Loading Paper for Documents

You can print documents on a variety of paper types and sizes.

1. Flip the feeder guard forward.

2. Pull up the paper support and its extension.
3. Pull out the output tray and open the paper stopper.

Note: If you print on legal-size or longer paper, leave the paper stopper closed.

4. Slide the edge guide left.
5. Insert paper, glossy or printable side up and short edge first, against the right side. If you are inserting a stack of paper, fan the sheets first and tap the stack on a flat surface to even the edges.

6. Slide the edge guide against the paper, but not too tightly.

7. Flip the feeder guard back.
Always follow these paper loading guidelines:
• Load only the recommended number of sheets.
• Load paper short edge first, no matter which way your document faces.
• Load letterhead or pre-printed paper top edge first.
• Do not load paper above the arrow mark inside the edge guide.
• Check the paper package for any additional loading instructions.
• If you use paper with binder holes, load only one sheet at a time. Make sure the holes are only on the sides of the paper; do not load paper with holes at the top or bottom.

Placing Originals on the Product

Follow the instructions here to place your original documents or photos on the product.

**Caution:** Do not place anything on top of your product or use its cover as a writing surface to avoid damaging it.

Placing Originals on the Scanner Glass

You can place originals up to this size on the scanner glass: Letter (8.5 × 11 inches [216 × 279 mm]) or A4 (8.3 × 11.7 inches [210 × 297 mm]).

1. Open the document cover.
2. Place your original facedown on the scanner glass with the top facing into the corner. Slide the original to the edges of the indicated corner.

Note: You can place multiple originals on the scanner glass. Just make sure they are at least 0.2 inch (4.5 mm) away from the edge of the scanner glass and at least 0.8 inch (20 mm) away from each other.

3. Close the document cover gently to keep your original in place.

Copying Documents or Photos

Copying Documents or Photos

You can copy color or black-and-white documents or photos onto plain paper.

1. Place your original document or photo on the product.
2. Load plain paper in the product.
3. Do one of the following to start copying:
   • To copy a black-and-white document or photo, press the B&W copy button.
   • To copy a color document or photo, press the color copy button.
   • To make more than one copy, repeatedly press the B&W copy button or the color copy button for the number of copies you need (up to 20 copies). For example, to make 4 copies, press the button four times. Make sure you press the button in intervals of less than one second.
   • To copy in draft mode, press and hold the B&W copy button or the color copy button, then press the stop button within 3 seconds.

The product scans and prints your copy.

Note: To cancel copying, press the stop button.

Printing from a Computer

Before printing from your computer, make sure you have set up your product and installed its software as described on the Start Here sheet.

**Note:** If you have an Internet connection, it is a good idea to check for updates to your product software on Epson's support website. If you see a Software Update screen, select **Enable automatic checking** and click **OK**. The update scans your system to see if you have the latest product software. Follow the on-screen instructions.

Refilling Ink

When the ink level is below the lower line on an ink tank, you need to refill it.
Before checking the ink level or refilling an ink tank as described here, be sure to read the ink safety precautions.

Caution: If the ink level is below the lower line on the ink tank, fill it to the upper line on the ink tank. Continued use of the product when the ink level is below the lower line on the tank could damage the product.

Ink Safety Precautions

Ink Handling Precautions
• Keep ink bottles and the ink tank unit out of the reach of children. Do not allow children to drink from or handle the ink bottles and bottle caps.
• Do not tilt or shake an ink bottle after opening it; otherwise, ink may leak.
• If ink gets on your skin, wash it thoroughly with soap and water. If ink gets into your eyes, flush them immediately with water. If ink gets into your mouth, spit it out immediately.

Ink Refilling Precautions
• Use ink bottles with the correct part number for this product.
• The use of non-Epson ink may cause damage that is not covered by Epson’s warranty, and under certain circumstances, may cause erratic product behavior.
• This product requires careful handling of ink. Ink may splatter when the ink tanks are filled or refilled with ink. If ink gets on your clothes or belongings, it may not come off.
• Do not open the ink bottle package until you are ready to fill an ink tank. Ink bottles are vacuum packed to maintain reliability. If you leave an ink bottle unpacked for a long time before using it, print quality may be affected.
• If the ink level is below the lower line on the ink tank, refill the ink. Continued use of the product when the ink level is below the lower line on the ink tank could damage the product.

• Epson recommends filling all ink tanks to the upper line when the product is not operating to reset the ink levels.

• Epson recommends filling all ink tanks to the upper line when the product is not operating.

• After bringing an ink bottle inside from a cold storage site, allow it to warm up at room temperature for at least three hours before using it.

• Store ink bottles in a cool, dark place.

• Store the ink bottles in the same environment as the product. When storing or transporting an opened ink bottle, do not tilt the bottle and do not subject it to impacts or temperature changes. Otherwise, ink may leak even if the cap on the ink bottle is tightened securely. Be sure to keep the ink bottle upright when tightening the cap, and take measures to prevent ink from leaking when you transport the bottle.

**Ink Bottle and Ink Tank Information**

• To maintain optimum print head performance, some ink is consumed from all ink tanks during printing and when performing maintenance operations, such as cleaning the print head.

• The ink bottles may contain recycled materials, but this does not affect product function or performance.

• When printing in monochrome or grayscale, color ink may be used instead of black ink, depending on the paper type or print quality settings. This is because a mixture of color inks is used to create black.

**Parent topic:** Refilling Ink

**Check Ink Levels**

To confirm the actual ink remaining, visually check the ink levels in the product’s ink tanks. Make sure the ink levels are above the lower lines on the ink tanks.
Caution: If the ink level is below the lower line on the ink tank, fill it to the upper line on the ink tank. Continued use of the product when the ink level is below the lower line on the tank could damage the product.

Disabling Special Offers with Windows

You can disable special offers messages from Epson using a utility on your Windows computer.

Note: You may see the Epson Special Offers screen every time you print (if your computer is connected to the Internet). Select Do not display this message again and click Decline to disable online offers. Promotional offers are not valid in Latin America.

1. Access the Windows Desktop and right-click the icon for your product in the right side of the Windows taskbar, or click the up arrow and right-click . Select Monitoring Preferences.
You see this window:

2. To disable promotional offers, deselect the **Display Epson Offers** checkbox. (Promotional offers are not available in Latin America.)

Purchase Epson Ink

You can purchase genuine Epson ink and paper from an Epson authorized reseller. To find the nearest reseller, visit epson.com.jm or call your nearest Epson sales office.

**Note:** This product was originally designed to work with genuine Epson inks. Your product may not function properly if you use other types of ink and may affect Epson's warranty.

The included ink bottles must be used for printer setup and are not for resale. The printer ships with full ink bottles and part of the ink from the first bottles is used to charge the print head. Yields vary considerably based on images printed, print settings, paper type, frequency of use, and temperature.

The ink bottles that came with your printer have a lower yield due to the ink charging process. This process is carried out the first time you turn on the printer and guarantees better performance. Do not load paper before refilling the ink tanks.

### Refilling the Ink Tanks

Make sure you have new ink bottles handy and have read the ink safety precautions before you begin.

You can continue to use the product even if one or more ink tanks are not filled all the way. However, to keep your product operating at its best, fill all the ink tanks up to the top line.

**Caution:** Wear plastic gloves while refilling the ink tanks to avoid staining your hands.
1. Place a sheet of paper under the ink tank area in case of spills.
2. Turn on your product.
3. Make sure the power light is on, but not flashing.
4. Unhook the ink tank unit from the product and lay it down.

![Image of an ink tank unit being unhooked](image)

**Note:** Do not pull on the ink tubes.

5. Open the ink tank unit cover, then remove the cap of the ink tank that you're going to refill.

![Image of an ink tank unit cover being opened](image)
Note: Make sure the color of the ink tank matches the ink color you want to refill, and only remove the cap from that ink tank. Be careful not to spill any ink.

6. Snap off the tip of the bottle cap, but do not dispose of it so you can use it to seal the bottle cap later, if necessary. Then remove the bottle cap and carefully remove the protective seal (avoid touching the ink underneath the seal), then close the bottle cap tightly.

Note: Make sure the color of the ink bottle matches the ink color you want to refill.
Caution: Close the bottle cap tightly; otherwise, ink may leak.

7. Refill the ink tank with the correct color ink up to the upper line on the ink tank.
8. If any ink remains in the ink bottle after filling the ink tank, place the bottle cap tip securely on the bottle cap and store the ink bottle upright for later use.

9. Place the cap securely on the ink tank.

10. Repeat the previous steps as necessary for each ink color you need to refill.
11. Close the ink tank unit cover.

12. Hook the ink tank unit onto the product.

Print Head Maintenance

If your printouts become too light, or you see dark or light bands across them, you may need to clean the print head nozzles. Cleaning uses ink, so clean the nozzles only if print quality declines.

You can check for clogged nozzles before you clean them so you don’t clean them unnecessarily.

Note: You cannot clean the print head if the ink level has reached the lower line on the ink tank, and may not be able to clean it when the ink level in any of the tanks is low. You must refill the ink tank first.

Cleaning Your Product

To keep your product working at its best, you should clean it several times a year.
Close the output tray and paper support when you are not using the product to protect it from dust.

Caution: Do not use a hard brush, alcohol, or paint thinner to clean the product or you may damage it. Do not use oil or other lubricants inside the product or let water get inside it.

1. Turn off the product.
2. Unplug the power cable.
3. Disconnect any connected cables.
4. Remove all the paper.
5. Clean the scanner glass with a soft, lint-free cloth (microfiber is recommended), moistened with a little glass cleaner.

Caution: Do not spray glass cleaner directly on the glass and do not press the glass surface with any force.

6. Clean the outer case and control panel with a soft, dry cloth. Do not use liquid or chemical cleansers.

Parent topic: Cleaning and Transporting Your Product

Transporting Your Product

If you need to store your product or transport it some distance, prepare it for transportation as described here.

Caution: During transportation and storage, follow these guidelines:

- Avoid tilting the product, placing it vertically, or turning it upside down; otherwise ink may leak.
- When storing or transporting an ink bottle after removing its seal, do not tilt the bottle and do not subject it to impacts or temperature changes. Otherwise, ink may leak even if the cap on the ink bottle
is tightened securely. Be sure to keep the ink bottle upright when tightening the cap, and take measures to prevent ink from leaking when transporting the ink bottles.

**Note:** Before storing your product for a long period, replace low, expended, or expired ink to help prevent the print head from drying out. Store your product in a cool, dry place.

1. Turn off the product.
2. Lift up the scanner unit and check to see if the print head is in the far right position (the home position). If not, turn on the product, wait for the print head to move to the far right, then turn the product off again.
3. Secure the print head to the case with tape.

**Caution:** Do not place tape on the white flat cable inside the product; otherwise, you may damage your product.

4. Lower the scanner unit.
5. Remove all the paper from the product.
6. Close the output tray and paper support, if necessary.

7. Unplug the power cable.
8. Disconnect any connected cables.
9. Unhook the ink tank unit from the product and lay it down.

**Note:** Do not pull on the ink tubes.
10. Open the ink tank unit cover and check to make sure that the ink tank caps are installed securely.

11. Hook the ink tank unit onto the product.

12. Place the product in its original packaging materials, if possible, or use equivalent cushioning around the product.

   **Caution:**
   - Keep the product level during transport. Otherwise, ink may leak.
   - Do not put opened ink bottles in the box with product.

Checking for Software Updates

Periodically, it's a good idea to check Epson's support website for free updates to your product software. Visit epson.com.jm/support and select your product.

- **Windows**: Your printer software automatically checks for updates. You can also manually update the software by selecting **Software Update** here:
  
  - Accessing the Windows Desktop and right-clicking the 📑 icon for your product in the right side of the Windows taskbar, or clicking the up arrow and right-clicking 📑.
  
  - On the **Maintenance** tab in the printer settings window

You can also update the software by selecting **EPSON Software Updater** in the **EPSON** or **EPSON Software** program group, accessible by the **Start** button, or on the **Start** or **Apps** screens, depending on your version of Windows.

- **OS X**: You can manually update the software by opening the **Applications > Epson Software** folder and selecting **EPSON Software Updater**.

- **macOS 10.12.x or 10.13.x**: You can manually update the software by opening the **App Store**, selecting **Updates**, searching for a software update option for Epson Software, and selecting **Update**.

### Running a Product Check

Running a product check helps you determine if your product is operating properly.

1. Press the power button to turn off the product.
2. Disconnect any interface cables connected to your product.
3. Load plain paper in the product.
4. Hold down the stop button and press the power button to turn on the product.
5. When the product turns on, release both buttons.
The product begins printing a nozzle check pattern.

6. Do the following, depending on the results of the product check:

- If the page prints and the nozzle check pattern is complete, the product is operating properly. Any operation problem you may have could be caused by your computer, cable, software, or selected settings. Check the other solutions in this manual or try uninstalling and reinstalling your printer software.
- If the page prints but the nozzle check pattern has gaps, clean or align the print head.
- If the page does not print, the product may have a problem. Check other available solutions. If they do not work, contact Epson.

Noise After Filling the Ink
If you hear noises from your product after filling the ink tanks with ink, check these explanations:

- The first time you fill the tanks with ink, the product must charge its print head. Wait until charging finishes before you turn off the product, or it may charge improperly and use excess ink the next time you turn it on. Your product is finished charging the print head when the power light stops flashing.
• If the product's print head stops moving or making noise, and the charging process has not finished after approximately 20 minutes, turn off your product. Turn it back on and check to see if charging is still in progress. If it is still in progress, contact Epson for help.

• Make sure your product is turned on and any necessary cables are securely connected at both ends. If you still have problems installing software, disconnect the cable and carefully follow the instructions on the Start Here sheet. Also make sure your system meets the requirements for your operating system.

• Close any other programs, including screen savers and virus protection software, and install your product software again.

• In Windows, make sure your product is selected as the default printer and the correct port is shown in the printer properties.

• If you see any error message or your software does not install correctly in Windows, you may not have software installation privileges. Contact your system administrator.

Paper Feeding Problems

If you have problems feeding paper, try these solutions:

• If paper does not feed for printing, remove it. Then reload it in the sheet feeder against the right side and beneath the tab. Slide the edge guide against the edge of the paper, making sure that the paper stack is not above the arrow mark on the edge guide.

• If multiple pages feed at once, remove the paper, fan the edges to separate the sheets, and reload it.

• If paper jams when you load only one or two sheets, try loading more sheets at a time. Do not load more than the recommended number of sheets.

• If paper jams when you print on both sides of the paper, try loading fewer sheets.

• Make sure your paper meets the specifications for your product.

• For best results, follow these guidelines:
  • Use new, smooth, high-quality paper that is not curled, creased, old, too thin, or too thick.
  • Load paper in the sheet feeder printable side up.

Product Icon Does Not Appear in Windows Taskbar

If you do not see your product icon in the Windows taskbar, first try restarting your computer. If that does not work, try this solution:

1. Do one of the following:
   - **Windows 10**: Click and select (Settings) > Devices > Printers & scanners. Select your product name and select Manage > Printing preferences.
   - **Windows 8.x**: Navigate to the Apps screen and select Control Panel > Hardware and Sound > Devices and Printers. Right-click your product name, select Printing Preferences, and select your product name again if necessary.
   - **Windows 7**: Click and select Devices and Printers. Right-click your product name, select Printing Preferences, and select your product name again if necessary.
   - **Windows Vista**: Click , select Control Panel, and click Printer under Hardware and Sound. Right-click your product name, select Printing Preferences, and select your product name again if necessary.
   - **Windows XP**: Click Start and select Printers and Faxes. (Or open the Control Panel, select Printers and Other Hardware, if necessary, and Printers and Faxes.) Right-click your product name, select Printing Preferences, and select your product name again if necessary.

2. Click the Maintenance tab.
3. Click the Extended Settings button.
4. Select Enable EPSON Status Monitor 3 and click OK.
5. Click the Monitoring Preferences button.
6. Click the checkbox for the option that adds the shortcut icon to the taskbar.
7. Click OK to close the open program windows.

Printing is Slow

If printing becomes slow, try these solutions:

- Make sure your system meets the requirements for your operating system. If you are printing a high-resolution image, you may need more than the minimum requirements. If necessary, increase your system's memory.
- If you are using Windows 7, close the Devices and Printers window before you print.
• Make sure Quiet Mode is turned off.
• Clear space on your hard drive or run a defragmentation utility to free up existing space.
• Close any programs you are not using when you print.
• If your product is connected to a USB hub, connect it directly to your computer instead.
• If printing becomes slower after printing continuously for a long time, the product may have automatically slowed down to protect the print mechanism from overheating or becoming damaged. Let the product rest with the power on for 30 minutes, then try printing again.

For the fastest printing, select the following settings in your product software:

• Make sure the paper type setting matches the type of paper you loaded.
• Turn on any high speed settings in your product software.
• Select a lower print quality setting.

Windows: Click the Maintenance or Utility tab, select Extended Settings or Speed and Progress, and select the following settings:
  • High Speed Copies
  • Always Spool RAW Datatype
  • Page Rendering Mode
  • Print as Bitmap

If printing is still slow and you are using Windows 7 or Windows Vista, try the following:

1. Click and select Computer or My Computer. Double-click the C: drive and open these folders: ProgramData > EPSON > PRINTER.

   **Note:** If you do not see the ProgramData folder, open the Organize menu and select Folder and search options. In the window that appears, click the View tab, select Show hidden files, folders, and drives in the Advanced settings list, and click OK.

2. Right-click the EPAUDF01.AUD file and select Delete.
3. Restart your computer and try printing again.

If you notice white or dark lines in your prints (also called banding), try these solutions before you reprint:

• Run a nozzle check to see if any of the print head nozzles are clogged. Then clean the print head, if necessary.
• Make sure the paper type setting matches the type of paper you loaded.
• Make sure you loaded the printable side of the paper correctly for your product.
• Turn off any high speed settings in your product software.
• Align the print head.
• You may need to refill the ink. Visually check the ink levels.
• If you have not used the product for a long time, run the Power Ink Flushing utility.

Note: Flushing the ink tubes replaces all the ink inside the tubes, so flush the ink only if you cannot improve print quality by other means.

Blurry or Smeared Printout

If your printouts are blurry or smeared, try these solutions:

• Make sure your paper is not damp, curled, old, or loaded incorrectly in your product.
• Use a support sheet with special paper, or load special paper one sheet at a time.
• Make sure your paper meets the specifications for your product.
• Use Epson papers to ensure proper saturation and absorption of genuine Epson inks.
• Make sure the paper type setting in your product software matches the type of paper you loaded.
• Make sure you loaded the printable side of the paper correctly for your product.
• Remove each sheet from the output tray as it is printed.
• Avoid handling printouts on glossy paper right after printing to allow the ink to set.
• Turn off any high speed settings in your product software.
• If you print on both sides of a sheet of paper, smudges may appear on the reverse side of heavily saturated or dark images. If one side of a sheet will contain a lighter image or text, print that side first.
• The ink levels may be low and you may need to refill the ink. Visually check the ink levels.
• Run a nozzle check to see if any of the print head nozzles are clogged. Then clean the print head, if necessary.
• Align the print head.
• Clean the paper path.
• If you printed when the ink levels were too low to be seen in the ink tank windows, refill the ink tanks to the upper lines and run the Power Ink Flushing utility. Then run a nozzle check to see if print quality has improved.
• If you have not used the product for a long time, run the Power Ink Flushing utility.

  **Note:** Flushing the ink tubes replaces all the ink inside the tubes, so flush the ink only if you cannot improve print quality by other means.

  **Note:** Your product will not operate properly while tilted at an angle. Place it on a flat, stable surface that extends beyond the base of the product in all directions.

Grainy Printout

If your printouts are grainy, try these solutions:

• Make sure you loaded the printable side of the paper correctly for your product.
• Select a higher print quality setting and turn off any high speed settings in your product software.
• Run a nozzle check to see if any of the print head nozzles are clogged. Then clean the print head, if necessary.
• Align the print head.
• You may need to increase the image resolution or print a smaller size; see your software documentation.

**Note:** Images from the Internet may be low resolution and not result in a high quality printout.

• If you enlarged the image size in an image-editing program, you need to increase the image resolution setting to retain a high image quality. Increase the image resolution by the same amount you increase the image size. For example, if the image resolution is 300 dpi (dots per inch) and you will double the image size for printing, change the resolution setting to 600 dpi.

**Note:** Higher resolution settings result in larger file sizes, which take longer to process and print. Consider the limitations of your computer system when selecting a resolution, and select the lowest possible resolution that produces acceptable quality to keep file sizes manageable.
Incorrect Colors

If your printouts have incorrect colors, try these solutions:

• Make sure the paper type setting matches the paper you loaded.
• Make sure the Black/Grayscale or Grayscale setting is not selected in your printer software.
• Run a nozzle check to see if any of the print head nozzles are clogged. Then clean the print head, if necessary.
• The ink levels may be low and you may need to refill the ink. Visually check the ink levels.
• If you printed when the ink levels were too low to be seen in the ink tank windows, refill the ink tanks to the upper lines and run the Power Ink Flushing utility. Then run a nozzle check to see if print quality has improved.
• After you print, the colors in your printout need time to set as the ink dries. During this time, the colors may look different than you expect. To speed up drying time, do not stack your printouts on top of each other.
• Your printed colors can never exactly match your on-screen colors. However, you can use a color management system to get as close as possible. Try using the color management options in your printer software.
• For best results, use genuine Epson ink and paper.
• If you have not used the product for a long time, run the Power Ink Flushing utility.

   **Note:** Flushing the ink tubes replaces all the ink inside the tubes, so flush the ink only if you cannot improve print quality by other means.

Scanning Software Does Not Operate Correctly

If your scanning software does not operate correctly, try these solutions:

- Make sure your computer has adequate memory and meets the system requirements for your operating system.
- Make sure your computer is not running in a power-saving mode, such as sleep or standby. If so, wake your system and restart your scanning software.
- If you upgraded your operating system but did not reinstall your scanning software, try reinstalling it.
- In Windows, make sure your product is listed as a valid device in the Scanners and Cameras control panel.

If you cannot start Epson Scan 2, try these solutions:

- Make sure your product is turned on and any interface cables are securely connected at both ends.
• Make sure Epson Scan 2 is selected as your scanning program.
• Make sure your computer is not running in a power-saving mode, such as sleep or standby. If so, wake your system and restart Epson Scan 2.
• Check the connection setting and test the connection using Epson Scan 2 Utility:

  **Windows 10:** Click 💾 and select EPSON > Epson Scan 2 Utility. Make sure the correct product is selected. If necessary, select the Other tab and click Reset.

  **Windows 8.x:** Navigate to the Apps screen and select Epson Scan 2 Utility. Make sure the correct product is selected. If necessary, select the Other tab and click Reset.

  **Windows (other versions):** Click or Start > All Programs or Programs > EPSON > Epson Scan 2 > Epson Scan 2 Utility. Make sure the correct product is selected. If necessary, select the Other tab and click Reset.

  **Mac:** Open the Applications folder, click Epson Software, and click Epson Scan 2 Utility. Make sure the correct product is selected. If necessary, select the Other tab and click Reset.

• Make sure you do not have multiple versions of Epson Scan 2 installed. If you do, uninstall both versions and install one version.
• If you upgraded your operating system but did not reinstall Epson Scan 2, try reinstalling it.

- Line of Dots Appears in All Scanned Images
- Straight Lines in an Image Appear Crooked
- Image is Distorted or Blurry
- Image Colors are Patchy at the Edges
- Image is Too Dark
- Back of Original Image Appears in Scanned Image
- Ripple Patterns Appear in an Image
If your scanned image consists only of a few dots, try these solutions:

- Make sure you placed your original for scanning facing the correct way.
- If you are scanning using the Epson Scan 2 Black & White setting, adjust the Threshold setting and scan again.

If a scanned image appears distorted or blurry, try these solutions:

- Make sure your original is not wrinkled or warped. This may prevent the original from laying flat on the scanner glass.
- Do not move your original or your product during scanning.
- Your product will not operate properly while tilted at an angle. Place your product on a flat, stable surface that extends beyond its base in all directions.
- Adjust these Epson Scan 2 settings (if available) and try scanning again:
  - Increase the Resolution setting.
  - If the Image Type setting is Black & White, adjust the Threshold setting.
  - Select the Unsharp Mask setting.
  - If the Image Type setting is Black & White, select Text Enhancement. If the Image Type setting is Color or Grayscale, change the Text Enhancement setting to High.

**Back of Original Image Appears in Scanned Image**
If an image from the back of a thin original appears in your scanned image, try these solutions:
- Place a piece of black paper on the back of the original and scan it again.
- Adjust these Epson Scan 2 settings (if available) and try scanning again:
  - Select the Advanced Settings tab and adjust the Brightness setting.
  - Select Text Enhancement.

**Ripple Patterns Appear in an Image**
You may see a ripple pattern (called a moiré) in scanned images of printed documents. This is caused by interference from differing pitches in the scanner's screen and your original's halftone screen. To reduce this effect, adjust these Epson Scan 2 settings (if available) and try scanning again:
- Select the Descreening setting.
- Select a lower Resolution setting.

**Scanned Image Colors Do Not Match Original Colors**
Printed colors can never exactly match the colors on your computer monitor because printers and monitors use different color systems: monitors use RGB (red, green, and blue) and printers typically use CMYK (cyan, magenta, yellow, and black).
Check the color matching and color management capabilities of your computer, display adapter, and the software you are using to see if they are affecting the palette of colors you see on your screen.
To adjust the colors in your scanned image, adjust these Epson Scan 2 settings (if available) and try scanning again:
- If the Image Type setting is Color or Grayscale, adjust the Contrast setting.
• If the **Image Type** setting is **Black & White** or **Grayscale**, adjust the **Color Enhance** setting.

### Ink Specifications

**Note:** This product was originally designed to work with genuine Epson inks. Your product may not function properly if you use other types of ink and may affect Epson's warranty.

The included ink bottles must be used for printer setup and are not for resale. The printer ships with full ink bottles and part of the ink from the first bottles is used to charge the print head. Yields vary considerably based on images printed, print settings, paper type, frequency of use, and temperature.

The ink bottles that came with your printer have a lower yield due to the ink charging process. This process is carried out the first time you turn on the printer and guarantees better performance. Do not load paper before refilling the ink tanks.

**Color**

Cyan, Magenta, Yellow, Black

**Ink life**

For best results, use up ink within 6 months of removing the seal from an ink bottle.

**Temperature**

- **Storage:** –4 to 104 °F (–20 to 40 °C)
- **1 month at 104 °F (40 °C)**
- **Ink freezes at 5 °F (–15 °C)**
- **Ink thaws and is usable after 2 hours at 77 °F (25 °C)**

FCC Compliance Statement

For United States Users

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio or television reception. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause interference to radio and television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

WARNING

The connection of a non-shielded equipment interface cable to this equipment will invalidate the FCC Certification or Declaration of this device and may cause interference levels which exceed the limits established by the FCC for this equipment. It is the responsibility of the user to obtain and use a shielded equipment interface cable with this device. If this equipment has more than one interface connector, do not leave cables connected to unused interfaces. Changes or modifications not expressly approved by the manufacturer could void the user’s authority to operate the equipment.
