Changing the Power Save Settings

You can use the Epson Scan 2 Utility to change the time period before the scanner enters sleep mode and turns off automatically.

1. Do one of the following to access the Epson Scan 2 Utility:
   - **Windows 10**: Click ☑️ and select EPSON > Epson Scan 2 Utility.
   - **Windows 8.x**: Navigate to the Apps screen and select Epson Scan 2 Utility.
   - **Windows (other versions)**: Click ☑️ or Start, and select All Programs or Programs. Select EPSON > Epson Scan 2 > Epson Scan 2 Utility.
   - **Mac**: Open the Applications folder, open the Epson Software folder, and select Epson Scan 2 Utility.
2. Click the **Power Save** tab.

![Epson Scan 2 Utility](image)

3. Select the length of time after which you want the scanner to go to sleep as the **Sleep Timer** setting.

4. Select a power off timer setting for the **AC power or AC adapter** and **Battery or USB power** settings.

5. Close the Epson Scan 2 Utility.

### Charging the Battery (ES-300W/ES-300WR)

The scanner runs on battery power when it is connected to the computer with a USB cable or WiFi. You can charge the battery from a computer with a USB connection or by connecting a power cord and AC adapter to the scanner.
To charge the battery with the power cord, connect the power cord to the AC adapter, connect the AC adapter to the scanner, and then plug in the power cord.

The battery charging light turns orange while the battery is charging. When charging is complete, the light turns blue (if the scanner is on) or turns off (if the scanner is off).

**Note:** The battery takes about 3 hours to fully charge.

To charge the battery from a computer with a USB connection, follow these steps:

1. Make sure that the computer is on and not in sleep mode.
2. Connect the scanner to the computer using the micro USB cable.

3. Press the power button to turn on the scanner.
   The battery charging light turns orange while the battery is charging. When charging is complete, the light turns blue (if the scanner is on) or turns off (if the scanner is off).

   **Note:** Battery charging time when the scanner is on is about 4 hours when connected to a USB 3.0 port and about 20 hours when connected to a USB 2.0 port. Charging times increase if the scanner is off during the charging process.

Loading Originals

Follow the instructions here to load your originals into the scanner.

**Note:** The illustrations show the ES-300W/ES-300WR, but the steps are the same for the ES-200.

- Loading Originals in the Input Tray
- Loading Receipts in the Input Tray
- Loading Special Originals
- Loading Plastic Cards in the Card Slot

### Loading Originals in the Input Tray

You can load originals that meet the document specifications in the input tray.

1. Slide the cover latch to open the scanner.
2. Press the power button to turn on the scanner, if necessary.
3. Extend the paper guide.

**Note:** If you are loading an original that is 14.5 inches (368.3 mm) or longer, do not extend the paper guide.
4. Raise the input tray edge guides and slide them all the way out.

5. If you are loading a multi-page original, fan your stack of originals.

   **Note:** If you are loading an original that is 14.5 inches (368.3 mm) or longer, load only one sheet at a time.
6. Stack the originals with the printed side facing down and slide the stack so the leading edge is at an angle as shown.
7. Slide the mode selector to ADF and load standard originals into the input tray printed side down and top edge first. Slide in the originals until they meet resistance and the ready light becomes brighter.
8. Slide the edge guides against the edges of the original.

**Note:** If you are scanning originals that are 14.5 inches (368.3 mm) or longer, support the original as it enters into and ejects from the scanner as shown.

Loading Receipts in the Input Tray

You can load receipts that meet the specifications in the input tray.

**Note:** Load only one receipt at a time.

1. Slide the cover latch to open the scanner.

**Note:** Do not extend the paper guide.
2. Press the power button to turn on the scanner, if necessary.

3. Start the Epson Scan 2 program, select the **Automatic Feeding Mode** checkbox on the Main Settings tab, then click **Scan**.

The Automatic Feeding Mode light on the scanner turns on.
**Note:** Make sure to specify the correct Document Size in Epson Scan 2. If the receipt length is 34 inches (863.6 mm) or less, select **Auto Detect (Long Paper)** to detect the size automatically. If the receipt length is more than 34 inches (863.6 mm), select **Customize** and enter the paper size.

4. **Raise the input tray edge guides and adjust them to the width of the receipt.**
5. Slide the mode selector to ADF and load the receipt into the input tray printed side down and top edge first.
6. Guide the receipt into the ADF and support it as it enters automatically into the scanner. (You can continue feeding receipts into the scanner, one after another, while the scanner is in Automatic Feeding Mode.)

7. When you are finished scanning, press the stop button on the scanner to close Automatic Feeding Mode.

Loading Special Originals

You can load envelopes or thick originals (such as post cards or business cards) in the input tray. Make sure the originals meet the specifications for special originals before loading them.

Note: When scanning special originals, turn off the Detect Double Feed setting on the Main Settings tab in Epson Scan 2.
1. Slide the cover latch to open the scanner.

2. Press the power button to turn on the scanner, if necessary.
3. Extend the paper guide.
4. Raise the input tray edge guides and slide them all the way out.

5. Slide the mode selector to ADF.
6. Do one of the following:
   - For an envelope, load it vertically in the input tray with the printable side down and the flap facing as shown. Slide in the envelope until it meets resistance and the ready light becomes brighter.
• For thick originals, load them vertically in the input tray printable side down and top edge first. Slide in the originals until they meet resistance and the ready light becomes brighter.
7. Slide the edge guides against the edges of the original.

Loading Plastic Cards in the Card Slot

You can load plastic cards that meet the card specifications in the card slot.

Note: Do not load plastic cards into the ADF.

1. Slide the cover latch to open the scanner.
2. Press the power button to turn on the scanner, if necessary.

3. Slide the mode selector to card.
4. Load the card into the card slot face up and top edge first until the leading edge of the card is pulled into the scanner. Make sure to insert the card according to the white guidelines on the card slot.
Note: Do not load plastic cards horizontally or at an angle.

When scanning starts, the card is taken into the scanner, protrudes slightly from the slot at the back, and then returns through the scanner and ejects from the card slot at the front. Do not touch the card until it is fully ejected or a malfunction may occur.

Network Security Recommendations

To help deter unauthorized access to your product over a network, you should protect your network environment using appropriate security measures.

Security measures such as these can help deter threats such as loss of user data, use of telephone and fax lines, and other intrusions:

- **Enable security on your wireless LAN**
  
  Enable the appropriate security on the wireless LAN you plan to use with your product. Network security such as a network password can deter interception of traffic over the wireless LAN. Your router may already have a default password enabled by your Internet service provider (ISP). See your ISP and router documentation for instructions on how to change the default password and better secure your network.

- **Connect your product only to a network protected by a firewall**
  
  Connecting your product directly to the Internet may leave it vulnerable to security threats. Instead, connect it to a router or other network connection protected by a firewall. Your router may already have a firewall set up by your Internet service provider; check with your ISP for confirmation. For best results, set up and use a private IP address for your network connection.

- **Change the default administrator password on your product**
  
  If your product has an option to set an administrator password, change the default administrator password to deter access by unauthorized users to personal data stored on your product, such as IDs, passwords, and contact lists.

Manually Connecting to a Wi-Fi Network

You can manually connect the scanner to a Wi-Fi network by entering the network names (SSIDs) and passwords for your wireless network router and your scanner (ES-300W/ES-300WR). You must have a computer with a wireless adapter to set up the connection. Also make sure you have installed your scanner software as described on your scanner Start Here sheet.

Note: For best results, re-install your scanner software and follow the on-screen instructions to connect to a network.

1. Turn your scanner over and locate the label on the bottom listing the SSID and password for your scanner. Make a note of the SSID and password for use later.

2. Set the connection mode switch on the side of the scanner to the AP mode position.

3. Turn on the scanner and wait for the lights to stop flashing.

4. From your computer or device, open the list of wireless networks and select the SSID shown on the scanner label. Then select the connect option.

5. Enter the password shown on the scanner label.
6. Connect your computer or device to your wireless network router.
7. Set the connection mode switch on the side of the scanner to the Wi-Fi position.

Wait for the ready and Wi-Fi lights on the scanner to stop flashing and stay on, indicating that the scanner is connected to the network.
8. Select the link below to set up network scanning. You must set up network scanning to connect your computer and wireless scanner.

Starting a Scan from a Scanner Button

You can scan using the start button on your scanner. This automatically starts Document Capture Pro (Windows) and Document Capture (Mac) and the scan job you have assigned to the button.

Note: If you installed the Epson ScanSmart software, pressing the start button on your scanner starts Epson ScanSmart instead. For instructions on scanning with Epson ScanSmart, see the help information in Epson ScanSmart or click here to access the Epson ScanSmart User's Guide.
Note: If you did not install Epson ScanSmart, make sure Epson Scan 2 and Document Capture Pro (Windows) or Document Capture (Mac) are installed on the computer connected to the scanner. Document Capture Pro (Windows) and Document Capture (Mac) do not support scanning from the start button on your scanner over a wireless network (ES-300W/ES-300WR). Launch Epson Scan 2 before scanning from the start button on your scanner.

1. Make sure the scanner is connected to your computer or network (ES-300W/ES-300WR).
2. If you are scanning using the ADF, slide the mode selector to ADF. If you are scanning a business or plastic card using the card slot, slide the mode selector to card.
3. Load an original in your scanner.
4. Press the start button.
   The scanner starts the job that was assigned to the start button in Document Capture Pro (Windows) or Document Capture (Mac).

   Note: You can view or change the scan settings using Document Capture Pro (Windows) or Document Capture (Mac).

Scanning in Epson Scan 2

Epson Scan 2 automatically scans your document and saves the scanned file in PDF format in your operating system's Documents or My Documents folder, or opens it in your scanning program. You can select settings, preview, and change the scanned file settings as necessary.

1. Load your original in the product.
2. Start Epson Scan 2.
You see this window:
**Note:** The **Document Source** setting is automatically set to **ADF** for your product.

3. If you want to scan different size originals by loading them into the ADF one by one, check the **Automatic Feeding Mode** checkbox and click **Scan**. Scanning begins as soon as you load each original.

4. Select the **Scanning Side** setting that matches the sides of the original that you want to scan.

5. Select the **Document Size** setting that matches the size of your original, or select **Auto Detect** to have Epson Scan 2 automatically detect the size. You can select **Customize** to enter a custom size, if necessary.

6. Select your original image type and how you want it scanned as the **Image Type** setting.

7. Select the **Resolution** setting you want to use for your scan.

8. Select any of the additional settings that you want to use on the **Main Settings** tab.

9. Click the **Advanced Settings** tab and select any settings that you want to use.

10. If you are scanning using the ADF, slide the mode selector to **ADF**. If you are scanning using the card slot, slide the mode selector to **card**.

11. To see a preview of your scan with the settings you selected, click the **Preview** button.
Epson Scan 2 previews your original and displays the results in the Epson Scan 2 window.

12. Reinsert your original into the ADF or card slot.
13. Select the format in which you want to save your scanned file as the Image Format setting. If necessary, select Options and select any desired format options.
14. Enter the file name for your scanned file in the File Name field. Select Settings to modify the file name settings.
15. Select the location in which you want to save your scanned file as the Folder setting. If necessary, select Select to create a new folder.
16. Click **Scan**.
   The product scans your original and saves the scanned file in the location you specified.

17. If you selected the **Automatic Feeding Mode** setting, place your next original in the ADF for scanning. When you finish scanning originals, click **Finish**.

**Additional Scanning Settings - Main Settings Tab**

You can select these additional scanning settings on the Epson Scan 2 Main Settings tab.

**Stitch Images**
When scanning double-sided originals, lets you lay out images from both sides of the original onto one scanned page.

**Rotate**
Rotates the original image clockwise to the desired angle before scanning it. Select **Auto** to allow your product to automatically rotate the image based on the orientation of the text (may take longer to scan).

**Correct Document Skew**
Corrects skewed originals, image contents, or both.

**Add or edit pages after scanning**
Lets you add, remove, or edit the pages in a scan, including rotating pages and changing the page order.

**Note:** To save multiple pages in a single file, you must select a file format that supports multiple pages such as **PDF** or **Multi-TIFF**. If you select another file format, each scanned image or page is saved as a separate file.

**Skip Blank Pages**
If the scanner detects marks from the other side of a blank page and adds the marks to the scanned image, adjust this setting to prevent this.
Detect Double Feed
Detects a double-feed paper error in the ADF. If you are scanning an original envelope or plastic card, select Off.

Additional Scanning Settings - Advanced Settings Tab

You can select these additional scanning settings on the Epson Scan 2 Advanced Settings tab. Not all adjustment settings may be available, depending on other settings you have chosen.
**Remove Background**  
Removes the background from your originals.

**Text Enhancement**  
Sharpens the appearance of letters in text documents.

**Auto Area Segmentation**  
Makes black and white images clearer and text recognition more accurate by separating the text from the graphics.

**Dropout**  
The scan will not pick up the color you select. This setting is available only if you select **Grayscale** or **Black & White** as the Image Type setting.

**Color Enhance**  
Enhances the shades of the color you select in the scanned image. This setting is available only if you select **Grayscale** or **Black & White** as the Image Type setting.

**Brightness**  
Adjusts the overall lightness and darkness of the scanned image.

**Contrast**  
Adjusts the difference between the light and dark areas of the overall scanned image.

**Gamma**  
Adjusts the midtone density of the scanned image.

**Threshold**  
Adjusts the level at which black areas in text and line art are delineated, improving text recognition in OCR (Optical Character Recognition) programs.

**Unsharp Mask**  
Makes the edges of certain image areas clearer. Turn off this option to leave softer edges.

**Descreening**  
Removes the ripple pattern that might appear in subtly shaded image areas, such as skin tones. This option improves results when scanning magazines or newspapers. (The results of descreening do not appear in the preview image, only in your scanned image.)

**Edge Fill**  
Corrects shadowing around the edges of the image by filling the shadows with black or white.

**Remove Punch Holes**  
Removes the shadows caused by holes on the edges of the original.

**Dual Image Output**  
Scans the original image twice using different output settings (Windows only).

Image Format Options

You can select different image formats and related options. For details on available options, click the ? icon on the Epson Scan 2 Image Format Options window. Not all image formats have options.

**BITMAP (*.bmp)**
- A standard image file format for most Windows programs.

**JPEG (*.jpg)**
- An image format that lets you highly compress image data. However, the higher the compression, the lower the image quality. (The TIFF format is recommended when you need to modify or retouch your scanned image.)
**PNG (*.png)**
An image format that does not lose quality during editing.

**TIFF (*.tif)**
A file format created for exchanging data between many programs, such as graphic and DTP software.

**Multi-TIFF (*.tif)**
A TIFF file format when multiple pages are saved to the same file, allowing you to edit the images using a compatible program.

**PDF (*.pdf)**
A document format that is readable by Windows and Mac systems using Adobe Reader, Acrobat, or other programs. You can save multi-page documents in one PDF file.

**Searchable PDF (*.pdf)**
A document format that is readable by Windows and Mac systems using Adobe Reader, Acrobat, or other programs. You can save multi-page documents in one PDF file. Recognized text in the scanned document can be searched.

**Scan Resolution Guidelines**

The resolution setting in your scanning software, measured in dpi (dots per inch), controls the amount of detail captured in your scans. Increasing the resolution raises the amount of detail captured but comes with the following disadvantages:

- Larger file sizes
- It takes longer to scan your originals, send/receive your scans by email or fax, and to print your scans
- The image may become too large to fit on your display or print on paper

If you plan to enlarge a scanned image so you can print it at a larger size, you may need to increase the resolution from the default resolution set by the software. Follow these guidelines to determine the resolution setting you need:

- You will scan the image at its original size but enlarge it later in an image-editing program.
  
  Increase the resolution setting in your scanning software. Increase the resolution by the same amount you will increase the image size to retain a high image quality. For example, if the resolution is 300 dpi (dots per inch) and you will double the image size later, change the resolution setting to 600 dpi.

- You will scan the image at 100% or smaller size.
  
  Select the resolution setting based on how you will use the scanned image:

  - Email/view on a computer screen/post on the web: 96 to 200 dpi
• Print/fax/convert to editable text (OCR)/create searchable PDF: 200 to 300 dpi
• You will scan the image on long paper.
  Scan paper up to 44 inches (1117.6 mm) in length with a maximum resolution of 300 dpi or less.

Saving a Scan as an Office Format File - Windows

You can use Document Capture Pro (Windows) to save your scans in one of the following Microsoft Office file formats: Microsoft Word (.docx), Microsoft Excel (.xlsx), or Microsoft PowerPoint (.pptx).

Note: The settings may vary, depending on the software version you are using. See the help information in Document Capture Pro for details.

1. Load your original in the product.
2. Do one of the following to start Document Capture Pro:
   - Windows 10: Click and select Epson Software > Document Capture Pro.
   - Windows 8.x: Navigate to the Apps screen and select Document Capture Pro.
   - Windows (other versions): Click or Start, and select All Programs or Programs. Select Epson Software > Document Capture Pro.
3. If you see a Switch to Simple View button in the upper right corner of the window, click it.

You see a window like this:
4. Click the **Scan Settings** button.

   **Note**: If you do not see any icons, click the V symbol next to the **Job Settings** button.

   You see a window like this:

   ![Scan Settings window](image)

5. Select any displayed settings you want to use and click **OK**.

   **Note**: See the help information in Document Capture Pro for details.

6. Click one of the destination icons (except **Print**) to choose where to send your scanned files. Your product starts scanning and you see the settings window.

7. Select the Office format file you want to use from the **File Type** drop-down list.

   **Note**: The first time you select an Office format file you are prompted to download a plug-in update for Microsoft Office files. Select **Yes** to download and install the plug-in.
8. Click **Option** to display additional settings.
9. Select any additional settings as necessary and click **OK**.

   **Note:** See the help information in Document Capture Pro for details.

10. Confirm your settings and click **OK**.

    Your originals are saved in the Office file format you selected.

Cleaning Your Scanner
To keep your product working at its best, you should clean it several times a year.

**Caution:** Do not use a hard brush, alcohol, or paint thinner to clean the product or you may damage it. Do not use oil or other lubricants inside the product or let water get inside it. Do not open the product's outer case.

1. Turn off the scanner and unplug the AC adapter.
2. Disconnect any connected cables.
3. Clean the outer case with a soft, dry cloth. Do not use liquid or chemical cleansers.

**Note:** If the outer case still requires additional cleaning, use a slightly damp cloth to wipe the outer case. Then wipe the case with a soft, dry cloth.

Parent topic: Cleaning and Transporting Your Scanner

Cleaning Inside Your Scanner
Clean your scanner regularly to make sure that no dust builds up on the glass scanning surfaces. Dust can cause spots or lines in your scanned images.

**Note:** The illustrations show the ES-300W/ES-300WR, but the instructions are the same for the ES-200.

**Caution:** Do not use a hard brush, alcohol, or paint thinner to clean the product or you may damage it. Do not use oil or other lubricants inside the product or let water get inside it.

1. Turn off the scanner and unplug the AC adapter.
2. Disconnect any connected cables.
3. Pull the edge of the scanner cover firmly at the arrow mark to open it.
4. Use a soft, moist cloth to wipe off any dust or dirt on the glass scanning surfaces and the rollers inside the scanner cover.

**Caution:** Do not spray glass cleaner directly on the scanning surfaces. Be careful not to place too much force on the glass.
5. Squeeze the tabs on the sides of the separation pad and pull up to remove it.

6. Use a soft cloth to wipe off any dust or dirt on the separation pad.
7. To replace the separation pad, slide it into the groove as shown and push it in until you hear it click into place.
8. Press the pickup roller cover latch and pull up the cover to remove it.
9. Slide the pickup roller to the right and lift up to remove it.

10. Wipe off any dust or dirt on the pickup roller using a soft, moist cloth.

   **Caution:** Use only a soft, moist cloth to clean the roller; using a dry cloth may damage the surface of the roller.
11. To replace the pickup roller, align the notch on the roller unit and slide it to the left. Press down to secure the roller.
12. Align the left edge of the pickup roller cover into the notches as shown and press it down until you hear it click into place.

**Note:** If you are not able to close the cover, the pickup roller is not installed correctly. Remove the roller unit and reinstall it, then try to close the cover again.

13. Plug in the AC adapter and press the ⚪ power button to turn on the scanner.

14. Hold down the ⬠ start button for at least two seconds while opening the scanner cover. The rollers on the bottom move momentarily, and then the scanner enters cleaning mode. Press the ⬠ start
button several times to rotate the rollers shown here. Use a soft, moist cloth to wipe off any dust or dirt on the rollers as they rotate. Repeat this step until the rollers are clean.

15. Close the scanner cover. Press the edge of the scanner cover firmly at the arrow mark until the scanner cover clicks into place.

**Scanner Does Not Turn On or Turns Off Unexpectedly**

If the scanner does not turn on or if it turns off unexpectedly, try these solutions:

- Make sure the AC adapter is securely connected to the scanner and to a working electrical outlet.
- If the scanner turns off unexpectedly, you may need to adjust the Power Off Timer setting.
• If you are using a USB connection, make sure the connection mode switch is set to the position (ES-300W/ES-300WR).
• Make sure you are operating the scanner within the operating temperature range (ES-300W/ES-300WR).
• Make sure the USB cable is securely connected to the computer.
• Connect the scanner directly to the computer. The scanner may not work properly when connected through a USB hub.
• Use the USB cable that came with the scanner.
• Use a USB 3.0 (SuperSpeed) port. You cannot use a USB 2.0 or USB 1.1 port to operate the scanner on a USB power supply.
• If the scanner does not turn off when operating on the battery (ES-300W/ES-300WR), disconnect the AC adapter and USB cable and press the reset button on the bottom of the scanner. Then reconnect the scanner and try again.

Scanner Button Does Not Work as Expected

If the scanner button does not start the correct program or perform the correct action, try these solutions:

- Document Capture Pro (Windows) and Document Capture (Mac) do not support using the start button to scan over a wireless connection (ES-300W/ES-300WR). Connect the scanner using a USB cable or launch Epson Scan 2 before scanning from the button on your scanner.

  **Note:** If you installed the Epson ScanSmart software, pressing the start button on your scanner starts Epson ScanSmart instead, over a USB or wireless (ES-300W/ES-300WR) connection. For instructions on scanning with Epson ScanSmart, see the help information in Epson ScanSmart or click here to access the *Epson ScanSmart User's Guide*.

- Check the USB cable connection between the computer and scanner.
- In Windows, be sure that the scanner is listed under **Imaging Devices** in the Device Manager.
- Make sure Document Capture Pro (Windows) or Document Capture (Mac) is installed correctly. If necessary, uninstall and reinstall it.
- Make sure you have assigned the correct job to the scanner button and change it, if necessary.
- Check the status of the lights and make sure the scanner is ready to scan.
- Make sure the connection mode switch is set correctly (ES-300W/ES-300WR).
- When using a wireless connection, start Epson Scan 2 on your computer before scanning from the product (ES-300W/ES-300WR).
- Make sure Epson Scan 2 and other applications are installed correctly. If necessary, uninstall and reinstall it.

Scanning Software Does Not Operate Correctly

If your scanning software does not operate correctly, try these solutions:

- Make sure your computer has adequate memory and meets the system requirements for your operating system.
- Make sure your computer is not running in a power-saving mode, such as sleep or standby. If so, wake your system and restart your scanning software.
• Make sure the scanner is turned on.
• Make sure the connection between the scanner and your computer is secure.
• If you upgraded your operating system but did not reinstall your scanning software, try reinstalling it.
• In Windows, be sure that the scanner is listed under Imaging Devices in the Device Manager.
• Connect the scanner directly to the computer. The scanner may not work properly when connected through a USB hub.
• If you are using a TWAIN-compliant program, make sure that the correct product is selected as the Scanner or Source setting.

Cannot Start Epson Scan 2
If you cannot start Epson Scan 2, try these solutions:
• Restart your computer.
• Be sure to use the USB cable that came with the scanner.
• Make sure your scanner is turned on and any interface cables are securely connected at both ends.
• Make sure your computer is not running in a power-saving mode, such as sleep or standby. If so, wake your system and restart Epson Scan 2.
• Connect the scanner directly to the computer. The scanner may not work properly when connected through a USB hub.
• If you connected the scanner using a USB cable, make sure it is connected directly to your computer or through only one USB hub.
• Make sure you do not have multiple versions of Epson Scan 2 installed. If you do, uninstall all versions and install one version.
• If you upgraded your operating system but did not reinstall Epson Scan 2, try reinstalling it.
• If you are using a TWAIN-compliant program, make sure that the correct product is selected as the Scanner or Source setting.
• Make sure the ready light stops flashing, indicating that the scanner is ready to scan.

Original Feeds Incorrectly in Scanner

If you have problems feeding originals in your scanner, try these solutions:

• If multiple pages feed at once, try the following:
  • Remove the originals, fan the edges to separate the sheets, if necessary, and reload them.
  • Load fewer originals at a time.
  • Load only originals that meet the specifications for your scanner.
  • Make sure the number of originals does not exceed the scanner's loading capacity. If loading a stack of originals, slide the stack so the leading edge is at an angle, as described in the loading instructions.
  • Clean inside the scanner and replace the roller assembly kit, if necessary.
  • Scan the originals one by one using the **Automatic Feeding Mode** setting in Epson Scan 2.

• If you see a double feed error in the Epson Scan 2 window or the Document Capture Pro window, start Epson Scan 2, select the **Main Settings** tab, select the **Detect Double Feed** setting, and select **Off**.

  **Note:** On a Mac, only Epson Scan 2 displays double feed errors. Document Capture for Mac does not include this setting.

### Scanning is Slow

If scanning becomes slow, try these solutions:
- Scan your original at a lower resolution, if possible.
• Make sure your system meets the requirements for your operating system. If you are scanning a high-resolution image, you may need more than the minimum requirements. If necessary, increase your system’s memory or reduce the resolution.

• If you are running virus protection or other security software, exclude the TWAIN.log files from monitoring or set the TWAIN.log file as read only (Windows). See your virus protection or security software instructions for details. The TWAIN.log file is saved in C:\Users\(username)\AppData\Local\Temp.

Note: You may need to unhide system folders to view files in that location.

• If you are running on USB power, connect the AC adapter to the scanner.

• If you are running on battery power and the battery charge is low, connect the AC adapter to the scanner (ES-300W/ES-300WR).

Solving Network Scanning Problems
Check these solutions if you have problems scanning over a network (ES-300W/ES-300WR).

Cannot Scan Over a Network
Scanner Cannot Connect to a Wireless Router

Parent topic: Solving Problems

Cannot Scan Over a Network
If you have problems scanning over a network, try these solutions:

• Make sure the connection mode switch is set to the Wi-Fi position.

• If you cannot scan from the start button on the scanner, make sure you restarted your computer after installing the scanning software. Also start Epson Scan 2 before scanning with the start button.

• Document Capture Pro (Windows) and Document Capture (Mac) do not support starting a scan from the scanner button over a wireless network (ES-300W/ES-300WR). Launch Epson Scan 2 before scanning from the scanner button over a network.
Note: If you installed the Epson ScanSmart software, pressing the start button on your scanner starts Epson ScanSmart instead, via a USB or wireless (ES-300W/ES-300WR) connection. For instructions on scanning with Epson ScanSmart, see the help information in Epson ScanSmart or click here to access the *Epson ScanSmart User's Guide*.

- If you are scanning a large original at a high resolution, a network communication error may occur. Try scanning again at a lower resolution.
- If network communication was interrupted while starting Epson Scan 2, exit Epson Scan 2, wait a few seconds, and restart it. If Epson Scan 2 cannot restart, turn off your scanner, turn it back on, and try starting Epson Scan 2 again.
- Check the network connection setting in the Epson Scan 2 Utility.
- You may need to disable the firewall and any anti-virus software on your wireless router or access point.
- If you see the message "Network product is not available: currently being used by user", there may be a communication error between the scanner and computer. Restart the scanner.
- Epson Scan 2 does not support networks that use only IPv6. Use Epson Scan 2 on a network that supports IPv4.
- If the Firewall function is active, the scanner may not be discovered by the Epson Scan 2 Utility. Open the Epson Scan 2 Utility, enter the IP address for your scanner, and click Add.

Wi-Fi Networking

**Scanner Cannot Connect to a Wireless Router**

If your scanner has trouble finding or connecting to a wireless router, try these solutions:

- If you are connecting the scanner via Wi-Fi Protected Setup (WPS), make sure you activate WPS on your scanner within 2 minutes of activating WPS discovery mode on the router by pressing the WPS button or enabling the WPS setting in your router firmware.
- Make sure to place your scanner within contact range of your router. Avoid placing your scanner near a microwave oven, 2.4 GHz cordless phone, or large metal object, such as a filing cabinet.

**Note:** If you are using a 5 GHz wireless router, set the router to operate in dual band (2.4 GHz and 5 GHz) mode. If your router uses a single network name (SSID) for both the 2.4 GHz and 5 GHz band, give each band its own network name (SSID) instead, such as Home Network 2.4 GHz and Home...
Network 5 GHz. See your router documentation or contact your internet service provider for instructions. Be sure to connect your scanner only to a 2.4 GHz network name (SSID).

- Verify that your router is operating correctly by connecting to it from your computer or another device.
- You may need to temporarily disable your firewall and any anti-virus software on your wireless router. Then try scanning again. You can also unblock your scanner driver or network address in your firewall or anti-virus software.
- Check to see if access restrictions, such as MAC address filtering, are set on the router. If access restrictions are set, add your scanner's MAC address to your router's address list. To obtain your scanner's MAC address, check the label on the back or bottom of your scanner. Then follow the instructions in your router documentation to add the address to the list.
- If your router does not broadcast its network name (SSID), follow the instructions that came with your scanner to enter your wireless network name manually.
- If your router has security enabled, determine the kind of security it is using and any required password or passphrase for connection. Then make sure to enter the exact WEP key or WPA passphrase correctly.
- Check if your computer is restricting the available wireless channels. If so, verify that your wireless access point is using one of the usable channels and change to a usable channel, if necessary.
- The scanner may not be able to communicate with a computer with multiple network interfaces. Disable all network interfaces except for the interface connected to the scanner.
- Enable the DHCP function on the access point or router.
- Check that the scanner's IP address is set correctly.

Back of Original Image Appears in Scanned Image

If an image from the back of a thin original appears in your scanned image, make sure you selected the correct Image Type setting for your original and select the Text Enhancement setting in Epson Scan 2. You can also select the Remove Background setting in Epson Scan 2.

Note: If you select Color as the Image Type setting, you can change the level from Standard to High to remove more of the background.

Scanned Characters are Blurry

If characters in your scanned images are blurry, try these solutions:

- Make sure the mode selector is set correctly. To scan using the ADF, slide the mode selector to ADF. To scan a plastic card using the card slot, slide the mode selector to Card.
- Make sure you do not move the scanner or original while scanning.
- Operate the scanner on a flat, stable surface.
- Make sure the originals are ejecting properly.
- Adjust these Epson Scan 2 settings (if available) and try scanning again:
  - Select the Text Enhancement setting.
  - If the Image Type setting is Black & White, adjust the Threshold setting.
  - Increase the Resolution setting.
  - Set the Image Type to Grayscale.

Characters are not Recognized During Conversion to Editable Text (OCR)

If characters in your scanned images are not recognized during OCR conversion, try these solutions:

• Make sure your original is loaded straight on your product.
• Use an original with clear text.
• Adjust these Epson Scan 2 settings (if available) and try scanning again:
  • Select the correct Image Type setting.
  • Select or adjust the Text Enhancement setting.
  • If the Image Type is set to Black & White, adjust the Threshold setting.
  • Set the Image Type to Grayscale.
• Set the scanning resolution between 200 and 600 dpi.
• If the original document is in landscape mode, set the Rotate setting to Auto in Epson Scan 2.
• If you are using OCR software, check the manual for any additional adjustments.

Ripple Patterns Appear in an Image

You may see a ripple pattern (called a moiré) in scanned images of printed documents. This is caused by interference from differing pitches in the scanner's screen and your original's halftone screen. To reduce this effect, adjust these Epson Scan 2 settings (if available) and try scanning again:

• Select the Descreening setting.
• Select a lower Resolution setting.

Scanned Image is Cropped
If the edges of a scanned image are cropped, try the following solutions:
• Select Auto Detect or Auto Detect (Long Paper) as the Document Size setting in Epson Scan 2, Document Capture Pro, or Document Capture.

Note: The maximum paper length is 44 inches (1117.6 mm); select Customize to create a custom paper size.

• In Epson Scan 2, select the Main Settings tab. Select Document Size > Settings and adjust the cropping area shown in the Crop Margins for Size "Auto" setting.

• Document Capture Pro (Windows): Select Detailed Settings from the Scan window. Select Document Size > Settings and then adjust the cropping area shown in the Crop Margins for Size "Auto" setting.

• Document Capture (Mac): Click the Scan button and select Main Settings from the Scan window. Select Document Size and then adjust the cropping area shown in the Crop Margins for Size "Auto" setting.

Resetting the Epson Scan 2 Settings
If you continue to experience image quality problems after trying all possible solutions, you may need to reset the Epson Scan 2 settings using the Epson Scan 2 Utility.

1. Do one of the following to start the Epson Scan 2 Utility:
   - **Windows 10**: Click > EPSON > Epson Scan 2 Utility.
   - **Windows 8.x**: Navigate to the Apps screen and select Epson Scan 2 Utility.
   - **Windows (other versions)**: Click or Start, and select All Programs or Programs. Select EPSON > Epson Scan 2 > Epson Scan 2 Utility.
   - **Mac**: Open the Applications folder, open the Epson Software folder, and select Epson Scan 2 Utility.
2. Click the Other tab.
3. Click Reset.

**Note**: If resetting the Epson Scan 2 settings does not solve your problem, uninstall Epson Scan 2 and re-install it.

### Uninstalling Scanner Software - Mac

In most cases, you do not need to uninstall your scanner software before re-installing it. However, you can download the Uninstaller utility from the Epson support website to uninstall your scanner software as described here.

1. To download the Uninstaller utility, visit epson.com/support (U.S.), epson.ca/support (Canada), or epson.com.jm/support (Caribbean) and select your product.
2. Follow the instructions on the screen to install the Uninstaller utility.
3. Quit all applications currently running on your Mac.
4. Double-click the Uninstaller icon.
5. In the Epson Uninstaller screen, select the checkbox for each software program you want to uninstall.
6. Click Uninstall.
7. Follow the on-screen instructions to uninstall the software.
8. To reinstall your scanner software, see the Start Here sheet for instructions.

   **Note**: If you find that re-installing your scanner software does not solve a problem, contact Epson.

Where to Get Help

If you need to contact Epson for technical support services, use the following support options.

Internet Support
Visit Epson’s support website at epson.com/support (U.S.), epson.ca/support (Canada), or epson.com.jm/support (Caribbean) and select your product for solutions to common problems with your product. You can download utilities and documentation, get FAQs and troubleshooting advice, or e-mail Epson with your questions.

Speak to a Support Representative
Before you call Epson for support, please have the following information ready:

• Product name
• Product serial number (located on a label on the product)
• Proof of purchase (such as a store receipt) and date of purchase
• Computer configuration
• Description of the problem

Then call:

• U.S.: (562) 276-4382, 6 AM to 8 PM, Pacific Time, Monday through Friday, and 7 AM to 4 PM, Pacific Time, Saturday
• Canada: (905) 709-3839, 6 AM to 8 PM, Pacific Time, Monday through Friday, and 7 AM to 4 PM, Pacific Time, Saturday

Days and hours of support are subject to change without notice. Toll or long distance charges may apply.

Note: For help using any other software on your system, see the documentation for that software for technical support.

Purchase Supplies and Accessories
You can purchase genuine Epson accessories at epson.com (U.S. sales), epson.ca (Canadian sales), or epson.com.jm (Caribbean sales). You can also purchase accessories from an Epson authorized reseller. To find the nearest one, call 800-GO-EPSON (800-463-7766) in the U.S. or 800-807-7766 in Canada.

Important Safety Instructions

Follow these safety instructions when setting up and using the scanner:

• Read all these instructions, and follow all warnings and instructions marked on the scanner.
• Place the scanner close enough to the computer for the interface cable to reach it easily.
• Do not use with wet hands.
• When connecting this product to a computer or other device with a cable, ensure the correct orientation of the connectors. Each connector has only one correct orientation. Inserting a connector in the wrong orientation may damage both devices connected by the cable.
• Do not insert objects into any opening as they may touch dangerous voltage points or short out parts. Beware of electrical shock hazards.
• Place the product on a flat, stable surface that extends beyond the base of the product in all directions. If you place the product by the wall, leave at least 3.9 inches (10 cm) between the back of the product and the wall.
• After replacing consumable parts, dispose of them correctly following the rules of your local authority. Do not disassemble them.
• Do not place or store the scanner outdoors, in a car, near excessive dirt or dust, water, heat sources, or in locations subject to shocks, vibrations, condensation, high temperature or humidity, direct sunlight, strong light sources, or rapid changes in temperature or humidity.
• Never disassemble, modify, or attempt to repair the scanner or a scanner option by yourself except as specifically explained in this guide.

**Caution:** Radio waves from this product may adversely affect the operation of medical equipment, airplanes, or automatically controlled devices, such as pacemakers, automatic doors, or fire alarms. When using this product near such devices or inside a medical facility, follow the directions from authorized staff members at the facility, and follow all posted warnings and directions on the device to avoid causing an accident.

**Warning:** The cords included with this product contain chemicals, including lead, known to the State of California to cause birth defects or other reproductive harm. **Wash hands after handling.** (This notice is provided in accordance with Proposition 65 in Cal. Health & Safety Code § 25249.5 and following.)

**AC Adapter**

• Do not place or store the AC adapter outdoors, in a car, near excessive dirt or dust, water, heat sources, or in locations subject to shocks, vibrations, condensation, high temperature or humidity, direct sunlight, strong light sources, or rapid changes in temperature or humidity.

• Place the scanner and the AC adapter near an electrical outlet where the adapter can be easily unplugged.

• The AC power cord should be placed to avoid abrasions, cuts, fraying, crimping, and kinking.

• Do not place objects on top of the AC power cord and do not allow the AC adapter or the power cord to be stepped on or run over. Be particularly careful to keep the AC power cord straight at the end and the point where it enters the AC adapter.

• Use only the AC adapter that comes with your scanner. Using any other adapter could cause fire, electrical shock, or injury.

• Use only the power cord that comes with your scanner. Use of another cord may cause fires or shock. Do not use the cord with any other equipment.

• The AC adapter is designed for use with the scanner with which it was included. Do not attempt to use it with other electronic devices unless specified.

• Use only the type of power source indicated on the AC adapter's label, and always supply power directly from a standard domestic electrical outlet with the AC adapter that meets the relevant local safety standards.

• Avoid using outlets on the same circuit as photocopiers or air control systems that regularly switch on and off.

• If you use an extension cord with the scanner, make sure the total ampere rating of the devices plugged into the extension cord does not exceed the cord's ampere rating. Also, make sure the total
ampere rating of all devices plugged into the wall outlet does not exceed the wall outlet's ampere rating.

- Never disassemble, modify, or attempt to repair the AC adapter by yourself except as specifically explained in the scanner's guides.
- If damage occurs to the plug, replace the cord set or consult a qualified electrician. If there are fuses in the plug, make sure you replace them with fuses of the correct size and rating.
- Unplug the scanner and the AC adapter, and refer servicing to qualified service personnel under the following conditions: The AC adapter or plug is damaged; liquid has entered the scanner or the AC adapter; the scanner or the AC adapter has been dropped or the case has been damaged; the scanner or the AC adapter does not operate normally or exhibits a distinct change in performance. (Do not adjust controls that are not covered by the operating instructions.)
- Unplug the scanner and the AC adapter before cleaning. Clean with a damp cloth only. Do not use liquid or aerosol cleaners.
- If you are not going to use the scanner for a long period, be sure to unplug the AC adapter from the electrical outlet.

Battery Safety Instructions (ES-300W/ES-300WR)

- The battery is not fully charged at the time of purchase. Charge the battery fully before using the scanner on battery power.
- Always charge the battery within a temperature range of 46°F to 95°F (8°C to 35°C). The battery cannot charge or may deteriorate if you charge it in an environment outside of this range.
- If the battery is not fully charged within the specified time, stop charging. Otherwise, the battery could become hot, emit smoke, rupture, or catch fire.
- If you are not using the scanner, charge the battery using the AC adapter on a regular basis (at least once every six months) to avoid letting the battery run out.
- Turn off the scanner when not in use or set the scanner to turn off automatically to save battery power.
- Do not place the product in a microwave oven or a high-pressure container. Otherwise, the battery could become hot, emit smoke, rupture, or catch fire.
- If battery acid gets into your eyes or on your skin, immediately rinse the affected area thoroughly with water and seek medical treatment.
- If battery acid leaks from a battery, or the product emits a bad odor, move the product away from flammable objects immediately. If the product is not moved, electrolytes leaking from the battery could become hot, emit smoke, rupture, or catch fire.
• Do not subject the scanner to physical impacts or drop the scanner. Otherwise, the battery could leak or the protection circuit in the battery could be damaged. As a result, the battery could become hot, emit smoke, rupture, or catch fire.

• Do not use or place the product in temperatures exceeding 140°F (60°C), such as near a fire or a heater. Otherwise, the plastic separator could melt and the individual cells could short-circuit. As a result, the battery could become hot, emit smoke, rupture, or catch fire.

• Do not use the product if it is leaking or damaged in any way. Otherwise, the battery could become hot, emit smoke, rupture, or catch fire.

• Do not leave the product in a vehicle. Otherwise, the battery could overheat.

• If the scanner's battery light flashes orange quickly during charging in the normal temperature range (46°F to 95°F [8°C to 35°C]) or the battery runs out too fast even on a full charge, the battery may be malfunctioning or at the end of its service life. Contact Epson support to replace the battery.

### Restrictions on Copying

Observe the following restrictions to ensure responsible and legal use of your scanner.

Copying of the following items is prohibited by law:

• Bank bills, coins, government-issued marketable securities, government bond securities, and municipal securities

• Unused postage stamps, pre-stamped postcards, and other official postal items bearing valid postage

• Government-issued revenue stamps, and securities issued according to legal procedure

Exercise caution when copying the following items:

• Private marketable securities (stock certificates, negotiable notes, checks, etc.), monthly passes, concession tickets, etc.

• Passports, driver's licenses, warrants of fitness, road passes, food stamps, tickets, etc.

**Note:** Copying these items may also be prohibited by law.

**Restriction on disassembling and decompiling**

You may not disassemble, decompile, or otherwise attempt to derive the source code of any software included with this product.

Binding Arbitration and Class Waiver

1. DISPUTES, BINDING INDIVIDUAL ARBITRATION, AND WAIVER OF CLASS ACTIONS AND CLASS ARBITRATIONS

1.1 Disputes. The terms of this Section 1 shall apply to all Disputes between you and Epson. The term "Dispute" is meant to have the broadest meaning permissible under law and includes any dispute, claim, controversy or action between you and Epson arising out of or relating to this Agreement, Epson branded products (hardware and including any related software), or other transaction involving you and Epson, whether in contract, warranty, misrepresentation, fraud, tort, intentional tort, statute, regulation, ordinance, or any other legal or equitable basis. "DISPUTE" DOES NOT INCLUDE IP CLAIMS, or more specifically, a claim or cause of action for (a) trademark infringement or dilution, (b) patent infringement, (c) copyright infringement or misuse, or (d) trade secret misappropriation (an "IP Claim"). You and Epson also agree, notwithstanding Section 1.6, that a court, not an arbitrator, may decide if a claim or cause of action is for an IP Claim.

1.2 Binding Arbitration. You and Epson agree that all Disputes shall be resolved by binding arbitration according to this Agreement. ARBITRATION MEANS THAT YOU WAIVE YOUR RIGHT TO A JUDGE OR JURY IN A COURT PROCEEDING AND YOUR GROUNDS FOR APPEAL ARE LIMITED.

Pursuant to this Agreement, binding arbitration shall be administered by JAMS, a nationally recognized arbitration authority, pursuant to its code of procedures then in effect for consumer related disputes, but excluding any rules that permit joinder or class actions in arbitration (for more detail on procedure, see Section 1.6 below). You and Epson understand and agree that (a) the Federal Arbitration Act (9 U.S.C. §1, et seq.) governs the interpretation and enforcement of this Section 1, (b) this Agreement memorializes a transaction in interstate commerce, and (c) this Section 1 shall survive termination of this Agreement.

1.3 Pre-Arbitration Steps and Notice. Before submitting a claim for arbitration, you and Epson agree to try, for sixty (60) days, to resolve any Dispute informally. If Epson and you do not reach an agreement to resolve the Dispute within the sixty (60) days), you or Epson may commence an arbitration. Notice to Epson must be addressed to: Epson America, Inc., ATTN: Legal Department, 3840 Kilroy Airport Way, Long Beach, CA 90806 (the "Epson Address"). The Dispute Notice to you will be sent to the most recent address Epson has in its records for you. For this reason, it is important to notify us if your address changes by emailing us at EAILegal@ea.epson.com or writing us at the Epson Address above. Notice of the Dispute shall include the sender's name, address and contact information, the facts giving rise to the
Dispute, and the relief requested (the "Dispute Notice"). Following receipt of the Dispute Notice, Epson and you agree to act in good faith to resolve the Dispute before commencing arbitration.

1.4 Small Claims Court. Notwithstanding the foregoing, you may bring an individual action in the small claims court of your state or municipality if the action is within that court's jurisdiction and is pending only in that court.

1.5 WAIVER OF CLASS ACTIONS AND CLASS ARBITRATIONS. YOU AND EPSON AGREE THAT EACH PARTY MAY BRING DISPUTES AGAINST THE OTHER PARTY ONLY IN AN INDIVIDUAL CAPACITY, AND NOT AS A PLAINTIFF OR CLASS MEMBER IN ANY CLASS OR REPRESENTATIVE PROCEEDING, INCLUDING WITHOUT LIMITATION FEDERAL OR STATE CLASS ACTIONS, OR CLASS ARBITRATIONS. CLASS ACTION LAWSUITS, CLASS-WIDE ARBITRATIONS, PRIVATE ATTORNEY-GENERAL ACTIONS, AND ANY OTHER PROCEEDING WHERE SOMEONE ACTS IN A REPRESENTATIVE CAPACITY ARE NOT ALLOWED. ACCORDINGLY, UNDER THE ARBITRATION PROCEDURES OUTLINED IN THIS SECTION, AN ARBITRATOR SHALL NOT COMBINE OR CONSOLIDATE MORE THAN ONE PARTY'S CLAIMS WITHOUT THE WRITTEN CONSENT OF ALL AFFECTED PARTIES TO AN ARBITRATION PROCEEDING.

1.6 Arbitration Procedure. If you or Epson commences arbitration, the arbitration shall be governed by the rules of JAMS that are in effect when the arbitration is filed, excluding any rules that permit arbitration on a class or representative basis (the "JAMS Rules"), available at http://www.jamsadr.com or by calling 1-800-352-5267, and under the rules set forth in this Agreement. All Disputes shall be resolved by a single neutral arbitrator, and both parties shall have a reasonable opportunity to participate in the selection of the arbitrator. The arbitrator is bound by the terms of this Agreement. The arbitrator, and not any federal, state or local court or agency, shall have exclusive authority to resolve all disputes arising out of or relating to the interpretation, applicability, enforceability or formation of this Agreement, including any claim that all or any part of this Agreement is void or voidable. Notwithstanding this broad delegation of authority to the arbitrator, a court may determine the limited question of whether a claim or cause of action is for an IP Claim, which is excluded from the definition of "Disputes" in Section 1.1 above. The arbitrator shall be empowered to grant whatever relief would be available in a court under law or in equity. The arbitrator may award you the same damages as a court could, and may award declaratory or injunctive relief only in favor of the individual party seeking relief and only to the extent necessary to provide relief warranted by that party's individual claim. In some instances, the costs of arbitration can exceed the costs of litigation and the right to discovery may be more limited in arbitration than in court. The arbitrator's award is binding and may be entered as a judgment in any court of competent jurisdiction.

You may choose to engage in arbitration hearings by telephone. Arbitration hearings not conducted by telephone shall take place in a location reasonably accessible from your primary residence, or in Orange County, California, at your option.

a) Initiation of Arbitration Proceeding. If either you or Epson decides to arbitrate a Dispute, both parties agree to the following procedure:
(i) Write a Demand for Arbitration. The demand must include a description of the Dispute and the amount of damages sought to be recovered. You can find a copy of a Demand for Arbitration at http://www.jamsadr.com ("Demand for Arbitration").

(ii) Send three copies of the Demand for Arbitration, plus the appropriate filing fee, to: JAMS, 500 North State College Blvd., Suite 600 Orange, CA 92868, U.S.A.

(iii) Send one copy of the Demand for Arbitration to the other party (same address as the Dispute Notice), or as otherwise agreed by the parties.

b) Hearing Format. During the arbitration, the amount of any settlement offer made shall not be disclosed to the arbitrator until after the arbitrator determines the amount, if any, to which you or Epson is entitled. The discovery or exchange of non-privileged information relevant to the Dispute may be allowed during the arbitration.

c) Arbitration Fees. Epson shall pay, or (if applicable) reimburse you for, all JAMS filings and arbitrator fees for any arbitration commenced (by you or Epson) pursuant to provisions of this Agreement.

d) Award in Your Favor. For Disputes in which you or Epson seeks $75,000 or less in damages exclusive of attorney's fees and costs, if the arbitrator's decision results in an award to you in an amount greater than Epson's last written offer, if any, to settle the Dispute, Epson will: (i) pay you $1,000 or the amount of the award, whichever is greater; (ii) pay you twice the amount of your reasonable attorney's fees, if any; and (iii) reimburse you for any expenses (including expert witness fees and costs) that your attorney reasonably accrues for investigating, preparing, and pursuing the Dispute in arbitration. Except as agreed upon by you and Epson in writing, the arbitrator shall determine the amount of fees, costs, and expenses to be paid by Epson pursuant to this Section 1.6d).

e) Attorney's Fees. Epson will not seek its attorney's fees and expenses for any arbitration commenced involving a Dispute under this Agreement. Your right to attorney's fees and expenses under Section 1.6d) above does not limit your rights to attorney's fees and expenses under applicable law; notwithstanding the foregoing, the arbitrator may not award duplicative awards of attorney's fees and expenses.

1.7 Opt-out. You may elect to opt-out (exclude yourself) from the final, binding, individual arbitration procedure and waiver of class and representative proceedings specified in this Agreement by sending a written letter to the Epson Address within thirty (30) days of your assent to this Agreement (including without limitation the purchase, download, installation of the Software or other applicable use of Epson Hardware, products and services) that specifies (i) your name, (ii) your mailing address, and (iii) your request to be excluded from the final, binding individual arbitration procedure and waiver of class and representative proceedings specified in this Section 1. In the event that you opt-out consistent with the procedure set forth above, all other terms shall continue to apply, including the requirement to provide notice prior to litigation.

1.8 Amendments to Section 1. Notwithstanding any provision in this Agreement to the contrary, you and Epson agree that if Epson makes any future amendments to the dispute resolution procedure and
class action waiver provisions (other than a change to Epson’s address) in this Agreement, Epson will obtain your affirmative assent to the applicable amendment. If you do not affirmatively assent to the applicable amendment, you are agreeing that you will arbitrate any Dispute between the parties in accordance with the language of this Section 1 (or resolve disputes as provided for in Section 1.7, if you timely elected to opt-out when you first assented to this Agreement).

1.9 Severability. If any provision in this Section 1 is found to be unenforceable, that provision shall be severed with the remainder of this Agreement remaining in full force and effect. The foregoing shall not apply to the prohibition against class or representative actions as provided in Section 1.5. This means that if Section 1.5 is found to be unenforceable, the entire Section 1 (but only Section 1) shall be null and void.
