Changing the Projection Mode
You can change the projection mode to flip the image over top-to-bottom or left-to-right using the projector menus.
1. Press the Menu button.
2. Select Extended > Projection.
3. Select a projection mode.
4. When you’re done, press the Menu button to exit.

Adjusting Image Position
1. Press the Lens Shift button on the remote control or projector.
2. Press the arrow buttons to adjust the position of the projected image.
3. When you’re done, press the Esc button to finish the adjustment.

Correcting Image Shape
If your image is uneven on the sides, you can use the projector’s distortion correction features, such as H/V-Keystone and Quick Corner®, to adjust the shape. See the online User’s Guide.

Changing the Language of the Projector Menus
The default language of the projector’s menu system is English, but you can change it as necessary.
1. Press the Menu button to access the projector’s menu system.
2. Select Extended > Language.
3. Select your language.
4. When you’re done, press the Menu button to exit.

Changing the Screen Type Setting
Set the Screen Type setting to the screen’s aspect ratio.
1. Press the Menu button.
2. Select Extended > Display > Screen > Screen Type.

Correcting Image Shape
If your image is uneven on the sides, you can use the projector’s distortion correction features, such as H/V-Keystone and Quick Corner®, to adjust the shape. See the online User’s Guide.

Turning the Projector On
1. Turn on your computer or image source.
2. Remove the lens cover.
3. Press the On button. After the Status light stays on, the projector is ready.

Turning the Projector Off
Press the Off button to turn the projector off. If you see a confirmation message, press the Esc button again.

Focusing and Zooming
Press the Focus or Zoom buttons on the remote control to adjust the image.
You can also focus and zoom using the projector buttons.
1. Press the Focus or Zoom button on the projector.

Troubleshooting
If you see a blank screen or the message “No signal!”
- Make sure the projector Status light is on and not flashing, and the lens cover is removed.
- Make sure the cables are connected correctly. See the online User’s Guide.

Making Other Image Adjustments
For help on using the projector’s features to improve the image quality, see the online User’s Guide. You can also view information on how to adjust the image color, position, and edges (Edge Blending) when projecting from multiple projectors to create one seamless widescreen image.

Changing the Projection Mode
You can change the projection mode to flip the image over top-to-bottom or left-to-right using the projector menus.
1. Press the Menu button.
2. Select Extended > Projection.
3. Select a projection mode.
4. When you’re done, press the Menu button to exit.

Making Other Image Adjustments
For help on using the projector’s features to improve the image quality, see the online User’s Guide. You can also view information on how to adjust the image color, position, and edges (Edge Blending) when projecting from multiple projectors to create one seamless widescreen image.

Troubleshooting
If you see a blank screen or the message “No signal!”
- Make sure the projector Status light is on and not flashing, and the lens cover is removed.
- Make sure the cables are connected correctly. See the online User’s Guide.

Correcting Image Shape
If your image is uneven on the sides, you can use the projector’s distortion correction features, such as H/V-Keystone and Quick Corner®, to adjust the shape. See the online User’s Guide.

Turning the Projector On
1. Turn on your computer or image source.
2. Remove the lens cover.
3. Press the On button. After the Status light stays on, the projector is ready.

Turning the Projector Off
Press the Off button to turn the projector off. If you see a confirmation message, press the Esc button again.

Focusing and Zooming
Press the Focus or Zoom buttons on the remote control to adjust the image.
You can also focus and zoom using the projector buttons.
1. Press the Focus or Zoom button on the projector.
Turning the Projector On
1. Turn on your computer or image source.
2. Remove the lens cover.
3. Press the 1 button. After the Status light stays on, the projector is ready.

Note: If the Direct Power On function is enabled, you can turn the projector on without pressing the 1 button; just flip the switch controlling the outlet to which the projector is connected. To turn on this feature, see the online User’s Guide.

If the projector does not turn on, make sure the power switch on the side of the projector is turned on.

If your image does not appear, see “Switching Between Image Sources” or “Troubleshooting.”

Changing the Language of the Projector Menus
The default language of the projector’s menu system is English, but you can change it as necessary.

1. Press the Menu button.
2. Select Extended > Projector.
3. Select a projection mode.
4. When you’re done, press the Menu button to exit.

Changing the Projection Mode
You can change the projection mode to flip the image over top-to-bottom or left-to-right using the projector menus.

1. Press the Menu button.
2. Select Extended > Projection.
3. Select a projection mode.
4. When you’re done, press the Menu button to exit.

You can also flip the image over top-to-bottom by pressing the Shutter button on the remote control for about five seconds.

Note: To rotate the menu display, change the OSD Rotation setting in the Extended > Display menu.

Switching Between Image Sources
Press the Search button (remote control) or one of the source buttons (remote control or projector).

Changing the Screen Type Setting
Set the Screen Type setting to the screen’s aspect ratio.

1. Press the Menu button.
2. Select Extended > Display > Screen > Screen Type.

3. Select the screen’s aspect ratio.
   Note: The displayed image should match the screen’s size and shape.
4. When you’re done, press the Menu button to exit.

Changing the Language of the Projector’s Menu System
If your image is uneven on the sides, you can use the projector’s distortion correction features, such as HV-Keystone and Quick Corner®, to adjust the shape. See the online User’s Guide.

Correcting Image Shape
If your image is uneven on the sides, you can use the projector’s distortion correction features, such as HV-Keystone and Quick Corner®, to adjust the shape. See the online User’s Guide.

Making Other Image Adjustments
For help on using the projector’s features to improve the image quality, see the online User’s Guide. You can also view information on how to adjust the image color, position, and edges (Edge Blending) when projecting from multiple projectors to create one seamless widescreen image.

Adjusting Image Position
1. Press the Lens Shift button on the remote control or projector.
2. Press the arrow buttons to adjust the position of the projected image.
3. When you’re done, press the Esc button to finish the adjustment.

If the projector is on a table, you can level the image by turning any of the projector’s adjustable feet.

Adjusting Image Size
1. Press the Focus button on the remote or projector.
2. Press the Focus or Zoom buttons on the remote control to adjust the image.

You can also focus and zoom using the projector buttons.

1. Press the Focus or Zoom button on the projector.
2. Press the or arrows button to make the adjustment.
3. Press the Esc button to finish the adjustment.

Note: Depending on the lens you use, you may need to adjust the Distortion setting after you adjust the Focus setting. See the online User’s Guide.

Adjusting Image Position
1. Press the Lens Shift button on the remote control or projector.
2. Press the arrow buttons to adjust the position of the projected image.
3. When you’re done, press the Esc button to finish the adjustment.

If the projector is on a table, you can level the image by turning any of the projector’s adjustable feet.

Focusing and Zooming
Press the Focus or Zoom buttons on the remote control to adjust the image.

You can also focus and zoom using the projector buttons.

1. Press the Focus or Zoom button on the projector.

2. Press the arrow buttons to make the adjustment.
3. Press the Esc button to finish the adjustment.

Note: Depending on the lens you use, you may need to adjust the Distortion setting after you adjust the Focus setting. See the online User’s Guide.

Correcting Image Shape
If your image is uneven on the sides, you can use the projector’s distortion correction features, such as HV-Keystone and Quick Corner®, to adjust the shape. See the online User’s Guide.

Making Other Image Adjustments
For help on using the projector’s features to improve the image quality, see the online User’s Guide. You can also view information on how to adjust the image color, position, and edges (Edge Blending) when projecting from multiple projectors to create one seamless widescreen image.

Turning the Projector Off
Press the Standby button to turn the projector off. If you see a confirmation message, press the Standby button again.

Note: You can also just flip the switch controlling the outlet to which the projector is connected instead.

Troubleshooting
If you see a blank screen or the message “No signal!”
• Make sure the projector Status light is on and not flashing, and the lens cover is removed.
• Make sure the cables are connected correctly. See the online User’s Guide.

If you need to change the image source. See “Switching Between Image Sources.” Also make sure the source device is turned on.

If the projector and the notebook don’t display the same image
Windows®
Press the function key on your keyboard that lets you display on an external monitor. It may be labeled CRT/LCD or have an icon such as .

You may need to hold down the Fn key while pressing it (such as F7 = F7). Wait a moment for the display to appear. You may need to press the keys again to display the image on both devices.

On Windows 7 or later, hold down the Windows key and press P at the same time, then click Duplicate.

Mac
Open System Preferences and select Displays. Click the Arrangement tab and select the Mirror Displays checkbox.

Purchasing supplies and accessories
You can purchase air filters (V13H134A58), screens, and other accessories from an Epson authorized reseller. To find the nearest reseller, call 800-GO-EPSON (800-463-7766). Or you can purchase online at www.epsonstore.com (U.S. sales) or www.epson.ca (Canadian sales).

Where to Get Help
For more information about using the projector, you can view or download the online manuals from the Epson website, as described below.

Internet support
Visit www.epson.com/support (U.S.) or www.epson.ca/support (Canada) and search for your product to download software and utilities, view manuals, get FAQs and troubleshooting advice, or contact Epson.

Speak to a support representative
To use the Epson PrivateLine Support service, call (800) 637-7661. This service is available for the duration of your warranty period. You may also speak with a projector support specialist by dialing (562) 276-4394 (U.S.) or (950) 729-3839 (Canada).

Support hours are 6 AM to 8 PM, Pacific Time, Monday through Friday and 7 AM to 4 PM, Pacific Time, Saturday.

Days and hours of support are subject to change without notice. Toll or long distance charges may apply.
