Your Ink Tank System

You should visually check the ink levels in the product's ink tanks regularly. For optimum printing results, refill the ink tanks to the upper line at least once a year.

**Note:** The product has a low ink alert system. The accuracy of this system depends on the user refilling the ink tanks correctly. The product cannot directly measure the ink levels in the tanks; instead it estimates the amount of ink remaining by internally monitoring ink usage. The low ink alert system may generate inaccurate messages if the ink tanks are not refilled according to these instructions.

Visually check the ink levels in the product's ink tanks to confirm the actual ink levels. Continued use of the product when the ink is expended could damage the product.

To refill the ink tanks and reset the ink levels, click the link below.

Adjusting Control Panel Position

You can adjust the position of the control panel to make it easier to access. Raise or lower it to the desired angle as shown.
Changing LCD Screen Language
You can change the language used on the LCD screen.
1. Press the home button, if necessary.
2. Press the arrow buttons to select Settings and press the OK button.
3. Select Printer Setup and press the OK button.
4. Select Language and press the OK button.
5. Select a language and press the OK button.
6. Press the home button to exit.

Turning On Quiet Mode
You can reduce the noise the product makes by turning on the Quiet Mode setting.

Note: Turning on this setting may reduce print speed.
1. Press the home button, if necessary.
2. Press the arrow buttons to select Settings and press the OK button.
3. Select Printer Setup and press the OK button.
4. Select Quiet Mode and press the OK button.
5. Select On and press the OK button.
6. Press the home button to exit.

The Power Off and Sleep Timers

The product enters sleep mode or turns off automatically if it is not used for a period of time. You can adjust the time period before power management begins, but increasing the time reduces the product’s energy efficiency.

Changing the Power Off Timer Setting from the Control Panel
Changing the Sleep Timer Setting from the Control Panel

Parent topic: Product Basics
Changing the Power Off Timer Setting from the Control Panel

You can use the product’s control panel to change the time period before the printer turns off automatically.

1. Press the home button, if necessary.
2. Press the arrow buttons to select Settings and press the OK button.
3. Select Printer Setup and press the OK button.
4. Select Power Off Timer and press the OK button.

You see this screen:

5. Select the length of time after which you want the product to automatically turn off when it is not in use and press the OK button.

6. Press the home button to exit.

Parent topic: The Power Off and Sleep Timers

Changing the Sleep Timer Setting from the Control Panel

You can use the product’s control panel to change the time period before the product enters sleep mode.

1. Press the home button, if necessary.
2. Press the arrow buttons to select Settings and press the OK button.
3. Select Printer Setup and press the OK button.
4. Select **Sleep Timer** and press the **OK** button.

You see this screen:

![Sleep Timer screen]

5. Select the time period you want before the product goes to sleep and press the **OK** button.

6. Press the **Home** button to exit.

---

**Epson Connect Solutions for Smartphones, Tablets, and More**

Use your smartphone, tablet, or computer to print and scan documents, photos, emails, and web pages from your home, office, or even across the globe.

**Note:** If you are using your Epson product with the Windows 10 S operating system, you cannot use the software described in this section. You also cannot download and install any Epson product software from the Epson website for use with Windows 10 S; you must obtain software only from the Windows Store.

Print from anywhere with these Epson Connect solutions:
- Epson Email Print
- Epson iPrint Mobile App
- Epson Remote Print

Scan and send a file as an email or upload it to an online service directly from your Epson product with Epson Scan to Cloud or the Epson iPrint Mobile App.
Setting Up Epson Connect Services

If you did not activate your product's email address for use with Epson Connect when you set up your product, you can activate it using the product control panel.

1. Press the home button, if necessary.
2. Press the arrow buttons to select Settings and press the OK button.
3. Select Epson Connect Services and press the OK button.
   You see this screen:

   ![Epson Connect Services screen]

4. Select Register/Delete and press the OK button.
5. Select Yes and press the OK button.
6. Follow the instructions on the screen to activate your product's email address.

Parent topic: Epson Connect Solutions for Smartphones, Tablets, and More
Using Epson Email Print

With Epson Email Print, you can print from any device that can send email, such as your smartphone, tablet, or laptop. Just activate your product's unique email address. When you want to print, attach a PDF, Microsoft Office document, or photo to an email and send it to your product. Both the email and the attachments will print automatically.

1. Connect your product to your network. See the link below.

2. If you did not already set up Email Print when you installed your product software, see the link below to use your product control panel to activate your unique email address. Or visit epson.com/connect (U.S), epson.ca/connect (Canada), or epsonconnect.com (Caribbean) to learn more about Email Print, create your Epson Connect account, and register your product to the Epson Connect service.

3. Now you are ready to send and print emails to your product's Email Print address.

Note: Go to epsonconnect.com and log into your Epson Connect account to personalize your product's email, adjust print settings, and set up other Epson Connect services.

Wi-Fi or Wired Networking

Using the Epson iPrint Mobile App

Use this free Apple and Android app to print and scan with networked Epson products. Epson iPrint lets you print PDFs, Microsoft Office documents, photos, and web pages over a wireless network. You can scan and save a file on your device, send it as an email, or upload it to an online service such as Box, Dropbox, Evernote, or Google Drive.

1. Connect your product to your wireless network. See the link below.

2. Visit epson.com/connect (U.S), epson.ca/connect (Canada), or epson.com.jm/connect (Caribbean) to learn more about Epson iPrint and check the compatibility of your mobile device.

3. Download Epson iPrint from the Apple App Store or Google Play.

4. Connect your mobile device to the same wireless network as your product.

5. Open Epson iPrint and select your Epson product.

Now you are ready to print or scan with your mobile device and your Epson product.
Using the Epson Creative Print Mobile App

Use this free Apple and Android app to do the following:

- Access and print your mobile device photos, including Instagram and Facebook photos
- Create custom greeting cards and stationery
- Print onto CD/DVDs
- Turn photos into coloring book templates

**Note:** Not all features may be supported by your product.

1. Connect your product to your wireless network. See the link below.
2. Visit epson.com/connect (U.S), epson.ca/connect (Canada), or epson.com.jm/connect (Caribbean) to learn more about Epson Creative Print and check the compatibility of your mobile device and your Epson product.
3. Download Epson Creative Print from the Apple App Store or Google Play.
4. Connect your mobile device to the same wireless network that your product is using.
5. Open Epson Creative Print.

Now you are ready to get creative with your mobile device and your Epson product.

Using Epson Remote Print

With Epson Remote Print software, you can print from your laptop or desktop computer to an Epson Email-enabled product anywhere in the world.

1. Connect your Epson product to your wireless network. See the link below.
2. If you did not already set up an Epson Connect account when you installed your product software, visit epsonconnect.com to create your account and register your product to the Epson Connect service.

   **Note:** Make a note of your product's email address.

3. Visit epsonconnect.com to learn more about Remote Print and how to download the Remote Print Driver software.

4. Download and install the Remote Print software.

5. Enter the email address and optional access key of your Epson product during Remote Print setup.

6. Now you are ready to print remotely. Select the print command in your laptop or desktop computer application and choose the Remote Print option for your Epson product.

Wi-Fi or Wired Networking

### Using Epson Scan to Cloud

The Epson Scan to Cloud service allows you to scan and send a file as an email or upload it to an online service directly from your Epson product. Register an email address or online services such as Box, Dropbox, Evernote, or Google Drive with your Epson Connect account.

1. Connect your Epson product to your network. See the link below.

2. If you did not already set up an Epson Connect account when you installed your product software, visit epsonconnect.com to create your account and register your product to the Epson Connect service.

   **Note:** Make a note of your product's email address and password.

3. Visit epsonconnect.com to sign into your account with the email address and password you selected.

4. Select your product, select **Scan to Cloud**, and select **Destination List**.

5. Click **Add**, then follow the instructions on the screen to create your destination list.

6. Now you are ready to use Scan to Cloud. Select the setting for scanning to Scan to Cloud on your Epson product control panel.

**Parent topic:** Epson Connect Solutions for Smartphones, Tablets, and More
Using AirPrint

AirPrint enables instant wireless printing from iPhone, iPad, and iPod touch with the latest version of iOS, and Mac with the latest version of OS X or macOS.

**Note:** If you disabled paper configuration messages on your product control panel, you cannot use AirPrint. See the link below to enable the messages, if necessary.

1. Load paper in your product.
2. Set up your product for wireless printing. See the link below.
3. Connect your Apple device to the same wireless network that your product is using.
4. Print from your device to your product.

**Note:** For details, see the AirPrint page on the Apple website.

Using Google Cloud Print

With a Google Account, you can print from your Apple or Android device to your Epson product. You can also print from Chromebooks and the Google Chrome browser without drivers or cables.

1. Connect your Epson product to your wireless network. See the link below.
2. Note your product's IP address by checking your network status. See the link below.
3. Connect your computer or your Apple or Android device to the same wireless network as your Epson product.
4. Enter your product's IP address into the address bar of a web browser.
5. Select the **Google Cloud Print Services** option.

   **Note:** If you don’t see the **Google Cloud Print Services** option, turn your product off and back on. If the option still doesn't appear, select the **Firmware Update** option and follow the on-screen instructions to update your product.

6. Click **Register**.
7. Select the checkbox to agree to the Usage Advisory and click **Next**.
8. Click **OK** to launch the sign-in page.

   A separate browser window opens.

9. Enter your Google Account username and password and click **Sign in**, or, if you don't have an account, click **Sign up for a new Google Account** and follow the on-screen instructions.
10. Click **Finish printer registration** to complete setup and print a test page.

Your product is now linked to your Google Account and can be accessed from any Chromebook, computer, Apple or Android device with Internet access. Visit Epson Support for Google Cloud Print (U.S) or Epson Support for Google Cloud Print (Canada) for more information on using Google Cloud Print, or the Google Cloud Print website for a list of supported apps.

### Setting Up Google Cloud Print on a Chromebook

With a Google Account, you can print from a Chromebook without drivers or cables.

1. Connect your Epson product to your wireless network. See the link below.
2. Turn on your Chromebook and connect it to the same wireless network as your product.

   **Note:** See your Chromebook's documentation for details on connecting to a network.
3. Do one of the following:
   • Click **Add to Cloud Print** in the notification that appears in the corner of your Chromebook screen.

     **Note:** If you do not see a notification, check to see if a number appears in the status area at the lower-right corner of the screen. Click this number to open the notifications menu, then click **Add to Cloud Print**.

   • Open a web browser and enter `chrome://devices` in the address bar. Skip to step 4.
   • If you see a registration confirmation screen instead, click **Register**.

4. Click **Add Device**.

5. Click the **Register** button that appears next to your product.

6. Click **Register** on the confirmation screen. Your product's LCD screen displays a confirmation message.

7. Select **OK** or press the **OK** button on your product to confirm the Google Cloud Print connection and print a test page.

   Your product is now linked to your Google Account and can be accessed from any Chromebook, iPhone, or Android phone with Internet access. Visit [Epson Support for Google Cloud Print (U.S)](http://www.epson.com) or [Epson Support for Google Cloud Print (Canada)](http://www.epson.ca) for more information on using Google Cloud Print, or the [Google Cloud Print website](http://www.google.com/cloudprint) for a list of supported apps.

   **Parent topic:** Using Google Cloud Print

**Using the Mopria Print Service**

You can use the Mopria Print Service to print from your Android phone or tablet (Android v4.4 or later) to your Epson product or any Mopria-certified product from other manufacturers. You can download the Mopria Print Service from Google Play.

   **Note:** For details on the Mopria Print Service, [click here](http://www.epson.com) (U.S) or [click here](http://www.epson.ca) (Canada).

1. Connect your Epson product to your wireless network. See the link below.
2. On your Android device, download the Mopria Print Service from Google Play.

   **Note:** On some Samsung Galaxy devices, Mopria may come preinstalled.

3. Go to **Settings** on your Android device, select **Printing**, and enable the Mopria Print Service.
4. Connect your Android device to the same wireless network as your product.
5. Now you are ready to print. From an Android application such as Chrome or Gmail, tap the menu icon and select **Print**. Then select **All printers**, select your Epson product, adjust your print settings, and print.

   **Parent topic:** Product Basics

   **Related topics**

   Wi-Fi or Wired Networking

### Android Printing Using the Epson Print Enabler

You can wirelessly print your documents, emails, photos, and web pages right from your Android phone or tablet (Android v4.4 or later). With a few taps, your Android device will discover your nearby Epson product and print.

1. Connect your Epson product to your wireless network. See the link below.
2. On your Android device, download the Epson Print Enabler plug-in from Google Play.
3. Go to **Settings** on your Android device, select **Printing**, and enable the Epson plug-in.
4. Connect your Android device to the same wireless network as your product.
5. Now you are ready to print. From an Android application such as Chrome or Gmail, tap the menu icon and print whatever is on the screen.

   **Note:** If you do not see your product, tap **All Printers** and select your product.

   **Parent topic:** Product Basics

### Using Fire OS Printing

You can wirelessly print from Amazon Fire tablets and phones to your nearby networked Epson product. There is no software to download, no drivers to install, and no cables to connect. With just a few taps in
Email, Calendar, Contacts, and WPS Office, you can send whatever is on the screen to an Epson product.

1. Connect your Epson product to your wireless network. See the link below.
2. Connect your Amazon device to the same wireless network as your product.
3. Now you are ready to print. From your Amazon application, tap the print option and select your product to print whatever is on the screen.

**Note:** If you see a message telling you that a plug-in is required, tap OK and tap Download. If your Amazon Fire product uses Fire OS 5 and above, your device automatically uses the built-in Mopria Print Service app to print.

Visit epson.com/connect (U.S), epson.ca/connect (Canada), or epson.com.jm/connect (Caribbean) to learn more about Fire OS Printing (one of many Epson Connect Partner Solutions) and check the compatibility of your mobile device.

### Using Windows 10 Mobile Printing

You can wirelessly print from Windows 10 Mobile tablets and phones to your nearby networked Epson product. There is no software to download, no drivers to install, and no cables to connect. Look for the print option in your Windows 10 application to send whatever is on the screen to an Epson product.

1. Connect your Epson product to your wireless network. See the link below.
2. Connect your Windows 10 Mobile device to the same wireless network as your product.
3. Now you are ready to print. From your Windows 10 application, tap the print option and select your product to print whatever is on the screen.

Visit epson.com/connect (U.S), epson.ca/connect (Canada), or epson.com.jm/connect (Caribbean) to learn more about Windows 10 Mobile Printing (one of many Epson Connect Partner Solutions) and check the compatibility of your mobile device.

Using Epson Print and Scan App with Windows Tablets

You can use this free app to print photos and scan from your Windows (Windows 8 or higher) Surface RT or Pro tablet with networked Epson products. Epson Print and Scan App allows you to scan and capture images right to your tablet or to Microsoft OneDrive.

**Note:** The Epson Print and Scan App does not support Windows 10 Mobile printing.

1. Connect your Epson product to your wireless network. See the link below.
2. Download Epson Print and Scan App from the Microsoft Windows Store.
3. Connect your Windows tablet to the same wireless network as your product.
4. Open Epson Print and Scan App and select your Epson product.
   Now you are ready to print photos or scan.

Visit epson.com/connect (U.S), epson.ca/connect (Canada), or epson.com.jm/connect (Caribbean) to learn more about Epson Print and Scan App.

Network Security Recommendations

To help deter unauthorized access to your product over a network, you should protect your network environment using appropriate security measures.

Security measures such as these can help deter threats such as loss of user data, use of telephone and fax lines, and other intrusions:

• **Enable security on your wireless LAN**
  Enable the appropriate security on the wireless LAN you plan to use with your product. Network security such as a network password can deter interception of traffic over the wireless LAN. Your router may already have a default password enabled by your Internet service provider (ISP). See your ISP and router documentation for instructions on how to change the default password and better secure your network.

• **Connect your product only to a network protected by a firewall**
  Connecting your product directly to the Internet may leave it vulnerable to security threats. Instead, connect it to a router or other network connection protected by a firewall. Your router may already have a firewall set up by your Internet service provider; check with your ISP for confirmation. For best results, set up and use a private IP address for your network connection.

• **Change the default administrator password on your product**
  If your product has an option to set an administrator password, change the default administrator password to deter access by unauthorized users to personal data stored on your product, such as IDs, passwords, and contact lists.

Parent topic: Wi-Fi or Wired Networking
Wi-Fi Infrastructure Mode Setup

You can set up your product to communicate with your computer using a wireless router or access point. The wireless router or access point can be connected to your computer over a wireless or wired network.

1. Epson product
2. Wireless router or access point
3. Computer with a wireless interface
4. Computer
5. Internet
6. Ethernet cable (used only for wired connection to the wireless router or access point)

Selecting Wireless Network Settings from the Control Panel

Parent topic: Wi-Fi or Wired Networking
Selecting Wireless Network Settings from the Control Panel

You can select or change wireless network settings using your product control panel.

To install your product on a wireless network, follow the instructions on the Start Here sheet and install the necessary software. The installer program guides you through network setup.

1. Press the home button, if necessary.
2. Press the arrow buttons to select Wi-Fi Setup and press the OK button.
3. Press the OK button to select Wi-Fi (Recommended).
4. Press the OK button.
   You see this screen:

   ![Wi-Fi Setup Screen]

5. Select Wi-Fi Setup Wizard and press the OK button.
6. Press the up or down arrow buttons to select the name of your wireless network and press the OK button. If you do not see your wireless network's name, you can enter it manually.

   Note: To enter the wireless network name manually, select Other Networks and press the OK button. Enter your network name as described in the next step.
7. Enter your wireless password (or network name and then password).

![Password Keypad]

- Press the arrow buttons to highlight a character or a function button displayed on the keypad. Then press the OK button to select it.
- To change the case of letters or select symbols, select AB12 (uppercase), ab12 (lowercase), or Symbol and press the OK button. Then highlight a number or symbol and press the OK button to select it.
- To enter a space, select Space and press the OK button.
- To delete characters, select the back arrow and press the OK button.
- When you finish entering characters, select Done and press the OK button.

8. Press the OK button to confirm Wi-Fi settings.

9. If you want to print a network status report, select Yes and press the OK button. (Otherwise, select No.)

   Your product should now be connected to the network.

   **Note:** If the Wi-Fi connection symbol does not appear on the LCD screen, you may have selected the wrong network name or entered the password incorrectly. Repeat these steps to try again.

Changing or Updating Network Connections
Wi-Fi Direct Mode Setup

You can set up your product to communicate directly with your computer or another device without requiring a wireless router or access point.

1. Epson product
2. Computer with a wireless interface
3. Other wireless device

Your product enters access point mode and the product itself acts as the network access point for up to 4 devices. When operating in this mode, your product displays the Wi-Fi Direct connection symbol on the LCD screen.

Note: Connected devices cannot communicate with each other via the connection to your product.

Enabling Wi-Fi Direct Mode

Enabling Wi-Fi Direct Mode

You can enable Wi-Fi Direct mode to allow direct communication between your product and computer or other devices without a wireless router or access point.

1. Press the home button, if necessary.
2. Press the arrow buttons to select Wi-Fi Setup and press the OK button.
3. Press the arrow buttons to select **Wi-Fi Direct** and press the **OK** button.
4. Press the **OK** button.
5. Press the **OK** button again.
6. Press the **OK** button to confirm the Wi-Fi settings.
   You see a screen like this:

   ![Wi-Fi Direct Routerless Setup](image)

   **Wi-Fi Direct Routerless Setup**
   
   Network (SSID):
   
   DIRECT–FEDCBA98
   
   Password:
   
   KEY12345678901234567890
   
   **OK** Done

7. Press the **OK** button.
8. Press the **OK** button to exit.

   You see the connection symbol on the LCD screen and should be able to connect to your product directly from your computer or device, and then print. If you are printing from a computer, make sure you installed the network software as described on the *Start Here* sheet.

   **Note:** Make a note of the SSID and password that appear.

   If the connection symbol is not displayed on the LCD screen, Wi-Fi Direct mode is not enabled. Repeat these steps to try again.

**Changing the Wi-Fi Direct Mode Password**

**Parent topic:** Wi-Fi Direct Mode Setup
Changing the Wi-Fi Direct Mode Password

You can change the Wi-Fi Direct Mode password from the product's control panel.

1. Press the home button, if necessary.
2. Press the arrow buttons to select Wi-Fi Setup and press the OK button.
3. Press the arrow buttons to select Wi-Fi Direct and press the OK button.
4. Press the OK button.
5. Press the OK button again.
6. Press the right arrow button to select Modify.

   Note: If you have already connected devices or computers to your product via Wi-Fi Direct, they will be disconnected when you change the password.

7. Select Yes.
8. Enter a new password.

   Note: The password must be at least 8 and no more than 22 characters long.

- Press the arrow buttons to highlight a character or a function button displayed on the keypad. Then press the OK button to select it.
• To change the case of letters or select symbols, select \texttt{AB12} (uppercase), \texttt{ab12} (lowercase), or \texttt{Symbol} and press the OK button. Then highlight a number or symbol and press the OK button to select it.
• To enter a space, select \texttt{Space} and press the OK button.
• To delete characters, select the back arrow and press the OK button.
• When you finish entering characters, select \texttt{Done} and press the OK button.

9. Press the \texttt{OK} button to confirm the Wi-Fi settings.

You see a screen like this:

![Wi-Fi Direct Routerless Setup screen]

10. Press the \texttt{OK} button.
11. Press the \texttt{OK} button to exit.

\section*{Wi-Fi Protected Setup (WPS)}

If your network uses a WPS-enabled wireless router or access point, you can quickly connect your product to the network using Wi-Fi Protected Setup (WPS).

\textbf{Note:} To check if your router is WPS-enabled, look for a button labeled \texttt{WPS} on your router or access point. If there is no hardware button, there may be a virtual WPS button in the software for the device. Check your network product documentation for details.

\textbf{Using WPS to Connect to a Network}
Using WPS to Connect to a Network

If you have a WPS-enabled wireless router or access point, you can use Wi-Fi Protected Setup (WPS) to connect your product to the network.

1. On the product, press the home button, if necessary.
2. Press the arrow buttons to select Settings and press the OK button.
3. Select Network Settings and press the OK button.
4. Select Wi-Fi Setup and press the OK button.
5. Select Push Button Setup (WPS) and press the OK button.
6. Follow the instructions on the LCD screen to complete WPS setup.
   - Your product should now display a WiFi symbol on the LCD screen. If it does not, repeat these steps to try again.

Parent topic: Wi-Fi Protected Setup (WPS)

Printing a Network Status Sheet

You can print a network status sheet to help you determine the causes of any problems you may have using your product on a network. Make sure paper is loaded in the cassette.

1. Press the home button, if necessary.
2. Press the arrow buttons to select **Settings** and press the **OK** button.
3. Select **Network Settings** and press the **OK** button.
4. Select **Network Status** and press the **OK** button.
   You see a screen like this:

![Network Summary]

**Note:** If you are connected to a network, the signal strength is also displayed.

5. Press the left or right arrow button to view additional options.
6. Press the up or down arrow buttons to select **Print Status Sheet** and press the **OK** button.
7. Press the ◀ start button to print the network status sheet.
   (Press the ◆ cancel button if you want to cancel the operation.)

Examine the settings shown on the network status sheet to diagnose any problems you have.

Changing a USB Connection to a Wi-Fi Connection
If you have already connected your product to your computer using a USB connection, you can change to a Wi-Fi connection.

1. Disconnect the USB cable from your product.
2. Uninstall your product software.
3. Download and install your product software from the Epson website using the instructions on the Start Here sheet.

Parent topic: Changing or Updating Network Connections
Related concepts
Uninstall Your Product Software

Changing a Wi-Fi Connection to a Wired Network Connection
If you have already connected your product to your computer wirelessly, you can change to a wired network connection if necessary.

1. Disable your product's Wi-Fi features.
2. Connect one end of an Ethernet network cable to the product's LAN port.
3. Connect the other end to any available LAN port on your router or access point.
4. Uninstall your product software.
5. Download and install your product software from the Epson website.
6. Follow the on-screen instructions to install the software.
7. When you see the Select Your Connection screen, select **Wired network connection**.
8. If you see a Select Setup Option screen, select **Set up printer for the first time**.
9. Continue following the rest of the on-screen instructions.

**Parent topic:** Changing or Updating Network Connections

Disabling Wi-Fi Features

**Connecting to a New Wi-Fi Router**

If you change the wireless router you have been using on your network, you need to update your product's Wi-Fi connection to the new router.

**Note:** If you switch to a 5 GHz wireless router, set the router to operate in dual band (2.4 GHz and 5 GHz) mode. See your router documentation for instructions.

1. Do one of the following:
   - **Windows:** Uninstall your product software.
   - **Mac:** Go to the next step.
2. Download and install your product software from the Epson website using the instructions on the Start Here sheet.

**Parent topic:** Changing or Updating Network Connections

**Related concepts**

Uninstall Your Product Software

**Disabling Wi-Fi Features**

You may need to disable your product's Wi-Fi features if you change your network connection type or need to solve a problem with your network connection.
Note: Before disabling Wi-Fi features, make a note of your product's SSID (network name) and password, and any network settings selected for the Epson Connect services you may use.

1. Press the home button, if necessary.
2. Press the arrow buttons to select Settings and press the OK button.
3. Select Network Settings and press the OK button.
4. Select Wi-Fi Setup and press the OK button.
   You see this screen:

![Wi-Fi Setup screen]

5. Select Disable Wi-Fi and press the OK button.
6. Select Yes and press the OK button to disable Wi-Fi.

Loading Paper

Before you print, load paper for the type of printing you will do.

Loading Paper in Cassette 1 (Upper Cassette)
Loading Paper in Cassette 2 (Lower Cassette)
Loading Paper and Envelopes in the Rear Paper Feed Slot
Selecting the Paper Settings for Each Source - Control Panel
Turning Off the Paper Setting Alert
Paper Loading Capacity
Available Epson Papers
Borderless Paper Type Compatibility
Paper or Media Type Settings - Printer Software

Loading Paper in Cassette 1 (Upper Cassette)

You can load photo paper in these sizes in the upper paper cassette:

- 3.5 × 5 inches (89 × 127 mm)
- 4 × 6 inches (102 × 152 mm)
- 5 × 7 inches (127 × 178 mm)
- 16:9 wide (4 × 7.1 inches [102 × 181 mm])
- A6 (4.1 × 5.8 inches [105 × 148 mm])

Note: Do not remove or insert the paper cassette during printing.

1. Close the output tray, if necessary.
Note: As you slide in the output tray, there may be slight resistance and noise. This is normal.

2. Raise the control panel.

3. Open the front cover.
4. Pull out the upper paper cassette. The upper cassette is labeled as shown.

![Diagram of cassette removal]

**Note:** If the cassette is too far inside the product to reach, turn off your product and turn it back on again to reset the cassette's position.

5. Slide the edge guides outward.

![Diagram of edge guides]

6. Set the front edge guide to the position for the paper size you are using.

![Diagram of edge guide settings]
7. Insert paper in the cassette with the glossy or printable side facedown.

![Paper in Cassette]

**Note:** Make sure the paper is loaded against the front edge guide and does not extend beyond the triangle symbol at the rear of the cassette.

![Paper Limit]

8. Slide the side edge guides against the paper, but not too tightly.

![Side Edge Guides]

53
Note: Make sure the paper fits under the tabs on the edge guides.

9. Keeping the cassette flat, insert it into your product until the arrow marks on the tray and product line up.

10. Lower the control panel and pull out the output tray.
11. Select the size and type of paper you just loaded on the product LCD screen. Always follow these paper loading guidelines:
   • Load only the recommended number of sheets.
   • Load paper short edge first and printable side facedown.
   • Make sure the paper is under the tabs on the edge guides and not sticking out from the end of the cassette.
   • Check the paper package for any additional loading instructions.

**Parent topic:** Loading Paper

**Related tasks**
- Loading Paper in Cassette 2 (Lower Cassette)
- Loading Paper and Envelopes in the Rear Paper Feed Slot

---

**Loading Paper in Cassette 2 (Lower Cassette)**

You can load paper up to this size in the lower paper cassette: Legal (8.5 × 14 inches [216 × 356 mm]).

**Note:** Do not remove or insert the paper cassette during printing.

1. Close the output tray, if necessary.

**Note:** As you slide in the output tray, there may be slight resistance and noise. This is normal.
2. Raise the control panel.

3. Open the front cover.

4. Pull on the front cover to pull out the lower paper cassette.
5. Slide the edge guides outward.

6. Set the front edge guide to the paper size you are using.

7. Do one of the following:
   • Insert paper with the glossy or printable side face down.
• Insert up to 10 envelopes, printable side down and flap edge left, as shown.

• For legal-size paper, remove the CD/DVD tray from the product. Press the button on the cassette and extend it as shown. Load paper with the glossy or printable side facedown.

**Note:** Make sure the paper is loaded against the front edge guide and does not extend beyond the triangle symbol at the rear of the cassette.
8. Slide the side edge guides against the paper, but not too tightly.

Note: Make sure the paper fits under the tabs on the edge guides.

9. Keep the cassette flat as you insert it into your product.

Note: Leave enough space in front of the product for the paper to be fully ejected.
10. Lower the control panel and pull out the output tray.

11. Select the size and type of paper you just loaded on the product LCD screen.

Always follow these paper loading guidelines:

- Load only the recommended number of sheets.
- Load paper short edge first and printable side down.
- Make sure the paper is under the tabs on the edge guides and not sticking out from the end of the cassette.
- If you have trouble loading a stack of envelopes, press each envelope flat before loading it or load one envelope at a time.
- If print quality declines when printing multiple envelopes, try loading one envelope at a time.
- Check the paper package for any additional loading instructions.

**Parent topic:** Loading Paper

- Loading Paper in Cassette 1 (Upper Cassette)
- Loading Paper and Envelopes in the Rear Paper Feed Slot

---

**Loading Paper and Envelopes in the Rear Paper Feed Slot**

You can load one envelope or one sheet of paper or card stock in the rear paper feed slot.
1. Send your print job before loading paper into the rear paper feed slot. Make sure you select **Rear Paper Feed Slot** as the Paper Source setting on your computer.

2. Raise the control panel.

3. Open the front cover.

4. Pull out the output tray and lower the control panel.
5. After the print job has been sent to the product, a message appears on the LCD screen prompting you to load paper. Follow the on-screen instructions or continue with the next step.

6. Open the rear paper feed slot.

7. Raise the paper support.
8. Slide out the edge guides.

9. Do one of the following:
   - Load one sheet of paper with the printable side faceup about 2 inches (5 cm) into the slot.
   - Load one envelope short edge first, with the flap facing down and the flap edge to the left.
10. Slide the edge guides against the paper or envelope, but not too tightly.

11. Press the start button to start printing.

Always follow these paper loading guidelines:

- Load only one sheet or one envelope at a time.
- Load paper short edge first, no matter which way your document faces.
- Load the printable side faceup.
- Load letterhead or pre-printed paper top edge first.
- Check the paper package for any additional loading instructions.

**Note:** You can load a sheet of binder paper with holes on one of the long edges, but not for automatic 2-sided printing.

Placing Originals on the Product

Follow the instructions here to place your original documents or photos on the product.

**Caution:** Do not place anything on top of your product or use its cover as a writing surface to avoid damaging it.

**Placing Originals on the Scanner Glass**

**Related topics**
- Copying
- Scanning

**Placing Originals on the Scanner Glass**

You can place originals up to this size on the scanner glass: Letter (8.5 × 11 inches [216 × 279 mm]) or A4 (8.3 × 11.7 inches [210 × 297 mm]).

1. Open the document cover.
2. Place your original facedown on the scanner glass with the top of the original facing into the corner shown. Slide the original to the edges of the indicated corner.

**Note:** You can place multiple originals on the scanner glass. Just make sure they are at least 0.20 inch (5 mm) away from each other and from the edge of the scanner glass.
3. If you are copying two book pages onto one sheet, place the book as shown to copy the first page, then turn the book as shown to copy the second page.

4. Close the document cover gently to keep your original in place.

**Parent topic:** Placing Originals on the Product
Copying

See the information here to copy documents or photos using your product.

**Note:** Copies may not be exactly the same size as your originals.

*Copying Documents or Photos
Copying and Restoring Photos*

**Copying Documents or Photos**
You can copy documents or photos onto various sizes and types of paper, including Epson special papers.

1. Place your original document or photo on the scanner glass.
2. Load the paper you want to print on.
   
   **Note:** Load only the recommended number of sheets.
3. Press the arrow buttons to select **Copy** and press the **OK** button.

![Copy Settings](image)

4. To print more than one copy, press the + or – button to select the number (up to 99).
5. Press the right or left arrow button to select **Color** or **B&W**.
6. To view and change additional copy settings, press the down arrow button to select **Settings > Paper and Copy Settings** and press the **OK** button.

7. When you are ready to copy, press the start button.

   **Note:** To cancel copying, press the cancel button.

Copying and Restoring Photos

You can restore the colors in faded photos as you copy them.

1. Load photo paper in the product.
2. Press the home button, if necessary.
3. Press the arrow buttons to select More Functions and press the OK button.
4. Select Copy/Restore Photos and press the OK button.

You see this screen:

5. Select On and press the OK button.
6. Place up to two original photos on the product.

Note: Press the up or down arrow buttons for instructions on placing your photos on the product.

7. Press the start button.
8. Press the + or – button to select one or more copies of the photo (up to 99).
9. If you placed two originals on the scanner, press the left or right arrow button to view the second original, then press + or – button to select one or more copies of the photo (up to 99).
10. To select settings for the photos, press the down arrow button.

11. Do one or more of the following:
   - To change the display setting for the LCD screen, select *Display Mode*, press the *OK* button, and select the setting you want.
   - To change the print settings, select *Paper and Copy Settings*, press the *OK* button, and select the necessary settings.
   - To adjust the copy image, select *Photo Adjustments*, press the *OK* button, and select the necessary settings.
   - To add a black-and-white filter, select *Filter*, press the *OK* button, and select *B&W*.
   - To crop or zoom into your photo, select *Crop/Zoom*, press the *OK* button, and press the + or – and arrow buttons to adjust the image area.

12. When you are ready to print, press the start button.

   **Note:** To cancel copying, press the cancel button.

Printing from a Computer

Before printing from your computer, make sure you have set up your product and installed its software as described on the Start Here sheet.

Note: If you have an Internet connection, it is a good idea to check for updates to your product software on Epson's support website. If you see a Software Update screen, select Enable automatic checking and click OK. The update scans your system to see if you have the latest product software. Follow the on-screen instructions.

Printing with Windows
Printing with the Built-in Epson Driver - Windows 10 S
Printing on a Mac
Cancelling Printing Using a Product Button

Printing with Windows

You can print with your product using any Windows application, as described in these sections.

Note: If you are using your Epson product with the Windows 10 S operating system, you cannot use the software described in this section. You also cannot download and install any Epson product software from the Epson website for use with Windows 10 S; you must obtain software only from the Windows Store.

Selecting Basic Print Settings - Windows

Selecting Default Print Settings - Windows
Changing Automatic Update Options

Parent topic: Printing from a Computer

Selecting Basic Print Settings - Windows

Select the basic settings for the document or photo you want to print.
1. Open a photo or document for printing.

2. Select the print command in your application.

   **Note:** You may need to select a print icon on your screen, the Print option in the File menu, or another command. See your application's help utility for details.

3. If necessary, select your product name as the printer you want to use.

   **Note:** You may also need to select Properties or Preferences to view your print settings.

   You see the Main tab of your printer settings window:

4. For the Paper Source setting, select where you loaded the paper you want to print on.
5. Select the size of the paper you loaded as the **Document Size** setting.

   **Note:** You can also select the **User-Defined** setting to create a custom paper size, but you cannot use the **Borderless** setting.

6. If you are printing a borderless photo, select **Borderless**. You can click **Settings** to access additional options for borderless printing.

   **Note:** You must select a compatible borderless paper type and size to print without borders. Check the borderless paper compatibility list for details.

7. Select the orientation of your document.

   **Note:** If you are printing an envelope, select **Landscape**.

8. Select the type of paper you loaded as the **Paper Type** setting.

   **Note:** The setting may not exactly match the name of your paper. Check the paper type settings list for details.

9. Select the **Quality** setting that matches the print quality you want to use.

10. Select a Color option:

    - To print a color document or photo, select the **Color** setting.
    - To print text and graphics in black or shades of gray, select the **Black/Grayscale** setting.

11. To print on both sides of the paper, select a **2-Sided Printing** option.

12. To print multiple pages on one sheet of paper, or print one image on multiple sheets of paper, select one of the settings in the **Multi-Page** menu and select the printing options you want.

13. To print multiple copies and arrange their print order, select the **Copies** options.

14. To reduce noise during printing when you select **Plain Paper/Bright White Paper**, turn on **Quiet Mode** (printing will be slower).

15. To preview your job before printing, select **Print Preview**.

16. To save your print job as a project that can be modified and combined with other print jobs, select **Job Arranger Lite**.

---

**Paper Source Options - Windows**

**Print Quality Options - Windows**
You can select any of the available options in the Paper Source menu to print on the paper loaded in that source.

**Auto**
Automatically selects the paper source based on the selected paper size.

**Cassette 1**
Selects the paper in cassette 1 as the paper source.

**Cassette 2**
Selects the paper in cassette 2 as the paper source.

**Cassette 1 > Cassette 2**
Selects the paper in cassette 1 as the paper source and automatically switches to cassette 2 when cassette 1 is empty.

**Rear Paper Feed Slot**
Selects the paper in the rear feed slot as the paper source.

**CD/DVD Tray**
Selects the CD or DVD loaded in the CD/DVD tray.

You can select any of the available Quality options to fine-tune the quality of your print. Some settings may be unavailable, depending on the paper type and border setting you have chosen.

**Draft**
For draft printing on plain paper.

**Standard**
For everyday text and image printing.
High
For photos and graphics with high print quality.

More Settings
Opens a window that lets you choose among levels of speed and quality.

Parent topic: Selecting Basic Print Settings - Windows

Multi-Page Printing Options - Windows
You can select any of the available options in the Multi-Page menu to set up your multi-page print job.

2-Up and 4-Up
Prints 2 or 4 pages on one sheet of paper. Click the Page Order button to select page layout and border options.

2×1 Poster, 2×2 Poster, 3×3 Poster, 4×4 Poster
Prints one image on multiple sheets of paper to create a larger poster. Click the Settings button to select image layout and guideline options.

Parent topic: Selecting Basic Print Settings - Windows

Selecting Double-sided Printing Settings - Windows
You can print on both sides of the paper by selecting one of the 2-Sided Printing options on the Main tab.

Note: Some options may be pre-selected or unavailable, depending on other settings you have chosen or if you are accessing the product over a network.

1. Select one of the following options for 2-Sided Printing:
   • Auto (Long-edge binding) to print your double-sided print job by automatically flipping the paper on the long edge.
   • Auto (Short-edge binding) to print your double-sided print job by automatically flipping the paper on the short edge.
• **Manual (Long-edge binding)** to print your double-sided print job by printing one side and prompting you to flip the paper over on the long edge to print the other side (recommended for paper types that do not support automatic duplexing).

• **Manual (Short-edge binding)** to print your double-sided print job by printing one side and prompting you to flip the paper over on the short edge to print the other side (recommended for paper types that do not support automatic duplexing).

2. Click the **Settings** button.
You see this window:

3. Select the double-sided printing options you want to use.
4. Click **OK** to return to the Main tab.
5. Click the **Print Density** button.
You see this window:

![Print Density Adjustment window](image)

6. Select the type of document you are printing as the Document Type setting. The software automatically sets the **Adjustments** options for that document type.

7. If necessary, select the **Adjustments** options you want to use.

8. Click **OK** to return to the Main tab.

9. Print a test copy of your double-sided document to test the selected settings.

10. Follow any instructions displayed on the screen during printing.

Double-sided Printing Options - Windows
Print Density Adjustments - Windows

**Parent topic:** Printing with Windows

**Related tasks**

Selecting Basic Print Settings - Windows

Double-sided Printing Options - Windows

You can select any of the available options on the Binding Settings window to set up your double-sided print job.
**Binding Edge Options**  
Select a setting that orients double-sided print binding in the desired direction.

**Binding Margin Options**  
Select options that define a wider margin to allow for binding.

**Start Page**  
Selects whether printing starts on the front or back page.

**Create Folded Booklet Options**  
Select the **Booklet** checkbox and a binding option to print double-sided pages as a booklet.

**Print Density Adjustments - Windows**  
You can select any of the available options on the Print Density Adjustment window to adjust the print quality of your double-sided print job.

**Print Density**  
Sets the level of ink coverage for double-sided printing.

**Increase Ink Drying Time**  
Sets the amount of time required for drying ink after printing on one side of the paper before printing the other side in double-sided printing to prevent ink smearing.

**Parent topic:** Selecting Double-sided Printing Settings - Windows
Selecting Additional Layout and Print Options - Windows

You can select a variety of additional layout and printing options for your document or photo on the More Options tab.

1. To change the size of your printed document or photo, select the Reduce/Enlarge Document checkbox and select one of these sizing options:
   - Select the Fit to Page option to size your image to fit the paper you loaded. Select the size of your document or photo as the Document Size setting, and the size of your paper as the Output Paper setting. If you want to center your image on the paper, select the Center option.
   - Select the Zoom to option to reduce or enlarge your document or photo by a specific percentage. Select the percentage in the % menu.

2. Select one of the following Color Correction options:
   - Select Automatic to automatically adjust the sharpness, brightness, contrast, and color saturation for your image.
• Select **Custom** and click the **Advanced** button to manually adjust the color correction settings or turn off color management in your printer software.

• Select **Image Options** to access additional settings for improving printed images.

  **Note:** You can also select **Color Universal Print** settings.

3. To add the following features, click the **Watermark Features** button:
   • **Watermark**: adds a visible watermark to your printout
   • **Header/Footer**: adds information such as the date and time to the top or bottom of your printout

  **Note:** Click the **Settings** button to customize the text and location of the header or footer.

4. Select any of the Additional Settings options to customize your print.

**Custom Color Correction Options - Windows**
**Image Options and Additional Settings - Windows**
**Header/Footer Settings - Windows**

**Parent topic:** Printing with Windows
Custom Color Correction Options - Windows

You can select any of the available options in the Color Correction window to customize the image colors for your print job.

![Color Correction Window]

**Color Controls**

Lets you select a **Color Mode** setting, individual settings for **Brightness**, **Contrast**, **Saturation**, and **Density**, and individual color tones. Depending on the selected color mode, you can also adjust the midtone density using the **Gamma** setting.

**Fix Photo**

Improves the color, contrast, and sharpness of flawed photos.

**Note:** Fix Photo uses a sophisticated face recognition technology to optimize photos that include faces. For this to work, both eyes and the nose must be visible in the subject's face. If your photo includes a face with an intentional color cast, such as a statue, you may want to turn off Fix Photo to retain the special color effects.
ICM
Lets you manage color using installed color printing profiles.

No Color Adjustment
Turns off color management in your printer software so you can manage color using only your application software.

Parent topic: Selecting Additional Layout and Print Options - Windows

Image Options and Additional Settings - Windows
You can select any of the Image Options and Additional Settings to customize your print. Some options may be pre-selected or unavailable, depending on other settings you have chosen.

Image Options
Emphasize Text
Adjusts the weight of printed text to increase readability.

Emphasize Thin Lines
Adjusts the weight of printed lines to increase visibility.

Edge Smoothing
Smooths jagged edges in low-resolution images such as screen captures or images from the Web.

Fix Red-Eye
Reduces or removes red-eye in photos.

Print Text in Black
Prints colored text in black.

For Color Text
Prints colored text on a background pattern or underlined.

For Color Graphs and Images
Prints colored graphics and images with overlay patterns.

For Color Text, Graphs, and Images
Prints colored text, graphics, and images with overlay patterns.

Enhancement Options
Specifies Color Universal Print enhancement settings for text, graphics, and images.

Additional Settings Options
Rotate 180°
Prints the image rotated 180° from its original orientation.
**High Speed**  
Speeds up printing but may reduce print quality.

**Mirror Image**  
Flips the printed image left to right.

**Parent topic:** Selecting Additional Layout and Print Options - Windows

### Header/Footer Settings - Windows

You can select any of the Header/Footer Settings options to add headers or footers when you print. The items are available to print at the top or bottom of your pages, in either the left, right, or center of the page.

**Note:** These settings are not saved with your document.

![Header/Footer Settings](image)

You can select to print the following information:

- User Name
- Computer Name
- Date
- Date/Time
- Collate Number (copy number)

**Note:** The user name, computer name, date, and time come from the Windows Control Panel on your computer.

**Parent topic:** Selecting Additional Layout and Print Options - Windows
Selecting a Printing Preset - Windows

For quick access to common groups of print settings, you can select a printing preset on the Main or More Options tab.

**Note:** You can create your own preset by clicking the Add/Remove Presets button.

1. Click the **Main** or **More Options** tab.
   
   You see the available **Printing Presets** on the left:

   ![Printing Presets](image)

   - Click the **Show Settings** button to view the settings for the selected preset.
   - Click the **Reset Defaults** button to reset the settings to the default values.
   - Click the **Ink Levels** button to view the ink levels for the selected preset.

2. Place your cursor over one of the **Printing Presets** to view its list of settings.
3. Click on a preset to change its settings, or use any of the available options on the screen to control your printing presets.
4. To choose a preset for printing, select it.
5. Click **OK**.

### Selecting Extended Settings - Windows

You can select additional settings that apply to all the print jobs you send to your product.

1. Access the Windows Desktop and right-click the icon for your product in the right side of the Windows taskbar, or click the up arrow and right-click .
2. Select **Printer Settings**.
3. Click the **Maintenance** tab.

You see the maintenance options:

![Maintenance Options](image)
4. Click the **Extended Settings** button.

You see this window:

![Extended Settings window](image)

5. Select any of the extended settings to customize your print.

6. Click **OK** to close the Extended Settings window.

7. Click **OK** to close the printer software window.

---

**Extended Settings - Windows**

You can select from these settings on the Extended Settings window.

**Show Progress Meter**
Displays the progress of print jobs as they are being printed.

**Enable EPSON Status Monitor 3**
Enables product monitoring for ink and paper supplies and other issues.

**Check Paper Width Before Printing**
Prevents printing beyond the edges of the paper if the paper size setting is incorrect; may reduce print speed.

**Thick Paper and Envelopes**
Prevents ink from smearing when you print on envelopes or other thick paper.
Separator Page
Before each document, prints a separator page containing the title, user, date, and time.

Always Spool RAW Datatype
Increases print speed and may solve other printing problems.

Page Rendering Mode
Increases print speed when printing is extremely slow or the print head stops during printing.

Print as Bitmap
Increases print speed when printing is extremely slow or the print head stops during printing, and other settings do not help.

Skip Blank Page
Ensures that your product does not print pages that contain no text or images.

Change Standard Resolution
Reduces the resolution of print data to correct printing problems.

Refine screening pattern
Prints graphics with a finer screening pattern.

Allow Applications to Perform ICM Color Matching
Allows applications to perform ICM color matching.

Always Use the Driver's Paper Source Setting
Prints using the paper source setting in the printer driver, rather than the setting in your application.

Printing Your Document or Photo - Windows

Once you have selected your print settings, you are ready to save your settings and print.
1. Click OK to save your settings.
You see your application's Print window, such as this one:

2. Click **OK** or **Print** to start printing.

Checking Print Status - Windows

Parent topic: Printing with Windows
Checking Print Status - Windows

During printing, you see this window showing the progress of your print job. It allows you to control printing and check ink status.

- To cancel printing, click Cancel.
- To see print jobs lined up for printing, click Print Queue.

Parent topic: Printing Your Document or Photo - Windows

Selecting Default Print Settings - Windows

When you change your print settings in a program, the changes apply only while you are printing in that program session. If you want to change the print settings you use in all your Windows programs, you can select new default print settings.
1. Access the Windows Desktop and right-click the icon for your product in the right side of the Windows taskbar, or click the up arrow and right-click.

2. Select **Printer Settings**.
   You see the printer settings window:

   ![Printer Settings Window](image)

3. Select the print settings you want to use as defaults in all your Windows programs.
4. Click **OK**.
   These settings are now the defaults selected for printing. You can still change them as needed for printing in any program session.

**Changing the Language of the Printer Software Screens**

**Parent topic:** Printing with Windows

**Changing the Language of the Printer Software Screens**
You can change the language used on the Windows printer software screens.
1. Access the Windows Desktop and right-click the icon for your product in the right side of the Windows taskbar, or click the up arrow and right-click.

2. Select **Printer Settings**.
   You see the printer settings window.

3. Click the **Maintenance** tab.
   You see the maintenance options:

   ![Printer Settings Window](image)

4. Select the language you want to use as the **Language** setting.

5. Click **OK** to close the printer software window.
   The printer software screens appear in the language you selected the next time you access them.

**Parent topic:** Selecting Default Print Settings - Windows
Changing Automatic Update Options

Your printer software for Windows automatically checks for updates to the product software. You can change how often the software checks for updates or disable this feature.

1. Access the Windows Desktop and right-click the icon for your product in the right side of the Windows taskbar, or click the up arrow and right-click .

2. Select Software Update Settings.

   You see this window:

3. Do one of the following:
   - To change how often the software checks for updates, select a setting in the Check every menu.
   - To disable the automatic update feature, select the Never option.

4. Click OK to exit.

Note: If you choose to disable the automatic update feature, you can check for updates manually.

Printing with the Built-in Epson Driver - Windows 10 S

You can print with the built-in Epson printer driver using any printing program on Windows 10 S, as described in these sections.

Note: The built-in Epson driver in Windows 10 S does not include all the available print settings for your product. To print with additional settings, download and install the Epson Print and Scan utility from the Windows Store. You cannot download and install any Epson product software from the Epson website for use with Windows 10 S; you must obtain software only from the Windows Store.

Selecting Print Settings - Windows 10 S

Parent topic: Printing from a Computer

Selecting Print Settings - Windows 10 S

Select the settings for your print job in your Windows 10 S application.

1. Open a photo or document for printing.
2. Select the print command in your application.

   Note: You may need to select a print icon on your screen, the Print option in the File menu, or another command. See your application's help utility for details.

3. If necessary, select your product name as the printer you want to use.

   Note: You may also need to select Properties or Preferences to view your print settings.
You see a window like this:

![Window Example]

4. Select the type of paper you loaded as the **Media** setting.
   
   **Note:** The setting may not exactly match the name of your paper. Check the paper type settings list for details.

5. Click the **Advanced** button.
You see a window like this:

6. Select the size of the paper you loaded as the **Paper Size** setting.
7. To print multiple copies, select or enter the number as the **Copy Count** setting.
8. To print multiple copies of multi-page documents in sets, select the **Collated** checkbox.
9. Click **OK**.

You return to the printing preferences window.
10. Select the **Layout** tab.

11. Select the orientation of your document as the **Orientation** setting.
12. To printing double-sided, select one of the **Print on Both Sides** options, depending on how you want to orient the page layout. The icon next to each option shows the layout.

![Print on Both Sides Options](image)

13. Click **OK** to save your settings.
   
   You see your application's **Print** window.

14. Click **OK** or **Print** to start printing.

## Printing on a Mac

You can print with your product using any Mac printing program, as described in these sections.

**Note:** If you have an Internet connection, it is a good idea to check for updates to your product software on Epson's support website.

**Selecting Basic Print Settings - Mac**

**Selecting Page Setup Settings - Mac**
Selecting Basic Print Settings - Mac

Select the basic settings for the document or photo you want to print.
1. Open a photo or document for printing.
2. Select the print command in your application.

   **Note:** You may need to select a print icon on your screen, the **Print** option in the File menu, or another command. See your application's help utility for details.

3. Select your product as the **Printer** setting.

4. If necessary, click the arrow next to the Printer setting or the **Show Details** button to expand the print window.
You see the expanded printer settings window for your product:

![Printer Settings Window]

**Note:** The print window may look different, depending on your version of the Mac operating system and the application you are using.

5. Select the **Copies** and **Pages** settings as necessary.

**Note:** If you do not see these settings in the print window, check for them in your application before printing.
6. Select the page setup options: **Paper Size** and **Orientation**.

   **Note:** If you do not see these settings in the print window, check for them in your application before printing. They may be accessible by selecting **Page Setup** from the File menu.

7. Select any application-specific settings that appear on the screen, such as those shown in the image above for the Preview application.

8. Select **Print Settings** from the pop-up menu.
You see these settings:

![Print Settings]

9. Select the **Paper Source** you wish to print from.
10. Select the type of paper you loaded as the **Media Type** setting.

   **Note:** The setting may not exactly match the name of your paper. Check the paper type settings list for details.

11. Select the **Print Quality** setting you want to use.
12. Select any of the available print options.

Paper Source Options - Mac
You can select any of the available options in the Paper Source menu to print from paper loaded in that source.

**Auto Select**
Automatically selects the paper source based on the selected paper size.

**Cassette 1**
Selects the paper in cassette 1 as the paper source.

**Cassette 2**
Selects the paper in cassette 2 as the paper source.

**Rear Paper Feed Slot**
Selects the paper in the rear feed slot as the paper source.

Parent topic: Selecting Basic Print Settings - Mac

Print Quality Settings - Mac
You can select any of the Print Quality settings to fine-tune the quality of your print. Some settings may be unavailable, depending on the paper type and border setting you have chosen.

**Draft**
For draft printing on photo paper.

**Fast Economy**
For the fastest printing with draft quality.

**Economy**
For fast printing with reduced quality.

**Normal**
For everyday text and image printing.

**Fine**
For text and graphics with good quality and print speed.

**Quality**
For photos and graphics with good quality and print speed.

**Best Quality**
For the best print quality, but the slowest print speed.

Parent topic: Selecting Basic Print Settings - Mac
Print Options - Mac

You can select any of the print options to customize your print. Some options may be unavailable, depending on other settings you have chosen.

Expansion
If you selected a borderless paper size setting, this option adjusts the image expansion settings to control printing at the edges of borderless prints.

Grayscale
Prints text and graphics in black or shades of gray.

Mirror Image
Lets you flip the printed image horizontally.

Note: If you select the Min option for the Expansion setting, you may see white borders on your printed photo.

Parent topic: Selecting Basic Print Settings - Mac

Selecting Page Setup Settings - Mac

Depending on your application, you may be able to select the paper size and orientation settings from the print window.

Note: If you do not see these settings in the print window, check for them in your application before printing. They may be accessible by selecting Page Setup from the File menu.

1. Select the size of the paper you loaded as the Paper Size setting. If you are printing a borderless photo, select the Borderless checkbox or a paper size with a Borderless option. You can also select a custom setting to create a custom paper size, but the Quality setting will be limited to Normal.

Note: You must select a compatible borderless paper type and size to print without borders. Check the borderless paper compatibility list for details.
2. Select the orientation of your document or photo as shown in the print window.

   **Note:** If you are printing an envelope, select the icon.

   **Note:** You can reduce or enlarge the size of the printed image by selecting **Paper Handling** from the pop-up menu and selecting a scaling option.

**Selecting Print Layout Options - Mac**

You can select a variety of layout options for your document or photo by selecting **Layout** from the pop-up menu on the print window.

![Layout Options](image)

- To print multiple pages on one sheet of paper, select the number of pages in the **Pages per Sheet** pop-up menu. To arrange the print order of the pages, select a **Layout Direction** setting.
- To print borders around each page on the sheet, select a line setting from the **Border** pop-up menu.
- To invert or flip the printed image, select the **Reverse page orientation** or **Flip horizontally** settings.

**Parent topic:** Printing on a Mac
Selecting Double-sided Printing Settings - Mac

You can print on both sides of the paper by selecting **Two-sided Printing Settings** from the pop-up menu on the print window.

![Two-sided Printing Settings](image)

**Note:** Some options may be pre-selected or unavailable, depending on other settings you have chosen or if you are accessing the product over a network. This screen may be different, depending on the Mac OS version you are using.

1. Select one of the **Two-sided Printing** options.
2. Select the type of document you are printing as the **Document Type** setting. The software automatically sets the Adjustments options for that document type.

3. If necessary, customize the Adjustments settings as instructed on the screen.

4. Print a test copy of your double-sided document to test the selected settings.

5. Follow any instructions displayed on the screen during printing.

**Parent topic:** Printing on a Mac

**Double-sided Printing Options and Adjustments - Mac**

You can select any of the available options in the *Two-sided Printing Settings* or *Output Settings* pop-up menu to set up your double-sided print job.
Two-sided Printing Options

Long-Edge binding
Orients double-sided printed pages to be bound on the long edge of the paper.

Short-Edge binding
Orients double-sided printed pages to be bound on the short edge of the paper.

Adjustments

Print Density
Sets the level of ink coverage for double-sided printing.

Increased Ink Drying Time
Sets the amount of time required for drying ink after printing on one side of the paper before printing the other side in double-sided printing.

Parent topic: Selecting Double-sided Printing Settings - Mac

Managing Color - Mac

You can adjust the Color Matching and Color Options settings to fine-tune the colors in your printout, or turn off color management in your printer software.

1. Select Color Matching from the pop-up menu in the print window.

2. Select one of the available options.
3. Select **Color Options** from the pop-up menu in the print window.

![Color Options Menu](image)

**Note:** The available settings on the Color Options menu depend on the option you selected on the Color Matching menu.

4. Select one of the available options.

**Color Matching and Color Options - Mac**

**Parent topic:** Printing on a Mac

**Color Matching and Color Options - Mac**

You can select from these settings on the **Color Matching** and **Color Options** menus.

**Color Matching Settings**

**EPSON Color Controls**

- Lets you manage color using controls in your printer software or turn off color management.

**ColorSync**

- Prints using standard color profiles for your product and paper to help match image colors. You can customize the conversion method and filter settings on the ColorSync pop-up menu in the print window.
Color Options Settings

Manual Settings
Lets you select manual color adjustments. Click the arrow next to Advanced Settings and select settings for Brightness, Contrast, Saturation, and individual color tones. You can also select a color Mode setting for printing photos and graphics and the Fix Red-Eye setting to reduce or remove red-eye in photos. Depending on the selected color mode, you can also adjust the midtone density using the Gamma setting.

Fix Photo
Improves the color, contrast, and sharpness of flawed photos. Click the arrow next to Advanced Settings and select the Fix Red-Eye setting to reduce or remove red-eye in photos.

Note: Fix Photo uses a sophisticated face recognition technology to optimize photos that include faces. For this to work, both eyes and the nose must be visible in the subject's face. If your photo includes a face with an intentional color cast, such as a statue, you may want to turn off Fix Photo to retain the special color effects.

Off (No Color Adjustment)
Turns off color management in your printer software so you can manage color using only your application software.

Note: An ICC profile is required if color management is turned off.

Parent topic: Managing Color - Mac

Selecting Printing Preferences - Mac
You can select printing preferences that apply to all the print jobs you send to your product.

1. In the Apple menu or the Dock, select System Preferences.
2. Select Print & Fax, Print & Scan, or Printers & Scanners, select your product, and select Options & Supplies.
3. Select Driver or Options.
You see a screen like this:

![Printing Preferences - Mac](image)

4. Select any of the available printing preferences.
5. Click **OK**.

**Printing Preferences - Mac**

**Parent topic:** Printing on a Mac

**Printing Preferences - Mac**

You can select from these settings on the **Options** or **Driver** tab.

**Thick Paper and Envelopes**

Prevents ink from smearing when you print on envelopes or other thick paper.

**Skip Blank Page**

Ensures that your product does not print pages that contain no text or images.

**Quiet Mode**

Lessens noise during printing but may decrease print speed.

**Automatic Cassette Switching**

Automatically switches to the other cassette when one of the cassettes runs out of paper.
High Speed Printing
Speeds up printing but may reduce print quality.

Warning Notifications
Lets you choose whether or not to receive warning notifications from the printer software for various operating conditions.

Establish bidirectional communication
Allows the product to communicate with the computer. Do not change the default setting unless you experience issues when using a shared printing pool.

Starting a Scan from a Scanning Program
Scanning from Smart Devices

Parent topic: Scanning

Starting a Scan Using the Product Control Panel

You can scan an image to your computer using your product's control panel buttons.

Your product automatically selects suitable default scan settings, but you can view or change them as necessary.

1. Make sure you installed the product software and connected the product to your computer or network.

   Note: Restart your computer after installing the product software to enable scanning from the control panel. Also make sure the Event Manager program is not being blocked by your firewall or security software.

2. Press the home button, if necessary.

3. Press the arrow buttons to select Scan and press the OK button.
You see a screen like this:

![Scan options screen]

4. Select a scan option and press the OK button.
   - **Scan to Memory Card** saves your scan file on a memory card and lets you select the file format, quality, and other settings.
   - **Scan to Cloud** sends your scanned files to a destination that you have registered with Epson Connect.

   **Note:** To use this feature, you must have registered a cloud account with Epson Connect.

   - **Scan to Computer (JPEG)** saves your scan as a JPEG file to your computer or as an image capture on a Mac.
   - **Scan to Computer (PDF)** saves your scan as a PDF file to your computer or as an image capture on a Mac.
   - **Scan to Computer (Email)** scans your original and attaches it to a message in your e-mail program. You can select the e-mail program you want to use and resize your image, if necessary, from an option screen on your computer.

   **Note:** This works with MAPI-type email such as Microsoft Outlook, Windows Live Mail, Mac Mail, and Entourage, but not web-based email such as Gmail.

   - **Scan to Computer (WSD)** lets you manage wireless scanning in Windows.
Note: To use this feature, you must first set up WSD (Web Services for Devices) on the computer you want to scan to.

5. To scan to your PC, select how you connected your product to your computer:
   • If your product is connected directly to your computer with a USB cable, select **USB Connection**.
   • If your product is connected to your computer over a network, select the computer name from the list.

6. Press the start button to start scanning.

Changing Default Scan Job Settings

You can view or change the default scan job settings your product uses when you scan to your computer. You do this using the Event Manager program.

1. Do one of the following to open Event Manager:
   - **Windows 10**: Click and select EPSON Software > Event Manager.
   - **Windows 8.x**: Navigate to the Apps screen and select Event Manager.
   - **Windows (other versions)**: Click or Start > All Programs or Programs > EPSON Software > Event Manager.
   - **Mac**: Open the Applications folder, click Epson Software, and select Event Manager.
2. Open the Scanner (Windows) or Select Scanner (Mac) drop-down list and select your product, if necessary.
3. Click Make Job Settings.
4. Open the Edit Job Settings drop-down list and select the scan job settings you want to view or change.
5. Change the settings as necessary.
6. Click OK.
7. Click Close to close the Event Manager window.

Parent topic: Starting a Scan Using the Product Control Panel

Starting a Scan Using the Epson Scan 2 Icon

You can start the Epson Scan 2 program to select scan settings, scan, and save the scanned image to a file.
Note: If you are using your Epson product with the Windows 10 S operating system, you cannot use the software described in this section. You also cannot download and install any Epson product software from the Epson website for use with Windows 10 S; you must obtain software only from the Windows Store.

- **Windows 10**: Click  and select EPSON > Epson Scan 2.
- **Windows 8.x**: Navigate to the Apps screen and select Epson Scan 2.
- **Windows (other versions)**: Click or Start, and select All Programs or Programs. Select EPSON > Epson Scan 2 > Epson Scan 2.
- **Mac**: Open the Applications folder, open the Epson Software folder, and select Epson Scan 2.
You see an Epson Scan 2 window like this:
Starting a Scan from a Scanning Program

You can start Epson Scan 2 from a TWAIN-compliant scanning program to select scan settings, scan, and open the scanned image in the program.

**Note:** If you are using your Epson product with the Windows 10 S operating system, you cannot use the software described in this section. You also cannot download and install any Epson product software from the Epson website for use with Windows 10 S; you must obtain software only from the Windows Store.

1. Open your scanning program and select its scanning option. (See your scanning program help for instructions.)
2. Select your product.

**Note:** In certain programs, you may need to select your product as the "source" first. If you see a **Select Source** option, choose it and select your product. With Windows, do not select a **WIA** option for your product; it will not work correctly.
You see an Epson Scan 2 window like this:
Scanning from Smart Devices

Using the Epson iPrint application, you can use your iOS or Android smartphone or tablet to scan original documents or photos on your networked product and save them as digital files on your device. Follow the link here for more information on Epson iPrint.

Using the Epson iPrint Mobile App

Scanning in Epson Scan 2

Epson Scan 2 automatically scans your document and saves the scanned file in PDF format in your operating system's Documents or My Documents folder, or opens it in your scanning program. You can select settings, preview, and change the scanned file settings as necessary.

Note: If you are using your Epson product with the Windows 10 S operating system, you cannot use the software described in this section. You also cannot download and install any Epson product software from the Epson website for use with Windows 10 S; you must obtain software only from the Windows Store.

1. Start Epson Scan 2.
You see this window:
2. Select the **Mode** setting that matches the type of original you are scanning.

3. Select the **Document Source** setting that matches where you placed your original.

4. Select the **Document Size** setting that matches the size of your original. You can select **Customize** to enter a custom size, if necessary.

5. Select the image type of your original and how you want it scanned as the **Image Type** setting.

6. Select the **Resolution** setting you want to use for your scan.

7. Select the **Rotate** setting to rotate the scanned image.

8. Select the **Correct Document Skew** setting to correct skewed originals, image contents, or both.

9. Click the **Preview** button.

   Epson Scan 2 previews your original and displays the results in the Epson Scan 2 window.

10. Do one of the following:
    - If you’re scanning in Document Mode, select any of the additional settings that you want to use on the **Main Settings** tab.
    - If you’re scanning in Photo Mode, select the **Color Management** and **Thumbnail Options** settings as necessary.

11. Click the **Advanced Settings** tab and select any settings that you want to use.
12. Select the format in which you want to save your scanned file as the Image Format setting. If necessary, select Options and select any desired format options.

13. Enter the file name for your scanned file in the File Name field. If necessary, select Settings to modify the file name settings.

14. Select the location in which you want to save your scanned file as the Folder setting. If necessary, select Select to create a new folder.

15. Click Scan.

The product scans your original and saves the scanned file in the location you specified.

Saving Scanned Documents as a Searchable PDF

Parent topic: Scanning

**Additional Scanning Settings - Main Settings Tab**

You can select these additional scanning settings on the Epson Scan 2 Main Settings tab. Not all adjustment settings may be available, depending on other settings you have chosen.

**Correct Document Skew**
Corrects skewed originals, image contents, or both.

**Add or edit pages after scanning**
Lets you add, remove, or edit the pages in a job, including rotating pages and changing the page order.

Note: To save multiple pages in a single file, you must select a file format that supports multiple pages such as PDF or Multi-TIFF. If you select another file format, each scanned image or page is saved as a separate file.

Parent topic: Scanning in Epson Scan 2

**Additional Scanning Settings - Advanced Settings Tab**

You can select these additional scanning settings on the Epson Scan 2 Advanced Settings tab. Not all adjustment settings may be available, depending on other settings you have chosen.

**Remove Background**
Removes the background of the originals.
Text Enhancement
Sharpen the appearance of letters in text documents.

Auto Area Segmentation
Makes black and white images clearer and text recognition more accurate by separating the text from the graphics.

Threshold
Adjusts the level at which black areas in text and line art are delineated, improving text recognition in OCR (Optical Character Recognition) programs.

Color Enhance
Enhances the shades of the color you select in the scanned image. This setting is available only if you select Grayscale or Black & White as the Image Type setting.

Brightness
Adjusts the overall lightness and darkness of the scanned image.

Contrast
Adjusts the difference between the light and dark areas of the overall scanned image.

Gamma
Adjusts the midtone density of the scanned image.

Unsharp Mask
Makes the edges of certain image areas clearer. Turn off this option to leave softer edges.

Descreening
Removes the ripple pattern that might appear in subtly shaded image areas, such as skin tones. This option improves results when scanning magazines or newspapers. (The results of descreening do not appear in the preview image, only in your scanned image.)

Edge Fill
Corrects shadowing around the edges of the image by filling the shadows with black or white.

Dual Image Output
Scans the original image twice using different output settings (Windows only).

Parent topic: Scanning in Epson Scan 2

Saving Scanned Documents as a Searchable PDF
You can scan a document and save the text in a searchable PDF. In a searchable PDF, text is recognized using Optical Character Recognition (OCR) and then embedded in the scanned original.
Note: The required Epson Scan 2 OCR Component is installed automatically when you install your product software as instructed on the Start Here sheet. If you install your scanner software programs individually, be sure to also install this component if you want to perform OCR.

1. Load your original in the product for scanning.
2. Start Epson Scan 2.
3. Select your scan settings.
4. Click Preview and adjust the area you want to scan, if necessary.
5. Select Searchable PDF as the Image Format setting.
6. Select Options from the Image Format list.
   You see this window:

7. Select any of the options on the General tab.
8. Select the Text tab.
9. Make sure the language used in the document text is selected as the Text Language setting.
10. Click OK.
11. Confirm the File Name setting and select a Folder setting for your document.
12. Click Scan.
   The scanned image is saved as a searchable PDF.

**Parent topic:** Scanning in Epson Scan 2
Using Memory Cards with Your Product

Follow the instructions here to work with a memory card inserted into your product.

Inserting a Memory Card
Printing from a Memory Card
Transferring Photos on a Memory Card

Inserting a Memory Card

Insert only one memory card at a time into the memory card slot on your product.

1. Make sure the memory card and the files on it are compatible with your product before inserting the card.

2. Insert your memory card into the slot, making sure the card is oriented correctly.

![Memory Card Insertion Diagram]

1 Memory card access light

**Note:** Do not force the card all the way into the slot. Insert it only until it meets resistance.

The memory card access light flashes and then stays lit.

**Caution:** Do not remove the memory card or turn off your product while the memory card access light is flashing, or you may lose data from the memory card.
Memory Card Types

You can insert these types of memory cards in your product.

**Note:** Cards marked with an asterisk (*) require an adapter; consult your adapter documentation for details on using it.

You can insert the following cards in the memory card slot:

- SD: 2GB
- SDHC: 32GB
- SDXC: 64GB
- miniSD*: 2GB
- miniSDHC*: 32GB
- microSD*: 2GB
- microSDHC*: 32GB
- microSDXC*: 64GB

Parent topic: Inserting a Memory Card

Memory Card File Specifications

You can insert memory cards in your product containing files that meet these specifications.

<table>
<thead>
<tr>
<th>File format</th>
<th>JPEG with the Exif version 2.3 standard (taken with digital camera using DCF (Design rule for Camera File system) version 1.0 or 2.0 compliant)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Image size</td>
<td>80 × 80 pixels to 10200 × 10200 pixels</td>
</tr>
<tr>
<td>File size</td>
<td>Up to 2GB</td>
</tr>
<tr>
<td>Number of files</td>
<td>Up to 9990</td>
</tr>
</tbody>
</table>

Parent topic: Using Memory Cards with Your Product
Note: DCF 2.0 files stored in a camera’s built-in memory are not supported.

Parent topic: Inserting a Memory Card

Removing a Memory Card

After you finish working with a memory card, check to make sure it is safe to remove it from your product.

Caution: Do not remove a memory card or turn off your product while the memory card access light is flashing or you may lose data from the memory card.

1. Make sure the memory card access light is not flashing.

2. If your product is connected to your computer using a USB cable, do one of the following:
   - Windows: Open the My Computer, Computer, Windows Explorer, or File Explorer utility. Then right-click the name of your memory card (listed as a removable disk) and select Eject.
   - Mac: Drag the removable disk icon for your memory card from the desktop or computer window into the trash.

3. Push in the memory card, then pull it straight out of its slot.

Viewing and Printing Photos From the LCD Screen

You can select photos for printing as you view them on the LCD screen.

1. Press the home button, if necessary.
2. Press the arrow buttons to select Print Photos and press the OK button.
   - A photo on your memory card is displayed:

![Photo on memory card]

3. Press the right or left arrow button to scroll through your photos and display one that you want to view or print.
4. Press the + or – button to select one or more copies of the photo (up to 99).
5. To view and select additional photos for printing, repeat the steps above.
6. To view additional settings, press the down arrow button.
You see this screen:

![Print Photos Menu]

7. Do one of the following:
   - To locate photos by date, select **Browse**, press the **OK** button twice, and select the photos you want.
   - To change the selected photos and number of copies to print, select **Select Photos**, press the **OK** button, and select the necessary settings.
   - To change the display setting for the LCD screen, select **Display Mode**, press the **OK** button, and select the setting you want.
   - To change the print settings, select **Print Settings**, press the **OK** button, and select the necessary settings.
   - To change the appearance (e.g., brightness and contrast) of your printed photos, select **Photo Adjustments**, press the **OK** button, and select the necessary settings.
   - To apply a sepia tone or black-and-white filter to the viewed or printed photo, select **Filter**, press the **OK** button, and select the necessary settings.
   - To crop or zoom into your photo, select **Crop/Zoom**, press the **OK** button, and press the + or – button to adjust the image area or the home button to rotate the crop area. When you are finished, press the **OK** button twice.

8. When you are ready to print, press the start button.

   **Note:** To cancel printing, press the **cancel** button.

Printing Photo Layouts from a Memory Card

You can print one or more photos from a memory card in special layouts on various sizes of photo paper.

1. Load photo paper in your product.
2. Press the \home\ button, if necessary.
3. Press the arrow buttons to select More Functions and press the OK button.
4. Select Photo Layout Sheet and press the OK button.

You see this screen:

5. Select one of the layout options and press the OK button.
You see this screen:

6. Select the **Paper Size** setting that matches the paper you loaded and press the **OK** button.
7. Select the **Paper Type** setting that matches the paper you loaded and press the **OK** button.

Depending on the layout you selected, you may see this screen:

8. If you see the screen above, do one of the following:
   - To allow your product to place photos in the layout automatically, select **Automatic Layout** and press the **OK** button. Press the + button to select a photo to print. If you need to deselect a photo, press the – button. Press the **OK** button when you’re finished.
• To place photos in the layout manually, select **Place Photos Manually** and press the **OK** button. Press the arrow buttons to change layout options, pressing the **OK** button to confirm each photo placement.

**Note:** If the product does not automatically advance to the next screen when you finish placing your photos, press the arrow buttons to select **Finished** and press the **OK** button.

9. If you want to change the print settings for the photo layout sheet, press the up or down arrow button to select **Menu** and press the **OK** button.

10. Press the + or – button to select one or more copies of each photo layout sheet (up to 99).

11. Press the **OK** button.

12. To print more than one copy of the photo layout sheet, press the + or – button to select the number (up to 99).

13. When you are ready to print, press the start button.

**Note:** To cancel printing, press the cancel button.

**Printing Photo Greeting Cards**

You can create custom greeting cards using photos on your memory card or other device, and add your own handwritten or printed text.

First you select your photo and print a template on plain paper. Then you fill out the template, add your message, and print your cards.

Creating and Printing a Greeting Card Template

Parent topic: Printing from a Memory Card

---

**Creating and Printing a Greeting Card Template**

Before you start, make sure plain paper is loaded and your memory card is inserted.

1. Press the home button, if necessary.
2. Press the arrow buttons to select More Functions and press the OK button.
3. Select Print Photo Greeting Card and press the OK button.
4. Select **Select Photo and Print Template** and press the **OK** button.
5. Press the left or right arrow button to select the photo you want and press the **OK** button.
6. Select **Letter** to print three cards on one letter-size sheet or **4x6in** to print one card. Then press the **OK** button.
7. Select the type of paper you plan to use and press the **OK** button.
8. Select the other print settings as necessary, pressing the **OK** button after each selection.
9. When you are ready to print your greeting card template on plain paper, press the  start button.

**Parent topic:** Printing Photo Greeting Cards

**Related tasks**

Printing a Greeting Card from a Template

**Printing a Greeting Card from a Template**

After your greeting card template is printed, you fill it out to create your card and add your message.

1. Use a dark pen or pencil to fill in the circles and select the Text Style and Text Effects.

![Image of a greeting card template being filled out]

2. Add your greeting card message within the box. You can write it in by hand, print a message and paste it into the box, or draw a picture.

**Note:** When adding text, place it in the direction that your photo faces.
3. Load photo paper either in Cassette 2 (lower) for this size: Letter (8.5 × 11 inches [216 × 279 mm]), or in Cassette 1 (upper) for this size: 4 × 6 inches (102 × 152 mm).

4. Select **Print Greeting Cards from Template** and press the **OK** button. (If you do not see the option, press the ☰ home button and select **More Functions > Print Photo Greeting Card > Print Greeting Cards from Template**.)

5. Follow the instructions on the LCD screen to place the template facedown on the scanner glass with the blue triangle facing into the front right corner.

6. Close the document cover and press the **OK** button.

7. To print more than one copy, press the + or – button to select the number (up to 99).

8. When you are ready to print, press the ⌚ start button.

   **Note:** To cancel printing, press the ⌚ cancel button.

When you finish printing, cut your greeting cards apart, if necessary.

Connecting and Using a USB Flash Drive or External Device
Before you connect your flash drive or external device, make sure the product is turned on but not printing.

Note: Epson cannot guarantee the compatibility of your drive.

1. Remove any memory cards from the product.
2. Load the paper you want to use for printing.
3. Insert your USB flash drive or the USB cable that came with your device into the 🔗 USB port on the front of your product.

4. Insert storage media (such as a CD) into your drive, if necessary.

5. Select the photos to print from the LCD screen.

When you finish printing, make sure the access light on the device is not flashing, then remove or disconnect it from the product.

**Caution:** Do not remove the USB device or turn off the product when the access light is flashing, or you may lose photos on the device.

Printing Personalized Projects

You can print calendars, lined paper, graph paper, or stationery with a photo background.

Printing Coloring Book Pages
Printing Personalized Note Paper
Printing Lined Paper, Graph Paper, and Music Sheets
Printing Calendar Pages

Printing Coloring Book Pages

You can create a coloring book page from a photo on your memory card, or from a photo or drawing placed on the scanner glass.

1. Load one of these types of paper in either Letter (8.5 × 11 inches [216 × 279 mm]) or A4 (8.3 × 11.7 inches [210 × 297 mm]) size:
   - Plain paper
   - Epson Bright White Paper
   - Epson Presentation Paper Matte
   - Epson Premium Presentation Paper Matte

2. Insert a memory card or place a photo or drawing on the scanner glass.

3. Press the home button, if necessary.

4. Press the arrow buttons to select More Functions and press the OK button.
5. Select **Coloring Book** and press the **OK** button.

6. Select one of the following settings:
   - **Photo or Drawing on Scanner Glass** to print a design from an original placed facedown on the scanner glass, in the front right corner
   - **Photo on Memory Card** to print a design from a memory card inserted in your product, then select a photo

7. Press the **OK** button twice.

8. Press the left or right arrow button to select the size and type of paper that you loaded.

9. Press the down arrow button to select **Paper Source** and select where you loaded your paper.

10. If necessary, adjust the following settings:
    - **Density** to make the print lighter or darker
    - **Line Detection** to change the amount of detail in the print

11. When you are ready to print, press the ** şiir** start button.

Printing on CDs/DVDs

Follow the instructions in this section to print a design onto ink jet-printable CDs or DVDs to create a custom label.

CD/DVD Printing Features
Loading a CD/DVD
Removing a Printed CD/DVD
Placing a CD/DVD on the Scanner Glass
Copying onto a CD/DVD
Printing Photos from a Memory Card Onto a CD/DVD
Printing a Jewel Case Insert from a Memory Card
Printing on CDs/DVDs from a Computer

CD/DVD Printing Features

You can use any of the following features to print custom CD/DVD/Blu-ray Disc labels and accessories:

• Copy an existing label onto a new CD/DVD/Blu-ray Disc
• Use your product's control panel to print photos from a memory card onto a CD/DVD/Blu-ray Disc
• Print text and images from your computer using the Epson Print CD software

You can also use your product's control panel to create a jewel case insert with photos from a memory card.

Parent topic: Printing on CDs/DVDs

Related tasks

Printing on CDs/DVDs from a Computer

Loading a CD/DVD

You can print on any compatible, ink jet-printable CDs or DVDs, including Blu-ray Discs.
Caution: Do not insert the CD/DVD tray while the product is printing, copying, or performing other operations. Otherwise, your product may be damaged or the surface of the CD/DVD may become dirty or scratched.

Note: If you are using discs where the printable area extends to within 0.16 inch (4 mm) of the center hole, you may need to adjust the inner diameter setting using the control panel or Epson Print CD software.

1. Burn your files, music, or video onto your disc before printing on it.
2. Press the home button, if necessary.
3. Press the CD button, select Load CD/DVD, and press the OK button.
4. When you see a message asking if you want to prepare for CD loading, select Yes and press the OK button.
5. Raise the control panel all the way up.
6. Make sure nothing is on the output tray, then close it.
7. Close the front cover.
8. Remove the CD/DVD tray from the bottom of the product.

9. Place a CD or DVD on the CD/DVD tray with the printable side faceup, and insert the tray into the slot above the output tray.

Note: Make sure the ▲ marks on the tray and the ▼ marks on the product line up.
10. Press the OK button.

**Caution:** Do not turn off the product with a CD or DVD loaded in it. Always remove the disc first.

**Parent topic:** Printing on CDs/DVDs

### Removing a Printed CD/DVD

After your CD or DVD is printed, the tray extends automatically.

1. Pull the CD/DVD tray out of the product and remove your CD or DVD from the tray.

2. Insert the CD/DVD tray into the storage slot on the bottom of the product.
**Caution:** After printing, handle the CD or DVD carefully. You may need to wait up to 24 hours for the ink to dry fully before inserting it in a drive, depending on the type of disc you used. Keep printed discs away from moisture and direct sunlight.

**Parent topic:** Printing on CDs/DVDs

### Placing a CD/DVD on the Scanner Glass

You can place a CD or DVD on the scanner glass and copy the label design onto another CD or DVD.

1. Open the document cover.
2. Place your CD or DVD facedown in the center of the scanner glass.
3. Close the document cover gently to keep your disc in place.

**Parent topic:** Printing on CDs/DVDs

### Copying onto a CD/DVD

You can copy a printed photo or CD/DVD label directly onto an ink jet-printable CD or DVD. If you want, you can first print a test design on plain paper.

1. Load the CD, DVD, or plain paper you want to print on.
2. Press the home button, if necessary.
3. Press the CD button.
4. Select **CD/DVD Copy** and press the **OK** button.
5. Follow the instructions on the LCD screen to place your original CD, DVD, or photo on the scanner glass and press the OK button.

6. If necessary, adjust the inner and outer diameter of your CD as shown on the screen, and press the OK button.

   You see this screen:

   ![CD/DVD Selection Screen]

7. Select one of the options shown on the screen and press the OK button. If printing a test print on plain paper, press the OK button again.

8. Select any copy settings as needed.

9. When you are ready to print, press the start button.

   **Note:** To cancel printing, press the cancel button.

**Parent topic:** Printing on CDs/DVDs

**Related tasks**

**Printing Photos from a Memory Card Onto a CD/DVD**

You can print one or more photos from a memory card directly onto a CD/DVD. If you want, you can first print a test design on plain paper.
1. Insert a memory card into a memory card slot on your product.
2. Load the CD, DVD, or plain paper you want to print on.
3. Press the  home button, if necessary.
4. Press the  CD button.
5. Select **Print on CD/DVD** and press the **OK** button.
   You see this screen:

![Print on CD/DVD menu](image)

6. Select one of the layout options and press the **OK** button.
7. Follow the instructions on the screen to select your photo or photos.
8. When you see the screen to adjust the inner and outer diameter of your CD or DVD, adjust the settings if necessary, and press the **OK** button.
You see this screen:

![Print on CD/DVD Select Media](image)

9. Select one of the options shown on the screen and press the OK button. If printing a test print on plain paper, press the OK button again.
10. When you are ready to print, press the start button.

**Note:** To cancel printing, press the cancel button.

**Parent topic:** Printing on CDs/DVDs

**Related tasks**

### Printing a Jewel Case Insert from a Memory Card

You can print a photo from a memory card on a CD/DVD jewel case insert. Your product automatically resizes the photo to fit, but you can also print multiple thumbnail images formatted to fit on a jewel case insert. After the insert is printed, you can cut and fold it to fit.

1. Insert a memory card into a memory card slot on your product.
2. Load the paper you want to print on.
3. Press the home button, if necessary.
4. Press the arrow buttons to select **More Functions** and press the **OK** button.

![More Functions Menu]

5. Select **Photo Layout Sheet** and press the **OK** button.

![Photo Layout Sheet Menu]

6. Select one of the following options and press the **OK** button:
   - **Jewel Upper** to print one photo on the upper half of the insert.
   - **Jewel Index** to print 24 or 48 thumbnail images on the insert.

7. Select your paper size and type, and press the **OK** button.

8. Follow the instructions on the LCD display to select your photos and set the number of copies.
9. When you are ready to print, press the start button.

   Note: To cancel printing, press the cancel button.

10. After your insert is printed, cut and fold it following the crop lines.

Refilling Ink

When the ink level is below the lower line on an ink tank, you need to refill it.
Before checking the ink level or refilling an ink tank as described here, be sure to read the ink safety precautions.

Caution: If the ink level is below the lower line on the ink tank, fill it to the upper line on the ink tank. Continued use of the product when the ink level is below the lower line on the tank could damage the product.

Ink Safety Precautions
Check Ink Levels
Purchase Epson Ink and Maintenance Box
Refilling the Ink Tanks
Replacing the Maintenance Box

Ink Safety Precautions

Note: The product has a low ink alert system. The accuracy of this system depends on the user refilling the ink tanks correctly. The product cannot directly measure the ink levels in the tanks; instead it estimates the amount of ink remaining by internally monitoring ink usage. The low ink alert system may generate inaccurate messages if the ink tanks are not refilled according to these instructions.

As a precaution, perform regular visual inspections of the ink tanks to ensure ink levels do not fall below the lower line. Continued use of the product when the ink level is below the lower line on the tank could damage the product.

Ink Handling Precautions

• Keep ink bottles and the ink tank unit out of the reach of children. Do not allow children to drink from or handle the ink bottles and bottle caps.
• Do not tilt or shake an ink bottle after opening it; otherwise, ink may leak.
• If ink gets on your skin, wash it thoroughly with soap and water. If ink gets into your eyes, flush them immediately with water. If ink gets into your mouth, spit it out immediately. Seek medical advice if problems persist.
• Do not squeeze the ink bottles.
Ink Refilling Precautions

- Use ink bottles with the correct part number for this product.
- Do not mix with other Epson ink types.
- The use of non-Epson ink may cause damage that is not covered by Epson’s warranty, and under certain circumstances, may cause erratic product behavior.
- This product requires careful handling of ink. Ink may splatter when the ink tanks are filled or refilled with ink. If ink gets on your clothes or belongings, it may not come off.
- Do not open the ink bottle package until you are ready to fill an ink tank. Ink bottles are vacuum packed to maintain reliability. If you leave an ink bottle unpacked for a long time before using it, print quality may be affected.
- If the ink level is below the lower line on the ink tank, refill the ink. Continued use of the product when the ink level is below the lower line on the ink tank could damage the product.
- Epson recommends filling an ink tank to the upper line before resetting the ink level.
- After bringing an ink bottle inside from a cold storage site, allow it to warm up at room temperature for at least three hours before using it.
- Store ink bottles in a cool, dark place.
- Store the ink bottles in the same environment as the product. When storing or transporting an opened ink bottle, do not tilt the bottle and do not subject it to impacts or temperature changes. Otherwise, ink may leak even if the cap on the ink bottle is tightened securely. Be sure to keep the ink bottle upright when tightening the cap, and take measures to prevent ink from leaking when you transport the bottle.

Ink Bottle and Ink Tank Information

- To maintain optimum print head performance, some ink is consumed from all ink tanks during printing and when performing maintenance operations, such as cleaning the print head.
- The ink bottles may contain recycled materials, but this does not affect product function or performance.
- When printing in monochrome or grayscale, color ink may be used instead of black ink, depending on the paper type or print quality settings. This is because a mixture of color inks is used to create black.

1. Access the Windows Desktop and right-click the icon for your product in the right side of the Windows taskbar, or click the up arrow and right-click. Select Monitoring Preferences.

You see this window:
2. To disable promotional offers, deselect the Display Epson Offers checkbox.

Parent topic: Check Ink Levels

Purchase Epson Ink and Maintenance Box

You can purchase genuine Epson ink, maintenance boxes, and paper at epson.com (U.S. sales) or epson.ca (Canadian sales). You can also purchase supplies from an Epson authorized reseller. To find the nearest one, call 800-GO-EPSON (800-463-7766) in the U.S. or 800-807-7766 in Canada.

Note: This product is designed to work with genuine Epson inks. Non-Epson ink or any other ink not specified for this printer could cause damage not covered by Epson's warranties.

The included initial ink bottles must be used for printer setup and are not for resale. The printer ships with full ink bottles and part of the ink from the first bottles is used to charge the print head. Yields vary considerably based on images printed, print settings, paper type, frequency of use and temperature.

Maintenance box part number: T04D000

Parent topic: Purchase Epson Ink and Maintenance Box

Refilling the Ink Tanks

Make sure you have new ink bottles handy and have read the ink safety precautions before you begin.
You can continue to use the product even if one or more ink tanks are not filled all the way. However, for the most accurate ink level monitoring, fill all the ink tanks up to the top line.

**Note**: The product has a low ink alert system. The accuracy of this system depends on the user refilling the ink tanks correctly. The product cannot directly measure the ink levels in the tanks; instead it estimates the amount of ink remaining by internally monitoring ink usage. The low ink alert system may generate inaccurate messages if the ink tanks are not refilled according to these instructions.

As a precaution, perform regular visual inspections of the ink tanks to ensure ink levels do not fall below the lower line. Continued use of the product when the ink level is below the lower line on the tank could damage the product.

**Caution**: Wear disposable gloves while refilling the ink tanks to avoid staining your hands. If ink spills, wipe it off immediately with a damp towel to avoid permanent stains. If ink gets on your clothes or belongings, it may not come off.

1. Turn on your product.
2. Lift up the scanner unit.
3. Open the ink tank cover, then open the cap for the ink tank you are going to fill.

![Image of ink tank cover and ink tank]

4. Hold the ink bottle upright and slowly turn the bottle cap to remove it.

![Image of bottle cap being removed]

**Caution:** Do not shake or squeeze the bottle. Do not touch the top of the bottle after its cap is removed.

**Warning:** If ink gets on your skin, wash it thoroughly with soap and water. If ink gets into your eyes, flush them immediately with water. If ink gets into your mouth, spit it out immediately. Seek medical advice if problems persist. Keep the ink bottles out of the reach of children and do not drink the ink.
5. Position the top of the ink bottle along the slot in front of the filling port, then slowly stand the bottle up to insert it.

**Note:** Refer to the color-coded sticker on the ink tank unit to identify the color of each tank. Do not force the bottles into position; they are keyed for each color.
6. Wait for the ink to fill the tank. Do not squeeze the bottle. Ink flows into the tank and stops automatically when the ink is filled to the upper line.

Note: If ink does not flow from the bottle, lift and reinsert the bottle.
7. When the ink tank is full, remove the ink bottle and securely close the ink tank cap.

Note: If any ink remains in the bottle, replace the bottle cap and tighten it. Store the bottle upright for later use.

8. Repeat the previous steps as necessary for each ink tank you need to refill.

9. Close the ink tank cover, then close the scanner unit.

10. Press the OK button on the product control panel to proceed. Follow the on-screen instructions to reset the ink level for the color you refilled.

Purchase Epson Ink and Maintenance Box
Replacing the Maintenance Box

Make sure you have a new maintenance box before you begin.

**Caution:** Do not reuse a maintenance box that has been removed and left uninstalled for more than a week. Keep the maintenance box away from direct sunlight.

1. Remove the new maintenance box from its package.

   **Caution:** Do not touch the green chip on the maintenance box. Doing so may prevent normal operation and printing.

2. Using a flat-tipped screwdriver, remove the screw on the maintenance box cover and remove the cover.

3. Remove the used maintenance box.
**Note:** Do not tilt the used maintenance box or take it apart.

**Caution:** Do not touch the areas shown below on the maintenance box; otherwise, ink may leak.

![Diagram of maintenance box with prohibited actions]

**Warning:** If ink gets on your skin, wash it thoroughly with soap and water. If ink gets into your eyes, flush them immediately with water. If ink gets into your mouth, spit it out immediately. Keep the maintenance box out of the reach of children and do not drink the ink.

4. Place the used maintenance box in the plastic bag that came with the new maintenance box. Seal the bag and dispose of it carefully.
5. Insert the new maintenance box and push it all the way in.

6. Reattach the maintenance box cover and tighten the screw.

7. Press the OK button on the product control panel to resume operation.

Cleaning the Printer Head Path
Checking the Number of Sheets

Print Head Maintenance

If your printouts become too light, or you see dark or light bands across them, you may need to clean the print head nozzles. Cleaning uses ink, so clean the nozzles only if print quality declines.
You can check for clogged nozzles before you clean them so you don’t clean them unnecessarily.

**Note:** You cannot clean the print head if the ink level has reached the lower line on the ink tank, and may not be able to clean it when the ink level in any of the tanks is low. You must refill the ink tank first.

If you still see white or dark lines or missing nozzles in your printouts, even after cleaning the print head several times, you can run a Power Cleaning.

Cleaning the Printer Head Path

If the print quality has not improved after cleaning and aligning the print head and cleaning the paper path, the printer head path inside the printer may be smeared with ink.

To clean the printer head path, use the following:

- Several cotton swabs
- ¼ cup (59 ml) water containing 2 to 3 drops of mild dish detergent
- A small flashlight

**Caution:** Do not use any other liquid to clean the printer head path or you may damage your product.

1. Turn off the product.
2. Unplug the power cable.
3. Disconnect any connected cables.
4. Lift up the scanner unit.
5. Using the flashlight, check the translucent film shown here for ink smears.

![Image of printer with translucent film and print head rail]

1 Translucent film
2 Print head rail

**Caution:** Do not touch the print head rail or wipe the grease off of it. You may not be able to print.

6. Moisten a cotton swab with the water and detergent mixture and squeeze out any excess moisture, then lightly wipe the ink off the translucent film.

![Image of cotton swab wiping ink off film]

**Caution:** Do not press too hard on the film or you may dislocate the anchor springs and damage your product.
7. Use a new, dry cotton swab to dry the translucent film.
8. Repeat steps 6 and 7 as necessary to clean all ink smears.
9. When the translucent film is dry, close the scanner unit.
10. Reconnect any disconnected cables, plug in the power cord, and turn on the product.

Cleaning and Transporting Your Product

See these sections if you need to clean or transport your product.

Cleaning Your Product
Transporting Your Product

Cleaning Your Product

To keep your product working at its best, you should clean it several times a year.

Close the output tray, front cover, and rear paper feed cover when you are not using the product to protect it from dust.

**Caution:** Do not use a hard brush, alcohol, or paint thinner to clean the product or you may damage it. Do not use oil or other lubricants inside the product or let water get inside it.

1. Turn off the product.
2. Unplug the power cable.
3. Disconnect any connected cables.
4. Remove all the paper.
5. Clean the scanner glass with a soft, lint-free cloth (microfiber is recommended), moistened with a little glass cleaner.

**Caution:** Do not spray glass cleaner directly on the glass and do not press the glass surface with any force.

6. Clean the outer case and control panel with a soft, dry cloth. Do not use liquid or chemical cleansers.

Parent topic: Cleaning and Transporting Your Product

Transporting Your Product

If you need to store your product or transport it some distance, prepare it for transportation as described here.
Caution: During transportation and storage, follow these guidelines:
• Avoid tilting the product, placing it vertically, or turning it upside down; otherwise ink may leak.

- When storing or transporting an opened ink bottle, do not tilt the bottle and do not subject it to impacts or temperature changes. Otherwise, ink may leak even if the cap on the ink bottle is tightened securely. Be sure to keep the ink bottle upright when tightening the cap, and take measures to prevent ink from leaking when transporting the ink bottles.
- Do not put opened ink bottles in the box with the product.
- Do not carry the product by its control panel; this may damage the product.
  1. Turn off the product.
  2. Remove all the paper from the product.
  3. Unplug the power cable.
  4. Disconnect any connected cables.
5. Lift up the scanner unit and check to see if the print head is in the far right position (the home position). If not, turn on the product, wait for the print head to move to the far right, then turn the product off again.

6. Secure the print head to the case with tape.
Caution: Do not place tape on the white flat cable inside the product; otherwise, you may damage your product.

7. Open the ink tank cover. Make sure the ink tap caps are securely closed and close the ink tank cover.

8. Lower the scanner unit.
9. Close the rear paper feed support and rear paper feed cover. Close the output tray and the front cover, then lower the control panel.

10. Place the product in its original packaging materials, if possible, or use equivalent cushioning around the product.

Be sure to remove the tape from the print head before turning on your product. If print quality has declined when you print again, clean and align the print head.

Checking for Software Updates

Periodically, it's a good idea to check Epson's support website for free updates to your product software. Visit epson.com/support (U.S.), epson.ca/support (Canada), or epson.com.jm/support (Caribbean) and select your product.

- **Windows**: Your printer software automatically checks for updates. You can also manually update the software by selecting **Software Update** here:
  - Accessing the Windows Desktop and right-clicking the icon for your product in the right side of the Windows taskbar, or clicking the up arrow and right-clicking .
  - On the **Maintenance** tab in the printer settings window
You can also update the software by selecting **EPSON Software Updater** in the **EPSON Software** program group, accessible by the **Start** button, or on the **Start** or **Apps** screens, depending on your version of Windows.

- **OS X**: You can manually update the software by opening the **Applications > Epson Software** folder and selecting **EPSON Software Updater**.
- **macOS 10.12.x**: You can manually update the software by opening the **App Store**, selecting **Updates**, searching for a software update option for Epson Software, and selecting **Update**.

### Product Status Messages

**Note:** The ink pads in the printer collect, distribute, and contain the ink that is not used on printed pages. During the life of your product it may reach a condition where either satisfactory print quality cannot be maintained or the ink pads have reached the end of their usable life. The Epson Status Monitor, your LCD screen, or lights on the control panel will advise you when these parts need replacing. If this happens during the standard warranty of the product, the exchange of the product or replacement of the pads is covered under the standard warranty. If the product is out of warranty, the pads can be replaced by any Epson authorized service provider. The waste ink pads are not a user-replaceable part.

Message Appears Prompting You to Reset Ink Levels

If you see a message on the LCD screen prompting you to reset the ink levels, do the following:

1. Refill all of the ink tanks or the ink tanks indicated on the LCD screen all the way to the top.
   
   **Note:** Depending on the operating conditions, you may see the ink reset message even when there is still ink in the tanks.

2. Select the colors that you refilled on the LCD screen.

3. Follow the instructions on the LCD screen to reset the ink levels.

**Note:** The product has a low ink alert system. The accuracy of this system depends on the user refilling the ink tanks correctly. The product cannot directly measure the ink levels in the tanks; instead it estimates the amount of ink remaining by internally monitoring ink usage. The low ink alert system may generate inaccurate messages if the ink tanks are not refilled according to these instructions.

As a precaution, perform regular visual inspections of the ink tanks to ensure ink levels do not fall below the lower line. Continued use of the product when the ink level is below the lower line on the tank could damage the product.

Refilling Ink

Running a Product Check

Running a product check helps you determine if your product is operating properly.

1. Disconnect any interface cables connected to your product.

2. Load plain paper in the product.

3. Press the 🏛 home button, if necessary.
4. Press the arrow buttons to select **Settings** and press the **OK** button.

5. Select **Maintenance** and press the **OK** button.

![Maintenance menu image]

6. Select **Nozzle Check** and press the **OK** button.

![Nozzle Check menu image]

7. Press the ◁ start button.
   The nozzle check pattern is printed.

8. Do one of the following, depending on the results of the product check:
   - If the page prints and the nozzle check pattern is complete, the product is operating properly. Any operation problem you may have could be caused by your computer, cable, software, or selected
settings. Check the other solutions in this book or try uninstalling and reinstalling your printer software.

- If the page prints but the nozzle check pattern has gaps, clean or align the print head.
- If the page does not print, the product may have a problem. Check the other solutions in this manual. If they do not work, contact Epson.

**Parent topic:** Solving Problems

## Resetting Control Panel Defaults

If you have a problem with settings on the product control panel, you can reset them to their factory defaults. You can choose which settings to reset or reset them all.

1. Press the 🏛 home button, if necessary.
2. Press the arrow buttons to select **Settings** and press the **OK** button.
3. Select **Restore Default Settings** and press the **OK** button.

![Restore Default Settings menu](image)

4. Select one of these options:
   - **Network Settings**: Resets all network settings.
   - **All Except Network Settings**: Resets all control panel settings, except for network settings.
   - **All Settings**: Resets all control panel settings.

   You see a confirmation screen.

5. Select **Yes** to reset the selected settings. (Select **No** if you want to cancel the operation.)
Solving Setup Problems

Check these sections if you have problems while setting up your product.

Noise After Filling the Ink
Software Installation Problems
Control Panel Setup Problems

Parent topic: Solving Problems

Noise After Filling the Ink

If you hear noises from your product after filling the ink tanks with ink, check these explanations:

• The first time you fill the tanks with ink, the product must charge its print head. Wait until charging finishes before you turn off the product, or it may charge improperly and use excess ink the next time you turn it on. Your product is finished charging the print head when the power light stops flashing.

• If the product's print head stops moving or making noise, and the charging process has not finished after approximately 20 minutes, turn off your product. Turn it back on and check to see if charging is still in progress. If it is still in progress, contact Epson for help.

Parent topic: Solving Setup Problems

Software Installation Problems

If you have problems while installing your product software, try these solutions:

• Make sure your product is turned on and any necessary cables are securely connected at both ends. If you still have problems installing software, disconnect the cable and carefully follow the instructions on the Start Here sheet. Also make sure your system meets the requirements for your operating system.

• Close any other programs, including screen savers and virus protection software, and install your product software again.

• In Windows, make sure your product is selected as the default printer and the correct port is shown in the printer properties.

• If you see any error message or your software does not install correctly in Windows, you may not have software installation privileges. Contact your system administrator.

Parent topic: Solving Setup Problems
Control Panel Setup Problems
If you have problems setting up the control panel, try these solutions:
- To view LCD screen text in a different language, select a different language setting for the panel.
- To adjust the position of the control panel, carefully raise or lower it.

Product Cannot Connect to a Wireless Router or Access Point
If your product has trouble finding or connecting to a wireless router or access point, try these solutions:
- If you are connecting the product via Wi-Fi Protected Setup (WPS) and the Wi-Fi icon on your product’s LCD screen is not lit or does not appear, make sure you select one of the WPS options from the product control panel within 2 minutes of pressing the WPS button on your router.
- Make sure to place your product within contact range of your 2.4 GHz router or access point. Avoid placing your product near a microwave oven, 2.4 GHz cordless phone, or large metal object, such as a filing cabinet.

Note: If you are using a 5 GHz wireless router, set the router to operate in dual band (2.4 GHz and 5 GHz) mode. If your router uses a single network name (SSID) for both the 2.4 GHz and 5 GHz band, give each band its own network name (SSID) instead, such as Home Network 2.4 GHz and Home...
Network 5 GHz. See your router documentation or contact your internet service provider for instructions.

- Verify that your router or access point is operating correctly by connecting to it from your computer or another device.
- You may need to disable the firewall and any anti-virus software on your wireless router or access point.
- Check to see if access restrictions, such as MAC address filtering, are set on the router or access point. If access restrictions are set, add your product's MAC address to your router's address list. To obtain your product's MAC address, print a network status sheet. Then follow the instructions in your router or access point documentation to add the address to the list.
- If your router or access point does not broadcast its network name (SSID), follow the instructions that came with your product to enter your wireless network name manually.
- If your router or access point has security enabled, determine the kind of security it is using and any required password or passphrase for connection. Then make sure to enter the exact WEP key or WPA passphrase correctly.
- Check if your computer is restricting the available wireless channels. If so, verify that your wireless access point is using one of the usable channels and change to a usable channel, if necessary.
- If you are using a Wi-Fi Direct connection that suddenly disconnects, the Wi-Fi direct password on your device may have been changed. If necessary, delete the existing DIRECT-xxxxxxxx connection settings from your device and enter a new password. See your device documentation for instructions.

Network Software Cannot Find Product on a Network
If EpsonNet Setup cannot find your product on a network, try these solutions:
- Make sure your product is turned on and connected to your network. Verify connection using your product control panel.
- Check if your network name (SSID) contains non-ASCII characters. Your product cannot display non-ASCII characters.
- Make sure your product is not connected to a guest network.
- If necessary, reinstall your product software and try running EpsonNet Setup again:
  1. Reset your product's network settings to their factory defaults.
2. **Windows only**: uninstall your product software.

3. Initialize your router following the instructions in your router documentation.

   **Note**: If you are reading these instructions online, you will lose your Internet connection when you initialize your router, so note the next step before initializing it.

4. Download your product software from the Epson website using the instructions on the *Start Here* sheet.
   - If you have replaced your router, reinstall your product software to connect to the new router.

   **Note**: If you are using a 5 GHz wireless router, set the router to operate in dual band (2.4 GHz and 5 GHz) mode. If your router uses a single network name (SSID) for both the 2.4 GHz and 5 GHz band, give each band its own network name (SSID) instead, such as Home Network 2.4 GHz and Home Network 5 GHz. See your router documentation or contact your internet service provider for instructions.

   - Check to see if your wireless router or access point has an enabled Privacy Separator function that is preventing detection of your device over the network. See your router or access point documentation for instructions on disabling the Privacy Separator function.

**Product Does Not Appear in Mac Printer Window**

If your product does not appear in the Mac printer window, try these solutions:

- Turn your product off, wait 30 seconds, then turn it back on again.

- If you are connecting the product via Wi-Fi Protected Setup (WPS) and the Wi-Fi icon on your product’s LCD screen is not lit, make sure you select one of the WPS options from the product control panel within 2 minutes of pressing the WPS button on your router.

- If you are connecting the product wirelessly via EpsonNet Setup and the Wi-Fi icon does not appear lit on your LCD screen, make sure your product software was installed correctly. If necessary, reinstall your software.
Note: If you are using a 5 GHz wireless router, set the router to operate in dual band (2.4 GHz and 5 GHz) mode. If your router uses a single network name (SSID) for both the 2.4 GHz and 5 GHz band, give each band its own network name (SSID) instead, such as Home Network 2.4 GHz and Home Network 5 GHz. See your router documentation or contact your internet service provider for instructions.

Cannot Print Over a Network

If you cannot print over a network, try these solutions:

• Make sure that your product is turned on.

• Make sure you install your product's network software as described in your product documentation.

• Print a network status sheet and verify that the network settings are correct. If the network status is *Disconnected*, check any cable connections and turn your product off and then on again.

• If you are using TCP/IP, make sure the product's IP address is set correctly for your network. If your network does not assign IP addresses using DHCP, set the IP address manually.

• Make sure your computer and product are both using the same wireless network.

• If network printing is slow, print a network status sheet and check the signal strength. If it is poor, place your product closer to your router or access point. Avoid placing your product near a microwave oven, 2.4 GHz cordless phone, or large metal object, such as a filing cabinet.

Note: If you are using a 5 GHz wireless router, set the router to operate in dual band (2.4 GHz and 5 GHz) mode. If your router uses a single network name (SSID) for both the 2.4 GHz and 5 GHz band, give each band its own network name (SSID) instead, such as Home Network 2.4 GHz and Home Network 5 GHz. See your router documentation or contact your internet service provider for instructions.

• Check to see if your wireless router or access point has an enabled Privacy Separator function that is preventing printing from a device over the network. See your router or access point documentation for instructions on disabling the Privacy Separator function.
• If you are connecting the product wirelessly via EpsonNet Setup and the Wi-Fi connection icon is not lit or does not appear on the product's LCD screen, make sure your product software was installed correctly. If necessary, reinstall your software.

Cannot Scan Over a Network

If you cannot start Epson Scan 2 for scanning over a network, try these solutions:

• If you cannot scan from your product control panel, make sure you restarted your computer after installing the product software. Make sure the Event Manager program is not being blocked by your firewall or security software.

Note: If you are using a 5 GHz wireless router, set the router to operate in dual band (2.4 GHz and 5 GHz) mode. If your router uses a single network name (SSID) for both the 2.4 GHz and 5 GHz band, give each band its own network name (SSID) instead, such as Home Network 2.4 GHz and Home Network 5 GHz. See your router documentation or contact your internet service provider for instructions.

• If you are scanning a large original at a high resolution, a network communication error may occur. Try scanning again at a lower resolution.

• If network communication was interrupted while starting Epson Scan 2, exit Epson Scan 2, wait a few seconds, and restart it. If Epson Scan 2 cannot restart, turn off your product, turn it back on, and try restarting Epson Scan 2 again.

• Check the scanner setting and reset the connection if necessary using Epson Scan 2 Utility:

  Windows 10: Click and select EPSON > Epson Scan 2 Utility. Make sure your product is selected. If necessary, select the Other tab and click Reset.

  Windows 8.x: Navigate to the Apps screen, select EPSON, and select Epson Scan 2 Utility. Make sure your product is selected. If necessary, select the Other tab and click Reset.
Windows (other versions): Click 🌐 or Start > All Programs or Programs > EPSON > Epson Scan 2 > Epson Scan 2 Utility. Make sure your product is selected. If necessary, select the Other tab and click Reset.

Mac: Open the Applications folder, click Epson Software, and click Epson Scan 2 Utility. Make sure your product is selected. If necessary, select the Other tab and click Reset.

- You may need to disable the firewall and any anti-virus software on your wireless router or access point.

Solving Copying Problems
Check these solutions if you have problems copying with your product.

Product Makes Noise, But Nothing Copies
Product Makes Noise When It Sits for a While

Parent topic: Solving Problems

Product Makes Noise, But Nothing Copies
If your product makes a noise, but nothing copies, try these solutions:

- Run a nozzle check to see if any of the print head nozzles are clogged. Then clean the print head, if necessary.
- If the nozzle check page does not print, but the product's power is on, make sure your product software is installed correctly.
- Make sure your product is level (not tilted).

Paper Feeding Problems
Paper Jam Problems Inside the Product
Paper Jam Problems in the Paper Cassette
Paper Jam Problems in the Rear Cover
Paper Ejection Problems

Parent topic: Solving Problems

Paper Feeding Problems

If you have problems feeding paper, try these solutions:

• Make sure the paper cassette is inserted all the way in the printer.
• If paper does not feed correctly, remove and reload it in the cassette and adjust the edge guides. Make sure the paper stack is not above the tab on the edge guides inside the cassette.
• If multiple pages feed at once, remove the paper, fan the edges to separate the sheets, and reload it.
• Do not load more than the recommended number of sheets.
• Do not load more than one sheet in the rear paper feed slot.
• Make sure your paper meets the specifications for your product.
• If paper jams when you print on both sides of the paper, try loading fewer sheets.
• For best results, follow these guidelines:
  • Use new, smooth, high-quality paper that is not curled, creased, old, too thin, or too thick.
  • Load paper in the cassette printable side down.
  • Follow any special loading instructions that came with the paper.

Paper Jam Problems Inside the Product

If you see a message that paper has jammed inside the product, follow the steps here or on the LCD screen to clear the jam.

1. Cancel the print job, if necessary.
2. Lift up the scanner unit.
3. Remove any jammed paper inside.
**Caution**: Do not touch the flat white cable, translucent film, or ink tubes inside the printer.

4. Close the scanner unit.

5. Follow the prompts on the LCD screen to clear any error messages. If you still see a paper jam message, check the other paper jam solutions.
Paper Jam Problems in the Paper Cassette

If you see a message that paper has jammed in the paper cassette, follow the steps here or on the LCD screen to clear the jam.

1. Cancel the print job, if necessary.
2. Close the output tray.
3. Pull out and remove both paper cassettes.

4. Remove the jammed paper.

5. Make sure the paper you load is under the edge guides.

6. Keep the cassette flat as you insert it. Insert Cassette 1 (upper cassette) it until the arrows on the right side line up.

7. Follow the prompts on the LCD screen to clear any error messages. If you still see a paper jam message, check the other paper jam solutions.

Paper Jam Problems in the Rear Cover
If you see a message that paper has jammed in the rear cover or duplexer, follow the steps here or on the LCD screen to clear the jam.

1. Cancel the print job, if necessary.
2. Press the buttons to release the rear cover and remove it from your product.

3. Remove any jammed paper from inside the product.
4. Remove any jammed paper from the duplexer.

5. Open the cover of the duplexer. Remove any jammed paper from inside it and close the cover.
6. Reattach the rear cover.

7. Follow the prompts on the LCD screen to clear any error messages. If you still see a paper jam message, check the other paper jam solutions.

Solving Problems Printing from a Computer

Check these sections if you have problems while printing from your computer.

**Note:** When printing using AirPrint, the available print settings are different from those covered in this manual. See the Apple website for details.

- Nothing Prints
- Product Icon Does Not Appear in Windows Taskbar
- Printing is Slow

**Parent topic:** Solving Problems

## Nothing Prints

If you have sent a print job and nothing prints, try these solutions:

- Make sure your product is turned on.
- Make sure any interface cables are connected securely at both ends.
- If you connected your product to a USB hub, make sure it is a first-tier hub. If it still does not print, connect your product directly to your computer instead of the hub.
- Run a product check to see if a test page prints. If the test page prints, check to see if your product software is installed correctly.
- In Windows, make sure your product is selected as the default printer.
- In Windows, delete all jobs from the Windows Spooler. Click **Print Queue** on the Maintenance tab in the printer settings window, and cancel any stalled print jobs.

**Parent topic:** Solving Problems Printing from a Computer
Product Icon Does Not Appear in Windows Taskbar

If you do not see your product icon in the Windows taskbar, first try restarting your computer. If that does not work, try this solution:

1. Do one of the following:
   - **Windows 10**: Click 📑 and select 🏷 (Settings) > Devices > Printers & scanners. Select your product name and select Manage > Printing preferences.
   - **Windows 8.x**: Navigate to the Apps screen and select Control Panel > Hardware and Sound > Devices and Printers. Right-click your product name, select Printing Preferences, and select your product name again if necessary.
   - **Windows 7**: Click 📑 and select Devices and Printers. Right-click your product name, select Printing Preferences, and select your product name again if necessary.
   - **Windows Vista**: Click 📑, select Control Panel, and click Printer under Hardware and Sound. Right-click your product name, select Printing Preferences, and select your product name again if necessary.

2. Click the Maintenance tab.
3. Click the Extended Settings button.
4. Select Enable EPSON Status Monitor 3 and click OK.
5. Click the Monitoring Preferences button.
6. Click the checkbox for the option that adds the shortcut icon to the taskbar.
7. Click OK to close the open program windows.

**Parent topic:** Solving Problems Printing from a Computer

Printing is Slow

If printing becomes slow, try these solutions:

- Make sure your system meets the requirements for your operating system. If you are printing a high-resolution image, you may need more than the minimum requirements. If necessary, increase your system's memory.
- If you are using Windows 7, close the Devices and Printers window before you print.
- On a Mac, make sure you download and install the Epson printer driver.
- Make sure Quiet Mode is turned off.
Clear space on your hard drive or run a defragmentation utility to free up existing space.

Close any programs you are not using when you print.

If your product is connected to a USB hub, connect it directly to your computer instead.

If printing becomes slower after printing continuously for a long time, the product may have automatically slowed down to protect the print mechanism from overheating or becoming damaged. Let the product rest with the power on for 30 minutes, then try printing again.

For the fastest printing, select the following settings in your product software:

- Make sure the paper type setting matches the type of paper you loaded.
- Turn on any high speed settings in your product software.
- Select a lower print quality setting.
- Make sure the ink drying time has not been increased for double-sided printing.

- **Windows**: Click the Maintenance or Utility tab, select Extended Settings or Speed and Progress, and select the following settings:
  - Always Spool RAW Datatype
  - Page Rendering Mode
  - Print as Bitmap
  - **Windows**: Select Printer Properties, click the More Options tab and make sure the High Speed setting is enabled.
  - **Mac**: Select System Preferences, select Printers & Scanners, then select your product. Select Options & Supplies, then select Options (or Driver) and enable the High Speed Printing setting.

If printing is still slow and you are using Windows 7 or Windows Vista, try the following:

1. Click and select Computer or My Computer. Double-click the C: drive and open these folders: ProgramData > EPSON > PRINTER.
   
   **Note**: If you do not see the ProgramData folder, open the Organize menu and select Folder and search options. In the window that appears, click the View tab, select Show hidden files, folders, and drives in the Advanced settings list, and click OK.

2. Right-click the EPAUDF01.AUD file and select Delete.
3. Restart your computer and try printing again.

Solving Page Layout and Content Problems
Check these sections if you have problems with the layout or content of your printed pages.

Note: When printing using AirPrint, the available print settings are different from those covered in this manual. See the Apple website for details.

Inverted Image
Too Many Copies Print
Blank Pages Print
Incorrect Margins on Printout
Border Appears on Borderless Prints
Incorrect Characters Print
Incorrect Image Size or Position
Slanted Printout
Parent topic: Solving Problems

Inverted Image
If your printed image is inverted unexpectedly, try these solutions:

• Turn off any mirror or inversion settings in your printing application.

• Turn off the Mirror Image, Flip horizontally, or Reverse page orientation settings in your printer software. (This option has different names, depending on your operating system version.)

Note: Leave these options turned on when you print on Epson Iron-on Cool Peel Transfer paper, if available for your product.
Too Many Copies Print

Make sure that the **Copies** setting in your printing program or printer software is not set for multiple copies.

Parent topic: Solving Page Layout and Content Problems

Blank Pages Print

If blank pages print unexpectedly, try these solutions:

- Make sure you selected the correct paper size settings in your printing program and printer software.
- If a blank page exists in a document you are printing and you want to skip printing it, select the **Skip Blank Page** setting in your printer software, if available.
- Run a print head nozzle check to see if any of the nozzles are clogged. Then clean the print head, if necessary.
- Make sure your product is selected as the printer in your printing program.
- You may need to refill the ink. Visually check the ink levels.

Parent topic: Solving Page Layout and Content Problems

Incorrect Margins on Printout

If your printed page has incorrect margins, try these solutions:

- Make sure you selected the correct paper size settings in your printing program and printer software.
- Make sure you selected the correct margins for your paper size in your printing program.
• Make sure your paper is positioned correctly for feeding into the printer.
You can use the preview option in your printer software to check your margins before you print.

Parent topic: Solving Page Layout and Content Problems

Related tasks
Selecting Basic Print Settings - Windows
Selecting Basic Print Settings - Mac
Selecting Page Setup Settings - Mac

Border Appears on Borderless Prints
If you see a border on borderless prints, try these solutions:
• Make sure you are printing on a compatible borderless paper type and size.

  Note: For custom paper sizes, make sure you select a supported borderless page width.

• Windows: Make sure you selected the Borderless setting in your printer software.
• Mac: Make sure you selected the Borderless checkbox or a paper size with a Borderless option in your printer software.
• Adjust the Expansion setting to adjust the amount of image expansion on the edges of borderless prints.
• Make sure the image size and the paper size are set correctly; if the image is small, the enlargement may not be enough to cover the paper.

Parent topic: Solving Page Layout and Content Problems

Incorrect Characters Print
If incorrect characters appear in your prints, try these solutions before reprinting:
• Make sure any cables are securely connected at both ends.
• In Windows, delete all jobs from the Windows Spooler. Click **Print Queue** on the Maintenance tab in the printer settings window, and cancel any stalled print jobs.

• If your product is connected to a USB hub, connect it directly to your computer instead.

• If incorrect characters still appear in your prints, try connecting your product using a different cable.

**Parent topic:** Solving Page Layout and Content Problems

### Incorrect Image Size or Position

If your printed image is the wrong size or in the wrong position, try these solutions:

• Make sure you selected the correct paper size and layout settings in your printing program and printer software.

• Make sure you selected the correct paper size on the control panel.

• Make sure your paper is positioned correctly for feeding into the printer.

• Clean the scanner glass and document cover.

• If the edges of a copy are cropped, slightly move the original away from the edges of the scanner glass.

• Make sure you selected the correct margins for your paper size in your printing program.

You can use the preview option in your printer software to check your margins before you print.

Solving Print Quality Problems

Check these sections if your printouts have problems with print quality, but your image looks fine on your computer screen.

Note: When printing using AirPrint, the available print settings are different from those covered in this manual. See the Apple website for details.

White or Dark Lines in Printout
Blurry or Smeared Printout
Faint Printout or Printout Has Gaps
Grainy Printout
Incorrect Colors

Parent topic: Solving Problems

White or Dark Lines in Printout

If you notice white or dark lines in your prints (also called banding), try these solutions before you reprint:

• Run a nozzle check to see if any of the print head nozzles are clogged. Then clean the print head, if necessary.
• Make sure the paper type setting matches the type of paper you loaded.
• Make sure you loaded the printable side of the paper correctly for your product.
• Turn off any high speed settings in your product software.
• Align the print head.
• You may need to refill the ink. Visually check the ink levels.
• If you have not used the product for a long time, run the Power Cleaning utility.

**Note:** Power Cleaning consumes a lot of ink, so run this utility only if you cannot improve print quality by cleaning the print head.

**Parent topic:** Solving Print Quality Problems

### Blurry or Smeared Printout

If your printouts are blurry or smeared, try these solutions:

• Make sure your paper is not damp, curled, old, or loaded incorrectly in your product.
• Use a support sheet with special paper, or load special paper one sheet at a time.
• Make sure your paper meets the specifications for your product.
• Use Epson papers to ensure proper saturation and absorption of genuine Epson inks.
• Make sure the paper type setting in your product software matches the type of paper you loaded.
• Make sure you loaded the printable side of the paper correctly for your product.
• If you are printing on thick paper or envelopes, turn on the **Thick Paper** setting from the control panel or select **Thick Paper and Envelopes** in the Extended Settings of the printer software. (Turning this setting on will decrease print speed.)
• Remove each sheet from the output tray as it is printed.
• Avoid handling printouts on glossy paper right after printing to allow the ink to set.
• Turn off any high speed settings in your product software.
• If you print on both sides of a sheet of paper, smudges may appear on the reverse side of heavily saturated or dark images. If one side of a sheet will contain a lighter image or text, print that side first. Adjust the **Print Density** and/or **Increase Ink Drying Time** settings.
• The ink levels may be low and you may need to refill the ink. Visually check the ink levels.
• Run a nozzle check to see if any of the print head nozzles are clogged. Then clean the print head, if necessary.
• Align the print head.
• Clean the paper path.
• If you printed when the ink levels were too low to be seen in the ink tank windows, refill the ink tanks to the upper lines and run the Power Cleaning utility. Then run a nozzle check to see if print quality has improved.
• If you have not used the product for a long time, run the Power Cleaning utility.

  **Note:** Power Cleaning consumes a lot of ink, so run this utility only if you cannot improve print quality by cleaning the print head.

**Note:** Your product will not operate properly while tilted at an angle. Place it on a flat, stable surface that extends beyond the base of the product in all directions.

Faint Printout or Printout Has Gaps

If your printouts are faint or have gaps, try these solutions:

- Run a nozzle check to see if any of the print head nozzles are clogged. Then clean the print head, if necessary.
- The ink levels may be low. Visually check the ink levels.
- Make sure the paper type setting matches the type of paper you loaded.
- Make sure your paper is not damp, curled, old, or loaded incorrectly in your product.
- Align the print head.
- Clean the paper path.
- If you have not used the product for a long time, run the Power Cleaning utility.

**Note**: Power Cleaning consumes a lot of ink, so run this utility only if you cannot improve print quality by cleaning the print head.

**Parent topic**: Solving Print Quality Problems

**Related concepts**

Grainy Printout

If your printouts are grainy, try these solutions:

- Make sure you loaded the printable side of the paper correctly for your product.
- Select a higher print quality setting and turn off any high speed settings in your product software.
- Run a nozzle check to see if any of the print head nozzles are clogged. Then clean the print head, if necessary.
- Align the print head.
- You may need to increase the image resolution or print a smaller size; see your software documentation.

**Note:** Images from the Internet may be low resolution and not result in a high quality printout.

- If you enlarged the image size in an image-editing program, you need to increase the image resolution setting to retain a high image quality. Increase the image resolution by the same amount you increase the image size. For example, if the image resolution is 300 dpi (dots per inch) and you will double the image size for printing, change the resolution setting to 600 dpi.

**Note:** Higher resolution settings result in larger file sizes, which take longer to process and print. Consider the limitations of your computer system when selecting a resolution, and select the lowest possible resolution that produces acceptable quality to keep file sizes manageable.

**Parent topic:** Solving Print Quality Problems

**Related concepts**
- Print Head Nozzle Check

Incorrect Colors

If your printouts have incorrect colors, try these solutions:

• Make sure the paper type setting matches the paper you loaded.
• Make sure the **Black/Grayscale** or **Grayscale** setting is not selected in your printer software.
• Run a nozzle check to see if any of the print head nozzles are clogged. Then clean the print head, if necessary.
• The ink levels may be low and you may need to refill the ink. Visually check the ink levels.
• If you printed when the ink levels were too low to be seen in the ink tank windows, refill the ink tanks to the upper lines and run the Power Cleaning utility. Then run a nozzle check to see if print quality has improved.
• After you print, the colors in your printout need time to set as the ink dries. During this time, the colors may look different than you expect. To speed up drying time, do not stack your printouts on top of each other.
• Your printed colors can never exactly match your on-screen colors. However, you can use a color management system to get as close as possible. Try using the color management options in your printer software.
• For best results, use genuine Epson ink and paper.
• If you have not used the product for a long time, run the Power Cleaning utility.

**Note:** Power Cleaning consumes a lot of ink, so run this utility only if you cannot improve print quality by cleaning the print head.

Solving Scanning Problems
Check these solutions if you have problems scanning with your product.

Scanning Software Does Not Operate Correctly
If your scanning software does not operate correctly, try these solutions:
• Make sure your computer has adequate memory and meets the system requirements for your operating system.
• Make sure your computer is not running in a power-saving mode, such as sleep or standby. If so, wake your system and restart your scanning software.
• If you upgraded your operating system but did not reinstall your scanning software, try reinstalling it.
• In Windows, make sure your product is listed as a valid device in the Scanners and Cameras control panel.

Cannot Start Epson Scan 2
If you cannot start Epson Scan 2, try these solutions:
• Make sure your product is turned on and any interface cables are securely connected at both ends.
• Make sure Epson Scan 2 is selected as your scanning program.
• Make sure your computer is not running in a power-saving mode, such as sleep or standby. If so, wake your system and restart Epson Scan 2.
• Check the connection setting and test the connection using Epson Scan 2 Utility:

**Windows 10:** Click and select **EPSON > Epson Scan 2 Utility.** Make sure the correct product is selected. If necessary, select the **Other** tab and click **Reset.**

**Windows 8.x:** Navigate to the **Apps** screen and select **Epson Scan 2 Utility.** Make sure the correct product is selected. If necessary, select the **Other** tab and click **Reset.**

**Windows (other versions):** Click or **Start > All Programs or Programs > EPSON > Epson Scan 2 > Epson Scan 2 Utility.** Make sure the correct product is selected. If necessary, select the **Other** tab and click **Reset.**

**Mac:** Open the **Applications** folder, click **Epson Software,** and click **Epson Scan 2 Utility.** Make sure the correct product is selected. If necessary, select the **Other** tab and click **Reset.**

• Make sure you do not have multiple versions of Epson Scan 2 installed. If you do, uninstall both versions and install one version.

• If you upgraded your operating system but did not reinstall Epson Scan 2, try reinstalling it.

Image Consists of a Few Dots Only

If your scanned image consists only of a few dots, try these solutions:

- Make sure you placed your original for scanning facing the correct way.
- If you are scanning using the Epson Scan 2 Black & White setting, adjust the Threshold setting and scan again.

Parent topic: Solving Scanned Image Quality Problems

Related tasks
Cleaning Your Product

Line of Dots Appears in All Scanned Images

If a line of dots appears in all your scanned images, clean the scanner glass with a soft, dry, lint-free cloth or use a small amount of glass cleaner on the cloth, if necessary. Paper towels are not recommended.

Caution: Do not spray glass cleaner directly on the scanner glass.

Parent topic: Solving Scanned Image Quality Problems

Straight Lines in an Image Appear Crooked

If straight lines in an original appear crooked in a scanned image, make sure to place your original straight when you scan it.

Parent topic: Solving Scanned Image Quality Problems

Related tasks
Placing Originals on the Scanner Glass

Image is Distorted or Blurry

If a scanned image appears distorted or blurry, try these solutions:

- Make sure your original is not wrinkled or warped. This may prevent the original from laying flat on the scanner glass.
- Do not move your original or your product during scanning.
• Your product will not operate properly while tilted at an angle. Place your product on a flat, stable surface that extends beyond its base in all directions.

• Adjust these Epson Scan 2 settings (if available) and try scanning again:
  • Increase the Resolution setting.
  • If the Image Type setting is Black & White, adjust the Threshold setting.
  • Select the Unsharp Mask setting.
  • If the Image Type setting is Black & White, select Text Enhancement. If the Image Type setting is Color or Grayscale, change the Text Enhancement setting to High.

Additional Scanning Settings - Advanced Settings Tab

Image Colors are Patchy at the Edges
If you are scanning a thick or warped original, cover its edges with paper to block external light as you scan it.

Parent topic: Solving Scanned Image Quality Problems

Image is Too Dark
If your scanned image is too dark, try these solutions:
• Select the Advanced Settings tab in Epson Scan 2 and adjust the Brightness setting.
• Check the brightness and contrast settings of your computer monitor.

Parent topic: Solving Scanned Image Quality Problems
Related references
Additional Scanning Settings - Advanced Settings Tab

Back of Original Image Appears in Scanned Image
If an image from the back of a thin original appears in your scanned image, try these solutions:
• Place a piece of black paper on the back of the original and scan it again.
• Adjust these Epson Scan 2 settings (if available) and try scanning again:
  • Select the Advanced Settings tab and adjust the Brightness setting.
• If the Image Type is set to **Black & White**, select **Text Enhancement**. If the Image Type is set to **Color** or **Grayscale**, change the **Text Enhancement** setting to **High**.

**Parent topic:** Solving Scanned Image Quality Problems

**Related references**
- Additional Scanning Settings - Advanced Settings Tab

### Ripple Patterns Appear in an Image

You may see a ripple pattern (called a moiré) in scanned images of printed documents. This is caused by interference from differing pitches in the scanner's screen and your original's halftone screen. To reduce this effect, adjust these Epson Scan 2 settings (if available) and try scanning again:

• Select the **Descreening** setting.
• Select a lower **Resolution** setting.

**Parent topic:** Solving Scanned Image Quality Problems

**Related references**
- Additional Scanning Settings - Advanced Settings Tab

### Image is Scanned Upside-Down

Your product scans using the **Auto Photo Orientation** setting. This setting checks the preview image for faces, the sky, and other features, and then correctly rotates the photo when it is scanned, if necessary.

If your photo is not oriented correctly using this option, you can turn **Auto Photo Orientation** off and scan again. When Photo Mode is selected, select **Thumbnail Options** from the Main Settings tab. Select **On** or **Off** and scan your document again.

**Note:** **Auto Photo Orientation** will not work when you scan newspapers, magazines, documents, illustrations, or line art, or images smaller than 2 inches (5.1 cm) on any side.

**Parent topic:** Solving Scanned Image Quality Problems

### Scanned Image Colors Do Not Match Original Colors

Printed colors can never exactly match the colors on your computer monitor because printers and monitors use different color systems: monitors use RGB (red, green, and blue) and printers typically use CMYK (cyan, magenta, yellow, and black).
Check the color matching and color management capabilities of your computer, display adapter, and the software you are using to see if they are affecting the palette of colors you see on your screen.

To adjust the colors in your scanned image, adjust these Epson Scan 2 settings (if available) and try scanning again:

- If the **Image Type** setting is **Color** or **Grayscale**, adjust the **Contrast** setting.
- If the **Image Type** setting is **Black & White** or **Grayscale**, adjust the **Color Enhance** setting.

**Parent topic:** Solving Scanned Image Quality Problems

## Scan Area is Not Adjustable in Thumbnail Preview

If you cannot adjust the scan area while viewing a Thumbnail preview in Epson Scan 2, try these solutions:

- Create a scan area by drawing a marquee on your preview image and adjusting it as necessary.
- Switch to Normal preview mode, if available, and preview your image again.

**Parent topic:** Solving Scanned Image Quality Problems

## Scanned Image Edges are Cropped

If the edges of a scanned image are cropped, make sure your original is placed correctly for scanning. If necessary, move your original away from the edges of the scanner glass slightly.

**Parent topic:** Solving Scanned Image Quality Problems

**Related tasks**

Placing Originals on the Scanner Glass

## Solving Memory Card Problems

Check these solutions if you have problems using memory cards with your product.

- **Memory Card Does Not Fit Into a Slot**
- **Cannot View or Print Photos from a Memory Card or Device**
- **Cannot Transfer Photos to or from a Memory Card or Device**

**Parent topic:** Solving Problems

### Memory Card Does Not Fit Into a Slot

If a memory card does not fit properly in a slot, do not force it in. You may need to use an adapter with your memory card.
Cannot View or Print Photos from a Memory Card or Device

If you cannot view or print photos from a memory card or USB device inserted in your product, try these solutions:

- Make sure your memory card or device is compatible with the product.
- Make sure the files on your memory card or device are in the correct format.
- If you have too many photos on your memory card or device, you may not see all the photos you expect or may be prompted to select a group of photos by date. Reduce the number of photos on your card or select one group of photos at a time. Check the specifications for the maximum number of photos.

Cannot Transfer Photos to or from a Memory Card or Device

If you have problems transferring photos to or from a memory card or USB device inserted in your product, try these solutions:

- Make sure your memory card or device is compatible with the product.
- Make sure your product is securely connected to your computer.
- If you are transferring photos to a memory card, check the memory card's write-protect tab to make sure it is set to allow writing to the card.
• Make sure that the file sharing setting for your product is set correctly.

**CD/DVD Jam Problems**

If a CD/DVD has jammed in the product and you see an error message, you need to remove the CD/DVD tray:

1. Cancel the print job from your computer, if necessary.
2. Slowly pull the CD/DVD tray out of the product.
3. Clear the error message.
4. If an error is still displayed, turn off the product, wait a moment, and then turn it back on.
5. If you are unable to remove the CD/DVD tray, contact Epson for support.

**Parent topic:** Solving CD/DVD Problems

---

**Image Not Centered on CD/DVD**

If your printed image is not centered on the disc, do one of the following:

• If you are printing from a computer, adjust the print position using the Epson Print CD software. See the Epson Print CD help utility for details.
• If you are printing from the control panel, adjust the printing position using the product menus.

Uninstall Your Product Software

If you have a problem that requires you to uninstall and re-install your software, follow the instructions for your operating system.

Uninstalling Product Software - Windows
Uninstalling Product Software - Mac

Parent topic: Solving Problems
Uninstalling Product Software - Windows

You can uninstall and then re-install your product software to solve certain problems.

1. Turn off the product.
2. Disconnect any interface cables.
3. Do one of the following:
   - **Windows 10**: Click 📱 and select 🗖️ (Settings) > Apps > Apps & features. Then select the program you want to uninstall and select Uninstall.
   - **Windows 8.x**: Navigate to the Apps screen and select Control Panel > Programs > Programs and Features. Select the uninstall option for your Epson product, then select Uninstall/Change.

   **Note**: If you see a User Account Control window, click Yes or Continue.

   Select your product again, if necessary, then select OK, and click Yes to confirm the uninstallation.

   - **Windows (other versions)**: Click 📺 or Start, and select All Programs or Programs. Select EPSON, select your product, then click EPSON Printer Software Uninstall.

      **Note**: If you see a User Account Control window, click Yes or Continue.

      In the next window, select your product and click OK. Then follow any on-screen instructions.

4. Do one of the following to uninstall Epson Event Manager, then follow any on-screen instructions:
   - **Windows 10/8.x**: Select Epson Event Manager and click Uninstall.
   - **Windows 7/Windows Vista**: Open the Windows Control Panel utility. Select Programs and Features. (In Classic view, select Programs and click Uninstall a program.) Select Epson Event Manager and click Uninstall/Change.

5. Do one of the following to uninstall Epson Scan 2, then follow any on-screen instructions:
   - **Windows 10**: Select Epson Scan 2 and click Uninstall.
   - **Windows 8.x/Windows 7/Windows Vista**: Select Epson Scan 2 and click Uninstall/Change.

6. Restart your computer, then see the Start Here sheet to re-install your software.

   **Note**: If you find that re-installing your product software does not solve a problem, contact Epson.
Parent topic: Uninstall Your Product Software

Uninstalling Product Software - Mac

In most cases, you do not need to uninstall your product software before re-installing it. However, you can download the Uninstaller utility from the Epson support website to uninstall your product software as described here.

Note: If you find that re-installing your product software does not solve a problem, contact Epson.

1. To download the Uninstaller utility, visit epson.com/support (U.S.), epson.ca/support (Canada), or epson.com.jm/support (Caribbean) and select your product.
2. Click Downloads.
3. Select your operating system, click Utilities, locate the Uninstaller utility, and click Download.
4. Run the file you downloaded.
5. Double-click the Uninstaller icon.
6. In the Epson Uninstaller screen, select the checkbox for each software program you want to uninstall.
7. Click Uninstall.
8. Follow the on-screen instructions to uninstall the software.
9. Reinstall your product software.

Note: If you uninstall the printer driver and your product name remains in the Print & Fax, Print & Scan, or Printers & Scanners window, select your product name and click the – (remove) icon to remove it.

Where to Get Help

If you need to contact Epson for technical support services, use the following support options.

Internet Support

Visit Epson’s support website at epson.com/support (U.S.), epson.ca/support (Canada), or epson.com.jm/support (Caribbean) and select your product for solutions to common problems. You can download drivers and documentation, get FAQs and troubleshooting advice, or e-mail Epson with your questions.
Speak to a Support Representative

Before you call Epson for support, please have the following information ready:

- Product name
- Product serial number (located on a label on the product)
- Proof of purchase (such as a store receipt) and date of purchase
- Computer configuration
- Description of the problem

Then call:

- U.S.: (562) 276-4382, 6 AM to 8 PM, Pacific Time, Monday through Friday, and 7 AM to 4 PM, Pacific Time, Saturday
- Canada: (905) 709-3839, 6 AM to 8 PM, Pacific Time, Monday through Friday, and 7 AM to 4 PM, Pacific Time, Saturday

Days and hours of support are subject to change without notice. Toll or long distance charges may apply.

Purchase Supplies and Accessories

You can purchase genuine Epson ink and paper at epson.com (U.S. sales) or epson.ca (Canadian sales). You can also purchase supplies from an Epson authorized reseller. To find the nearest one, call 800-GO-EPSON (800-463-7766) in the U.S. or 800-807-7766 in Canada.

Windows System Requirements

To use your product and its software, your computer should use one of these Microsoft operating systems:

- Windows 10
- Windows 8.x
- Windows 7
- Windows Vista

Note: For the latest product software available for your operating system, visit the Epson support site at epson.com/support (U.S.), epson.ca/support (Canada), or epson.com.jm/support (Caribbean), select your product, and select Downloads.
Mac System Requirements

To use your product and its software, your Mac should use one of these operating systems:

- macOS 10.12.x
- OS X 10.11.x
- OS X 10.10.x
- OS X 10.9.x
- OS X 10.8.x
- OS X 10.7.x
- OS X 10.6.8

**Note:** For the latest product software available for your operating system, visit the Epson support site at epson.com/support (U.S.), epson.ca/support (Canada), or epson.com.jm/support (Caribbean), select your product, and select **Downloads**.

Paper Specifications

**Note:** Since the quality of any particular brand or type of paper may be changed by the manufacturer at any time, Epson cannot guarantee the quality of any non-Epson brand or type of paper. Always test a sample of paper stock before purchasing large quantities or printing large jobs.
### Single-sheets

**Size**
- A4 (8.3 × 11.7 inches [210 × 297 mm])
- A6 (4.1 × 5.8 inches [105 × 148 mm])
- Letter (8.5 × 11 inches [216 × 279 mm])
- Legal (8.5 × 14 inches [216 × 356 mm])
- 4 × 6 inches (102 × 152 mm)
- 5 × 7 inches (127 × 178 mm)
- 8 × 10 inches (203 × 254 mm)
- 16:9 wide (4 × 7.1 inches [102 × 181 mm])

**Paper types**
Plain paper and paper distributed by Epson

**Weight**
Plain paper: 17 lb (64 g/m²) to 24 lb (90 g/m²)

### Envelopes

**Size**
- No. 10 (4.1 × 9.5 inches [105 × 241 mm])

**Paper types**
Plain bond paper

**Weight**
20 lb (75 g/m²) to 24 lb (90 g/m²)

Parent topic: Technical Specifications

### Printable Area Specifications

**Note:** When printing borderless, quality may decline in the expanded printable area.
Single sheets – normal printing

1. Margin: 0.12 inch (3 mm) minimum
2. Reduced print quality area/top: 1.61 inch (41 mm) minimum
3. Reduced print quality area/bottom: 1.46 inch (37 mm) minimum

Single sheets – borderless printing

1. Reduced print quality area/top: 1.73 inch (44 mm) minimum
2. Reduced print quality area/bottom: 1.57 inch (40 mm) minimum
Envelopes

1. Left/right margins: 0.12 inch (3 mm) minimum
2. Top/bottom: 0.20 inch (5 mm) minimum
3. Reduced print quality area/right: 0.71 inch (18 mm) minimum
4. Reduced print quality area/left: 1.61 inch (41 mm) minimum

CD/DVD

1. Inner margin: 0.71 inch (18 mm) minimum
2. Inner reduced print quality area: 1.69 inch (43 mm) minimum
Outer reduced print quality area: 4.57 inches (116 mm) minimum
Maximum outer margin: 4.72 inches (120 mm)

Parent topic: Technical Specifications

### Scanning Specifications

- **Scanner type**: Flatbed
- **Photoelectric device**: CIS
- **Document size**: Maximum: 8.5 × 11.7 inches (216 × 297 mm)
  - Scanner glass: US letter or A4
- **Scanning resolution**: 1200 dpi (main scan)
  - 2400 dpi (sub scan)
- **Color Depth**
  - Color:
    - 48 bits per pixel internal (16 bits per pixel per color internal)
    - 24 bits per pixel external (8 bits per pixel per color external)
  - Grayscale:
    - 16 bits per pixel internal
    - 8 bits per pixel internal
  - Black-and-white:
    - 16 bits per pixel internal
    - 1 bit per pixel external
- **Light source**: LED

Parent topic: Technical Specifications

### Ink Specifications

**Note**: This product is designed to work with genuine Epson inks. Non-Epson ink or any other ink not specified for this printer could cause damage not covered by Epson's warranties.
The included initial ink bottles must be used for printer setup and are not for resale. The printer ships with full ink bottles and part of the ink from the first bottles is used to charge the print head. Yields vary considerably based on images printed, print settings, paper type, frequency of use and temperature.

**Color**
Black, Photo Black, Cyan, Magenta, Yellow

**Ink life**
For best results, use up ink within 6 months of opening an ink bottle

**Temperature**
Storage: –4 to 104 °F (–20 to 40 °C)
1 month at 104 °F (40 °C)
Ink freezes at 5 °F (–15 °C)
Ink thaws and is usable after 2 hours at 77 °F (25 °C)

Related concepts
Purchase Epson Ink and Maintenance Box

### Memory Card Specifications

**Note:** Cards marked with an asterisk (*) require an adapter; consult your adapter documentation for details on using it.

**Compatible types and maximum capacities**
- miniSD*: 2GB
- miniSDHC*: 32GB
- microSD*: 2GB
- microSDHC*: 32GB
- microSDXC*: 64GB
- SD: 2GB
- SDHC: 32GB
- SDXC: 64GB

**Voltage requirements**
- 3.3 V type, dual voltage type (3.3 V and 5 V); supply voltage 3.3 V
- Maximum current: 200 mA

Parent topic: Technical Specifications
External USB Device Specifications

Do not use devices with the following requirements:

- Dedicated driver
- Security settings, such as password or encryption, etc.
- Built-in USB hub

**Note:** Use only external storage devices with independent AC power sources. External storage devices that are powered via USB are not recommended. Epson cannot guarantee the operation of externally connected devices.

**CD-ROM/CD-R drive**
- 700MB maximum capacity
- CD-RW is not supported

**DVD-ROM/DVD-R drive**
- 4.7GB maximum capacity
- DVD-RW, DVD+R, DVD+RW, DVD-RAM, and Blu-ray Disc are not supported

**Magneto-optical drive**
- 1.3GB

**Hard disk and USB flash drives**
- 2TB
- Formatted in FAT, FAT32, or exFAT.

Parent topic: Technical Specifications

Dimension Specifications

**Height**
- Stored: 6.3 inches (161 mm)
- Printing: 7.7 inches (196 mm)

**Width**
- Stored: 16.7 inches (425 mm)
- Printing: 16.7 inches (425 mm)

**Depth**
- Stored: 14.1 inches (359 mm)
- Printing: 23.5 inches (598 mm)
Weight 17.6 lb (8.0 kg)
(without ink, power cord, and CD/DVD tray)

Parent topic: Technical Specifications

Electrical Specifications

Power supply rating 100 to 120 V
Rated frequency range 50/60 Hz
Rated current 0.5 A
Power consumption
Standalone copying: Approximately 16 W (ISO/IEC24712)
Ready mode: Approximately 4.2 W
Sleep mode: Approximately 1.0 W
Power off mode: Approximately 0.1 W

United States
Safety: UL60950-1  
EMC: FCC part 15 Subpart B class B

Canada
Safety: CAN/CSA C22.2 No. 60950-1  
EMC: CAN/CSA-CEI/IEC CISPR 22 Class B

This equipment contains the following wireless module:

- Manufacturer: Askey Computer Corporation.
- Type: WLU6320-D69 (RoHS)

This product conforms to Part 15 of FCC Rules and RSS-210 of the IC Rules. Epson cannot accept responsibility for any failure to satisfy the protection requirements resulting from a non-recommended modification of the product. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation of the device.

To prevent radio interference to the licensed service, this device is intended to be operated indoors and away from windows to provide maximum shielding. Equipment (or its transmit antenna) that is installed outdoors is subject to licensing.

This equipment complies with FCC/IC radiation exposure limits set forth for an uncontrolled environment and meets the FCC radio frequency (RF) Exposure Guidelines in Supplement C to OET65 and RSS-102 of the IC radio frequency (RF) Exposure rules. This equipment should be installed and operated so that the radiator is kept at least 7.9 inches (20 cm) or more away from a person's body (excluding extremities: hands, wrists, feet and ankles).

Important Safety Instructions

Before using your Epson product, read and follow these safety instructions.

General Product Safety Instructions
Wireless Connection Safety Instructions
LCD Screen Safety Instructions

Parent topic: Notices

General Product Safety Instructions

• Be sure to follow all warnings and instructions marked on the product.
• Use only the type of power source indicated on the product's label.
• Use only the power cord that comes with the product. Use of another cord may cause fires or shock. Do not use the cord with any other equipment.
• Place the product near a wall outlet where the plug can be easily unplugged.
• Avoid plugging the product into an outlet on the same circuit as a photo copier or air control system that regularly switches on and off, or on an outlet controlled by a wall switch or timer.
• Do not let the power cord become damaged or frayed. Place it to avoid abrasions, cuts, fraying, crimping, and kinking. Do not place objects on top of it and do not allow it to be stepped on or run over. Be careful to keep the cord straight at each end.
• If you use an extension cord with the product, make sure the total ampere rating of the devices plugged into the extension cord does not exceed the cord's ampere rating. Also, make sure the total
ampere rating of all devices plugged into the wall outlet does not exceed the wall outlet's ampere rating.

- Always turn off the product using the power button, and wait until the power light stops flashing before unplugging the product or cutting off power to the electrical outlet.
- If you will not be using the product for a long period, unplug the power cord from the electrical outlet.
- Place the product on a flat, stable surface that extends beyond its base in all directions. It will not operate properly if it is tilted or at an angle.
- Allow space behind the product for the cables, and space above the product so that you can fully raise the document cover.
- Leave enough space in front of the product for the paper to be fully ejected.
- Avoid locations that are subject to rapid changes in heat or humidity, shocks or vibrations, or dust.
- Do not place or store the product outdoors.
- Do not place the product near excessive heat sources or in direct sunlight.
- Leave enough room around the product for sufficient ventilation. Do not block or cover openings in the case or insert objects through the slots.
- Keep the product away from potential sources of electromagnetic interference, such as loudspeakers or the base units of cordless telephones.
- When connecting the product to a computer or other device with a cable, ensure the correct orientation of the connectors. Each connector has only one correct orientation. Inserting a connector in the wrong orientation may damage both devices connected by the cable.
- Do not touch the flat white cable inside the product.
- Do not move the print head by hand; this may damage the product.
- Do not spill liquid on the product or use the product with wet hands.
- Do not use aerosol products that contain flammable gases inside or around the product. Doing so may cause fire.
- Do not press too hard on the document table when placing originals.
- Do not open the scanner section while the product is copying, printing, scanning, or performing any other functions.
- Be careful not to trap your fingers when closing the document cover or scanner.
- Except as specifically explained in your documentation, do not attempt to service or disassemble the product yourself.
• Unplug the product and refer servicing to qualified service personnel under the following conditions: if the power cord or plug is damaged; if liquid has entered the product; if the product has been dropped or the case damaged; if the product does not operate normally or exhibits a distinct change in performance. Adjust only those controls that are covered by the operating instructions.

• Before transporting the product, make sure that the print head is in the home (far right) position.

• When storing or transporting the product, do not tilt it, stand it on its side, or turn it upside down; otherwise ink may leak.

LCD Screen Safety Instructions

• Use only a dry, soft cloth to clean the LCD screen. Do not use liquid or chemical cleansers.

• If the LCD screen is damaged, contact Epson. If the liquid crystal solution gets on your hands, wash them thoroughly with soap and water. If the liquid crystal solution gets into your eyes, flush them immediately with water. If discomfort or vision problems remain after a thorough flushing, see a doctor immediately.

• Do not press too hard on the LCD screen or subject it to heavy impacts.

• Do not use a pointy or sharp object, such as a pen or your fingernail, to operate the LCD screen.

• If the LCD screen chips or cracks, do not touch or attempt to remove the broken pieces; contact Epson for support.

FCC Compliance Statement

For United States Users

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful
interference to radio or television reception. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause interference to radio and television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

**WARNING**

The connection of a non-shielded equipment interface cable to this equipment will invalidate the FCC Certification or Declaration of this device and may cause interference levels which exceed the limits established by the FCC for this equipment. It is the responsibility of the user to obtain and use a shielded equipment interface cable with this device. If this equipment has more than one interface connector, do not leave cables connected to unused interfaces. Changes or modifications not expressly approved by the manufacturer could void the user’s authority to operate the equipment.

**Binding Arbitration and Class Waiver**

1. **DISPUTES, BINDING INDIVIDUAL ARBITRATION, AND WAIVER OF CLASS ACTIONS AND CLASS ARBITRATIONS**

1.1 **Disputes.** The terms of this Section 1 shall apply to all Disputes between you and Epson. The term "Dispute" is meant to have the broadest meaning permissible under law and includes any dispute, claim, controversy or action between you and Epson arising out of or relating to this Agreement, Epson branded products (hardware and including any related software), or other transaction involving you and Epson, whether in contract, warranty, misrepresentation, fraud, tort, intentional tort, statute, regulation, ordinance, or any other legal or equitable basis. "DISPUTE" DOES NOT INCLUDE IP CLAIMS, or more specifically, a claim or cause of action for (a) trademark infringement or dilution, (b) patent infringement, (c) copyright infringement or misuse, or (d) trade secret misappropriation (an "IP Claim"). You and Epson also agree, notwithstanding Section 1.6, that a court, not an arbitrator, may decide if a claim or cause of action is for an IP Claim.

1.2 **Binding Arbitration.** You and Epson agree that all Disputes shall be resolved by binding arbitration according to this Agreement. **ARBITRATION MEANS THAT YOU WAIVE YOUR RIGHT TO A JUDGE**
Pursuant to this Agreement, binding arbitration shall be administered by JAMS, a nationally recognized arbitration authority, pursuant to its code of procedures then in effect for consumer related disputes, but excluding any rules that permit joinder or class actions in arbitration (for more detail on procedure, see Section 1.6 below). You and Epson understand and agree that (a) the Federal Arbitration Act (9 U.S.C. §1, et seq.) governs the interpretation and enforcement of this Section 1, (b) this Agreement memorializes a transaction in interstate commerce, and (c) this Section 1 shall survive termination of this Agreement.

1.3 Pre-Arbitration Steps and Notice. Before submitting a claim for arbitration, you and Epson agree to try, for sixty (60) days, to resolve any Dispute informally. If Epson and you do not reach an agreement to resolve the Dispute within the sixty (60) days), you or Epson may commence an arbitration. Notice to Epson must be addressed to: Epson America, Inc., ATTN: Legal Department, 3840 Kilroy Airport Way, Long Beach, CA 90806 (the "Epson Address"). The Dispute Notice to you will be sent to the most recent address Epson has in its records for you. For this reason, it is important to notify us if your address changes by emailing us at EAILegal@ea.epson.com or writing us at the Epson Address above. Notice of the Dispute shall include the sender's name, address and contact information, the facts giving rise to the Dispute, and the relief requested (the "Dispute Notice"). Following receipt of the Dispute Notice, Epson and you agree to act in good faith to resolve the Dispute before commencing arbitration.

1.4 Small Claims Court. Notwithstanding the foregoing, you may bring an individual action in the small claims court of your state or municipality if the action is within that court's jurisdiction and is pending only in that court.

1.5 WAIVER OF CLASS ACTIONS AND CLASS ARBITRATIONS. YOU AND EPSON AGREE THAT EACH PARTY MAY BRING DISPUTES AGAINST THE OTHER PARTY ONLY IN AN INDIVIDUAL CAPACITY, AND NOT AS A PLAINTIFF OR CLASS MEMBER IN ANY CLASS OR REPRESENTATIVE PROCEEDING, INCLUDING WITHOUT LIMITATION FEDERAL OR STATE CLASS ACTIONS, OR CLASS ARBITRATIONS. CLASS ACTION LAWSUITS, CLASS-WIDE ARBITRATIONS, PRIVATE ATTORNEY-GENERAL ACTIONS, AND ANY OTHER PROCEEDING WHERE SOMEONE ACTS IN A REPRESENTATIVE CAPACITY ARE NOT ALLOWED. ACCORDINGLY, UNDER THE ARBITRATION PROCEDURES OUTLINED IN THIS SECTION, AN ARBITRATOR SHALL NOT COMBINE OR CONSOLIDATE MORE THAN ONE PARTY'S CLAIMS WITHOUT THE WRITTEN CONSENT OF ALL AFFECTED PARTIES TO AN ARBITRATION PROCEEDING.

1.6 Arbitration Procedure. If you or Epson commences arbitration, the arbitration shall be governed by the rules of JAMS that are in effect when the arbitration is filed, excluding any rules that permit arbitration on a class or representative basis (the "JAMS Rules"), available at http://www.jamsadr.com or by calling 1-800-352-5267, and under the rules set forth in this Agreement. All Disputes shall be resolved by a single neutral arbitrator, and both parties shall have a reasonable opportunity to participate in the selection of the arbitrator. The arbitrator is bound by the terms of this Agreement. The arbitrator, and not any federal, state or local court or agency, shall have exclusive authority to resolve all disputes arising
out of or relating to the interpretation, applicability, enforceability or formation of this Agreement, including any claim that all or any part of this Agreement is void or voidable. Notwithstanding this broad delegation of authority to the arbitrator, a court may determine the limited question of whether a claim or cause of action is for an IP Claim, which is excluded from the definition of "Disputes" in Section 1.1 above. The arbitrator shall be empowered to grant whatever relief would be available in a court under law or in equity. The arbitrator may award you the same damages as a court could, and may award declaratory or injunctive relief only in favor of the individual party seeking relief and only to the extent necessary to provide relief warranted by that party's individual claim. In some instances, the costs of arbitration can exceed the costs of litigation and the right to discovery may be more limited in arbitration than in court. The arbitrator's award is binding and may be entered as a judgment in any court of competent jurisdiction.

You may choose to engage in arbitration hearings by telephone. Arbitration hearings not conducted by telephone shall take place in a location reasonably accessible from your primary residence, or in Orange County, California, at your option.

a) Initiation of Arbitration Proceeding. If either you or Epson decides to arbitrate a Dispute, both parties agree to the following procedure:

(i) Write a Demand for Arbitration. The demand must include a description of the Dispute and the amount of damages sought to be recovered. You can find a copy of a Demand for Arbitration at http://www.jamsadr.com ("Demand for Arbitration").

(ii) Send three copies of the Demand for Arbitration, plus the appropriate filing fee, to: JAMS, 500 North State College Blvd., Suite 600 Orange, CA 92868, U.S.A.

(iii) Send one copy of the Demand for Arbitration to the other party (same address as the Dispute Notice), or as otherwise agreed by the parties.

b) Hearing Format. During the arbitration, the amount of any settlement offer made shall not be disclosed to the arbitrator until after the arbitrator determines the amount, if any, to which you or Epson is entitled. The discovery or exchange of non-privileged information relevant to the Dispute may be allowed during the arbitration.

c) Arbitration Fees. Epson shall pay, or (if applicable) reimburse you for, all JAMS filings and arbitrator fees for any arbitration commenced (by you or Epson) pursuant to provisions of this Agreement.

d) Award in Your Favor. For Disputes in which you or Epson seeks $75,000 or less in damages exclusive of attorney's fees and costs, if the arbitrator's decision results in an award to you in an amount greater than Epson's last written offer, if any, to settle the Dispute, Epson will: (i) pay you $1,000 or the amount of the award, whichever is greater; (ii) pay you twice the amount of your reasonable attorney's fees, if any; and (iii) reimburse you for any expenses (including expert witness fees and costs) that your attorney reasonably accrues for investigating, preparing, and pursuing the Dispute in arbitration. Except as agreed upon by you and Epson in writing, the arbitrator shall determine the amount of fees, costs, and expenses to be paid by Epson pursuant to this Section 1.6d).
e) Attorney's Fees. Epson will not seek its attorney's fees and expenses for any arbitration commenced involving a Dispute under this Agreement. Your right to attorney's fees and expenses under Section 1.6d) above does not limit your rights to attorney's fees and expenses under applicable law; notwithstanding the foregoing, the arbitrator may not award duplicative awards of attorney's fees and expenses.

1.7 Opt-out. You may elect to opt-out (exclude yourself) from the final, binding, individual arbitration procedure and waiver of class and representative proceedings specified in this Agreement by sending a written letter to the Epson Address within thirty (30) days of your assent to this Agreement (including without limitation the purchase, download, installation of the Software or other applicable use of Epson Hardware, products and services) that specifies (i) your name, (ii) your mailing address, and (iii) your request to be excluded from the final, binding individual arbitration procedure and waiver of class and representative proceedings specified in this Section 1. In the event that you opt-out consistent with the procedure set forth above, all other terms shall continue to apply, including the requirement to provide notice prior to litigation.

1.8 Amendments to Section 1. Notwithstanding any provision in this Agreement to the contrary, you and Epson agree that if Epson makes any future amendments to the dispute resolution procedure and class action waiver provisions (other than a change to Epson's address) in this Agreement, Epson will obtain your affirmative assent to the applicable amendment. If you do not affirmatively assent to the applicable amendment, you are agreeing that you will arbitrate any Dispute between the parties in accordance with the language of this Section 1 (or resolve disputes as provided for in Section 1.7, if you timely elected to opt-out when you first assented to this Agreement).

1.9 Severability. If any provision in this Section 1 is found to be unenforceable, that provision shall be severed with the remainder of this Agreement remaining in full force and effect. The foregoing shall not apply to the prohibition against class or representative actions as provided in Section 1.5. This means that if Section 1.5 is found to be unenforceable, the entire Section 1 (but only Section 1) shall be null and void.
