Parent topic: Control Panel Buttons and Lights

Navigating the LCD Screen

Follow these guidelines to navigate and use the menus on the LCD screen.

To navigate the menus, press the arrow buttons to change your highlighted selection and press the OK button to confirm your selection.

To change a setting, press the arrow buttons to highlight the setting and press the OK button.

To enter a value in a field, press the arrow buttons to highlight the field and press the OK button to display the on-screen keyboard.

Parent topic: Control Panel Buttons and Lights

Entering Characters on the LCD Screen

Follow these guidelines to enter characters for passwords and other settings.
On-screen keyboard

1 Displays the character count
2 Moves the cursor left or right
3 Switches between uppercase and lowercase characters, numbers and symbols
4 Switches between characters and numbers or symbols
5 Changes the keyboard layout
6 Displays a list of common domain names to choose from
7 Enters a space
8 Select when you are finished
9 Deletes the previous character

Note: You can also switch the character type by pressing the reset button.
On-screen keypad

1 Deletes the previous number
2 Clears the entered number
3 Select when you are finished

Parent topic: Control Panel Buttons and Lights

Viewing Animations

You can view animations on the LCD screen to help guide you with a procedure or to troubleshoot a problem.

1. Press the ⑦ help button.
You see a screen like this:

2. Select **Troubleshooting** if you are experiencing a problem or **How To** to view instructions on common procedures.
3. Select a topic from the list of available topics and follow the on-screen instructions.
   While viewing the topics, you may see screens like this:

1. Displays the current step number and the total number of steps
Changing LCD Screen Language

You can change the language used on the LCD screen.

1. Press the home button, if necessary.
2. Select Settings.
   You see a screen like this:

   ![Settings screen]

3. Select Basic Settings.
4. Select Language.
5. Select a language.

Parent topic: Using the Control Panel

Product Parts Locations

See these sections to identify the parts on your product.

Product Parts - Front
Product Parts - Front

1  Rear paper feed
2  Paper support
3  Edge guides
4  Feeder guard
5  Output tray
6  Stopper

Parent topic: Product Parts Locations
Product Parts - Inside

1  Document cover
2  Scanner glass
3  Control panel

1  Scanner unit support
Using Power Saving Settings

Your product enters sleep mode automatically and turns off the LCD screen if it is not used for a period of time. You can make the time period shorter and select other options to save energy and resources.

Changing the Sleep Timer Settings
Changing the Power Off Timer Settings

Parent topic: Product Basics

Changing the Sleep Timer Settings

You can adjust the time period before your product enters sleep mode and turns off the LCD screen.
1. Press the home button, if necessary.
2. Select Settings.

You see a screen like this:

![Settings menu]

3. Select Basic Settings.
4. Select Sleep Timer.
5. Press the + and – button to adjust the number of minutes of inactivity before the product enters sleep mode.

   **Note:** You can also use the displayed numeric keypad to select the number of minutes (up to 99).

**Parent topic:** Using Power Saving Settings

**Changing the Power Off Timer Settings**

You can have the product turn off automatically if it is not used for a specified period of time.

1. Press the home button, if necessary.
2. Select Settings.
3. Select **Basic Settings**.
4. Select **Power Off Timer**.
5. Select a time period between **30 minutes** and **12h** (12 hours).

**Parent topic:** Using Power Saving Settings

### Epson Connect Solutions for Smartphones, Tablets, and More

Use your smartphone, tablet, or computer to print and scan documents, photos, emails, and web pages from your home, office, or even across the globe.

**Note:** If you are using your Epson product with the Windows 10 S operating system, you cannot use the software described in this section. You also cannot download and install any Epson product software from the Epson website for use with Windows 10 S; you must obtain software only from the Windows Store.

Print from anywhere with these Epson Connect solutions:
- Epson Email Print
- Epson iPrint Mobile App
- Epson Remote Print

Scan and send a file as an email or upload it to an online service directly from your Epson product with Epson Scan to Cloud or the Epson iPrint Mobile App.

Setting Up Epson Connect Services

If you did not activate your product's email address for use with Epson Connect when you set up your product, you can activate it using the product control panel.

1. Press the \( \Rightarrow \) home button, if necessary.
2. Select Settings.

You see a screen like this:
3. Select **Web Service Settings**.
4. Select **Epson Connect Services**.
   You see a screen like this:

   ![Epson Connect Screen]

5. Select **Register**.
6. Follow the instructions on the screen to activate your product's email address.

**Parent topic:** [Epson Connect Solutions for Smartphones, Tablets, and More](#)

---

**Using Epson Email Print**

With Epson Email Print, you can print from any device that can send email, such as your smartphone, tablet, or laptop. Just activate your product's unique email address. When you want to print, attach a PDF, Microsoft Office document, or photo to an email and send it to your product. Both the email and the attachments will print automatically.

1. Connect your product to your network. See the link below.
2. If you did not already set up Email Print when you installed your product software, see the link below to use your product control panel to activate your unique email address. Or visit [epson.com/connect](https://epson.com/connect) (U.S), [epson.ca/connect](https://epson.ca/connect) (Canada), or [epsonconnect.com](https://epsonconnect.com) (Caribbean) to learn more about Email Print, create your Epson Connect account, and register your product to the Epson Connect service.
3. Now you are ready to send and print emails to your product's Email Print address.

**Note:** Go to [epsonconnect.com](https://epsonconnect.com) and log into your Epson Connect account to personalize your product's email, adjust print settings, and set up other Epson Connect services.
Using the Epson iPrint Mobile App

Use this free Apple and Android app to print and scan with networked Epson products. Epson iPrint lets you print PDFs, Microsoft Office documents, photos, and web pages over a wireless network. You can scan and save a file on your device, send it as an email, or upload it to an online service such as Box, Dropbox, Evernote, or Google Drive.

1. Connect your product to your wireless network. See the link below.
2. Visit epson.com/connect (U.S), epson.ca/connect (Canada), or epson.com.jm/connect (Caribbean) to learn more about Epson iPrint and check the compatibility of your mobile device.
3. Download Epson iPrint from the Apple App Store or Google Play.
4. Connect your mobile device to the same wireless network as your product.
5. Open Epson iPrint and select your Epson product.

Now you are ready to print or scan with your mobile device and your Epson product.

Using Epson Remote Print

With Epson Remote Print software, you can print from your laptop or desktop computer to an Epson Email-enabled product anywhere in the world.

1. Connect your Epson product to your wireless network. See the link below.
2. If you did not already set up an Epson Connect account when you installed your product software, visit epsonconnect.com to create your account and register your product to the Epson Connect service.

   **Note:** Make a note of your product's email address.

3. Visit epsonconnect.com to learn more about Remote Print and how to download the Remote Print Driver software.

4. Download and install the Remote Print software.

5. Enter the email address and optional access key of your Epson product during Remote Print setup.

6. Now you are ready to print remotely. Select the print command in your laptop or desktop computer application and choose the Remote Print option for your Epson product.

**Using Epson Scan to Cloud**

The Epson Scan to Cloud service allows you to scan and send a file as an email or upload it to an online service directly from your Epson product. Register an email address or online services such as Box, Dropbox, Evernote, or Google Drive with your Epson Connect account.

1. Connect your Epson product to your network. See the link below.

2. If you did not already set up an Epson Connect account when you installed your product software, visit epsonconnect.com to create your account and register your product to the Epson Connect service.

   **Note:** Make a note of your product's email address and password.

3. Visit epsonconnect.com to sign into your account with the email address and password you selected.

4. Select your product, select **Scan to Cloud**, and select **Destination List**.

5. Click **Add**, then follow the instructions on the screen to create your destination list.
6. Now you are ready to use Scan to Cloud. Select the setting for scanning to Scan to Cloud on your Epson product control panel.

### Using AirPrint

AirPrint enables instant wireless printing from iPhone, iPad, and iPod touch with the latest version of iOS, and Mac with the latest version of OS X or macOS.

[![AirPrint icon](image)](image)

**Note:** If you disabled paper configuration messages on your product control panel, you cannot use AirPrint. See the link below to enable the messages, if necessary.

1. Load paper in your product.
2. Set up your product for wireless printing. See the link below.
3. Connect your Apple device to the same wireless network that your product is using.
4. Print from your device to your product.

**Note:** For details, see the AirPrint page on the Apple website.

**Parent topic:** Product Basics

**Related tasks**

Setting Up Epson Connect Services

**Related topics**

Wi-Fi Networking
Using Google Cloud Print

With a Google Account, you can print from your Apple or Android device to your Epson product. You can also print from Chromebooks and the Google Chrome browser without drivers or cables.

1. Connect your Epson product to your wireless network. See the link below.
2. Note your product's IP address by checking your network status. See the link below.
3. Connect your computer or your mobile device to the same wireless network as your Epson product.
4. Enter your product's IP address into the address bar of a web browser.
5. Select the **Google Cloud Print Services** option.

**Note:** If you don't see the **Google Cloud Print Services** option, turn your product off and back on. If the option still doesn't appear, select the **Firmware Update** option and follow the on-screen instructions to update your product.

6. Click **Register**.
7. Select the checkbox to agree to the Usage Advisory and click **Next**.
8. Click **OK** to launch the sign-in page.
   A separate browser window opens.
9. Enter your Google Account username and password and click **Sign in**, or, if you don't have an account, click **Sign up for a new Google Account** and follow the on-screen instructions.
10. Click **Finish printer registration** to complete setup and print a test page.

Your product is now linked to your Google Account and can be accessed from any Chromebook, computer, Apple or Android device with Internet access. Visit Epson Support for Google Cloud Print (U.S) or Epson Support for Google Cloud Print (Canada) for more information on using Google Cloud Print, or the Google Cloud Print website for a list of supported apps.

Setting Up Google Cloud Print on a Chromebook

With a Google Account, you can print from a Chromebook without drivers or cables.

1. Connect your Epson product to your wireless network. See the link below.
2. Turn on your Chromebook and connect it to the same wireless network as your product.

   **Note:** See your Chromebook’s documentation for details on connecting to a network.

3. Do one of the following:
   - Click **Add to Cloud Print** in the notification that appears in the corner of your Chromebook screen.

     **Note:** If you do not see a notification, check to see if a number appears in the status area at the lower-right corner of the screen. Click this number to open the notifications menu, then click **Add to Cloud Print**.

   - Open a web browser and enter `chrome://devices` in the address bar. Skip to step 5.
   - If you see a registration confirmation screen instead, click **Register**.

4. Click **Add Device**.

5. Click the **Register** button that appears next to your product.

6. Click **Register** on the confirmation screen. Your product's LCD screen displays a confirmation message.

7. Select **OK** or press the **OK** button on your product to confirm the Google Cloud Print connection and print a test page.

Your product is now linked to your Google Account and can be accessed from any Chromebook, iPhone, or Android phone with Internet access. Visit Epson Support for Google Cloud Print (U.S) or Epson Support for Google Cloud Print (Canada) for more information on using Google Cloud Print, or the Google Cloud Print website for a list of supported apps.

Android Printing Using the Epson Print Enabler

You can wirelessly print your documents, emails, photos, and web pages right from your Android phone or tablet (Android v4.4 or later). With a few taps, your Android device will discover your nearby Epson product and print.

1. Connect your Epson product to your wireless network. See the link below.
2. On your Android device, download the Epson Print Enabler plug-in from Google Play.
3. Go to Settings on your Android device, select Printing, and enable the Epson plug-in.
4. Connect your Android device to the same wireless network as your product.
5. Now you are ready to print. From an Android application such as Chrome or Gmail, tap the menu icon and print whatever is on the screen.

**Note:** If you do not see your product, tap All Printers and select your product.

Wi-Fi Networking

Using Fire OS Printing

You can wirelessly print from Amazon Fire tablets and phones to your nearby networked Epson product. There is no software to download, no drivers to install, and no cables to connect. With just a few taps in Email, Calendar, Contacts, and WPS Office, you can send whatever is on the screen to an Epson product.

1. Connect your Epson product to your wireless network. See the link below.
2. Connect your Amazon device to the same wireless network as your product.
3. Now you are ready to print. From your Amazon application, tap the print option and select your product to print whatever is on the screen.

**Note:** If you see a message telling you that a plug-in is required, tap OK and tap Download. If your Amazon Fire product uses Fire OS 5 and above, your device automatically uses the built-in Mopria Print Service app to print.

Parent topic: Product Basics
Using Windows 10 Mobile Printing

You can wirelessly print from Windows 10 Mobile tablets and phones to your nearby networked Epson product. There is no software to download, no drivers to install, and no cables to connect. Look for the print option in your Windows 10 application to send whatever is on the screen to an Epson product.

1. Connect your Epson product to your wireless network. See the link below.
2. Connect your Windows 10 Mobile device to the same wireless network as your product.
3. Now you are ready to print. From your Windows 10 application, tap the print option and select your product to print whatever is on the screen.

Parent topic: Product Basics

Using Epson Print and Scan App with Windows Tablets

You can use this free app to print photos and scan from your Windows (Windows 8 or higher) Surface RT or Pro tablet with networked Epson products. Epson Print and Scan App allows you to scan and capture images right to your tablet or to Microsoft OneDrive.

Note: The Epson Print and Scan App does not support Windows 10 Mobile printing.

1. Connect your Epson product to your wireless network. See the link below.
2. Download Epson Print and Scan App from the Microsoft Windows Store.
3. Connect your Windows tablet to the same wireless network as your product.
4. Open Epson Print and Scan App and select your Epson product.
   Now you are ready to print photos or scan.

Using the Mopria Print Service

You can use the Mopria Print Service to print from your Android phone or tablet (Android v4.4 or later) to your Epson product or any Mopria-certified product from other manufacturers. You can download the Mopria Print Service from Google Play.

Note: For details on the Mopria Print Service, click here (U.S) or click here (Canada).

1. Connect your Epson product to your wireless network. See the link below.
2. On your Android device, download the Mopria Print Service app from Google Play.

   Note: On some Samsung Galaxy devices, Mopria may come preinstalled.

3. Go to Settings on your Android device, select Printing, and enable the Mopria Print Service.
4. Connect your Android device to the same wireless network as your product.
5. Now you are ready to print. From an Android application such as Chrome or Gmail, tap the menu icon and select Print. Then select All printers, select your Epson product, adjust your print settings, and print.

Wireless Connection Safety Instructions

Network Security Recommendations

To help deter unauthorized access to your product over a network, you should protect your network environment using appropriate security measures.

Security measures such as these can help deter threats such as loss of user data, use of telephone and fax lines, and other intrusions:

• **Enable security on your wireless LAN**
  Enable the appropriate security on the wireless LAN you plan to use with your product. Network security such as a network password can deter interception of traffic over the wireless LAN. Your router may already have a default password enabled by your Internet service provider (ISP). See your ISP and router documentation for instructions on how to change the default password and better secure your network.

• **Connect your product only to a network protected by a firewall**
  Connecting your product directly to the Internet may leave it vulnerable to security threats. Instead, connect it to a router or other network connection protected by a firewall. Your router may already have a firewall set up by your Internet service provider; check with your ISP for confirmation. For best results, set up and use a private IP address for your network connection.

• **Change the default administrator password on your product**
  If your product has an option to set an administrator password, change the default administrator password to deter access by unauthorized users to personal data stored on your product, such as IDs, passwords, and contact lists.
Wi-Fi Infrastructure Mode Setup

You can set up your product to communicate with your computer using a wireless router or access point. The wireless router or access point can be connected to your computer over a wireless or wired network.

1. Epson product
2. Wireless router or access point
3. Computer with a wireless interface
4. Computer
5. Internet
6. Ethernet cable (used only for wired connection to the wireless router or access point)

Selecting Wireless Network Settings from the Control Panel

Parent topic: Wi-Fi Networking
Selecting Wireless Network Settings from the Control Panel

You can select or change wireless network settings using your product control panel.

To install your product on a wireless network, follow the instructions on the Start Here sheet and install the necessary software by downloading it from the Epson website. The installer program guides you through network setup.

**Note:** Breakdown or repair of this product may cause loss of network data and settings. Epson is not responsible for backing up or recovering data and settings during or after the warranty period. We recommend that you make your own backup or print out your network data and settings.

1. Press the home button, if necessary.
2. Select the icon.
   
   You see a screen like this:

   ![Network Connection Settings](image)

3. Select **Wi-Fi (Recommended)**.
4. Select **Start Setup** or **Change Settings**.
5. Select **Wi-Fi Setup Wizard**.
You see a screen like this:

![Select Access Point screenshot]

6. Select the name of your wireless network or press the + button to enter the name manually. If you are entering the name manually, use the displayed keyboard to enter your network name.

![Keyboard screenshot]

**Note:** The network name and password are case sensitive. Be sure to correctly enter uppercase and lowercase letters, and numeric or special characters.

- To move the cursor, press the left or right arrows.
- To change the case of letters, select .
• To delete the previous character, select \[x\].
• To enter numbers and symbols, select AB1#.
• To enter a space, select \[space\].
• To finish entering your network name or password, select OK.

7. Select the **Enter Password** field and use the displayed keyboard to enter your network password.

![Display showing Enter Password field](image)

8. When you are finished, confirm the displayed network settings and select **Start Setup** to begin setup.

9. Do one of the following:
   • If setup was successful, select **Print Check Report** to print a network setup report or **OK** to finish with the setup.
   • If setup was unsuccessful, select **Print Check Report** to print a network setup report or **Re-enter** to re-enter your network name and password again.

10. Press the \[home\] button to return to the Home screen.

   The **Wi-Fi** icon is displayed on the LCD screen and indicates your wireless connection status. If the product is not connected to the network, you may have selected the wrong network name or entered the password incorrectly. Repeat these steps to try again.

   If you are printing from a computer, make sure you installed the network software as described on the **Start Here** sheet.
Wi-Fi Direct Mode Setup

You can set up your product to communicate directly with your computer or another device without requiring a wireless router or access point. In Wi-Fi Direct Mode, the product itself acts as a network access point for up to 8 devices.

Enabling Wi-Fi Direct Mode

Enabling Wi-Fi Direct Mode to allow direct communication between your product and computer or other devices without a wireless router or access point.

1 Epson product
2 Computer with a wireless interface
3 Other wireless device
1. Press the home button, if necessary.

2. Select the icon.

You see a screen like this:

3. Select **Wi-Fi Direct**.

4. Select **Start Setup**.

5. Select **Start Setup** again.

You see a screen like this:
6. Use your computer or wireless device to select the Wi-Fi network name (SSID) displayed on the LCD screen, then enter the password shown.

7. When you are finished, scroll down on the product's LCD screen and select **OK**.

   **Note:** You can also scan the QR Code on the LCD screen to view online setup instructions.

8. Press the home button to return to the Home screen.

   The Wi-Fi Direct icon is displayed on the LCD screen and indicates if Wi-Fi Direct is enabled on the product.

   If you are printing from a computer, make sure you installed the network software as described on the Start Here sheet.

### Connecting to a Mobile Device Using Wi-Fi Direct

You can connect a mobile device directly to the printer without a wireless router or access point.

**Note:** After your smartphone is connected, use the Epson iPrint app to print from the device.

1. Press the home button, if necessary.

2. Select **Smartphone connect**.

   - If your product is not connected to a wireless network, go to the next step.
   - If your product is already connected to a wireless network, select **Next** to display your product's model name and IP address or select **Other Methods** to choose a specific device to connect.

3. Select **Start Setup**.
You see this screen:

<table>
<thead>
<tr>
<th>Select OS</th>
</tr>
</thead>
<tbody>
<tr>
<td>iOS</td>
</tr>
<tr>
<td>Android</td>
</tr>
<tr>
<td>Other OS Devices</td>
</tr>
</tbody>
</table>

4. Do one of the following:
   - For iOS devices, select **iOS**. Scan the QR code with the camera app on your device and follow the instructions on your device. Select **Next** on the LCD screen to verify the printer information, and then open the Epson iPrint app on your device and select the printer displayed on the LCD screen. Select **Complete** on the LCD screen.
   - For Android devices, select **Android**. Open the Epson iPrint app on your device and select the printer displayed on the LCD screen. Select **Complete** on the LCD screen.
   - For other types of devices, select **Other OS Devices**. Use your device to select the Wi-Fi network name (SSID) displayed on the LCD screen, then enter the password shown.

5. Follow the instructions on the LCD screen to complete Wi-Fi Direct setup.

   The 🌐 Wi-Fi Direct icon is displayed on the LCD screen and indicates if Wi-Fi Direct is enabled on the product.

**Parent topic:** Wi-Fi Direct Mode Setup

**Status Icon Information**

**Wi-Fi Protected Setup (WPS)**

If your network uses a WPS-enabled wireless router or access point, you can quickly connect your product to the network using Wi-Fi Protected Setup (WPS).
**Note:** To check if your router is WPS-enabled, look for a button labeled **WPS** on your router or access point. If there is no hardware button, there may be a virtual WPS button in the software for the device. Check your network product documentation for details.

Using **WPS** to Connect to a Network

**Parent topic:** Wi-Fi Networking

**Using WPS to Connect to a Network**

If you have a WPS-enabled wireless router or access point, you can use Wi-Fi Protected Setup (WPS) to connect your product to the network.

1. Press the home button, if necessary.
2. Select the icon.
   
   You see a screen like this:

![Network Connection Settings](image)

3. Select **Wi-Fi (Recommended)**.
4. Select **Start Setup** or **Change Settings**.
5. Select **Push Button Setup (WPS)**.
6. Follow the instructions on the LCD screen to complete WPS setup.

**Note:** Make sure you press **Start Setup** within two minutes of activating WPS on your router.
7. Press the home button to return to the Home screen.

The Wi-Fi icon is displayed on the LCD screen and indicates your wireless connection status. If the product is not connected to the network, repeat these steps to try again.

If you are printing from a computer, make sure you installed the network software as described on the Start Here sheet.

Parent topic: Wi-Fi Protected Setup (WPS)

Printing a Network Status Sheet

You can print a network status sheet to help you determine the causes of any problems you may have using your product on a network.

1. Press the home button, if necessary.
2. Select Settings.
   
   You see a screen like this:

   ![Settings screen]

4. Select Network Status.
5. Select Print Status Sheet.
6. Press the start button to print the status sheet.

Examine the settings shown on the network status sheet to diagnose any problems you have.

Parent topic: Wi-Fi Networking
Printing a Network Connection Report

You can print a network connection report to view solutions to any problems you may have using your product on a network.

1. Make sure a few sheets of plain paper are loaded in the cassette.
2. Press the home button, if necessary.
3. Select Settings.
   
   You see a screen like this:

   ![Settings screen](image)

   - Supply Status
   - Basic Settings
   - Printer Settings
   - Network Settings

4. Select Network Settings.
5. Select Connection Check.
You see a screen like this:

![Connection Check Result](image)

6. Select **Print Check Report** to print the network connection report. Examine any error codes and solutions shown on the network connection report.

**Network Connection Report Codes and Messages**

Check the error codes and messages on the network connection report to solve problems you may encounter with network connections. The tables here list solutions to problems based on the error codes and messages that may appear on the top of the report.
Note: Error codes and messages listed here may not all apply to your product.

### Error Codes and Messages

Changing or Updating Network Connections

See these sections to change or update how your product connects to a network.

- Accessing the Web Config Utility
- Changing a USB Connection to a Wi-Fi Connection
- Connecting to a New Wi-Fi Router
- Disabling Wi-Fi Features

Parent topic: Wi-Fi Networking

Accessing the Web Config Utility

You can select your product's network settings and confirm its operating status using a web browser. You do this by accessing your product's built-in Web Config utility from a computer or other device that is connected to the same network as your product.

1. Print a network status sheet.
2. Locate the IP address for your product that is listed on the network status sheet.
3. On a computer or other device connected to the same network as your product, open a web browser.
4. Enter your product's IP address into the address bar.
   You see the available Web Config utility options.

**Parent topic:** Changing or Updating Network Connections

**Related tasks**

Printing a Network Status Sheet

**Changing a USB Connection to a Wi-Fi Connection**

If you have already connected your product to your computer using a USB connection, you can change to a Wi-Fi connection.

1. Disconnect the USB cable from your product.
2. Uninstall your product software.
3. Download and install your product software from the Epson website using the instructions on the *Start Here* sheet.

**Parent topic:** Changing or Updating Network Connections

**Related concepts**

Uninstall Your Product Software

**Connecting to a New Wi-Fi Router**

If you change the wireless router you have been using on your network, you need to update your product's Wi-Fi connection to the new router.

**Note:** If you switch to a 5 GHz wireless router, set the router to operate in dual band (2.4 GHz and 5 GHz) mode. If your router uses a single network name (SSID) for both the 2.4 GHz and 5 GHz band, give each band its own network name (SSID) instead, such as Home Network 2.4 GHz and Home Network 5 GHz. See your router documentation for instructions.

1. Do one of the following:
   - **Windows**: Uninstall your product software.
   - **Mac**: Go to the next step.
2. Download and install your product software from the Epson website using the instructions on the 
Start Here sheet.

Parent topic: Changing or Updating Network Connections

Uninstall Your Product Software

Disabling Wi-Fi Features

You may need to disable your product's Wi-Fi features if you change your network connection type or 
need to solve a problem with your network connection.

Note: Before disabling Wi-Fi features, make a note of your product's SSID (network name) and 
password, and any network settings selected for the Epson Connect services you may use.

1. Press the home button, if necessary.

2. Select the icon.

You see a screen like this:

3. Select Wi-Fi (Recommended).

4. Select Change Settings.

5. Select Others.

6. Select Disable Wi-Fi.
7. Select **Start Setup** to disable Wi-Fi.
8. When finished, press the home button to return to the Home screen.

**Parent topic:** Changing or Updating Network Connections

Printing a Network Status Sheet
Loading Paper

Before you print, load paper for the type of printing you will do.

Loading Paper in the Rear Paper Feed
Paper Loading Capacity
Turning Off the Paper Setting Alert
Double-sided Printing Capacity
Compatible Epson Papers
Borderless Paper Type Compatibility
Paper or Media Type Settings - Printing Software
Selecting the Paper Settings - Control Panel

Loading Paper in the Rear Paper Feed

You can print documents and photos on a variety of paper types and sizes.
1. Flip the feeder guard forward and pull out the paper support.
2. Pull out the output tray and open the paper stopper.

3. Slide the edge guides out all the way.

4. If you are inserting a stack of paper, fan the sheets first and tap the stack on a flat surface to even the edges.

**Note:** Do not fan or curl photo paper.
5. Do one of the following:
   • Insert paper, glossy or printable side up and short edge first, in the center of the paper support.

   ![Diagram]

   • Load up to 10 envelopes in the center of the paper support. Load them printable side up and flap edge left.

   ![Diagram]

   • Load a sheet of loose-leaf or other paper with holes facing as shown.

   ![Diagram]
• To load a sheet of paper longer than legal size, close the paper support and flatten the leading edge of the paper as shown.

6. Slide the edge guides against the paper, but not too tightly.

Always follow these paper loading guidelines:
- Load only the recommended number of sheets.
- Load paper short edge first, no matter which way your document faces.
- Load letterhead or pre-printed paper top edge first.
- Do not load paper above the arrow mark inside the edge guide.
- If you have trouble loading a stack of envelopes, press each envelope flat before loading it or load one envelope at a time.
- Do not load envelopes that are curled, folded, or too thin, or that have plastic windows or exposed adhesive flaps.
- Check the paper package for any additional loading instructions.
- If you use paper with binder holes, load only one sheet at a time in only these sizes: Letter (8.5 × 11 inches [216 × 279 mm]), A4 (8.3 × 11.7 inches [210 × 297 mm]), or Legal (8.5 × 14 inches [216 × 356 mm]).

Turning Off the Paper Setting Alert

The paper setting alert warns you when the paper settings do not match the paper you loaded. You can turn off this feature from the product’s control panel.
Note: You cannot turn on this setting if the Paper Configuration setting is disabled.

1. Press the home button, if necessary.
2. Select Settings.
   You see a screen like this:

5. Set the Paper Mismatch setting to Off.

### Selecting the Paper Settings - Control Panel

You can change the default paper size and paper type using the control panel on the product.
1. Press the home button, if necessary.
2. Select **Settings > Printer Settings > Paper Source Settings**.
   You see a screen like this:

   ![Paper Source Setting Screen]

3. Make sure the **Paper Configuration** setting is set to **On**.

   **Note:** Disabling this feature turns off the automatic display of the paper settings selection screen after you load paper in the cassette. If this setting is disabled, you cannot use AirPrint and you cannot turn on the **Paper Mismatch** setting.

4. Select **Paper Setup**.
You see a screen like this:

![Paper settings screen]

5. Do one of the following to select your paper settings:
   • Select a **Paper Size** and **Paper Type** setting.
   • Select **Favorite Paper Settings** to select from a list of saved presets.

   **Note:** You can change your preset settings by highlighting a preset and pressing the right arrow button.

   • Select the icon to change back to your previous paper settings.

**Paper Type Settings - Control Panel**

Select a **Paper Type** setting that matches the paper you loaded.

Turning Off the Paper Setting Alert
Placing Originals on the Product

Follow the instructions here to place your original documents or photos on the product.

Caution: Do not place anything on top of your product or use its cover as a writing surface to avoid damaging it.

Placing Originals on the Scanner Glass

Placing Originals on the Scanner Glass

You can place originals up to this size on the scanner glass: Letter (8.5 × 11 inches [216 × 279 mm]) or A4 (8.3 × 11.7 inches [210 × 297 mm]).

1. Open the document cover.
2. Do one of the following to place your originals:
   • **Single sheet**: Place your original facedown on the scanner glass with the top facing into the corner. Slide the original to the edges of the indicated corner.
   
   ![Diagram](image)

   **Note**: The area about 0.06 inch (1.5 mm) from the edges of the scanner glass is not scanned.

   • **ID card**: Place an ID card 0.2 inch (5 mm) away from the corner of the scanner glass as shown.
   
   ![Diagram](image)

   • **Multiple photos for copying**: You can place multiple photos of different sizes on the scanner glass to make separate copies. Make sure your photos are at least 0.2 inch (5 mm) away from
each other and from the corner of the scanner glass. You can place multiple photos up to this size: 4 × 6 inches (102 × 152 mm).

- **Multiple photos for scanning**: You can place multiple photos of different sizes on the scanner glass and save them separately using Photo Mode in Epson Scan 2. Make sure your photos are at least 0.6 inch × 0.6 inch (15 × 15 mm) in size, and placed away from each other and from the edges of the scanner glass as shown.

1. 0.2 inch (4.5 mm)
2. 0.8 inch (20 mm)

**Note**: To view multiple scanned photos in Epson Scan 2, select the **Thumbnail** checkbox in the preview window.
3. Close the document cover gently to keep your original in place.

   **Caution:** Do not push down on the document cover or scanner glass or you may damage the product.

Remove your originals after scanning. If you leave the originals on the scanner glass for a long time, they may stick to the glass surface.

Placing Originals on the Scanner Glass

**Copying Restored Photos**

You can restore the colors in faded photos as you make copies of them.

1. Place your original photo on the scanner glass.
2. Load the paper you want to print on.
3. Press the home button, if necessary.
4. Select **Various prints**.
5. Select **Various copies**.
You see a screen like this:

![Copy/Restore Photos screen]

6. Select **Copy/Restore Photos**.
7. Make sure the **Restore Color** setting is set to **On**.
8. Select your other paper and print settings as necessary, then press the right arrow button.
9. Select **Start Scanning**.
   Your originals are scanned and a preview appears on the LCD screen.
10. If you need to edit the copy, press the reset button and change any of these settings as necessary:
    • **Crop/Zoom**: Zoom in and enlarge a part of the photo and crop it.
    • **Clear Edit**: Resets your photo edits.
11. To print more than one copy, press the + or – buttons to increase or decrease the number of copies.

   **Note**: You can also select **Copies** and use the displayed numeric keypad to select the number of copies (up to 99).

12. When you are ready to copy, press the start button.

   **Note**: To cancel copying, press the stop button.

**Parent topic**: Copying
Copying Books, ID Cards, or Borderless Photos

You can copy two pages of a book or both sides of an ID card onto a single sheet of paper. You can also copy a photo and print it without any borders.

1. Place your original on the scanner glass.
2. Load the paper you want to print on.
3. Press the home button, if necessary.
4. Select Various prints.
5. Select Various copies.

You see a screen like this:

6. Select one of these options:
   - ID Card to scan and copy both sides of an ID card onto one side of paper.
   - Book Copy to copy two facing pages of a book onto a single sheet of paper.
Note: Make sure the first page of your original is placed on the scanner glass as described on the LCD screen and press the OK button.

- **Borderless Copy** to make a copy without margins around the edges.

7. To print more than one copy, press the + or – buttons to increase or decrease the number of copies.

Note: You can also select Copies and use the displayed numeric keypad to select the number of copies (up to 99).

8. Change any of the displayed settings as necessary.

9. Select the Advanced Settings tab to view and change additional copy settings, if necessary.

10. When you are ready to copy, press the start button.

Note: To cancel copying, press the stop button.

11. Follow any on-screen instructions to place the rest of your originals and select Start Scanning.

Printing from a Computer

Before printing from your computer, make sure you have set up your product and installed its software as described on the Start Here sheet.

**Note:** If you have an Internet connection, it is a good idea to check for updates to your product software on Epson's support website. If you see a Software Update screen, select **Enable automatic checking** and click **OK**. The update scans your system to see if you have the latest product software. Follow the on-screen instructions.

Selecting Extended Settings - Windows
Printing Your Document or Photo - Windows
Selecting Default Print Settings - Windows
Changing Automatic Update Options

**Parent topic:** Printing from a Computer
Selecting Basic Print Settings - Windows

Select the basic settings for the document or photo you want to print.

1. Open a photo or document for printing.
2. Select the print command in your application.

   **Note:** You may need to select a print icon on your screen, the **Print** option in the **File** menu, or another command. See your application's help utility for details.

3. If necessary, select your product name as the printer you want to use.

   **Note:** You may also need to select **Properties** or **Preferences** to view your print settings.

You see the Main tab of your printer settings window:

![Printer Settings Window](image-url)
4. Select the size of the paper you loaded as the **Document Size** setting.
   
   **Note:** You can also select the **User-Defined** setting to create a custom paper size, but you cannot use the **Borderless** setting.

5. If you are printing a borderless photo, select **Borderless**. You can click **Settings** to access additional options for borderless printing.
   
   **Note:** You must select a compatible borderless paper type and size to print without borders. Check the borderless paper compatibility list for details.

6. Select the orientation of your document.
   
   **Note:** If you are printing an envelope, select **Landscape**.

7. Select the type of paper you loaded as the **Paper Type** setting.
   
   **Note:** The setting may not exactly match the name of your paper. Check the paper type settings list for details.

8. Select the **Quality** setting that matches the print quality you want to use.

9. Select a Color option:
   - To print a color document or photo, select the **Color** setting.
   - To print text and graphics in black or shades of gray, select the **Black/Grayscale** setting.

10. To print on both sides of the paper, select a **2-Sided Printing** option.

11. To print multiple pages on one sheet of paper, or print one image on multiple sheets of paper, select one of the settings in the **Multi-Page** menu and select the printing options you want.

12. To print multiple copies and arrange their print order, select the **Copies** options.

13. To reduce noise during printing when you select **Plain Paper/Bright White Paper**, turn on **Quiet Mode** (printing will be slower).

14. To preview your job before printing, select **Print Preview**.

15. To save your print job as a project that can be modified and combined with other print jobs, select **Job Arranger Lite**.

**Print Quality Options - Windows**

**Multi-Page Printing Options - Windows**
You can select any of the available Quality options to fine-tune the quality of your print. Some settings may be unavailable, depending on the paper type and border setting you have chosen.

**Draft**
For draft printing on plain paper.

**Standard**
For everyday text and image printing.

**Standard - Vivid**
For text and graphics with good quality and print speed.

**High**
For photos and graphics with high print quality.

**More Settings**
Opens a window that lets you choose among levels of speed and quality.

You can select any of the available options in the Multi-Page menu to set up your multi-page print job.

**2-Up and 4-Up**
Prints 2 or 4 pages on one sheet of paper. Click the Page Order button to select page layout and border options.

**2×1 Poster, 2×2 Poster, 3×3 Poster, 4×4 Poster**
Prints one image on multiple sheets of paper to create a larger poster. Click the Settings button to select image layout and guideline options.
Selecting Double-sided Printing Settings - Windows

You can print on both sides of the paper by selecting one of the 2-Sided Printing options on the Main tab.

**Note:** Some options may be pre-selected or unavailable, depending on other settings you have chosen or if you are accessing the product over a network.

1. Select one of the following options for **2-Sided Printing**:
   - **Auto (Long-edge binding)** to print your double-sided print job by automatically flipping the paper on the long edge.
   - **Auto (Short-edge binding)** to print your double-sided print job by automatically flipping the paper on the short edge.
   - **Manual (Long-edge binding)** to print your double-sided print job by printing one side and prompting you to flip the paper over on the long edge to print the other side (recommended for paper types that do not support automatic duplexing).
   - **Manual (Short-edge binding)** to print your double-sided print job by printing one side and prompting you to flip the paper over on the short edge to print the other side (recommended for paper types that do not support automatic duplexing).

2. Click the **Settings** button.
You see this window:

3. Select the double-sided printing options you want to use.
4. Click OK to return to the Main tab.
5. Click the Print Density button.
6. Select the type of document you are printing as the Document Type setting. The software automatically sets the Adjustments options for that document type.

7. If necessary, select the Adjustments options you want to use.

8. Click OK to return to the Main tab.

9. Print a test copy of your double-sided document to test the selected settings.

10. Follow any instructions displayed on the screen during printing.

Selecting Basic Print Settings - Windows

---

**Double-sided Printing Options - Windows**

You can select any of the available options on the 2-Sided Printing Settings window to set up your double-sided print job.

**Binding Edge Options**

Select a setting that orients double-sided print binding in the desired direction.
Binding Margin Options
Select options that define a wider margin to allow for binding.

Start Page
Selects whether printing starts on the front or back page.

Create Folded Booklet Options
Select the Booklet checkbox and a binding option to print double-sided pages as a booklet.

Print Density Adjustments - Windows
You can select any of the available options on the Print Density Adjustment window to adjust the print quality of your double-sided print job.

Print Density
Sets the level of ink coverage for double-sided printing.

Increase Ink Drying Time
Sets the amount of time required for drying ink after printing on one side of the paper before printing the other side in double-sided printing to prevent ink smearing.

Parent topic: Selecting Double-sided Printing Settings - Windows
Selecting Additional Layout and Print Options - Windows
You can select a variety of additional layout and printing options for your document or photo on the More Options tab.

1. To change the size of your printed document or photo, select the Reduce/Enlarge Document checkbox and select one of these sizing options:
   - Select the Fit to Page option to size your image to fit the paper you loaded. Select the size of your document or photo as the Document Size setting, and the size of your paper as the Output Paper setting. If you want to center your image on the paper, select the Center option.
   - Select the Zoom to option to reduce or enlarge your document or photo by a specific percentage. Select the percentage in the % menu.

2. Select one of the following Color Correction options:
   - Select Automatic to automatically adjust the sharpness, brightness, contrast, and color saturation for your image.
• Select **Custom** and click the **Advanced** button to manually adjust the color correction settings or turn off color management in your printer software.

• Select **Image Options** to access additional settings for improving printed images.

3. To add the following features, click the **Watermark Features** button:

  • **Watermark**: adds a visible watermark to your printout
  • **Header/Footer**: adds information such as the date and time to the top or bottom of your printout

  **Note:** Click the **Settings** button to customize the text and location of the header or footer.

4. Select any of the Additional Settings options to customize your print.

**Custom Color Correction Options - Windows**

Custom Color Correction Options - Windows

You can select any of the available options in the Color Correction window to customize the image colors for your print job.

![Color Correction Window](image)

**Color Controls**

Let you select a **Color Mode** setting, individual settings for **Brightness**, **Contrast**, **Saturation**, and **Density**, and individual color tones. Depending on the selected color mode, you can also adjust the midtone density using the **Gamma** setting.

**Fix Photo**

Improves the color, contrast, and sharpness of flawed photos.

**Note:** Fix Photo uses a sophisticated face recognition technology to optimize photos that include faces. For this to work, both eyes and the nose must be visible in the subject's face. If your photo includes a face with an intentional color cast, such as a statue, you may want to turn off Fix Photo to retain the special color effects.
ICM
Lets you manage color using installed color printing profiles.

No Color Adjustment
Turns off color management in your printer software so you can manage color using only your application software.

Parent topic: Selecting Additional Layout and Print Options - Windows

Image Options and Additional Settings - Windows

You can select any of the Image Options and Additional Settings to customize your print. Some options may be pre-selected or unavailable, depending on other settings you have chosen.

Image Options

Emphasize Text
Adjusts the weight of printed text to increase readability.

Emphasize Thin Lines
Adjusts the weight of printed lines to increase visibility.

Edge Smoothing
Smoothes jagged edges in low-resolution images such as screen captures or images from the Web.

Fix Red-Eye
Reduces or removes red-eye in photos.

Print Text in Black
Prints colored text in black.

For Color Text
Prints colored text on a background pattern or underlined.

For Color Graphs and Images
Prints colored graphics and images with overlay patterns.

For Color Text, Graphs, and Images
Prints colored text, graphics, and images with overlay patterns.

Enhancement Options
Specifies Color Universal Print enhancement settings for text, graphics, and images.

Additional Settings Options

Rotate 180°
Prints the image rotated 180° from its original orientation.
High Speed  
Speeds up printing but may reduce print quality.

Mirror Image  
Flips the printed image left to right.

Parent topic: Selecting Additional Layout and Print Options - Windows

Header/Footer Settings - Windows  
You can select any of the Header/Footer Settings options to add headers or footers when you print. The items are available to print at the top or bottom of your pages, in either the left, right, or center of the page.

Note: These settings are not saved with your document.

You can select to print the following information:
• User Name
• Computer Name
• Date
• Date/Time
• Collate Number (copy number)

Note: The user name, computer name, date, and time come from the Windows Control Panel on your computer.

Parent topic: Selecting Additional Layout and Print Options - Windows
Selecting a Printing Preset - Windows

For quick access to common groups of print settings, you can select a printing preset on the Main or More Options tab.

**Note:** You can create your own preset by clicking the Add/Remove Presets button.

1. Click the Main or More Options tab.

   You see the available Printing Presets on the left:

2. Place your cursor over one of the Printing Presets to view its list of settings.

3. Click on a preset to change its settings, or use any of the available options on the screen to control your printing presets.

4. To choose a preset for printing, select it.
5. Click **OK**.

**Parent topic:** Printing with Windows

**Selecting Extended Settings - Windows**

You can select additional settings that apply to all the print jobs you send to your product.

1. Access the Windows Desktop and right-click the icon for your product in the right side of the Windows taskbar, or click the up arrow and right-click.
2. Select **Printer Settings**.
3. Click the **Maintenance** tab.
   You see the maintenance options:

![Maintenance options](image)

4. Click the **Extended Settings** button.
You see this window:

Extended Settings - Windows

Extended Settings - Windows

You can select from these settings on the Extended Settings window.

**Show Progress Meter**
Displays the progress of print jobs as they are being printed.

**Enable EPSON Status Monitor 3**
Enables product monitoring for ink and paper supplies and other issues.

**Separator Page**
Before each document, prints a separator page containing the title, user, date, and time.

**Remove white borders**
Removes white margins that may appear when you print borderless photos.

5. Select any of the extended settings to customize your print.
6. Click **OK** to close the Extended Settings window.
7. Click **OK** to close the printer software window.

Parent topic: Printing with Windows
Always Spool RAW Datatype
Increases print speed and may solve other printing problems.

Page Rendering Mode
Increases print speed when printing is extremely slow or the print head stops during printing.

Print as Bitmap
Increases print speed when printing is extremely slow or the print head stops during printing, and other settings do not help.

Skip Blank Page
Ensures that your product does not print pages that contain no text or images.

Change Standard Resolution
Reduces the resolution of print data to correct printing problems.

Refine screening pattern
Prints graphics with a finer screening pattern.

Allow Applications to Perform ICM Color Matching
Allows applications to perform ICM color matching.

Always Use the Driver's Paper Source Setting
Prints using the paper source setting in the printer driver, rather than the setting in your application.

Output 1 page documents facedown in 2-Sided mode
Outputs single-sided pages in a 2-sided print job facedown instead of faceup.

Output documents for filing
Outputs all landscape, portrait, 1-sided, and 2-sided documents in the same orientation for easier filing.

Barcode mode
Reduces bleeding when printing barcodes on plain paper, letterhead paper, recycled paper, preprinted paper, envelopes, and thick paper.

Selecting Default Print Settings - Windows

When you change your print settings in a program, the changes apply only while you are printing in that program session. If you want to change the print settings you use in all your Windows programs, you can select new default print settings.

1. Access the Windows Desktop and right-click the icon for your product in the right side of the Windows taskbar, or click the up arrow and right-click .
2. Select Printer Settings.
You see the printer settings window:

3. Select the print settings you want to use as defaults in all your Windows programs.
4. Click OK.

These settings are now the defaults selected for printing. You can still change them as needed for printing in any program session.

Changing the Language of the Printer Software Screens

Parent topic: Printing with Windows

Changing the Language of the Printer Software Screens

You can change the language used on the Windows printer software screens.

1. Access the Windows Desktop and right-click the icon for your product in the right side of the Windows taskbar, or click the up arrow and right-click.

2. Select Printer Settings.
You see the printer settings window.

3. Click the **Maintenance** tab.

You see the maintenance options:

![Diag] You see the maintenance options.

4. Select the language you want to use as the **Language** setting.

5. Click **OK** to close the printer software window.

The printer software screens appear in the language you selected the next time you access them.

**Parent topic:** Selecting Default Print Settings - Windows

**Changing Automatic Update Options**

Your printer software for Windows automatically checks for updates to the product software. You can change how often the software checks for updates or disable this feature.
1. Access the Windows Desktop and right-click the icon for your product in the right side of the Windows taskbar, or click the up arrow and right-click.
2. Select **Software Update Settings**.
   You see this window:

   ![Software Update Settings window](image)

3. Do one of the following:
   - To change how often the software checks for updates, select a setting in the **Check every** menu.
   - To disable the automatic update feature, select the **Never** option.
4. Click **OK** to exit.

   **Note:** If you choose to disable the automatic update feature, you can check for updates manually.

**Parent topic:** Printing with Windows

**Printing with the Built-in Epson Driver - Windows 10 S**

You can print with the built-in Epson printer driver using any printing program on Windows 10 S, as described in these sections.

**Note:** The built-in Epson driver in Windows 10 S does not include all the available print settings for your product. To print with additional settings, download and install the Epson Print and Scan utility from the Windows Store. You cannot download and install any Epson product software from the Epson website for use with Windows 10 S; you must obtain software only from the Windows Store.
Select the settings for your print job in your Windows 10 S application.

1. Open a photo or document for printing.
2. Select the print command in your application.

   **Note:** You may need to select a print icon on your screen, the **Print** option in the **File** menu, or another command. See your application's help utility for details.

3. If necessary, select your product name as the printer you want to use.

   **Note:** You may also need to select **Properties** or **Preferences** to view your print settings.

You see a window like this:
4. Select the type of paper you loaded as the **Media** setting.

   **Note:** The setting may not exactly match the name of your paper. Check the paper type settings list for details.

5. Click the **Advanced** button.
   
   You see a window like this:

   ![Advanced Options Window]

6. Select the size of the paper you loaded as the **Paper Size** setting.

7. To print multiple copies, select or enter the number as the **Copy Count** setting.

8. To print multiple copies of multi-page documents in sets, select the **Collated** checkbox.

9. Click **OK**.
   
   You return to the printing preferences window.
10. Select the **Layout** tab.

11. Select the orientation of your document as the **Orientation** setting.
12. To print double-sided, select one of the **Print on Both Sides** options, depending on how you want to orient the page layout. The icon next to each option shows the layout.

![Print on Both Sides Options](image)

13. Click **OK** to save your settings.
   You see your application’s **Print** window.

14. Click **OK** or **Print** to start printing.

**Parent topic:** Printing with the Built-in Epson Driver - Windows 10 S

### Printing on a Mac

You can print with your product using any Mac printing program, as described in these sections.

**Note:** If you have an Internet connection, it is a good idea to check for updates to your product software on Epson’s support website.

- **Selecting Basic Print Settings - Mac**
- **Selecting Page Setup Settings - Mac**
Selecting Basic Print Settings - Mac

Select the basic settings for the document or photo you want to print.

1. Open a photo or document for printing.
2. Select the print command in your application.

   **Note:** You may need to select a print icon on your screen, the **Print** option in the File menu, or another command. See your application's help utility for details.

3. Select your product as the **Printer** setting.

4. If necessary, click the arrow next to the Printer setting or the **Show Details** button to expand the print window.
You see the expanded printer settings window for your product:

![Printer Settings Window]

**Note:** The print window may look different, depending on your version of the Mac operating system and the application you are using.

5. Select the **Copies** and **Pages** settings as necessary.

**Note:** If you do not see these settings in the print window, check for them in your application before printing.
6. Select the page setup options: **Paper Size** and **Orientation**.

   **Note:** If you do not see these settings in the print window, check for them in your application before printing. They may be accessible by selecting **Page Setup** from the File menu.

7. Select any application-specific settings that appear on the screen, such as those shown in the image above for the Preview application.

8. Select **Print Settings** or **Printer Features** from the pop-up menu.
You see these settings:

![Print Settings](image)

**Note:** The available print settings and appearance of the print window may be different than those covered here, depending on the Mac OS version and the application you are using.

9. Select the type of paper you loaded as the **Media Type** setting.

   **Note:** The setting may not exactly match the name of your paper. Check the paper type settings list for details.

10. Select the **Print Quality** setting you want to use.

11. Select the **Borderless** checkbox if you want to print a borderless photo. If the option is grayed out, change the **Media Type** setting to a paper type that supports borderless printing.

12. Select any of the available print options.

   *Print Quality Settings - Mac*
   *Print Options - Mac*

**Parent topic:** Printing on a Mac
Print Quality Settings - Mac

You can select any of the Print Quality settings to fine-tune the quality of your print. Some settings may be unavailable, depending on the paper type and border setting you have chosen.

Draft
  For draft printing on photo paper.

Normal
  For everyday text and image printing.

Normal - Vivid
  For everyday text and image printing with good quality and print speed.

Fine
  For text and graphics with good quality and print speed.

Quality
  For photos and graphics with good quality and print speed.

Best Quality
  For the best print quality, but the slowest print speed.

Print Options - Mac

You can select any of the print options to customize your print. Some options may be unavailable, depending on other settings you have chosen.

Expansion
  If you selected a borderless paper size setting, this option adjusts the image expansion settings to control printing at the edges of borderless prints.

Grayscale
  Prints text and graphics in black or shades of gray.
**Mirror Image**

Lets you flip the printed image horizontally.

**Note:** If you select the Min option for the Expansion setting, you may see white borders on your printed photo.

**Parent topic:** Selecting Basic Print Settings - Mac

### Selecting Page Setup Settings - Mac

Depending on your application, you may be able to select the paper size and orientation settings from the print window.

![Paper Size: US Letter, Orientation: Portrait](image)

**Note:** If you do not see these settings in the print window, check for them in your application before printing. They may be accessible by selecting **Page Setup** from the File menu.

1. Select the size of the paper you loaded as the **Paper Size** setting. If you are printing a borderless photo, select the **Borderless** checkbox or a paper size with a **Borderless** option. You can also select a custom setting to create a custom paper size, but the Quality setting will be limited to **Normal**.

   **Note:** You must select a compatible borderless paper type and size to print without borders. Check the borderless paper compatibility list for details.

2. Select the orientation of your document or photo as shown in the print window.

   **Note:** If you are printing an envelope, select the icon.

**Note:** You can reduce or enlarge the size of the printed image by selecting **Paper Handling** from the pop-up menu and selecting a scaling option.

**Parent topic:** Printing on a Mac
Selecting Print Layout Options - Mac

You can select a variety of layout options for your document or photo by selecting **Layout** from the pop-up menu on the print window.

![Layout Settings](image)

- To print multiple pages on one sheet of paper, select the number of pages in the **Pages per Sheet** pop-up menu. To arrange the print order of the pages, select a **Layout Direction** setting.
- To print borders around each page on the sheet, select a line setting from the **Border** pop-up menu.
- To invert or flip the printed image, select the **Reverse page orientation** or **Flip horizontally** settings.

**Parent topic:** [Printing on a Mac](#)
Selecting Double-sided Printing Settings - Mac

You can print on both sides of the paper by selecting **Two-sided Printing Settings** from the pop-up menu on the print window.

![Two-sided Printing Settings](image)

**Note:** Some options may be pre-selected or unavailable, depending on other settings you have chosen or if you are accessing the product over a network. This screen may be different, depending on the Mac OS version you are using.

1. Select one of the **Two-sided Printing** options.
2. Select the type of document you are printing as the **Document Type** setting. The software automatically sets the Adjustments options for that document type.

3. If necessary, customize the Adjustments settings as instructed on the screen.

4. Print a test copy of your double-sided document to test the selected settings.

5. Follow any instructions displayed on the screen during printing.

**Double-sided Printing Options and Adjustments - Mac**

Parent topic: **Printing on a Mac**

**Double-sided Printing Options and Adjustments - Mac**

You can select any of the available options in the **Two-sided Printing Settings** or **Output Settings** pop-up menu to set up your double-sided print job.
Two-sided Printing Options

Long-Edge binding
  Orients double-sided printed pages to be bound on the long edge of the paper.

Short-Edge binding
  Orients double-sided printed pages to be bound on the short edge of the paper.

Adjustments

Print Density
  Sets the level of ink coverage for double-sided printing.

Increased Ink Drying Time
  Sets the amount of time required for drying ink after printing on one side of the paper before printing the other side in double-sided printing.

Parent topic: Selecting Double-sided Printing Settings - Mac

Managing Color - Mac

You can adjust the Color Matching and Color Options settings to fine-tune the colors in your printout, or turn off color management in your printer software.

1. Select **Color Matching** from the pop-up menu in the print window.

2. Select one of the available options.
3. Select **Color Options** from the pop-up menu in the print window.

![Color Options menu](image)

**Note:** The available settings on the Color Options menu depend on the option you selected on the Color Matching menu.

4. Select one of the available options.

**Color Matching and Color Options - Mac**

**Parent topic:** Printing on a Mac

**Color Matching and Color Options - Mac**

You can select from these settings on the **Color Matching** and **Color Options** menus.

**Color Matching Settings**

**EPSON Color Controls**

Lets you manage color using controls in your printer software or turn off color management.

**ColorSync**

Prints using standard color profiles for your product and paper to help match image colors. You can customize the conversion method and filter settings on the ColorSync pop-up menu in the print window.
Color Options Settings

Manual Settings
Lets you select manual color adjustments. Click the arrow next to Advanced Settings and select settings for Brightness, Contrast, Saturation, and individual color tones. You can also select a color Mode setting for printing photos and graphics and the Fix Red-Eye setting to reduce or remove red-eye in photos. Depending on the selected color mode, you can also adjust the midtone density using the Gamma setting.

Fix Photo
Improves the color, contrast, and sharpness of flawed photos. Click the arrow next to Advanced Settings and select the Fix Red-Eye setting to reduce or remove red-eye in photos.

Note: Fix Photo uses a sophisticated face recognition technology to optimize photos that include faces. For this to work, both eyes and the nose must be visible in the subject’s face. If your photo includes a face with an intentional color cast, such as a statue, you may want to turn off Fix Photo to retain the special color effects.

Off (No Color Adjustment)
Turns off color management in your printer software so you can manage color using only your application software.

Note: An ICC profile is required if color management is turned off.

Parent topic: Managing Color - Mac

Selecting Printing Preferences - Mac
You can select printing preferences that apply to all the print jobs you send to your product.

1. In the Apple menu or the Dock, select System Preferences.
2. Select Print & Fax, Print & Scan, or Printers & Scanners, select your product, and select Options & Supplies.
3. Select Driver or Options.
You see a screen like this:

![Printing Preferences - Mac](image)

4. Select any of the available printing preferences.
5. Click **OK**.

**Printing Preferences - Mac**

**Parent topic:** Printing on a Mac

**Printing Preferences - Mac**

You can select from these settings on the **Options** or **Driver** tab.

**Skip Blank Page**
Ensures that your product does not print pages that contain no text or images.

**Quiet Mode**
Lessens noise during printing but may decrease print speed.

**Permit temporary black printing**
Allows you to print using black ink when color ink is expended.

**High Speed Printing**
Speeds up printing but may reduce print quality.
Output documents for filing
Outputs all landscape, portrait, 1-sided, and 2-sided documents in the same orientation for easier filing.

Remove white borders
Removes white margins that may appear when you print borderless photos.

Warning Notifications
Lets you choose whether or not to receive warning notifications from the printer software for various operating conditions.

Establish bidirectional communication
Allows the product to communicate with the computer. Do not change the default setting unless you experience issues when using a shared printing pool.

Printing From a Chromebook
With a Google Account, you can print from a Chromebook without drivers or cables.
1. Connect your Epson product to your wireless network. See the link below.
2. Turn on your Chromebook and connect it to the same wireless network as your product.
   
   **Note:** See your Chromebook’s documentation for details on connecting to a network.

3. Do one of the following:
   
   • Click **Add to Cloud Print** in the notification that appears in the corner of your Chromebook screen.
   
   **Note:** If you do not see a notification, check to see if a number appears in the status area at the lower-right corner of the screen. Click this number to open the notifications menu, then click **Add to Cloud Print**.
   
   • Open a web browser and enter **chrome://devices** in the address bar. Skip to step 4.
   
   • If you see a registration confirmation screen instead, click **Register**.

4. Click **Add Device**.

5. Click the **Register** button that appears next to your product.

6. Click **Register** on the confirmation screen. Your product's LCD screen displays a confirmation message.

7. Select **OK** or press the **OK** button on your product to confirm the Google Cloud Print connection and print a test page.

8. To print to the connected product, select the print command in your Chrome app.

Your product is now linked to your Google Account and can be accessed from any Chromebook where you are logged in, as long as you have Internet access. Visit Epson Support for Google Cloud Print (U.S) or Epson Support for Google Cloud Print (Canada) for more information on using Google Cloud Print, or the Google Cloud Print website for a list of supported apps.

Scanning to a Connected Computer
You can scan an original and save it to a connected computer using your product’s control panel. The computer must be connected using a USB cable or connected to the same network as your product.

You can save the scanned file as a JPEG or PDF file, or attach it to an email. You can also set up custom scan settings using Event Manager and automatically scan using those settings on your product control panel.

**Note:** Be sure you have installed Epson Scan 2 and Event Manager on your computer before scanning to your computer.

1. Place your original on the product for scanning.
2. Press the home button, if necessary.
3. Select **Scan**.
   
   You see a screen like this:

   ![Scan options](image)

4. Select **Computer**.

```
You see a screen like this:

Note: Select OK to close the information screen, if necessary.

5. Select **Select a computer** and choose one of the following options:
   - If your computer is connected to your product over a network, select a connected computer from the displayed list. (If the computer is not listed, select **Search Again**.)
   - If your computer is connected to your product using a USB cable, select **USB Connection**.

6. Select **Save as PDF** and choose one of the following options:
   - **Save as JPEG** to save the scanned image as a JPEG file.
   - **Save as PDF** to save the scanned document or image as a PDF file.
   - **Attach to e-mail** to open the default email software on your computer and save the scanned document or images as a JPEG email attachment.
   - **Follow custom setting** to save the scanned document or image using custom settings you have selected using the Event Manager custom scan settings option.

   Note: You can customize the settings for each of the options above using Event Manager.

7. Press the ◀ start button to start scanning.
   
   Your product scans your original and saves the scanned file to your computer.

**Setting Up a WSD Port (Windows 7/Windows Vista)**

You can scan to a networked Windows computer using WSD (Web Services for Devices). You must first set up a WSD port on your Windows 7 or Windows Vista system (the port is set up automatically on Windows 10 and Windows 8.x).

Before you set up a WSD port, make sure you installed your product software, and connected your product and computer to the same network.

1. Turn on your product.
2. Print a network status sheet so you can identify the network name and model name for your product on the network.

3. Click  or Start and select Computer.

4. On the left side of the window, select Network.

5. Locate your product on the Network screen, right-click it, and select Install.

6. When you see the User Account Control screen, click Continue.

   **Note:** If you see an Uninstall screen, click Uninstall and repeat these steps as necessary.

7. When you see the message **Your device is ready to use** in the Windows taskbar, click the message.

8. On the Driver Software Installation screen, make sure your product is listed as **Ready to use**. Then click Close.

9. Do one of the following:
   - **Windows 7:** Click  and select Devices and Printers.
   - **Windows Vista:** Click Start and select Control Panel > Hardware and Sound > Printers.

10. Make sure that an icon appears for your product's name on the network.

    When you use WSD, select your product name to scan over the network.

### Changing Default Scan Job Settings

You can view or change the default scan job settings your product uses when you scan to your computer. You do this using the Event Manager program.

1. Do one of the following to open Event Manager:
   - **Windows 10:** Click and select EPSON Software > Event Manager.
   - **Windows 8.x:** Navigate to the Apps screen and select Event Manager.
   - **Windows (other versions):** Click or Start > All Programs or Programs > EPSON Software > Event Manager.
   - **Mac:** Open the Applications folder, click Epson Software, and select Event Manager.
2. Open the Scanner (Windows) or Select Scanner (Mac) drop-down list and select your product, if necessary.
3. Click Make Job Settings.
4. Open the Edit Job Settings drop-down list and select the scan job settings you want to view or change.
5. Change the settings as necessary.
6. Click OK.
7. Click Close to close the Event Manager window.

**Parent topic:** [Starting a Scan Using the Product Control Panel](#)
Starting a Scan Using the Epson Scan 2 Icon

You can start the Epson Scan 2 program to select scan settings, scan, and save the scanned image to a file.

**Note:** If you are using your Epson product with the Windows 10 S operating system, you cannot use the software described in this section. You also cannot download and install any Epson product software from the Epson website for use with Windows 10 S; you must obtain software only from the Windows Store.

- **Windows 10:** Click and select **EPSON > Epson Scan 2**.
- **Windows 8.x:** Navigate to the **Apps** screen and select **Epson Scan 2**.
- **Windows (other versions):** Click or **Start**, and select **All Programs** or **Programs**. Select **EPSON > Epson Scan 2 > Epson Scan 2**.
- **Mac:** Open the **Applications** folder, open the **Epson Software** folder, and select **Epson Scan 2**.
You see an Epson Scan 2 window like this:
Starting a Scan from a Scanning Program

You can start Epson Scan 2 from a TWAIN-compliant scanning program to select scan settings, scan, and open the scanned image in the program.

**Note:** If you are using your Epson product with the Windows 10 S operating system, you cannot use the software described in this section. You also cannot download and install any Epson product software from the Epson website for use with Windows 10 S; you must obtain software only from the Windows Store.

1. Open your scanning program and select its scanning option. (See your scanning program help for instructions.)
2. Select your product.

**Note:** In certain programs, you may need to select your product as the "source" first. If you see a **Select Source** option, choose it and select your product. With Windows, do not select a **WIA** option for your product; not all scan functions will be available.
You see an Epson Scan 2 window like this:
Starting a Scan from a Smart Device

You can start a scan from a smart device using the Epson iPrint app. You can save the scanned document to your device or a cloud service, e-mail it, or print it.

**Note:** If you are using your Epson product with the Windows 10 S operating system, you cannot use the software described in this section. You also cannot download and install any Epson product software from the Epson website for use with Windows 10 S; you must obtain software only from the Windows Store.

**Note:** Your device must be connected to the same wireless network as your Epson product.

1. Download the Epson iPrint app from your device’s app store or from Epson’s website.
2. Place your original on the product for scanning.
3. Open the Epson iPrint app and select your product.
4. Select the scan settings and scan your original.
5. Save your scanned image to a file or cloud location.

**Parent topic:** Starting a Scan

Using the Epson iPrint Mobile App

Scanning in Epson Scan 2

Epson Scan 2 automatically scans your document and saves the scanned file in PDF format in your operating system’s Documents or My Documents folder, or opens it in your scanning program. You can select settings, preview, and change the scanned file settings as necessary.

**Note:** If you are using your Epson product with the Windows 10 S operating system, you cannot use the software described in this section. You also cannot download and install any Epson product software from the Epson website for use with Windows 10 S; you must obtain software only from the Windows Store.

1. Start Epson Scan 2.
You see this window:
2. Select the **Mode** setting that matches the type of original you are scanning.

3. Select the **Document Source** setting that matches where you placed your original.

4. Select the **Document Size** setting that matches the size of your original. You can select **Customize** to enter a custom size, if necessary.

5. Select the image type of your original and how you want it scanned as the **Image Type** setting.

6. Select the **Resolution** setting you want to use for your scan.

7. Click the **Preview** button.

   Epson Scan 2 previews your original and displays the results in the Epson Scan 2 window.

8. Select any of the additional settings that you want to use on the Main Settings tab.

9. Do one of the following:
   - If you’re scanning in Document Mode, select any of the additional settings that you want to use on the Main Settings tab.
   - If you’re scanning in Photo Mode, select the **Color Management** and **Thumbnail Options** settings as necessary.

10. Click the **Advanced Settings** tab and select any settings that you want to use.
11. Select the format in which you want to save your scanned file as the Image Format setting. If necessary, select Options and select any desired format options.

12. Enter the file name for your scanned file in the File Name field. If necessary, select Settings to modify the file name settings.

13. Select the location in which you want to save your scanned file as the Folder setting. If necessary, select Select to create a new folder.

14. Click Scan.
   The product scans your original and saves the scanned file in the location you specified.

Scan Resolution Guidelines

Parent topic: Scanning

Additional Scanning Settings - Main Settings Tab
You can select these additional scanning settings on the Epson Scan 2 Main Settings tab. Not all adjustment settings may be available, depending on other settings you have chosen.

Rotate
Rotates the original image clockwise to the desired angle before scanning it. Select Auto to allow your product to automatically rotate the image based on the orientation of the text (may take longer to scan).

Correct Document Skew
Corrects skewed originals, image contents, or both.

Add or edit pages after scanning
Lets you add, remove, or edit the pages in a scan, including rotating pages and changing the page order.

Note: To save multiple pages in a single file, you must select a file format that supports multiple pages such as PDF or Multi-TIFF. If you select another file format, each scanned image or page is saved as a separate file.

Parent topic: Scanning in Epson Scan 2
Additional Scanning Settings - Advanced Settings Tab

You can select these additional scanning settings on the Epson Scan 2 Advanced Settings tab. Not all adjustment settings may be available, depending on other settings you have chosen.

**Color Restoration**
Restores the colors in faded photos automatically.

**Backlight Correction**
Removes shadows from photos that have too much background light.

**Dust Removal**
Removes dust marks from your originals automatically.

**Remove Background**
Removes the background of the originals.

**Text Enhancement**
Sharpens the appearance of letters in text documents.

**Auto Area Segmentation**
Makes black and white images clearer and text recognition more accurate by separating the text from the graphics.

**Threshold**
Adjusts the level at which black areas in text and line art are delineated, improving text recognition in OCR (Optical Character Recognition) programs.

**Color Enhance**
Enhances the shades of the color you select in the scanned image. This setting is available only if you select **Grayscale** or **Black & White** as the Image Type setting.

**Brightness**
Adjusts the overall lightness and darkness of the scanned image.

**Contrast**
Adjusts the difference between the light and dark areas of the overall scanned image.

**Saturation**
Adjusts the density of colors in the overall image.

**Gamma**
Adjusts the midtone density of the scanned image.

**Unsharp Mask**
Makes the edges of certain image areas clearer. Turn off this option to leave softer edges.
Descreening  
Removes the ripple pattern that might appear in subtly shaded image areas, such as skin tones. This option improves results when scanning magazines or newspapers. (The results of descreening do not appear in the preview image, only in your scanned image.)

Edge Fill  
Corrects shadowing around the edges of the image by filling the shadows with black or white.

Saving Scanned Documents as a Searchable PDF Using Epson Scan 2

You can scan a document and save the text in a searchable PDF. In a searchable PDF, text is recognized using Optical Character Recognition (OCR) and then embedded in the scanned original.

Note: The required Epson Scan 2 OCR Component is installed automatically when you install your product software as instructed on the Start Here sheet. If you install your scanner software programs individually, be sure to also install this component if you want to perform OCR.

1. Load your original in the product for scanning.
2. Start Epson Scan 2.
3. Select your scan settings.
4. Click Preview and adjust the area you want to scan, if necessary.
5. Select Searchable PDF as the Image Format setting.
6. Select Options from the Image Format list.
You see this window:

7. Select any of the options on the **General** tab.
8. Select the **Text** tab.
9. Make sure the language used in the document text is selected as the **Text Language** setting.
10. Select the **Security** tab if you want to add a password to the PDF or protect printing or editing properties.
11. Click **OK**.
12. Confirm the **File Name** setting and select a **Folder** setting for your document.
13. Click **Scan**.  
   The scanned image is saved as a searchable PDF.

**Parent topic:** [Scanning in Epson Scan 2](#)

### Image Format Options

You can select different image formats and related options. For details on available options, click the ? icon on the Epson Scan 2 Image Format Options window. Not all image formats have options.
**BITMAP (*.bmp)**
A standard image file format for most Windows programs.

**JPEG (*.jpg)**
An image format that lets you highly compress image data. However, the higher the compression, the lower the image quality. (The TIFF format is recommended when you need to modify or retouch your scanned image.)

**PNG (*.png)**
An image format that does not lose quality during editing.

**TIFF (*.tif)**
A file format created for exchanging data between many programs, such as graphic and DTP software.

**Multi-TIFF (*.tif)**
A TIFF file format when multiple pages are saved to the same file, allowing you to edit the images using a compatible program.

**PDF (*.pdf)**
A document format that is readable by Windows and Mac systems using Adobe Reader, Acrobat, or other programs. You can save multi-page documents in one PDF file.

**Searchable PDF (*.pdf)**
A document format that is readable by Windows and Mac systems using Adobe Reader, Acrobat, or other programs. You can save multi-page documents in one PDF file. Recognized text in the scanned document can be searched.

**Parent topic:** Scanning in Epson Scan 2

---

### Scan Resolution Guidelines

The **Resolution** setting, measured in dpi (dots per inch), controls the amount of detail captured in your scans. Increasing the resolution raises the amount of detail captured but comes with the following disadvantages:

- Larger file sizes
- It takes longer to scan your originals, send/receive your scans by email or fax, and to print your scans
- The image may become too large to fit on your display or print on paper

If you plan to enlarge a scanned image so you can print it at a larger size, you may need to increase the resolution from the default resolution set by Epson Scan 2. Follow these guidelines to determine the resolution setting you need:

- You will scan the image at its original size but enlarge it later in an image-editing program.
Increase the Epson Scan 2 Resolution setting in your scan. Increase the resolution by the same amount you will increase the image size to retain a high image quality. For example, if the resolution is 300 dpi (dots per inch) and you will double the image size later, change the Resolution setting to 600 dpi.

- You will scan the image at 100% or smaller size.

Select the Epson Scan 2 Resolution setting based on how you will use the scanned image:
- Email/view on a computer screen/post on the web: 96 to 200 dpi
- Print/fax/convert to editable text (OCR)/create searchable PDF: 200 to 300 dpi

Scanning Using Easy Photo Scan

You can use Easy Photo Scan to easily scan your originals, edit the scanned images, and upload them to online destinations.

1. Place your original on your product for scanning.
2. Do one of the following to open Easy Photo Scan:

- **Windows 10**: Click and select **Epson Software > Easy Photo Scan**. Select your product and click **OK**, if necessary.

- **Windows 8.x**: Navigate to the **Apps** screen and select **Easy Photo Scan**. Select your product and click **OK**, if necessary.

- **Windows (other versions)**: Click or Start, and select All Programs or Programs. Select **Epson Software > Easy Photo Scan**. Select your product and click **OK**, if necessary.

- **Mac**: Open the **Applications** folder, select **Epson Software**, and select **Easy Photo Scan**. Select your product and click **OK**, if necessary.

You see a window like this:

![Easy Photo Scan Window]

3. Click the **Scan** icon.

   Your scanning program launches.

4. Click **Scan** in the window that appears to scan your original.

   The scanned image is displayed in the Easy Photo Scan window with an automatically generated name.
Note: You may need to close the scanning program window to display Easy Photo Scan.

5. To edit the name of the file, select the image thumbnail at the bottom of the screen, click the icon, and enter the new filename.

6. To edit the scanned image, click the Edit icon and select one of the displayed options.

   Note: See the Easy Photo Scan help for additional information on image editing options.

7. Repeat these steps for each image you want to upload.

8. When you finish scanning, click one of the destination icons to upload the images.

   Note: You may need to click the arrow next to the icons in order to see all of them. The available icons may vary, depending on the software version you are using.

Uploading Scanned Images to Google Photos
You can configure a Google Photos account for use with Easy Photo Scan and upload your scanned images.

1. Scan your original using Easy Photo Scan.

2. Click the icon.
You see a window like this:

![Transfer Settings window](image)

**Note:** If you have already configured a Google Photos account in Easy Photo Scan, you can select the **Setting Name** or **Destination Name** for the account, click **Login** if necessary, and click **Send** to upload your images.

3. Click **Login**.
4. On the Application Authentication screen, log into your Google account.
5. Click **Accept** to allow Easy Photo Scan to upload images to your account. An authentication code is generated.
6. Copy the authentication code into the **Please enter authentication code** field and click **OK**.
7. Select an album from the Album list.
   
   **Note:** If you cannot select an album, make sure the Setting Name is set to (No Selection), click the Login button to log into your Google Photos account, and try again. If you want to create a new album, you must create it directly in Google Photos.

8. Select an **Image Size** option for the uploaded images.

9. Select the image format for the uploaded files from the **File** or **File Type** list.

10. If there are options for the selected file format, click **Options** or **Option** and select the options you want.

11. If you also want to save the images to a local folder, select the **Copy the image(s) to a local folder** checkbox and select a folder.

12. If you want to save the current settings, click **Edit**, or the **Setting Name** or **Destination Name** field, and select **Save As**. Enter a name for the setting and click **OK**.

13. Click **Send** to upload the images to your Google Photos account, or click **Cancel** to cancel the operation.

Replacing Ink Cartridges and Maintenance Boxes

The maintenance box stores ink that gets flushed from the system during print head cleaning. When an ink cartridge is expended or the maintenance box is at the end of its service life, you need to replace it. You may also need to replace a cartridge that is more than six months old if your printouts do not look their best, even after cleaning and aligning the print head.

Note: Please dispose of your used Epson branded ink cartridges and maintenance boxes responsibly and in accordance with local requirements. If you would like to return your used ink cartridges and maintenance boxes to Epson for proper disposal, please go to epson.com/recycle for more information.

### Purchase Epson Ink Cartridges and Maintenance Box

You can purchase genuine Epson ink, maintenance boxes, and paper at epson.com (U.S. sales), epson.ca (Canadian sales), or epson.com.jm (Caribbean sales). You can also purchase supplies from an Epson authorized reseller. To find the nearest one, call 800-GO-EPSON (800-463-7766) in the U.S. or 800-807-7766 in Canada.

**Note:** This printer is designed for use with Epson cartridges only, not third-party cartridges or ink. Other brands of ink supplies are not compatible and, if described as compatible, may not function properly or continuously. Such restrictions can be avoided with some other printers such as Epson EcoTank cartridge-free printers.

The included initial cartridges are designed for reliable printer setup and cannot be used as replacement cartridges or resold. After setup, the remaining ink is available for printing. Yields are based on ISO 24711 in default mode, printing continuously. Yields vary due to print images, settings, and temperatures. Printing infrequently or primarily with one color reduces yields. All cartridges must be installed with ink for printing and printer maintenance. For print quality, some ink remains in replaced cartridges.

Ink Cartridge Specifications

**Removing and Installing Ink Cartridges**

Make sure you have your replacement cartridges handy before you begin. You must install new cartridges immediately after removing the old ones.

**Caution:** Leave your old cartridges in the product until you are ready to replace them to prevent the print head nozzles from drying out. Do not open ink cartridge packages until you are ready to install the ink. Cartridges are vacuum packed to maintain reliability.

**Note:** If you remove a low or expended ink cartridge, you cannot re-install and use the cartridge.

1. Turn on your product.
   - If an ink cartridge is expended, you see a message on the LCD screen. Note which cartridges need to be replaced and follow the on-screen instructions or the instructions below to replace the cartridge.
   - If you are replacing a cartridge before you see a message on the LCD screen, press the home button if necessary, and select **Maintenance > Ink Cartridge(s) Replacement > Next > Start**.

   **Note:** You can also select **How To** to view ink replacement instructions on the LCD screen.
2. Lift up the scanner unit until the support clicks into place.

**Caution:** Do not move the print head by hand; otherwise, you may damage your product. Do not touch the flat white cable or translucent film inside the product.
3. Squeeze the tab on the cartridge and lift the cartridge straight up to remove it.

![Diagram of cartridge removal](image)

**Note:** Dispose of used cartridges carefully. Do not take the used cartridge apart or try to refill it.

**Warning:** If ink gets on your skin, wash it thoroughly with soap and water. If ink gets into your eyes, flush them immediately with water. If ink gets into your mouth, spit it out and see a doctor right away. Keep ink cartridges out of the reach of children.

4. If you are replacing the black ink cartridge, gently shake the new black ink cartridge four or five times before unpacking it. Do not shake the color ink cartridges.

![Diagram of ink cartridge shaking](image)
Caution: Do not shake the cartridges after opening the packages, or ink may leak.

5. Remove the cartridge from the package.

Caution: Do not touch the areas shown here. Doing so may prevent normal operation and printing.
6. Remove the yellow tape from the cartridge.

**Caution:** Do not remove any other labels or seals, or the ink cartridge may leak or become unusable.

7. Insert the new cartridge into the holder and push it down until it clicks into place and is level with the other cartridges.
8. Lift the scanner unit up slightly and lower it. When the scanner unit catches, lift it up again and lower it completely.

![Scanner Unit Lift Instructions]

**Note:** The scanner unit cannot be opened from the position shown below. Close it completely before operating your product or opening the scanner unit again.

9. Select **Completed** on the LCD screen.

   The print head moves to its home position and the product starts charging the ink. This takes a few minutes. When you see a completion message on the screen, ink replacement is finished.

   **Caution:** Do not turn off the product while ink is charging or you may not be able to print.

   **Caution:** If you remove an ink cartridge for later use, protect the ink supply area from dirt and dust and store it in the same environment as the printer. The valve in the ink supply port is designed to contain any excess ink, but do not touch the ink supply port or surrounding area. Always store ink cartridges with the label facing up; do not store cartridges upside-down.

Printing with Expended Color Cartridges - Control Panel
If you see a message on the control panel to replace a color ink cartridge, you can temporarily print or copy in black ink.

Note the following restrictions when using this feature:
• You can print or copy only on plain paper or envelopes
• You can print or copy only in black or grayscale
• You cannot select borderless printing or copying

1. When you see a message on the LCD screen to replace a color ink cartridge, select Proceed.

You see a message that you can temporarily print with black ink.

2. Select Proceed again.

3. If you want to print or copy in black only, select No, remind me later.

The current print job is canceled.

4. Press the home button, if necessary.

5. Try printing or copying again.

Parent topic: Printing with Black Ink and Expended Color Cartridges
Printing with Expended Color Cartridges - Windows

If you see a message during printing telling you that you can temporarily print in black ink with an expended color cartridge, you can cancel your print job and select settings to print on plain paper or on an envelope.

Note: If you are using your Epson product with the Windows 10 S operating system, you cannot use the software described in this section. You also cannot download and install any Epson product software from the Epson website for use with Windows 10 S; you must obtain software only from the Windows Store.

Note: To use this feature, Epson Status Monitor must be enabled.

1. Click Cancel or Cancel Print to cancel your print job.

   Note: If the message screen appears on another computer on a network, you may need to cancel the print job using the product control panel.

2. Load plain paper or an envelope in your product.
3. Access the print settings in your print application.
4. Click the Main tab and make sure Borderless is not selected.
5. Select Plain Paper/Bright White Paper or Envelope as the paper type setting.
6. Select the Black/Grayscale checkbox.
7. Click OK.
8. Print your document.
   Epson Status Monitor 3 displays a print message.
9. Click Print in Black to print your document.

Parent topic: Printing with Black Ink and Expended Color Cartridges

Printing with Expended Color Cartridges - Mac

If printing stops, you can cancel your print job and select settings to temporarily print with only black ink on plain paper or on an envelope.
1. Click the printer icon in the Dock.
2. If you see a message telling you that you can temporarily print with only black ink, click the Delete or \( \text{\text{button}} \) to cancel your print job. If you see an error message, click OK.

3. In the Apple menu or the Dock, select System Preferences.

4. Select Print & Fax, Print & Scan, or Printers & Scanners, select your product, and select Options & Supplies.

5. Select Driver or Options.

   You see a screen like this:

   ![Screen showing the options for printer settings]

   6. Select On as the Permit temporary black printing setting.

   7. Click OK.

   8. Close the utility window.

   9. Load plain paper or an envelope in your product.

   10. Access the print settings in your print application.

   11. Select Print Settings from the pop-up menu.

   12. Select Plain Paper/Bright White Paper or Envelope as the paper type setting.

   13. Select the Grayscale option.

   14. Click Print to print your document.
Conserving Low Black Ink with Windows

The following window appears when black ink runs low and there is more color ink.

![EPSON Status Monitor 3 window](image)

Note: The window appears only when you have selected Plain Paper/Bright White Paper as the paper type setting, and depends on other selected print settings. To use this feature, Epson Status Monitor must be enabled.

• Click Yes to use a mixture of color inks to create black, or No to continue using the remaining black ink for the document you are printing.

• Click Disable this feature to continue using the remaining black ink.

Note: If you disable this feature, it remains disabled until you install a new black ink cartridge.

Replacing the Maintenance Box

Make sure you have a new maintenance box before you begin.
Caution: Do not reuse a maintenance box that has been removed and left uninstalled for more than a week. Keep the maintenance box away from direct sunlight.

1. Make sure the product is not printing.
2. Remove the new maintenance box from its package.

   Caution: Do not touch the green chip on the maintenance box.

3. Use a flat-head screwdriver to loosen the screw on the maintenance box cover as shown, then remove the cover.
4. Grasp the maintenance box as shown and pull it out of its holder.

**Note:** Do not tilt the used maintenance box or take it apart, and do not touch the areas shown here.

**Warning:** If ink gets on your skin, wash it thoroughly with soap and water. If ink gets into your eyes, flush them immediately with water. If ink gets into your mouth, spit it out and see a doctor right away. Keep the maintenance box out of the reach of children and do not drink the ink.
5. Place the used maintenance box in the plastic bag that came with the new maintenance box. Seal the bag and dispose of it carefully.

6. Insert the new maintenance box into the holder and push it all the way in until it clicks into place.
7. Insert the maintenance box cover and tighten the screw to secure the cover.

**Cleaning the Paper Guide**

Print Head Maintenance

If your printouts become too light, or you see dark or light bands across them, you may need to clean the print head nozzles. Cleaning uses ink, so clean the nozzles only if print quality declines.

You can check for clogged nozzles before you clean them so you don’t clean them unnecessarily.

**Note:** You cannot clean the print head if an ink cartridge is expended, and may not be able to clean it when a cartridge is low. You must replace the cartridge first.

Cleaning and Transporting Your Product

See these sections if you need to clean or transport your product.

Cleaning Your Product
Cleaning the Print Head Path
Transporting Your Product

Cleaning Your Product

To keep your product working at its best, you should clean it several times a year.

Close the output tray and paper support when you are not using the product to protect it from dust.

**Caution:** Do not use a hard brush, alcohol, or paint thinner to clean the product or you may damage it. Do not use oil or other lubricants inside the product or let water get inside it.

1. Turn off the product.
2. Unplug the power cable.
3. Disconnect any connected cables.
4. Remove all the paper.
5. Clean the scanner glass with a soft, lint-free cloth (microfiber is recommended), moistened with a little glass cleaner.

**Caution:** Do not spray glass cleaner directly on the glass and do not press the glass surface with any force.

6. Clean the outer case and control panel with a soft, dry cloth. Do not use liquid or chemical cleansers.

Parent topic: Cleaning and Transporting Your Product

Cleaning the Print Head Path

If the print quality has not improved after aligning the print head and cleaning the paper guide, the print head path inside the product may be smeared with ink.

To clean the print head path, use the following:

- Several cotton swabs
• ¼ cup (59 ml) water containing 2 to 3 drops of mild dish detergent
• A small flashlight

Caution: Do not use any other liquid to clean the print head path or you may damage your product.

1. Turn off the product.
2. Unplug the power cable.
3. Disconnect any connected cables.
4. Lift up the scanner unit.
5. Using the flashlight, check the translucent film shown here for ink smears.

1 Translucent film
2 Print head rail

Caution: Do not touch the flat white cable or the print head rail; otherwise, you may not be able to print. Do not wipe off the grease on the rail.
6. Moist a cotton swab with the water and detergent mixture and squeeze out any excess moisture. Use it to lightly wipe ink off the translucent film.

**Caution:** Do not press too hard on the film or you may dislocate the anchor springs and damage the product.

7. Use a new, dry cotton swab to dry the translucent film.
8. Repeat steps 6 and 7 as necessary to clean all ink smears.
9. When the translucent film is dry, close the scanner unit.
10. Plug in the power cable and reconnect any interface cables.

**Parent topic:** Cleaning and Transporting Your Product

**Related tasks**

**Transporting Your Product**

If you need to store your product or transport it a long distance, prepare it for transportation as described here.

**Caution:** During transportation and storage, follow these guidelines:
- Avoid tilting the product or turning it upside down. Also avoid placing the product on its side for an extended period of time. Ink may leak.
• Leave the ink cartridges installed. Removing the cartridges can dry out the print head and may prevent the product from printing.
• Do not carry the product by its control panel; this may damage the product.

Note: Before storing your product for a long period, replace low, expended, or expired ink to help prevent the print head from drying out. Store your product in a cool, dry place.

1. Turn off the product.
2. Lift up the scanner unit and check to see if the print head is in the far right position (the home position). If not, turn on the product, wait for the print head to move, then turn the product off again.

**Caution:** Do not place tape on the white flat cable inside the product; otherwise, you may damage your product.

4. Lower the scanner unit all the way as shown.

5. Remove all the paper from the product.

6. Unplug the power cable.

7. Disconnect any connected cables.
8. Close all parts on the product as shown.

9. Place the product in its original packing materials, if possible, or use equivalent materials with cushioning around the product.

Keep the product level during transportation. Be sure to remove the tape from the ink cartridge holder before turning on your product. If print quality has declined when you print again, clean and align the print head.

Checking for Software Updates

It’s a good idea to check Epson’s support website occasionally for free updates to your product software. Visit epson.com/support (U.S.), epson.ca/support (Canada), or epson.com.jm/support (Caribbean) and select your product.

Note: Epson periodically provides firmware updates to address issues of security, performance, minor bug fixes and ensure your printer functions as designed. Your printer was designed to work only with genuine Epson ink cartridges, therefore some updates may affect the functionality of third-party ink.

• **Windows**: Your printer software automatically checks for updates. You can also manually update the software by selecting **Software Update** here:
  - Accessing the Windows Desktop and right-clicking the icon for your product in the right side of the Windows taskbar, or clicking the up arrow and right-clicking .
  - On the **Maintenance** tab in the printer settings window

...
You can also update the software by selecting **EPSON Software Updater** in the **EPSON** or **EPSON Software** program group, accessible by the **Start** button, or on the **Start** or **Apps** screens, depending on your version of Windows.

- **OS X**: You can manually update the software by opening the **Applications > Epson Software** folder and selecting **EPSON Software Updater**.

- **macOS 10.12.x, 10.13.x, or 10.14.x**: You can manually update the software by opening the **App Store**, selecting **Updates**, searching for a software update option for Epson Software, and selecting **Update**.

</tr>
</tbody>
</table>

**Note:** The ink pads in the printer collect, distribute, and contain the ink that is not used on printed pages. During the life of your product it may reach a condition where either satisfactory print quality cannot be maintained or the ink pads have reached the end of their usable life. The Epson Status Monitor, your LCD screen, or lights on the control panel will advise you when these parts need replacing. If this happens during the standard warranty of the product, the exchange of the product or replacement of the pads is covered under the standard warranty. If the product is out of warranty, the pads can be replaced by any Epson authorized service provider. The waste ink pads are not a user-replaceable part.
Running a Product Check

Running a product check helps you determine if your product is operating properly.

1. Disconnect any interface cables connected to your product.
2. Make sure there are no errors on the LCD screen.
3. Load plain paper in the product.
4. Press the \( \Rightarrow \) home button, if necessary.
5. Select Maintenance.

You see a screen like this:
6. Select **Print Head Nozzle Check**.
7. Select **Print**.
   The nozzle pattern prints.
8. Do one of the following, depending on the results of the product check:
   - If the page prints and the nozzle check pattern is complete, the product is operating properly. Any operation problem you may have could be caused by your computer, cable, software, or selected settings. Check the other solutions in this manual or try uninstalling and reinstalling your printer software.
   - If the page prints but the nozzle check pattern has gaps, clean the print head.
   - If the page does not print, the product may have a problem. Check the other solutions in this manual. If they do not work, contact Epson.

### Resetting Control Panel Defaults

If you have a problem with settings on the product control panel, you can reset them to their factory defaults. You can choose which settings to reset or reset them all.

1. Press the **home** button, if necessary.
2. Select **Settings**.
3. Scroll down and select **Restore Default Settings**.
You see a screen like this:

You see a confirmation screen.

5. Select **Yes** to reset the selected settings. (Select **No** if you want to cancel the operation.)

Parent topic: Solving Problems

**Solving Setup Problems**

Check these sections if you have problems while setting up your product.

- **Product Does Not Turn On or Off**
- **Noise After Ink Installation**
- **Software Installation Problems**

Parent topic: Solving Problems
Product Does Not Turn On or Off
If you cannot turn the product on or off, try these solutions:

• If you cannot turn on your product, make sure the power cord is securely connected and hold down the power button a little longer.

• If you cannot turn off your product, hold down the power button a little longer. If you still cannot turn off your product, unplug the power cord, plug the power cord back in, then turn your product on and off again using the power button.

Parent topic: Solving Setup Problems

Noise After Ink Installation
If you hear noises from your product after installing ink, check the following:

• The first time you install the ink cartridges, the product must charge its print head. Wait until charging finishes before you turn off the product, or it may charge improperly and use excess ink the next time you turn it on.

• If the product's print head stops moving or making noise, and the charging process has not finished after approximately 5 minutes, turn off your product. Turn it back on and check to see if charging is still in progress. If it is still in progress, contact Epson for help.

Parent topic: Solving Setup Problems

Where to Get Help

Software Installation Problems
If you have problems while installing your product software, try these solutions:

• Make sure your product is turned on and any necessary cables are securely connected at both ends. If you still have problems installing software, disconnect the cable and carefully follow the instructions on the Start Here sheet. Also make sure your system meets the requirements for your operating system.

• Close any other programs, including screen savers and virus protection software, and install your product software again.

• In Windows, make sure your product is selected as the default printer and the correct port is shown in the printer properties.

• If you see any error message or your software does not install correctly in Windows, you may not have software installation privileges. Contact your system administrator.

• If you are printing over a network, make sure your product is set up properly on the network.
Solving Network Problems

Check these solutions if you have problems setting up or using your product on a network.

Note: Breakdown or repair of this product may cause loss of network data and settings. Epson is not responsible for backing up or recovering data and settings during or after the warranty period. We recommend that you make your own backup or print out your network data and settings.

Product Cannot Connect to a Wireless Router or Access Point

If your product has trouble finding or connecting to a wireless router or access point, try these solutions:

- If you are connecting the product via Wi-Fi Protected Setup (WPS) and the Wi-Fi icon on your product's LCD screen is not lit or does not appear, make sure you select one of the WPS options from the product control panel within 2 minutes of pressing the WPS button on your router.

- Make sure to place your product within contact range of your 2.4 GHz router or access point. Avoid placing your product near a microwave oven, 2.4 GHz cordless phone, or large metal object, such as a filing cabinet.

Note: If you are using a 5 GHz wireless router, set the router to operate in dual band (2.4 GHz and 5 GHz) mode. If your router uses a single network name (SSID) for both the 2.4 GHz and 5 GHz band, give each band its own network name (SSID) instead, such as Home Network 2.4 GHz and Home
Network 5 GHz. See your router documentation or contact your internet service provider for instructions.

- Verify that your router or access point is operating correctly by connecting to it from your computer or another device.
- Print a network connection report and check the codes and messages on the report to help determine the cause of the problem.
- You may need to disable the firewall and any anti-virus software on your wireless router or access point.
- Try restarting your router following the instructions in your router documentation.

**Note:** If you are reading these instructions online, you will lose your Internet connection when you restart your router.

- Check to see if access restrictions, such as MAC address filtering, are set on the router or access point. If access restrictions are set, add your product's MAC address to your router's address list. To obtain your product's MAC address, print a network status sheet. Then follow the instructions in your router or access point documentation to add the address to the list.
- If your router or access point does not broadcast its network name (SSID), follow the instructions that came with your product to enter your wireless network name manually.
- If your router or access point has security enabled, determine the kind of security it is using and any required password or passphrase for connection. Then make sure to enter the exact WEP key or WPA passphrase correctly.
- Check if your computer is restricting the available wireless channels. If so, verify that your wireless access point is using one of the usable channels and change to a usable channel, if necessary.
- If you are using a Wi-Fi Direct connection that suddenly disconnects, the Wi-Fi direct password on your device may have been changed. If necessary, delete the existing DIRECT-xxxxxxxx connection settings from your device and enter a new password. See your device documentation for instructions.
- If you connected your product to a Windows computer using Wi-Fi Direct and it automatically selected Access Point Mode, you may have trouble accessing a low-priority Internet connection. Check the network connection or adapter settings in the Windows Control Panel and set the **Internet metric** setting to **100** for your version of the Internet Protocol.

Network Software Cannot Find Product on a Network

If EpsonNet Setup cannot find your product on a network, try these solutions:

• Make sure your product is turned on and connected to your network. Verify the connection using your product control panel.

• Check if your network name (SSID) contains non-ASCII characters. Your product cannot display non-ASCII characters.

• Print a network connection report and check the codes and messages on the report to help determine the cause of the problem.

• Make sure your product is not connected to a guest network.

• If necessary, reinstall your product software and try running EpsonNet Setup again:
  1. Reset your product's network settings to their factory defaults.
  2. **Windows only:** Uninstall your product software.
  3. Restart your router following the instructions in your router documentation.

  **Note:** If you are reading these instructions online, you will lose your Internet connection when you restart your router, so note the next step before restarting it.

  4. Download your product software from the Epson website using the instructions on the *Start Here* sheet.

• If you have replaced your router, reinstall your product software to connect to the new router.

  **Note:** If you are using a 5 GHz wireless router, set the router to operate in dual band (2.4 GHz and 5 GHz) mode. If your router uses a single network name (SSID) for both the 2.4 GHz and 5 GHz band, give each band its own network name (SSID) instead, such as Home Network 2.4 GHz and Home Network 5 GHz. See your router documentation or contact your internet service provider for instructions.

• Check to see if your wireless router or access point has an enabled Privacy Separator function that is preventing detection of your device over the network. See your router or access point documentation for instructions on disabling the Privacy Separator function.

**Parent topic:** Solving Network Problems
Product Does Not Appear in Mac Printer Window

If your product does not appear in the Mac printer window, try these solutions:

- Turn your product off, wait 30 seconds, then turn it back on again.
- If you are connecting the product via Wi-Fi Protected Setup (WPS) and the Wi-Fi icon on your product's LCD screen is not lit, make sure you select one of the WPS options from the product control panel within 2 minutes of pressing the WPS button on your router.
- If you are connecting the product wirelessly via EpsonNet Setup and the Wi-Fi icon does not appear lit on your LCD screen, make sure your product software was installed correctly. If necessary, reinstall your software.

Note: If you are using a 5 GHz wireless router, set the router to operate in dual band (2.4 GHz and 5 GHz) mode. If your router uses a single network name (SSID) for both the 2.4 GHz and 5 GHz band, give each band its own network name (SSID) instead, such as Home Network 2.4 GHz and Home Network 5 GHz. See your router documentation or contact your internet service provider for instructions.

Cannot Print Over a Network

If you cannot print over a network, try these solutions:

- Make sure that your product is turned on.
- Make sure you install your product's network software as described in your product documentation.
• Print a network status sheet and verify that the network settings are correct. If the network status is **Disconnected**, check any cable connections and turn your product off and then on again.

• Print a network connection report and check the codes and messages on the report to help determine the cause of the problem.

• If you are using TCP/IP, make sure the product's IP address is set correctly for your network. If your network does not assign IP addresses using DHCP, set the IP address manually.

• Make sure your computer and product are both using the same wireless network.

• If network printing is slow, print a network status sheet and check the signal strength. If it is poor, place your product closer to your router or access point. Avoid placing your product near a microwave oven, 2.4 GHz cordless phone, or large metal object, such as a filing cabinet.

  **Note:** If you are using a 5 GHz wireless router, set the router to operate in dual band (2.4 GHz and 5 GHz) mode. If your router uses a single network name (SSID) for both the 2.4 GHz and 5 GHz band, give each band its own network name (SSID) instead, such as Home Network 2.4 GHz and Home Network 5 GHz. See your router documentation or contact your internet service provider for instructions.

• Try restarting your router following the instructions in your router documentation.

  **Note:** If you are reading these instructions online, you will lose your Internet connection when you restart your router.

• Check to see if your wireless router or access point has an enabled Privacy Separator function that is preventing printing from a device over the network. See your router or access point documentation for instructions on disabling the Privacy Separator function.

Cannot Scan Over a Network

If you cannot start Epson Scan 2 for scanning over a network, try these solutions:

• If you cannot scan from your product control panel, make sure you restarted your computer after installing the product software. Make sure the Event Manager program is not being blocked by your firewall or security software.

**Note:** If you are using a 5 GHz wireless router, set the router to operate in dual band (2.4 GHz and 5 GHz) mode. If your router uses a single network name (SSID) for both the 2.4 GHz and 5 GHz band, give each band its own network name (SSID) instead, such as Home Network 2.4 GHz and Home Network 5 GHz. See your router documentation or contact your internet service provider for instructions.

• If you are scanning a large original at a high resolution, a network communication error may occur. Try scanning again at a lower resolution.

• If network communication was interrupted while starting Epson Scan 2, exit Epson Scan 2, wait a few seconds, and restart it. If Epson Scan 2 cannot restart, turn off your product, turn it back on, and try restarting Epson Scan 2 again.

• Check the scanner setting and reset the connection if necessary using Epson Scan 2 Utility:

  **Windows 10:** Click and select **EPSON > Epson Scan 2 Utility**. Make sure your product is selected. If necessary, select the **Other** tab and click **Reset**.

  **Windows 8.x:** Navigate to the **Apps** screen, select **EPSON**, and select **Epson Scan 2 Utility**. Make sure your product is selected. If necessary, select the **Other** tab and click **Reset**.

  **Windows (other versions):** Click or **Start > All Programs** or **Programs > EPSON > Epson Scan 2 > Epson Scan 2 Utility**. Make sure your product is selected. If necessary, select the **Other** tab and click **Reset**.

  **Mac:** Open the **Applications** folder, click **Epson Software**, and click **Epson Scan 2 Utility**. Make sure your product is selected. If necessary, select the **Other** tab and click **Reset**.

• You may need to disable the firewall and any anti-virus software on your wireless router or access point.

Solving Copying Problems

Check these solutions if you have problems copying with your product.

Product Makes Noise, But Nothing Copies

Product Makes Noise When It Sits for a While

Parent topic: Solving Copying Problems

Product Makes Noise, But Nothing Copies

If your product makes a noise, but nothing copies, try these solutions:

- Run a nozzle check to see if any of the print head nozzles are clogged. Then clean the print head, if necessary.
- If the nozzle check page does not print, but the product's power is on, make sure your product software is installed correctly.
- Make sure your product is level (not tilted).

Paper Jam Problems in the Rear Cover
Paper Ejection Problems

Parent topic: Solving Problems
Paper Feeding Problems

If you have problems feeding paper, try these solutions:

• Place the product on a flat surface.
• If paper does not feed for printing, remove it. Then reload it in the middle of the rear paper feed. Slide the edge guides against the edge of the paper, making sure that the paper stack is not above the arrow mark on the edge guides.
• If multiple pages feed at once, remove the paper, fan the edges to separate the sheets, and reload it.
• Do not load more than the recommended number of sheets.
• If paper jams when you print on both sides of the paper, try loading fewer sheets.
• Make sure your paper meets the specifications for your product.
• Make sure the paper size and paper type settings on the control panel are correct.
• Do not place objects on the feeder guard.
• For best results, follow these guidelines:
  • Use new, smooth, high-quality paper that is not curled, creased, old, too thin, or too thick.
  • Load paper in the rear paper feed printable side up.
  • Follow any special loading instructions that came with the paper.

Paper Jam Problems Inside the Product

If you see a message that paper has jammed inside the product, follow the steps here or on the LCD screen to clear the jam.

1. Cancel the print job, if necessary.
2. Remove any jammed paper from the rear paper feed slot and the ADF.
3. Lift the scanner unit and remove any jammed paper inside.

**Caution:** Do not touch the flat white cable or the translucent film inside your product.
4. Close the scanner unit. Lift the scanner unit up slightly and lower it. When the scanner unit catches, lift it up again and lower it completely.

![Diagram of closing the scanner unit]

5. Follow the prompts on the LCD screen to clear any error messages. If you still see a paper jam message, check the other paper jam solutions.

**Paper Jam Problems in the Rear Cover**

If you see a message that paper has jammed in the rear cover, follow the steps here or on the LCD screen to clear the jam.

1. Cancel the print job, if necessary.
2. Press the buttons to release the rear cover and remove it from your product. Carefully remove any jammed paper from inside the product.

3. Remove any jammed paper from inside the rear cover.

4. Reattach the rear cover.

5. Follow the prompts on the LCD screen to clear any error messages. If you still see a paper jam message, check the other paper jam solutions.

Parent topic: Solving Paper Problems
Paper Ejection Problems

If you have problems with paper ejecting properly, try these solutions:

• If paper does not eject fully, you may have set the wrong paper size. Cancel printing to eject the paper. Select the correct paper size when you reprint.

• If paper is wrinkled when it ejects, it may be damp or too thin. Load new paper and be sure to select the correct paper type setting when you reprint.

Solving Problems Printing from a Computer

Check these sections if you have problems while printing from your computer.

Note: When printing using AirPrint, the available print settings are different from those covered in this manual. See the Apple website for details.

Nothing Prints
Product Icon Does Not Appear in Windows Taskbar
Printing is Slow
Nothing Prints

If you have sent a print job and nothing prints, try these solutions:

• Make sure your product is turned on and connected to your computer.
• Make sure any interface cables are connected securely at both ends.
• If you connected your product to a USB hub, make sure it is a first-tier hub. If it still does not print, connect your product directly to your computer instead of the hub.
• If the printer cannot print using a USB connection, disconnect the USB cable from the computer, right-click on the printer icon displayed on the computer, and select Remove Device. Then connect the USB cable to the computer and try a test print.
• Make sure the printer status is not offline or pending.
• Run a product check to see if a test page prints. If the test page prints, check to see if your product software is installed correctly.
• Make sure your system meets the requirements for your operating system. If you are printing a high-resolution image, you may need more than the minimum requirements. Print the image at a lower resolution or if necessary, increase your system’s memory.
• In Windows, make sure your product is selected as the default printer and the printer port setting matches the printer connection port.
• In Windows, delete all jobs from the Windows Spooler. Click Print Queue on the Maintenance tab in the printer settings window, and cancel any stalled print jobs.
• On a Mac, make sure the printer is added to the printer list and the printer is not paused.

Product Icon Does Not Appear in Windows Taskbar

If you do not see your product icon in the Windows taskbar, first try restarting your computer. If that does not work, try this solution:

1. Do one of the following:

   • **Windows 10**: Click and select (Settings) > Devices > Printers & scanners. Select your product name and select Manage > Printing preferences.
• **Windows 8.x**: Navigate to the **Apps** screen and select **Control Panel > Hardware and Sound > Devices and Printers**. Right-click your product name, select **Printing Preferences**, and select your product name again if necessary.

• **Windows 7**: Click 📋 and select **Devices and Printers**. Right-click your product name, select **Printing Preferences**, and select your product name again if necessary.

• **Windows Vista**: Click 📔, select **Control Panel**, and click **Printer** under **Hardware and Sound**. Right-click your product name, select **Printing Preferences**, and select your product name again if necessary.

2. Click the **Maintenance** tab.
3. Click the **Extended Settings** button.
4. Select **Enable EPSON Status Monitor 3** and click **OK**.
5. Click the **Monitoring Preferences** button.
6. Click the checkbox for the option that adds the shortcut icon to the taskbar.
7. Click **OK** to close the open program windows.

**Printing is Slow**

If printing becomes slow, try these solutions:

- Make sure your system meets the requirements for your operating system. If you are printing a high-resolution image, you may need more than the minimum requirements. If necessary, increase your system's memory.
- If you are using Windows 7, close the **Devices and Printers** window before you print.
- Make sure **Quiet Mode** is turned off.
• Clear space on your hard drive or run a defragmentation utility to free up existing space.
• Close any programs you are not using when you print.
• If your product is connected to a USB hub, connect it directly to your computer instead.
• If printing becomes slower after printing continuously for a long time, the product may have automatically slowed down to protect the print mechanism from overheating or becoming damaged. Let the product rest with the power on for 30 minutes, then try printing again.
• If you are printing over a wireless network, factors such as interference, network traffic, or weak signal strength may affect your printing speed.

For the fastest printing, select the following settings in your product software:
• Make sure the paper type setting matches the type of paper you loaded.
• Turn on any high speed settings in your product software.
• Select a lower print quality setting.
• Make sure the ink drying time has not been increased for double-sided printing.
• **Windows**: Click the **Maintenance** or **Utility** tab, select **Extended Settings** or **Speed and Progress**, and select the following settings:
  • High Speed Copies
  • Always Spool RAW Datatype
  • Page Rendering Mode
  • Print as Bitmap
• **Windows**: Select **Printer Properties**, click the **More Options** tab, and make sure the **High Speed** setting is enabled.
• **Mac**: Select **System Preferences**, select **Printers & Scanners**, and select your product. Select **Options & Supplies**, select **Options** (or **Driver**), and enable the **High Speed Printing** setting.

If printing is still slow and you are using Windows 7 or Windows Vista, try the following:

1. Click and select **Computer** or **My Computer**. Double-click the C: drive and open these folders: **ProgramData > EPSON > PRINTER**.

   **Note**: If you do not see the ProgramData folder, open the Organize menu and select **Folder and search options**. In the window that appears, click the **View** tab, select **Show hidden files, folders, and drives** in the Advanced settings list, and click **OK**.

2. Right-click the **EPAUDF01.AUD** file and select **Delete**.
3. Restart your computer and try printing again.

Blank Pages Print

If blank pages print unexpectedly, try these solutions:

• Make sure you selected the correct paper size settings in your printing program and printer software.
• If a blank page exists in a document you are printing and you want to skip printing it, select the Skip Blank Page setting in your printer software, if available.
• Run a print head nozzle check to see if any of the nozzles are clogged. Then clean the print head, if necessary.
• Make sure your product is selected as the printer in your printing program.

Incorrect Margins on Printout

If your printed page has incorrect margins, try these solutions:

• Make sure you selected the correct paper size settings in your printing program and printer software.
• Make sure you selected the correct margins for your paper size in your printing program.
• Make sure your paper is positioned correctly for feeding into the product.
• When placing originals on the scanner glass, align the corner of the original with the corner indicated by the arrow. If the edges of the copy are cropped, move the original slightly away from the corner.
• Clean the scanner glass and the document cover. If there is dust or stains on the glass, the copy area may extend to include the dust or stains.

You can use the preview option in your printer software to check your margins before you print.

Border Appears on Borderless Prints

If you see a border on borderless prints, try these solutions:

• Make sure you are printing on a compatible borderless paper type and size.

  Note: For custom paper sizes, make sure you select a supported borderless page width.

• Windows: Make sure you selected the Borderless setting in your printer software.
• Mac: Make sure you selected the Borderless checkbox or a paper size with a Borderless option in your printer software.
• Adjust the Expansion setting to adjust the amount of image expansion on the edges of borderless prints.
• Make sure the image size and the paper size are set correctly; if the image is small, the enlargement may not be enough to cover the paper.
• Access the Extended Settings (Windows) or Printing Preferences (Mac) and select **Remove White Borders**.

### Incorrect Characters Print

If incorrect characters appear in your prints, try these solutions before reprinting:

• Make sure any cables are securely connected at both ends.
• In Windows, delete all jobs from the Windows Spooler. Click **Print Queue** on the Maintenance tab in the printer settings window, and cancel any stalled print jobs.
• If your product is connected to a USB hub, connect it directly to your computer instead.
• If your computer entered sleep mode the last time you printed, the next print job after your computer exits sleep mode may contain garbled characters. Print your document again.
• If incorrect characters still appear in your prints, try connecting your product using a different cable.
• Make sure you are using the printer software for this product. Check the product name at the top of the driver window.

**Parent topic:** Solving Page Layout and Content Problems

**Related tasks**
Printing Your Document or Photo - Windows
Printing Your Document or Photo - Mac

### Incorrect Image Size or Position

If your printed image is the wrong size or in the wrong position, try these solutions:

• Make sure you selected the correct paper size and layout settings in your printing program and printer software.
• Make sure you selected the correct paper size on the control panel.
• Make sure your paper is positioned correctly for feeding into the printer.
• Slide the edge guides against the edges of the paper.
• Clean the scanner glass and document cover.
• If the edges of a copy are cropped, slightly move the original away from the edges of the scanner glass.
• Make sure you selected the correct margins for your paper size in your printing program.
• If the image is slightly enlarged and cropped during borderless printing, change the Expansion setting.

You can use the preview option in your printer software to check your margins before you print.

- Replacing Ink Cartridges and Maintenance Boxes
Blurry or Smeared Printout

If your printouts are blurry or smeared, try these solutions:

• Make sure your paper is not damp, curled, old, or loaded incorrectly in your product.
• Use a support sheet with special paper, or load special paper one sheet at a time.
• Make sure your paper meets the specifications for your product.
• Use Epson papers to ensure proper saturation and absorption of genuine Epson inks.
• Make sure the paper type setting in your product software matches the type of paper you loaded.
• If you are printing on letterhead paper, make sure the paper size setting matches the size of paper you loaded. If you select a paper size that is too large for the paper you loaded, the product may print beyond the edges of the paper and cause ink to smear.
• Make sure you loaded the printable side of the paper correctly for your product.
• Remove each sheet from the output tray as it is printed.
• Avoid handling printouts on glossy paper right after printing to allow the ink to set.
• Turn off any high speed settings in your product software.
• If you print on both sides of a sheet of paper, smudges may appear on the reverse side of heavily saturated or dark images. If one side of a sheet will contain a lighter image or text, print that side first. Adjust the density and/or ink drying time settings.
• Run a nozzle check to see if any of the print head nozzles are clogged. Then clean the print head, if necessary.
• Align the print head.
• Clean the paper path.

Note: Your product will not operate properly while tilted at an angle. Place it on a flat, stable surface that extends beyond the base of the product in all directions.

Replacing Ink Cartridges and Maintenance Boxes

Grainy Printout

If your printouts are grainy, try these solutions:

- Make sure you loaded the printable side of the paper correctly for your product.
- Select a higher print quality setting and turn off any high speed settings in your product software.
- Run a nozzle check to see if any of the print head nozzles are clogged. Then clean the print head, if necessary.
• Align the print head.
• You may need to increase the image resolution or print a smaller size; see your software documentation.

**Note:** Images from the Internet may be low resolution and not result in a high quality printout.

• If you enlarged the image size in an image-editing program, you need to increase the image resolution setting to retain a high image quality. Increase the image resolution by the same amount you increase the image size. For example, if the image resolution is 300 dpi (dots per inch) and you will double the image size for printing, change the resolution setting to 600 dpi.

**Note:** Higher resolution settings result in larger file sizes, which take longer to process and print. Consider the limitations of your computer system when selecting a resolution, and select the lowest possible resolution that produces acceptable quality to keep file sizes manageable.

**Parent topic:** Solving Print Quality Problems

### Incorrect Colors

If your printouts have incorrect colors, try these solutions:

• Make sure the paper type setting matches the paper you loaded.
• Make sure the Black/Grayscale or Grayscale setting is not selected in your printer software.
• If you selected Standard-Vivid (Windows) or Normal-Vivid (Mac) as the quality setting in the printer software, try selecting Standard (Windows) or Normal (Mac) instead.
• Run a nozzle check to see if any of the print head nozzles are clogged. Then clean the print head, if necessary.
• The ink cartridges may be old or low on ink, and you may need to replace them.
• After you print, the colors in your printout need time to set as the ink dries. During this time, the colors may look different than you expect. To speed up drying time, do not stack your printouts on top of each other.

• Your printed colors can never exactly match your on-screen colors. However, you can use a color management system to get as close as possible. Try using the color management options in your printer software.

• For best results, use genuine Epson paper.

Solving Scanning Problems

Check these solutions if you have problems scanning with your product.

Scanning Software Does Not Operate Correctly
Cannot Start Epson Scan 2
Scanning is Slow

Parent topic: Solving Problems

Scanning Software Does Not Operate Correctly

If your scanning software does not operate correctly, try these solutions:

• Make sure your computer has adequate memory and meets the system requirements for your operating system.

• Make sure your computer is not running in a power-saving mode, such as sleep or standby. If so, wake your system and restart your scanning software.

• If you upgraded your operating system but did not reinstall your scanning software, try reinstalling it.
• In Windows, make sure your product is listed as a valid device in the **Scanners and Cameras** control panel.

**Parent topic:** [Solving Scanning Problems](#)

### Cannot Start Epson Scan 2

If you cannot start Epson Scan 2, try these solutions:

• Make sure your product is turned on and any interface cables are securely connected at both ends.

• If your product is connected to a USB hub, connect it directly to your computer instead.

• If you scan at a high resolution over a network, a communication error may occur. Lower the resolution.

• Make sure Epson Scan 2 is selected as your scanning program.

• Make sure your computer is not running in a power-saving mode, such as sleep or standby. If so, wake your system and restart Epson Scan 2.

• Check the connection setting and test the connection using Epson Scan 2 Utility:
  
  **Windows 10:** Click and select **EPSON > Epson Scan 2 Utility**. Make sure the correct product is selected. If necessary, select the **Other** tab and click **Reset**.

  **Windows 8.x:** Navigate to the **Apps** screen and select **Epson Scan 2 Utility**. Make sure the correct product is selected. If necessary, select the **Other** tab and click **Reset**.

  **Windows (other versions):** Click or **Start > All Programs** or **Programs > EPSON > Epson Scan 2 > Epson Scan 2 Utility**. Make sure the correct product is selected. If necessary, select the **Other** tab and click **Reset**.

  **Mac:** Open the **Applications** folder, click **Epson Software**, and click **Epson Scan 2 Utility**. Make sure the correct product is selected. If necessary, select the **Other** tab and click **Reset**.

• Make sure you do not have multiple versions of Epson Scan 2 installed. If you do, uninstall both versions and install one version.

• If you upgraded your operating system but did not reinstall Epson Scan 2, try reinstalling it.

Scanning in Epson Scan 2
Scanning is Slow

If scanning becomes slow, try these solutions:

• Scan your original at a lower resolution, if possible.
• Make sure your system meets the requirements for your operating system. If you are scanning a high-resolution image, you may need more than the minimum requirements. If necessary, increase your system's memory or reduce the resolution.
• If you are scanning over a wireless network, factors such as interference, network traffic, or weak signal strength may affect your scanning speed.

Solving Scanned Image Quality Problems

Check these sections if a scanned image on your computer screen has a quality problem.

Scanned Image Quality Problems
Image Consists of a Few Dots Only
Line of Dots Appears in All Scanned Images
Straight Lines in an Image Appear Crooked
Image Colors are Patchy at the Edges
Ripple Patterns Appear in an Image
Scanned Image Edges are Cropped

Parent topic: Solving Problems

Scanned Image Quality Problems

If you encounter quality problems with your scanned image, try these solutions:

Image is Distorted or Blurry

• Do not move your original or your product during scanning.
• Your product will not operate properly while tilted at an angle. Place your product on a flat, stable surface that extends beyond its base in all directions.
• Adjust these Epson Scan 2 settings (if available) and try scanning again:
  • Increase the Resolution setting.
• If the Image Type setting is **Black & White**, adjust the **Threshold** setting.
• If the Image Type setting is **Color** or **Grayscale**, select the **Unsharp Mask** setting.
• If the Image Type setting is **Black & White**, select **Text Enhancement**. If the Image Type setting is **Color** or **Grayscale**, change the **Text Enhancement** setting to **High**.

### Image is Too Dark
• If the Image Type is set to **Color** or **Grayscale**, adjust the **Brightness** setting.
• Check the brightness and contrast settings of your computer monitor.

### Back of Original Image Appears in Scanned Image
• Place a piece of black paper on the back of the original and scan it again.
• Adjust these Epson Scan 2 settings (if available) and try scanning again:
  • Select the **Advanced Settings** tab and adjust the **Brightness** setting.
  • If the Image Type is set to **Black & White**, select **Text Enhancement**. If the Image Type is set to **Color** or **Grayscale**, change the **Text Enhancement** setting to **High**.

### Scanned Image Colors Do Not Match Original Colors
Printed colors can never exactly match the colors on your computer monitor because printers and monitors use different color systems: monitors use RGB (red, green, and blue) and printers typically use CMYK (cyan, magenta, yellow, and black).

Check the color matching and color management capabilities of your computer, display adapter, and the software you are using to see if they are affecting the palette of colors you see on your screen.

To adjust the colors in your scanned image, adjust these Epson Scan 2 settings (if available) and try scanning again:
• If the Image Type setting is **Color** or **Grayscale**, adjust the **Contrast** setting.
• If the Image Type setting is **Black & White** or **Grayscale**, adjust the **Color Enhance** setting.

Placing Originals on the Scanner Glass
Scanning in Epson Scan 2
Image Consists of a Few Dots Only
If your scanned image consists only of a few dots, try these solutions:
• Make sure you placed your original for scanning facing the correct way.
• If the Image Type setting is Black & White, adjust the Threshold and scan again.
Parent topic: Solving Scanned Image Quality Problems
Related tasks
Placing Originals on the Scanner Glass
Scanning in Epson Scan 2

Line of Dots Appears in All Scanned Images
If a line of dots appears in all your scanned images, clean the scanner glass with a soft, dry, lint-free cloth or use a small amount of glass cleaner on the cloth, if necessary. Paper towels are not recommended.

Caution: Do not spray glass cleaner directly on the scanner glass.

Cleaning Your Product

Straight Lines in an Image Appear Crooked
If straight lines in an original appear crooked in a scanned image, make sure to place your original straight when you scan it.

Parent topic: Solving Scanned Image Quality Problems
Related tasks
Placing Originals on the Scanner Glass

Image Colors are Patchy at the Edges
If you are scanning a thick or warped original, cover its edges with paper to block external light as you scan it.

Parent topic: Solving Scanned Image Quality Problems
Ripple Patterns Appear in an Image
You may see a ripple pattern (called a moiré) in scanned images of printed documents. This is caused by interference from differing pitches in the scanner's screen and your original's halftone screen. To reduce this effect, adjust these Epson Scan settings (if available) and try scanning again:
• Select the Descreening setting.
• Select a lower Resolution setting.

Uninstall Your Product Software
If you have a problem that requires you to uninstall and re-install your software, follow the instructions for your operating system.
Uninstalling Product Software - Windows
Uninstalling Product Software - Mac
Parent topic: Solving Problems

Uninstalling Product Software - Windows
You can uninstall and then re-install your product software to solve certain problems.
1. Turn off the product.
2. Disconnect any interface cables.
3. Do one of the following:
   • **Windows 10**: Click and select (Settings) > Apps or System > Apps & features. Then select the program you want to uninstall and select Uninstall.
   • **Windows 8.x**: Navigate to the Apps screen and select Control Panel > Programs > Programs and Features. Select the uninstall option for your Epson product, then select Uninstall/Change.
Note: If you see a User Account Control window, click Yes or Continue.

Select your product again, if necessary, then select OK, and click Yes to confirm the uninstallation.

- **Windows (other versions):** Click 📪 or Start, and select All Programs or Programs. Select EPSON, select your product, then click EPSON Printer Software Uninstall.

Note: If you see a User Account Control window, click Yes or Continue.

In the next window, select your product and click OK. Then follow any on-screen instructions.

4. Do one of the following to uninstall Epson Event Manager, then follow any on-screen instructions:
   - **Windows 10/8.x:** Select Epson Event Manager and click Uninstall.
   - **Windows 7/Windows Vista:** Open the Windows Control Panel utility. Select Programs and Features. (In Classic view, select Programs and click Uninstall a program.) Select Epson Event Manager and click Uninstall/Change.

5. Do one of the following to uninstall Epson Scan 2, then follow any on-screen instructions:
   - **Windows 10:** Select Epson Scan 2 and click Uninstall.
   - **Windows 8.x/Windows 7/Windows Vista:** Select Epson Scan 2 and click Uninstall/Change.

6. Restart your computer, then see the Start Here sheet to re-install your software.

   Note: If you find that re-installing your product software does not solve a problem, contact Epson.

Parent topic: Uninstall Your Product Software

---

**Uninstalling Product Software - Mac**

In most cases, you do not need to uninstall your product software before re-installing it. However, you can download the Uninstaller utility from the Epson support website to uninstall your product software as described here.

Note: If you find that re-installing your product software does not solve a problem, contact Epson.

1. To download the Uninstaller utility, visit [epson.com/support](http://epson.com/support) (U.S.), [epson.ca/support](http://epson.ca/support) (Canada), or [epson.com.jm/support](http://epson.com.jm/support) (Caribbean) and select your product.
2. Click Downloads.
3. Select your operating system, click **Utilities**, locate the Uninstaller utility, and click **Download**.
4. Run the file you downloaded.
5. Double-click the **Uninstaller** icon.
6. In the Epson Uninstaller screen, select the checkbox for each software program you want to uninstall.
7. Click **Uninstall**.
8. Follow the on-screen instructions to uninstall the software.
9. Reinstall your product software.

   **Note:** If you uninstall the printer driver and your product name remains in the **Print & Fax**, **Print & Scan**, or **Printers & Scanners** window, select your product name and click the – (remove) icon to remove it.

**Parent topic:** Uninstall Your Product Software

**Where to Get Help**

If you need to contact Epson for technical support services, use the following support options.

**Internet Support**

Visit Epson’s support website at epson.com/support (U.S.), epson.ca/support (Canada), or epson.com.jm/support (Caribbean) and select your product for solutions to common problems. You can download drivers and documentation, get FAQs and troubleshooting advice, or e-mail Epson with your questions.

**Speak to a Support Representative**

Before you call Epson for support, please have the following information ready:

- **Product name**
- **Product serial number** (located on a label on the product)
- **Proof of purchase** (such as a store receipt) and date of purchase
- **Computer configuration**
- **Description of the problem**

Then call:

- **U.S.: (562) 276-4382**, 6 AM to 8 PM, Pacific Time, Monday through Friday, and 7 AM to 4 PM, Pacific Time, Saturday
• Canada: (905) 709-3839, 6 AM to 8 PM, Pacific Time, Monday through Friday, and 7 AM to 4 PM, Pacific Time, Saturday

Days and hours of support are subject to change without notice. Toll or long distance charges may apply.

**Purchase Supplies and Accessories**

You can purchase genuine Epson ink and paper at epson.com (U.S. sales), epson.ca (Canadian sales), or epson.com.jm (Caribbean sales). You can also purchase supplies from an Epson authorized reseller. To find the nearest one, call 800-GO-EPSON (800-463-7766) in the U.S. or 800-807-7766 in Canada.

## Ink Cartridge Specifications

**Note:** This printer is designed for use with Epson cartridges only, not third-party cartridges or ink. Other brands of ink supplies are not compatible and, if described as compatible, may not function properly or continuously. Such restrictions can be avoided with some other printers such as Epson EcoTank cartridge-free printers.

The included initial cartridges are designed for reliable printer setup and cannot be used as replacement cartridges or resold. After setup, the remaining ink is available for printing. Yields are based on ISO 24711 in default mode, printing continuously. Yields vary due to print images, settings, and temperatures. Printing infrequently or primarily with one color reduces yields. All cartridges must be installed with ink for printing and printer maintenance. For print quality, some ink remains in replaced cartridges.

**Color**

- Black, Cyan, Magenta, Yellow

**Cartridge life**

- Opened package: 6 months
- Unopened package: do not use if the date on the package has expired
Temperature

Storage: –22 to 104 °F (–30 to 40 °C)
1 month at 104 °F (40 °C)
Ink freezes at 3.2 °F (–16 °C)
Ink thaws and is usable after 3 hours at 77 °F (25 °C)

Note: For best printing results, use up a cartridge within 6 months of opening the package.

Safety and Approvals Specifications

**United States**
- Safety: UL60950-1
- EMC: FCC part 15 Subpart B class B

**Canada**
- Safety: CAN/CSA C22.2 No. 60950-1
- EMC: CAN/CSA-CEI/IEC CISPR 22 Class B

This equipment contains the following wireless module:
- Manufacturer: Seiko Epson Corporation.
- Type: J26H006

This product conforms to Part 15 of FCC Rules and RSS-210 of the IC Rules. Epson cannot accept responsibility for any failure to satisfy the protection requirements resulting from a non-recommended modification of the product. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation of the device.

To prevent radio interference to the licensed service, this device is intended to be operated indoors and away from windows to provide maximum shielding. Equipment (or its transmit antenna) that is installed outdoors is subject to licensing.

This equipment complies with FCC/IC radiation exposure limits set forth for an uncontrolled environment and meets the FCC radio frequency (RF) Exposure Guidelines in Supplement C to OET65 and RSS-102 of the IC radio frequency (RF) Exposure rules. This equipment should be installed and operated so that the radiator is kept at least 7.9 inches (20 cm) or more away from a person's body (excluding extremities: hands, wrists, feet and ankles).

**Important Safety Instructions**

Before using your Epson product, read and follow these safety instructions.

- General Product Safety Instructions
- Ink Cartridge Safety Instructions
- Wireless Connection Safety Instructions
- LCD Screen Safety Instructions

**Parent topic:** Notices

**General Product Safety Instructions**

- Be sure to follow all warnings and instructions marked on the product.
- Use only the type of power source indicated on the product's label.
- Use only the power cord that comes with the product. Use of another cord may cause fires or shock. Do not use the cord with any other equipment.
- Make sure the AC power cord meets the relevant local safety standard.
- Place the product near a wall outlet where the plug can be easily unplugged.
- Avoid plugging the product into an outlet on the same circuit as a photo copier or air control system that regularly switches on and off, or on an outlet controlled by a wall switch or timer.
• Do not let the power cord become damaged or frayed. Place it to avoid abrasions, cuts, fraying, crimping, and kinking. Do not place objects on top of it and do not allow it to be stepped on or run over. Be careful to keep the cord straight at each end.

• If you use an extension cord with the product, make sure the total ampere rating of the devices plugged into the extension cord does not exceed the cord's ampere rating. Also, make sure the total ampere rating of all devices plugged into the wall outlet does not exceed the wall outlet's ampere rating.

• Always turn off the product using the power button, and wait until the power light stops flashing before unplugging the product or cutting off power to the electrical outlet.

• If you will not be using the product for a long period, unplug the power cord from the electrical outlet.

• Place the product on a flat, stable surface that extends beyond its base in all directions. It will not operate properly if it is tilted or at an angle.

• Allow space behind the product for the cables, and space above the product so that you can fully raise the document cover.

• Leave enough space in front of the product for the paper to be fully ejected.

• Avoid locations that are subject to rapid changes in heat or humidity, shocks or vibrations, or dust.

• Do not place or store the product outdoors.

• Do not place the product near excessive heat sources or in direct sunlight.

• Leave enough room around the product for sufficient ventilation. Do not block or cover openings in the case or insert objects through the slots.

• Keep the product away from potential sources of electromagnetic interference, such as loudspeakers or the base units of cordless telephones.

• Keep your product at least 8.7 inches (22 cm) away from cardiac pacemakers to prevent your product's radio waves from affecting the operation of the pacemaker.

• When connecting the product to a computer or other device with a cable, ensure the correct orientation of the connectors. Each connector has only one correct orientation. Inserting a connector in the wrong orientation may damage both devices connected by the cable.

• Do not sit or lean on the product. Do not place heavy objects on the product.

• Do not touch the flat white cable inside the product.

• Do not touch the translucent film inside the product.

• Do not move the print head by hand; this may damage the product.

• Do not put your hand inside the product while it is printing.
• Do not spill liquid on the product or use the product with wet hands.
• Do not use aerosol products that contain flammable gases inside or around the product. Doing so may cause fire.
• Do not press too hard on the scanner glass when placing originals.
• Do not open the scanner section while the product is copying, printing, scanning, or performing any other functions.
• Be careful not to trap your fingers when closing the document cover or scanner.
• Except as specifically explained in your documentation, do not attempt to service or disassemble the product yourself.
• Unplug the product and refer servicing to qualified service personnel under the following conditions: if the power cord or plug is damaged; if liquid has entered the product; if the product has been dropped or the case damaged; if the product does not operate normally or exhibits a distinct change in performance. Adjust only those controls that are covered by the operating instructions.
• Leave the ink cartridges installed. Removing the cartridges can dehydrate the print head and may prevent the product from printing.
• When storing or transporting the product, do not tilt it, stand it on its side, or turn it upside down; otherwise, ink may leak.

Parent topic: Important Safety Instructions

Ink Cartridge Safety Instructions

• Keep ink cartridges out of the reach of children and do not drink the ink.
• Be careful when you handle used ink cartridges; there may be ink remaining around the ink supply port. If ink gets on your skin, wash it off with soap and water. If it gets in your eyes, flush them immediately with water.
• Do not put your hand inside the product or touch any cartridges during printing.
• Install a new ink cartridge immediately after removing an expended one. Leaving cartridges uninstalled can dry out the print head and may prevent the product from printing.
• Do not remove or tear the label on the cartridge; this can cause leakage.
• Do not remove the transparent seal from the bottom of the cartridge. This may cause the cartridge to become unusable.
• Do not break the hooks on the side of the cartridge when removing it from the packaging.
• Do not touch the green IC chip on the side of the cartridge. This may prevent normal operation.
• Do not shake cartridges after opening their packages; this can cause them to leak.
• If you remove an ink cartridge for later use, protect the ink supply area from dirt and dust and store it in the same environment as the product. Note that there is a valve in the ink supply port, making covers or plugs unnecessary, but care is needed to prevent the ink from staining items that the cartridge touches. Do not touch the ink cartridge ink supply port or surrounding area.
• Use an ink cartridge before the date printed on its package.
• Do not dismantle an ink cartridge. This could damage the print head.
• Store ink cartridges in a cool, dark place.
• Make sure to install all ink cartridges. The printer only works when all ink cartridges are properly installed.
• After bringing an ink cartridge inside from a cold storage site, allow it to warm up at room temperature for at least three hours before using it.
• Store ink cartridges with their bottoms down. Do not store cartridges upside down.

Wireless Connection Safety Instructions

Radio waves from this product may adversely affect the operation of medical equipment or automatically controlled devices, such as pacemakers, automatic doors or fire alarms. When using this product near such devices or inside a medical facility, follow the directions from authorized staff members at the facility, and follow all posted warnings and directions on the device to avoid causing an accident.

Parent topic: Important Safety Instructions

LCD Screen Safety Instructions

• Use only a dry, soft cloth to clean the LCD screen. Do not use liquid or chemical cleansers.
• If the LCD screen is damaged, contact Epson. If the liquid crystal solution gets on your hands, wash them thoroughly with soap and water. If the liquid crystal solution gets into your eyes, flush them immediately with water. If discomfort or vision problems remain after a thorough flushing, see a doctor immediately.
• Do not press too hard on the LCD screen or subject it to heavy impacts.
• Do not use a pointy or sharp object, such as a pen or your fingernail, to operate the LCD screen.
• If the LCD screen chips or cracks, do not touch or attempt to remove the broken pieces; contact Epson for support.

FCC Compliance Statement

For United States Users

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio or television reception. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause interference to radio and television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

• Reorient or relocate the receiving antenna.
• Increase the separation between the equipment and receiver.
• Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
• Consult the dealer or an experienced radio/TV technician for help.

WARNING

The connection of a non-shielded equipment interface cable to this equipment will invalidate the FCC Certification or Declaration of this device and may cause interference levels which exceed the limits established by the FCC for this equipment. It is the responsibility of the user to obtain and use a shielded equipment interface cable with this device. If this equipment has more than one interface connector, do
not leave cables connected to unused interfaces. Changes or modifications not expressly approved by
the manufacturer could void the user’s authority to operate the equipment.

Binding Arbitration and Class Waiver

1. DISPUTES, BINDING INDIVIDUAL ARBITRATION, AND WAIVER OF CLASS ACTIONS AND
CLASS ARBITRATIONS

1.1 Disputes. The terms of this Section 1 shall apply to all Disputes between you and Epson. The term
"Dispute" is meant to have the broadest meaning permissible under law and includes any dispute, claim,
controversy or action between you and Epson arising out of or relating to this Agreement, Epson
branded products (hardware and including any related software), or other transaction involving you and
Epson, whether in contract, warranty, misrepresentation, fraud, tort, intentional tort, statute, regulation,
ordinance, or any other legal or equitable basis. "DISPUTE" DOES NOT INCLUDE IP CLAIMS, or more
specifically, a claim or cause of action for (a) trademark infringement or dilution, (b) patent infringement,
(c) copyright infringement or misuse, or (d) trade secret misappropriation (an "IP Claim"). You and Epson
also agree, notwithstanding Section 1.6, that a court, not an arbitrator, may decide if a claim or cause of
action is for an IP Claim.

1.2 Binding Arbitration. You and Epson agree that all Disputes shall be resolved by binding arbitration
according to this Agreement. ARBITRATION MEANS THAT YOU WAIVE YOUR RIGHT TO A JUDGE
OR JURY IN A COURT PROCEEDING AND YOUR GROUNDS FOR APPEAL ARE LIMITED.
Pursuant to this Agreement, binding arbitration shall be administered by JAMS, a nationally recognized
arbitration authority, pursuant to its code of procedures then in effect for consumer related disputes, but
excluding any rules that permit joinder or class actions in arbitration (for more detail on procedure, see
Section 1.6 below). You and Epson understand and agree that (a) the Federal Arbitration Act (9 U.S.C.
§1, et seq.) governs the interpretation and enforcement of this Section 1, (b) this Agreement
memorializes a transaction in interstate commerce, and (c) this Section 1 shall survive termination of this
Agreement.

1.3 Pre-Arbitration Steps and Notice. Before submitting a claim for arbitration, you and Epson agree to
try, for sixty (60) days, to resolve any Dispute informally. If Epson and you do not reach an agreement to
resolve the Dispute within the sixty (60) days), you or Epson may commence an arbitration. Notice to
Epson must be addressed to: Epson America, Inc., ATTN: Legal Department, 3840 Kilroy Airport Way,
Long Beach, CA 90806 (the "Epson Address"). The Dispute Notice to you will be sent to the most recent
address Epson has in its records for you. For this reason, it is important to notify us if your address
changes by emailing us at EAILegal@ea.epson.com or writing us at the Epson Address above. Notice of
the Dispute shall include the sender's name, address and contact information, the facts giving rise to the Dispute, and the relief requested (the "Dispute Notice"). Following receipt of the Dispute Notice, Epson and you agree to act in good faith to resolve the Dispute before commencing arbitration.

1.4 Small Claims Court. Notwithstanding the foregoing, you may bring an individual action in the small claims court of your state or municipality if the action is within that court's jurisdiction and is pending only in that court.

1.5 WAIVER OF CLASS ACTIONS AND CLASS ARBITRATIONS. YOU AND EPSON AGREE THAT EACH PARTY MAY BRING DISPUTES AGAINST THE OTHER PARTY ONLY IN AN INDIVIDUAL CAPACITY, AND NOT AS A PLAINTIFF OR CLASS MEMBER IN ANY CLASS OR REPRESENTATIVE PROCEEDING, INCLUDING WITHOUT LIMITATION FEDERAL OR STATE CLASS ACTIONS, OR CLASS ARBITRATIONS. CLASS ACTION LAWSUITS, CLASS-WIDE ARBITRATIONS, PRIVATE ATTORNEY-GENERAL ACTIONS, AND ANY OTHER PROCEEDING WHERE SOMEONE ACTS IN A REPRESENTATIVE CAPACITY ARE NOT ALLOWED. ACCORDINGLY, UNDER THE ARBITRATION PROCEDURES OUTLINED IN THIS SECTION, AN ARBITRATOR SHALL NOT COMBINE OR CONSOLIDATE MORE THAN ONE PARTY'S CLAIMS WITHOUT THE WRITTEN CONSENT OF ALL AFFECTED PARTIES TO AN ARBITRATION PROCEEDING.

1.6 Arbitration Procedure. If you or Epson commences arbitration, the arbitration shall be governed by the rules of JAMS that are in effect when the arbitration is filed, excluding any rules that permit arbitration on a class or representative basis (the "JAMS Rules"), available at http://www.jamsadr.com or by calling 1-800-352-5267, and under the rules set forth in this Agreement. All Disputes shall be resolved by a single neutral arbitrator, and both parties shall have a reasonable opportunity to participate in the selection of the arbitrator. The arbitrator is bound by the terms of this Agreement. The arbitrator, and not any federal, state or local court or agency, shall have exclusive authority to resolve all disputes arising out of or relating to the interpretation, applicability, enforceability or formation of this Agreement, including any claim that all or any part of this Agreement is void or voidable. Notwithstanding this broad delegation of authority to the arbitrator, a court may determine the limited question of whether a claim or cause of action is for an IP Claim, which is excluded from the definition of "Disputes" in Section 1.1 above. The arbitrator shall be empowered to grant whatever relief would be available in a court under law or in equity. The arbitrator may award you the same damages as a court could, and may award declaratory or injunctive relief only in favor of the individual party seeking relief and only to the extent necessary to provide relief warranted by that party's individual claim. In some instances, the costs of arbitration can exceed the costs of litigation and the right to discovery may be more limited in arbitration than in court. The arbitrator's award is binding and may be entered as a judgment in any court of competent jurisdiction.

You may choose to engage in arbitration hearings by telephone. Arbitration hearings not conducted by telephone shall take place in a location reasonably accessible from your primary residence, or in Orange County, California, at your option.
a) Initiation of Arbitration Proceeding. If either you or Epson decides to arbitrate a Dispute, both parties agree to the following procedure:

(i) Write a Demand for Arbitration. The demand must include a description of the Dispute and the amount of damages sought to be recovered. You can find a copy of a Demand for Arbitration at http://www.jamsadr.com ("Demand for Arbitration").

(ii) Send three copies of the Demand for Arbitration, plus the appropriate filing fee, to: JAMS, 500 North State College Blvd., Suite 600 Orange, CA 92868, U.S.A.

(iii) Send one copy of the Demand for Arbitration to the other party (same address as the Dispute Notice), or as otherwise agreed by the parties.

b) Hearing Format. During the arbitration, the amount of any settlement offer made shall not be disclosed to the arbitrator until after the arbitrator determines the amount, if any, to which you or Epson is entitled. The discovery or exchange of non-privileged information relevant to the Dispute may be allowed during the arbitration.

c) Arbitration Fees. Epson shall pay, or (if applicable) reimburse you for, all JAMS filings and arbitrator fees for any arbitration commenced (by you or Epson) pursuant to provisions of this Agreement.

d) Award in Your Favor. For Disputes in which you or Epson seeks $75,000 or less in damages exclusive of attorney’s fees and costs, if the arbitrator's decision results in an award to you in an amount greater than Epson's last written offer, if any, to settle the Dispute, Epson will: (i) pay you $1,000 or the amount of the award, whichever is greater; (ii) pay you twice the amount of your reasonable attorney's fees, if any; and (iii) reimburse you for any expenses (including expert witness fees and costs) that your attorney reasonably accrues for investigating, preparing, and pursuing the Dispute in arbitration. Except as agreed upon by you and Epson in writing, the arbitrator shall determine the amount of fees, costs, and expenses to be paid by Epson pursuant to this Section 1.6d).

e) Attorney's Fees. Epson will not seek its attorney's fees and expenses for any arbitration commenced involving a Dispute under this Agreement. Your right to attorney’s fees and expenses under Section 1.6d) above does not limit your rights to attorney’s fees and expenses under applicable law; notwithstanding the foregoing, the arbitrator may not award duplicative awards of attorney’s fees and expenses.

1.7 Opt-out. You may elect to opt-out (exclude yourself) from the final, binding, individual arbitration procedure and waiver of class and representative proceedings specified in this Agreement by sending a written letter to the Epson Address within thirty (30) days of your assent to this Agreement (including without limitation the purchase, download, installation of the Software or other applicable use of Epson Hardware, products and services) that specifies (i) your name, (ii) your mailing address, and (iii) your request to be excluded from the final, binding individual arbitration procedure and waiver of class and representative proceedings specified in this Section 1. In the event that you opt-out consistent with the procedure set forth above, all other terms shall continue to apply, including the requirement to provide notice prior to litigation.
1.8 Amendments to Section 1. Notwithstanding any provision in this Agreement to the contrary, you and Epson agree that if Epson makes any future amendments to the dispute resolution procedure and class action waiver provisions (other than a change to Epson’s address) in this Agreement, Epson will obtain your affirmative assent to the applicable amendment. If you do not affirmatively assent to the applicable amendment, you are agreeing that you will arbitrate any Dispute between the parties in accordance with the language of this Section 1 (or resolve disputes as provided for in Section 1.7, if you timely elected to opt-out when you first assented to this Agreement).

1.9 Severability. If any provision in this Section 1 is found to be unenforceable, that provision shall be severed with the remainder of this Agreement remaining in full force and effect. The foregoing shall not apply to the prohibition against class or representative actions as provided in Section 1.5. This means that if Section 1.5 is found to be unenforceable, the entire Section 1 (but only Section 1) shall be null and void.
