Quick Setup

Before using the projector, make sure you read the safety instructions in the online User’s Guide.

Connect the projector

Choose from the following connections. See the sections below or the online User’s Guide for details and additional connection types.

Video connection

Connect a video source that has a separate audio output to the projector.

Audio connection

Connect your source’s audio output to your home theater receiver or powered speakers.

Home theater system

4 Press the power button on the projector or the On button on the remote control. The power light flashes blue, then stays on.

5 Turn the focus ring to sharpen the image.

6 If your image is uneven on the sides, you can use the keystone correction feature to adjust the image. To use this feature, you must first set the lens to the center-top position using the lens shift dials.

Using the remote control

Make sure the batteries are installed as shown (two AA batteries).

Viewing 3D images

To view 3D content, you must first connect a 3D-compatible video device to one of the HDMI ports on your projector. You will also need a pair of Epson® (part number V12H548000) or Epson-compatible RF 3D active shutter glasses.

1 Turn on and begin playback on the 3D-compatible video device.

2 Press the 3D Format button on the remote control, if necessary.

3 Slide the power switch on your 3D glasses to the On position.

Troubleshooting

If you see a blank screen or the No signal message after turning on your video device or computer, check the following:

• Make sure the power light on the projector is blue and not flashing.

• Press one of the Source buttons on the remote control or the Home and arrow buttons on the projector to switch to the correct image source, if necessary.

• If you’re using a Windows® laptop, press the function key on your keyboard that lets you display on an external monitor. It may be labeled CRT/LCD or have an icon such as . You may have to hold down the Fn key while pressing it (such as Fn + F7). Wait a moment for the display to appear.

• If you’re using a Mac laptop, open System Preferences and select Displays. Click the Arrange tab and select the Mirror Displays checkbox.

If the keystone correction feature doesn’t correct the image, make sure you first set the lens to the center-top position using the horizontal and vertical lens shift dials.
Quick Setup

Before using the projector, make sure you read the safety instructions in the online User’s Guide.

Connect the projector

Choose from the following connections. See the sections below or the online User’s Guide for details and additional connection types.

Video connection

Connect a video source that has a separate audio output to the projector.

Audio connection

Connect your source’s audio output to your home theater receiver or powered speakers.

Home theater system

Plug in the projector.

Turn on your video source.

3 Remove the lens cap.

Turn the zoom ring to reduce or enlarge the image.

4 Press the  or  button on the projector or the On button on the remote control. The power light flashes blue, then stays on.

5 Turn the focus ring to sharpen the image.

6 If your image is uneven on the sides, you can use the keystone correction feature to adjust the image. To use this feature, you must first set the lens to the center-top position using the lens shift dials.

Using the remote control

Make sure the batteries are installed as shown (two AA batteries).

Power on and begin playback on the 3D-compatible video device.

1 Turn on your equipment

2 Plug in the projector.

3 Remove the lens cap.

4 Turn the zoom ring to reduce or enlarge the image.

5 Turn the focus ring to sharpen the image.

6 If your image is uneven on the sides, you can use the keystone correction feature to adjust the image. To use this feature, you must first set the lens to the center-top position using the lens shift dials.

Using the remote control

Make sure the batteries are installed as shown (two AA batteries).

Viewing 3D images

To view 3D content, you must first connect a 3D-compatible video device to one of the HDMI ports on your projector. You will also need a pair of Epson® (part number V12H548006) or Epson-compatible RF 3D active shutter glasses.

1 Turn on and begin playback on the 3D-compatible video device.

2 Press the 3D Format button on the remote control, if necessary.

3 Slide the power switch on your 3D glasses to the On position.

4 Press the  or  button on the projector to display the keystone correction screen. Then press the or button to correct for horizontal keystone distortion and the or button to correct for vertical keystone distortion.

Troubleshooting

If you see a blank screen or the No signal message after turning on your video device or computer, check the following:

• Make sure the power light on the projector is blue and not flashing.

• Press one of the Source buttons on the remote control or the Home and arrow buttons on the projector to switch to the correct image source, if necessary.

• If you’re using a Windows® laptop, press the function key on your keyboard that lets you display on an external monitor. It may be labeled CRT/LCD or have an icon such as Ctrl+Fn. You may have to hold down the Fn key while pressing it (such as Fn + F7). Wait a moment for the display to appear.

• If you’re using a Mac laptop, open System Preferences and select Displays. Click the Arrangement tab and select the Mirror Displays checkbox.

If the keystone correction feature doesn’t correct the image, make sure you first set the lens to the center-top position using the horizontal and vertical lens shift dials.

For more information on using the remote control, see the online User’s Guide.
If 3D images aren’t displaying properly, check the following:

- Make sure to wear the 3D glasses within 32 feet (10 m) of the projector.
- Check that your 3D glasses have not entered standby mode. Slide the power switch on the 3D glasses into the Off position, then back to the On position.
- Press the Menu button on your remote control, select the Signal menu, then 3D Setup, then select 3D Display. Make sure that the 3D option is selected. You may also need to set the Diagonal Screen Size setting in the Signal menu. See the online User's Guide for more information.
- Check that your video device and media are both 3D-compatible. Refer to the documentation that came with your video device for more information.

Where to get help

Manuals

For more information about using the projector, click the icons on your desktop to access the online manuals (requires an Internet connection). If you don't see icon links to the manuals, you can install them from the projector CD or go to the Epson website, as described below.

Telephone support services

To use the Epson PrivateLine® Support service, call (800) 637-7861. This service is available for the duration of your warranty period. You may also speak with a support specialist by calling (562) 276-4394 (U.S.) or (905) 709-3819 (Canada).

Support hours are 6 am to 8 pm, Pacific Time, Monday through Friday, and 7 am to 4 pm, Pacific Time, Saturday. Days and hours of support are subject to change without notice. Toll or long distance charges may apply.

Internet support

Visit www.epson.com/support (U.S.) or www.epson.ca/support (Canada) for solutions to common problems. You can download utilities and documentation, get FAQs and troubleshooting advice, or e-mail Epson.

Registration

Register today to get product updates and exclusive offers. You can use the CD included with your projector or register online at www.epson.com/webreg.

Optional accessories

For a list of optional accessories, see the online User’s Guide.

You can purchase RF 3D glasses (part number V12H548006) or other accessories from an Epson authorized reseller. To find the nearest reseller, call 800-GO-EPSON (800-463-7766). Or you can purchase online at www.epsonstore.com (U.S. sales) or www.epson.ca (Canadian sales).

Bluetooth Safety and Specifications

Contains Bluetooth module model: DBUB-E207

This device provides safety instructions and describes the specifications. Read this document carefully before use to ensure your safety and product performance.

U.S.

FCC Notices

Contains FCC ID: BKMAE-E207

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Caution: Changes or modifications not expressly approved by the party responsible for compliance could void the user’s authority to operate this equipment.

This antenna of this device must not be co-located or used in conjunction with any other antenna or transmitter except in accordance with FCC multi-transmitter product procedures.

Properly shielded cables must be used for connections to LCD Projector in order to meet FCC emission limits. The cable for peripheral with a ferrite core must be used for RF interference suppression.
