Turning the Projector On
1. Turn on your computer or image source.
2. Remove the lens cover.
3. Press the ( ) On button. After the status light stays blue, the projector is ready.

Note: If the Direct Power On function is enabled, you can turn on the projector without pressing the ( ) On button; just plug it in or flip the switch controlling the outlet to which the projector is connected. To turn on this feature, see the online User’s Guide.

Changing the Language of the Projector Menus
The default language of the projector’s menu system is English, but you can change it as necessary.
1. Press the Menu button to access the projector’s menu system.
2. Select Extended > Language.
3. Select your language.
4. When you’re done, press the Menu button to exit.

Switching Between Image Sources
Press the Search button (remote control) or one of the source buttons (remote control or projector).

Displaying a Test Pattern
1. Press the Test Pattern button on the projector or remote control.
2. Press the ( or ) arrow buttons to change the test pattern.
3. When you’re done, press the Esc button to clear the test pattern.

Changing Screen Type
Set the Screen Type setting to the screen’s aspect ratio.
1. Press the Menu button.
2. Select Extended > Display > Screen > Screen Type.
3. Select the screen’s aspect ratio.

Note: The displayed image should match the screen’s size and shape.
4. When you’re done, press the Menu button to exit.

Adjusting Image Position
1. Press the Lens Shift button on the remote control or projector.
2. Press the arrow buttons to adjust the position of the projected image.
3. When you’re done, press the Esc button to finish the adjustment.

Correcting Image Shape
If your image is uneven on the sides, you can use the projector’s distortion correction features, such as H/V-Keystone and Quick Corner®, to alter the shape. See the online User’s Guide.

Making Other Image Adjustments
For help on using the projector’s features to improve the image quality, see the online User’s Guide. You can also view information on how to adjust the image color, position, and edges (Edge Blending) when projecting from multiple projectors to create one seamless widescreen image.

Checking Status Information
1. Press the button on the projector to light up the LCD screen.
2. Press the ( or ) arrow buttons to view different categories of status information.
3. Press the ( or ) arrow buttons to scroll through the information.

Note: See the online User’s Guide for more information.

Turning the Projector Off
Press the Standby button to turn the projector off. If you see a confirmation message, press the Standby button again.

Note: If the Direct Power On function is enabled, you can unplug the projector or flip the switch controlling the outlet to which the projector is connected instead. To turn on this feature, see the online User’s Guide.

Troubleshooting
If you see a blank screen or the message No signal
1. Make sure the status light on the projector is blue and not flashing, and the lens cover is removed.
2. Make sure the cables are connected correctly. See the online User’s Guide.
3. You may need to change the image source. See “Switching Between Image Sources.” Also make sure the device source is turned on.

If the projector and the notebook don’t display the same image

Windows®
Press the function key on your keyboard that lets you display on an external monitor. It may be labeled CRT/LCD or have an icon such as . You may have to hold down the Fn key while pressing it (such as + F7). Wait a moment for the display to appear. You may need to press the keys again to display the image on both devices.

Mac®
Open System Preferences and select Displays. Click the Arrange tab and select the Mirror Displays checkbox.

Turning the Projector On
1. Turn on your computer or image source.
2. Remove the lens cover.
3. Press the ( ) On button. After the status light stays blue, the projector is ready.

Note: If the Direct Power On function is enabled, you can turn on the projector without pressing the ( ) On button; just plug it in or flip the switch controlling the outlet to which the projector is connected. To turn on this feature, see the online User’s Guide.

Checking Status Information

1. Press the button on the projector to light up the LCD screen.
2. Press the or arrow buttons to view different categories of status information.
3. Press the or button to scroll through the information.

Note: See the online User’s Guide for more information.

Turning the Projector Off

Press the Standby button to turn the projector off. If you see a confirmation message, press the Standby button again.

Note: If the Direct Power On function is enabled, you can unplug the projector or flip the switch controlling the outlet to which the projector is connected directly. To turn on this feature, see the online User’s Guide.

With Epson’s Instant Off® technology, you don’t have to wait for the projector to cool down; just turn it off or unplug it when you’re done.

Troubleshooting

If you see a blank screen or the message No signal

• Make sure the status light on the projector is blue and not flashing, and the lens cover is removed.
• Make sure the cables are connected correctly. See the online User’s Guide.
• You may need to change the image source. See “Switching Between Image Sources.” Also, make sure the device source is turned on.

If the projector and the notebook don’t display the same image

Windows®

Press the function key on your keyboard that lets you display an external monitor. It may be labeled CRT/LCD or have an icon such as . You may have to hold down the Fn key while pressing it (such as Fn + F7). Wait a moment for the display to appear. You may need to press the keys again to display the image on both devices.

OS X

Open System Preferences and select Displays. Click the Arrangement tab and select the Mirror Displays checkbox.

Where to Get Help

Mailing Epson products

To return your product for service, call 800-GO-EPSON (800-463-7766). Or you can purchase online at www.epsonstore.com (U.S.) or www.epson.ca (Canadian sales).

Purchase supplies and accessories

You can purchase an air filter (V13H134A02), screens, and other accessories from an Epson authorized reseller. To find the nearest reseller, call 800-GO-EPSON (800-463-7766). Or you can purchase online at www.epsonstore.com (U.S. sales) or www.epson.ca (Canadian sales).
Turning the Projector On
1. Turn on your computer or image source.
2. Remove the lens cover.
3. Press the (O) On button. After the status light stays blue, the projector is ready.

Note: If the Direct Power On function is enabled, you can turn the projector on without pressing the (O) On button; just plug it in or flip the switch controlling the outlet to which the projector is connected. To turn on this feature, see the online User’s Guide.

4. If your image does not appear, see “Switching Between Image Sources” or “Troubleshooting.”

Changing the Language of the Projector Menus
The default language of the projector’s menu system is English, but you can change it as necessary.
1. Press the Menu button to access the projector’s menu system.
2. Select Extended > Language.
3. Select your language.
4. When you’re done, press the Menu button to exit.

Switching Between Image Sources
Press the Search button (remote control) or one of the source buttons (remote control or projector).

Displaying a Test Pattern
1. Press the Test Pattern button on the projector or remote control.
2. Press the ▲ or ▼ arrow buttons to change the test pattern.
3. When you’re done, press the Esc button to clear the test pattern.

Changing Screen Type
Set the Screen Type setting to the screen’s aspect ratio.
1. Press the Menu button.
2. Select Extended > Display > Screen > Screen Type.
3. Select the screen’s aspect ratio.

Note: The displayed image should match the screen’s size and shape.
4. When you’re done, press the Menu button to exit.

Adjusting Image Position
1. Press the Lens Shift button on the remote control or projector.
2. Press the arrow buttons to adjust the position of the projected image.
3. When you’re done, press the Esc button to finish the adjustment.

Correcting Image Shape
If your image is uneven on the sides, you can use the projector’s distortion correction features, such as H/V-Keystone and Quick Corner®, to adjust the shape. See the online User’s Guide.

Making Other Image Adjustments
For help on using the projector’s features to improve the image quality, see the online User’s Guide. You can also view information on how to adjust the image color, position, and edges (Edge Blending) when projecting from multiple projectors to create one seamless widescreen image.

Checking Status Information
1. Press the Esc button on the projector to light up the LCD screen.
2. Press the ▲ or ▼ arrow buttons to view different categories of status information.
3. Press the ◄ or ► arrow buttons to scroll through the information.

Note: See the online User’s Guide for more information.

Turning the Projector Off
Press the Standby button to turn the projector off. If you see a confirmation message, press the Standby button again.

Note: If the Direct Power On function is enabled, you can unplug the projector or flip the switch controlling the outlet to which the projector is connected instead. To turn on this feature, see the online User’s Guide.
