Scanner Position (DS-32000)

The scanner has multiple scanning positions, depending on the amount and type of scanning you are doing. You can place the scanner in Normal Mode to scan regular documents or Delicate Mode to either scan fragile documents or use automatic scanning. The scanner can also be put in Storage Mode when not in use.

**Normal Mode**
When the scanner is in Normal Mode, you can scan a large amount of documents at high speed.

Delicate Mode
When the scanner is in Delicate Mode, the input tray capacity is reduced, and you can scan delicate or fragile documents. Scanning in automatic mode is also possible in this position.

Storage Mode
When the scanner is in Storage Mode, the output tray is locked into position and the scanner is as compact as possible.

Changing the Scanner Position (DS-32000)

Parent topic: Scanner Basics

Changing the Scanner Position (DS-32000)

You can change the scanner position between Storage Mode, Normal Mode, and Delicate Mode depending on what types of originals you want to scan.

Changing the scanner position from Normal Mode to Storage Mode turns off the power and locks the output tray. Changing from Storage Mode to Normal Mode turns on the power and unlocks the output tray.

1 Storage Mode (power off and output tray locked)
2 Normal Mode (power on and output tray unlocked)
3 Delicate Mode (for scanning thin paper; reduced input tray capacity)
**Note:** When the scanner is in Storage Mode, the power turns off and the output tray is locked in position.

1. Close the input and output trays.

2. Lift the position selector lever on the back of the scanner.
3. Rotate the scanner to the new position.

![Image showing scanner rotation]

**Note:** Do not touch the antistatic brush underneath the output tray.

4. Release the lever and make sure the scanner locks into place.

![Image showing lever release]

5. Depending on the position of the feed selector lever, the LCD screen may prompt you to move the lever to the correct position. In Delicate Mode, you can also use the 🔄 icon to rotate the LCD screen.
Feed Selector Lever

The feed selector lever adjusts the width of the scanner's document path to accommodate different types of originals.

DS-30000

- **Normal Feed**: Use this position when batch scanning plain paper, envelopes, plastic cards (without embossing) and the carrier sheet.
- **Manual Feed**: Use when feeding originals one at a time, or when scanning large originals, plastic cards with embossing, passport carrier sheets, or booklets.

**Note**: In the Manual Feed position, the double feed detection function is disabled. If more than one original is loaded, the product will feed multiple originals at the same time, and may not scan all content. Use the Normal Feed position to scan a stack of originals.
Delicate Feed: Use this position with the scanner in Delicate Mode to feed multiple delicate or fragile items with less force.

Normal Feed: Use this position when scanning plain paper, envelopes, plastic cards (without embossing) and the carrier sheet.

Manual Feed: Use when feeding originals one at a time, or when scanning special originals such as originals folded in half, plastic cards with embossing, passport carrier sheets, or booklets.

When used with the scanner in Delicate Mode, you can use the carrier sheet to scan the special originals listed above.

Note: In the Manual Feed position, the double feed detection function is disabled.
Moving the Scanner

You can use the rollers underneath the scanner to easily move the scanner on a surface.

**Note:** When the scanner is in Storage Mode, the power turns off and the output tray is locked in position.

1. Turn off the scanner and remove all cables.
2. Close the input and output trays.

**Note:** Make sure you close the output tray securely.
3. Lift the scanner slightly from the front as shown below and roll it to the new location. Hold the scanner by the designated positions and do not let the scanner fall off the desk.

1. Roller cover
2. Roller

**Note:** Do not touch the antistatic brush underneath the output tray.

**Note:** Do not lift too far or the rear of the scanner may scrape the surface.

Parent topic: Loading Originals

**Loading Originals in the Input Tray**

You can load originals that meet the document specifications in the input tray.

**Caution:** Do not load photos, valuable original documents or artwork, directly into the input tray. This may wrinkle or damage the original. Load these originals using an optional carrier sheet.

The steps below describe loading originals of the same size. To load originals of multiple sizes at once, see the link at the end of these steps.

1. Set the feed selector lever to 📜 (DS-30000) or ⚡ (DS-32000).
2. Open the input tray and pull up its extension.
3. Pull out the output tray and its extension, and open the stopper.

**Note:** If you are loading an original that is 15.5 inches (393.8 mm) or longer, do not pull out the input or output tray extensions and do not open the stopper.
4. Slide the input tray edge guides all the way out.

5. If you are loading a multi-page original, fan your stack of originals.

   **Note:** If you are loading an original that is 15.5 inches (393.8 mm) or longer, load only one sheet at a time.

6. Stack the originals with the printed side facing down and slide the stack so the leading edge is at an angle as shown.
7. Load standard originals into the input tray printed side down and top edge first, and guide them in until they meet resistance.

- If you are loading paper business cards, load up to 36 cards printed side down and short edge first into the input tray vertically, and slide them in until they meet resistance.
• If you are loading hole-punched originals, load them with the holes facing down or to the side as shown. The holes must be within 1.2 inches (30 mm) of the edge of the originals.

• If you are loading A3 (11.7 × 16.5 inches [297 × 420 mm]) originals with fold lines, load them as shown below.

**Note:** Depending on the paper type and fold, you may need to lightly press down on the sides of the paper to keep the paper from rising. Do not prevent the paper from being fed into the scanner.
Originals folded in the middle:
Originals with a binding fold:
8. Slide the edge guides against the edges of the original.

Note: If you are scanning originals that are 15.5 inches (393.8 mm) or longer, support the original as it enters into and ejects from the scanner as shown.

9. If necessary during scanning, adjust the position of the stopper on the output tray extension to fit the ejected originals.

Note: If thicker paper does not eject properly or falls from the output tray, push in the output tray and allow the originals to eject freely onto the surface below the scanner. If the scanned images are affected by the originals ejecting below the scanner, try placing the scanner on the edge of a table where the ejected originals can drop freely.
If scanning thin or wrinkled paper causes paper jams, slow down the feeding speed by selecting the icon or Settings > Scanner Settings > Slow > On on the LCD screen.

Loading Thin Paper (DS-32000)

You can load thin originals with the scanner in Delicate Mode. Some items may require a carrier sheet. Make sure the original meets the document specifications before loading it.

1. Place the scanner in Delicate Mode.
2. Set the feed selector lever to .
3. Open the input tray and pull up its extension.
4. Pull out the output tray and its extension to the length of the original, and open the stopper if necessary.
5. Slide the input tray edge guides all the way out.

6. If you are loading a multi-page original, fan your stack of originals.

   **Note:** If you are loading an original that is 15.5 inches (393.8 mm) or longer, load only one sheet at a time.

7. Stack the originals with the printed side facing down and slide the stack so the leading edge is at an angle as shown.
8. Load the originals into the input tray printed side down and top edge first, and guide them in until they meet resistance.

9. Slide the edge guides against the edges of the original or carrier sheet.

10. If necessary during scanning, adjust the position of the stopper on the output tray extension to fit the ejected originals.
Loading Long Paper

You can load long paper up to 220 inches (5588 mm) long in the input tray. Some items may require a carrier sheet. Make sure the original meets the specifications before loading it.

**Note:** The scanning speed is slower when scanning long paper.

1. Check to make sure that the feed selector lever is in the position shown here.

   ![DS-30000](image)

   ![DS-32000](image)

   **Note:** To prevent paper jams, make sure to set the lever back to its original position when scanning standard single- or multi-page originals.

2. Open the input tray.
3. Pull out the output tray and its extension, but do not raise the stopper.

4. Slide the input tray edge guides all the way out.
5. Load the original in the input tray as shown until it meets resistance.

6. Slide the edge guides against the edges of the original.
7. Support the paper at both ends with your hands to prevent it from falling off the ADF, getting jammed, or dropping off the output tray.

Note: You can scan long paper in the following resolutions:
- Approximately 53 inches (1346 mm) or less: up to 600 dpi
- Approximately 215 inches (5461 mm) or less: up to 300 dpi
- Approximately 220 inches (5588 mm) or less: up to 200 dpi

2. Open the input tray and pull up its extension.
3. Pull out the output tray and its extension, and open the stopper.

4. Slide the input tray edge guides all the way out.

5. Fold the original in half so that the side to be scanned is facing out.
6. Load the folded original in the input tray with the second page facing up as shown.

7. Slide the edge guides against the edges of the original.
Turn off the **Detect Double Feed** setting on the Main Settings tab in Epson Scan 2 when scanning folded originals. To combine the scanned images, you will have to specify **Double-Sided** as the **Scanning Side** setting and select **Left & Right** as the **Stitch Images** setting in Epson Scan 2.

## Loading Multiple Sizes of Originals in the Input Tray

You can load originals of different sizes, paper types, and thicknesses at one time in the input tray. Just make sure they meet the original document specifications.

**Caution:** Do not load photos, or valuable original documents or artwork, directly into the input tray. This may wrinkle or damage the original. Load these originals using an optional carrier sheet.

1. Set the feed selector lever to 📄 (DS-30000) or 📄 (DS-32000).
2. Open the input tray and pull up its extension.
3. Pull out the output tray and its extension, and open the stopper.

**Note:** If you are loading originals that are 15.5 inches (393.8 mm) or longer, do not pull out the input or output tray extensions and do not open the stopper.
4. Slide the input tray edge guides all the way out.

5. Load the originals in the input tray in descending order of paper size with the widest at the back and the narrowest at the front. Slide them in until they meet resistance. Make sure the printed sides are facedown and the top edges are slightly angled in the input tray.
6. Slide the edge guides against the edges of the widest original.

7. If necessary during scanning, adjust the position of the stopper on the output tray extension to fit the ejected originals.

   **Note:** If thicker paper does not eject properly or falls from the output tray, push in the output tray and allow the originals to eject freely onto the surface below the scanner. If the scanned images are affected by the originals ejecting below the scanner, try placing the scanner on the edge of a table where the ejected originals can drop freely.

If scanning thin or wrinkled paper causes paper jams, slow down the feeding speed by selecting the icon or **Settings > Scanner Settings > Slow > On** on the LCD screen.

* A8-size paper and business cards must be loaded vertically. The minimum length is 2.7 inches (69 mm).

**Warning:** Do not load the following types of originals directly in the scanner, or they may be damaged or may damage the scanner:

- Photos
- Booklets that are thicker than 0.08 inch (2 mm) when closed
- Fabric or other non-paper originals
- Originals containing staples or paper clips
- Originals with glue attached
- Ripped originals
- Heavily wrinkled or curled originals
- Transparencies
- Originals with carbon paper backing
- Originals with wet ink
- Originals with attached sticky notes

You can scan A5-sized bound originals that are less than 0.08 inch (2 mm) when closed using manual feed.

You can scan ripped, wrinkled, or curled originals using a carrier sheet (not included).
Do not feed valuable photos, artwork, or important documents into the scanner directly. Misfeeding may wrinkle or damage the original. When scanning these types of originals, use a carrier sheet (not included).

**Caution:** Be careful when loading the following types of originals, or they may be damaged or may not scan successfully:
- Originals with uneven surfaces, such as embossed documents
- Curled or wrinkled originals
- Perforated originals
- Originals with labels or stickers
- Carbon-less paper
- Ripped, curled, or wrinkled originals
- Coated paper

**Warning:** Carbon-less paper contains chemical substances that may damage the rollers inside the scanner. Make sure you clean the pickup roller and the separation rollers regularly. Scanning carbon-less paper may reduce the service life of the rollers compared with scanning plain paper.

**Note:** When attempting to scan these types of originals, note the following:
- Slow down the feeding speed when scanning wrinkled originals, and smooth out the wrinkles if possible
- Use the optional carrier sheet to scan originals that are delicate or wrinkled
- If originals are incorrectly detected as double feeds, set the **DFDS Function** to **On** on the control panel, or select **Off** as the **Detect Double Feed** setting in Epson Scan 2
- Labels or stickers must be firmly adhered to the scanned original with no exposed glue
- Try to flatten curled originals as much as possible

**Loading Plastic and Laminated Cards in the Input Tray**

You can load plastic and laminated cards that meet the card specifications in the input tray.

**Note:** To increase the accuracy of auto size detection when scanning laminated cards, select the **Document Size > Settings > Scan laminated card** setting in Epson Scan 2.
1. Open the input tray, pull out the output tray, and open the stopper. Do not pull out the extensions.

2. Slide the input tray edge guides all the way out.
3. Check to make sure that the feed selector lever is in the position shown here.

**DS-30000**

**DS-32000**

**Note:** To prevent paper jams, make sure to set the lever back to its original position when scanning standard single- or multi-page originals.
4. Load plastic or laminated cards printed side down and short edge first into the input tray vertically, and slide them in until they meet resistance.

Note: Do not load the cards horizontally.

5. Slide the edge guides against the edges of the card.
6. Turn off the **Detect Double Feed** setting on the Main Settings tab in Epson Scan 2 when scanning the cards.

**Note:** If you do not disable the **Detect Double Feed** setting and a double feed error occurs, remove the plastic or laminated card from the input tray and reload it. Press the icon on the main screen to disable the Detect Double Feed feature and scan again. You will need to disable Detect Double Feed for each scan.

Loading Special Originals

You can load envelopes, passports, booklets, photos, or large, thick, or folded originals in the input tray. Some items may require a carrier sheet. Make sure the original meets the specifications for special originals before loading it.

1. Open the input tray and pull up its extension.
2. Pull out the output tray and its extension, and open the stopper.

Note: If you are loading an original that is 15.5 inches (393.8 mm) or longer, do not pull out the input or output tray extensions and do not open the stopper.

3. Slide the input tray edge guides all the way out.
4. Check to make sure that the feed selector lever is in the position shown here.

**Note:** To prevent paper jams, make sure to set the lever back to its original position when scanning standard single- or multi-page originals.
5. Load an envelope vertically in the input tray with the printable side down and the flap facing as shown. Slide in the envelope until it meets resistance.

![Diagram showing correct and incorrect envelope loading]

**Note:** Do not load envelopes with adhesive on them. Envelopes that are not cut cleanly at the flap edge may not scan correctly. Envelopes that have not been sealed can be loaded with the flap open and facing up.

6. Do one of the following to load a photo, or folded or irregularly shaped originals:
   - For a folded original, fold and load the original as shown.
**Caution:** Do not load the original with the open side facing down.

- For a photo or an irregularly shaped original, load it in the center of a carrier sheet with the printed side facing down. Make sure the illustration on the front edge of the carrier sheet is facing up.
7. Load the original in the input tray as shown until it meets resistance.
Folded original
8. Slide the edge guides against the edges of the original or carrier sheet.
9. Turn off the **Detect Double Feed** setting on the Main Settings tab in Epson Scan 2 when scanning special originals.

10. If necessary during scanning, adjust the position of the stopper on the output tray extension to fit the ejected originals.

   **Note:** If thicker paper does not eject properly or falls from the output tray, push in the output tray and allow the originals to eject freely onto the surface below the scanner. If the scanned images are affected by the originals ejecting below the scanner, try placing the scanner on the edge of a table where the ejected originals can drop freely.

When using a carrier sheet, do the following:

- Do not use a carrier sheet that is scratched or has been scanned more than 3,000 times.
- When a carrier sheet is detected and you select **Auto Detect** as the **Document Size** setting, the **Paper Skew** setting will automatically be applied to the scanned document.
- Only use a carrier sheet designed for your scanner. The carrier sheet is automatically recognized by detecting two small holes on the leading edge. Keep the holes clean and do not block them.

Starting a Scan Using the Product Control Panel

You can scan an original from the control panel using jobs created in Document Capture Pro or Document Capture. Set the operation mode on the control panel before scanning.

1. Make sure you installed the product software and connected the product to your computer or network.

Note: You may need to restart your computer after installing the product software to enable scanning from the control panel.
2. Place your original on the product for scanning. Make sure the feed selector on the scanner is in the correct position.

3. Press the home button, if necessary.

4. Select Scan.

You see a list of available scanning jobs. Each job represents a pre-defined set of scan settings.

5. Select a job.

**Note:** If you don’t see an appropriate job, you will have to edit an existing job or add a new job using the Document Capture (Mac) or Document Capture Pro (Windows) application. See the link below.

You see a screen like this:

![Screen Screenshot]

6. If you want to change the job settings for the current job, select the job name.

Any changes you make will only apply until you exit the Scan screen. If you select Scan again from the main menu, the job is reloaded from the computer and your changes are lost. To permanently modify a job, change the settings in Document Capture or Document Capture Pro.

**Note:** If you cannot modify the settings, open Document Capture (Mac) or Document Capture Pro (Windows) and make sure the **Disable job setting changes on control panel** setting is not selected in the **Confirm/Test** tab in the job settings.
7. Select from the following options:
   • To change the saved file type, select **File Type** and select a file type.
   • To change the color type of the scanned image, select **Image Type** and select an option.
   • To change the resolution, select **Resolution** and select an option from either Low (200 dpi), Medium (300 dpi), or High (600 dpi).
   • To change the size of the scanned original, select **Original Size** and select an option.
   • To scan both sides of the original, select **Source** and select 2-Sided.
   • To change the number of copies to print when a printer is selected as the destination, select **Copies** and enter a number.

8. If you want to change the scanner settings for the current job, select **Scanner Settings** on the control panel.

   **Note:** If an administrator has locked the settings, you may need to enter the administrator password to change certain scanner settings.

9. Select from the following options:
   • To increase the force used to separate originals in Delicate Mode, enable **Power Separation Mode** (DS-32000).

      **Caution:** Do not use **Power Separation Mode** with thin originals, or you may damage them.

   • To slow down the scanning speed, set the **Slow** setting to **On**.
   • To stop scanning immediately when a double feed is detected, set the **Double Feed Stop Timing** setting to **Immediate**. When set to **After Eject**, the double feed is scanned and ejected before scanning ends.
   • To skip double feed detection when scanning originals such as envelopes or plastic cards, set the **DFDS Function** setting to **On**.
   • To stop scanning immediately when a skewed original or feeding error is detected, enable the **Paper Protection** setting. When set to higher levels, the setting reduces the amount of skew required to trigger a stop. Select higher settings when scanning thin papers. Select **Off** when scanning plastic cards or thick paper. Lower the setting level if the scanner is too sensitive to paper skew.
   • To detect dirt on the scanner glass, enable the **Detect Glass Dirt** setting.
• To use the ultrasonic sensor to detect double feed errors, enable the **Ultrasonic Double Feed Detection** setting. Enable this setting if you cannot enable double feed detection in your scanning software. This setting may not work with envelopes, plastic cards, or originals with labels or stickers.

10. Select the **Start** icon.

Scanning in Epson Scan 2

Epson Scan 2 gives you access to basic and advanced scanning features. You can scan your document and save the scanned image in various file formats in your operating system's Documents or My Documents folder, or open it in your scanning program. You can preview the scanned image and select or change settings as necessary.

1. Load your original in the product.
2. Start Epson Scan 2.
You see this window:

![Epson Scan 2 window](image)

**Note:** The **Document Source** setting is automatically set to **ADF** for your product.
3. If you want to scan different size originals by loading them into the ADF one by one, select On as the Automatic Feeding Mode setting. Scanning begins as soon as you load each original. Select On (Continuous) to continuously rotate the rollers in Delicate Mode (DS-32000).

   **Note:** Select Settings > Document Source Settings > Automatic Feeding Mode Timeout (minutes) and enter a value to set the number of minutes before the scanner exits Automatic Feeding Mode.

4. Select the Scanning Side setting that matches the sides of the original that you want to scan.

5. Select the Document Size setting that matches the size of your original, or select Auto Detect to have Epson Scan 2 automatically detect the size. You can select Customize to enter a custom size, if necessary.

6. Click on one of the orientation icons, if applicable.

7. Select your original image type and how you want it scanned as the Image Type setting, or select Auto to have Epson Scan 2 automatically detect the image type.

8. Select the Resolution setting you want to use for your scan.

9. Select any of the additional settings that you want to use on the Main Settings tab.

10. Click the Advanced Settings tab and select any settings that you want to use.

11. To see a preview of your scan with the settings you selected, click the Preview button.
Epson Scan 2 previews your original and displays the results in the Epson Scan 2 window.

12. Reinsert your original into the ADF.
13. If scanning an original in a carrier sheet or other special original, see the link below for other setting requirements for special documents.
14. Select the format in which you want to save your scanned file as the **Image Format** setting. If necessary, select **Options** and select any desired format options.
15. Select **Settings** to modify the file name settings. Enter the file name for your scanned file in the **File Name** field.
16. Select the location in which you want to save your scanned file as the **Folder** setting. If necessary, select **Select** to choose an alternate folder or create a new folder.

17. Make sure the feed selector lever on the scanner is set to the correct position for the type of original:
   - Select 📄 (DS-30000) or 📄 (DS-32000) for standard-size originals.
   - Select 📄 for special originals such as folded documents or plastic cards.
   - Select 📄 for thin originals when the scanner is in Delicate Mode (DS-32000).

18. Click **Scan**. The product scans your original and saves the scanned file in the location you specified.

19. If you selected the **Automatic Feeding Mode** setting, place your next original in the ADF for scanning. When you finish scanning originals, click **Finish**.

**Additional Scanning Settings - Main Settings Tab**

You can select these additional scanning settings on the Epson Scan 2 Main Settings tab.

**Stitch Images**
- When scanning double-sided originals, lets you lay out images from both sides of the original onto one scanned page.

**Rotate**
- Rotates the original image clockwise to the desired angle before scanning it. Select **Auto** to allow your product to automatically rotate the image based on the orientation of the text (may take longer to scan).

**Correct Document Skew**
- Corrects skewed originals, image contents, or both.

**Add or edit pages after scanning**
- Lets you add, remove, or edit the pages in a scan, including rotating pages and changing the page order.
Note: To save multiple pages in a single file, you must select a file format that supports multiple pages such as PDF or Multi-TIFF. If you select another file format, each scanned image or page is saved as a separate file.

Skip Blank Pages
If the scanner detects marks from the other side of a blank page and adds the marks to the scanned image, adjust this setting to prevent this.

Detect Double Feed
Detects a double-feed paper error in the ADF. If you are scanning an original envelope or plastic card, select Off.

Background Color
Select a background color to improve results when scanning thin originals.

Additional Scanning Settings - Advanced Settings Tab
You can select these additional scanning settings on the Epson Scan 2 Advanced Settings tab. Not all adjustment settings may be available, depending on other settings you have chosen.

Unsharp Mask
Makes the edges of certain image areas clearer. Turn off this option to leave softer edges.

Descreening
Removes the ripple pattern that might appear in subtly shaded image areas, such as skin tones. This option improves results when scanning magazines or newspapers. (The results of descreening do not appear in the preview image, only in your scanned image.)

Remove Background
Removes the background of the originals.

Text Enhancement
Sharpens the appearance of letters in text documents.

Auto Area Segmentation
Makes black and white images clearer and text recognition more accurate by separating the text from the graphics.

Dropout
The scan will not pick up the color you select. This setting is available only if you select Grayscale or Black & White as the Image Type setting.
**Color Enhance**  
Enhances the shades of the color you select in the scanned image. This setting is available only if you select **Grayscale** or **Black & White** as the Image Type setting.

**Brightness**  
Adjusts the overall lightness and darkness of the scanned image.

**Contrast**  
Adjusts the difference between the light and dark areas of the overall scanned image.

**Gamma**  
Adjusts the midtone density of the scanned image.

**Threshold**  
Adjusts the level at which black areas in text and line art are delineated, improving text recognition in OCR (Optical Character Recognition) programs.

**Edge Fill**  
Corrects shadowing around the edges of the image by filling the shadows with black or white.

**Remove Punch Holes**  
Removes the shadows caused by holes on the edges of the original.

**Dual Image Output**  
Scans the original image twice using different output settings (Windows only).

**Watermark**  
Adds text to the background of the scanned image.

### Image Format Options

You can select different image formats and related options. For details on available options, click the ? icon on the Epson Scan 2 Image Format Options window. Not all image formats have options.

**BITMAP (*.bmp)**
- A standard image file format for most Windows programs.

**JPEG (*.jpg)**
- An image format that lets you highly compress image data. However, the higher the compression, the lower the image quality. (The TIFF format is recommended when you need to modify or retouch your scanned image.)

**PNG (*.png)**
- An image format that does not lose quality during editing.

**TIFF (*.tif)**
- A file format created for exchanging data between many programs, such as graphic and DTP software.

**Multi-TIFF (*.tif)**
- A TIFF file format when multiple pages are saved to the same file, allowing you to edit the images using a compatible program.

**PDF (*.pdf)**
- A document format that is readable by Windows and Mac systems using Adobe Reader, Acrobat, or other programs. You can save multi-page documents in one PDF file.

**Searchable PDF (*.pdf)**
- A document format that is readable by Windows and Mac systems using Adobe Reader, Acrobat, or other programs. You can save multi-page documents in one PDF file. Recognized text in the scanned document can be searched.

Scan Resolution Guidelines

The resolution setting in your scanning software, measured in dpi (dots per inch), controls the amount of detail captured in your scans. Increasing the resolution raises the amount of detail captured but comes with the following disadvantages:

- Larger file sizes
- It takes longer to scan your originals, send/receive your scans by email or fax, and to print your scans
- The image may become too large to fit on your display or print on paper

If you plan to enlarge a scanned image so you can print it at a larger size, you may need to increase the resolution from the default resolution set by the software. Follow these guidelines to determine the resolution setting you need:

- You will scan the image at its original size but enlarge it later in an image-editing program.
  
  Increase the resolution setting in your scanning software. Increase the resolution by the same amount you will increase the image size to retain a high image quality. For example, if the resolution is 300 dpi (dots per inch) and you will double the image size later, change the resolution setting to 600 dpi.

- You will scan the image at 100% or smaller size.
  
  Select the resolution setting based on how you will use the scanned image:

  - Email/view on a computer screen/post on the web: 96 to 200 dpi
  - Print/fax/convert to editable text (OCR)/create searchable PDF: 200 to 300 dpi

Cleaning Your Scanner

To keep your product working at its best, you should clean it several times a year.

Caution: Do not use a hard brush, alcohol, or paint thinner to clean the product or you may damage it. Do not use oil or other lubricants inside the product or let water get inside it. Do not open the product's outer case.

1. Turn off the scanner and unplug the AC adapter.
2. Disconnect any connected cables.
3. Clean the outer case with a soft, dry cloth. Do not use liquid or chemical cleansers.

   Note: If the outer case still requires additional cleaning, use a slightly damp cloth to wipe the outer case. Then wipe the case with a soft, dry cloth.

4. Clean the LCD screen with a soft, dry cloth.

Parent topic: Cleaning and Transporting Your Scanner

Cleaning Inside Your Scanner

Clean inside your scanner regularly to make sure that no dust builds up on the glass scanning surfaces. Dust can cause spots or lines in your scanned images.

Caution: Do not use a hard brush, alcohol, or paint thinner to clean the product or you may damage it. Do not use oil or other lubricants inside the product or let water get inside it.

1. Make sure the scanner is in Normal Mode (DS-32000).
2. Turn off the scanner and unplug the AC adapter.
3. Disconnect any connected cables.
4. Pull down on the cover open lever and open the scanner cover.

5. Use a genuine Epson cleaning kit or a soft, moist cloth to wipe off any dust or dirt on the glass scanning surfaces and the rollers inside the scanner cover. If the glass surface is stained with grease or some other hard-to-remove material, use a genuine Epson cleaning kit. Use a small amount of cleaner on the cleaning cloth to remove the stains. Be sure to wipe off all remaining liquid.
**Caution:** Do not spray glass cleaner directly on the scanning surfaces. Be careful not to place too much force on the glass.

6. Use a cotton swab to wipe off any dust or dirt on the sensors shown here.

**Caution:** Do not use liquid or glass cleaner on the cotton swab. Do not leave cotton fibers on the sensors.
7. Squeeze the hooks on the sides of the separation roller cover and open the cover.

   **Caution:** Be careful not to apply too much force when opening the cover.

8. Slide the separation roller to the left and remove it.
9. Wipe off any dust or dirt on the separation roller using a genuine Epson cleaning kit or a soft, moist cloth.

Caution: Use only a genuine Epson cleaning kit or soft, moist cloth to clean the roller; using a dry cloth may damage the surface of the roller.

10. To replace the separation roller, insert the end of the roller into the hole on the left side and lower the other end of the roller into place.
11. Close the separation roller cover until you hear it click into place.

**Caution:** If you are not able to close the cover, the roller is not installed correctly. Remove the roller and reinstall it, then try to close the cover again. Do not force the roller or cover into place or you may damage your scanner.

12. Press down on the pickup roller cover latch and pull up the cover to remove it.
13. Pull down the tab on the pickup roller and slide the roller to the right to remove it.

14. Wipe off any dust or dirt on the pickup roller using a genuine Epson cleaning kit or a soft, moist cloth.

Caution: Use only a genuine Epson cleaning kit or soft, moist cloth to clean the roller; using a dry cloth may damage the surface of the roller.
15. To replace the pickup roller, align the notches on the roller unit and slide it to the left. Press up on the tab to secure the roller.

16. Align the bottom edge of the pickup roller cover into the notches as shown and press it down until it clicks into place.
**Caution:** If you are not able to close the cover, the roller is not installed correctly. Remove the roller unit and reinstall it, then try to close the cover again. Do not force the roller or cover into place or you may damage your scanner.

17. Close the scanner cover.
18. Plug in the AC adapter and press the power button to turn on the scanner.
19. Press the home button, if necessary, and select **Scanner Maintenance**.
20. Select **Roller Cleaning**.
21. Pull down on the cover open lever and open the scanner cover.
The scanner enters roller cleaning mode.
22. Slowly rotate the rollers shown here by tapping anywhere on the LCD screen. Use a genuine Epson cleaning kit or a soft, moist cloth to wipe off any dust or dirt on the rollers as they rotate. Repeat this step until the rollers are clean.

Caution: Be careful not to get your hands or hair caught in the rollers as they rotate.

23. Close the scanner cover.

## Replacing the Scanner Rollers

Replace the scanner rollers when the number of scans exceeds the life cycle of the rollers. Check the scanner roller counter to see when you need to replace the rollers.

1. Turn off the scanner.
2. Make sure the scanner is in Normal Mode (DS-32000).
3. Unplug the AC adapter.
4. Disconnect any connected cables.
5. Pull down on the cover open lever and open the scanner cover.
6. Press down on the pickup roller cover latch and pull up the cover to remove it.
7. Pull down the tab on the pickup roller and slide the roller to the right to remove it.

Caution: Do not use excessive force when removing the pickup roller or you could damage the scanner.

8. To install the new pickup roller, align the notches on the roller unit and slide it to the left. Press up on the tab to secure the roller.
9. Align the bottom edge of the pickup roller cover into the notches as shown and press it down until it clicks into place.

Note: If you are not able to close the cover, the pickup roller is not installed correctly. Remove the pickup roller and reinstall it, then try to close the cover again.

10. Squeeze the tabs on the sides of the separation roller cover and open the cover.

Caution: Be careful not to apply too much force when opening the cover.
11. Lift the left side of the separation roller and remove it.

12. To install a new separation roller, insert the end of the roller into the hole on the right side and lower the other end of the roller into place.
13. Close the separation roller cover until you hear it click into place.

   **Note:** If you are not able to close the cover, the roller is not installed correctly. Remove the roller and reinstall it, then try to close the cover again.

14. Close the scanner cover.
15. Connect any disconnected cables.
16. Plug in the AC adapter and turn on the scanner.
17. Reset the roller counter.

Scanning Software Does Not Operate Correctly

If your scanning software does not operate correctly, try these solutions:
• Make sure your computer has adequate memory and meets the system requirements for your operating system.
• Make sure your computer is not running in a power-saving mode, such as sleep or standby. If so, wake your system and restart your scanning software.
• Make sure the scanner is turned on.
• Make sure the connection between the scanner and your computer is secure.
• If you upgraded your operating system but did not reinstall your scanning software, try reinstalling it.
• In Windows, be sure that the scanner is listed under Imaging Devices in the Device Manager.
• Check that the correct scanner is selected using the Epson Scan 2 Utility.
• Check that the correct setting is assigned to the scanner button in Document Capture Pro (Windows) or Document Capture (Mac).
• Make sure the scanning software is installed.
• Use the USB cable that came with the scanner.
• Connect the scanner directly to the computer. The scanner may not work properly when connected through a USB hub.
• If you are using a TWAIN-compliant program, make sure that the correct product is selected as the Scanner or Source setting.
• Make sure the power light stops flashing, indicating that the scanner is ready to scan.

Original Feeds Incorrectly in Scanner

If you have problems feeding originals in your scanner, try these solutions:
• If multiple pages feed at once, try the following:
  • Make sure the paper separation lever is in the correct position.
  • Remove the originals, fan the edges to separate the sheets, if necessary, and reload them.
  • Load fewer originals at a time.
  • Load only originals that meet the specifications for your scanner.
  • Clean inside the scanner and replace the roller assembly kit, if necessary.
  • Select on the scanner control panel to slow down the scanning speed.
  • Use Automatic Feeding Mode in Epson Scan 2 and scan originals one at a time.
  • Use the optional carrier sheet for thin, folded, or irregularly shaped originals.
• If you see a double feed error in the Epson Scan 2 window or the Document Capture Pro window, start Epson Scan 2, select the Main Settings tab, select the Detect Double Feed setting, and select Off.

Original Jams in Scanner

If an original has jammed inside the scanner, follow these steps:

1. Turn off your scanner.
2. Remove all originals from the input tray.
3. Pull down the cover open lever and open the scanner cover.
4. Gently pull out any jammed originals from inside the scanner.

5. Gently pull out any jammed originals from the output tray.

6. Close the scanner cover.
7. Carefully follow all loading instructions when you reload originals.
If originals jam in the scanner frequently, try the following:

- Select on the scanner control panel to slow down the scanning speed.
- Clean inside the scanner and clean the rollers.
- Close the output tray and let the originals fall freely onto the surface below the scanner.

If special originals such as carrier sheets, passports, or plastic or laminated cards jam frequently, clean the front face of the originals. If jams still occur, scan 20 sheets of plain paper and then scan the original again.

Scanning is Slow

If scanning becomes slow, try these solutions:

- Scan your original at a lower resolution, if possible.
- Make sure your system meets the requirements for your operating system. If you are scanning a high-resolution image, you may need more than the minimum requirements. If necessary, increase your system’s memory or reduce the resolution.
- Make sure you did not press the slow mode button to slow down the scanning speed.
- The scanning speed may be reduced depending on the image adjustment features in Epson Scan 2.
- If scanning becomes slower after scanning continuously with the ADF for a long time, the scanner may have automatically slowed down to protect the scanner mechanism from overheating or becoming damaged. Let the scanner rest with the power on for 30 minutes, then try scanning again.
- Computers with USB 3.0 (SuperSpeed) or USB 2.0 (Hi-Speed) ports can scan faster than those with USB 1.1 ports. If you are using a USB 3.0 or 2.0 port with the scanner, make sure it meets the system requirements.

• Make sure your original is loaded straight on your product.
• Use an original with clear text.
• Adjust these Epson Scan 2 settings (if available) and try scanning again:
  • Select the correct **Image Type** setting.
  • Select or adjust the **Text Enhancement** setting.
  • If the **Image Type** is set to **Black & White**, adjust the **Threshold** setting.
  • Set the **Image Type** to **Grayscale**.
• Set the scanning resolution between 200 and 600 dpi.
• If the original document is in landscape mode, set the **Rotate** setting to **Auto** in Epson Scan 2.
• If you are using OCR software, check the manual for any additional adjustments.
• Scan thermal paper receipts as soon as possible. They may deteriorate due to age or friction.
• When saving to Microsoft Office or Searchable PDF files, check that the correct languages are selected. Check the language in each save setting window.

**Parent topic:** Solving Scanned Image Quality Problems
Ripple Patterns Appear in an Image

You may see a ripple pattern (called a moiré) in scanned images of printed documents. This is caused by interference from differing pitches in the scanner's screen and your original's halftone screen. To reduce this effect, adjust these Epson Scan 2 settings (if available) and try scanning again:

- Select the **Descreening** setting on the Advanced tab.
- Select a lower **Resolution** setting.

**Parent topic:** Solving Scanned Image Quality Problems

Spots or Lines Appear in All Scanned Images

If spots or lines appear in all your scanned images, try these solutions:

- Make sure the surface of your original is clean.
- Make sure there is no debris or dirt inside the ADF.
- Disconnect any connected cables and clean inside the scanner.
- Enable the **Detect Glass Dirt** setting on the control panel. (Press the ➩ home button, select Settings > Scanner Settings > Detect Glass Dirt, and select On-Low, if the alert displays a misdetection, or On-High if dirt is not detected.) When an alert displays on the control panel, clean the glass scanning surfaces inside your scanner using a genuine Epson cleaning kit or a soft, moist cloth.

  **Note:** If there are scratches on the glass surface, the alert screen may continue to appear even after cleaning the glass. Contact Epson for information about replacing the glass.

- Avoid scanning in direct sunlight.

Important Safety Instructions

Follow these safety instructions when setting up and using the scanner:

• Read all these instructions, and follow all warnings and instructions marked on the scanner.
• Place the scanner close enough to the computer for the interface cable to reach it easily.
• Do not use with wet hands.
• When connecting this product to a computer or other device with a cable, ensure the correct orientation of the connectors. Each connector has only one correct orientation. Inserting a connector in the wrong orientation may damage both devices connected by the cable.
• Do not insert objects into any opening as they may touch dangerous voltage points or short out parts. Beware of electrical shock hazards.
• Place the product on a flat, stable surface that extends beyond the base of the product in all directions. If you place the product by the wall, leave at least 3.9 inches (10 cm) between the back of the product and the wall.
• After replacing consumable parts, dispose of them correctly following the rules of your local authority. Do not disassemble them.
• Do not place or store the scanner outdoors, in a car, near excessive dirt or dust, water, heat sources, or in locations subject to shocks, vibrations, condensation, high temperature or humidity, direct sunlight, strong light sources, or rapid changes in temperature or humidity.
• Never disassemble, modify, or attempt to repair the scanner or a scanner option by yourself except as specifically explained in this guide.

**LCD Screen**

• The LCD screen may have uneven brightness or a few small bright or dark spots. This is normal and does not indicate damage.

• Use only a dry, soft cloth to clean the LCD screen. Do not use liquid or chemical cleansers.

• If the LCD screen is damaged, contact Epson. If the liquid crystal solution gets on your hands, wash them thoroughly with soap and water. If the liquid crystal solution gets into your eyes, flush them immediately with water. If discomfort or vision problems remain after a thorough flushing, see a doctor immediately.

• Do not press too hard on the LCD screen or subject it to heavy impacts.

• Do not use a pointy or sharp object, such as a pen or your fingernail, to operate the LCD screen.

• If the LCD screen chips or cracks, do not touch or attempt to remove the broken pieces; contact Epson for support.

• Do not subject your product to sudden changes in temperature or humidity; this may cause condensation to develop inside the LCD screen and degrade its performance.

**Restrictions on Copying**

Observe the following restrictions to ensure responsible and legal use of your scanner.

Copying of the following items is prohibited by law:

• Bank bills, coins, government-issued marketable securities, government bond securities, and municipal securities

• Unused postage stamps, pre-stamped postcards, and other official postal items bearing valid postage

• Government-issued revenue stamps, and securities issued according to legal procedure

Exercise caution when copying the following items:

• Private marketable securities (stock certificates, negotiable notes, checks, etc.), monthly passes, concession tickets, etc.

• Passports, driver's licenses, warrants of fitness, road passes, food stamps, tickets, etc.

**Note:** Copying these items may also be prohibited by law.
Restriction on disassembling and decompiling
You may not disassemble, decompile, or otherwise attempt to derive the source code of any software included with this product.

Binding Arbitration and Class Waiver

1. DISPUTES, BINDING INDIVIDUAL ARBITRATION, AND WAIVER OF CLASS ACTIONS AND CLASS ARBITRATIONS

1.1 Disputes. The terms of this Section 1 shall apply to all Disputes between you and Epson. The term "Dispute" is meant to have the broadest meaning permissible under law and includes any dispute, claim, controversy or action between you and Epson arising out of or relating to this Agreement, Epson branded products (hardware and including any related software), or other transaction involving you and Epson, whether in contract, warranty, misrepresentation, fraud, tort, intentional tort, statute, regulation, ordinance, or any other legal or equitable basis. "DISPUTE" DOES NOT INCLUDE IP CLAIMS, or more specifically, a claim or cause of action for (a) trademark infringement or dilution, (b) patent infringement, (c) copyright infringement or misuse, or (d) trade secret misappropriation (an "IP Claim"). You and Epson also agree, notwithstanding Section 1.6, that a court, not an arbitrator, may decide if a claim or cause of action is for an IP Claim.

1.2 Binding Arbitration. You and Epson agree that all Disputes shall be resolved by binding arbitration according to this Agreement. ARBITRATION MEANS THAT YOU WAIVE YOUR RIGHT TO A JUDGE OR JURY IN A COURT PROCEEDING AND YOUR GROUNDS FOR APPEAL ARE LIMITED. Pursuant to this Agreement, binding arbitration shall be administered by JAMS, a nationally recognized arbitration authority, pursuant to its code of procedures then in effect for consumer related disputes, but excluding any rules that permit joinder or class actions in arbitration (for more detail on procedure, see Section 1.6 below). You and Epson understand and agree that (a) the Federal Arbitration Act (9 U.S.C. §1, et seq.) governs the interpretation and enforcement of this Section 1, (b) this Agreement memorializes a transaction in interstate commerce, and (c) this Section 1 shall survive termination of this Agreement.

1.3 Pre-Arbitration Steps and Notice. Before submitting a claim for arbitration, you and Epson agree to try, for sixty (60) days, to resolve any Dispute informally. If Epson and you do not reach an agreement to
resolve the Dispute within the sixty (60) days), you or Epson may commence an arbitration. Notice to Epson must be addressed to: Epson America, Inc., ATTN: Legal Department, 3131 Katella Ave., Los Alamitos, CA 90720 (the "Epson Address"). The Dispute Notice to you will be sent to the most recent address Epson has in its records for you. For this reason, it is important to notify us if your address changes by emailing us at EAILegal@ea.epson.com or writing us at the Epson Address above. Notice of the Dispute shall include the sender's name, address and contact information, the facts giving rise to the Dispute, and the relief requested (the "Dispute Notice"). Following receipt of the Dispute Notice, Epson and you agree to act in good faith to resolve the Dispute before commencing arbitration.

1.4 Small Claims Court. Notwithstanding the foregoing, you may bring an individual action in the small claims court of your state or municipality if the action is within that court's jurisdiction and is pending only in that court.

1.5 WAIVER OF CLASS ACTIONS AND CLASS ARBITRATIONS. YOU AND EPSON AGREE THAT EACH PARTY MAY BRING DISPUTES AGAINST THE OTHER PARTY ONLY IN AN INDIVIDUAL CAPACITY, AND NOT AS A PLAINTIFF OR CLASS MEMBER IN ANY CLASS OR REPRESENTATIVE PROCEEDING, INCLUDING WITHOUT LIMITATION FEDERAL OR STATE CLASS ACTIONS, OR CLASS ARBITRATIONS. CLASS ACTION LAWSUITS, CLASS-WIDE ARBITRATIONS, PRIVATE ATTORNEY-GENERAL ACTIONS, AND ANY OTHER PROCEEDING WHERE SOMEONE ACTS IN A REPRESENTATIVE CAPACITY ARE NOT ALLOWED. ACCORDINGLY, UNDER THE ARBITRATION PROCEDURES OUTLINED IN THIS SECTION, AN ARBITRATOR SHALL NOT COMBINE OR CONSOLIDATE MORE THAN ONE PARTY'S CLAIMS WITHOUT THE WRITTEN CONSENT OF ALL AFFECTED PARTIES TO AN ARBITRATION PROCEEDING.

1.6 Arbitration Procedure. If you or Epson commences arbitration, the arbitration shall be governed by the rules of JAMS that are in effect when the arbitration is filed, excluding any rules that permit arbitration on a class or representative basis (the "JAMS Rules"), available at http://www.jamsadr.com or by calling 1-800-352-5267, and under the rules set forth in this Agreement. All Disputes shall be resolved by a single neutral arbitrator, and both parties shall have a reasonable opportunity to participate in the selection of the arbitrator. The arbitrator is bound by the terms of this Agreement. The arbitrator, and not any federal, state or local court or agency, shall have exclusive authority to resolve all disputes arising out of or relating to the interpretation, applicability, enforceability or formation of this Agreement, including any claim that all or any part of this Agreement is void or voidable. Notwithstanding this broad delegation of authority to the arbitrator, a court may determine the limited question of whether a claim or cause of action is for an IP Claim, which is excluded from the definition of "Disputes" in Section 1.1 above. The arbitrator shall be empowered to grant whatever relief would be available in a court under law or in equity. The arbitrator may award you the same damages as a court could, and may award declaratory or injunctive relief only in favor of the individual party seeking relief and only to the extent necessary to provide relief warranted by that party's individual claim. In some instances, the costs of arbitration can exceed the costs of litigation and the right to discovery may be more limited in arbitration.
than in court. The arbitrator's award is binding and may be entered as a judgment in any court of competent jurisdiction.

You may choose to engage in arbitration hearings by telephone. Arbitration hearings not conducted by telephone shall take place in a location reasonably accessible from your primary residence, or in Orange County, California, at your option.

a) Initiation of Arbitration Proceeding. If either you or Epson decides to arbitrate a Dispute, both parties agree to the following procedure:

(i) Write a Demand for Arbitration. The demand must include a description of the Dispute and the amount of damages sought to be recovered. You can find a copy of a Demand for Arbitration at http://www.jamsadr.com ("Demand for Arbitration").

(ii) Send three copies of the Demand for Arbitration, plus the appropriate filing fee, to: JAMS, 500 North State College Blvd., Suite 600 Orange, CA 92868, U.S.A.

(iii) Send one copy of the Demand for Arbitration to the other party (same address as the Dispute Notice), or as otherwise agreed by the parties.

b) Hearing Format. During the arbitration, the amount of any settlement offer made shall not be disclosed to the arbitrator until after the arbitrator determines the amount, if any, to which you or Epson is entitled. The discovery or exchange of non-privileged information relevant to the Dispute may be allowed during the arbitration.

c) Arbitration Fees. Epson shall pay, or (if applicable) reimburse you for, all JAMS filings and arbitrator fees for any arbitration commenced (by you or Epson) pursuant to provisions of this Agreement.

d) Award in Your Favor. For Disputes in which you or Epson seeks $75,000 or less in damages exclusive of attorney's fees and costs, if the arbitrator's decision results in an award to you in an amount greater than Epson's last written offer, if any, to settle the Dispute, Epson will: (i) pay you $1,000 or the amount of the award, whichever is greater; (ii) pay you twice the amount of your reasonable attorney's fees, if any; and (iii) reimburse you for any expenses (including expert witness fees and costs) that your attorney reasonably accrues for investigating, preparing, and pursuing the Dispute in arbitration. Except as agreed upon by you and Epson in writing, the arbitrator shall determine the amount of fees, costs, and expenses to be paid by Epson pursuant to this Section 1.6d).

e) Attorney's Fees. Epson will not seek its attorney's fees and expenses for any arbitration commenced involving a Dispute under this Agreement. Your right to attorney's fees and expenses under Section 1.6d) above does not limit your rights to attorney's fees and expenses under applicable law; notwithstanding the foregoing, the arbitrator may not award duplicative awards of attorney's fees and expenses.

1.7 Opt-out. You may elect to opt-out (exclude yourself) from the final, binding, individual arbitration procedure and waiver of class and representative proceedings specified in this Agreement by sending a written letter to the Epson Address within thirty (30) days of your assent
to this Agreement (including without limitation the purchase, download, installation of the Software or other applicable use of Epson Hardware, products and services) that specifies (i) your name, (ii) your mailing address, and (iii) your request to be excluded from the final, binding individual arbitration procedure and waiver of class and representative proceedings specified in this Section 1. In the event that you opt-out consistent with the procedure set forth above, all other terms shall continue to apply, including the requirement to provide notice prior to litigation.

1.8 Amendments to Section 1. Notwithstanding any provision in this Agreement to the contrary, you and Epson agree that if Epson makes any future amendments to the dispute resolution procedure and class action waiver provisions (other than a change to Epson's address) in this Agreement, Epson will obtain your affirmative assent to the applicable amendment. If you do not affirmatively assent to the applicable amendment, you are agreeing that you will arbitrate any Dispute between the parties in accordance with the language of this Section 1 (or resolve disputes as provided for in Section 1.7, if you timely elected to opt-out when you first assented to this Agreement).

1.9 Severability. If any provision in this Section 1 is found to be unenforceable, that provision shall be severed with the remainder of this Agreement remaining in full force and effect. The foregoing shall not apply to the prohibition against class or representative actions as provided in Section 1.5. This means that if Section 1.5 is found to be unenforceable, the entire Section 1 (but only Section 1) shall be null and void.
