Quick Setup
Before using the projector, make sure you read the safety instructions in the online User's Guide.

Connect the projector
Before you can connect to the projector, you need to remove the screw and cable cover.

Computer
Choose from the following connections. See the sections below or the online User's Guide for details.

HDMI port
Connect one end of an HDMI cable to one of the projector's HDMI ports and the other end to an HDMI port on your computer.

Computer port
Connect one end of a VGA cable to the projector's Computer port, and the other end to your computer's monitor port. If you are using a laptop, switch it to external display (see "Troubleshooting"). You can also connect an audio cable.

USB port
Connect the square end of a USB cable to the projector's USB-B (flat) port. The other end to your computer's USB-A (flat) port.

External monitor and speakers
You can connect an external monitor and external speakers to your projector to enhance your presentations. See the online User's Guide for details.

Wired network
Connect the projector to your network using an Ethernet cable. See "Project over a network" for more information.

Microphone
Connect a dynamic microphone to the Mic port, using a 3.5 mm mini-jack cable.

Video device
Connect multiple video devices and use the Source Search button on the projector or remote control to switch between them. For more information on playing sound through the projector, see the online User's Guide.

Mobile media device
Connect tablets, smartphones, and other devices that support the MHL™ standard to the HDMI 1/MHL port.

Camera, USB device, or document camera
Connect a digital camera, USB flash drive, USB storage device, or Epson DC-07 document camera to the projector's USB-A (flat) port.

Using the remote control
Install the batteries as shown (two AA batteries). For more information on using the remote control, see the online User's Guide.

Wireless LAN Module
Connect the projector to your network using an Ethernet cable. See "Project over a network" for more information.

Wired network configuration
Follow the steps here to configure your projector for your wired network using the projector's menu system.

1. Press the Menu button on the remote control, select the Network menu, then press 

2. Choose Network Configuration and press 

3. Select the Wired LAN menu and press 

4. If you don’t see an image, press the Source Search button on the remote control to select the image source.

5. If you need to focus the image, first slide the switch on the side of the projector to open the air filter cover. Then raise or lower the focus lever to sharpen the image.

6. Use the arrow buttons on the remote control to highlight any of the options on the Home screen, then press 

7. The default language of the menu system is English. To select another language, press the Menu button on the remote control. Select Extended and press 

8. To turn on your equipment

1. Turn on your computer or video source.

2. Make sure the power cord is connected and plugged into an electrical outlet.

3. Press the power button on the projector or remote control. The projector beeps, and the Status light flashes blue and then stays on.

Note: To shut down the projector, press the power button twice.

For more information on using the remote control, see the online User's Guide.

Turn on your equipment

1. Turn on your computer or video source.

2. Make sure the power cord is connected and plugged into an electrical outlet.

3. Press the power button on the projector or remote control. The projector beeps, and the Status light flashes blue and then stays on.

Note: To shut down the projector, press the power button twice.
Quick Setup

Before using the projector, make sure you read the safety instructions in the online User's Guide.

Connect the projector

Before you can connect to the projector, you need to remove the screws and the cable cover.

**Computer**
Choose from the following connections. See the sections below or the online User's Guide for details.

**HDMI port**
Connect one end of an HDMI cable to one of the projector's HDMI ports and the other end to an HDMI port on your computer.

**Computer port**
Connect one end of a VGA cable to the projector's Computer port, and the other end to your computer's monitor port. If you are using a laptop, switch it to external display (see "Troubleshooting"). You can also connect an audio cable.

**USB port**
Connect the square end of a USB cable to the projector's USB-B (flat) port, and the other end to any USB port on your computer.

**Mobile media device**
Connect tablets, smartphones, and other devices that support the MHL™ standard to the HDMI 1/MHL port.

**Video device**
Connect multiple video devices and use the Source Search button on the projector or remote control to switch between them. For more information on playing sound through the projector, see the online User's Guide.

**Microphone**
Connect a dynamic microphone to the Mic port, using a 3.5 mm mini-jack cable.

**External monitor and speakers**
You can connect an external monitor and external speakers to your projector to enhance your presentations. See the online User's Guide for details.

**Wired network**
Connect the projector to your network using an Ethernet cable. See "Project over a network" for more information.

**Camera, USB device, or document camera**
Connect a digital camera, USB flash drive, USB storage device, or Epson DC-07 document camera to the projector's USB-A (flat) port.

**USB Display**
Follow the on-screen instructions to install the Epson USB Display software (only on first connection). If the software screen does not display automatically, open My Computer, Computer, or This PC, then double-click EPSON_PJ_UD.

**OS X 10.7.x or higher:** double-click USB Display Installer, then follow the on-screen instructions to install the Epson USB Display software (only on first connection).

If you connect a digital camera, USB flash drive, or USB storage device, you can use the projector's PC Free feature. You can also connect other Epson document cameras to the projector. See the online User's Guide for details.

**Using the remote control**
Install the batteries as shown (two AA batteries). For more information on using the remote control, see the online User's Guide.

**Wired network configuration**
Follow the steps here to configure your projector for your wired network using the projector's menu system.

**Turn on your equipment**

1. Turn on your computer or video source.
2. Make sure the power cord is connected and plugged into an electrical outlet.
3. Press the power button on the projector or remote control. The projector beeps, and the Status light flashes blue and then stays on.

   **Note:** To shut down the projector, press the power button twice.

4. If you don't see an image, press the Source Search button on the remote control to select the image source.

   **Note:** If you still see a blank screen or have other display problems, see the troubleshooting tips on the back of this sheet.

5. If you need to focus the image, first slide the switch on the side of the projector to open the air filter cover. Then raise or lower the focus lever to sharpen the image.

6. Use the arrow buttons on the remote control to highlight any of the options on the Home screen, then press \( \text{Menu} \) to select it. You can display a QR code, switch between projection sources, and quickly access various adjustment options from this screen.

7. The default language of the menu system is English. To select another language, press the Menu button on the remote control. Select Extended and press \( \text{Menu} \). Select Language and press \( \text{Menu} \). Select your language and press \( \text{Menu} \). Press the Menu button to exit the menu system.

8. For more information on using the remote control, see the online User's Guide.

**Sound**
Connect one end of an audio cable to the projector's Audio cable port, and the other end to your computer's audio port. Connect the flat end of the cable to any USB port on your computer.

**Connect one end of an HDMI cable to one of the projector's HDMI ports and the other end to an HDMI port on your computer.**

**Connect a digital camera, USB flash drive, or USB storage device, you can use the projector's PC Free feature.**

**Connect multiple video devices and use the Source Search button on the projector or remote control to switch between them.**

**Connect a dynamic microphone to the Mic port, using a 3.5 mm mini-jack cable.**

**Connect tablets, smartphones, and other devices that support the MHL™ standard to the HDMI 1/MHL port.**

**Connect the square end of a USB cable to the projector's USB-B (flat) port, and the other end to any USB port on your computer.**

**Connect the projector to your network using an Ethernet cable.**

**Connect the projector to a wireless network, you must install the optional Epson Wireless LAN Module (2EMAP10). To purchase the Epson Wireless LAN Module or other accessories, see "Optional accessories." For more information, see the online User's Guide.**

**Before turning on the projector, the setup folder for USB Display appears in the Finder. Double-click USB Display Installer, then follow the on-screen instructions to install the Epson USB Display software (only on first connection).**

**If the software screen does not display automatically, open My Computer, Computer, or This PC, then double-click EPSON_PJ_UD.**

**OS X 10.7.x or higher:** double-click USB Display Installer, then follow the on-screen instructions to install the Epson USB Display software (only on first connection).

**Connect tablets, smartphones, and other devices that support the MHL™ standard to the HDMI 1/MHL port.**

**Connect a digital camera, USB flash drive, or USB storage device, you can use the projector's PC Free feature. You can also connect other Epson document cameras to the projector. See the online User's Guide for details.**

**Install the batteries as shown (two AA batteries). For more information on using the remote control, see the online User's Guide.**

**Follow the steps here to configure your projector for your wired network using the projector's menu system.**

**Turn on your equipment**

1. Turn on your computer or video source.
2. Make sure the power cord is connected and plugged into an electrical outlet.
3. Press the power button on the projector or remote control. The projector beeps, and the Status light flashes blue and then stays on.

   **Note:** To shut down the projector, press the power button twice.

4. If you don't see an image, press the Source Search button on the remote control to select the image source.

   **Note:** If you still see a blank screen or have other display problems, see the troubleshooting tips on the back of this sheet.

5. If you need to focus the image, first slide the switch on the side of the projector to open the air filter cover. Then raise or lower the focus lever to sharpen the image.

6. Use the arrow buttons on the remote control to highlight any of the options on the Home screen, then press \( \text{Menu} \) to select it. You can display a QR code, switch between projection sources, and quickly access various adjustment options from this screen.

7. The default language of the menu system is English. To select another language, press the Menu button on the remote control. Select Extended and press \( \text{Menu} \). Select Language and press \( \text{Menu} \). Select your language and press \( \text{Menu} \). Press the Menu button to exit the menu system.

8. For more information on using the remote control, see the online User's Guide.

**Sound**
Connect one end of an audio cable to the projector's Audio cable port, and the other end to your computer's audio port. Connect the flat end of the cable to any USB port on your computer.

**Connect one end of an HDMI cable to one of the projector's HDMI ports and the other end to an HDMI port on your computer.**

**Connect a digital camera, USB flash drive, or USB storage device, you can use the projector's PC Free feature. You can also connect other Epson document cameras to the projector. See the online User's Guide.**

**Connect multiple video devices and use the Source Search button on the projector or remote control to switch between them. For more information on playing sound through the projector, see the online User's Guide.**

**Connect a dynamic microphone to the Mic port, using a 3.5 mm mini-jack cable.**

**Connect tablets, smartphones, and other devices that support the MHL™ standard to the HDMI 1/MHL port.**

**Connect a digital camera, USB flash drive, or USB storage device, you can use the projector's PC Free feature. You can also connect other Epson document cameras to the projector. See the online User's Guide for details.**

**Install the batteries as shown (two AA batteries). For more information on using the remote control, see the online User's Guide.**

**Follow the steps here to configure your projector for your wired network using the projector's menu system.**

**Turn on your equipment**

1. Turn on your computer or video source.
2. Make sure the power cord is connected and plugged into an electrical outlet.
3. Press the power button on the projector or remote control. The projector beeps, and the Status light flashes blue and then stays on.

   **Note:** To shut down the projector, press the power button twice.

4. If you don't see an image, press the Source Search button on the remote control to select the image source.

   **Note:** If you still see a blank screen or have other display problems, see the troubleshooting tips on the back of this sheet.

5. If you need to focus the image, first slide the switch on the side of the projector to open the air filter cover. Then raise or lower the focus lever to sharpen the image.

6. Use the arrow buttons on the remote control to highlight any of the options on the Home screen, then press \( \text{Menu} \) to select it. You can display a QR code, switch between projection sources, and quickly access various adjustment options from this screen.

7. The default language of the menu system is English. To select another language, press the Menu button on the remote control. Select Extended and press \( \text{Menu} \). Select Language and press \( \text{Menu} \). Select your language and press \( \text{Menu} \). Press the Menu button to exit the menu system.

8. For more information on using the remote control, see the online User's Guide.
Projecting from a mobile device

You can project wirelessly from a mobile device (iOS, Android™, or Chromebook™) using the Epson iProjection™ app and a QR code.

1. Use the following QR code to download and install the Epson iProjection app.
2. If you connected the projector to a network wirelessly, make sure to connect your mobile device to the same network.
3. Press the LAN button on the remote control to display a QR code on the projector screen.
4. Start Epson iProjection on your mobile device.
5. Use the QR code reader feature to read the QR code displayed.
6. Follow the app instructions to connect your device to the projector.

Using web remote

You can use a standard web browser to control the projector through the network. A “virtual remote control” on your computer screen lets you perform many of the same functions as you can with the physical remote control.

1. Open your web browser and enter the IP address of the projector you want to monitor in the browser window.
2. If you’re not sure what the IP address of the projector is, turn the projector on and select Net. Info. - Wired LAN or Net. Info. - Wireless LAN from the Network menu to display the IP address of the projector.
3. Enter EPSONWEB as the default user name and admin as the default password, then click OK.
4. From the Projector Control menu, select Web Remote. Use the on-screen buttons to operate the projector, as you would using the remote control.

Troubleshooting

If you see a blank screen or the No signal message after turning on your computer or video device, check the following:

- Make sure the Status light on the projector is blue and not flashing.
- Press the Source Search button on the projector or the remote control to switch to the correct image source, if necessary.
- Press the Home button on the projector or remote control to verify the source input and settings.
- On Windows® 7 or later, hold down the Windows key and press P at the same time, then click Duplicate.
- If you’re using a Windows laptop, press the function key on your keyboard that lets you display on an external monitor. It may be labeled CRT/LCD or have an icon such as 📅. You may have to hold down the Fn key while pressing it (such as Fn + P). Wait a moment for the display to appear.
- If you’re using a Mac laptop, open System Preferences and select Displays. Click the Arrangement tab and select the Mirror Displays check box.

Where to get help

Manuals

For more information about using the projector, see the online manuals. You can view or download the manuals from the Epson website, as described below.

Internet support services

Visit www.epson.com/support (U.S.) or www.epson.ca/support (Canada) and search for your product to download software and utilities, view manuals, get FAQs and troubleshooting advice, or contact Epson.

Telephone support

To use the Epson PrivateLine® Support service, call (800) 637-7661. This service is available for the duration of your warranty period. You may also speak with a support specialist by calling (562) 276-4394 (U.S.) or (905) 709-3839 (Canada). Support hours are 6 am to 8 pm, Pacific Time, Monday through Friday, and 7 am to 4 pm, Pacific Time, Saturday. Days and hours of support are subject to change without notice. Toll or long distance charges may apply.

Registration

Register today to get product updates and exclusive offers. You can register online at www.epson.com/webreg.

Optional accessories

For a list of optional accessories, see the online User’s Guide. You can purchase screens or other accessories from an Epson authorized reseller. To find the nearest reseller, call 800-GO-EPSON (800-463-7766). Or you can purchase online at www.epsonstore.com (U.S. sales) or www.epson.ca (Canadian sales).
Projecting from a mobile device

You can project wirelessly from a mobile device (iOS, Android™, or Chromebook™) using the Epson iProjection™ app and a QR code.

1. Use the following QR code to download and install the Epson iProjection app.

2. If you connected the projector to a network wirelessly, make sure to connect your mobile device to the same network.

3. Press the LAN button on the remote control to display a QR code on the projector screen.

4. Start Epson iProjection on your mobile device.

5. Use the QR code reader feature to read the QR code displayed.

Troubleshooting

If you see a blank screen or the No signal message after turning on your computer or video device, check the following:

- Make sure the Status light on the projector is blue and not flashing.
- Press the Source Search button on the projector or the remote control to switch to the correct image source, if necessary.
- Press the Home button on the projector or remote control to verify the source input and settings.
- On Windows® 7 or later, hold down the Windows key and press P at the same time, then click Duplicate.
- If you’re using a Windows laptop, press the function key on your keyboard that lets you display on an external monitor. It may be labeled CRT/LCD or have an icon such as . You may have to hold down the Fn key while pressing it (such as Fn + PF). Wait a moment for the display to appear.
- If you’re using a Mac laptop, open System Preferences and select Displays. Click the Arrange tab and select the Mirror Displays check box.
