Parent topic: Control Panel Buttons and Lights

**Changing LCD Screen Language**

You can change the language used on the LCD screen.

1. Press the home button, if necessary.
2. Select **Settings > General Settings > Basic Settings > Language**.

   You see a screen like this:

   ![Language Screen](image)

3. Select a language and select **Close**.

Parent topic: Using the Control Panel

**Selecting the Date and Time**

Before faxing, select the current date, time, and daylight saving phase in your area, and choose your preferred date and time format.
1. Press the \home button, if necessary.
2. Select **Settings > General Settings > Basic Settings > Date/Time Settings**.
   You see a screen like this:

   ![Date/Time Settings](image)

   3. Select **Daylight Saving Time**.
   4. Select the setting that applies to your area:
      - **Winter**: it is winter or your region does not use Daylight Saving Time (DST)
      - **Summer**: it is spring or summer and your region uses Daylight Saving Time (DST)

      **Note**: If your region uses Daylight Saving Time (DST), you must change this setting to match the season. When you change from **Winter** to **Summer**, your product automatically sets its clock ahead one hour. When you change from **Summer** to **Winter**, it sets its clock back one hour.

   5. Select **Date/Time**.
   6. Select the date format you want to use.
   7. Use the numeric keypad to enter the current date.
   8. Select the time format you want to use.
   9. Use the numeric keypad to enter the current time.

   **Parent topic**: Using the Control Panel
Selecting Your Country or Region

Before using your product, select the country or region in which you are using your product.

Note: If you change the country or region, your fax settings return to their defaults and you must select them again. This setting can be locked by an administrator. If you cannot access or change this setting, contact your administrator for assistance.

1. Press the home button, if necessary.
2. Select Settings.
3. Select General Settings > Basic Settings.

![Basic Settings](image)

4. Scroll down and select Country/Region.
5. Scroll up or down, if necessary, and select your country or region.
   You see a confirmation screen.
6. If the setting is correct, select Yes. (If not, select No and try again.)

Parent topic: Using the Control Panel

Setting a Password and Locking the Control Panel

You can set an administrator password to lock the following settings and prevent them from being changed:

- Certain Basic Settings and Printer Settings
• System Administration Settings
• Presets
• Contacts
• Network Settings
• Web Service Settings
• Scan Settings
• Fax Settings

**Note:** For more information on administration settings, see the *Administrator’s Guide*.

1. Press the home button, if necessary.
2. Select **Settings** > **General Settings** > **System Administration** > **Security Settings** > **Admin Settings** > **Admin Password** > **Register**.
   
   You see a screen like this:

   ![Keyboard Screen](image)

   3. Use the displayed keyboard to enter a password, then select **OK**.
   4. Enter your password again to confirm.
   5. Select **OK**.
   6. Select **Lock Setting** and select **On**.
      
      When the control panel is locked, you must enter the password to access any of the locked settings.
**Note:** If you forget your password, contact Epson for assistance.

**Entering Characters on the LCD Screen**

**Using Presets**

**Parent topic:** Using the Control Panel

**Entering Characters on the LCD Screen**

Follow these guidelines to enter characters for passwords and other settings.

- To move the cursor, select the left or right arrows.
- To change the case of letters, select 🔌.
- To delete the previous character, select ✖.
- To enter numbers or symbols, select 123#.
- To enter a space, select Space.

**Parent topic:** Setting a Password and Locking the Control Panel

**Using Presets**

You can save frequently used copy, fax, and scan settings as presets. This lets you easily reuse them whenever necessary.
Note: This setting can be locked by an administrator. If you cannot access this setting, contact your administrator for assistance.

1. Press the \( \text{Home} \) button, if necessary.
2. Select Presets.
   
   You see a screen like this:

3. Select Add New.
4. Select the function for which you want to set up a preset, such as Copy.
   
   You see the main screen for that function:
5. Select the settings you want to save and select **Register**. You see a screen like this:

![Registration Screen](image)

6. Select **Name**. You see a screen like this:

![Keyboard Screen](image)

7. Use the displayed keyboard to enter a name for the preset and select **OK**.
8. Select **OK**. When you copy, fax, or scan, you can use the preset by selecting **Presets** and selecting your preset name from the list.
Setting User Feature Restrictions (Access Control)

Using Web Config Access Control settings, you can restrict access to product features for individual users to prevent misuse of the product. Restricted features require the user to enter an ID and password on the product control panel.

After you set up feature restrictions, you must enable them using the product control panel.

**Note:** For more information on administration settings, see the Administrator’s Guide.

1. Press the home button, if necessary.
2. Select **Settings > General Settings > System Administration > Security Settings > Access Control**.
   
   You see a screen like this:

   ![Access Control Screen](image)

3. Select the **Access Control** field to turn the setting on.
4. If you want to allow users to print from generic drivers or use WSD scanning, select the **Accept Unknown User Jobs** field to turn the setting on.
5. Press the home button to exit.
**Adjusting Control Panel Sounds**

You can adjust the sound level heard when you press buttons on the control panel.

1. Press the home button, if necessary.
2. Select **Settings > General Settings > Basic Settings > Sound**.
   
   You see a screen like this:

   ![Sound Settings Screen]

3. Do one of the following:
   - To mute all control panel sounds, turn the Mute setting off.
   - To select a specific sound level, select **Normal Mode** or **Quiet Mode**.

   **Note:** Press the 📺 icon on the home screen to switch between Normal Mode and Quiet Mode.

4. If you did not mute the sounds, select **Button Press** to adjust the volume level.

5. Press 🔊 to decrease or 🎧 to increase the volume.

6. Select **OK** to exit.

   **Note:** You can also adjust the **Sound Type** and the sound level for various product functions.

**Parent topic:** Using the Control Panel

Adjusting the Screen Brightness

You can adjust the brightness of the LCD screen.

1. Press the home button, if necessary.
2. Select Settings > General Settings > Basic Settings > LCD Brightness.
   
   You see a screen like this:

   ![LCD Brightness screen](image)

   3. Press the – or + icons to decrease or increase the brightness.
   4. Select OK to exit.

   Parent topic: Using the Control Panel

Turning Off the Operation Time Out Setting

The Operation Time Out setting causes the LCD screen to return to the Home screen after a few minutes of inactivity. This feature is enabled by default, but you can turn it off.

Note: This setting can be locked by an administrator. If you cannot access this setting, contact your administrator for assistance.

1. Press the home button, if necessary.
2. Select **Settings > General Settings > Basic Settings > Operation Time Out**.

![Basic Settings](image)

3. Select **Off**.

**Parent topic:** Using the Control Panel

**Preventing PC Connection via USB**

You can disable access to your product from a USB-connected computer. This restricts non-network access to the product and protects the security of confidential scanned documents.

**Note:** This setting can be locked by an administrator. If you cannot access this setting, contact your administrator for assistance.

1. Press the home button, if necessary.
2. Select **Settings > General Settings > Printer Settings > PC Connection via USB**.
You see a screen like this:

3. Select **Disable**.

**Parent topic:** Using the Control Panel

**Product Parts Locations**

See these sections to identify the parts on your product.

- **Product Parts - Front**
- **Product Parts - Inside**
- **Product Parts - Back**

**Parent topic:** Product Basics
Product Parts - Front

Certain parts are labeled with a letter and number code. If you encounter any paper jams or errors, you can use these codes to locate and correct the problem.

1 Automatic Document Feeder (ADF) cover (F)
2 ADF edge guides
3 ADF input tray
4 ADF output tray
5 Paper cassette 1 (C1)
1 Rear paper feed edge guides
2 Paper support and extension
3 Feeder guard
4 Rear paper feed slot (B)
5 Output tray
6 Paper cassette edge guides
7 Paper cassette

Parent topic: Product Parts Locations
Product Parts - Inside

Certain parts are labeled with a letter and number code. If you encounter any paper jams or errors, use these codes to locate and correct the problem.

1 Document cover
2 Scanner glass
3 Control panel
4 USB Type A port for external devices

1 Scanner unit (J)
2 Print head
3 Ink pack tray
4 Front cover (A)
5 Front cover lock

Parent topic: Product Parts Locations
Product Parts - Back

Certain parts are labeled with a letter and number code. If you encounter any paper jams or errors, use these codes to locate and correct the problem.

1. LAN port
2. USB port
3. Service USB port for future use (do not remove sticker)
4. Line port
5. EXT port
6. AC inlet
7. Rear cover (D)
8. Paper cassette rear cover (E)
9. Maintenance box cover (H)

Parent topic: Product Parts Locations
Using Power Saving Settings

Your product enters sleep mode automatically and turns off the LCD screen if it is not used for a period of time. You can make the time period shorter and select other options to save energy and resources.

Changing the Sleep Timer Settings
Changing the Power Off Timer Settings
Parent topic: Product Basics

Changing the Sleep Timer Settings

You can adjust the time period before your product enters sleep mode and turns off the LCD screen.

**Note**: This setting can be locked by an administrator. If you cannot access this setting, contact your administrator for assistance.

1. Press the home button, if necessary.
2. Select Settings > General Settings > Basic Settings > Sleep Timer.
   
   You see a screen like this:

   ![Sleep Timer settings screen](image)

   3. Do one of the following:
      
      - Select the – or + icon to decrease or increase the number of minutes.
      - Select the number of minutes on the LCD screen, select the number of minutes from the on-screen keypad, and select OK.
4. Select OK.

**Parent topic:** Using Power Saving Settings

**Changing the Power Off Timer Settings**

You can have the product turn off automatically if it is not used for a specified period of time.

**Note:** This setting can be locked by an administrator. If you cannot access this setting, contact your administrator for assistance.

1. Press the home button, if necessary.
2. Select **Settings > General Settings > Basic Settings > Power Off Timer**.
   
   You see a screen like this:

   ![Power Off Timer Screen](image)

3. Select a time period between **30 minutes** and **12h** (12 hours).

**Parent topic:** Using Power Saving Settings

**Epson Connect Solutions for Smartphones, Tablets, and More**

Use your smartphone, tablet, or computer to print and scan documents, photos, emails, and web pages from your home, office, or even across the globe.

**Note:** If you are using your Epson product with the Windows 10 S operating system, you cannot use the software described in this section. You also cannot download and install any Epson product software.
from the Epson website for use with Windows 10 S; you must obtain software only from the Windows Store.

Print from anywhere with these Epson Connect solutions:
• Epson Email Print
• Epson iPrint Mobile App
• Epson Remote Print

Scan and send a file as an email or upload it to an online service directly from your Epson product with Epson Scan to Cloud or the Epson iPrint Mobile App.

**Setting Up Epson Connect Services**
- Using Epson Email Print
- Using the Epson iPrint Mobile App
- Using Epson Remote Print
- Using Epson Scan to Cloud

Parent topic: **Product Basics**

---

**Setting Up Epson Connect Services**

If you did not activate your product's email address for use with Epson Connect when you set up your product, you can activate it using the product control panel.

1. Press the ⬆️ home button, if necessary.
2. Select **Settings**.
3. Select **General Settings**.
You see a screen like this:

![General Settings Screen]

4. Select **Web Service Settings**.
5. Select **Epson Connect Services**.
   
   You see a screen like this:

![Epson Connect Screen]

6. Select **Register**.
7. Follow the instructions on the screen to activate your product's email address.

**Parent topic:** [Epson Connect Solutions for Smartphones, Tablets, and More](#)
Using Epson Email Print

With Epson Email Print, you can print from any device that can send email, such as your smartphone, tablet, or laptop. Just activate your product's unique email address. When you want to print, attach a PDF, Microsoft Office document, or photo to an email and send it to your product. Both the email and the attachments will print automatically.

1. Connect your product to your network. See the link below.
2. If you did not already set up Email Print when you installed your product software, see the link below to use your product control panel to activate your unique email address. Or visit epson.com/connect (U.S), epson.ca/connect (Canada), or epsonconnect.com (Caribbean) to learn more about Email Print, create your Epson Connect account, and register your product to the Epson Connect service.
3. Now you are ready to send and print emails to your product's Email Print address.

Note: Go to epsonconnect.com and log into your Epson Connect account to personalize your product's email, adjust print settings, and set up other Epson Connect services.

Wi-Fi or Wired Networking

Using the Epson iPrint Mobile App

Use this free Apple and Android app to print and scan with networked Epson products. Epson iPrint lets you print PDFs, Microsoft Office documents, photos, and web pages over a wireless network. You can scan and save a file on your device, send it as an email, or upload it to an online service such as Box, Dropbox, Evernote, or Google Drive.

1. Connect your product to your wireless network. See the link below.
2. Visit epson.com/connect (U.S), epson.ca/connect (Canada), or epson.com.jm/connect (Caribbean) to learn more about Epson iPrint and check the compatibility of your mobile device.
3. Download Epson iPrint from the Apple App Store or Google Play.
4. Connect your mobile device to the same wireless network as your product.
5. Open Epson iPrint and select your Epson product.

Now you are ready to print or scan with your mobile device and your Epson product.

Using Epson Remote Print

With Epson Remote Print software, you can print from your laptop or desktop computer to an Epson Email-enabled product anywhere in the world.

1. Connect your Epson product to your wireless network. See the link below.
2. If you did not already set up an Epson Connect account when you installed your product software, visit epsonconnect.com to create your account and register your product to the Epson Connect service.

Note: Make a note of your product's email address.

3. Visit epsonconnect.com to learn more about Remote Print and how to download the Remote Print Driver software.
4. Download and install the Remote Print software.
5. Enter the email address and optional access key of your Epson product during Remote Print setup.
6. Now you are ready to print remotely. Select the print command in your laptop or desktop computer application and choose the Remote Print option for your Epson product.

Using Epson Scan to Cloud

The Epson Scan to Cloud service allows you to scan and send a file as an email or upload it to an online service directly from your Epson product. Register an email address or online services such as Box, DropBox, Evernote, or Google Drive with your Epson Connect account.

1. Connect your Epson product to your network. See the link below.
2. If you did not already set up an Epson Connect account when you installed your product software, visit epsonconnect.com to create your account and register your product to the Epson Connect service.

Note: Make a note of your product's email address and password.
3. Visit epsonconnect.com to sign into your account with the email address and password you selected.
4. Select your product, select **Scan to Cloud**, and select **Destination List**.
5. Click **Add**, then follow the instructions on the screen to create your destination list.
6. Now you are ready to use Scan to Cloud. Select the setting for scanning to Scan to Cloud on your Epson product control panel.

### Using AirPrint

AirPrint enables instant wireless printing from iPhone, iPad, and iPod touch with the latest version of iOS, and Mac with the latest version of OS X or macOS.

![AirPrint](image)

**Note:** If you disabled paper configuration messages on your product control panel, you cannot use AirPrint. See the link below to enable the messages, if necessary.

1. Load paper in your product.
2. Set up your product for wireless printing. See the link below.
3. Connect your Apple device to the same wireless network that your product is using.
4. Print from your device to your product.

**Note:** For details, see the AirPrint page on the Apple website.

**Parent topic:** Product Basics

Paper Source Settings Options
Using Google Cloud Print

With a Google Account, you can print from your Apple or Android device to your Epson product. You can also print from Chromebooks and the Google Chrome browser without drivers or cables.

1. Connect your Epson product to your wireless network. See the link below.
2. Note your product’s IP address by checking your network status. See the link below.
3. Connect your computer or your Apple or Android device to the same wireless network as your Epson product.
4. Enter your product’s IP address into the address bar of a web browser.
5. Select the Google Cloud Print Services option.

Note: If you don’t see the Google Cloud Print Services option, turn your product off and back on. If the option still doesn’t appear, select the Firmware Update option and follow the on-screen instructions to update your product.

6. Click Register.
7. Select the checkbox to agree to the Usage Advisory and click Next.
8. Click OK to launch the sign-in page. A separate browser window opens.
9. Enter your Google Account username and password and click Sign in, or, if you don't have an account, click Sign up for a new Google Account and follow the on-screen instructions.
10. Click Finish printer registration to complete setup and print a test page.

Your product is now linked to your Google Account and can be accessed from any Chromebook, computer, Apple or Android device with Internet access. Visit Epson Support for Google Cloud Print (U.S) or Epson Support for Google Cloud Print (Canada) for more information on using Google Cloud Print, or the Google Cloud Print website for a list of supported apps.
Setting Up Google Cloud Print on a Chromebook

With a Google Account, you can print from a Chromebook without drivers or cables.

1. Connect your Epson product to your wireless network. See the link below.
2. Turn on your Chromebook and connect it to the same wireless network as your product.

   **Note:** See your Chromebook's documentation for details on connecting to a network.

3. Do one of the following:
   - Click **Add to Cloud Print** in the notification that appears in the corner of your Chromebook screen.
     
     **Note:** If you do not see a notification, check to see if a number appears in the status area at the lower-right corner of the screen. Click this number to open the notifications menu, then click **Add to Cloud Print**.
   
   - Open a web browser and enter `chrome://devices` in the address bar. Skip to step 5.
   
   - If you see a registration confirmation screen instead, click **Register**.

4. Click **Add Device**.

5. Click the **Register** button that appears next to your product.

6. Click **Register** on the confirmation screen. Your product's LCD screen displays a confirmation message.

7. Select **OK** or press the **OK** button on your product to confirm the Google Cloud Print connection and print a test page.

Your product is now linked to your Google Account and can be accessed from any Chromebook, iPhone, or Android phone with Internet access. Visit Epson Support for Google Cloud Print (U.S) or Epson Support for Google Cloud Print (Canada) for more information on using Google Cloud Print, or the Google Cloud Print website for a list of supported apps.

Wi-Fi or Wired Networking
Android Printing Using the Epson Print Enabler

You can wirelessly print your documents, emails, photos, and web pages right from your Android phone or tablet (Android v4.4 or later). With a few taps, your Android device will discover your nearby Epson product and print.

1. Connect your Epson product to your wireless network. See the link below.
2. On your Android device, download the Epson Print Enabler plug-in from Google Play.
3. Go to **Settings** on your Android device, select **Printing**, and enable the Epson plug-in.
4. Connect your Android device to the same wireless network as your product.
5. Now you are ready to print. From an Android application such as Chrome or Gmail, tap the menu icon and print whatever is on the screen.

**Note:** If you do not see your product, tap **All Printers** and select your product.

Parent topic: Product Basics

Wi-Fi or Wired Networking

Using Fire OS Printing

You can wirelessly print from Amazon Fire tablets and phones to your nearby networked Epson product. There is no software to download, no drivers to install, and no cables to connect. With just a few taps in Email, Calendar, Contacts, and WPS Office, you can send whatever is on the screen to an Epson product.

1. Connect your Epson product to your wireless network. See the link below.
2. Connect your Amazon device to the same wireless network as your product.
3. Now you are ready to print. From your Amazon application, tap the print option and select your product to print whatever is on the screen.

**Note:** If you see a message telling you that a plug-in is required, tap **OK** and tap **Download**. If your Amazon Fire product uses Fire OS 5 and above, your device automatically uses the built-in Mopria Print Service app to print.

Visit [epson.com/connect](http://epson.com/connect) (U.S), [epson.ca/connect](http://epson.ca/connect) (Canada), or [epson.com.jm/connect](http://epson.com.jm/connect) (Caribbean) to learn more about Fire OS Printing (one of many Epson Connect Partner Solutions) and check the compatibility of your mobile device.
Using Windows 10 Mobile Printing

You can wirelessly print from Windows 10 Mobile tablets and phones to your nearby networked Epson product. There is no software to download, no drivers to install, and no cables to connect. Look for the print option in your Windows 10 application to send whatever is on the screen to an Epson product.

1. Connect your Epson product to your wireless network. See the link below.
2. Connect your Windows 10 Mobile device to the same wireless network as your product.
3. Now you are ready to print. From your Windows 10 application, tap the print option and select your product to print whatever is on the screen.

Visit epson.com/connect (U.S), epson.ca/connect (Canada), or epson.com.jm/connect (Caribbean) to learn more about Windows 10 Mobile Printing (one of many Epson Connect Partner Solutions) and check the compatibility of your mobile device.

Using Epson Print and Scan App with Windows Tablets

You can use this free app to print photos and scan from your Windows (Windows 8 or higher) Surface RT or Pro tablet with networked Epson products. Epson Print and Scan App allows you to scan and capture images right to your tablet or to Microsoft OneDrive.

Note: The Epson Print and Scan App does not support Windows 10 Mobile printing.

1. Connect your Epson product to your wireless network. See the link below.
2. Download Epson Print and Scan App from the Microsoft Windows Store.
3. Connect your Windows tablet to the same wireless network as your product.
4. Open Epson Print and Scan App and select your Epson product.

Now you are ready to print photos or scan.

Visit epson.com/connect (U.S), epson.ca/connect (Canada), or epson.com.jm/connect (Caribbean) to learn more about Epson Print and Scan App.
Printing and Scanning with NFC from Your Android Device

You can easily connect your Android 4.0 or later device to your product using NFC (Near Field Communication). Once connected, you can print and scan using Epson iPrint.

1. Make sure Epson iPrint is installed on your Android device.
2. Make sure Simple AP mode or Wi-Fi Direct is enabled on your product and that you are using the default Wi-Fi Direct password.

   **Note:** NFC printing and scanning will not work if you changed the default Wi-Fi Direct password.

3. Do one of the following:
   - If you are going to print, make sure paper is loaded in the product.
   - If you are going to scan, place your original on the product for scanning.
4. Touch the NFC antenna of your Android device to the NFC tag on your product.

   **Note:** The location of your mobile device's NFC antenna varies. See your mobile device documentation for details.

Epson iPrint opens on your device.
5. Touch the NFC antenna of your Android device to the product NFC tag on your product again. The product and Android device connect.

Note: If the Android device and product disconnect, try to print or scan a document. The Android device and product should reconnect automatically.

6. If you are going to print, open the file you want to print in Epson iPrint.
7. Touch the NFC antenna of your Android device to the NFC tag on your product to start printing or scanning.

Changing or Updating Network Connections

Network Security Recommendations

To help deter unauthorized access to your product over a network, you should protect your network environment using appropriate security measures.

Security measures such as these can help deter threats such as loss of user data, use of telephone and fax lines, and other intrusions:

• Enable security on your wireless LAN

  Enable the appropriate security on the wireless LAN you plan to use with your product. Network security such as a network password can deter interception of traffic over the wireless LAN. Your router may already have a default password enabled by your Internet service provider (ISP). See your ISP and router documentation for instructions on how to change the default password and better secure your network.

• Connect your product only to a network protected by a firewall

  Connecting your product directly to the Internet may leave it vulnerable to security threats. Instead, connect it to a router or other network connection protected by a firewall. Your router may already have a firewall set up by your Internet service provider (ISP); check with your ISP for confirmation. For best results, set up and use a private IP address for your network connection.

• Change the default administrator password on your product

  If your product has an option to set an administrator password, change the default administrator password to deter access by unauthorized users to personal data stored on your product, such as IDs, passwords, and contact lists.

Parent topic: Wi-Fi or Wired Networking
Wi-Fi Infrastructure Mode Setup

You can set up your product to communicate with your computer using a wireless router or access point. The wireless router or access point can be connected to your computer over a wireless or wired network.

1 Epson product
2 Wireless router or access point
3 Computer with a wireless interface
4 Computer
5 Internet
6 Ethernet cable (used only for wired connection to the wireless router or access point)

Selecting Wireless Network Settings from the Control Panel

Parent topic: Wi-Fi or Wired Networking
Selecting Wireless Network Settings from the Control Panel

You can select or change wireless network settings using your product control panel.

To install your product on a wireless network, follow the instructions on the Start Here sheet and install the necessary software by downloading it from the Epson website. The installer program guides you through network setup.

Note: Breakdown or repair of this product may cause loss of fax and network data and settings. Epson is not responsible for backing up or recovering data and settings during or after the warranty period. We recommend that you make your own backup or print out your fax and network data and settings.

1. Press the home button, if necessary.
2. Press the icon.
   You see a screen like this:

   ![Network Connection Settings]

3. Select Router.
4. Select Start Setup or Change Settings.
5. Select Wi-Fi Setup Wizard.
6. Select the name of your wireless network or select Enter Manually to enter the name manually. Use the displayed keyboard to enter your network name.
7. Select the **Password** field and enter your wireless password using the displayed keyboard.

![Password field keyboard](image)

**Note:** The network name and password are case sensitive. Be sure to correctly enter uppercase and lowercase letters, and numeric or special characters.

- To move the cursor, select the left or right arrows.
- To change the case of letters, select .
- To delete the previous character, select .
- To enter numbers and symbols, select .
- To enter a space, select Space.

8. Select **OK** when you finish entering your password.

9. Confirm the displayed network settings and select **Start Setup** to save them.

10. If you want to print a network setup report, select **Print Check Report**. (Otherwise, select **OK**.)

11. Press the home button to exit.

   You see the 📢 icon on the LCD screen and should be able to connect to your product directly from your computer or device, and then print. If you are printing from a computer, make sure you installed the network software as described on the **Start Here** sheet.
Note: If you don’t see the 📱 icon, you may have selected the wrong network name or entered the password incorrectly. Repeat these steps to try again.

Wi-Fi Direct Mode Setup
You can set up your product to communicate directly with your computer or another device without requiring a wireless router or access point. In Wi-Fi Direct Mode, the product itself acts as a network access point for up to 4 devices.

Enabling Wi-Fi Direct Mode
You can enable Wi-Fi Direct mode to allow direct communication between your product and computer or other devices without a wireless router or access point.

1 Epson product
2 Computer with a wireless interface
3 Other wireless device

Enabling Wi-Fi Direct Mode
Parent topic: Wi-Fi or Wired Networking
1. Press the home button, if necessary.

2. Press the icon.
   You see a screen like this:

3. Select Wi-Fi Direct.

4. Scroll down and select Start Setup.

5. Select Start Setup again.
   You see a screen like this:
6. Use your computer or wireless device to select the Wi-Fi network name (SSID) displayed on the LCD screen, then enter the password shown.

7. Press the home button to exit.

You see the icon on the LCD screen and should be able to connect to your product directly from your computer or device, and then print. If you are printing from a computer, make sure you installed the network software as described on the Start Here sheet.

Note: If you don’t see the icon on the LCD screen, you may have selected the wrong network name or entered the password incorrectly. Repeat these steps to try again.

Parent topic: Wi-Fi Direct Mode Setup

Wi-Fi Protected Setup (WPS)

If your network uses a WPS-enabled wireless router or access point, you can quickly connect your product to the network using Wi-Fi Protected Setup (WPS).

Note: To check if your router is WPS-enabled, look for a button labeled WPS on your router or access point. If there is no hardware button, there may be a virtual WPS button in the software for the device. Check your network product documentation for details.

Using WPS to Connect to a Network

Parent topic: Wi-Fi or Wired Networking

Using WPS to Connect to a Network

If you have a WPS-enabled wireless router or access point, you can use Wi-Fi Protected Setup (WPS) to connect your product to the network.

1. Press the home button, if necessary.

2. Press the icon.
You see a screen like this:

![Network Connection Settings]

3. Select **Router**.
4. Select **Push Button Setup (WPS)**.
5. Follow the instructions on the LCD screen to complete WPS setup.
6. Press the home button to exit.

You see the icon on the LCD screen and should be able to connect to your product directly from your computer or device, and then print. If you are printing from a computer, make sure you installed the network software as described on the *Start Here* sheet.

**Note:** If you don’t see the icon, repeat these steps to try again.

**Parent topic:** Wi-Fi Protected Setup (WPS)

**Printing a Network Status Sheet**

You can print a network status sheet to help you determine the causes of any problems you may have using your product on a network.

1. Press the home button, if necessary.
2. Select **Settings**.
3. Select **General Settings**.
You see a screen like this:

4. Select **Network Settings** > **Network Status** > **Print Status Sheet**.
5. Select **Print** to print the sheet.

Examine the settings shown on the network status sheet to diagnose any problems you may have.

**Parent topic:** Wi-Fi or Wired Networking

### Configuring Email Server Settings

To use features such as scanning to email or forwarding faxes to email, you need to configure the email server. You can select settings for the email server using the control panel on the product.

**Note:** These settings can be locked by an administrator. If you cannot access these settings, contact your administrator for assistance.

1. Press the ⌲ home button, if necessary.
2. Select **Settings**.
3. Select **General Settings** > **Network Settings**.
You see a screen like this:

4. Scroll down and select **Advanced**.
5. Select **Email Server > Server Settings**.
   You see a screen like this:

6. Select one of the options shown above, then select the settings you want to use. Contact your internet service provider if necessary to confirm the authentication method for the email server.
7. Select **Proceed** to save your settings.
8. Select **Close** to exit.
9. Select **Connection Check** to verify the connection to the email server.

**Parent topic:** Wi-Fi or Wired Networking

**Related tasks**

Loading Paper

Before you print, load paper for the type of printing you will do.

Installing the Optional Paper Cassette Unit
Loading Paper in the Cassette
Loading Paper or Envelopes in the Rear Paper Feed Slot
Paper Loading Capacity
Double-sided Printing Capacity
Compatible Epson Papers
Paper or Media Type Settings - Printing Software
Selecting the Paper Settings for Each Source - Control Panel
Selecting Default Paper Settings - Administrator

Installing the Optional Paper Cassette Unit

You can install an optional paper cassette unit to provide more paper capacity.

1. Turn off the product, and unplug the power cord and any connected cables.

   **Warning**: To avoid electric shock, make sure you unplug the power cord.

2. Remove the paper cassette unit from its packaging and remove any protective materials.
3. Lift up your product and gently lower it onto the paper cassette unit with the corners aligned.

**Warning:** To lift the product, have two people hold it as shown here. Lifting from other areas may cause the product to fall or cause you to pinch your fingers when placing the product down.
4. Place the cassette number sticker on the cassette unit.

5. Connect the power cord and other connection cables, then plug in the product.

6. Turn on the product.

7. Pull out and reinsert the paper cassette in the optional paper cassette unit, and confirm that the cassette unit number appears on the screen.

8. Enable the optional paper cassette unit in the product software.

   Enabling the Optional Paper Cassette - Windows
   Enabling the Optional Paper Cassette - Mac

   Parent topic: Loading Paper

Enabling the Optional Paper Cassette - Windows

You need to enable the optional paper cassette unit before you can use it with the printer software.

1. Do one of the following:

   • **Windows 10**: Click \(\text{\cell{Settings}}\) and select \(\text{\cell{Devices}}\) > **Printers & scanners**. Select your product name and select **Manage** > **Printer properties**.

   • **Windows 8.x**: Navigate to the **Apps** screen and select **Control Panel** > **Hardware and Sound** > **Devices and Printers**. Right-click your product name and select **Printer properties**.
• **Windows 7:** Click and select **Devices and Printers.** Right-click your printer name and select **Printer properties.**

• **Windows Vista:** Click and select **Control Panel.** Click **Printer** under **Hardware and Sound,** then right-click your printer name and select **Properties.**

2. Click the **Optional Settings** tab.
   
   You see a window like this:

   ![EPSON Universal Print Driver Properties](image)

3. Make sure **Acquire from Printer** is selected, then click **Get.**
   
   The optional paper sources are listed in the Current Printer Information section.

4. Click **OK.**
   
   The optional paper cassette is now enabled.

**Parent topic:** Installing the Optional Paper Cassette Unit
Enabling the Optional Paper Cassette - Mac

You need to enable the optional paper cassette unit before you can use it with the printer software.

1. In the Apple menu or the Dock, select **System Preferences**.
2. Select **Print & Fax**, **Print & Scan**, or **Printers & Scanners**, select your product, and select **Options & Supplies**.
3. Select **Driver** or **Options**.

You see a screen like this:

![Setting Options](image)

4. Select the optional cassette unit you installed as the **Lower Cassette** setting.
5. Click **OK**.

The optional paper cassette is now enabled.

Parent topic: Installing the Optional Paper Cassette Unit

Loading Paper in the Cassette

You can load paper up to this size in the paper cassette: Legal (8.5 × 14 inches [216 × 356 mm])
Note: If the optional paper cassette unit is installed, do not remove more than one cassette at a time.

1. Make sure the product is not operating and pull out the paper cassette.
2. Slide the front edge guide outward all the way, then slide the side edge guides to the paper size you are using.

Note: Make sure the paper fits beneath the arrow mark inside the edge guides.

3. Load paper with the printable side facedown and slide the front edge guide against the paper.

Note: Make sure the paper fits beneath the arrow mark inside the edge guides.
4. Insert the paper cassette all the way into the product.

5. Do one of the following:
   • Select the size and type of paper you loaded on the LCD screen.
   • Press the \textbf{Paper Setting} button and select the paper source, then select the size and type of paper you loaded.
   • Select the size and type of paper you loaded in the \textit{Settings} > \textbf{General Settings} > \textbf{Printer Settings} > \textit{Paper Source Settings} > \textbf{Paper Setup} menu.

Always follow these paper loading guidelines:
   • Load only the recommended number of sheets.
   • Load paper short edge first, no matter which way your document faces.
   • Load the printable side facedown.
   • Load letterhead or pre-printed paper top edge first.
   • Do not load paper above the line underneath the arrow mark inside the edge guides.
   • Check the paper package for any additional loading instructions.

Loading Paper or Envelopes in the Rear Paper Feed Slot

Loading Paper or Envelopes in the Rear Paper Feed Slot
You can print envelopes or documents in a variety of paper types and sizes in the rear paper feed slot.
1. Open the feeder guard and pull up the paper support.

2. Slide the edge guides outward.
3. If you are inserting a stack of paper, fan the sheets and tap the stack on a flat surface to even the edges.

**Note:** You can load one sheet of binder paper with holes on one of the long edges as shown. Do not select automatic 2-sided printing for this type of paper.

4. Do one of the following:
   - Insert paper, glossy or printable side up and short edge first, in the center of the slot.

   **Caution:** To prevent paper feeding problems, make sure you do not load paper above the arrow marks inside the edge guides.
• Load envelopes short edge first, with the flap facing down and the flap edge to the left, in the center of the slot.

5. Slide the edge guides against the paper or envelopes, but not too tightly.

6. Extend the output tray.

7. Do one of the following:
   • Select the size and type of paper you loaded on the LCD screen.
• Press the Paper Setting button and select the paper source, then select the size and type of paper you loaded.
• Select the size and type of paper you loaded in the Settings > General Settings > Printer Settings > Paper Source Settings > Paper Setup menu.

Always follow these paper loading guidelines:
• Load only the recommended number of sheets.
• Load paper short edge first, no matter which way your document faces.
• Load the printable side faceup.
• Load letterhead or pre-printed paper top edge first.
• Do not load paper above the line under the arrow mark inside the edge guides.
• If you have trouble loading a stack of envelopes, press each envelope flat before loading it or load one envelope at a time.
• If print quality declines when printing multiple envelopes, try loading one envelope at a time.
• Do not load envelopes that are curled, folded, or too thin.
• Do not load windowed envelopes or envelopes with adhesive surfaces on the flaps.
• Check the paper package for any additional loading instructions.

**Double-sided Printing Capacity**

**Automatic Double-sided Printing**

You can automatically print double-sided from any paper source on the following sizes of standard and thick papers (up to 43 lb [160 g/m²]):

- Letter (8.5 × 11 inches [216 × 279 mm])
- A4 (8.3 × 11.7 inches [210 × 297 mm])
- Executive (7.25 × 10.5 inches [184 × 267 mm])
- A5 (5.8 × 8.2 inches [148 × 210 mm])
- B5 (7.2 × 10.1 inches [182 × 257 mm])

**Manual Double-sided Printing**

You can use the rear paper feed to manually print double-sided pages on the following papers:

Placing Originals on the Product

Follow the instructions here to place your original documents or photos on the product.

**Caution:** Do not place anything on top of your product or use its cover as a writing surface to avoid damaging it.

Placing Originals on the Scanner Glass
Placing Originals in the Automatic Document Feeder

Placing Originals on the Scanner Glass

You can place originals up to this size on the scanner glass: Letter (8.5 × 11 inches [216 × 279 mm]) or A4 (8.3 × 11.7 inches [210 × 297 mm]).

**Note:** When originals are placed in the ADF and on the scanner glass, priority is given to the originals in the ADF.

1. Open the document cover.
2. Place your original facedown on the scanner glass with the top facing into the corner. Slide the original to the edges of the indicated corner.

Note: The edges of your original may be cropped by 0.06 inch (1.5 mm) from the edge of the scanner glass. Manually position your original away from the edges to prevent cropping.

3. Close the document cover gently to keep your original in place.

Caution: Do not push down on the document cover or scanner glass or you may damage the product.

Placing Originals in the Automatic Document Feeder
You can place single- or multi-page original documents in the Automatic Document Feeder (ADF). You can also use the ADF to scan both sides of a 2-sided document. Make sure the originals meet the Automatic Document Feeder specifications before loading them.

Caution: Make sure your originals are not creased or folded, and do not contain holes, staples, tape, or other materials that could obstruct the feeder.

Caution: Do not place photographs or valuable artwork in the ADF. Place fragile or valuable originals on the scanner glass to avoid wrinkling or damaging them.
**Note:** When originals are placed in the ADF and on the scanner glass, priority is given to the originals in the ADF.

1. Slide the ADF edge guides outward.

2. Fan your stack of originals and tap them gently on a flat surface to even the edges.
3. Insert the originals into the ADF faceup and top-edge first.

**Note:** Do not load originals above the arrow mark on the ADF edge guide.

The **ADF** icon on the Copy, Scan, and Fax screens lights up.
4. Slide the ADF edge guide against the originals, but not too tightly. Slide the ADF edge guides against the originals, but not too tightly.

**Note:** If you are copying two originals onto one sheet, make sure the originals are loaded as shown. Select the link below to select the copy orientation setting that matches how you loaded your original.

Printing from a Computer

Before printing from your computer, make sure you have set up your product and installed its software as described on the Start Here sheet.

**Note:** If you have an Internet connection, it is a good idea to check for updates to your product software on Epson's support website. If you see a Software Update screen, select **Enable automatic checking** and click **OK**. The update scans your system to see if you have the latest product software. Follow the on-screen instructions.

Printing with Windows
Printing with the Built-in Epson Driver - Windows 10 S
Printing on a Mac
Cancelling Printing Using a Product Button

Printing with Windows

You can print with your product using any Windows application, as described in these sections.

**Note:** If you are using your Epson product with the Windows 10 S operating system, you cannot use the software described in this section. You also cannot download and install any Epson product software from the Epson website for use with Windows 10 S; you must obtain software only from the Windows Store.

Selecting Basic Print Settings - Windows

Selecting Additional Layout and Print Options - Windows
Selecting a Printing Preset - Windows
Selecting Extended Settings - Windows
Printing Your Document or Photo - Windows
Locking Printer Settings - Windows
Entering a User ID and Password for Printing
Selecting Default Print Settings - Windows
Changing Automatic Update Options

**Parent topic:** Printing from a Computer
Selecting Basic Print Settings - Windows

Select the basic settings for the document or photo you want to print.

1. Open a photo or document for printing.
2. Select the print command in your application.

   **Note:** You may need to select a print icon on your screen, the **Print** option in the **File** menu, or another command. See your application's help utility for details.

3. If necessary, select your product name as the printer you want to use.

   **Note:** You may also need to select **Properties** or **Preferences** to view your print settings.

You see the **Main** tab of your printer settings window:
4. For the **Paper Source** setting, select where you loaded the paper you want to print on.

5. Select the size of the paper you loaded as the **Document Size** setting.

   **Note:** You can also select the **User-Defined** setting to create a custom paper size.

6. Select the orientation of your document.

   **Note:** If you are printing an envelope, select **Landscape**.

7. Select the type of paper you loaded as the **Paper Type** setting.

   **Note:** The setting may not exactly match the name of your paper. Check the paper type settings list for details.

8. Select the **Quality** setting that matches the print quality you want to use.

9. Select a Color option:
   - To print a color document or photo, select the **Color** setting.
   - To print text and graphics in black or shades of gray, select the **Grayscale** setting.

10. To print on both sides of the paper, select the **2-Sided Printing** setting and select the options you want.

11. To print multiple pages on one sheet of paper, or print one image on multiple sheets of paper, select one of the settings in the **Multi-Page** menu and select the printing options you want.

12. To print multiple copies and arrange their print order, select the **Copies** options.

13. To preview your job before printing, select **Print Preview**.

14. To save your print job as a project that can be modified and combined with other print jobs, select **Job Arranger Lite**.

15. To reduce noise during printing when you select **Plain Paper/Bright White Paper**, select **On** in the **Quiet Mode** menu.

   **Note:** Enabling **Quiet Mode** may reduce printing speed.
Paper Source Options - Windows
You can select any of the available options in the Paper Source menu to print on the paper loaded in that source.

Note: **Paper Cassette 2** is available only if you have installed the optional cassette.

**Auto Select**
Automatically selects the paper source based on the selected paper size.

**Paper Cassette 1**
Selects the paper in cassette 1 as the paper source.

**Paper Cassette 2**
Selects the paper in cassette 2 as the paper source.

**Rear Paper Feed**
Selects the paper in the rear feed slot as the paper source.

Print Quality Options - Windows
You can select any of the available Quality options to fine-tune the quality of your print. Some settings may be unavailable, depending on the paper type and border setting you have chosen.

**Draft**
For draft printing on plain paper.

**Standard**
For everyday text and image printing.

**High**
For photos and graphics with high print quality.

Multi-Page Printing Options - Windows
You can select any of the available options in the Multi-Page menu to set up your multi-page print job.
2-Up and 4-Up
Prints 2 or 4 pages on one sheet of paper. Click the Page Order button to select page layout and border options.

2×1 Poster, 2×2 Poster, 3×3 Poster, 4×4 Poster
Prints one image on multiple sheets of paper to create a larger poster. Click the Settings button to select image layout and guideline options.

Parent topic: Selecting Basic Print Settings - Windows

Selecting Double-sided Printing Settings - Windows
You can print on both sides of the paper by selecting one of the 2-Sided Printing options on the Main tab.

Note: Some options may be pre-selected or unavailable, depending on other settings you have chosen or if you are accessing the product over a network.

1. Select one of the following options for 2-Sided Printing:
   - **Auto (Long-edge binding)** to print your double-sided print job by automatically flipping the paper on the long edge.
   - **Auto (Short-edge binding)** to print your double-sided print job by automatically flipping the paper on the short edge.
   - **Manual (Long-edge binding)** to print your double-sided print job by printing one side and prompting you to flip the paper over on the long edge to print the other side (recommended for paper types that do not support automatic duplexing).
   - **Manual (Short-edge binding)** to print your double-sided print job by printing one side and prompting you to flip the paper over on the short edge to print the other side (recommended for paper types that do not support automatic duplexing).

2. Click the Settings button.
3. Select the double-sided printing options you want to use.
4. Click OK to return to the Main tab.
5. Click the **Print Density** button. You see this window:

6. Select the type of document you are printing as the Document Type setting. The software automatically sets the **Adjustments** options for that document type.

7. If necessary, select the **Adjustments** options you want to use.

8. Click **OK** to return to the **Main** tab.

9. Print a test copy of your double-sided document to test the selected settings.

10. Follow any instructions displayed on the screen during printing.

   **Double-sided Printing Options - Windows**
   **Print Density Adjustments - Windows**

   **Parent topic:** Printing with Windows

   **Related tasks**
   **Selecting Basic Print Settings - Windows**

   **Double-sided Printing Options - Windows**

   You can select any of the available options on the Binding Settings window to set up your double-sided print job.
Binding Edge Options
Select a setting that orients double-sided print binding in the desired direction.

Binding Margin Options
Select options that define a wider margin to allow for binding.

Start Page
Selects whether printing starts on the front or back page.

Create Folded Booklet Options
Select the Booklet checkbox and a binding option to print double-sided pages as a booklet.

Parent topic: Selecting Double-sided Printing Settings - Windows

Print Density Adjustments - Windows
You can select any of the available options on the Print Density Adjustment window to adjust the print quality of your double-sided print job.

Print Density
Sets the level of ink coverage for double-sided printing.

Increase Ink Drying Time
Sets the amount of time required for drying ink after printing on one side of the paper before printing the other side in double-sided printing to prevent ink smearing.

Parent topic: Selecting Double-sided Printing Settings - Windows
Selecting Additional Layout and Print Options - Windows

You can select a variety of additional layout and printing options for your document or photo on the More Options tab.

1. To change the size of your printed document or photo, select the Reduce/Enlarge Document checkbox and select one of these sizing options:
   - Select the Fit to Page option to size your image to fit the paper you loaded. Select the size of your document or photo as the Document Size setting, and the size of your paper as the Output Paper setting. If you want to center your image on the paper, select the Center option.
   - Select the Zoom to option to reduce or enlarge your document or photo by a specific percentage. Select the percentage in the % menu.

2. Select one of the following Color Correction options:
   - Select Automatic to automatically adjust the sharpness, brightness, contrast, and color saturation for your image.
• Select Custom and click the Advanced button to manually adjust the color correction settings or turn off color management in your printer software.

• Select Image Options to access additional settings for improving printed images.

  Note: You can also select Color Universal Print settings.

3. To add the following features, click the Watermark Features button:
   • Watermark: adds a visible watermark to your printout
   • Header/Footer: adds information such as the date and time to the top or bottom of your printout

  Note: Click the Settings button to customize the text and location of the header or footer.

4. To add a password to your print job, select the Confidential Job checkbox, then enter a password. Confidential jobs are stored in the product's memory without being printed. To print the job, enter the password for the confidential job on the product's control panel.

  Note: Confidential print jobs are cleared from the product's memory after printing.

5. Select any of the Additional Settings options to customize your print.

Custom Color Correction Options - Windows
Image Options and Additional Settings - Windows
Header/Footer Settings - Windows

Parent topic: Printing with Windows
Custom Color Correction Options - Windows

You can select any of the available options in the Color Correction window to customize the image colors for your print job.

Color Controls

Lets you select a **Color Mode** setting, individual settings for **Brightness**, **Contrast**, **Saturation**, and **Density**, and individual color tones. Depending on the selected color mode, you can also adjust the midtone density using the **Gamma** setting.

Fix Photo

Improves the color, contrast, and sharpness of flawed photos.

**Note:** Fix Photo uses a sophisticated face recognition technology to optimize photos that include faces. For this to work, both eyes and the nose must be visible in the subject's face. If your photo includes a face with an intentional color cast, such as a statue, you may want to turn off **Fix Photo** to retain the special color effects.
ICM
Lets you manage color using installed color printing profiles.

No Color Adjustment
Turns off color management in your printer software so you can manage color using only your application software.

Parent topic: Selecting Additional Layout and Print Options - Windows

Image Options and Additional Settings - Windows
You can select any of the Image Options and Additional Settings to customize your print. Some options may be pre-selected or unavailable, depending on other settings you have chosen.

Image Options

Emphasize Text
Adjusts the weight of printed text to increase readability.

Emphasize Thin Lines
Adjusts the weight of printed lines to increase visibility.

Edge Smoothing
Smoothes jagged edges in low-resolution images such as screen captures or images from the Web.

Fix Red-Eye
Reduces or removes red-eye in photos.

Print Text in Black
Prints colored text in black.

For Color Text
Prints colored text on a background pattern or underlined.

For Color Graphs and Images
Prints colored graphics and images with overlay patterns.

For Color Text, Graphs, and Images
Prints colored text, graphics, and images with overlay patterns.

Enhancement Options
Specifies Color Universal Print enhancement settings for text, graphics, and images.

Additional Settings Options

Rotate 180°
Prints the image rotated 180° from its original orientation.
High Speed
Speeds up printing but may reduce print quality.

Mirror Image
Flips the printed image left to right.

Parent topic: Selecting Additional Layout and Print Options - Windows

Header/Footer Settings - Windows

You can select any of the Header/Footer Settings options to add headers or footers when you print. The items are available to print at the top or bottom of your pages, in either the left, right, or center of the page.

Note: These settings are not saved with your document.

You can select to print the following information:

- User Name
- Computer Name
- Date
- Date/Time
- Document Name
- Collate Number (copy number)

Note: The user name, computer name, date, and time come from the Windows Control Panel on your computer.
Selecting a Printing Preset - Windows

For quick access to common groups of print settings, you can select a printing preset on the Main or More Options tab.

Note: You can create your own preset by clicking the Add/Remove Presets button.

1. Click the Main or More Options tab.
You see the available **Printing Presets** on the left:

2. Place your cursor over one of the **Printing Presets** to view its list of settings.
3. Click on a preset to change its settings, or use any of the available options on the screen to control your printing presets.
4. To choose a preset for printing, select it.
5. Click **OK**.
Parent topic: Printing with Windows

Selecting Extended Settings - Windows

You can select additional settings that apply to all the print jobs you send to your product.

1. Access the Windows Desktop and right-click the icon for your product in the right side of the Windows taskbar, or click the up arrow and right-click.
2. Select Printer Settings.
3. Click the Maintenance tab.
   
   You see the maintenance options:

   ![Maintenance Options]

4. Click the Extended Settings button.
You see this window:

5. Select any of the extended settings to customize your print.
6. Click OK to close the Extended Settings window.
7. Click OK to close the printer software window.

Extended Settings - Windows

Extended Settings - Windows

You can select from these settings on the Extended Settings window.

Enable EPSON Status Monitor 3

Enables product monitoring for ink and paper supplies and other issues.

Check Paper Width Before Printing

Prevents printing beyond the edges of the paper if the paper size setting is incorrect; may reduce print speed.

Thick Paper and Envelopes

Prevents ink from smearing when you print on envelopes or other thick paper.
Separator Page
Before each document, prints a separator page containing the title, user, date, and time.

Always Spool RAW Datatype
Increases print speed and may solve other printing problems.

Page Rendering Mode
Increases print speed when printing is extremely slow or the print head stops during printing.

Print as Bitmap
Increases print speed when printing is extremely slow or the print head stops during printing, and other settings do not help.

Skip Blank Page
Ensures that your product does not print pages that contain no text or images.

Change Standard Resolution
Reduces the resolution of print data to correct printing problems.

Refine screening pattern
Prints graphics with a finer screening pattern.

Allow Applications to Perform ICM Color Matching
Allows applications to perform ICM color matching.

Always Use the Driver's Paper Source Setting
Prints using the paper source setting in the printer driver, rather than the setting in your application.

Output 1 page documents facedown in 2-Sided mode
Outputs single-sided pages in a 2-sided print job facedown instead of faceup.

Output documents for filing
Outputs all landscape, portrait, 1-sided, and 2-sided documents in the same orientation for easier filing.

Barcode mode
Reduces bleeding when printing barcodes on plain paper, letterhead paper, recycled paper, preprinted paper, envelopes, and thick paper.

Always Use the Driver's Color Setting
Prioritizes color settings from the printer driver software.

### Locking Printer Settings - Windows

Windows administrators can lock access to some printer settings to prevent unauthorized changes.

1. Do one of the following:
   
   - **Windows 10:** Click 📦 and select 🔄 (Settings) > Devices > Printers & scanners. Select your product name and select **Manage** > **Printer properties**.
   
   - **Windows 8.x:** Navigate to the **Apps** screen and select **Control Panel** > Hardware and Sound > Devices and Printers. Right-click your product and select **Printer properties**.
   
   - **Windows 7:** Click 📦 and select **Devices and Printers**. Right-click your product and select **Printer properties**.
• **Windows Vista**: Click 🌟 and select **Control Panel**. Click **Printer** under **Hardware and Sound**, then right-click your product and select **Properties**.

  2. Click the **Optional Settings** tab.

    **Note**: You can prevent access to the **Optional Settings** tab by changing the user or group permissions in the **Security** tab.

  3. Click **Driver Settings**.

    You see this window:

    ![Driver Settings window](image)

    4. Select the checkbox for each setting you want to lock. To lock all print settings, select **All Document Settings**.

    5. Under **Advanced Settings**, select the setting option you want to use for each locked setting.

    6. Click **OK**.

Entering a User ID and Password for Printing

If you enabled Access Control on the product, you must enter a user ID and password in the printer driver to be able to print.

**Note:** If you do not know the user ID or password, contact your administrator for assistance.

1. Access the Windows Desktop and right-click the icon for your product in the right side of the Windows taskbar, or click the up arrow and right-click . Select **Printer Settings** and click the **Maintenance** tab.

![Printer Settings and Maintenance tab](image)

2. Click the **Printer and Option Information** button.
3. Select the **Save Access Control Settings** checkbox.
4. Click the **Settings** button.
5. Enter your user name and password.
6. Click OK.

Parent topic: Printing with Windows

Selecting Default Print Settings - Windows

When you change your print settings in a program, the changes apply only while you are printing in that program session. If you want to change the print settings you use in all your Windows programs, you can select new default print settings.

1. Access the Windows Desktop and right-click the icon for your product in the right side of the Windows taskbar, or click the up arrow and right-click 📞.

2. Select Printer Settings.

You see the printer settings window:

![Printer Settings Window]

3. Select the print settings you want to use as defaults in all your Windows programs.
4. Click **OK**.
These settings are now the defaults selected for printing. You can still change them as needed for printing in any program session.

**Changing the Language of the Printer Software Screens**

**Parent topic:** Printing with Windows

**Changing the Language of the Printer Software Screens**
You can change the language used on the Windows printer software screens.

1. Access the Windows Desktop and right-click the icon for your product in the right side of the Windows taskbar, or click the up arrow and right-click.
2. Select **Printer Settings**.
You see the printer settings window.
3. Click the **Maintenance** tab.
You see the maintenance options:

![Image of printer software settings window]

Language: English (English)
4. Select the language you want to use as the **Language** setting.
5. Click **OK** to close the printer software window.

The printer software screens appear in the language you selected the next time you access them.

**Parent topic:** [Selecting Default Print Settings - Windows](#)

### Changing Automatic Update Options

Your printer software for Windows automatically checks for updates to the product software. You can change how often the software checks for updates or disable this feature.

1. Access the Windows Desktop and right-click the icon for your product in the right side of the Windows taskbar, or click the up arrow and right-click .
2. Select **Software Update Settings**.

You see this window:

![Software Update Settings](image)

3. Do one of the following:
   - To change how often the software checks for updates, select a setting in the **Check every** menu.
   - To disable the automatic update feature, select the **Never** option.
4. Click **OK** to exit.

**Note:** If you choose to disable the automatic update feature, you can check for updates manually.
Printing with the Built-in Epson Driver - Windows 10 S

You can print with the built-in Epson printer driver using any printing program on Windows 10 S, as described in these sections.

**Note:** The built-in Epson driver in Windows 10 S does not include all the available print settings for your product. To print with additional settings, download and install the Epson Print and Scan utility from the Windows Store. You cannot download and install any Epson product software from the Epson website for use with Windows 10 S; you must obtain software only from the Windows Store.

**Selecting Print Settings - Windows 10 S**

Select the settings for your print job in your Windows 10 S application.

1. Open a photo or document for printing.
2. Select the print command in your application.
3. If necessary, select your product name as the printer you want to use.

**Note:** You may need to select a print icon on your screen, the *Print* option in the *File* menu, or another command. See your application's help utility for details.

3. If necessary, select your product name as the printer you want to use.

**Note:** You may also need to select *Properties* or *Preferences* to view your print settings.
You see a window like this:

4. Select the type of paper you loaded as the **Media** setting.

   **Note:** The setting may not exactly match the name of your paper. Check the paper type settings list for details.

5. Click the **Advanced** button.
You see a window like this:

![Window with settings](image)

6. Select the size of the paper you loaded as the **Paper Size** setting.
7. To print multiple copies, select or enter the number as the **Copy Count** setting.
8. To print multiple copies of multi-page documents in sets, select the **Collated** checkbox.
9. Click **OK**.

You return to the printing preferences window.
10. Select the **Layout** tab.

11. Select the orientation of your document as the **Orientation** setting.
12. To print double-sided, select one of the **Print on Both Sides** options, depending on how you want to orient the page layout. The icon next to each option shows the layout.

13. Click **OK** to save your settings.
   
   You see your application’s **Print** window.

14. Click **OK** or **Print** to start printing.

**Parent topic:** Printing with the Built-in Epson Driver - Windows 10 S

## Printing on a Mac

You can print with your product using any Mac printing program, as described in these sections.

**Note:** If you have an Internet connection, it is a good idea to check for updates to your product software on Epson’s support website.

**Selecting Basic Print Settings - Mac**

**Selecting Page Setup Settings - Mac**
Selecting Basic Print Settings - Mac

Select the basic settings for the document or photo you want to print.

1. Open a photo or document for printing.
2. Select the print command in your application.

   **Note:** You may need to select a print icon on your screen, the Print option in the File menu, or another command. See your application's help utility for details.

3. Select your product as the **Printer** setting.

4. If necessary, click the arrow next to the Printer setting or the Show Details button to expand the print window.
You see the expanded printer settings window for your product:

![Expanded Printer Settings Window](image)

**Note:** The print window may look different, depending on the Mac OS version and the application you are using.

5. Select the **Copies** and **Pages** settings as necessary.

**Note:** If you do not see these settings in the print window, check for them in your application before printing.
6. Select the page setup options: **Paper Size** and **Orientation**.

   **Note:** If you do not see these settings in the print window, check for them in your application before printing. They may be accessible by selecting **Page Setup** from the File menu.

7. Select any application-specific settings that appear on the screen, such as those shown in the image above for the Preview application.

8. Select **Print Settings** from the pop-up menu.

![Print Settings menu](image)

You see these settings:

9. Select the **Paper Source** you wish to print from.

10. Select the type of paper you loaded as the **Media Type** setting.

   **Note:** The setting may not exactly match the name of your paper. Check the paper type settings list for details.

11. Select the **Print Quality** setting you want to use.

12. Select any of the available print options.

   - **Paper Source Options** - Mac
   - **Print Quality Options** - Mac
   - **Print Options** - Mac

**Parent topic:** Printing on a Mac
Paper Source Options - Mac

You can select any of the available options in the Paper Source menu to print on the paper loaded in that source.

Auto Select
Automatically selects the paper source based on the selected paper size.

Cassette 1
Selects the paper in cassette 1 as the paper source.

Cassette 2
Selects the paper in cassette 2 as the paper source.

Rear Paper Feed
Selects the paper in the rear feed slot as the paper source.

Parent topic: Selecting Basic Print Settings - Mac

Print Quality Options - Mac

You can select any of the available Print Quality options to fine-tune the quality of your print. Some settings may be unavailable, depending on the paper type setting you have chosen.

Draft
For draft printing on plain paper.

Normal
For everyday text and image printing.

Fine
For text and graphics with good quality and print speed.

Best Quality
For the best print quality, but the slowest print speed.

Parent topic: Selecting Basic Print Settings - Mac

Print Options - Mac

You can select any of the print options to customize your print. Some options may be unavailable, depending on other settings you have chosen.
Grayscale
Prints text and graphics in black or shades of gray.

Mirror Image
Lets you flip the printed image horizontally.

Parent topic: Selecting Basic Print Settings - Mac

Selecting Page Setup Settings - Mac

Depending on your application, you may be able to select the paper size and orientation settings from the print window.

![Paper Size and Orientation Settings](image)

**Note:** If you do not see these settings in the print window, check for them in your application before printing. They may be accessible by selecting **Page Setup** from the File menu.

1. Select the size of the paper you loaded as the **Paper Size** setting.
2. Select the orientation of your document or photo as shown in the print window.

  **Note:** If you are printing an envelope, select the icon.

**Note:** You can reduce or enlarge the size of the printed image by selecting **Paper Handling** from the pop-up menu and selecting a scaling option.

Parent topic: Printing on a Mac
Selecting Print Layout Options - Mac

You can select a variety of layout options for your document or photo by selecting **Layout** from the pop-up menu on the print window.

- To print multiple pages on one sheet of paper, select the number of pages in the **Pages per Sheet** pop-up menu. To arrange the print order of the pages, select a **Layout Direction** setting.
- To print borders around each page on the sheet, select a line setting from the **Border** pop-up menu.
- To invert or flip the printed image, select the **Reverse page orientation** or **Flip horizontally** settings.

Parent topic: Printing on a Mac

Selecting Double-sided Printing Settings - Mac

You can print on both sides of the paper by selecting **Two-sided Printing Settings** from the pop-up menu on the print window.
Note: Some options may be pre-selected or unavailable, depending on other settings you have chosen or if you are accessing the product over a network. This screen may be different, depending on the Mac OS version you are using.

1. Select one of the Two-sided Printing options.
2. Select the type of document you are printing as the Document Type setting. The software automatically sets the Adjustments options for that document type.

3. If necessary, customize the Adjustments settings as instructed on the screen.
4. Print a test copy of your double-sided document to test the selected settings.
5. Follow any instructions displayed on the screen during printing.

Double-sided Printing Options and Adjustments - Mac

Sets the level of ink coverage for double-sided printing.

**Increased Ink Drying Time**
Sets the amount of time required for drying ink after printing on one side of the paper before printing the other side in double-sided printing.

**Parent topic:** Selecting Double-sided Printing Settings - Mac

Managing Color - Mac

You can adjust the Color Matching and Color Options settings to fine-tune the colors in your printout, or turn off color management in your printer software.

1. Select **Color Matching** from the pop-up menu in the print window.

   ![Color Matching](image)

   - ColorSync
   - EPSON Color Controls

2. Select one of the available options.
3. Select **Color Options** from the pop-up menu in the print window.

![Color Options menu](image)

**Note:** The available settings on the Color Options menu depend on the option you selected on the Color Matching menu.

4. Select one of the available options.

**Color Matching and Color Options - Mac**

**Parent topic:** Printing on a Mac

**Color Matching and Color Options - Mac**

You can select from these settings on the **Color Matching** and **Color Options** menus.

**Color Matching Settings**

**EPSON Color Controls**

- Lets you manage color using controls in your printer software or turn off color management.

**ColorSync**

- Prints using standard color profiles for your product and paper to help match image colors. You can customize the conversion method and filter settings on the ColorSync pop-up menu in the print window.
Color Options Settings

Manual Settings
Lets you select manual color adjustments. Click the arrow next to Advanced Settings and select settings for Brightness, Contrast, Saturation, and individual color tones. You can also select a color Mode setting for printing photos and graphics and the Fix Red-Eye setting to reduce or remove red-eye in photos. Depending on the selected color mode, you can also adjust the midtone density using the Gamma setting.

Fix Photo
Improves the color, contrast, and sharpness of flawed photos. Click the arrow next to Advanced Settings and select the Fix Red-Eye setting to reduce or remove red-eye in photos.

Note: Fix Photo uses a sophisticated face recognition technology to optimize photos that include faces. For this to work, both eyes and the nose must be visible in the subject’s face. If your photo includes a face with an intentional color cast, such as a statue, you may want to turn off Fix Photo to retain the special color effects.

Off (No Color Adjustment)
Turns off color management in your printer software so you can manage color using only your application software.

Note: An ICC profile is required if color management is turned off.

Parent topic: Managing Color - Mac

Selecting Printing Preferences - Mac
You can select printing preferences that apply to all the print jobs you send to your product.

1. In the Apple menu or the Dock, select System Preferences.
2. Select Print & Fax, Print & Scan, or Printers & Scanners, select your product, and select Options & Supplies.
3. Select Driver or Options.
You see a screen like this:

4. Select any of the available printing preferences.
5. Click OK.

Printing Preferences - Mac

Parent topic: Printing on a Mac

Printing Preferences - Mac

You can select from these settings on the **Options** or **Driver** tab.

**Thick Paper and Envelopes**
Prevents ink from smearing when you print on envelopes or other thick paper.

**Skip Blank Page**
Ensures that your product does not print pages that contain no text or images.

**Quiet Mode**
Lessens noise during printing but may decrease print speed.

**Permit temporary black printing**
Allows you to print using black ink when color ink is expended.
High Speed Printing
Speeds up printing but may reduce print quality.

Output documents for filing
Outputs all landscape, portrait, 1-sided, and 2-sided documents in the same orientation for easier filing.

Warning Notifications
Lets you choose whether or not to receive warning notifications from the printer software for various operating conditions.

Establish bidirectional communication
Allows the product to communicate with the computer. Do not change the default setting unless you experience issues when using a shared printing pool.

Lower Cassette
Specifies whether the optional cassette is present.

Starting a Scan Using the Product Control Panel

You can scan an image to a variety of destinations using your product's control panel.

1. Make sure you installed the product software and connected the product to your computer or network.

   Note: Restart your computer after installing the product software to enable scanning from the control panel.

2. Place your original on the product for scanning.

   Note: To scan a double-sided or multi-page document, place your originals in the ADF.

3. Press the home button, if necessary.

4. Select Scan.
You see a screen like this:

You see a screen like this:

5. Select one of the following **Scan to** options:
   - **Network Folder/FTP** saves your scan file to a specified folder on a network.
   - **Email** lets you send scanned files through a pre-configured email server.
   - **Document Capture Pro** lets you scan over a network using your saved job settings in Document Capture Pro or Document Capture.

   **Note:** You cannot use this option to scan an image to Document Capture or Document Capture Pro when your product is connected to your computer's USB port.

   - **Memory Device** saves your scan file on a USB device inserted in your product's external USB port and lets you select the file format, quality, and other settings.
   - **Cloud** sends your scanned files to a destination that you have registered with Epson Connect.
   - **Computer (WSD)** lets you manage network scanning in Windows 10, Windows 8.x, Windows 7, or Windows Vista (English only). To use this feature on Windows 7 or Windows Vista, you must first set up WSD (Web Services for Devices) on the computer.

6. Follow the instructions in the links below to complete your scan.

   **Scanning to a Network Folder or FTP Server**
   **Scanning to Email**
   **Adding and Assigning Scan Jobs with Document Capture Pro - Windows**
   **Adding and Assigning Scan Jobs with Document Capture - Mac**
Scanning to a Network Folder or FTP Server
You can scan an image and save it to a network folder using your product's control panel. You can either enter the folder path directly on the product's control panel or select a folder from the Contacts list.

**Note:** Make sure the date and time are set correctly before using this feature.

1. Place your original on the product for scanning.

   **Note:** To scan a double-sided or multi-page document, place your originals in the ADF.

2. Press the home button, if necessary.

3. Select Scan.
You see a screen like this:

![Screen with options]

4. Select **Network Folder/FTP**.

You see a screen like this:

![Destination screen]

5. Do one of the following:
   - Select from any displayed frequent contacts.
   - Select **Keyboard**, select the **Communication Mode** field, and select **Network Folder (SMB)** or **FTP**. Then select the **Location** field and enter the folder location, and press **OK**. Enter other information as necessary.
Enter the folder path name for the **Location** setting in one of the following formats depending on the **Communication Mode** setting you selected:

- **SMB**: `\host name\folder`
- **FTP**: `ftp://host name/folder name`
- Select **Contacts** and choose a saved folder from the **Contacts** list.

6. Select **Scan Settings**.
7. Select **File Format** to choose the file format for your scan.
8. Scroll down and change the **File Name** setting, if necessary.
9. Select any additional scan settings as necessary.
10. Select **Presets** to save your scan settings.

**Note:** Presets can be locked by an administrator. If you cannot access or change this setting, contact your administrator for assistance.

11. Press the **Save** icon.
    
    Your product scans your original and saves it in the selected location.

**Parent topic:** Starting a Scan Using the Product Control Panel

**Scanning to Email**

You can scan an original and email the scanned file using your product's control panel. You need to have a preconfigured email server before you can scan to email. You can either enter the email address directly on the product's control panel or select an address from the **Contacts** list. Make sure the date and time are set correctly so the time stamps on your emails are accurate.

**Note:** You can also use the Scan to Document Capture Pro function to scan and email the scanned file.
1. Place your original on the product for scanning.
   
   **Note:** To scan a double-sided or multi-page document, place all of the pages in the ADF.

2. Press the home button, if necessary.
3. Select **Scan**.
   
   You see a screen like this:

![Scan to](image1)

4. Select **Email**.
   
   You see a screen like this:

![Select Recipient](image2)
5. Do one of the following:
   • Select from any displayed frequent contacts.
   • Select **Keyboard** to use the displayed keyboard to enter the address for the recipient and press **OK**.
   • Select **Contacts** and choose an email address from the **Contacts** list.
   • Select **History** to choose an email address from your recent scan history.

6. Select **Scan Settings**.

7. Select **File Format** to choose the file format for your scan.

8. Scroll down and change the **Subject** and **File Name** settings, if necessary.

9. Select any additional scan settings as necessary.

10. Select **Presets** to save your scan settings.

   **Note:** Presets can be locked by an administrator. If you cannot access or change this setting, contact your administrator for assistance.

11. Press the **Send** icon.

    Your product scans your original and emails the scanned file.

### Adding and Assigning Scan Jobs with Document Capture Pro - Windows

You can use Document Capture Pro to create, edit, and delete scan jobs. Scan jobs allow you to save commonly-used scanning options. You can also determine which scan jobs are listed when you scan to Document Capture Pro using the control panel on your product.

**Note:** The settings may vary, depending on the software version you are using. See the help information in Document Capture Pro for details.
1. Do one of the following to start Document Capture Pro:
   - **Windows 10**: Click ⬅️ and select Epson Software > Document Capture Pro.
   - **Windows 8.x**: Navigate to the Apps screen and select Document Capture Pro.
   - **Windows (other versions)**: Click ☁️ or Start, and select All Programs or Programs. Select Epson Software > Document Capture Pro.

   You see the Document Capture Pro window.

2. If you see a **Switch to Simple View** button in the upper right corner of the window, click it.
   You see a window like this:

3. Click the **Job Settings** button.

   **Note**: If you do not see the button, click the < symbol in the Job bar.
1. You see a window like this:

![Image of Document Capture Pro interface]

4. To add a scan job, click the **New Job** icon, enter a name for the new job, select settings as necessary, and click **OK**.
   You can now use the new scan job when you scan with Document Capture Pro.

   **Note:** See the Help information in Document Capture Pro for details.

5. To add the scan job to the list of selectable jobs when scanning to Document Capture Pro from the control panel, click the **Button Assignment** icon.

6. Select the job that you want to add to the list from the drop-down list.

   **Note:** You can assign scan jobs to each available button assignment. The order of the assigned scan jobs is also the order in which the scan jobs appear on the control panel.

7. Click **OK**, then click **OK** again.
You can now select the assigned scan job when you scan to Document Capture Pro using your product's control panel.

### Starting a Scan Using the Epson Scan 2 Icon

You can start the Epson Scan 2 program to select scan settings, scan, and save the scanned image to a file.

**Note:** If you are using your Epson product with the Windows 10 S operating system, you cannot use the software described in this section. You also cannot download and install any Epson product software from the Epson website for use with Windows 10 S; you must obtain software only from the Windows Store.

- **Windows 10:** Click 🔄 and select **EPSON** > **Epson Scan 2**.
- **Windows 8.x:** Navigate to the **Apps** screen and select **Epson Scan 2**.
- **Windows (other versions):** Click 📱 or **Start**, and select **All Programs** or **Programs**. Select **EPSON** > **Epson Scan 2** > **Epson Scan 2**.
• **Mac**: Open the **Applications** folder, open the **Epson Software** folder, and select **Epson Scan 2**. You see an Epson Scan 2 window like this:

![Epson Scan 2 window](image)

**Parent topic**: Starting a Scan
Starting a Scan from a Scanning Program

You can start Epson Scan 2 from a TWAIN-compliant scanning program to select scan settings, scan, and open the scanned image in the program.

**Note:** If you are using your Epson product with the Windows 10 S operating system, you cannot use the software described in this section. You also cannot download and install any Epson product software from the Epson website for use with Windows 10 S; you must obtain software only from the Windows Store.

1. Open your scanning program and select its scanning option. (See your scanning program help for instructions.)
2. Select your product.

**Note:** In certain programs, you may need to select your product as the "source" first. If you see a **Select Source** option, choose it and select your product. With Windows, do not select a **WIA** option for your product; not all scan functions will be available.
You see an Epson Scan 2 window like this:

![Epson Scan 2 window](image)

Parent topic: Starting a Scan

**Starting a Scan from a Smart Device**

You can start a scan from a smart device using the Epson iPrint app. You can save the scanned document to your device or a cloud service, e-mail it, or print it.
Note: If you are using your Epson product with the Windows 10 S operating system, you cannot use the software described in this section. You also cannot download and install any Epson product software from the Epson website for use with Windows 10 S; you must obtain software only from the Windows Store.

Note: Your device must be connected to the same wireless network as your Epson product. If you have an NFC-enabled device, you can also scan with the Epson iPrint app by placing the device against the NFC tag on the front of the product.

1. Download the Epson iPrint app from your device’s app store or from Epson’s website.
2. Place your original on the product for scanning.
3. Open the Epson iPrint app and select your product.
4. Select the scan settings and scan your original.
5. Save your scanned image to a file or cloud location.

### Scanning with Document Capture Pro in Simple View

You can use Document Capture Pro in Simple View to quickly select options and scan.

**Note:** The settings may vary, depending on the software version you are using. See the help information in Document Capture Pro for details.

1. Load your original in the product.
2. Do one of the following to start Document Capture Pro:
   - **Windows 10:** Click 📐 and select **Epson Software > Document Capture Pro**.
   - **Windows 8.x:** Navigate to the **Apps** screen and select **Document Capture Pro**.
   - **Windows (other versions):** Click 🌎 or **Start**, and select **All Programs** or **Programs**. Select **Epson Software > Document Capture Pro**.
You see the Document Capture Pro window. (You may see a screen asking you to select your scanner first; if you do, select your product.)

3. If you see a **Switch to Simple View** button in the upper right corner of the window, click it.

You see a window like this:

![Document Capture Pro window](image)

4. Click **Select Scanner** and select your scanner from the scanner list, if necessary.

5. If you want to use a scan job, click one of the job icons in the **Job** section of the window to complete and send your scan with one click.

   **Note:** If you do not see any icons, click the `<` symbol in the **Job** bar.
6. If you want to select scan settings for a particular destination, click the Scan Settings button, select any displayed settings you want to use, and click OK.

**Note:** See the help information in Document Capture Pro for details. If you do not see the Scan Settings button, click the < symbol in the Scan and... bar.

![Scan Settings dialog box](image)

7. Click one of the destination icons in the Scan and... section of the window. Your product starts scanning and you see the settings window.

8. Select any destination settings as necessary and click OK.

**Note:** See the help information in Document Capture Pro for details.

9. Confirm your settings and click OK or Close.

**Parent topic:** Scanning with Document Capture or Document Capture Pro
Scanning with Document Capture Pro in Standard View

You can use Document Capture Pro in Standard View to select settings, preview, and change the scanned file settings as necessary.

Note: The settings may vary, depending on the software version you are using. See the help information in Document Capture Pro for details.

1. Load your original in the product.
2. Do one of the following to start Document Capture Pro:
   • **Windows 10**: Click and select Epson Software > Document Capture Pro.
   • **Windows 8.x**: Navigate to the Apps screen and select Document Capture Pro.
   • **Windows (other versions)**: Click or Start, and select All Programs or Programs. Select Epson Software > Document Capture Pro.

   You see the Document Capture Pro window. (You may see a screen asking you to select your scanner first; if you do, select your product.)

3. If you see a **Switch to Standard View** button in the upper right corner of the window, click it.

   You see a window like this:
4. Select *Scan Settings* from the Scan Setting Name list (or select *Scan > Scan Settings* from the menu bar).

   You see a window like this:

   ![Scan Settings window](image)

5. Select any displayed settings you want to use and click **OK**.

   **Note:** See the help information in Document Capture Pro for details.

6. Click **Scan**.
You see a preview of your scan in the Document Capture Pro window.

![Document Capture Pro window](image)

**Note:** You may have to close the Epson Scan 2 window to view your scan in the Document Capture Pro window.

7. If you would like to scan additional originals and add them to the current captured images, click the 
   ![Add Page(s) icon](image) and follow the instructions on the screen.

8. Check the scanned images and edit them as necessary.

   **Note:** See the help information in Document Capture Pro for details.

9. Click one of the Destination icons to choose where to send your scanned files. (If you cannot see all of the icons below, click the arrows next to the icons.)

![Destination icons](image)

10. Depending on the destination you chose, click **OK** or **Send** to complete the scan.

**Parent topic:** Scanning with Document Capture or Document Capture Pro
Scanning with Document Capture - Mac

When you scan with Document Capture, the program automatically saves your scanned file on your computer in the folder you specify. You can select settings, preview, and change the scanned file settings as necessary.

**Note:** The settings may vary, depending on the software version you are using. See the Help information in Document Capture for details.

1. Load your original in the product.
2. Open the Applications folder, open the Epson Software folder, and select Document Capture.
   
   You see a window like this:

   ![Document Capture window](image)

   **Note:** You may need to select your scanner from the scanner list.

3. Click the Scan icon.
You see a window like this:

![Scan Settings Window](image)

**Note:** If you want to use a scan job that you created instead, select it from the Job list in the Document Capture window, click the Start Job button, and skip the rest of these steps.

4. Select any displayed scan settings you want to use.

   **Note:** See the Help information in Document Capture for details.

5. If you want to select detailed scan settings, close the Scan Settings window, open the Scan menu at the top of the Mac desktop, and select **Displays the EPSON Scan Setup Screen**.

6. Click the Scan icon and select any detailed scan settings you want to use from the Epson Scan 2 window.

7. Click **Scan**.
You see a preview of your scan in the Document Capture window.

![Document Capture window preview](image)

**Note:** You may have to close the Epson Scan 2 window to view your scan in the Document Capture window.

8. If you would like to scan additional originals and add them to the current captured images, click the + icon, select **Acquire from Scanner**, and repeat the previous steps.
9. Check the scanned images and edit them as necessary.
10. Click one of the Destination icons to choose where to send your scanned files. (If you cannot see all of the icons below, click the arrow next to the icons.)

![Destination icons](image)

11. Depending on the destination you chose, click **OK** or **Send** to complete the operation.

**Parent topic:** Scanning with Document Capture or Document Capture Pro
Scanning in Epson Scan 2

Epson Scan 2 automatically scans your document and saves the scanned file in PDF format in your operating system's Documents or My Documents folder, or opens it in your scanning program. You can select settings, preview, and change the scanned file settings as necessary.

**Note:** If you are using your Epson product with the Windows 10 S operating system, you cannot use the software described in this section. You also cannot download and install any Epson product software from the Epson website for use with Windows 10 S; you must obtain software only from the Windows Store.

1. Start Epson Scan 2.
You see this window:

2. Select the **Document Source** setting that matches where you placed your original, or select **Auto Detect** to have Epson Scan 2 automatically detect the source.

3. Select the **Scanning Side** setting if you are scanning from the ADF.
4. Select the **Document Size** setting that matches the size of your original, or select **Auto Detect** to have Epson Scan 2 automatically detect the size. You can select **Customize** to enter a custom size, if necessary.

5. Select the image type of your original and how you want it scanned as the **Image Type** setting.

6. Select the **Resolution** setting you want to use for your scan.

7. Click the **Preview** button.

   Epson Scan 2 previews your original and displays the results in the Epson Scan 2 window.

8. Reinsert your original into the ADF, if necessary.

9. Click the **Advanced Settings** tab and select any settings that you want to use.

10. Select the format in which you want to save your scanned file as the **Image Format** setting. If necessary, select **Options** and select any desired format options.

11. Enter the file name for your scanned file in the **File Name** field. If necessary, select **Settings** to modify the file name settings.

12. Select the location in which you want to save your scanned file as the **Folder** setting. If necessary, select **Select** to create a new folder.

13. Click **Scan**.

   The product scans your original and saves the scanned file in the location you specified.
Available Document Source Settings

You can select these Document Source options in Epson Scan 2:

**Auto Detect**
- Automatically detects where the originals are placed on your product for scanning.

**ADF**
- Selects the Automatic Document Feeder as the location where the originals are placed on your product for scanning.

**Scanner Glass**
- Selects the scanner glass as the location where the originals are placed on your product for scanning.

Parent topic: Scanning in Epson Scan 2

Additional Scanning Settings - Main Settings Tab

You can select these additional scanning settings on the Epson Scan 2 Main Settings tab. Not all adjustment settings may be available, depending on other settings you have chosen.

**After Scanning Option**
- When scanning multi-page originals, lets you add additional pages or add and edit the pages in a job and save all of the scanned pages as one file.

**Note:** You must select a file format that supports multi-page such as PDF or Multi-TIFF.

**Stitch Images**
- When scanning double-sided originals, lets you lay out images from both sides of the original onto one scanned page.

**Rotate**
- Rotates the original image clockwise to the desired angle before scanning it. Select Auto to allow your product to automatically rotate the image based on the orientation of the text (may take longer to scan).
Correct Document Skew
Corrects skewed originals, image contents, or both.

Add or edit pages after scanning
Lets you add, remove, or edit the pages in a scan, including rotating pages and changing the page order.

Note: To save multiple pages in a single file, you must select a file format that supports multiple pages such as PDF or Multi-TIFF. If you select another file format, each scanned image or page is saved as a separate file.

Skip Blank Pages
If the scanner detects marks from the other side of a blank page and adds the marks to the scanned image, adjust this setting to prevent this.

Parent topic: Scanning in Epson Scan 2

Additional Scanning Settings - Advanced Settings Tab
You can select these additional scanning settings on the Epson Scan 2 Advanced Settings tab. Not all adjustment settings may be available, depending on other settings you have chosen.

Remove Background
Removes the background of the originals.

Text Enhancement
Sharpens the appearance of letters in text documents.

Auto Area Segmentation
Makes black and white images clearer and text recognition more accurate by separating the text from the graphics.

Threshold
Adjusts the level at which black areas in text and line art are delineated, improving text recognition in OCR (Optical Character Recognition) programs.

Color Enhance
Enhances the shades of the color you select in the scanned image. This setting is available only if you select Grayscale or Black & White as the Image Type setting.

Brightness
Adjusts the overall lightness and darkness of the scanned image.

Contrast
Adjusts the difference between the light and dark areas of the overall scanned image.
Gamma
Adjusts the midtone density of the scanned image.

Unsharp Mask
Makes the edges of certain image areas clearer. Turn off this option to leave softer edges.

Descreening
Removes the ripple pattern that might appear in subtly shaded image areas, such as skin tones. This option improves results when scanning magazines or newspapers. (The results of descreening do not appear in the preview image, only in your scanned image.)

Edge Fill
Corrects shadowing around the edges of the image by filling the shadows with black or white.

Dual Image Output
Scans the original image twice using different output settings (Windows only).

Parent topic: Scanning in Epson Scan 2

Saving Scanned Documents as a Searchable PDF Using Epson Scan 2
You can scan a document and save the text in a searchable PDF. In a searchable PDF, text is recognized using Optical Character Recognition (OCR) and then embedded in the scanned original.

**Note:** The required Epson Scan 2 OCR Component is installed automatically when you install your product software as instructed on the Start Here sheet. If you install your scanner software programs individually, be sure to also install this component if you want to perform OCR.

1. Load your original in the product for scanning.
2. Start Epson Scan 2.
3. Select your scan settings.
4. Click **Preview** and adjust the area you want to scan, if necessary.
5. If you are using the ADF, reload the ejected original.
6. Select **Searchable PDF** as the Image Format setting.
7. Select **Options** from the Image Format list.
You see this window:

8. Select any of the options on the **General** tab.
9. Select the **Text** tab.
10. Make sure the language used in the document text is selected as the **Text Language** setting.
11. Select the **Security** tab if you want to add a password to the PDF or protect printing or editing properties.
12. Click **OK**.
13. Confirm the **File Name** setting and select a **Folder** setting for your document.
14. Click **Scan**.
   The scanned image is saved as a searchable PDF.

**Parent topic:** [Scanning in Epson Scan 2](#)

**Image Format Options**

You can select different image formats and related options. For details on available options, click the ? icon on the Epson Scan 2 Image Format Options window. Not all image formats have options.
**Bitmap (*.bmp)**
A standard image file format for most Windows programs.

**JPEG (*.jpg)**
An image format that lets you highly compress image data. However, the higher the compression, the lower the image quality. (The TIFF format is recommended when you need to modify or retouch your scanned image.)

**PNG (*.png)**
An image format that does not lose quality during editing.

**TIFF (*.tif)**
A file format created for exchanging data between many programs, such as graphic and DTP software.

**Multi-TIFF (*.tif)**
A TIFF file format when multiple pages are saved to the same file, allowing you to edit the images using a compatible program.

**PDF (*.pdf)**
A document format that is readable by Windows and Mac systems using Adobe Reader, Acrobat, or other programs. You can save multi-page documents in one PDF file.

**Searchable PDF (*.pdf)**
A document format that is readable by Windows and Mac systems using Adobe Reader, Acrobat, or other programs. You can save multi-page documents in one PDF file. Recognized text in the scanned document can be searched.

---

**Scan Resolution Guidelines**

The **Resolution** setting, measured in dpi (dots per inch), controls the amount of detail captured in your scans. Increasing the resolution raises the amount of detail captured but comes with the following disadvantages:

- Larger file sizes
- It takes longer to scan your originals, send/receive your scans by email or fax, and to print your scans
- The image may become too large to fit on your display or print on paper

If you plan to enlarge a scanned image so you can print it at a larger size, you may need to increase the resolution from the default resolution set by Epson Scan 2. Follow these guidelines to determine the resolution setting you need:

- You will scan the image at its original size but enlarge it later in an image-editing program.
Increase the Epson Scan 2 Resolution setting in your scan. Increase the resolution by the same amount you will increase the image size to retain a high image quality. For example, if the resolution is 300 dpi (dots per inch) and you will double the image size later, change the Resolution setting to 600 dpi.

- You will scan the image at 100% or smaller size.

Select the Epson Scan 2 Resolution setting based on how you will use the scanned image:
- Email/view on a computer screen/post on the web: 96 to 200 dpi
- Print/fax/convert to editable text (OCR)/create searchable PDF: 200 to 300 dpi

**Parent topic:** Scanning in Epson Scan 2

## Scanning Special Projects

Your product's scanning software offers various options to help you quickly complete special scan projects.

- **Scanning to a SharePoint Server or Cloud Service - Windows**
- **Scanning to a SharePoint Server or Cloud Service - Mac**
- **Scanning Multi-Page Originals as Separate Files - Windows**

**Parent topic:** Scanning

## Scanning to a SharePoint Server or Cloud Service - Windows

You can use Document Capture Pro (Windows) to upload scanned images to a SharePoint server or a cloud service.

**Note:** The settings may vary, depending on the software version you are using. See the help information in Document Capture Pro for details.

1. Load your original in the product.
2. Do one of the following to start Document Capture Pro:
   - **Windows 10:** Click \( \text{Start} \) and select **Epson Software > Document Capture Pro.**
   - **Windows 8.x:** Navigate to the **Apps** screen and select **Document Capture Pro.**
   - **Windows (other versions):** Click \( \text{Start} \) or **Start**, and select **All Programs** or **Programs**. Select **Epson Software > Document Capture Pro.**
3. If you see a **Switch to Simple View** button in the upper right corner of the window, click it.
You see a window like this:

![Scan Settings window](image)

4. Click the **Scan Settings** button.

   **Note:** If you do not see any icons, click the `<` symbol in the **Job** bar.
You see a window like this:

5. Select any displayed settings you want to use and click **OK**.

**Note:** See the help information in Document Capture Pro for details.

6. Click one of the cloud server or service destination icons in the **Scan and...** section of the window. Your product starts scanning and you see the settings window.

**Note:** If you cannot see all of the icons, the service software may not be installed or the service may not be available on your platform.

7. Enter any required information to set up the destination. You may need to log in to your cloud service to authenticate the connection and allow Document Capture Pro to access the cloud service. If you have previously created a saved setting for the destination, select it from the drop-down list.
8. Adjust any settings and click **OK**.

**Note:** See the help information in Document Capture Pro for details.

Your originals are uploaded to the indicated server or cloud service.

**Parent topic:** Scanning Special Projects

### Scanning to a SharePoint Server or Cloud Service - Mac

You can use Document Capture to upload scanned images to a SharePoint server or a cloud service.

1. Open the **Applications** folder, open the **Epson Software** folder, and select **Document Capture**.
   
   ![Document Capture window](image)

   **Note:** You may need to select your scanner from the scanner list.

2. Click the **Scan** icon.

3. Select any displayed scan settings you want to use.

   **Note:** See the Help information in Document Capture for details.

4. Click **Scan**.
You see a preview of your scan in the Document Capture window.

5. Click one of the cloud service Destination icons to choose where to save your scanned file. (If you cannot see all of the icons, the service software may not be installed, the service may not be available on your platform, or you need to click the arrow next to the icons.)

You see the Transfer Settings window.

6. Enter any required information to set up the destination. You may need to log in to your cloud service to authenticate the connection and allow Document Capture to access the cloud service. If you have previously created a saved setting for the destination, select it from the drop-down list.

7. Adjust any save settings, then click **OK** or **Send**, depending on the destination.

Your originals are scanned and uploaded to the indicated server or cloud service.

Parent topic: Scanning Special Projects

### Scanning Multi-Page Originals as Separate Files - Windows

You can use Document Capture Pro (Windows) to scan multi-page originals as separate scanned files. You indicate how the separate files are created by defining a maximum page count per file or by inserting blank pages, barcodes, or characters that can be detected by the software as separation markers.

**Note:** The settings may vary, depending on the software version you are using. See the help information in Document Capture Pro for details.

1. Load your multi-page original in the product.
2. Do one of the following to start Document Capture Pro:
   - **Windows 10:** Click and select **Epson Software > Document Capture Pro**.
   - **Windows 8.x:** Navigate to the Apps screen and select **Document Capture Pro**.
   - **Windows (other versions):** Click or Start, and select **All Programs** or **Programs**. Select **Epson Software > Document Capture Pro**.

You see the Document Capture Pro window.

3. If you see a **Switch to Simple View** button in the upper right corner of the window, click it.
You see a window like this:
4. Click the Scan Settings button.
   You see a window like this:

   ![Scan Settings window]

5. Select any displayed settings you want to use and click OK.
   
   **Note:** See the help information in Document Capture Pro for details.

6. Click one of the destination icons (except Print) in the Scan and... section of the window. Your product starts scanning and you see the settings window.

7. Select the Apply job separation checkbox.

8. Click Separation Settings.
You see a window like this:

![Job Separation Settings](image)

9. Select the method you used to separate the originals as the **Separator** setting.

   **Note:** See the help information in Document Capture Pro for details.

10. If necessary, select **Create Folder** and select a folder name.

11. Select any other folder naming settings you want and click **OK**, then click **OK** again.

    Your originals are saved into separate files and folders as specified.

**Parent topic:** [Scanning Special Projects](#)
Faxing

See these sections to fax using your product.

**Note:** This product allows you to store names, telephone numbers, and fax data in its memory even when the power is turned off. Make sure you restore all of the default settings if you give away or dispose of the product. This will erase all of your network settings and fax data.

Connecting a Telephone or Answering Machine
Setting Up Fax Features
Setting Up Contacts and Contact Groups
Sending Faxes
Receiving Faxes
Checking Fax Status
Printing Fax Reports

**Connecting a Telephone or Answering Machine**

You must connect your product to a telephone wall jack to send or receive faxes. If you want to use the same telephone line to receive calls, you can connect a telephone or answering machine to your product using an additional phone cable.
1. Connect a phone cable to your telephone wall jack and to the **LINE** port on your product.

**Note:** If you have a DSL or ISDN connection, you must connect the appropriate DSL filter, or ISDN terminal adapter or router to the wall jack to be able to use the line for faxing or voice calls using your product. Contact your DSL or ISDN provider for the necessary equipment.
2. If you are connecting a telephone or answering machine to your product using a second phone cable, remove the cap from the **EXT** port on your product.

3. Connect a second phone cable to your telephone or answering machine and to the **EXT** port on your product.
**Note:** If you connect an answering machine and Receive Mode is set to **Auto**, set the number of rings before your product answers a call to a number that is higher than your answering machine's setting for the number of rings.

Any phone or answering machine must be connected to the **EXT** port for your product to detect an incoming fax call when the phone is picked up. Epson cannot guarantee compatibility with VoIP, cable phone systems, or fiberoptic digital services such as FIOS.

**Parent topic:** Faxing

**Related tasks**

Receiving Faxes Automatically

Setting Up Fax Features

Before faxing with your product, set up your fax header and select the fax features you want to use.

**Note:** If you leave your product unplugged for a long period of time, you may need to reset the date and time settings for faxes.

**Setting Up Basic Fax Features**

See these sections to select the basic settings you need to use the product's fax features.

Using the Fax Setting Wizard

Selecting the Line Type

Setting the Number of Rings to Answer

**Parent topic:** Setting Up Fax Features

**Using the Fax Setting Wizard**

You can setup the product’s basic fax settings using the Fax Setting Wizard. This wizard is automatically displayed when the product is turned on for the first time. You can also change these settings individually from the Fax Settings menu.

1. Press the home button, if necessary.
2. Select **Settings > General Settings > Fax Settings > Fax Setting Wizard**.
   You see the following screen:

   ![Confirmation screen](image)

   Connect a phone line and touch Proceed.

   ![Proceed button](image)

3. Connect your phone line and select **Proceed**

4. On the next screen, use the displayed keypad to enter the sender name for your fax source, such as your name or a business name. You can enter up to 40 characters. Select **OK** when complete.

5. On the next screen, use the displayed keypad to enter your fax number, up to 20 characters. Select **OK** when complete.

   **Note:** The name and phone number in the fax header identifies the source of the faxes you send.

6. On the Distinctive Ring Setting screen, do one of the following:
   - If you have subscribed to a distinctive ring service from your telephone company, select **Proceed**. Select the ring pattern to be used for incoming faxes.
   - If you do not have a distinctive ring service, select **Skip**.

   **Note:** Distinctive ring services allows you to have several phone numbers on one phone line. Each number is assigned a different ring pattern. You can use one number for voice calls and another for fax calls. Select the ring pattern assigned to fax calls in the Distinctive Ring Setting. If you select a ring pattern other than **All**, Receive Mode is automatically set to **Auto**.

7. On the Receive Mode Setting screen, do one of the following:
   - If you have connected an external telephone or answering machine to the product, select **Yes**.
• If you did not connect an external telephone or answering machine, select **No**. (Receive Mode is automatically set to **Auto**; otherwise you cannot receive faxes.)

8. On the next Receive Mode Setting screen, select **Yes** to receive faxes automatically or select **No** to receive faxes manually.

   **Note:** If you connect an external answering machine and select to receive faxes automatically, make sure the **Rings to Answer** setting is correct. If you select to receive faxes manually, you need to answer every call and operate the product’s control panel or your phone to receive faxes.

9. On the Proceed screen, confirm the displayed settings and select **Proceed**, or press the back arrow to change the settings.

10. On the Run Check Fax Connection screen, select **Start Checking** and follow the on-screen instructions to check the fax connection and print a report of the check result. If there are any errors reported, try the solutions on the report and run the check again.

   If the Select Line Type screen appears, select the correct line type.

   If the Select Dial Tone Detection screen appears, select **Disable**. However, disabling the dial tone detection function may drop the first digit of a fax number and send the fax to the wrong number.

   **Parent topic:** Setting Up Basic Fax Features

**Related tasks**

- Entering Characters on the LCD Screen

**Selecting the Line Type**

If you connect the product to a PBX phone system or terminal adapter, you must change the product's line type. PBX (Private Branch Exchange) is used in office environments where an external access code such as “9” must be dialed to call an outside line. The default Line Type setting is PSTN (Public Switched Telephone Network), which is a standard home phone line.

1. Press the ‪ home button, if necessary.

2. Select **Settings > General Settings > Fax Settings > Basic Settings > Line Type > PBX**.
You see a screen like this:

3. Select **Access Code** and select **Use**.
4. Select the **Access Code** field and use the displayed keypad to enter the access code, such as 9. Then select **OK**.
5. Select **OK** to exit.

**Parent topic:** Setting Up Basic Fax Features

**Related tasks**
- Entering Characters on the LCD Screen

### Setting the Number of Rings to Answer

If you connect an external answering machine and select to receive faxes automatically, make sure the Rings to Answer setting is correct. The number of rings should be higher than the number of rings your answering machine is set to for answering a call.

1. Press the home button, if necessary.
2. Select **Settings > General Settings > Fax Settings > Basic Settings > Rings to Answer**.

You see a screen like this:

![Screen showing Rings to Answer with the number 1 selected](image)

3. Select the number of rings and select **OK**. Make sure to select a number higher than the number of rings your answering machine is set to for answering a call.

**Note:** An answering machine picks up every call faster than the product, but the product can detect fax tones and start receiving faxes. If you answer the phone and hear a fax tone, check that the product has started receiving the fax, then hang up the phone.

**Parent topic:** Setting Up Basic Fax Features

### Selecting Advanced Fax Settings

You can select a variety of advanced fax settings.

1. Press the home button, if necessary.
2. Select **Settings > General Settings > Fax Settings**.
You see a screen like this:

3. If you want to create shortcuts for up to three fax operations, select **Quick Operation Button** and select a setting and a shortcut button.

   **Note:** These shortcuts are displayed on the Fax Settings tab in the main Fax screen.

4. Select the group of settings you want to change.
   - Send Settings - Fax
   - Receive Settings - Fax
   - Report Settings - Fax
   - Basic Settings - Fax
   - Security Settings - Fax

   **Parent topic:** Setting Up Fax Features

Parent topic: Selecting Advanced Fax Settings
1. Do one of the following:
   - **Windows 10**: Click and select **EPSON Software**.
   - **Windows 8.x**: Navigate to the **Apps** screen.
   - **Windows (other versions)**: Click or **Start > Programs or All Programs > EPSON Software**.
2. Select **FAX Utility**.
   The first time you use the FAX Utility, you see this introduction window:
   ![FAX Utility Introduction Guide](image)

3. Read about the FAX Utility and click **Close** at the bottom of the window.
You see this window:

4. Click Select Printer and follow the on-screen instructions to transfer your product’s fax settings to the FAX Utility.

Note: For detailed information, click Help or Open Online Help.

Parent topic: Setting Up Fax Features

Setting Up Fax Features Using the Fax Utility - Mac

You can set up your fax header and select your fax settings using the FAX Utility for Mac.
1. In the Apple menu or the Dock, select **System Preferences**. Select **Print & Fax**, **Print & Scan**, or **Printers & Scanners**, select the **FAX** option for your product, and select **Options & Supplies**. Select **Utility** and select **Open Printer Utility**.

2. Double-click **FAX Utility**, if necessary.

   You see this window:

   ![FAX Utility window]

3. Select your **FAX** product in the Printer list.

4. Select **Fax Settings**.

5. Follow the prompts that appear on the screen to enter your fax header information and select your fax settings.

   **Note:** For detailed information, select the FAX Utility ? icon.

**Parent topic:** Setting Up Fax Features

### Setting Up Contacts and Contact Groups

You can set up a list of contacts and their fax numbers so you can quickly select them for faxing. You can also set up contact groups to send a fax message to multiple contacts.

- **Setting Up Contacts Using the Product Control Panel**
- **Importing Contacts Using the Fax Utility - Windows**
- **Setting Up Speed/Group Dial Lists Using the Fax Utility - Mac**
Setting Up Contacts Using the Product Control Panel

You can set up your contacts and contact groups using the control panel on your product.

Creating a Contact
Editing or Deleting a Contact
Creating a Contact Group
Editing or Deleting a Contact Group

Parent topic: Setting Up Contacts and Contact Groups

Creating a Contact

You can create a list of contacts to save frequently used fax numbers.

Note: You can create up to 200 contacts and contact groups combined.

1. Press the home button, if necessary.
2. Select Fax.
   
   You see a screen like this:

![Contact List Screen](image)

3. Select Contacts.
You see a screen like this:

![Screen showing search for contacts]

4. Select the icon.
5. Select **Add Contact**.

You see a screen like this:

![Add Entry screen]

6. Select the registry number you want to use for the contact you are adding.
7. Select the **Name** field, use the displayed keyboard to enter the contact name (up to 30 characters), and select **OK**.
8. Select the **Index Word** field, use the displayed keyboard to enter a word to use when searching for an entry (up to 30 characters), and select **OK**. (This field is optional.)

9. Select the **Fax Number** field, use the displayed keypad or the buttons on the product to enter the fax number, and select **OK**. You can enter up to 64 characters.

   **Note:** If necessary, enter an outside line access code (such as 9) at the beginning of the fax number. If the access code has been set up in the **Line Type** setting, enter the # pound sign instead of the code.

10. If you are sending a fax to a confidential box or relay box, enter a sub-address and password in the **Subaddress (SUB/SEP)** and **Password (SID/PWD)** fields.

11. Select any additional settings as necessary.

12. Select **OK** to save the entry.

**Parent topic:** Setting Up Contacts Using the Product Control Panel

## Editing or Deleting a Contact

You can edit or delete any of the contacts on your list.

1. Press the home button, if necessary.
2. Select **Fax**.

   You see a screen like this:

3. Select **Contacts**.
4. Select the tab containing the first letter of the contact name, then select the > icon next to the contact you want to edit or delete.

You see a screen like this:

![Contact Details Screen]

5. Do one of the following:
   - To delete the contact, select **Delete** and select **Yes** on the confirmation screen.
   - To edit the contact, select **Edit**, select the item you want to change, enter the correct information, and select **OK**. When you are finished editing, select **OK**.

**Parent topic:** Setting Up Contacts Using the Product Control Panel

**Creating a Contact Group**

You can create a group of contacts so that you can easily send faxes to multiple recipients.

**Note:** You can create up to 200 contacts and contact groups combined. You must create a contact before creating a contact group.

1. Press the home button, if necessary.
2. Select **Fax**.
You see a screen like this:

3. Select **Contacts**.
4. Select the icon.
5. Select **Add Group**.
   
   You see a screen like this:

6. Select the registry number you want to use for the group you are adding.
7. Select the **Group Name** field, use the displayed keyboard to enter the group name (up to 30 characters), and select **OK**.
8. Select the **Index Word** field, use the displayed keyboard to enter a word to use when searching for a group (up to 30 characters), and select **OK**. (This field is optional.)

9. Select the **Contact(s) Added to the Group** field.
   
   You see your contacts list.

10. Select each contact you want to include in your group.
    
    A check mark appears next to each selected contact.

11. Select **Close** when complete.

12. Select **Assign to Frequent Use** to list the group on the **Recipient** tab.

13. Select **OK** to save the group.

**Parent topic:** [Setting Up Contacts Using the Product Control Panel](#)

### Editing or Deleting a Contact Group

You can edit an existing contact group to add or delete entries. You can also delete the entire contact group.

1. Press the home button, if necessary.

2. Select **Fax**.
   
   You see a screen like this:

3. Select **Contacts**.

4. Select the > icon next to the group you want to edit or delete.
5. Do one of the following:
   • To delete the group, select **Delete** and select **Yes** on the confirmation screen.
   • To edit the group, select **Edit** and change the group name or contacts included as necessary.
6. Select **OK** when complete.

**Parent topic:** Setting Up Contacts Using the Product Control Panel

### Importing Contacts Using the Fax Utility - Windows

You can edit contacts stored in your product and import contacts from your Windows Address Book to the PC-FAX Phone Book in the FAX Utility for Windows.

1. Do one of the following:
   • **Windows 10:** Click ![Software](Icon) and select **EPSON Software**.
   • **Windows 8.x:** Navigate to the **Apps** screen.
   • **Windows (other versions):** Click ![Start] or **Start > Programs** or **All Programs > EPSON Software**.
2. Select **FAX Utility**.
The first time you use the FAX Utility, you see this introduction window:

3. Read about the FAX Utility and click **Close** at the bottom of the window.
You see this window:

4. To edit the contacts list on your product, click **Contacts**.
5. Do one of the following:
   - To edit a contact, select it in the list and click the icon.
   - To delete a contact, select it in the list and click the icon.
6. To import fax numbers from your Windows Address Book into the FAX Utility PC-FAX Phone Book, select **Edit PC-FAX Phone Book**.
You see this window:

7. Select **File > Import From Windows Address Book**.
8. Select the contacts you want to import and click **OK**.

**Note:** For detailed information, select **Help** or **Open Online Help**.

**Parent topic:** Setting Up Contacts and Contact Groups

### Setting Up Speed/Group Dial Lists Using the Fax Utility - Mac

You can set up your speed dial and group dial lists using the FAX Utility. The utility also lets you import fax numbers from the MacAddress Book and back up fax numbers to your product's memory.

**Note:** You can create up to 60 speed dial and group dial entries combined.

1. In the Apple menu or the Dock, select **System Preferences**. Select **Print & Fax**, **Print & Scan**, or **Printers & Scanners**, select the **FAX** option for your product, and select **Options & Supplies**. Select **Utility** and select **Open Printer Utility**.
2. Double-click **FAX Utility**, if necessary.
3. Select your FAX product in the Printer list.
4. Select Speed Dial/Group Dial List.

You see this window:
5. To add an entry, double-click an empty entry.

   **Note:** To edit an entry, select it and change the information. To delete an entry, select it and press the **Delete** key on your keyboard.

6. Do one of the following:
   - To create a speed dial entry, select **Speed Dial**, enter a name and fax number, and click **OK**.
   - To create a group dial entry, select **Group Dial**, enter a name, select your desired fax numbers, and click **OK**.

7. Repeat the previous steps as necessary to add all your speed dial or group dial entries.

8. To import entries from your MacAddress book, click the icon.

9. When you are finished, click the icon to save the entries to your product's memory.

- [Fax Sending Options](#)
- [Sending a Fax at a Specified Time](#)
- [Sending a Fax on Demand](#)
- [Sending a Stored Fax](#)
- [Dialing Fax Numbers from a Connected Telephone](#)

**Parent topic:** [Sending Faxes](#)
Sending a Fax Using the Keypad, Contact List, or History

You can send a fax from your product control panel by entering the fax number, or selecting the number from either the contact list or fax history.

**Note:** You can send a black-and-white fax to up to 100 contacts or 99 groups at a time, or send a color fax to one recipient at a time. If your recipient's fax machine does not print in color, your fax is automatically sent in black-and-white.

1. Place your original on the product for faxing.
2. Press the \[home\] home button, if necessary.
3. Select **Fax**.
   
   You see a screen like this:

   ![Fax Settings Screen](image)

   **Note:** To fax a double-sided document, place your document in the ADF and turn on the **ADF 2-Sided** setting. (You cannot fax double-sided documents in color.)

4. Do one of the following to select fax recipients:
   - **Manually enter a fax number:** Select **Keypad** and enter a fax number. Select **OK** when done. To add another fax number, repeat the same steps. You can also use the numeric keypad on the control panel to enter a fax number.

   **Note:** If direct dialing has been restricted, you can only select the number from the contact list or fax history. If necessary, enter an outside line access code (such as 9) at the beginning of the fax
number. If the access code has been set up in the **Line Type** setting, enter the # pound sign instead of the code. If your fax number requires a brief pause, select the - icon to insert a pause symbol (–).

- **Select from the contact list:** Select **Contacts** to display the contact list. Select one or more contacts (select the contacts again to deselect it). You can also select the **Search for Contacts** field to search for recipients by name, index name, or entry number. Select **Close** when you are finished.

- **Select from the sent fax history:** Select **Recent** to display the sent fax history. Select a recipient from the list.

**Note:** To delete entered recipients, select the **Select Recipient** field, select the recipient you want to delete, and select **Remove**.

5. If you need to change any fax settings, select **Fax Settings** and select your settings.

6. If you want to preview your fax in black-and-white on the LCD, press the icon. (If the preview looks incorrect, select **Retry**, reposition the document or change the fax settings, and repeat this step.) You cannot send the fax in color after previewing it.

**Note:** If you do not touch the preview screen for 20 seconds, your product sends the fax automatically. You cannot preview images when the Direct Send setting is turned on.

7. If you want to save your fax settings for later use, select **Presets** and add a new entry.

8. Press the **Send** icon.

**Note:** To cancel faxing, select **Cancel**.

Your product scans your original and prompts you to place additional pages, if necessary. After scanning your originals, your product dials the number and sends the fax.

**Note:** Your product does not save sent color faxes to its memory. If the **Settings > General Settings > Fax Settings > Send Settings > Save Failure Data** setting is enabled, faxes that failed to send are stored to the product's memory and you can resend them from the **Job/Status** menu.

**Parent topic:** [Sending Faxes from the Product Control Panel](#)

**Parent topic:** Sending Faxes from the Product Control Panel

**Sending a Fax at a Specified Time**

You can send a fax at a time of your choice.

**Note:** Make sure the product's date and time settings are correct. You can only send faxes in black-and-white when you use this option.

1. Place your original on the product for faxing.
2. Press the home button, if necessary.
3. Select **Fax**.
4. You see a screen like this:

![Fax settings screen](image)

4. Enter a fax number or select a number from the Contacts or Recent lists.
5. Select **Fax Settings**.
6. Select **Send Fax Later**.
7. Select **On**.
8. Select **Time**, use the displayed keypad on the LCD screen to enter your desired time, and select **OK**.
9. Select **Send**.

**Note:** To cancel faxing, select **Cancel**.

After scanning your originals, your product dials the number and sends the fax at the specified time.

**Note:** If the product is turned off at the specified time, the fax is sent when it is powered on.

**Parent topic:** Sending Faxes from the Product Control Panel

Sending a Fax on Demand

You can store up to 10 scanned documents (up to 100 black-and-white pages) and have them sent automatically when another fax machine requests them. Other fax users can receive the document by calling your fax number and using the polling receive function on their fax machines.

**Note:** If you try to store more than 10 jobs or 100 pages, they overwrite previously stored documents. Be sure to check how many fax jobs are stored before storing additional jobs.

1. Place your original on the product for faxing.
2. Press the home button, if necessary.
3. Select **Fax Box**.
   You see a screen like this:
4. Select **Polling Send/Board**.
5. Select **Polling Send**.
6. If you need to change any fax settings, select the ☰ icon, select **Settings**, and change the settings.
7. Select **Add Document**.
8. Select **Store**.
   Your document is scanned and stored until you overwrite it or delete it.

   **Note:** To display the stored job, press the ☰ **Job/Status** button.

**Parent topic:** Sending Faxes from the Product Control Panel

### Sending a Stored Fax

You can store up to 10 scanned documents (up to 100 black-and-white pages) and send them whenever necessary.

**Note:** If you try to store more than 10 jobs or 100 pages, they overwrite previously stored documents. Be sure to check how many fax jobs are stored before storing additional jobs by running a Fax Report.

1. Place your original on the product for faxing.
2. Press the ☰ home button, if necessary.
3. Select **Fax**.
   You see a screen like this:
4. Select the icon.
5. Select **Extended Fax**.
6. Select **Store Fax Data** to turn on the setting and select **Close**.
7. Select any other fax settings as necessary and select **Close**.
8. Select **Store**.
9. When you are ready to send the document, press the home button if necessary and select **Fax Box**.
10. Select **Stored Documents**.
11. Select the stored fax job you want to send.
12. Select **Start Sending**.

**Parent topic:** Sending Faxes from the Product Control Panel

**Related tasks**

Printing Fax Reports

**Dialing Fax Numbers from a Connected Telephone**

If you connected a telephone to the EXT port on your product, you can send a fax by dialing the fax number from the connected telephone. If the recipient's phone number and fax number are the same, you can speak to the recipient before sending the fax.

1. Place your original on the product for faxing.
2. Press the home button, if necessary.
3. Dial the fax number from the connected telephone. Speak to the recipient if necessary.

**Note:** If you are using a pre-paid calling card, enter the number and password required to use the card before entering the destination fax number.

4. Select **Fax** on the LCD screen.
You see this screen:

5. Select **Fax Settings** and select settings as necessary.

   **Note:** Your product now communicates with the recipient's fax machine. Do not hang up the telephone.

6. When you hear a fax tone, select **Send** to start sending the fax.

   **Note:** If your recipient's fax machine does not print in color, your fax is automatically sent in black-and-white.

7. Hang up the telephone.

**Parent topic:** Sending Faxes from the Product Control Panel

### Sending Faxes Using the Fax Utility - Windows

You can send a fax from a printing program in Windows. You can fax up to 100 pages at a time, including a cover sheet.

1. Open the file you want to fax and select the print command.
You see a window like this:

![Print Window](image)

2. Select your product with the **FAX** option as the printer.
3. To change the Paper Size, Orientation, Color, Image Quality, or Character Density settings, click the **Preferences** or **Properties** button.

   **Note:** If you see a **Setup**, **Printer**, or **Options** button, click it. Then click **Preferences** or **Properties** on the next screen. For more information about selecting fax print settings, click **Help**.

4. Select the Page Range as necessary. (Leave the Number of copies set to 1.)
5. Click **Print** or **OK**.
If you’re faxing for the first time, you see a window like this one:

6. Enter your sender information so that recipients can identify the origin of the fax. Then click **OK** to save the sender information.
7. Enter the recipient's name and fax number or select a recipient from the phonebook, then click **Next**.

   **Note:** For detailed instructions on using the Epson FAX Utility, click **Help**.

8. Select a cover sheet and enter a subject and message, then click **Next**.

9. Click **Send** to transmit your fax.

**Parent topic:** Sending Faxes

**Sending Faxes Using the Fax Utility - Mac**

You can send a fax from a Mac printing program using the FAX Utility. You can fax up to 100 pages at a time, including a cover sheet.

1. Open the file you want to fax.
2. Select the print command in your application.

**Note:** You may need to select a print icon on your screen, the **Print** option in the **File** menu, or another command. See your application's help utility for details.

![Printer settings](image)

3. Select your product **FAX** option as the **Printer** setting.

4. If necessary, click the arrow next to the Printer setting or the **Show Details** button to expand the print window.

5. Select the number of pages you are faxing as the **Pages** setting.

**Note:** Leave the **Copies** setting set to **1**.

6. Select **Recipient Settings** from the pop-up menu.
7. Do one of the following to choose your recipient:
   • Select a name or group from the **Recipient List**.
   • Enter a name, company, and fax number and click the + button.
   • Click the icon and select a recipient from your address book.
8. Select **Fax Settings** from the pop-up menu.
You see this window:

9. Select the **Color** and **Image Quality** settings you want to use for your fax.
10. Click **Fax**.

### Receiving Faxes

See these sections to receive faxes with your product.

- Fax Reception
- Receiving Faxes Automatically
- Receiving Faxes Manually
- Forwarding Received Faxes
- Receiving a Fax by Polling
- Saving Faxes to an External USB Device
- Saving and Viewing Received Faxes
- Selecting Received Fax Options Using the Fax Utility - Windows

**Parent topic:** Faxing

#### Fax Reception

Your product will automatically receive and print faxes when you set the Receive Mode to **Auto**.
If you connected a telephone to your product so you can use the same phone line for faxes and voice calls, you can also set your product to receive faxes manually. This allows you to check for a fax tone using the telephone and press a button on your product to receive the fax.

Make sure to load paper in your product and select your fax settings before receiving a fax.

Note: If you run out of paper during fax printing, load more paper and press the button indicated on your product’s LCD screen to continue.

Parent topic: Receiving Faxes

Receiving Faxes Automatically

To receive faxes automatically, make sure Receive Mode is set to Auto (the default setting for the product).

To change the Receive Mode if necessary, select Settings > General Settings > Fax Settings > Basic Settings > Receive Mode.

If an answering machine is connected, make sure the product’s Rings to Answer setting is set higher than the number of rings your answering machine is set to answer a call. For example, if the answering machine is set to pick up on the fourth ring, set the product to pick up on the fifth ring or later.

Receiving Faxes Manually

Receiving Faxes Manually

You can set up your product to receive faxes manually by setting the Receive Mode to Manual. This lets you check for a fax tone on the connected telephone before receiving a fax.

1. To change the Receive Mode, select Settings > General Settings > Fax Settings > Basic Settings > Receive Mode and select Manual.
2. When the connected telephone rings, answer the call.
3. If you hear a fax tone, select Fax on the LCD screen.
4. Select Send/Receive.
5. Select Receive.
6. Select Receive again to start receiving the fax.
7. Hang up the telephone.

Forwarding Received Faxes

You can forward received faxes to another fax machine, or convert the faxes into PDF documents and forward them to a shared folder on the network or to an email address. Forwarded faxes are deleted from the product’s memory.

Before using this feature, make sure the date and time are set correctly, the forwarding destination is set up in the contact list, and the email server settings are configured.

1. Press the home button, if necessary.
2. Select Settings > General Settings > Fax Settings > Receive Settings > Save/Forward Settings > Unconditional Save/Forward > Forward.
3. Select Yes.

Note: If you want to print the fax automatically before forwarding it, select Yes and Print.

4. Select Add Entry, select the forwarding destination from the contacts list, and select Close.
5. Confirm the displayed forwarding destinations and select Close.
6. Under Options When Forwarding Failed, select whether you want to print the faxes or save them in the printer’s inbox if forwarding the received fax fails.

Parent topic: Receiving Faxes

Receiving a Fax by Polling

You can use polling to receive a fax from another fax machine (such as a fax information service).

Note: You cannot use polling to receive a fax from a fax information service that uses audio guidance.

1. Press the home button, if necessary.
2. Select Fax.
   You see a screen like this:

3. Select the icon.
4. Select Extended Fax.
5. Select Polling Receive to turn on the setting and select Close.
7. Enter the fax number you expect to receive the fax from.
8. Select Polling to start receiving the fax.

Parent topic: Receiving Faxes

Saving Faxes to an External USB Device

You can save incoming faxes to an external USB device connected to your product.

1. Insert an external USB device into the product's USB port.
2. Press the home button, if necessary.
3. Select Settings > General Settings > Fax Settings > Receive Settings > Save/Forward Settings > Unconditional Save/Forward.
4. Select Save to Memory Device
5. Select Yes to save the fax or Yes and Print to save and print the fax.

Parent topic: Receiving Faxes
Saving and Viewing Received Faxes

You can save received faxes in your product's memory and view them on the LCD screen. The inbox and confidential boxes can hold a maximum of 200 faxes in total.

**Note:** The inbox can be locked by an administrator. If you cannot access the inbox, contact your administrator for assistance.

1. Press the home button, if necessary.
2. Select **Settings > General Settings > Fax Settings**.
3. To save received faxes, select **Receive Settings > Save/Forward Settings > Unconditional Save/Forward**.
4. Select **Save to Inbox** to turn on the setting.
5. Press the home button again.
6. Select **Fax Box**.
   
   You see a screen like this:

   ![Fax Box Screen](image)

7. Do one of the following to view stored faxes:
   - Select **Inbox/Confidential** to view received faxes.
   - Select **Stored Documents** to view saved faxes that have not been sent (available only when **Store Fax Data** is turned on).
• Select **Polling Send/Board** to view faxes that are stored for fax polling or stored in a bulletin board.

8. Select the fax you want to view.

   The LCD screen displays the fax contents.

9. If you want to print or forward a stored fax, select the icon.

10. Select one of the printing or forwarding options, and follow the on-screen instructions.

**Note:** Delete faxes after you print or view them to free up the product's memory. When the memory is full, you can only forward or print incoming faxes.

**Parent topic:** Receiving Faxes

### Selecting Received Fax Options Using the Fax Utility - Windows

You can select options for use with received faxes using the FAX Utility for Windows.

1. Do one of the following:

   • **Windows 10:** Click and select **EPSON Software**.
   
   • **Windows 8.x:** Navigate to the **Apps** screen.

   • **Windows (other versions):** Click or **Start > Programs or All Programs > EPSON Software**.

2. Select **FAX Utility**.
The first time you use the FAX Utility, you see this introduction window:

3. Read about the FAX Utility and click Close at the bottom of the window.
You see this window:

4. To save faxes received by your product on your computer, select **Save received faxes on this computer**.

5. Select the destination folder and other options, and click **OK**. You return to the FAX Utility window.

6. To receive notifications when received faxes arrive in the selected destination folder on your computer, select **Notify me if new faxes exist in forwarding folders**.
7. Select how often you want to be notified of received faxes and click **OK**.

   **Note:** For detailed information, click **Help** or **Open Online Help**.

**Parent topic:** Receiving Faxes

### Checking Fax Status

You can check the status of fax jobs on the product control panel.

1. Press the \( \text{Home} \) home button, if necessary.
2. Select **Fax**.

   You see a screen like this:

   ![Fax Control Panel](image)

3. Select the \( \text{Fax} \) icon.
4. To check the history of faxes that have been sent or received, select **Transmission Log** and select the job you want to check.

   **Note:** If you see a numbered icon above the \( \text{Fax} \) icon on your product's LCD screen or the \( \text{Received Fax} \) light is flashing, received faxes have been temporarily saved to the product's memory.

5. To check the status of a fax in progress, press the \( \text{Job/Status} \) button.

**Parent topic:** Faxing

242
Printing Fax Reports

You can print several types of fax reports whenever necessary. You can also print the fax log automatically by turning on Fax Log Auto Print.

1. Press the home button, if necessary.
2. Select Fax.
   
   You see a screen like this:

3. Press the icon.
5. Select the fax report you want to print.

Fax Report Options

Parent topic: Faxing

Replacing Ink Supply Units (Ink Packs) and Maintenance Boxes

When ink is expended in an ink pack or the maintenance box is at the end of its service life, you need to replace it. The maintenance box stores ink that gets flushed from the system during print head cleaning.

Note: Please dispose of your used Epson branded ink packs and maintenance boxes responsibly and in accordance with local requirements. If you would like to return your used ink packs and maintenance boxes to Epson for proper disposal, please go to epson.com/recycle for more information.

Purchase Epson Ink Packs and Maintenance Boxes

You can purchase genuine Epson ink, maintenance boxes, and paper at epson.com (U.S. sales), epson.ca (Canadian sales), or epson.com.jm (Caribbean sales). You can also purchase supplies from an Epson authorized reseller. To find the nearest one, call 800-GO-EPSON (800-463-7766) in the U.S. or 800-807-7766 in Canada.

Note: This printer is designed for use with Epson ink packs only, not third-party ink packs or ink. Other brands of ink supplies are not compatible and, if described as compatible, may not function properly or continuously. Such restrictions can be avoided with some other printers such as Epson EcoTank cartridge-free printers.

The included initial ink packs are designed for reliable printer setup and cannot be used as replacement ink packs or resold. After setup, the remaining ink is available for printing. Yields are based on ISO 24711 in default mode, printing continuously. Yields vary due to print images, settings, and temperatures. Printing infrequently or primarily with one color reduces yields. All ink packs must be installed with ink for printing and printer maintenance. For print quality, some ink remains in replaced ink packs.

## Removing and Installing Ink Packs

Make sure you have your replacement ink packs handy before you begin. You must install new ink packs immediately after removing the old ones.

1. If an ink pack is low or expended, you see a message on your product's LCD screen and on your computer screen. Note which ink packs need to be replaced.

2. Unlock and open the front cover.
3. Press the ink pack tray until it clicks and pull it out.

4. Remove the used ink pack from the tray.
   
   **Note:** Dispose of used ink packs carefully. Do not take the used ink pack apart or try to refill it.

   **Warning:** If ink gets on your skin, wash it thoroughly with soap and water. If ink gets into your eyes, flush them immediately with water. Seek medical advice if problems persist. If ink gets into your mouth, spit it out and see a doctor right away. Keep ink packs out of the reach of children.

5. Shake the new ink pack 10 times and remove it from the packaging.
   
   **Caution:** Do not touch the green chip on the ink pack.
6. Insert the new ink pack into the ink pack tray as shown. Make sure the top of the ink pack is level with the top of the tray.

7. Slide the ink pack tray into the product until it clicks.

Note: If you cannot insert the tray all the way, make sure you are inserting the correct color ink pack and that the top of the ink pack is level with the top of the tray. The ink packs can only be inserted into the proper location.

8. Repeat these steps for each ink pack you want to install.
9. When you are finished, close and lock the front cover.

![Image of ink supply unit]

10. Follow the on-screen instructions to charge your product's ink.

   **Note:** If the message screen appears on another computer on a network, you may need to cancel the print job using the product control panel.

3. In the Apple menu or the Dock, select **System Preferences**.
4. Select **Print & Fax**, **Print & Scan**, or **Printers & Scanners**, select your product, and select **Options & Supplies**.
5. Select **Driver** or **Options**.
6. Select **On** as the **Permit temporary black printing** setting.
7. Click **OK**.
8. Close the utility window.
9. Load plain paper or an envelope in your product.
10. Access the print settings in your print application.
11. Select **Print Settings** from the pop-up menu.
12. Select **Plain Paper/Bright White Paper** or **Envelope** as the paper type setting.
13. Select the **Grayscale** option.
14. Click **Print** to print your document.

Selecting Basic Print Settings - Mac
Conserving Low Black Ink with Windows

When black ink runs low and there is more color ink, you may see a message telling you that you can print with a mixture of color inks to create composite black.

**Note:** The window appears only when you have selected **Plain Paper/Bright White Paper** as the paper type setting, and depends on other selected print settings. To use this feature, Epson Status Monitor must be enabled.

- Click **Yes** to use a mixture of color inks to create black, or **No** to continue using the remaining black ink for the document you are printing.
- Click **Disable this feature** to continue using the remaining black ink.

**Note:** If you disable this feature, it remains disabled until you replace the black ink pack.

### Maintenance Box Replacement

The maintenance box stores surplus ink that gets flushed from the system during print head cleaning. When you see a message on the LCD screen, follow the on-screen instructions to replace the maintenance box.

Note the following precautions when replacing the maintenance box:

- Do not remove the maintenance box or its cover except when replacing the maintenance box.
- Do not touch the green chip on the side of the maintenance box.
- Do not tilt the maintenance box after removing it or ink may leak.
- Do not touch the openings in the maintenance box or you may get ink on you.
- Do not drop the maintenance box or subject it to strong shocks.
- If you cannot replace the cover, the maintenance box may not be installed correctly. Remove and reinstall the maintenance box.
- Do not store the maintenance box in high or freezing temperatures.

**Caution:** Do not reuse a maintenance box that has been removed and left uninstalled for a long period. Keep the maintenance box away from direct sunlight.

**Note:** The maintenance box is a user-replaceable part and is not covered by the product warranty.

Adjusting Print Quality

If your print quality declines, you may need to run a utility to clean or align the print head.

Note: If you are using your Epson product with the Windows 10 S operating system, you cannot use the software described in this section. You also cannot download and install any Epson product software from the Epson website for use with Windows 10 S; you must obtain software only from the Windows Store.

Print Head Maintenance

If your printouts become too light, or you see dark or light bands across them, you may need to clean the print head nozzles. Cleaning uses ink, so clean the nozzles only if print quality declines.

You can check for clogged nozzles before you clean them so you don’t clean them unnecessarily.

Note: You cannot clean the print head if ink is expended, and may not be able to clean it when ink is low. You must replace the ink pack first.

Checking the Nozzles Using the Product Control Panel
You can check the print head nozzles using the control panel on your product.
1. Make sure there are no errors on the LCD screen.
2. Load a few sheets of plain paper in the product.
3. Press the home button, if necessary.
4. Select Settings > Maintenance > Print Head Nozzle Check.
   You see a screen like this:

   ![Print Head Nozzle Check](image)

   Load Letter/A4 Plain Paper and touch Start to print a nozzle check pattern.

5. Select Start.
   The nozzle pattern prints.
6. Check the printed pattern to see if there are gaps in the lines.

   **Print head is clean**

   ![Print head is clean pattern]

   **Print head needs cleaning**

   ![Print head needs cleaning pattern]

7. Do one of the following:
   - If there are no gaps, select O.
   - If there are gaps or the pattern is faint, select X and continue.

8. Follow the instructions on the screen to clean the print head, check the nozzles, and repeat the process as necessary.

   **Caution:** Never turn off the product or open the front cover during a cleaning cycle or you may not be able to print.

If you don’t see any improvement after cleaning the print head up to 4 times, wait at least 6 hours without printing. Then try cleaning the print head again. If quality still does not improve, contact Epson.

Aligning the Print Head Using the Product Control Panel

You can align the print head using the control panel on your product.

1. Make sure there are no errors on the LCD screen.
2. Load a few sheets of plain paper in the product.
3. Press the home button, if necessary.
4. Select Settings > Maintenance > Print Head Alignment.
5. Select one of the following options:
   - **Ruled Line Alignment** if your printout is blurry.
   - **Horizontal Alignment** if your printout contains horizontal banding.
6. Follow the on-screen instructions to print an alignment sheet.

**Note:** Do not cancel printing while you are printing head alignment patterns.

7. Check the printed patterns on the alignment sheet and select the following on the LCD screen, depending on the alignment pattern you printed:
   - **Ruled Line Alignment**: Select the number representing the pattern with the least amount of separation or overlap.
Select the number representing the pattern with the least misaligned vertical line.

• **Horizontal Alignment**: Select the number representing the pattern with the least amount of separation or overlap.

8. Select **Done**.

**Cleaning the Paper Guide**

If you see ink on the back of a printout, you can clean the paper guide rollers to remove any excess ink.
1. If printouts are smeared or scuffed, load plain paper in the paper source that you want to clean in one of these sizes: Letter (8.5 × 11 inches [216 × 279 mm]) or A4 (8.3 × 11.7 inches [210 × 297 mm]).

2. Press the home button, if necessary.

3. Select **Settings > Maintenance > Paper Guide Cleaning**.

4. Select the paper source you want to clean.

5. Follow the on-screen instructions to clean the paper guide.

6. Repeat these steps as necessary until the paper comes out clean.

   **Note:** If the paper is still smeared or scuffed, repeat these steps to clean the other paper sources.

Cleaning and Transporting Your Product

See these sections if you need to clean or transport your product.

Cleaning Your Product
Transporting Your Product

Cleaning Your Product

To keep your product working at its best, you should clean it several times a year.

**Caution:** Do not use a hard brush, benzene, alcohol, or paint thinner to clean the product or you may damage it. Do not use oil or other lubricants inside the product or let water get inside it. Close the rear paper feed slot when you are not using it, to keep out dust.

1. Turn off the product.
2. Wait for the power light to turn off, then unplug the power cable.
3. Disconnect any connected cables.
4. Remove all the paper from the product.
5. Clean the outer case and control panel with a soft, dry cloth. Do not use liquid or chemical cleansers.
6. Clean any paper cassettes using a soft brush.
7. Clean the scanner glass and the glass area on the left with a soft, lint-free cloth (microfiber is recommended), moistened with a little glass cleaner.

**Caution:** Do not spray glass cleaner directly on the glass and do not press the glass surface with any force.

**Note:** If lines appear on the printout or in scanned images, carefully clean the scanner glass on the left.
8. Open the ADF cover.

9. Use a soft, dry, lint-free cloth (microfiber is recommended) to clean the rollers and the interior of the ADF.

**Parent topic:** Cleaning and Transporting Your Product
Transporting Your Product

If you need to store your product or transport it a long distance, prepare it for transportation as described here.

**Caution:** During transportation and storage, follow these guidelines:

- Because the product is heavy, two or more people should lift and carry it using the hand positions shown here:

![Hand Positions](image)

- Avoid tilting the product, placing it vertically, or turning it upside down; otherwise ink may leak.
- Leave the ink packs installed. Removing the packs can dry out the print head and may prevent the product from printing.

**Note:** Before storing your product for a long period, replace low, expended, or expired ink to help prevent the print head from drying out. Store your product in a cool, dry place.

1. Turn off the product.
2. Wait for the power light to turn off, then unplug the power cable.
3. Disconnect any connected cables.
4. Remove all the paper from the product and make sure there are no originals on the scanner glass.
5. Lift up the scanner unit.
6. Make sure the print head is in the home position on the right.
7. Secure the print head to the case with tape as shown.

**Caution:** Do not touch the translucent film inside the product; otherwise, you may damage your product.

8. Lower the scanner unit.
9. Uninstall the optional paper cassette, if necessary.
10. Close the rear paper feed slot and output tray and lower the control panel.

11. Remove the output tray.

12. Place the product in its original packing materials, if possible, or use equivalent materials with cushioning around the product.

Keep the product level during transportation. If print quality has declined when you print again, clean and align the print head. Make sure you remove the tape securing the print head before using the printer.

Checking for Software Updates

Periodically, it's a good idea to check Epson's support website for free updates to your product software. Visit epson.com/support (U.S.), epson.ca/support (Canada), or epson.com.jm/support (Caribbean) and select your product.

Note: Epson periodically provides firmware updates to address issues of security, performance, minor bug fixes and ensure your printer functions as designed. Your printer was designed to work only with genuine Epson ink packs, therefore some updates may affect the functionality of third-party ink.
• **Windows:** Your printer software automatically checks for updates. You can also manually update the software by selecting **Software Update** here:

• Access the Windows Desktop and right-clicking the icon for your product in the right side of the Windows taskbar, or clicking the up arrow and right-clicking .

• On the **Maintenance** tab in the printer settings window

  You can also update the software by selecting **EPSON Software Updater** in the **EPSON** or **EPSON Software** program group, accessible by the **Start** button, or on the **Start** or **Apps** screens, depending on your version of Windows.

• **OS X:** You can manually update the software by opening the **Applications > Epson Software** folder and selecting **EPSON Software Updater**.

• **macOS 10.12.x or 10.13.x:** You can manually update the software by opening the **App Store**, selecting **Updates**, searching for a software update option for Epson Software, and selecting **Update**.

**Parent topic:** Solving Problems

### Product Status Messages

You can often diagnose problems with your product by checking the messages and status icons on its LCD screen. You can also check for errors by pressing the **Job/Status** button and selecting **Printer Status**.

**Note:** If the LCD screen is dark, press the screen to wake the product from sleep mode.

**Running a Product Check**

Running a product check helps you determine if your product is operating properly.
1. Disconnect any interface cables connected to your product.
2. Load plain paper in the paper cassette.
3. Press the home button, if necessary.
4. Select **Settings**.
5. Select **Maintenance**.
   
   You see a screen like this:

![Maintenance screen](image)

6. Select **Print Head Nozzle Check**.
   
   You see a screen like this:

![Print Head Nozzle Check](image)
7. Select Start.
The nozzle pattern prints.

8. Do one of the following, depending on the results of the product check:
   • If the page prints and the nozzle check pattern is complete, the product is operating properly. Any operation problem you may have could be caused by your computer, cable, software, or selected settings. Check the other solutions in this guide or try uninstalling and reinstalling your printer software.
   • If the page prints but the nozzle check pattern has gaps, clean the print head.
   • If the page does not print, the product may have a problem. Check the other solutions in this manual. If they do not work, contact Epson.

Where to Get Help

Resetting Control Panel Defaults
If you have a problem with settings on the product control panel, you can reset them to their factory defaults. You can choose which settings to reset or reset them all.

Note: This setting can be locked by an administrator. If you cannot access or change this setting, contact your administrator for assistance.

1. Press the home button, if necessary.
2. Select Settings > General Settings > System Administration. Enter the administrator password, if necessary.
3. Scroll down and select Restore Default Settings.
You see a screen like this:

![Restore Default Settings Screen]

4. Select one of these options:
   - **Network Settings**: Resets all network settings
   - **Copy Settings**: Resets all settings for copying
   - **Scan Settings**: Resets all settings for scanning
   - **Fax Settings**: Resets all settings for faxing
   - **Clear All Data and Settings**: Resets all control panel settings including the contacts list

You see a confirmation screen.

5. Select **Yes** to reset the selected settings. (Select **No** if you want to cancel the operation.)

### Solving Setup Problems

Check these sections if you have problems while setting up your product.

- **Product Does Not Turn On or Off**
- **Noise After Ink Installation**
- **Software Installation Problems**

**Parent topic**: Solving Problems
Product Does Not Turn On or Off

If you cannot turn the product on or off, try these solutions:

• If you cannot turn on your product, make sure the power cord is securely connected and hold down the power button a little longer.

• If you cannot turn off your product, hold down the power button a little longer. If you still cannot turn off your product, unplug the power cord, plug the power cord back in, then turn your product on and off again using the power button.

Parent topic: Solving Setup Problems

Noise After Ink Installation

If you hear noises from your product after installing ink, check the following:

• The first time you install the ink packs, the product must charge its print head. Wait until charging finishes before you turn off the product, or it may charge improperly and use excess ink the next time you turn it on.

• If the product's print head stops moving or making noise, and the charging process has not finished after approximately 5 minutes, turn off your product. Turn it back on and check to see if charging is still in progress. If it is still in progress, contact Epson for help.

Parent topic: Solving Setup Problems

Software Installation Problems

If you have problems while installing your product software, try these solutions:

• Make sure your product is turned on and any necessary cables are securely connected at both ends. If you still have problems installing software, disconnect the cable and carefully follow the instructions on the Start Here sheet. Also make sure your system meets the requirements for your operating system.

• Close any other programs, including screen savers and virus protection software, and install your product software again.

• In Windows, make sure your product is selected as the default printer and the correct port is shown in the printer properties.

• If you see any error message or your software does not install correctly in Windows, you may not have software installation privileges. Contact your system administrator.

• If you are printing over a network, make sure your product is set up properly on the network.

Parent topic: Solving Setup Problems
Solving Network Problems

Check these solutions if you have problems setting up or using your product on a network.

**Note:** Breakdown or repair of this product may cause loss of fax and network data and settings. Epson is not responsible for backing up or recovering data and settings during or after the warranty period. We recommend that you make your own backup or print out your fax and network data and settings.

**Product Cannot Connect to a Wireless Router or Access Point**

**Network Software Cannot Find Product on a Network**

**Product Does Not Appear in Mac Printer Window**

**Cannot Print Over a Network**

**Cannot Scan Over a Network**

**Parent topic:** Solving Problems

**Product Cannot Connect to a Wireless Router or Access Point**

If your product has trouble finding or connecting to a wireless router or access point, try these solutions:

- If you are connecting the product via Wi-Fi Protected Setup (WPS) and the Wi-Fi icon on your product’s LCD screen is not lit or does not appear, make sure you select one of the WPS options from the product control panel within 2 minutes of pressing the WPS button on your router.

- Make sure to place your product within contact range of your 2.4 GHz router or access point. Avoid placing your product near a microwave oven, 2.4 GHz cordless phone, or large metal object, such as a filing cabinet.

**Note:** If you are using a 5 GHz wireless router, set the router to operate in dual band (2.4 GHz and 5 GHz) mode. If your router uses a single network name (SSID) for both the 2.4 GHz and 5 GHz band, give each band its own network name (SSID) instead, such as Home Network 2.4 GHz and Home Network 5 GHz. See your router documentation or contact your internet service provider for instructions.
• Verify that your router or access point is operating correctly by connecting to it from your computer or another device.

• You may need to disable the firewall and any anti-virus software on your wireless router or access point.

• Check to see if access restrictions, such as MAC address filtering, are set on the router or access point. If access restrictions are set, add your product's MAC address to your router's address list. To obtain your product's MAC address, print a network status sheet. Then follow the instructions in your router or access point documentation to add the address to the list.

• If your router or access point does not broadcast its network name (SSID), follow the instructions that came with your product to enter your wireless network name manually.

• If your router or access point has security enabled, determine the kind of security it is using and any required password or passphrase for connection. Then make sure to enter the exact WEP key or WPA passphrase correctly.

• Check if your computer is restricting the available wireless channels. If so, verify that your wireless access point is using one of the usable channels and change to a usable channel, if necessary.

• If you are using a Wi-Fi Direct connection that suddenly disconnects, the Wi-Fi direct password on your device may have been changed. If necessary, delete the existing DIRECT-xxxxxxxx connection settings from your device and enter a new password. See your device documentation for instructions.

• If you connected your product to a Windows computer using Wi-Fi Direct and it automatically selected Access Point Mode, you may have trouble accessing a low-priority Internet connection. Check the network connection or adapter settings in the Windows Control Panel and set the Internet metric setting to 100 for your version of the Internet Protocol.

Network Software Cannot Find Product on a Network

If EpsonNet Setup cannot find your product on a network, try these solutions:

• Make sure your product is turned on and connected to your network. Verify connection using your product control panel.
• Check if your network name (SSID) contains non-ASCII characters. Your product cannot display non-ASCII characters.
• Make sure your product is not connected to a guest network.
• If necessary, reinstall your product software and try running EpsonNet Setup again:
  1. Reset your product's network settings to their factory defaults.
  2. Windows only: Uninstall your product software.
  3. Initialize your router following the instructions in your router documentation.

  Note: If you are reading these instructions online, you will lose your Internet connection when you initialize your router, so note the next step before initializing it.

  4. Download your product software from the Epson website using the instructions on the Start Here sheet.
• If you have replaced your router, reinstall your product software to connect to the new router.

  Note: If you are using a 5 GHz wireless router, set the router to operate in dual band (2.4 GHz and 5 GHz) mode. If your router uses a single network name (SSID) for both the 2.4 GHz and 5 GHz band, give each band its own network name (SSID) instead, such as Home Network 2.4 GHz and Home Network 5 GHz. See your router documentation or contact your internet service provider for instructions.

  • Check to see if your wireless router or access point has an enabled Privacy Separator function that is preventing detection of your device over the network. See your router or access point documentation for instructions on disabling the Privacy Separator function.

**Product Does Not Appear in Mac Printer Window**

If your product does not appear in the Mac printer window, try these solutions:

- Turn your product off, wait 30 seconds, then turn it back on again.
- If you are connecting the product via Wi-Fi Protected Setup (WPS) and the Wi-Fi icon on your product's LCD screen is not lit, make sure you select one of the WPS options from the product control panel within 2 minutes of pressing the WPS button on your router.
- If you are connecting the product wirelessly via EpsonNet Setup and you do not see the Wi-Fi antenna icon with connection bars on your LCD screen, make sure your product software was installed correctly. If necessary, reinstall your software.

**Note:** If you are using a 5 GHz wireless router, set the router to operate in dual band (2.4 GHz and 5 GHz) mode. If your router uses a single network name (SSID) for both the 2.4 GHz and 5 GHz band, give each band its own network name (SSID) instead, such as Home Network 2.4 GHz and Home Network 5 GHz. See your router documentation or contact your internet service provider for instructions.

Uninstall Your Product Software

---

**Cannot Print Over a Network**

If you cannot print over a network, try these solutions:

- Make sure that your product is turned on.
- Make sure you install your product's network software as described in your product documentation.
- Print a network status sheet and verify that the network settings are correct. If the network status is Disconnected, check any cable connections and turn your product off and then on again.
- If you are using TCP/IP, make sure the product's IP address is set correctly for your network. If your network does not assign IP addresses using DHCP, set the IP address manually.
- Make sure your computer and product are both using the same wireless network.
- If network printing is slow, print a network status sheet and check the signal strength. If it is poor, place your product closer to your router or access point. Avoid placing your product near a microwave oven, 2.4 GHz cordless phone, or large metal object, such as a filing cabinet.

**Note:** If you are using a 5 GHz wireless router, set the router to operate in dual band (2.4 GHz and 5 GHz) mode. See your router documentation for instructions.
• Check to see if your wireless router or access point has an enabled Privacy Separator function that is preventing printing from a device over the network. See your router or access point documentation for instructions on disabling the Privacy Separator function.

• If you are connecting the product via Wi-Fi Protected Setup (WPS) and the Wi-Fi icon does not appear on your product's LCD screen, make sure you select one of the WPS options from the product control panel within 2 minutes of pressing the WPS button on your router.

• Check your wired LAN router or access point to see if the LED for the port to which your product is connected is on or flashing. If the link LED is off, try the following:
  • Make sure the Ethernet cable is securely connected to your product and to your router, access point, switch, or hub.
  • Try connecting your product to a different port or a different router, access point, switch, or hub.
  • Try connecting with a different Ethernet cable.
  • Try printing to your product from another computer on the network.

  Note: If you are using a 5 GHz wireless router, set the router to operate in dual band (2.4 GHz and 5 GHz) mode. See your router documentation for instructions.

• If you are connecting the product via EpsonNet Setup and the Wi-Fi icon does not appear lit on the LCD screen, make sure your product software was installed correctly. If necessary, reinstall your software.

Cannot Scan Over a Network

If you cannot start Epson Scan 2 for scanning over a network, try these solutions:

• If you cannot scan from your product control panel, make sure you restarted your computer after installing the product software. Make sure the Event Manager program is not being blocked by your firewall or security software.
Note: If you are using a 5 GHz wireless router, set the router to operate in dual band (2.4 GHz and 5 GHz) mode. If your router uses a single network name (SSID) for both the 2.4 GHz and 5 GHz band, give each band its own network name (SSID) instead, such as Home Network 2.4 GHz and Home Network 5 GHz. See your router documentation or contact your internet service provider for instructions.

- If you are scanning a large original at a high resolution, a network communication error may occur. Try scanning again at a lower resolution.
- If network communication was interrupted while starting Epson Scan 2, exit Epson Scan 2, wait a few seconds, and restart it. If Epson Scan 2 cannot restart, turn off your product, turn it back on, and try restarting Epson Scan 2 again.
- Check the scanner setting and reset the connection if necessary using Epson Scan 2 Utility:
  - **Windows 10**: Click and select EPSON > Epson Scan 2 Utility. Make sure your product is selected. If necessary, select the Other tab and click Reset.
  - **Windows 8.x**: Navigate to the Apps screen, select EPSON, and select Epson Scan 2 Utility. Make sure your product is selected. If necessary, select the Other tab and click Reset.
  - **Windows (other versions)**: Click or Start > All Programs or Programs > EPSON > Epson Scan 2 > Epson Scan 2 Utility. Make sure your product is selected. If necessary, select the Other tab and click Reset.
  - **Mac**: Open the Applications folder, click Epson Software, and click Epson Scan 2 Utility. Make sure your product is selected. If necessary, select the Other tab and click Reset.

- You may need to disable the firewall and any anti-virus software on your wireless router or access point.

Product Makes Noise, But Nothing Copies
Product Makes Noise When It Sits for a While
Originals Do Not Feed From the Automatic Document Feeder

Parent topic: Solving Problems

Product Makes Noise, But Nothing Copies

If your product makes a noise, but nothing copies, try these solutions:

• Run a nozzle check to see if any of the print head nozzles are clogged. Then clean the print head, if necessary.
• If the nozzle check page does not print, but the product's power is on, make sure your product software is installed correctly.
• Make sure your product is level (not tilted).

Product Makes Noise When It Sits for a While

Your product is performing routine maintenance. This is normal.

Parent topic: Solving Copying Problems

Originals Do Not Feed From the Automatic Document Feeder

If your originals do not feed when placed in the ADF, try these solutions:

• Make sure the ADF icon lights up on the Copy, Fax, or Scan screen on the LCD screen. If not, reload the originals.
• Make sure the size, weight, and number of your originals are supported by the ADF.
• Make sure the originals are loaded correctly.
• Make sure the document is not curled or creased.
• Try cleaning the inside of the ADF.
• Do not load originals above the arrow mark on the ADF edge guide.

**Solving Paper Problems**

Check these sections if you have problems using paper with your product.

- Paper Feeding Problems
- Paper Jams Inside the Product
- Paper Ejection Problems

**Parent topic:** Solving Problems
Paper Feeding Problems

If you have problems feeding paper, try these solutions:

• If paper does not feed for printing, remove it from the rear feed slot or cassette. Reload it, then adjust the edge guides. Make sure the paper stack is not above the tab on the edge guides inside the cassette or rear feed slot.

• Be sure to insert the paper cassette all the way into your product.

• If multiple pages feed at once, remove the paper, fan the edges to separate the sheets, and reload it.

• Do not load more than the recommended number of sheets.

• Make sure your paper meets the specifications for your product.

• If paper jams when you print on both sides of the paper, try loading fewer sheets.

• If you installed an optional paper cassette unit, be sure to enable the cassette unit in the printing software.

• If your product pauses during printing, make sure the front cover is closed.

• For best results, follow these guidelines:
  • Use new, smooth, high-quality paper that is not curled, creased, old, too thin, or too thick.
  • Load paper in the cassette printable side down.
  • Do not load binder paper with holes in the cassette.
  • Follow any special loading instructions that came with the paper.

Parent topic: Solving Paper Problems

Paper Jams Inside the Product

If you see a message that paper has jammed in the product, follow the on-screen instructions to locate and remove the jammed paper.

Take the following precautions when removing jammed paper from the product:

• Remove the jammed paper carefully. Using too much force may damage the product.

• Unless specifically instructed, avoid tilting the product, placing it on its side, or turning it upside down, as ink may spill.

Warning: Never touch the buttons on the control panel while your hand is inside the product. If the product starts operating, it may cause an injury. Do not touch any protruding parts inside the product.
Paper Ejection Problems
If you have problems with paper ejecting properly, try these solutions:
• If paper does not eject fully, you may have set the wrong paper size. Cancel printing to eject the paper. Select the correct paper size when you reprint.
• If paper is wrinkled when it ejects, it may be damp or too thin. Load new paper and be sure to select the correct paper type setting when you reprint.

Solving Problems Printing from a Computer
Check these sections if you have problems while printing from your computer.
Nothing Prints
Product Icon Does Not Appear in Windows Taskbar
Printing is Slow

Nothing Prints
If you have sent a print job and nothing prints, try these solutions:
• Make sure your product is turned on and connected to your computer.
• Make sure any interface cables are connected securely at both ends.
• If you connected your product to a USB hub, make sure it is a first-tier hub. If it still does not print, connect your product directly to your computer instead of the hub.
• Make sure the printer status is not offline or pending.
• Run a product check to see if a test page prints. If the test page prints, check to see if your product software is installed correctly.

• In Windows, make sure your product is selected as the default printer.

• In Windows, delete all jobs from the Windows Spooler. Click Print Queue on the Maintenance tab in the printer settings window, and cancel any stalled print jobs.

• On a Mac, make sure the printer is not paused.

Parent topic: Solving Problems Printing from a Computer

Related tasks
Running a Product Check

Product Icon Does Not Appear in Windows Taskbar

If you do not see your product icon in the Windows taskbar, first try restarting your computer. If that does not work, try this solution:

1. Do one of the following:
   • Windows 10: Click and select (Settings) > Devices > Printers & scanners. Select your product name and select Manage > Printing preferences.
   • Windows 8.x: Navigate to the Apps screen and select Control Panel > Hardware and Sound > Devices and Printers. Right-click your product name, select Printing Preferences, and select your product name again if necessary.
   • Windows 7: Click and select Devices and Printers. Right-click your product name, select Printing Preferences, and select your product name again if necessary.
   • Windows Vista: Click , select Control Panel, and click Printer under Hardware and Sound. Right-click your product name, select Printing Preferences, and select your product name again if necessary.

2. Click the Maintenance tab.

3. Click the Extended Settings button.

4. Select Enable EPSON Status Monitor 3 and click OK.

5. Click the Monitoring Preferences button.

6. Click the checkbox for the option that adds the shortcut icon to the taskbar.

7. Click OK to close the open program windows.

Parent topic: Solving Problems Printing from a Computer
Printing is Slow

If printing becomes slow, try these solutions:

• Make sure your system meets the requirements for your operating system. If you are printing a high-resolution image, you may need more than the minimum requirements. If necessary, increase your system's memory.

• If you are using Windows 7, close the Devices and Printers window before you print.

• Make sure Quiet Mode is turned off.

• Clear space on your hard drive or run a defragmentation utility to free up existing space.

• Close any programs you are not using when you print.

• If your product is connected to a USB hub, connect it directly to your computer instead.

• If printing becomes slower after printing continuously for a long time, the product may have automatically slowed down to protect the print mechanism from overheating or becoming damaged. Let the product rest with the power on for 30 minutes, then try printing again.

For the fastest printing, select the following settings in your product software:

• Make sure the paper type setting matches the type of paper you loaded.

• Turn on any high speed settings in your product software.

• Select a lower print quality setting.

• Make sure the ink drying time has not been increased for double-sided printing.

• Windows: Click the Maintenance or Utility tab, select Extended Settings or Speed and Progress, and select the following settings:
  • Always Spool RAW Datatype
  • Page Rendering Mode
  • Print as Bitmap

• Windows: Select Printer Properties, click the More Options tab, and make sure the High Speed setting is enabled.

• Mac: Select System Preferences, select Printers & Scanners, and select your product. Select Options & Supplies, select Options (or Driver), and enable the High Speed Printing setting.

If printing is still slow and you are using Windows 7 or Windows Vista, try the following:

1. Click 🌐 and select Computer or My Computer. Double-click the C: drive and open these folders: ProgramData > EPSON > PRINTER.
Note: If you do not see the ProgramData folder, open the Organize menu and select Folder and search options. In the window that appears, click the View tab, select Show hidden files, folders, and drives in the Advanced settings list, and click OK.

2. Right-click the EPAUDF01.AUD file and select Delete.
3. Restart your computer and try printing again.

Blank Pages Print

If blank pages print unexpectedly, try these solutions:

• Make sure you selected the correct paper size settings in your printing program and printer software.
• If a blank page exists in a document you are printing and you want to skip printing it, select the Skip Blank Page setting in your printer software, if available.
• Run a print head nozzle check to see if any of the nozzles are clogged. Then clean the print head, if necessary.
• Make sure your product is selected as the printer in your printing program.

Parent topic: Solving Page Layout and Content Problems
Related concepts
Print Head Cleaning
Print Head Nozzle Check
Incorrect Margins on Printout

If your printed page has incorrect margins, try these solutions:

- Make sure you selected the correct paper size settings in your printing program and printer software.
- Make sure you selected the correct margins for your paper size in your printing program.
- Make sure your paper is positioned correctly for feeding into the product.
- When placing originals on the scanner glass, align the corner of the original with the corner indicated by the arrow. If the edges of the copy are cropped, move the original slightly away from the corner.
- Clean the scanner glass and the document cover. If there is dust or stains on the glass, the copy area may extend to include the dust or stains.

You can use the preview option in your printer software to check your margins before you print.

Incorrect Characters Print

If incorrect characters appear in your prints, try these solutions before reprinting:

- Make sure any cables are securely connected at both ends.
- In Windows, delete all jobs from the Windows Spooler. Click Print Queue on the Maintenance tab in the printer settings window, and cancel any stalled print jobs.
- If your product is connected to a USB hub, connect it directly to your computer instead.
- If your computer entered sleep mode the last time you printed, the next print job after your computer exits sleep mode may contain garbled characters. Print your document again.
• If incorrect characters still appear in your prints, try connecting your product using a different cable.

• **Windows or Mac**: Make sure you are using the printer software for this product. Check the product name at the top of the driver window.

**Parent topic**: Solving Page Layout and Content Problems

### Incorrect Image Size or Position

If your printed image is the wrong size or in the wrong position, try these solutions:

• Make sure you selected the correct paper size and layout settings in your printing program and printer software.

• Make sure you selected the correct paper size on the control panel.

• Make sure your paper is positioned correctly for feeding into the printer.

• Slide the edge guides against the edges of the paper.

• If the edges of a copy are cropped, slightly move the original away from the edges of the scanner glass.

• Be sure to select the correct **Original Size** setting for your original in the Copy settings.

You can use the preview option in your printer software to check your margins before you print.

### Slanted Printout

If your printouts are slanted, try these solutions:

• Slide the edge guides against the edges of the paper.

• Select a higher print quality setting in your printer software.

• Turn off any high speed settings in your product software.

• Align the print head.

• Adjust the print quality.

• Make sure the product is not printing while tilted or at an angle.
Solving Print Quality Problems

Check these sections if your printouts have problems with print quality, but your image looks fine on your computer screen.

Note: When printing using AirPrint, the available print settings are different from those covered in this manual. See the Apple website for details.

White or Dark Lines in Printout
Blurry or Smeared Printout
Faint Printout or Printout Has Gaps
Grainy Printout
Incorrect Colors

Parent topic: Solving Problems

White or Dark Lines in Printout

If you notice white or dark lines in your prints (also called banding), try these solutions before you reprint:

• Run a nozzle check to see if any of the print head nozzles are clogged. Then clean the print head, if necessary.
• Make sure the paper type setting matches the type of paper you loaded.
• Make sure you loaded the printable side of the paper correctly for your product.
• Turn off any high speed settings in your product software.
• Align the print head.
• Adjust the print quality in the product software.
• You may need to replace an ink pack.

Parent topic: Solving Print Quality Problems
Blurry or Smeared Printout

If your printouts are blurry or smeared, try these solutions:

- Make sure your paper is not damp, curled, old, or loaded incorrectly in your product.
- Slide the edge guides to the edges of the paper.
- Use a support sheet with special paper, or load special paper one sheet at a time.
- Make sure your paper meets the specifications for your product.
- Use Epson papers to ensure proper saturation and absorption of genuine Epson inks.
- Make sure the paper type setting in your product software matches the type of paper you loaded.
- Make sure you loaded the printable side of the paper correctly for your product.
- If you are printing on thick paper or envelopes, turn on the Thick Paper setting from the control panel or select Thick Paper and Envelopes in the Extended Settings of the printer software. (Turning this setting on will decrease print speed.)
- If you are printing on thick paper, select a thick paper Paper Type setting on the control panel.
- Remove each sheet from the output tray as it is printed.
- Avoid handling printouts on glossy paper right after printing to allow the ink to set.
- Turn off any high speed settings in your product software.
- If you print on both sides of a sheet of paper, smudges may appear on the reverse side of heavily saturated or dark images. If one side of a sheet will contain a lighter image or text, print that side first.
Make sure the ink has dried before reloading the paper to print on the other side. Adjust the density and/or ink drying time settings.

• If printed copies are smeared, lower the copy density setting on the product control panel.
• Run a nozzle check to see if any of the print head nozzles are clogged. Then clean the print head, if necessary.
• Align the print head.
• Adjust the print quality in the product software.
• Clean the paper path.
• Do not press too hard on the original or the document cover when you are scanning originals on the scanner glass.
• Clean the scanner glass.
• Clean the ADF.

**Note:** Your product will not operate properly while tilted at an angle. Place it on a flat, stable surface that extends beyond the base of the product in all directions.

Faint Printout or Printout Has Gaps

If your printouts are faint or have gaps, try these solutions:

- Run a nozzle check to see if any of the print head nozzles are clogged. Then clean the print head, if necessary.
- The ink packs may be old or low on ink, and you may need to replace them.
- Make sure the paper type setting matches the type of paper you loaded.
- Make sure your paper is not damp, curled, old, or loaded incorrectly in your product.
- Align the print head.
- Adjust the print quality in the product software.
- Clean the paper path.

Grainy Printout

If your printouts are grainy, try these solutions:

- Make sure you loaded the printable side of the paper correctly for your product.
- Select a higher print quality setting and turn off any high speed settings in your product software.
• Run a nozzle check to see if any of the print head nozzles are clogged. Then clean the print head, if necessary.
• Align the print head.
• Adjust the print quality.
• You may need to increase the image resolution or print a smaller size; see your software documentation.

**Note:** Images from the Internet may be low resolution and not result in a high quality printout.

• If you enlarged the image size in an image-editing program, you need to increase the image resolution setting to retain a high image quality. Increase the image resolution by the same amount you increase the image size. For example, if the image resolution is 300 dpi (dots per inch) and you will double the image size for printing, change the resolution setting to 600 dpi.

**Note:** Higher resolution settings result in larger file sizes, which take longer to process and print. Consider the limitations of your computer system when selecting a resolution, and select the lowest possible resolution that produces acceptable quality to keep file sizes manageable.

### Incorrect Colors

If your printouts have incorrect colors, try these solutions:
• Make sure the paper type setting matches the paper you loaded.
• Make sure the Grayscale setting is not selected in your printer software.
• If you selected **Standard-Vivid** (Windows) or **Normal-Vivid** (Mac) as the quality setting in the printer software, try selecting **Standard** (Windows) or **Normal** (Mac) instead.

• Run a nozzle check to see if any of the print head nozzles are clogged. Then clean the print head, if necessary.

• The ink packs may be old, and you may need to replace them.

• After you print, the colors in your printout need time to set as the ink dries. During this time, the colors may look different than you expect. To speed up drying time, do not stack your printouts on top of each other.

• Your printed colors can never exactly match your on-screen colors. However, you can use a color management system to get as close as possible. Try using the color management options in your printer software.

• Try turning off the **PhotoEnhance** setting in Windows.

• For best results, use genuine Epson paper.

• On the product control panel, change the **Fix Photo** setting from **Auto** to another option, or select **Enhance Off**.

### Solving Scanning Problems

Check these solutions if you have problems scanning with your product.

**Scanning Software Does Not Operate Correctly**

**Cannot Start Epson Scan 2**
Parent topic: Solving Problems

Scanning Software Does Not Operate Correctly

If your scanning software does not operate correctly, try these solutions:

• Make sure your computer has adequate memory and meets the system requirements for your operating system.

• Make sure your computer is not running in a power-saving mode, such as sleep or standby. If so, wake your system and restart your scanning software.

• If you upgraded your operating system but did not reinstall your scanning software, try reinstalling it.

• In Windows, make sure your product is listed as a valid device in the Scanners and Cameras control panel.

Mac System Requirements

Cannot Start Epson Scan 2

If you cannot start Epson Scan 2, try these solutions:

• Make sure your product is turned on and any interface cables are securely connected at both ends.

• Make sure Epson Scan 2 is selected as your scanning program.

• Make sure your computer is not running in a power-saving mode, such as sleep or standby. If so, wake your system and restart Epson Scan 2.

• Check the connection setting and test the connection using Epson Scan 2 Utility:

  **Windows 10**: Click and select EPSON > Epson Scan 2 Utility. Make sure the correct product is selected. If necessary, select the Other tab and click Reset.

  **Windows 8.x**: Navigate to the Apps screen and select Epson Scan 2 Utility. Make sure the correct product is selected. If necessary, select the Other tab and click Reset.

  **Windows (other versions)**: Click or Start > All Programs or Programs > EPSON > Epson Scan 2 > Epson Scan 2 Utility. Make sure the correct product is selected. If necessary, select the Other tab and click Reset.
Mac: Open the Applications folder, click Epson Software, and click Epson Scan 2 Utility. Make sure the correct product is selected. If necessary, select the Other tab and click Reset.

- Make sure you do not have multiple versions of Epson Scan 2 installed. If you do, uninstall both versions and install one version.
- If you upgraded your operating system but did not reinstall Epson Scan 2, try reinstalling it.
- If the user restriction feature (Access Control) is enabled, a user ID and password are required to scan. If you do not know the user ID or password, contact your administrator for assistance.

Solving Scanned Image Quality Problems

Check these sections if a scanned image on your computer screen has a quality problem.

- Image Consists of a Few Dots Only
- Line of Dots Appears in All Scanned Images
- Straight Lines in an Image Appear Crooked
- Image is Distorted or Blurry
- Image Colors are Patchy at the Edges
- Image is Too Dark
- Back of Original Image Appears in Scanned Image
- Ripple Patterns Appear in an Image
- Scanned Image Colors Do Not Match Original Colors
- Scanned Image Edges are Cropped

Parent topic: Solving Problems

Image Consists of a Few Dots Only

If your scanned image consists only of a few dots, try these solutions:

- Make sure you placed your original for scanning facing the correct way.
- If the Image Type setting is Black & White, adjust the Threshold and scan again.
- Remove any lint or dirt from your original.
- Do not press on the original or the document cover with too much force.
Line of Dots Appears in All Scanned Images

If a line of dots appears in all your scanned images, clean the scanner glass with a soft, dry, lint-free cloth or use a small amount of glass cleaner on the cloth, if necessary. Paper towels are not recommended.

**Caution:** Do not spray glass cleaner directly on the scanner glass.

If you are scanning from the ADF, try cleaning the ADF and scan again.

**Parent topic:** Solving Scanned Image Quality Problems

**Related tasks**
Cleaning Your Product

Straight Lines in an Image Appear Crooked

If straight lines in an original appear crooked in a scanned image, make sure to place your original straight when you scan it.

If you are scanning from the ADF, try cleaning the ADF and scan again.

**Parent topic:** Solving Scanned Image Quality Problems

**Related tasks**
Cleaning Your Product

Image is Distorted or Blurry

If a scanned image appears distorted or blurry, try these solutions:

- Do not move your original or your product during scanning.
- Your product will not operate properly while tilted at an angle. Place your product on a flat, stable surface that extends beyond its base in all directions.
• Adjust these Epson Scan 2 settings (if available) and try scanning again:
  • Increase the **Resolution** setting.
  • If the **Image Type** setting is **Black & White**, adjust the **Threshold** setting.
  • If the **Image Type** setting is **Color** or **Grayscale**, select the **Unsharp Mask** setting.
  • If the **Image Type** setting is **Black & White**, select **Text Enhancement**. If the **Image Type** setting is **Color** or **Grayscale**, change the **Text Enhancement** setting to **High**.

**Parent topic:** Solving Scanned Image Quality Problems  
**Related references**  
Additional Scanning Settings - Advanced Settings Tab

---

**Image Colors are Patchy at the Edges**  
If you are scanning a thick or warped original, cover its edges with paper to block external light as you scan it.  

**Parent topic:** Solving Scanned Image Quality Problems  
**Related references**  
Additional Scanning Settings - Advanced Settings Tab

---

**Image is Too Dark**  
If your scanned image is too dark, try these solutions:  
• If the **Image Type** is set to **Color** or **Grayscale**, adjust the **Brightness** setting.  
• Check the brightness and contrast settings of your computer monitor.  

**Parent topic:** Solving Scanned Image Quality Problems  
**Related references**  
Additional Scanning Settings - Advanced Settings Tab

---

**Back of Original Image Appears in Scanned Image**  
If an image from the back of a thin original appears in your scanned image, try these solutions:  
• Place a piece of black paper on the back of the original and scan it again.  
• Adjust these Epson Scan 2 settings (if available) and try scanning again:  
  • Select the **Advanced Settings** tab and adjust the **Brightness** setting.
If the **Image Type** is set to **Black & White**, select **Text Enhancement**. If the **Image Type** is set to **Color** or **Grayscale**, change the **Text Enhancement** setting to **High**.

**Ripple Patterns Appear in an Image**

You may see a ripple pattern (called a moiré) in scanned images of printed documents. This is caused by interference from differing pitches in the scanner's screen and your original's halftone screen. To reduce this effect, adjust these Epson Scan settings (if available) and try scanning again:

- Select the **Descreening** setting.
- Select a lower **Resolution** setting.

**Scanned Image Colors Do Not Match Original Colors**

Printed colors can never exactly match the colors on your computer monitor because printers and monitors use different color systems: monitors use RGB (red, green, and blue) and printers typically use CMYK (cyan, magenta, yellow, and black). Check the color matching and color management capabilities of your computer, display adapter, and the software you are using to see if they are affecting the palette of colors you see on your screen. To adjust the colors in your scanned image, adjust these Epson Scan 2 settings (if available) and try scanning again:

- If the **Image Type** setting is **Color** or **Grayscale**, adjust the **Contrast** setting.
- If the **Image Type** setting is **Black & White** or **Grayscale**, adjust the **Color Enhance** setting.

**Scanned Image Edges are Cropped**

If the edges of a scanned image are cropped, make sure your original is placed correctly for scanning. If necessary, move your original away from the edges of the scanner glass slightly.

Solving Faxing Problems

Check these solutions if you have problems faxing with your product.

Cannot Send or Receive Faxes
Cannot Receive Faxes with a Telephone Connected to Your Product
Fax Memory Full Error Appears
Sent Fax Quality is Poor
Sent Fax is Received in an Incorrect Size
Received Fax Quality is Poor
Received Fax is Not Printed

Parent topic: Solving Problems

Cannot Send or Receive Faxes

If you cannot send or receive faxes, try these solutions:

• If an error code is displayed on the control panel, try the solutions suggested in the error code list.
• If you are faxing from a computer, use the Epson FAX Utility to send your fax.
• Make sure the recipient’s fax machine is turned on and working.
• Make sure paper is loaded correctly in your product.
• Make sure you have set up your header information and have not blocked your caller ID. Otherwise, your faxes might be rejected by the recipient’s fax machine.
• If user restriction has been enabled, you may need to enter a user name and password. Contact your administrator for assistance.
• If you did not connect a telephone to your product, set the Receive Mode setting to Auto so you can receive faxes automatically.
• Check that the cable connecting your telephone wall jack to your product’s LINE port is secure.
• Print a fax connection report using your product control panel or fax software to help diagnose the problem.
• Verify that the telephone wall jack works by connecting a phone to it and testing it.
• Check the **Line Type** setting and set it to **PBX**. If your phone system requires an external access code to reach an outside line, register the code to the product and add a # (hash) to the beginning of the phone number when dialing.

• If you connected your product to a DSL phone line, you must connect a DSL filter to the phone jack to enable faxing over the line. Contact your DSL provider for the necessary filter.

• If your telephone line has static, turn off your product's error correction mode fax communication setting and try faxing again.

• Try lowering your product's fax speed setting.

• Make sure the error correction mode (ECM) setting is turned on if you are trying to send or receive a color fax.

• If your telephone line uses call waiting and you have trouble receiving faxes, turn off call waiting to prevent disruption of incoming faxes.

• If you have subscribed to a call forwarding service, the product may not be able to receive faxes. Contact your service provider for assistance.

• Check your inbox and delete faxes after reading or printing them. If the inbox is full, the product cannot receive faxes.

• When sending faxes using the subaddress feature, ask the recipient if their fax machine can receive faxes using this feature. Check that the subaddress and password are correct, and that they match with the recipient subaddress and password. Check this when receiving faxes as well.

• When receiving faxes using the subaddress feature, make sure the fax rejection settings are not rejecting the fax.

• If you cannot send faxes at a specified time, make sure the date and time are set correctly on the product.

• If you are receiving faxes using the FAX Utility, check that your product is registered as a fax product in your operating system:
  - **Windows**: Make sure the product appears in **Devices and Printers**, **Printer**, or **Printers and Other Hardware**. If the product does not appear, uninstall and re-install the FAX Utility.
  - **Mac**: Select **System Preferences > Printers & Scanners** (or **Print & Scan** or **Print & Fax**) and make sure your product appears. If your product does not appear, click + and add your product. If the product does appear, double-click it and make sure it is not paused.

**Note**: If your product is connected to a VoIP (Voice over Internet Protocol) phone line, keep in mind that fax machines are designed to work over analog phone lines. Epson cannot guarantee that fax transmission will work when using VoIP.
If your phone line includes voice mail answering services, calls or faxes may be inadvertently received by your voice mail service.

### Cannot Receive Faxes with a Telephone Connected to Your Product

If you cannot receive faxes when a telephone is connected to your product, try these solutions:

- Make sure your telephone is connected to your product's **EXT** port.
- Make sure the Receive Mode is set to **Manual**.

**Note:** When answering a call that is a fax, wait until the product’s LCD screen displays a message that a connection has been made before you hang up.

**Parent topic:** Solving Faxing Problems  
**Related tasks**  
Connecting a Telephone or Answering Machine  
Using the Fax Setting Wizard

### Fax Memory Full Error Appears

If you see an error message telling you that the product's fax memory is full, try these solutions:

- If you set the product to save received faxes in the product's memory or inbox, delete any faxes you have already read.

**Note:** Your product can store up to 200 faxes before its inbox is full.
• If you set the product to save received faxes on a computer, turn on the selected computer. Once the faxes are saved on the computer, they are deleted from the product's memory.

• If you set the product to save received faxes on a USB device, connect the selected USB device containing the save fax folder to the product. Once the faxes are saved on the USB device, they are deleted from the product's memory.

**Note:** Make sure the USB device has enough available memory and is not write protected.

• If the memory is full, try sending a monochrome fax using the **Direct Send** feature, sending your fax by using the **On Hook** feature, sending your faxes by dialing from the external phone device, or sending your faxes in smaller batches.

• If the product cannot print a received fax due to a product error, such as a paper jam, the memory full error may appear. Clear any product errors, then ask the sender to resend the fax.

**Parent topic:** Solving Faxing Problems

**Related tasks**

- Saving and Viewing Received Faxes

**Sent Fax Quality is Poor**

If the sent fax quality is poor, try these solutions:

• Clean the scanner glass.

• Clean the ADF.

• Try changing the resolution or density setting on the control panel.

• Try changing the original type setting on the control panel.

• If you are sending a monochrome fax to a single recipient, try sending the fax using the **Direct Send** feature.

**Note:** If you send a high-resolution monochrome fax without using the **Direct Send** feature, the product may automatically lower the resolution.

• Try enabling the error correction mode (ECM) setting.

Receive Settings - Fax

Related tasks
Saving and Viewing Received Faxes

Received Fax is Not Printed
If a received fax is not printed, try these solutions:
• Make sure the product is free of errors. The product cannot print received faxes if an error has occurred with the product, such as a paper jam.
• If the product has been set to save received faxes in the product's memory or inbox, received faxes are not automatically printed. Check the Receive Settings options on the product control panel and change them, if necessary.
Solving USB Device Problems

Check these solutions if you have problems using USB devices with your product.

- **Cannot View or Print from a USB Device**
- **Cannot Save Files on a USB Device**
- **Cannot Transfer Files To or From a USB Device**

Parent topic: Solving Problems

**Cannot View or Print from a USB Device**

If you cannot view or print photos or documents from a USB device connected to your product, try these solutions:

- Make sure memory devices are enabled on the product.
- Make sure your device is compatible with the product.
- Make sure the files on your device are in the correct format.

Uninstall Your Product Software
If you have a problem that requires you to uninstall and re-install your software, follow the instructions for your operating system.

Uninstalling Product Software - Windows
Uninstalling Product Software - Mac

Parent topic: Solving Problems

Uninstalling Product Software - Windows
You can uninstall and then re-install your product software to solve certain problems.

1. Turn off the product.
2. Disconnect any interface cables.
3. Do one of the following:

   • **Windows 10**: Click (Settings) > Apps > Apps & features. Then select the program you want to uninstall and select **Uninstall**.
• **Windows 8.x**: Navigate to the Apps screen and select Control Panel > Programs > Programs and Features. Select the uninstall option for your Epson product, then select Uninstall/Change.

  **Note**: If you see a User Account Control window, click Yes or Continue.

  Select your product again, if necessary, then select OK, and click Yes to confirm the uninstallation.

• **Windows (other versions)**: Click or Start, and select All Programs or Programs. Select EPSON, select your product, then click EPSON Printer Software Uninstall.

  **Note**: If you see a User Account Control window, click Yes or Continue.

  In the next window, select your product and click OK. Then follow any on-screen instructions.

4. Do one of the following to uninstall Epson Scan 2, then follow any on-screen instructions:

   • **Windows 10**: Select Epson Scan and click Uninstall.

   • **Windows 8.x/Windows 7/Windows Vista**: Select Epson Scan and click Uninstall/Change.

5. Restart your computer, then see the Start Here sheet to re-install your software.

  **Note**: If you find that re-installing your product software does not solve a problem, contact Epson.

**Parent topic**: Uninstall Your Product Software

### Uninstalling Product Software - Mac

In most cases, you do not need to uninstall your product software before re-installing it. However, you can download the Uninstaller utility from the Epson support website to uninstall your product software as described here.

**Note**: If you find that re-installing your product software does not solve a problem, contact Epson.

1. To download the Uninstaller utility, visit epson.com/support (U.S.), epson.ca/support (Canada), or epson.com.jm/support (Caribbean) and select your product.

2. Click Downloads.

3. Select your operating system, click Utilities, locate the Uninstaller utility, and click Download.

4. Run the file you downloaded.
5. Double-click the **Uninstaller** icon.
6. In the Epson Uninstaller screen, select the checkbox for each software program you want to uninstall.
7. Click **Uninstall**.
8. Follow the on-screen instructions to uninstall the software.
9. Reinstall your product software.

**Note**: If you uninstall the printer driver and your product name remains in the **Print & Fax**, **Print & Scan**, or **Printers & Scanners** window, select your product name and click the – (remove) icon to remove it.

**Parent topic**: Uninstall Your Product Software

### Where to Get Help

If you need to contact Epson for technical support services, use the following support options.

**Internet Support**

Visit Epson’s support website at [epson.com/support](http://epson.com/support) (U.S.), [epson.ca/support](http://epson.ca/support) (Canada), or [epson.com.jm/support](http://epson.com.jm/support) (Caribbean) and select your product for solutions to common problems. You can download drivers and documentation, get FAQs and troubleshooting advice, or e-mail Epson with your questions.

**Speak to a Support Representative**

Before you call Epson for support, please have the following information ready:

- Product name
- Product serial number (located on a label on the product)
- Proof of purchase (such as a store receipt) and date of purchase
- Computer configuration
- Description of the problem

Then call:

- U.S.: (562) 276-4382, 6 AM to 8 PM, Pacific Time, Monday through Friday, and 7 AM to 4 PM, Pacific Time, Saturday
- Canada: (905) 709-3839, 6 AM to 8 PM, Pacific Time, Monday through Friday, and 7 AM to 4 PM, Pacific Time, Saturday
Days and hours of support are subject to change without notice. Toll or long distance charges may apply.

Purchase Supplies and Accessories
You can purchase genuine Epson ink and paper at epson.com (U.S. sales), epson.ca (Canadian sales), or epson.com.jm (Caribbean sales). You can also purchase supplies from an Epson authorized reseller. To find the nearest one, call 800-GO-EPSON (800-463-7766) in the U.S. or 800-807-7766 in Canada.

### Resolution

**Monochrome**
- **Standard**: 203 pixels per inch × 98 lines per inch (8 pixels per mm × 3.85 lines per mm)
- **Fine**: 203 pixels per inch × 196 lines per inch (8 pixels per mm × 7.7 lines per mm)
- **Super Fine**: 203 pixels per inch × 392 lines per inch (8 pixels per mm × 15.4 lines per mm)
- **Ultra Fine**: 406 pixels per inch × 392 lines per inch (16 pixels per mm × 15.4 lines per mm)

### Color

200 × 200 dpi

### Page memory

Up to 550 pages (when an ITU-T No. 1 chart is received in monochrome draft mode)

### Redial

2 times (with 1 minute interval); may differ depending on your country or region

### Interface

- RJ-11 Phone Line
- RJ-11 Telephone set connection

### Ink Pack Specifications

**Note**: This printer is designed for use with Epson ink packs only, not third-party ink packs or ink. Other brands of ink supplies are not compatible and, if described as compatible, may not function properly or continuously. Such restrictions can be avoided with some other printers such as Epson EcoTank cartridge-free printers.

The included initial ink packs are designed for reliable printer setup and cannot be used as replacement ink packs or resold. After setup, the remaining ink is available for printing. Yields are based on ISO 24711 in default mode, printing continuously. Yields vary due to print images, settings, and temperatures. Printing infrequently or primarily with one color reduces yields. All ink packs must be installed with ink for printing and printer maintenance. For print quality, some ink remains in replaced ink packs.

**Color**

Cyan, Magenta, Yellow, Black
Ink pack life
- Opened package: 6 months
- Unopened package: do not use if the date on the package has expired

Temperature
- Storage: –22 to 104 °F (–30 to 40 °C)
- 1 month at 104 °F (40 °C)
- Ink freezes at 8.6 °F (–13 °C)
- Ink thaws and is usable after 3 hours at 77 °F (25 °C)

Dimension Specifications
- **Height**
  - Stored: 14.1 inches (357 mm)
  - Stored with optional cassette unit installed: 18.0 inches (457 mm)
  - Printing: 17.7 inches (449 mm)
  - Printing with optional cassette unit installed: 21.6 inches (549 mm)
- **Width**
  - Stored: 16.7 inches (425 mm)
  - Printing: 16.7 inches (425 mm)
- **Depth**
  - Stored: 21.1 inches (535 mm); with output tray installed
  -Printing: 22.8 inches (578 mm)
  - Printing with optional cassette unit installed: 22.8 inches (578 mm)
- **Weight**
  - 40.6 lb (18.4 kg)
  - (without ink packs or power cord) With optional cassette unit installed: 50.7 lb (23.0 kg)

Electrical Specifications
- **Power supply rating**
  - 100 to 240 V
Rated frequency range 50 to 60 Hz
Rated current 0.9 to 0.5 A
Power consumption
Standalone copying: Approximately 23 W (ISO/IEC24712)
Ready mode: Approximately 10 W
Sleep mode: Approximately 1.5 W
Power off mode: Approximately 0.2 W

### Safety and Approvals Specifications

**United States**

Safety: UL60950-1

EMC: FCC part 15 Subpart B Class B

**Canada**

Safety: CAN/CSA C22.2 No. 60950-1

EMC: CAN/CSA-CEI/IEC CISPR 22 Class B

This equipment contains the following wireless module:

- Manufacturer: Askey Computer Corporation.
- Type: WLU6320-D69 (RoHS)

This product conforms to Part 15 of FCC Rules and RSS-210 of the IC Rules. Epson cannot accept responsibility for any failure to satisfy the protection requirements resulting from a non-recommended modification of the product. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation of the device.

To prevent radio interference to the licensed service, this device is intended to be operated indoors and away from windows to provide maximum shielding. Equipment (or its transmit antenna) that is installed outdoors is subject to licensing.

This equipment complies with FCC/IC radiation exposure limits set forth for an uncontrolled environment and meets the FCC radio frequency (RF) Exposure Guidelines in Supplement C to OET65 and RSS-102 of the IC radio frequency (RF) Exposure rules. This equipment should be installed and operated so that
the radiator is kept at least 7.9 inches (20 cm) or more away from a person's body (excluding extremities: hands, wrists, feet and ankles).

Important Safety Instructions

Before using your Epson product, read and follow these safety instructions.

General Product Safety Instructions
Ink Pack Safety Instructions
Wireless Connection Safety Instructions
LCD Screen Safety Instructions
Telephone Equipment Safety Instructions

Parent topic: Notices

General Product Safety Instructions

• Be sure to follow all warnings and instructions marked on the product.
• Use only the type of power source indicated on the product's label.
• Use only the power cord that comes with the product. Use of another cord may cause fires or shock. Do not use the cord with any other equipment.
• Make sure the AC power cord meets the relevant local safety standard.
• Place the product near a wall outlet where the plug can be easily unplugged.
• Avoid plugging the product into an outlet on the same circuit as a photo copier or air control system that regularly switches on and off, or on an outlet controlled by a wall switch or timer.
• Do not let the power cord become damaged or frayed. Place it to avoid abrasions, cuts, fraying, crimping, and kinking. Do not place objects on top of it and do not allow it to be stepped on or run over. Be careful to keep the cord straight at each end.

• If you use an extension cord with the product, make sure the total ampere rating of the devices plugged into the extension cord does not exceed the cord's ampere rating. Also, make sure the total ampere rating of all devices plugged into the wall outlet does not exceed the wall outlet's ampere rating.

• Always turn off the product using the power button, and wait until the power light stops flashing before unplugging the product or cutting off power to the electrical outlet.

• If you will not be using the product for a long period, unplug the power cord from the electrical outlet.

• Place the product on a flat, stable surface that extends beyond its base in all directions. It will not operate properly if it is tilted or at an angle.

• Make sure the back of the product is at least 4 inches (10 cm) away from the wall.

• Allow space behind the product for the cables, and space above the product so that you can fully raise the document cover.

• Leave enough space in front of the product for the paper to be fully ejected.

• Avoid locations that are subject to rapid changes in heat or humidity, shocks or vibrations, or dust.

• Do not place or store the product outdoors.

• Do not place the product near excessive heat sources or in direct sunlight.

• Leave enough room around the product for sufficient ventilation. Do not block or cover openings in the case or insert objects through the slots.

• Keep the product away from potential sources of electromagnetic interference, such as loudspeakers or the base units of cordless telephones.

• Keep your product at least 8.7 inches (22 cm) away from cardiac pacemakers to prevent your product's radio waves from affecting the operation of the pacemaker.

• When connecting the product to a computer or other device with a cable, ensure the correct orientation of the connectors. Each connector has only one correct orientation. Inserting a connector in the wrong orientation may damage both devices connected by the cable.

• Do not spill liquid on the product or use the product with wet hands.

• Do not use aerosol products that contain flammable gases inside or around the product. Doing so may cause fire.

• Do not press too hard on the document table when placing originals.
• Do not open the scanner section while the product is copying, printing, scanning, or performing any other functions.
• Be careful not to trap your fingers when closing the document cover or scanner.
• Except as specifically explained in your documentation, do not attempt to service or disassemble the product yourself.
• Unplug the product and refer servicing to qualified service personnel under the following conditions: if the power cord or plug is damaged; if liquid has entered the product; if the product has been dropped or the case damaged; if the product does not operate normally or exhibits a distinct change in performance. Adjust only those controls that are covered by the operating instructions.
• Leave the ink packs installed. Removing the ink packs can dehydrate the print head and may prevent the product from printing.
• Before transporting the product, make sure that the print head is in the home (far right) position.
• When storing or transporting the product, do not tilt it, stand it on its side, or turn it upside down; otherwise ink may leak.

Parent topic: Important Safety Instructions

Ink Pack Safety Instructions

• Keep ink packs and maintenance boxes out of the reach of children and do not drink the ink.
• Be careful when you handle used ink packs; there may be ink remaining around the ink supply port. If ink gets on your skin, wash it off with soap and water. If it gets in your eyes, flush them immediately with water. If discomfort or vision problems continue after a thorough flushing, see a doctor immediately. If ink gets in your mouth, see a doctor right away.
• Do not put your hand inside the product or touch the ink packs during printing.
• Install a new ink pack immediately after removing an expended one. Leaving ink packs uninstalled can dry out the print head and may prevent the product from printing.
• Do not remove or tear the label on the ink pack; this can cause leakage.
• Do not remove the transparent seal from the ink supply area. This may cause the ink pack to become unusable.
• Do not touch the green IC chip on the side of the handle. This may prevent normal operation.
• Do not shake ink packs too vigorously; otherwise ink may leak.
• Use an ink pack before the date printed on its package.
• Do not disassemble an ink pack or a maintenance box. Ink may get in your eyes or on your skin.
• Store ink packs in a cool, dark place.
• After bringing an ink pack inside from a cold storage site, allow it to warm up at room temperature for at least 12 hours before using it.
• Store ink packs with the bottom facing down.

Parent topic: Important Safety Instructions

**Wireless Connection Safety Instructions**

Radio waves from this product may adversely affect the operation of medical equipment or automatically controlled devices, such as pacemakers, automatic doors or fire alarms. When using this product near such devices or inside a medical facility, follow the directions from authorized staff members at the facility, and follow all posted warnings and directions on the device to avoid causing an accident.

Parent topic: Important Safety Instructions

**LCD Screen Safety Instructions**

- Use only a dry, soft cloth to clean the LCD screen. Do not use liquid or chemical cleansers.
- If the LCD screen is damaged, contact Epson. If the liquid crystal solution gets on your hands, wash them thoroughly with soap and water. If the liquid crystal solution gets into your eyes, flush them immediately with water. If discomfort or vision problems remain after a thorough flushing, see a doctor immediately.
- Do not press too hard on the LCD screen or subject it to heavy impacts.
- Do not use a pointy or sharp object, such as a pen or your fingernail, to operate the LCD screen.
- If the LCD screen chips or cracks, do not touch or attempt to remove the broken pieces; contact Epson for support.

Parent topic: Important Safety Instructions

**Telephone Equipment Safety Instructions**

When using telephone equipment, you should always follow basic safety precautions to reduce the risk of fire, electric shock, and personal injury, including the following:

- Do not use the Epson product near water.
- Avoid using a telephone during an electrical storm. There may be a remote risk of electric shock from lightning.
- Do not use a telephone to report a gas leak in the vicinity of the leak.
Caution: To reduce the risk of fire, use only a No. 26 AWG or larger telecommunication line cord.

Parent topic: Important Safety Instructions

FCC Compliance Statement

For United States Users

This equipment complies with Part 68 of the FCC rules and the requirements adopted by the Administrative Council for Terminal Attachments ("ACTA"). On the surface of this equipment is a label that contains, among other information, a product identifier in the format US:AAAEQ##TXXXX. If requested, this number must be provided to the telephone company.

Applicable certification jack Universal Service Order Codes ("USOC") for the equipment: RJ11C.

A plug and jack used to connect this equipment to the premises wiring and telephone network must comply with the applicable FCC Part 68 rules and requirements adopted by the ACTA. A compliant telephone cord and modular plug is provided with this product. It is designed to be connected to a compatible modular jack that is also compliant. See installation instructions for details.

The REN is used to determine the number of devices that may be connected to a telephone line. Excessive RENs on a telephone line may result in the devices not ringing in response to an incoming call. In most but not all areas, the sum of RENs should not exceed five (5.0). To be certain of the number of devices that may be connected to a line, as determined by the total RENs, contact the local telephone company. For products approved after July 23, 2001, the REN for this product is part of the product identifier that has the format US:AAAEQ##TXXXX. The digits represented by ## are the REN without a decimal point (e.g., 03 is a REN of 0.3). For earlier products, the REN is separately shown on the label.

If this equipment causes harm to the telephone network, the telephone company will notify you in advance that temporary discontinuance of service may be required. But if advance notice isn't practical, the telephone company will notify the customer as soon as possible. Also, you will be advised of your right to file a complaint with the FCC if you believe it is necessary.

The telephone company may make changes in its facilities, equipment, operations or procedures that could affect the operation of the equipment. If this happens the telephone company will provide advance notice in order for you to make necessary modifications to maintain uninterrupted service.

If you have problems with this product and require technical or customer support, please visit www.epson.com for more information.

This product is not intended to be repaired by the customer. If you experience trouble connecting this equipment to a telephone line, please contact:

Name: Epson America, Inc.
Address: 3840 Kilroy Airport Way, Long Beach, CA 90806 U.S.A.
Telephone: (562) 981-3840

If the equipment is causing harm to the telephone network, the telephone company may request that you disconnect the equipment until the problem is resolved.

This equipment may not be used on coin service provided by the telephone company. Connection to party line service is subject to state tariffs. Contact the state public utility commission, public service commission or corporation commission for information.

If your home has specially wired alarm equipment connected to the telephone line, ensure the installation of this equipment does not disable your alarm equipment. If you have questions about what will disable alarm equipment, consult your telephone company or a qualified installer.

The Telephone Consumer Protection Act of 1991 makes it unlawful for any person to use a computer or other electronic device, including fax machines, to send any message unless such message clearly contains in a margin at the top or bottom of each transmitted page or on the first page of the transmission, the date and time it is sent and an identification of the business or other entity, or other individual sending the message and the telephone number of the sending machine or such business, other entity, or individual. (The telephone number provided may not be a 900 number or any other number for which charges exceed local or long-distance transmission charges.)

In order to program this information into your fax machine, click the link below for instructions on entering fax header information.

According to the FCC’s electrical safety advisory, we recommend that you may install an AC surge arrester in the AC outlet to which this equipment is connected. Telephone companies report that electrical surges, typically lightning transients, are very destructive to customer terminal equipment connected to AC power sources and that this is a major nationwide problem.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio or television reception. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause interference to radio and television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.
WARNING
The connection of a non-shielded equipment interface cable to this equipment will invalidate the FCC Certification or Declaration of this device and may cause interference levels which exceed the limits established by the FCC for this equipment. It is the responsibility of the user to obtain and use a shielded equipment interface cable with this device. If this equipment has more than one interface connector, do not leave cables connected to unused interfaces. Changes or modifications not expressly approved by the manufacturer could void the user’s authority to operate the equipment.

For Canadian Users
1. This product meets the applicable Innovation, Science and Economic Development Canada technical specifications.
2. The Ringer Equivalence Number indicates the maximum number of devices allowed to be connected to a telephone interface. The termination of an interface may consist of any combination of devices subject only to the requirement that the sum of the RENs of all the devices does not exceed five.

CAN ICES-3(B)/NMB-3(B)

Le présent produit est conforme aux spécifications techniques applicables d'Innovation, Sciences et Développement économique Canada.

L'indice d'équivalence de la sonnerie (IES) sert à indiquer le nombre maximal de dispositifs qui peuvent être raccordés à une interface téléphonique. La terminaison d’une interface peut consister en une combinaison quelconque de dispositifs, à la seule condition que la somme des IES de tous les dispositifs n’excède pas cinq.

CAN ICES-3(B)/NMB-3(B)

Binding Arbitration and Class Waiver

1. DISPUTES, BINDING INDIVIDUAL ARBITRATION, AND WAIVER OF CLASS ACTIONS AND CLASS ARBITRATIONS

1.1 Disputes. The terms of this Section 1 shall apply to all Disputes between you and Epson. The term "Dispute" is meant to have the broadest meaning permissible under law and includes any dispute, claim, controversy or action between you and Epson arising out of or relating to this Agreement, Epson branded products (hardware and including any related software), or other transaction involving you and Epson, whether in contract, warranty, misrepresentation, fraud, tort, intentional tort, statute, regulation, ordinance, or any other legal or equitable basis. "DISPUTE" DOES NOT INCLUDE IP CLAIMS, or more
specifically, a claim or cause of action for (a) trademark infringement or dilution, (b) patent infringement, (c) copyright infringement or misuse, or (d) trade secret misappropriation (an "IP Claim"). You and Epson also agree, notwithstanding Section 1.6, that a court, not an arbitrator, may decide if a claim or cause of action is for an IP Claim.

1.2 Binding Arbitration. You and Epson agree that all Disputes shall be resolved by binding arbitration according to this Agreement. ARBITRATION MEANS THAT YOU WAIVE YOUR RIGHT TO A JUDGE OR JURY IN A COURT PROCEEDING AND YOUR GROUNDS FOR APPEAL ARE LIMITED.

Pursuant to this Agreement, binding arbitration shall be administered by JAMS, a nationally recognized arbitration authority, pursuant to its code of procedures then in effect for consumer related disputes, but excluding any rules that permit joinder or class actions in arbitration (for more detail on procedure, see Section 1.6 below). You and Epson understand and agree that (a) the Federal Arbitration Act (9 U.S.C. §1, et seq.) governs the interpretation and enforcement of this Section 1, (b) this Agreement memorializes a transaction in interstate commerce, and (c) this Section 1 shall survive termination of this Agreement.

1.3 Pre-Arbitration Steps and Notice. Before submitting a claim for arbitration, you and Epson agree to try, for sixty (60) days, to resolve any Dispute informally. If Epson and you do not reach an agreement to resolve the Dispute within the sixty (60) days, you or Epson may commence an arbitration. Notice to Epson must be addressed to: Epson America, Inc., ATTN: Legal Department, 3840 Kilroy Airport Way, Long Beach, CA 90806 (the "Epson Address"). The Dispute Notice to you will be sent to the most recent address Epson has in its records for you. For this reason, it is important to notify us if your address changes by emailing us at EAILegal@ea.epson.com or writing us at the Epson Address above. Notice of the Dispute shall include the sender's name, address and contact information, the facts giving rise to the Dispute, and the relief requested (the "Dispute Notice"). Following receipt of the Dispute Notice, Epson and you agree to act in good faith to resolve the Dispute before commencing arbitration.

1.4 Small Claims Court. Notwithstanding the foregoing, you may bring an individual action in the small claims court of your state or municipality if the action is within that court's jurisdiction and is pending only in that court.

1.5 WAIVER OF CLASS ACTIONS AND CLASS ARBITRATIONS. YOU AND EPSON AGREE THAT EACH PARTY MAY BRING DISPUTES AGAINST THE OTHER PARTY ONLY IN AN INDIVIDUAL CAPACITY, AND NOT AS A PLAINTIFF OR CLASS MEMBER IN ANY CLASS OR REPRESENTATIVE PROCEEDING, INCLUDING WITHOUT LIMITATION FEDERAL OR STATE CLASS ACTIONS, OR CLASS ARBITRATIONS. CLASS ACTION LAWSUITS, CLASS-WIDE ARBITRATIONS, PRIVATE ATTORNEY-GENERAL ACTIONS, AND ANY OTHER PROCEEDING WHERE SOMEONE ACTS IN A REPRESENTATIVE CAPACITY ARE NOT ALLOWED. ACCORDINGLY, UNDER THE ARBITRATION PROCEDURES OUTLINED IN THIS SECTION, AN ARBITRATOR SHALL NOT COMBINE OR CONSOLIDATE MORE THAN ONE PARTY'S CLAIMS WITHOUT THE WRITTEN CONSENT OF ALL AFFECTED PARTIES TO AN ARBITRATION PROCEEDING.
1.6 Arbitration Procedure. If you or Epson commences arbitration, the arbitration shall be governed by the rules of JAMS that are in effect when the arbitration is filed, excluding any rules that permit arbitration on a class or representative basis (the "JAMS Rules"), available at http://www.jamsadr.com or by calling 1-800-352-5267, and under the rules set forth in this Agreement. All Disputes shall be resolved by a single neutral arbitrator, and both parties shall have a reasonable opportunity to participate in the selection of the arbitrator. The arbitrator is bound by the terms of this Agreement. The arbitrator, and not any federal, state or local court or agency, shall have exclusive authority to resolve all disputes arising out of or relating to the interpretation, applicability, enforceability or formation of this Agreement, including any claim that all or any part of this Agreement is void or voidable. Notwithstanding this broad delegation of authority to the arbitrator, a court may determine the limited question of whether a claim or cause of action is for an IP Claim, which is excluded from the definition of "Disputes" in Section 1.1 above. The arbitrator shall be empowered to grant whatever relief would be available in a court under law or in equity. The arbitrator may award you the same damages as a court could, and may award declaratory or injunctive relief only in favor of the individual party seeking relief and only to the extent necessary to provide relief warranted by that party's individual claim. In some instances, the costs of arbitration can exceed the costs of litigation and the right to discovery may be more limited in arbitration than in court. The arbitrator's award is binding and may be entered as a judgment in any court of competent jurisdiction.

You may choose to engage in arbitration hearings by telephone. Arbitration hearings not conducted by telephone shall take place in a location reasonably accessible from your primary residence, or in Orange County, California, at your option.

a) Initiation of Arbitration Proceeding. If either you or Epson decides to arbitrate a Dispute, both parties agree to the following procedure:

(i) Write a Demand for Arbitration. The demand must include a description of the Dispute and the amount of damages sought to be recovered. You can find a copy of a Demand for Arbitration at http://www.jamsadr.com ("Demand for Arbitration").

(ii) Send three copies of the Demand for Arbitration, plus the appropriate filing fee, to: JAMS, 500 North State College Blvd., Suite 600 Orange, CA 92868, U.S.A.

(iii) Send one copy of the Demand for Arbitration to the other party (same address as the Dispute Notice), or as otherwise agreed by the parties.

b) Hearing Format. During the arbitration, the amount of any settlement offer made shall not be disclosed to the arbitrator until after the arbitrator determines the amount, if any, to which you or Epson is entitled. The discovery or exchange of non-privileged information relevant to the Dispute may be allowed during the arbitration.

c) Arbitration Fees. Epson shall pay, or (if applicable) reimburse you for, all JAMS filings and arbitrator fees for any arbitration commenced (by you or Epson) pursuant to provisions of this Agreement.
d) Award in Your Favor. For Disputes in which you or Epson seeks $75,000 or less in damages exclusive of attorney's fees and costs, if the arbitrator's decision results in an award to you in an amount greater than Epson's last written offer, if any, to settle the Dispute, Epson will: (i) pay you $1,000 or the amount of the award, whichever is greater; (ii) pay you twice the amount of your reasonable attorney's fees, if any; and (iii) reimburse you for any expenses (including expert witness fees and costs) that your attorney reasonably accrues for investigating, preparing, and pursuing the Dispute in arbitration. Except as agreed upon by you and Epson in writing, the arbitrator shall determine the amount of fees, costs, and expenses to be paid by Epson pursuant to this Section 1.6d).

e) Attorney's Fees. Epson will not seek its attorney's fees and expenses for any arbitration commenced involving a Dispute under this Agreement. Your right to attorney's fees and expenses under Section 1.6d) above does not limit your rights to attorney's fees and expenses under applicable law; notwithstanding the foregoing, the arbitrator may not award duplicative awards of attorney's fees and expenses.

1.7 Opt-out. You may elect to opt-out (exclude yourself) from the final, binding, individual arbitration procedure and waiver of class and representative proceedings specified in this Agreement by sending a written letter to the Epson Address within thirty (30) days of your assent to this Agreement (including without limitation the purchase, download, installation of the Software or other applicable use of Epson Hardware, products and services) that specifies (i) your name, (ii) your mailing address, and (iii) your request to be excluded from the final, binding individual arbitration procedure and waiver of class and representative proceedings specified in this Section 1. In the event that you opt-out consistent with the procedure set forth above, all other terms shall continue to apply, including the requirement to provide notice prior to litigation.

1.8 Amendments to Section 1. Notwithstanding any provision in this Agreement to the contrary, you and Epson agree that if Epson makes any future amendments to the dispute resolution procedure and class action waiver provisions (other than a change to Epson's address) in this Agreement, Epson will obtain your affirmative assent to the applicable amendment. If you do not affirmatively assent to the applicable amendment, you are agreeing that you will arbitrate any Dispute between the parties in accordance with the language of this Section 1 (or resolve disputes as provided for in Section 1.7, if you timely elected to opt-out when you first assented to this Agreement).

1.9 Severability. If any provision in this Section 1 is found to be unenforceable, that provision shall be severed with the remainder of this Agreement remaining in full force and effect. The foregoing shall not apply to the prohibition against class or representative actions as provided in Section 1.5. This means that if Section 1.5 is found to be unenforceable, the entire Section 1 (but only Section 1) shall be null and void.
