ▼ and ▲ buttons to focus the image.

Turn on your equipment

1 Turn on your video source.

2 Plug in the projector.

3 Press the power button on the projector or the On button on the remote control. The shutter opens and the power light flashes blue, then stays on.

Note: To shut down the projector, press the power button on the projector or the Standby button on the remote control, then press the button again to confirm, if necessary. Wait for cooldown to complete before unpluging the projector.

4 Use the arrow buttons on the remote control to highlight any of the options on the Home screen that appears, then press Enter to select it. You can display a QR code, switch between projection sources, and quickly access various adjustment options from this screen.

Adjust the image

1 Press the Pattern button on the remote control to display a test pattern.

2 To raise the image or correct a tilted image, adjust the front feet as shown below.

3 Press the Lens button on the remote control and use the ▼ and ▲ buttons to focus the image.
Press the Lens button on the remote control again and use the ▼ and ▲ buttons to reduce or enlarge the image.

If your image looks like [ ] or [ ], you can use the [ ] buttons on the projector to correct this.

Turn on and begin playback.

Press the WirelessHD button on the remote control.

Note: If the glasses don’t automatically display 3D content, you may need to pair them with the projector. Move the glasses within 10 feet (3 m) of the projector, then press and hold the Pairing button on the 3D glasses for at least 3 seconds. The status light on the glasses will alternately flash green and red, then remain green for 10 seconds if pairing is successful.

You can also automatically convert 2D HDMI content to 3D. To enable the 2D-to-3D Conversion option, press the Menu button on the projector or remote control. Select Signal and press Enter, then select 3D Setup and press Enter. Select 2D-to-3D Conversion and press Enter. Select the Weak, Medium, or Strong setting, then press Enter.

See the online User’s Guide for more information on adjusting 3D images.

Viewing WirelessHD content (PowerLite Home Cinema 5040UBe only)

1. Turn on your video device and begin playback.
2. Turn on the power switch on the side of the WirelessHD Transmitter.
3. Turn on the projector.
4. If you have connected a television or other display to the output port on the transmitter and want to switch between wired and wireless display modes, press the Output button on the remote control or the WiHD/Pass button on the transmitter. The WiHD light on the transmitter lights up when the wireless display mode is active.
5. If you see a blank screen or the No signal message after turning on your video device or computer, check the following:
   • Make sure the power light on the projector is blue and not flashing.
   • Press the button on the projector or one of the Source buttons on the remote control to switch to the correct image source, if necessary.
   • If you’re using a Windows® laptop, press the function key on your keyboard that lets you display on an external monitor. It may be labeled CRT/LED or have an icon such as [ ]. You may have to hold down the Fn key while pressing it (such as [F7]). Wait a moment for the display to appear.
   • If you’re using a Mac laptop, open System Preferences and select Displays. Click the Arrange tab and select the Mirror Displays checkbox.
   • If 3D images aren’t displaying properly, check the following:
     • Press the Menu button, then select Signal > 3D Setup > 3D Display and make sure that the 3D option is selected.
     • Make sure that you are within the 3D viewing range. See “Choose a location” on the front of this sheet or the online User’s Guide for more information.
     • Check that your 3D glasses have not entered standby mode. Slide the power switch on the 3D glasses to the Off position, then back to the On position.
     • Check that your video device and media are both 3D-compatible. Refer to the documentation that came with your video device for more information.
   • If WirelessHD content isn’t displaying properly, check the following:
     • Check that the Link light on the transmitter is lit. If the link is flashing slowly, the projector could not connect with the projector and has entered standby mode. Verify that the projector is turned on and that all cables are properly connected as shown in the “WirelessHD Transmitter” section on the front of this sheet.
     • If the Link light continues to flash, press the Input button on the transmitter and wait 5-10 seconds for the Link light to stay lit. Repeat this procedure up to five times. If the transmitter still hasn’t connected to the projector, press the Setup button on the bottom of the transmitter and try again.
     • Make sure the WirelessHD Transmitter is within 32 feet (10 m) of the projector, isn’t obstructed by any large objects and is not placed on a metal surface.
     • If you are viewing wireless content, make sure that the WiHD light on the transmitter is lit. If it isn’t, press the Output button on the remote control or the WiHD/Pass button on the transmitter.

Troubleshooting

Where to get help

Manuals

For more information about using the projector, click the icons on your desktop to access the online manuals (requires an Internet connection). If you don’t see icon links to the manuals, you can install them from the projector CD or go to the Epson website, as described below.

Telephone support services

To use the Epson® PrivateLine® Support service, call (800) 637-7661. This service is available for the duration of your warranty period. You may also speak with a support specialist by calling (562) 276-4394 (US) or (905) 709-3839 (Canada).

Support hours are 6 a.m. to 8 p.m., Pacific Time, Monday through Friday, and 7 to 4 p.m., Pacific Time, Saturday. Days and hours of support are subject to change without notice. Toll or long distance charges may apply.

Internet support

Visit www.epsonsupport.com (U.S.) or www.epson.ca/support (Canada) for solutions to common problems. You can download utilities and documentation, get FAQs and troubleshooting advice, or e-mail Epson.

Registration

Register today to get product updates and exclusive offers. You can use the CD included with your projector or register online at www.epson.com/webreg.

Optional accessories

For a list of optional accessories, see the online User’s Guide.

You can purchase RF 3D glasses (part number V12H548006) or other accessories from an Epson authorized reseller. To find the nearest reseller, call 800-GO-EPSON (800-463-7766). Or you can purchase online at www.epsonstore.com (U.S. sales) or www.epson.ca (Canadian sales).
Troubleshooting

If you see a blank screen or the No signal message after turning on your video device or computer, check the following:

- Make sure the power light on the projector is blue and not flashing.
- Press the Source button on the projector or one of the Source buttons on the remote control to switch to the correct image source, if necessary.
- If you’re using a Windows® laptop, press the function key on your keyboard that lets you display on an external monitor. It may be labeled CRT/LED or have an icon such as . You may have to hold down the fn key while pressing it (such as fn + F7). Wait a moment for the display to appear.
- If you’re using a Mac laptop, open System Preferences and select Displays. Click the Arrangement tab and select the Mirror Displays checkbox.
- If 3D images aren’t displaying properly, check the following:
  - Press the Menu button, then select Signal > 3D Setup > 3D Display and make sure that the 3D option is selected.
  - Make sure that you are within the 3D viewing range. See “Choose a location” on the front of this sheet or the online User’s Guide for more information.
  - Check that your 3D glasses have not entered standby mode. Slide the power switch on the 3D glasses to the Off position, then back to the On position.
  - Check that your video device and media are both 3D-compatible. Refer to the documentation that came with your video device for more information.
- If WirelessHD content isn’t displaying properly, check the following:
  - Check that the Link light on the transmitter is lit. If the light is flashing slowly, the transmitter could not connect with the projector and has entered standby mode. Verify that the projector is turned on and that all cables are properly connected as shown in the “WirelessHD Transmitter” section on the front of this sheet.
  - If the Link light continues to flash, press the Input button on the transmitter and wait 5-10 seconds for the Link light to stay lit. Repeat this procedure up to five times. If the transmitter still hasn’t connected to the projector, press the Setup button on the bottom of the transmitter and try again.
  - Make sure the WirelessHD Transmitter is within 32 feet (10 m) of the projector, isn’t obstructed by any large objects and is not placed on a metal surface.
  - If you are viewing wireless content, make sure that the WiHD light on the transmitter is lit. If it isn’t, press the Output button on the remote control or the WiHDPass button on the transmitter.
