Quick Setup
Before using the projector, make sure you read the safety instructions in the online User's Guide.

Note: These illustrations show the PowerLite Home Cinema 3700, but the instructions are the same for the PowerLite Home Cinema 3100 unless otherwise noted.

Connect the projector
Choose from the following connections. See the sections below or the online User's Guide for details and additional connection types.

Video device
Connect multiple video devices and use the Source buttons on the remote control or the Home and arrow buttons on the projector to switch between them.

Mobile media device
Connect tablets, smartphones, and other devices that support the MHL™ standard to the HDMI 2/MHL port.

Some devices may require an adapter or may not require an MHL cable. Not all features or functions may be supported. Check your device's documentation for more information.

Connect audio
External speakers
Connect your device's audio output to your home theater receiver or powered speakers.

Note: When outputting sound through an external source, you may need to reduce the projector volume to zero or make sure that the correct audio output is selected on your device to prevent duplicate sound from being heard from the projector (PowerLite Home Cinema 3700).

Home theater system
Connect all your video and audio components to your home theater system.

Powered speakers
Connect external self-powered speakers to your projector.

The default language of the menu system is English. To select another language, press the Menu button on the projector or remote control. Select Extended and press Enter. Select Language and press Enter. Press the Menu button to exit the menu system.

Adjust the image
1. If you don't see an image, press one of the Source buttons on the remote control or the Home and arrow buttons on the projector to select the image source. If you still see a blank screen or have other display problems, see "Troubleshooting."

2. For the best image quality, place the projector directly in front of the center of the screen, facing the screen squarely. If this is not possible, turn the horizontal and vertical lens shift dials to adjust the image position and center it on the screen.

3. If the image is tilted, adjust the front feet as shown below.

4. Turn the zoom ring to reduce or enlarge the image.

Viewing 3D images
To view 3D content, you must first connect a 3D-compatible video device to one of the HDMI ports on your projector. You will also need a pair of Epson® (part number V12H548006) or Epson-compatible RF 3D active shutter glasses.

1. Turn on and begin playback on the 3D-compatible video device.

2. If the glasses don't automatically display 3D content, you may need to pair them with the projector. Move the glasses within 10 feet (3 m) of the projector, then press and hold the Pairing button on the 3D glasses for at least 3 seconds. The status light on the glasses will alternate green and red, then remain green for 10 seconds if pairing is successful.

3. Press the 3D Format button on the remote control, if necessary.

4. Slide the power switch on your 3D glasses to the On position.

5. Press the 3D Format button on the remote control to display the 3D Format menu.

6. Turn on the projector and the video device.

Using the remote control
Make sure the batteries are installed as shown (two AA batteries).
Quick Setup

Before using the projector, make sure you read the safety instructions in the online User’s Guide.

Note: These illustrations show the PowerLite Home Cinema 3700, but the instructions are the same for the PowerLite Home Cinema 3100 unless otherwise noted.

Connect the projector

Choose from the following connections. See the sections below or the online User’s Guide for details and additional connection types.

Video device

Connect multiple video devices and use the Source buttons on the remote control or the Home and arrow buttons on the projector to switch between them.

Mobile media device

Connect tablets, smartphones, and other devices that support the MHL™ standard to the HDMI/MHL port.

Some devices may require an adapter or may not require an MHL cable. Not all features or functions may be supported. Check your device’s documentation for more information.

Connect audio

External speakers

Connect your device’s audio output to your home theater receiver or powered speakers.

Note: When outputting sound through an external source, you may need to reduce the projector volume to zero or make sure that the correct audio output is selected on your device to prevent duplicate sound from being heard from the projector (PowerLite Home Cinema 3700).

Home theater system

Connect your device’s audio output to your home theater receiver or powered speakers.

Powered speakers

Connect your device’s audio output to your powered speakers.

Adjust the image

1. If you don’t see an image, press one of the Source buttons on the remote control or the Home and arrow buttons on the projector to select the image source.

Note: If you still see a blank screen or have other display problems, see “Troubleshooting.”

2. For the best image quality, place the projector directly in front of the center of the screen, facing the screen squarely. If this is not possible, turn the horizontal and vertical lens shift dials to adjust the image position and center it on the screen.

3. If the image is tilted, adjust the front feet as shown below.

4. Turn the zoom ring to reduce or enlarge the image.

5. Turn the focus ring to sharpen the image.

6. If your image is uneven on the sides, you can use the keystone correction feature to adjust the image. To use this feature, you must first set the lens feature to adjust the image. To use this feature, you must first set the lens to the center-top position using the lens shift dials.

Using the remote control

Make sure the batteries are installed as shown (two AA batteries).

1. Turn on and begin playback on the 3D-compatible video device.

Note: Make sure you set the video device to play content in 3D mode.

2. Press the 3D Format button on the remote control, if necessary.

3. Slide the power switch on your 3D glasses to the On position.

For more information on using the remote control, see the online User’s Guide.

Viewing 3D images

To view 3D content, you must first connect a 3D-compatible video device to one of the HDMI ports on your projector. You will also need a pair of Epson® (part number V12H548006) or Epson-compatible RF 3D active shutter glasses.

1. Turn on and begin playback on the 3D-compatible video device.

Bluetooth Safety and Specifications

Contains Bluetooth module model: DBU-E207

This document provides safety instructions and describes the specifications. Read this document carefully before use to ensure your safety and product performance.

U.S.

FCC Notice

Contains FCC ID: BKMA-E207

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

This equipment has been tested and found to comply with the limits for a Class-B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one of the following measures:

• Reorient or relocate the receiving antenna.
• Increase the separation between the equipment and receiver.
• Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
• Consult the dealer or an experienced radio/TV technician for help.

Caution: Changes or modifications not expressly approved by the party responsible for
compliance could void the user's authority to operate the equipment.

This antenna of this device must not be co-located or used in conjunction with any
other antenna or transmitter except in accordance with FCC multi-transmitter product
procedures.

Properly shielded cables must be used for connections to LCD Projector in order to meet
FCC emission limits. The cable for peripheral with a ferrite core must be used for RF
interference suppression.

FCC Radiation Exposure Statement:

This equipment complies with FCC radiation exposure limits set forth for an
uncontrolled environment. This equipment should be installed and operated with
minimum distance 7.9 inches (20 cm) between the radiator and your body.

Canada

Industry Canada (IC) Notice

Contains IC: 10520-1207

This Class-B digital apparatus complies with Canadian ICES-003.

CAN ICES-3(B)/NMB-3(B)

This device complies with Industry Canada license-exempt RSS standard(s). Operation
is subject to the following two conditions: (1) This device may not cause harmful
interference, and (2) this device must accept any interference received, including
interference that may cause undesired operation of the device.

This device and its antenna(s) must not be co-located or operating in conjunction with
any other antenna or transmitter except in accordance with IC multi-transmitter product
procedures.

Radiation Exposure Statement:

This equipment complies with IC radiation exposure limits set forth for an
uncontrolled environment. This equipment should be installed and operated with
minimum distance 20 cm (7.9 inches) between the radiator and your body.

This equipment is not permitted for use on aircraft or satellites.

Manuals

For more information about using the projector, click the icons on your
desktop to access the online manuals (requires an Internet connection). If you
don't see icon links to the manuals, you can install them from the projector CD
or go to the Epson website, as described below.

Phone support services

To use the Epson® PrivateLine® Support service, call (800) 637-7661. This
service is available for the duration of your warranty period. You may also speak with
a support specialist by calling 0662-276-4394 (U.S.) or (905) 709-3839 (Canada).
Support hours are 6 a.m. to 8 p.m. Pacific Time, Monday through Friday, and
7 a.m. to 4 p.m. Pacific Time, Saturday. Days and hours of support are subject
to change without notice. Toll or long distance charges may apply.

Internet support

Visit www.epson.com/support (U.S.) or www.epson.ca/support
(Canada) for solutions to common problems. You can download utilities and
documentation, get FAQs and troubleshooting advice, or e-mail Epson.

Registration

Register today to get product updates and exclusive offers. You can use the CD
included with your projector or register online at www.epson.com/webreg.

Troubleshooting

If you see a blank screen or the No signal message after turning on your
video device or computer, check the following:

• Make sure the power light on the projector is blue and not flashing.
• Press one of the Source buttons on the remote control or the Home and
arrow buttons on the projector to switch to the correct image source, if
necessary.
• If you’re using a Windows® laptop, press the function key on your
keyboard that lets you display on an external monitor. It may be labeled
CRT/LCD or have an icon such as . You may have to hold down the
Fn key while pressing it (such as Fn + F7). Wait a moment for the display
to appear.
• If you’re using a Mac laptop, open System Preferences and select Displays. Click the Arrangement tab and select the Mirror Displays
checkbox.
• If the keystone correction feature doesn’t correct the image, make sure you
first set the lens to the center-top position using the horizontal and vertical
lens shift dials.
• If 3D images aren’t displaying properly, check the following:

  • Make sure you wear the 3D glasses within 32 feet (10 m) of the
projector.
  • Check that your video device and media are both 3D-compatible. Refer
to the documentation that came with your video device for more information.

You can also automatically convert 2D HDMI content to 3D. To enable the
feature, press one of the Source buttons on the remote control or
press the Menu button, select 3D Setup, then select 3D Scene Mode.

For more information about using the projector, click the icons on your
desktop to access the online manuals (requires an Internet connection). If you
don’t see icon links to the manuals, you can install them from the projector CD
or go to the Epson website, as described below.
