Quick Setup

Before using the projector, make sure you read the safety instructions in the online User's Guide.

Note: Your product may differ from the illustrations on this sheet, but the instructions are the same.

Connect the projector

Choose from the following connections. See the sections below or the online User's Guide for details.

Computer

Connect one end of a VGA cable to the projector's Computer 1 or Computer 2 Monitor Out port, and the other end to your laptop or computer's monitor port. Make sure to switch your laptop to external monitor and external speakers.

HDMI port

Connect one end of an HDMI cable to the projector's HDMI port, and the other end to an HDMI port on your computer.

USB port

Connect the square end of a USB cable to the projector's USB-A (flat) port, and the other end to your laptop or computer. Make sure the projector and HDBaseT transmitter are turned off when connecting or disconnecting the network cable between them.

Camera, USB device, or document camera

Connect a digital camera, USB flash drive, USB storage device, or Epson DC-07 document camera to the projector's USB-B (square) port.

HDBaseT™ transmitter (PowerLite 2165W/2265U)

Connect an HDBaseT transmitter to the HDBaseT port.

Some devices may require an adapter or may not require an HDMI cable. Not all features or functions may be supported. Check your device’s documentation for more information.

Adjust the image

If you connect a digital camera, USB flash drive, or USB storage device, you can use the projector’s PC free feature. You can also connect other Epson document cameras to the projector. See the online User’s Guide for details.

External monitor and external speakers

You can also connect an external monitor and external speakers to your projector to enhance your presentations. See the online User’s Guide for details.

Turn on your equipment

1. Turn on your computer or video source.
2. Plug in the projector. The On/Standby light on the projector turns blue.
3. Open the A/V Mute slide all the way.
4. Press the power button on the projector or remote control. The projector beeps, the Status light flashes blue, and then stays on.

Note: To shut down the projector, press the power button twice.

5. Use the arrow buttons on the remote control to highlight any of the options on the Home screen that appears, then press Enter to select it. You can display a QR code, switch between projection sources, and quickly access various adjustment options from this screen.

Note: Some devices may require an adapter or may not require an HDMI cable. Not all features or functions may be supported. Check your device’s documentation for more information.

Using the remote control

Install the batteries as shown (two AA batteries).

For more information on using the remote control, see the online User’s Guide.

Project wirelessly

Follow the steps here to install the included wireless LAN module and connect the projector over a wireless network. With the PowerLite 2265U, you will need the optional wireless LAN module (part number V12H731P02).

If you're projecting from a computer, it must have a wireless card or built-in wireless interface.

1. Turn off the projector and unplug the power cord.
2. Slide the air filter cover latch and open the air filter cover.
3. Remove the screw securing the wireless LAN module stopper and remove the stopper.
4. Insert the wireless LAN module into the port.

Install the batteries as shown (two AA batteries).
Quick Setup

Before using the projector, make sure you read the safety instructions in the online User's Guide.

Note: Your product may differ from the illustrations on this sheet, but the instructions are the same.

Connect the projector

Choose from the following connections. See the sections below or the online User’s Guide for details.

Computer

Connect one end of a VGA cable to the projector’s Computer port and the other end to an HDMI port on your computer.

Note: Make sure the projector and HDBaseT transmitter are turned off when connecting or disconnecting the network cable between them.

HDMI port

Connect one end of an HDMI cable to the projector’s HDMI port (only on first connection). If the software screen does not display automatically, open USB Display Installer (EPSON_PJ_UD) and press EMP_UDSE.EXE. Double-click EPSON_PJ_UD Installer, then double-click EPSON_PJ_UD. After turning on the projector, the setup folder for USB Display appears in the Finder. Double-click USB Display (square) port.

USB port

Connect the square end of a USB cable to the projector’s USB-A or USB-B (flat) port.

USB-A or USB-B (flat) port.

Component video to VGA cable

HDMI1/MHL port.

RCA audio cable

3.5 mm stereo mini cable

VGA cable

USB cable

HDMI cable

Connect an HDBaseT transmitter to the projector’s HDBaseT port. After turning on the projector, follow the on-screen instructions to install the Epson USB Display software (PowerLite 2165W/2265U).

External monitor and external speakers

You can also connect an external monitor and external speakers to your projector to enhance your presentations. See the online User’s Guide for details.

Camera, USB device, or document camera

Connect a digital camera, USB flash drive, USB storage device, or Epson DC-07 document camera to the projector’s USB-A (flat) port.

If you connect a digital camera, USB flash drive, or USB storage device, you can use the projector’s PC Free feature. You can also connect other Epson document cameras to the projector. See the online User’s Guide for details.

To sharpen the image, turn the focus ring.

To reduce or enlarge the image, turn the zoom ring.

To raise the image, press the foot release button and lift the front of the projector. Release the button to lock the foot in position.

For more information on using the remote control, see the online User’s Guide.

Adjust the image

1. If you don’t see an image, press the Source Search button on the projector or the remote control to select the image source.

2. To raise the image, press the foot release button and lift the front of the projector. Release the button to lock the foot in position.

3. To sharpen the image, turn the focus ring.

4. Press the power button on the projector or remote control. The projector beeps, the Status light flashes blue, and then stays on.

5. Use the arrow buttons on the remote control to highlight any of the options on the Home screen that appears, then press Menu to select it. You can display a QR code, switch between projection sources, and quickly access various adjustment options from this screen.

6. The default language of the menu system is English. To select another language, press the Menu button on the projector or remote control. Select Extended and press Menu. Select Language and press Menu. Select your language and press Menu. Press the Menu button to exit the menu system.

Note: To shut down the projector, press the power button twice.

Project wirelessly

Follow the steps here to install the included wireless LAN module and connect the projector over a wireless network. With the PowerLite 2250U, you will need the optional wireless LAN module (part number V12H731P02).

If you’re projecting from a computer, it must have a wireless card or built-in wireless interface.

1. Turn off the projector and unplug the power cord.

2. Slide the air filter cover latch and open the air filter cover.

3. Insert the wireless LAN module into the port.

4. Install the batteries as shown (two AA batteries).

Using the remote control

Install the batteries as shown (two AA batteries).

Note: You can also press the Focus Help button on the projector to fine-tune your adjustments. See the online User’s Guide for details.

Your projector automatically adjusts images that are unevenly rectangular on the sides or , but if necessary you can correct the image shape using the projector’s Screen Fit feature or keystone correction buttons or . See the online User’s Guide for details.
5 Replace the wireless LAN module stopper and secure it using the screw you removed.

6 Close the air filter cover.

7 Plug in the power cord and turn on the projector.

8 Press the Menu button on the remote control, select the Network menu, and press Esc.

9 Choose Network Configuration and press Esc.

10 Select the Wireless LAN menu and press Esc.

11 Choose Connection Mode, press Esc, select Quick (for a direct connection to a computer, tablet, or smartphone in access point mode, or Advanced (for a connection to a router or access point), then press Esc again. When you’re finished, press Esc to return to the Wireless LAN menu.

12 If you chose the Advanced connection mode, select Search Access Point and press Esc. Use the arrow buttons to highlight your network name (SSID) in the list of available connections.

13 If your network has security enabled, enter your network password on the screen that appears. Make sure to enter any uppercase or lowercase letters in the correct case.

14 If you chose the Advanced connection mode, select IP Settings and press Esc.

If your network assigns addresses automatically, make sure DHCP is turned on, if not, turn off DHCP and enter the projector’s IP Address, Subnet Mask, and Gateway Address, as needed.

15 To prevent the SSID and IP address from appearing on the network standby screen, set the SSID Display and IP Address Display settings to Off.

16 When you’re finished selecting settings in the Wireless LAN menu, press Esc.

17 Select Complete and press Esc, then select Yes and press Esc again to save your settings.

Install network software

Links to download the network software and to the manuals are available from the projector CD. Downloads require an internet connection. You can also download the software and manuals from the Epson website, as described in “Where to get help.”

To monitor and control your projector over the network, install the EasyMP Monitor software (Windows only). To project from multiple PCs over the network, install the EasyMP Multi PC Projection software. To update your projector’s firmware over a wired LAN, install the EasyMP Network Updater software.

Click the icons on your desktop to view the software manuals. See the manuals for instructions on installing and using the software.

Wireless network connection

Make sure your projector and mobile device are connected to the same wireless network.

1 Press the Home button on the projector or remote control to bring up the Home screen.

2 Select Display the QR Code and press Esc.

3 Tap iProjection on your device’s Home screen.

4 Tap Read QR code.

5 Point your device’s camera at the QR code your projector displays; the QR code is read automatically.

Your device and Epson projector are now connected.

Troubleshooting

If you see a blank screen or the No signal message after turning on your computer or video device, check the following:

• Make sure the Status light on the projector is blue and not flashing, and the AV Multi Slide is open.

• Press the Source Search button on the projector or remote control to switch to the correct image source, if necessary.

• Press the Home button on the projector or remote control to verify the source input and settings.

• On Windows 7 or later, hold down the Windows key and press P at the same time, then click Duplicate.

• If you’re using a Windows laptop, press the function key on your keyboard that lets you display on an external monitor. It may be labeled CRT/LCD or have an icon such as $$. You may have to hold down the Fn key while pressing it (such as Fn + P). Wait a moment for the display to appear.

• If you’re using a Mac laptop, open System Preferences and select Displays. Click the Arrangement tab and select the Mirror Displays checkbox.

Where to get help

 Manuals

For more information about using the projector, click the icons on your desktop to access the online manuals (requires an Internet connection). If you don’t see icons to the manuals, you can install them from the projector CD or go to the Epson website, as described below.

 Telephone support services

To use the Epson PrivateLine® Support service, call (800) 637-7661. This service is available for the duration of your warranty period. You may also speak with a support specialist by calling (562) 276-4394 (U.S.) or (905) 709-3839 (Canada).

Support hours are 4 a.m. to 8 p.m. Pacific Time, Monday through Friday, and 7 a.m. to 4 p.m. Pacific Time, Saturday. Days and hours of support are subject to change without notice. Toll or long distance charges may apply.

Internet support

Visit www.epson.com/support (U.S.) or www.epson.ca/support (Canada) for solutions to common problems. You can download utilities and documentation, get FAQs and troubleshooting advice, or e-mail Epson.

Registration

Register today to get product updates and exclusive offers. You can use the CD included with your projector or register online at www.epson.com/webreg.
5 Replace the wireless LAN module stopper and secure it using the screw you removed.

6 Close the air filter cover.

7 Plug in the power cord and turn on the projector.

8 Press the Menu button on the remote control, select the Network menu, and press \textcircled{1}.

9 Choose Network Configuration and press \textcircled{2}.

10 Select the Wireless LAN menu and press \textcircled{4}.

11 Choose Connection Mode, press \textcircled{2}, select Quick (for a direct connection to a computer, tablet, smartphone, or XGA Projector (for a connection to a router or access point), then press \textcircled{2} again. When you're finished, press Esc to return to the Wireless LAN menu.

12 If you chose the Advanced connection mode, select Search Access Point and press \textcircled{2}. Use the arrow buttons to highlight your network name (SSID) in the list of available connections.

13 If your network has security enabled, enter your network password on the screen that appears. Make sure to enter any uppercase or lowercase letters in the correct case.

14 If you chose the Advanced connection mode, select IP Settings and press \textcircled{2}.

If your network assigns addresses automatically, make sure DHCP is turned on. If not, turn off DHCP and enter the projector's IP Address, Subnet Mask, and Gateway Address, as needed.

15 To prevent the SSID and IP address from appearing on the network standby screen, set the SSID Display and IP Address Display settings to Off.

16 When you're finished selecting settings in the Wireless LAN menu, press Esc.

17 Select Complete and press \textcircled{2}, then select Yes and press \textcircled{2} again to save your settings.

Install network software

Links to download the network software and to the manuals are available from the projector CD. Downloads require an Internet connection. You can also download the software and manuals from the Epson website, as described in “Where to get help.”

To monitor and control your projector over the network, install the EasyMP Monitor software (Windows® only). To project from multiple PCs over the network, install the EasyMP Multi PC Projection software. To update your projector’s firmware over a wired LAN, install the EasyMP Network Updater software.

Click the icons on your desktop to view the software manuals. See the manuals for instructions on installing and using the software.

Project wirelessly from a mobile device

You can connect your mobile device and projector using Epson iProjection™ and a QR code. Make sure the latest version of Epson iProjection is installed on your device.

Install the Epson iProjection app

To project from an iOS or Android™ device, download and install the Epson iProjection app. Visit www.epson.com/projectorapp (U.S.) or www.epson.ca/projectorapp (Canada) for more information.

Direct wireless connection

Make sure your device and Epson projector are not connected to a network and your Epson projector’s Connection Mode is set to Quick.

1 Press the Home button on the projector or remote control to bring up the Home screen.

2 Select Display the QR Code and press \textcircled{2}.

3 Tap \textcircled{5} iProjection on your device’s Home screen.

To prevent the SSID and IP address from appearing on the network

Field to switch to the correct image source, if necessary.

Make sure the Status light on the projector is blue and not flashing, and your device and Epson projector’s firmware over a wired LAN, install the EasyMP Network Updater software.

Wireless network connection

Make sure your projector and mobile device are connected to the same wireless network.

1 Press the Home button on the projector or remote control to bring up the Home screen.

2 Select Display the QR Code and press \textcircled{2}.

3 Tap \textcircled{5} iProjection on your device’s Home screen.

4 Tap Read QR code.

5 Point your device’s camera at the QR code your projector displays; the QR code is read automatically.

6 If you are using an iOS device, follow the on-screen prompts to register your projector’s WiFi profile.

Your device and Epson projector are now connected.

Troubleshooting

If you see a blank screen or the No signal message after turning on your computer or video device, check the following:

- Make sure the Status light on the projector is blue and not flashing, and the AV Multi Slide is open.
- Press the Source Search button on the projector or remote control to switch to the correct image source, if necessary.
- Press the Home button on the projector or remote control to verify the source input and settings.
- On Windows 7 or later, hold down the Windows key and press P at the same time, then click Duplicate.
- If you're using a Windows laptop, press the function key on your keyboard that lets you display on an external monitor. It may be labeled CRT/LED or have an icon such as \( \text{\textcopyright} \). You may have to hold down the Fn key while pressing it (such as Fn + F9). Wait a moment for the display to appear.
- If you’re using a Mac laptop, open System Preferences and select Displays. Click the Arrangement tab and select the Mirror Displays checkbox.
