Introduction to the Easy Interactive Tools Software

See the information here to learn more about the Easy Interactive Tools software.

Easy Interactive Tools Features

The Easy Interactive Tools software is an application that allows you to draw on projected images. By using your finger (on projectors that support finger touch operation) or the interactive pen supplied with a projector, or your computer mouse, a variety of interactive functions become available.

Drawing on a Plain Background (Whiteboard Mode)
Drawing on the Projected Image (Annotation Mode)
Other Interactive Functions

Parent topic: Introduction to the Easy Interactive Tools Software

Drawing on a Plain Background (Whiteboard Mode)

Whiteboard mode allows you to add text or images to a solid color background. You can also select different backgrounds such as grid lines or a music sheet. Lined backgrounds could be useful for writing minutes or notes during a meeting.

Related tasks
Drawing in Whiteboard Mode
Adjusting and Editing Shapes and Images

Drawing on the Projected Image (Annotation Mode)
Annotation mode allows you to add notes to the projected image. By using illustrations, images, and graphics, you can enhance classroom lessons and create more appealing presentations.

Parent topic: Easy Interactive Tools Features

Related tasks
Drawing in Annotation Mode

Other Interactive Functions
You can also perform the following operations with the Easy Interactive Tools software:
• Operate the computer's mouse
• Control a Epson document camera connected to a computer
• Edit content drawn on the projected screen
• Save the content you created
• Network teleconferencing

When you connect a projector to a computer over a network using the Epson iProjection software, you can share the projected screen with a remote location.

When used with the Easy Interactive Tools software, you can share annotations and drawings made on the projected screen with multiple locations.

For more information about the Epson iProjection software, visit the Epson Web site.

**Parent topic:** Setting Up the Software for the First Time

## Installing the Software

Install the Easy Interactive Tools software by downloading it from the Epson Web site.

**Note:** If the language selected for the installation differs from the language of the operating system being used, the screens may not display correctly.

[Installing the Easy Interactive Tools Software (Windows)]
[Installing the Easy Interactive Tools Software (Mac)]

**Parent topic:** Setting Up the Software for the First Time

### Installing the Easy Interactive Tools Software (Windows)

Install the Easy Interactive Tools software on your computer.

**Note:** You need administrator rights to install the software.

1. Turn on your computer.
2. Make sure all running applications are closed.
3. Download the software from the Epson Web site.
4. Follow the on-screen instructions to install.
5. When you see the license agreement, accept the terms and click **Next**.
6. Click **Install**.

**Parent topic:** Installing the Software
Installing the Easy Interactive Tools Software (Mac)

Install the Easy Interactive Tools software on your computer.

1. Turn on your computer.
2. Make sure all running applications are closed.
3. Download the software from the Epson Web site.
4. Follow the on-screen instructions to install.
5. When you see the license agreement, accept the terms, click **Continue**, and then click **Agree**.
6. Click **Install**.

**Note:** For interactive projectors, you need to install the Easy Interactive Driver for Mac. Visit the Epson Web site to download the Easy Interactive Driver for your projector model.

**Parent topic:** Installing the Software
Using the Easy Interactive Tools Software

Follow the instructions in these sections to use the Easy Interactive Tools software.

Preparing to Use the Software with Your Projector
Starting the Easy Interactive Tools Software
Operating the Interactive Pen
Finger Touch Operations
Drawing Screens and Modes
Saving the Screens to a File
Using the Software with a Document Camera
Using the Slideshow Drawing Tools
Exiting the Easy Interactive Tools Software

Preparing to Use the Software with Your Projector

Make the following preparations to use the Easy Interactive Tools software with your projector.

Note:

• Some projector models require a USB cable for interactivity. For details, see the projector User's Guide.
• If you see a message prompting you to allow access to other applications on a Mac, select OK.

When connecting a computer to the projector with a USB cable:

• Connect the USB cable to the computer's USB port and the projector's USB-B port.
• Set up the interactive pen or finger touch feature using the projector's menu system. For details, see the projector User's Guide.

When connecting a computer to a projector over a network:

• Configure the network settings so that the computer can connect to the network.
• Connect a wireless LAN module (if necessary) or a LAN cable so that the projector can connect to the network.
• Select the network settings from the projector's menu system.
• Install the Epson iProjection software on your computer.
• In the Epson iProjection software, open the Set options screen, select the General settings tab, and select Use Easy Interactive Tools.

Parent topic: Using the Easy Interactive Tools Software

## Starting the Easy Interactive Tools Software

You can start the Easy Interactive Tools software with these steps.

1. Turn on the projector and project images from the computer.
2. Start the Easy Interactive Tools software on the computer.

   • **Windows 7**: Click > All Programs > EPSON Projector > Easy Interactive Tools Ver.X.XX.
   • **Windows 8.1**: Navigate to the Apps screen and select Easy Interactive Tools Ver.X.XX.
   • **Windows 10**: Click > Easy Interactive Tools Ver.X.XX.
   • **Mac**: From the Applications folder, double-click Easy Interactive Tools Ver.X.XX.

   The Easy Interactive Tools software starts. A plain window and toolbar open in the Whiteboard mode.

   ![Screenshot of Easy Interactive Tools software](image)

   **Note:** If you want to open a previously saved file, you can open the file by double-clicking the .eit file or selecting > from the toolbar.
**Note:**
- If you start the Easy Interactive Tools software while playing a movie, the movie playback screen may turn black. Restart the application that is playing the movie.
- Before you begin drawing on the projected image using this software, save any drawings drawn with the projector's interactive feature and clear the screen.

**Parent topic:** Using the Easy Interactive Tools Software

### Operating the Interactive Pen

You can use the interactive pen supplied with your projector to operate the Easy Interactive Tools software. The functions and shape of the interactive pen differ depending on the projector model it came with. For details, see your projector *User's Guide*.

1. Check that there is a battery in the interactive pen and then turn it on.
2. Press the pen tip button to the screen to select an icon.
3. Press and move the pen on the screen to draw.

Note:
- You can use two interactive pens at the same time, if available for your projector model. However, you can only use one while connected to a network or while on a window displayed in Whiteboard mode. See your projector User's Guide for more information.
- You can operate the Easy Interactive Tools software with up to six devices at the same time (up to three devices with Mac), such as a mouse connected to a computer, interactive pens, and finger touch, depending on your projector model.
- The following operations can only be performed by one device:
  - Operations on the Settings screen, Camera screen, Insert image screen, Select background screen, Open file screen, Save file screen, Export screen, and Print screen
  - Adjusting and editing identical shapes and images
  - Entering text
  - Operations on a window displayed in Whiteboard mode
Caution: Do not hold the tip of the interactive pen or allow it to become cracked or dirty. Otherwise, the interactive pen may fail to operate.

Finger Touch Operations
On projectors that support finger touch operation, you can use your finger to perform the same functions as the interactive pen.

When performing finger touch operations, you can use two fingers for multi-touch operations such as enlarging or reducing the image. The projector recognizes up to six multi-touch points. When a group of people are performing finger touch operations, all members must use the same drawing tool.

Drawing Screens and Modes
The Easy Interactive Tools software provides two drawing modes. When you change the mode, the screen changes as shown below.
Whiteboard Mode
Allows you to display and draw on a plain screen. You can treat the drawing area as a page and create multiple pages to draw on. You can also save your drawings as a file (using .eit or .iwb file format) and open them again later.

Annotation Mode
Allows you to draw on the image currently displayed on the computer. This is useful when you need to emphasize certain points or add notes. You can also draw on images from a document camera.
**Mouse Operations**

Allows you to operate the computer from the projected image. You can use the interactive pen to perform operations such as click, right-click, and drag and drop.

In the Easy Interactive Tools software, you can select a drawing screen according to the environment in which you are using the projector. To enable annotating on a secondary display or extended desktop, click > on the toolbar, and then select settings on the **Enlarge Screen** tab.

**Primary Display**

You can project your computer's screen to draw on the projected screen.
Secondary Display (Extended Desktop)
While displaying content on your computer screen, you can project different content from the projector. You can draw only on the projected screen.

**Note:** You must first configure your computer display settings for Secondary Display (Extended Desktop). See your computer documentation for more information.

**Use Multi-Projection**
You can project images from multiple projectors and draw across two of the projected screens.
Drawing in Whiteboard Mode

You can draw on a plain page in Whiteboard mode. You can add pages and display a page list screen where you can perform additional page operations.

1. Make sure that 🗄 is displayed on the toolbar. If 🗄 or 🗄 is displayed, click it and select 🗄.

   Whiteboard mode starts and a new page is displayed.

   **Note:** To open a previously saved file, select 📁 > 🗄 from the toolbar.

2. Select 🆕️ to select pen type, thickness, or shape.
3. Select the color of the pen or the shape you are using on the toolbar.

4. Draw on the page.

5. To erase drawings, select one of the following tools from the toolbar:
   - ![Interactive Pen Eraser](image)
     - allows you to use the interactive pen or your finger (if supported) as an eraser.
   - ![Full Eraser](image)
     - erases all of the current drawings.

6. Click ![Page List](image) to display the page list screen where you can add, delete, duplicate, or move pages.
   - To add and display a new page, click ![New Page](image).
   - To duplicate the currently displayed page, click ![Duplicate Page](image).
   - To delete the currently displayed page, click ![Delete Page](image).
   - To change the displayed page in the page list screen, select a thumbnail image.
   - To change the display order, drag and drop a thumbnail image.
   - To insert the image, click ![Insert Image](image).
   - To select the background, click ![Select Background](image).

**Changing Between Full Display and Window Display**

**Parent topic:** Drawing Screens and Modes

**Related tasks**

**Saving the Screens to a File**
Changing Between Full Display and Window Display

When you select or in Whiteboard mode, you can switch the drawing screen between full display and window display.

Note: During window display, you can use only one finger (if supported) or one interactive pen, and operations outside the window become computer mouse operations.

Parent topic: Drawing in Whiteboard Mode

Drawing in Annotation Mode

You can draw on images projected from a computer's screen or document camera in Annotation mode.

1. Select from the toolbar.

Annotation mode starts and the computer's screen is displayed.
2. Select to select pen type, thickness, or shape.

3. Select the color of the pen or the shape you are using on the toolbar.

4. Draw on the projected image.

5. To erase drawings, select one of the following tools from the toolbar:
   - allows you to use the interactive pen or your finger (if supported) as an eraser.
   - erases all of the current drawings.

Adjusting and Editing Shapes and Images
You can adjust and edit shapes, lines, and images you have inserted into your drawings using the tools on the toolbar.

Note: When selecting objects drawn with lines, be sure to select the solid line.
• To enlarge or reduce an object, select \( \text{Zoom} \), select the object, and drag the points shown here to change the size.

Note: When using finger touch (if available), select two points on the object. To enlarge it, move your fingers apart. To reduce it, move your fingers closer together.

• To rotate an object, select \( \text{Rotate} \), select the object, and rotate it using the rotation point shown here.

Note: When using finger touch (if available), select two points on the object and move your fingers in the direction you want to rotate the object.

• To perform any other available toolbar options on your object, select \( \text{Object Options} \), select the object, and select \( \text{Object Options} \) to open the submenu of options.
Toolbar Submenu Options

Parent topic: Drawing Screens and Modes

Toolbar Submenu Options

You can select options for performing additional operations on the toolbar submenu.

**Note:** You can select multiple objects and perform operations on them simultaneously by dragging the mouse over the objects.

<table>

Parent topic: Adjusting and Editing Shapes and Images

**Enlarging an Area**

You can zoom into a portion of the image and enlarge it on the screen.

1. Select > from the toolbar.
   You see a crosshair on the screen.
2. Drag the mouse over the area you want to zoom into.
   You see the **Enlarge Area** screen.
3. To close the **Enlarge Area** screen, select in the upper right corner.

Parent topic: Drawing Screens and Modes

**Shading an Area**

You can hide a portion of image or the entire projected screen by covering it with a black screen.
1. Select  from the toolbar.
   You see the shading screen over the projected screen.
2. Adjust the size of the shading screen by dragging the edge of the screen.
3. Adjust the position of the shading screen by dragging anywhere in the black area.
4. To close the shading screen, select  in the upper right corner.

**Parent topic:** Drawing Screens and Modes

### Turning a Spotlight on an Area

You can display a portion of projected screen and hide the rest of the screen.

1. Select  from the toolbar.
   You see the spotlight screen.
2. Adjust the size of the spotlight area by dragging the edge of the spotlight area.
3. Adjust the position of the spotlight area by dragging anywhere in the black area.
4. To close the spotlight screen, select  in the upper right corner.

**Parent topic:** Drawing Screens and Modes

### Drawing Across Two Screens

You can draw across two screens when multiple projectors are connected to a computer.
Note: You need to install Easy Interactive Driver Ver.4.0 to draw across two screens. The multi-screen functions vary depending on the projector model. For details, see your projector User's Guide.

Before drawing across two screens, do the following:

- Connect an image signal cable such as a computer cable or an HDMI cable to your computer and the projectors.
- Connect the USB cable to the computer's USB port and the projector's USB-B port.
- Setup the projector so that you can use the interactive features with a unified image area created by multiple projectors. For details, see your projector User's Guide.

Check the following on your computer:

- The resolution for the primary display and the secondary display are the same.
- The primary display and the secondary display are displayed at the same height.
- The secondary display is placed on the right of the primary display.
- Make sure System Configuration > Mission Control > Operating space for each display is set to Off (Mac only).

1. In the Easy Interactive Tools software, click > on the toolbar.
   You see the Settings screen.
2. On the Enlarge Screen tab, select Use Multi-Projection under Use Screen Settings.

Parent topic: Drawing Screens and Modes
Operating a Mouse from the Projected Image (Mouse Operations)

When you select > from the toolbar, you can operate the computer from the projected image (mouse operations). When mouse operations are activated, you can use the interactive pen to perform operations such as click, right-click, and drag and drop.

- To click, press and remove the pen tip from the projected image.
- To right-click, press the button on the interactive pen, or hold the pen tip on the projected image for a few seconds and then remove it.
- To drag and drop, press the pen tip to the icon or object that you want to move, drag the pen tip to where you want to move the object, and then remove the pen tip from the projected image.

Parent topic: Drawing Screens and Modes

Saving the Screens to a File

You can save the contents of your screens and drawings to a file.

1. Select from the toolbar. If is not displayed on the toolbar, click .
2. Select the save location, file name, and the file format.

You can save all pages with drawings in .jpg, .bmp, .png, .pdf, .eit or .iwb format. If you want to edit a file again in the future, you must save it in .eit or .iwb format.

Note:
- Saving in .jpg, .bmp, or .png format saves all pages by treating one page as one file. Saving in .pdf, .eit or .iwb format saves all pages in one file.
- You can select the save location, file name, and the file format on the Save tab on the Settings screen.

Supported File Types

Parent topic: Using the Easy Interactive Tools Software

Supported File Types

You can use these file types with the Easy Interactive Tools software.

- .eit
  Dedicated file types for the Easy Interactive Tools software.
.iwb
File types for Interactive Whiteboard mode.

.ewf/.ewf2
File types for Whiteboard mode of Epson projectors.

.avi (for Windows)/.mov (for Mac)
Video file types for each operating system.

.pdf
Document file types.

.jpg/.bmp/.png
Image file types.

See the following table to confirm the supported input/output format for this software.

<table>
<thead>
<tr>
<th>File types</th>
<th>Input</th>
<th>Output</th>
</tr>
</thead>
<tbody>
<tr>
<td>.eit</td>
<td>Supported</td>
<td>Supported</td>
</tr>
<tr>
<td>.iwb</td>
<td>Supported</td>
<td>Supported</td>
</tr>
<tr>
<td>.ewf/.ewf2</td>
<td>Supported</td>
<td>Not Supported</td>
</tr>
<tr>
<td>.avi</td>
<td>Supported</td>
<td>Not Supported</td>
</tr>
<tr>
<td>.mov</td>
<td>Supported</td>
<td>Not Supported</td>
</tr>
<tr>
<td>.pdf</td>
<td>Not Supported</td>
<td>Supported</td>
</tr>
<tr>
<td>.jpg/.bmp/.png</td>
<td>Not Supported</td>
<td>Supported</td>
</tr>
</tbody>
</table>

Note:

- When you open an .ewf/ewf2 format file in the Easy Interactive Tools software, colors or lines may be displayed differently than the original.
- Polygons, GIF Animations, and some media objects, such as movies or audio embedded in .iwb format, are not supported in the Easy Interactive Tools software. Note the following limitations.
  - Polygons are converted to still image objects.
  - GIF animations are not displayed and only the first image of an animation is displayed.
  - Media objects such as .wmf, .emf, .mpeg, .swf, .wav, and .mp3 files are displayed as the unsupported objects.
  - Colors or lines may be displayed differently than the original.
• Dotted lines or dashed lines are displayed as solid lines.
• When you open an .iwb file and save the content of your drawings to an .eit file in the Easy Interactive Tools software, the unsupported objects will be lost. Select the .iwb file type if you want to restore these objects.
• If you open an .eit, .iwb, .ewf or .ewf2 file on another computer with a different display resolution, some parts of the drawing may not be displayed or the black band may be displayed.

Parent topic: Saving the Screens to a File

Using the Software with a Document Camera
You can draw on images projected from a document camera.

Note: Connect the computer to your projector with an HDMI or VGA cable when using a document camera.

1. Click the ▶ on the toolbar.
2. Select the document camera from which you want to project from the displayed list.
   You see the image projected from the document camera on the Camera screen.
3. Draw on the images projected from the document camera.
4. If you want to paste the currently displayed document camera image onto a page in Whiteboard mode, select from the toolbar.
5. Select from the toolbar to save the screen to a file.

Using the Slideshow Drawing Tools
When you project a PowerPoint slideshow, the toolbar changes so you can use PowerPoint drawing tools.
The following PowerPoint versions are supported:
• Windows: Microsoft PowerPoint 2010/2013/2016/Office 365
• Mac: Microsoft PowerPoint 2016/Office 365

**Note:** You can choose whether or not to use the PowerPoint drawing tools and select options for them on the **General** tab on the **Settings** screen.

1. Start the Easy Interactive Tools software, then start a PowerPoint slideshow. The toolbar changes to the PowerPoint drawing toolbar.

2. Use the tools to draw on your PowerPoint slideshow as necessary.
3. With Windows, you can save your PowerPoint slideshow with the drawing content. (With Mac, you can only draw.)

**Parent topic:** Using the Slideshow Drawing Tools

### Exiting the Easy Interactive Tools Software

You can exit the Easy Interactive Tools software using one of the following methods:

- Click ![Exit](image) on the toolbar.

- Windows: Right-click ![Exit](image) on the task tray and click **Exit**.

- Mac: Control-click ![Dock](image) in the Dock, go to the Easy Interactive Tools software, and select **Quit Easy Interactive Tools**.
Screen Summary

See these sections for more information about the Easy Interactive Tools screens.

Toolbar Functions
Whiteboard Tools Functions

Toolbar Functions

You can perform the following functions on the toolbar.

Whiteboard mode/Annotation mode

![Toolbar Functions Diagram]

Mouse mode

![Mouse Mode Diagram]

Note:

- The display format of the toolbar is optimized for the mode and window size you are using.
- You can also use the mini toolbox by right-clicking anywhere in the drawing area. You can switch the type of pen or eraser on the mini toolbox.
