Parent topic: Control Panel Buttons and Lights

### Navigating the LCD Screen

Follow these guidelines to navigate and use the menus on the LCD screen.
Tap or press the screen to select an item or icon

Flick the screen to scroll swiftly

Slide your finger across the screen to move items

Close or open your fingers across the screen to zoom in or zoom out on a preview image

To change a setting, tap anywhere on the setting.
To enter a value in a field, tap the field to display the on-screen keyboard.

Parent topic: Using the Control Panel

**Entering Characters on the LCD Screen**

Follow these guidelines to enter characters for passwords and other settings.

- To move the cursor, select the left or right arrows.
• To change the case of letters, select 🔼.
• To delete the previous character, select 𝒏.”.
• To enter numbers or symbols, select 123#.
• To enter a commonly used domain name, select 🌐.
• To enter a space, select 🌞.

Parent topic: Using the Control Panel

Selecting the Date and Time

Before faxing, select the current date, time, and daylight saving phase in your area, and choose your preferred date and time format.

1. Press the home button, if necessary.
2. Select Settings > General Settings > Basic Settings > Date/Time Settings.

You see a screen like this:

![Date/Time Settings screen](image)

3. Select Daylight Saving Time.
4. Select the setting that applies to your area:
   • Winter: it is winter or your region does not use Daylight Saving Time (DST)
- **Summer**: it is spring or summer and your region uses Daylight Saving Time (DST)

**Note**: If your region uses Daylight Saving Time (DST), you must change this setting to match the season. When you change from **Winter** to **Summer**, your product automatically sets its clock ahead one hour. When you change from **Summer** to **Winter**, it sets its clock back one hour.

5. Select **Date/Time**.
6. Select the date format you want to use.
7. Use the displayed keypad to enter the current date.
8. Select the time format you want to use.
9. Use the displayed keypad to enter the current time.

**Parent topic**: Using the Control Panel

Viewing Animations

You can view animations on the LCD screen to help guide you with a procedure or to troubleshoot a problem.

1. Press the 📁 help button.
2. Select **Troubleshooting** if you are experiencing a problem or **How To** to view instructions on common procedures.
3. Select a topic from the list of available topics and follow the on-screen instructions.

**Parent topic**: Using the Control Panel

Changing LCD Screen Language

You can change the language used on the LCD screen.

1. Press the 🏡 home button, if necessary.
2. Select **Settings > General Settings > Basic Settings > Language**.
3. Select a language.

**Parent topic**: Using the Control Panel

Selecting Your Country or Region

Before using your product, select the country or region in which you are using your product.
Note: If you change the country or region, your fax settings return to their defaults and you must select them again.

1. Press the home button, if necessary.
2. Select Settings > General Settings > Basic Settings > Country/Region.
3. Scroll up or down, if necessary, and select your country or region. You see a confirmation screen.
4. If the setting is correct, select Yes. (If not, select No and retry.)

Parent topic: Using the Control Panel

Adjusting Control Panel Sounds
You can adjust the sound level heard when you press buttons on the control panel.

1. Press the home button, if necessary.
2. Select Settings > General Settings > Basic Settings > Sound.
3. Select Normal Mode or Quiet Mode.

Note: Press the icon on the Home screen to switch between Normal Mode and Quiet Mode.

4. Select Button Press.
5. Select the + or – icons to adjust the volume.
6. Select OK to exit.

Parent topic: Using the Control Panel

Adjusting the Screen Brightness
You can adjust the brightness of the LCD screen.

1. Press the home button, if necessary.
2. Select Settings > General Settings > Basic Settings > LCD Brightness.
3. Select the – or + icons to decrease or increase the brightness.
4. Select OK to exit.

Parent topic: Using the Control Panel
Turning Off the Operation Time Out Setting

The Operation Time Out setting causes the LCD screen to return to the Home screen after a few minutes of inactivity. This feature is enabled by default, but you can turn it off.

1. Press the home button, if necessary.
2. Select Settings > General Settings > Basic Settings.

Parent topic: Using the Control Panel

Using Power Saving Settings

Your product enters sleep mode automatically and turns off the LCD screen if it is not used for a period of time. You can make the time period shorter and select other options to save energy and resources.

Changing the Sleep Timer Settings
Changing the Power Off Timer Settings

Parent topic: Product Basics

Changing the Sleep Timer Settings

You can adjust the time period before your product enters sleep mode and turns off the LCD screen.

1. Press the home button, if necessary.
2. Select Settings > General Settings > Basic Settings > Sleep Timer.
3. Do one of the following:
   • Select the – or + icon to decrease or increase the number of minutes.
   • Select the number of minutes on the LCD screen, select the number of minutes from the on-screen keypad, and select OK.
4. Select OK.

Parent topic: Using Power Saving Settings

Changing the Power Off Timer Settings

You can have the product turn off automatically if it is not used for a specified period of time.

1. Press the home button, if necessary.
2. Select Settings > General Settings > Basic Settings.
3. Select **Power Off Timer**, and select a time period between **30 minutes** and **12h** (12 hours).

**Parent topic:** Using Power Saving Settings

### Using the Epson Smart Panel Mobile App

Use this free Apple and Android app to set up your Epson product and then print, copy, or scan with your networked Epson product. Epson Smart Panel also lets you check ink levels and product status.

1. Visit [epson.com/connect](http://epson.com/connect) (U.S) or [epson.ca/connect](http://epson.ca/connect) (Canada) to learn more about Epson Smart Panel and check the compatibility of your mobile device.

2. Download Epson Smart Panel from the Apple App Store or Google Play.

3. Connect your mobile device to the wireless network that you want to connect your product to or to the same wireless network as your product (if your product is already set up).

4. Do one of the following:
   - If you haven't set up your product, open Epson Smart Panel and follow the instructions to set up your product.
   - If your product is already set up, open Epson Smart Panel and select your Epson product, if necessary.

Now you are ready to print, copy, or scan with your mobile device and your Epson product.

**Parent topic:** Product Basics

**Related topics**

- [Wi-Fi or Wired Networking](#)
- [Voice-activated Printing](#)

### Voice-activated Printing

Take advantage of voice-activated, hands-free printing from your Epson product with Alexa, Siri, and Google Assistant. Depending on which voice assistant you use, you can ask your product to print photos, calendars, recipes, photo props, and more. **Click here** for more information.

1. Connect your product to your network. See the link below.

2. Set up your product's email address for use with Epson Connect. See the link below to activate it from the product control panel.

3. **Click here** for instructions on how to set up your product and voice assistant to use the voice-activated printing feature.

Now you are ready to print with your voice and your Epson product.

**Parent topic:** Product Basics
Epson Connect Solutions for Smartphones, Tablets, and More

Use your smartphone, tablet, or computer to print and scan documents, photos, emails, and web pages from your home, office, or even across the globe.

Note: If you are using your Epson product with the Windows 10 S operating system, you cannot use the software described in this section. You also cannot download and install any Epson product software from the Epson website for use with Windows 10 S; you must obtain software only from the Windows Store.

Print from anywhere with these Epson Connect solutions:

- Epson Email Print
- Epson Remote Print

Scan and send a file as an email or upload it to an online service directly from your Epson product with Epson Scan to Cloud.

Setting Up Epson Connect Services
Using Epson Email Print
Using Epson Remote Print
Using Epson Scan to Cloud

Parent topic: Product Basics

Setting Up Epson Connect Services

If you did not activate your product’s email address for use with Epson Connect when you set up your product, you can activate it using the product control panel.

1. Press the home button, if necessary.
2. Select Settings > General Settings > Web Service Settings > Epson Connect Services.
You see a screen like this:

![Registration Screen](image)

3. Select **Register**.
4. Follow the instructions on the screen to activate your product's email address.

**Parent topic:** Epson Connect Solutions for Smartphones, Tablets, and More

**Related topics**

Wi-Fi or Wired Networking

**Using Epson Email Print**

With Epson Email Print, you can print from any device that can send email, such as your smartphone, tablet, or laptop. Just activate your product's unique email address. When you want to print, attach a PDF, Microsoft Office document, or photo to an email and send it to your product. Both the email and the attachments will print automatically.

1. Connect your product to your network. See the link below.
2. If you did not already set up Email Print when you installed your product software, see the link below to use your product control panel to activate your unique email address. Or visit [epson.com/connect](http://epson.com/connect) (U.S) or [epson.ca/connect](http://epson.ca/connect) (Canada) to learn more about Email Print, create your Epson Connect account, and register your product to the Epson Connect service.
3. Now you are ready to send and print emails to your product's Email Print address.

**Note:** Go to [epsonconnect.com](http://epsonconnect.com) and log into your Epson Connect account to personalize your product's email, adjust print settings, and set up other Epson Connect services.
Using Epson Remote Print

With Epson Remote Print software, you can print from your laptop or desktop computer to an Epson Email-enabled product anywhere in the world.

1. Connect your Epson product to your wireless network. See the link below.

2. If you did not already set up an Epson Connect account when you installed your product software, visit epsonconnect.com to create your account and register your product to the Epson Connect service.

   Note: Make a note of your product's email address.

3. Visit epsonconnect.com to learn more about Remote Print and how to download the Remote Print Driver software.

4. Download and install the Remote Print software.

5. Enter the email address and optional access key of your Epson product during Remote Print setup.

6. Now you are ready to print remotely. Select the print command in your laptop or desktop computer application and choose the Remote Print option for your Epson product.

Using Epson Scan to Cloud

The Epson Scan to Cloud service allows you to scan and send a file as an email or upload it to an online service directly from your Epson product. Register an email address or online services such as Box, Dropbox, Evernote, or Google Drive with your Epson Connect account.

1. Connect your Epson product to your network. See the link below.
2. If you did not already set up an Epson Connect account when you installed your product software, visit epsonconnect.com to create your account and register your product to the Epson Connect service.

   **Note:** Make a note of your product's email address and password.

3. Visit epsonconnect.com to sign into your account with the email address and password you selected.

4. Select your product, select **Scan to Cloud**, and select **Destination List**.

5. Click **Add**, then follow the instructions on the screen to create your destination list.

6. Now you are ready to use Scan to Cloud. Select the setting for scanning to Scan to Cloud on your Epson product control panel.

---

**Using AirPrint**

AirPrint enables instant wireless printing from iPhone, iPad, iPod touch, and Mac without the need to install drivers or download software.

**Note:** If you disabled paper configuration messages on your product control panel, you cannot use AirPrint. See the link below to enable the messages, if necessary.

1. Load paper in your product.
2. Set up your product for wireless printing. See the link below.
3. Connect your Apple device to the same wireless network that your product is using.
4. Print from your device to your product.

**Note:** For details, see the AirPrint page on the Apple website.

**Android Printing Using the Epson Print Enabler**

You can wirelessly print your documents, emails, photos, and web pages right from your Android phone or tablet (Android v4.4 or later). With a few taps, your Android device will discover your nearby Epson product and print.

1. Connect your Epson product to your wireless network. See the link below.
2. On your Android device, download the Epson Print Enabler plug-in from Google Play.
3. Go to **Settings** on your Android device, select **Printing**, and enable the Epson plug-in, if necessary.
4. Connect your Android device to the same wireless network as your product.
5. Now you are ready to print. From an Android application such as Chrome or Gmail, tap the menu icon and print whatever is on the screen.

**Note:** If you do not see your product, tap **All Printers** and select your product.

**Parent topic:** Product Basics
Using Fire OS Printing

You can wirelessly print from Amazon Fire tablets and phones to your nearby networked Epson product. There is no software to download, no drivers to install, and no cables to connect. With just a few taps in Email, Calendar, Contacts, and WPS Office, you can send whatever is on the screen to an Epson product.

1. Connect your Epson product to your wireless network. See the link below.
2. Connect your Amazon device to the same wireless network as your product.
3. Now you are ready to print. From your Amazon application, tap the print option and select your product to print whatever is on the screen.

   Note: If you see a message telling you that a plug-in is required, tap **OK** and tap **Download**. If your Amazon Fire product uses Fire OS 5 and above, your device automatically uses the built-in Mopria Print Service app to print.

Using Windows 10 Mobile Printing

You can wirelessly print from Windows 10 Mobile tablets and phones to your nearby networked Epson product. There is no software to download, no drivers to install, and no cables to connect. Look for the print option in your Windows 10 application to send whatever is on the screen to an Epson product.

1. Connect your Epson product to your wireless network. See the link below.
2. Connect your Windows 10 Mobile device to the same wireless network as your product.
3. Now you are ready to print. From your Windows 10 application, tap the print option and select your product to print whatever is on the screen.

Using Epson Print and Scan App with Windows Tablets

You can use this free app to print photos and scan from your Windows (Windows 8 or higher) Surface RT or Pro tablet with networked Epson products. The Epson Print and Scan app allows you to scan and capture images right to your tablet or to Microsoft OneDrive.

**Note:** The Epson Print and Scan app does not support Windows 10 Mobile printing and does not supply scanning functions for products without scanners.

1. Connect your Epson product to your wireless network. See the link below.
2. Download the Epson Print and Scan app from the Microsoft Windows Store.
3. Connect your Windows tablet to the same wireless network as your product.
4. Open the Epson Print and Scan app and select your Epson product.

Now you are ready to print photos or scan.

Using the Mopria Print Service

You can use the Mopria Print Service to print from your Android phone or tablet (Android v4.4 or later) to your Epson product or any Mopria-certified product from other manufacturers. You can download the Mopria Print Service from Google Play.

**Note:** For details on the Mopria Print Service, click here (U.S.) or click here (Canada).

1. Connect your Epson product to your wireless network. See the link below.
2. On your Android device, download the Mopria Print Service app from Google Play.

**Note:** On some Samsung Galaxy devices, Mopria may come preinstalled.

3. Go to Settings on your Android device, select Printing, and enable the Mopria Print Service, if necessary.
4. Connect your Android device to the same wireless network as your product.
5. Now you are ready to print. From an Android application such as Chrome or Gmail, tap the menu icon and select **Print**. Then select **All printers**, select your Epson product, adjust your print settings, and print.

Network Security Recommendations

To help deter unauthorized access to your product over a network, you should protect your network environment using appropriate security measures.

Security measures such as these can help deter threats such as loss of user data, use of telephone and fax lines, and other intrusions:

• **Enable security on your wireless LAN**
  Enable the appropriate security on the wireless LAN you plan to use with your product. Network security such as a network password can deter interception of traffic over the wireless LAN. Your router may already have a default password enabled by your Internet service provider (ISP). See your ISP and router documentation for instructions on how to change the default password and better secure your network.

• **Connect your product only to a network protected by a firewall**
  Connecting your product directly to the Internet may leave it vulnerable to security threats. Instead, connect it to a router or other network connection protected by a firewall. Your router may already have a firewall set up by your Internet service provider; check with your ISP for confirmation. For best results, set up and use a private IP address for your network connection.

• **Change the default administrator password on your product**
  If your product has an option to set an administrator password, change the default administrator password to deter access by unauthorized users to personal data stored on your product, such as IDs, passwords, and contact lists.

Parent topic: **Wi-Fi or Wired Networking**
Wi-Fi Infrastructure Mode Setup

You can set up your product to communicate with your computer using a wireless router or access point. The wireless router or access point can be connected to your computer over a wireless or wired network.

1. Epson product
2. Wireless router or access point
3. Computer with a wireless interface
4. Computer
5. Internet
6. Ethernet cable (used only for wired connection to the wireless router or access point)

Selecting Wireless Network Settings from the Control Panel

Parent topic: Wi-Fi or Wired Networking
Selecting Wireless Network Settings from the Control Panel

You can select or change wireless network settings using your product control panel.

To install your product on a wireless network, follow the instructions on the Start Here sheet and install the necessary software by downloading it from the Epson website. The installer program guides you through network setup.

Note: Breakdown or repair of this product may cause loss of fax and network data and settings. Epson is not responsible for backing up or recovering data and settings during or after the warranty period. We recommend that you make your own backup or print out your fax and network data and settings.

1. Press the home button, if necessary.

2. Select the icon.

   You see a screen like this:

   ![Network Connection Settings](image)

3. Select Wi-Fi (Recommended).

4. Select Start Setup or Change Settings.

5. Select Wi-Fi Setup Wizard.
6. Select the name of your wireless network or select **Enter Manually** to enter the name manually. Use the displayed keypad to enter your network name.

7. Select the **Enter Password** field and enter your wireless password using the displayed keypad.

![Keypad Image]

**Note:** The network name and password are case sensitive. Be sure to correctly enter uppercase and lowercase letters, and numeric or special characters.

- To move the cursor, select the left or right arrows.
- To change the case of letters, select ▲.
- To delete the previous character, select □.
- To enter numbers and symbols, select 123#.
- To enter a space, select ▓.

8. Select **OK** when you finish entering your password.

9. Confirm the displayed network settings and select **Start Setup** to save them.
10. Do one of the following
   • If setup was successful, select **Close** to exit.
   • If setup was unsuccessful, select **Print Check Report** to print a network setup report or select **Re-enter** to re-enter your network name and password.

11. Press the `home` button to exit.

   The **Wi-Fi** icon displayed on the LCD screen indicates your wireless connection status. If the product is not connected to the network, you may have selected the wrong network name (SSID) or entered the password incorrectly. Repeat these steps to try again.

   If you are printing from a computer, make sure you installed the network software as described on the **Start Here** sheet.

### Setting Up Wireless Printing from a Smartphone or Tablet

You can use the Epson Smart Panel app to connect your Epson product to a wireless network or connect your device directly to the product. Epson Smart Panel is available on iOS and Android devices.

Make sure you have the following:

- A Bluetooth-enabled device that is connected to a wireless network
- The Epson Smart Panel app installed on the device
- The wireless network name (SSID) and password

**Note:** Your device must be close enough to the product to create and maintain a Bluetooth connection.

1. Make sure the product is turned on and is ready to print.
   **Note:** You must perform initial setup and ink installation before setting up wireless printing.

2. Open the Epson Smart Panel app on your device.
3. Do one of the following:
   • If the app automatically recognizes the product, follow the on-screen instructions to set up the wireless connection.
   • If the app does not automatically recognize the product, select the + icon and continue with the next step.

4. On the next screen, select **Start setting up** and follow the on-screen instructions.

   **Note:** If your product is not listed, move closer to the product and try again. If the product is still not shown, connect your printer to the wireless network using the control panel and then select **Connect Smartphone to Product Already Connected to Wi-Fi** in the Epson Smart Panel app and follow the on-screen instructions. See the link below for wireless setup instructions.

Your product is now connected to a wireless network and set up for use with the Epson Smart Panel app.

**Parent topic:** [Wi-Fi or Wired Networking](#)

**Related tasks**

[Using the Epson Smart Panel Mobile App](#)

**Wi-Fi Direct Mode Setup**

You can set up your product to communicate directly with your computer or another device without requiring a wireless router or access point. In Wi-Fi Direct Mode, the product itself acts as a network access point for up to 8 devices.
Enabling Wi-Fi Direct (Simple AP) Mode

You can enable Wi-Fi Direct mode to allow direct communication between your product and computer, mobile devices, or other devices (up to 8) without a wireless router or access point.

**Note:** Make sure the Epson Smart Panel app or another compatible Epson printing app is installed on your mobile device before connecting to the product.

1. Press the home button, if necessary.

2. Press the icon.

   You see a screen like this:
3. Select **Wi-Fi Direct**.

4. Scroll down and select **Start Setup**.

   The product information is displayed on the LCD screen.

   ![Smartphone connect]

   Select the following printer in Epson Smart Panel.

   Model Name

   Device Name

   Other Methods Complete

5. Do one of the following:
   - Open the Epson Smart Panel app on your device and use the information on the LCD screen to select your product. Skip to step 7.
   - To connect without using the Epson Smart Panel app, select **Other Methods** and go to the next step.

6. Do one of the following:
   - For iOS devices, select **iOS**. Scan the QR code with the camera app on your device and follow the instructions on your device.
   - For other types of devices, select **Other OS Devices**. Use your device to select the Wi-Fi network name (SSID) displayed on the LCD screen, then enter the password shown.

7. Select **Complete** on the LCD screen.

   The blue ![Wi-Fi Direct icon] Wi-Fi Direct icon is displayed on the LCD screen and indicates if Wi-Fi Direct is enabled on the product.
Note: If the Wi-Fi Direct icon is displayed on the LCD screen, Wi-Fi Direct is not enabled. Repeat these steps to try again.

Wi-Fi Protected Setup (WPS)
If your network uses a WPS-enabled wireless router or access point, you can quickly connect your product to the network using Wi-Fi Protected Setup (WPS).

Note: To check if your router is WPS-enabled, look for a button labeled **WPS** on your router or access point. If there is no hardware button, there may be a virtual WPS button in the software for the device. Check your network product documentation for details.

Using WPS to Connect to a Network
Parent topic: Wi-Fi or Wired Networking

Using WPS to Connect to a Network
If you have a WPS-enabled wireless router or access point, you can use Wi-Fi Protected Setup (WPS) to connect your product to the network.

1. Press the home button, if necessary.
2. Select the **Wi-Fi** icon.
You see a screen like this:

3. Select **Wi-Fi (Recommended)**.
4. Select **Start Setup** or **Change Settings**.
5. Select **Push Button Setup (WPS)**.
6. Follow the instructions on the LCD screen to complete WPS setup.
   
   **Note:** Make sure you select **Start Setup** within two minutes of activating WPS on your router.

7. Press the home button to exit.

   You see the icon on the LCD screen and should be able to connect to your product directly from your computer or device, and then print. If you are printing from a computer, make sure you installed the network software as described on the *Start Here* sheet.

   **Note:** If you don’t see the icon, repeat these steps to try again.

**Parent topic:** [Wi-Fi Protected Setup (WPS)]
Printing a Network Status Sheet

You can print a network status sheet to help you determine the causes of any problems you may have using your product on a network.

1. Press the home button, if necessary.
4. Select Print.

Examine the settings shown on the network status sheet to diagnose any problems you have.

Selecting Wireless Network Settings from the Control Panel

Accessing the Web Config Utility

You can select your product's network settings and confirm its operating status using a web browser. You do this by accessing your product's built-in Web Config utility from a computer or other device that is connected to the same network as your product.
**Note:** You can also access the Web Config utility from the product information area in the Epson Smart Panel app.

1. Check your network status.
2. Note your product's IP address.
3. On a computer or other device connected to the same network as your product, open a web browser.
4. Enter your product's IP address into the address bar.

You see the available Web Config utility options.

**Parent topic:** Changing or Updating Network Connections

- Printing a Network Status Sheet

**Changing a USB Connection to a Wi-Fi Connection**

If you have already connected your product to your computer using a USB connection, you can change to a Wi-Fi connection.

1. Disconnect the USB cable from your product.
2. Uninstall your product software.
3. Download and install your product software from the Epson website using the instructions on the **Start Here** sheet.

**Parent topic:** Changing or Updating Network Connections

**Related concepts**

- Uninstall Your Product Software

**Changing a Wi-Fi Connection to a Wired Network Connection**

If you have already connected your product to your computer wirelessly, you can change to a wired network connection if necessary.

1. Disable your product's Wi-Fi features.
2. Connect one end of an Ethernet network cable to the product's **LAN** port.
3. Connect the other end to any available LAN port on your router or access point.
4. Uninstall your product software.
5. Download and install your product software from the Epson website.
6. Follow the on-screen instructions to install the software.
7. When you see the Select Your Connection screen, select **Wired network connection**.
8. If you see a Select Setup Option screen, select **Set up printer for the first time**.
9. Continue following the rest of the on-screen instructions.

**Parent topic:** Changing or Updating Network Connections

**Related concepts**

Uninstall Your Product Software

Disabling Wi-Fi Features

### Connecting to a New Wi-Fi Router

If you change the wireless router you have been using on your network, you need to update your product's Wi-Fi connection to the new router.

**Note:** If you switch to a 5 GHz wireless router, set the router to operate in dual band (2.4 GHz and 5 GHz) mode. If your router uses a single network name (SSID) for both the 2.4 GHz and 5 GHz band, give each band its own network name (SSID) instead, such as Home Network 2.4 GHz and Home Network 5 GHz. See your router documentation for instructions.

1. Do one of the following:
   - **Windows**: Uninstall your product software.
   - **Mac**: Go to the next step.
2. Download and install your product software from the Epson website using the instructions on the *Start Here* sheet.

**Parent topic:** Changing or Updating Network Connections

**Related concepts**

Uninstall Your Product Software

### Disabling Wi-Fi Features

You may need to disable your product's Wi-Fi features if you change your network connection type or need to solve a problem with your network connection.
**Note:** Before disabling Wi-Fi features, make a note of your product's SSID (network name) and password, and any network settings selected for the Epson Connect services you may use.

1. Press the home button, if necessary.
2. Press the icon.
   You see a screen like this:

3. Select **Wi-Fi (Recommended)**.
4. Select **Change Settings**.
5. Select **Others**.
6. Select **Disable Wi-Fi**.
7. Select **Start Setup** to disable Wi-Fi.

**Parent topic:** Changing or Updating Network Connections

**Related tasks**

- Printing a Network Status Sheet
Loading Paper

Before you print, load paper for the type of printing you will do.

Loading Paper in the Cassette
Paper Loading Capacity
Double-sided Printing Capacity
Compatible Epson Papers
Borderless Paper Type Compatibility
Selecting the Paper Settings - Control Panel
Paper or Media Type Settings - Printing Software
Selecting the Default Paper Source Settings
Selecting the Universal Print Settings

Loading Paper in the Cassette

You can load paper up to this size in the paper cassette: Legal (8.5 × 14 inches [216 × 356 mm]).

Note: Before loading paper, make sure your product is not currently printing, scanning, or copying.

1. Open the front cover.
2. Pull out the paper cassette until it stops.

3. Slide the edge guides outward.
4. Do one of the following:
   - Insert paper into the cassette with the glossy or printable side facedown and slide it in until it stops.

   ![Diagram showing paper insertion]

   **Note:** Make sure the paper is loaded against the rear of the cassette.

   - For legal-size paper, extend the legal paper guide and load paper using the guide line as shown.

   ![Diagram showing legal paper guide extension]
• Insert up to 10 envelopes with the printable side facedown and flap edge left, as shown.

• Load a sheet of loose-leaf or other paper with holes as shown.
Note: Do not select automatic 2-sided printing for this type of paper and do not print over the holes.

5. Slide the edge guides against the paper, but not too tightly.

Note: Make sure the paper fits under the tabs on the edge guides.

6. Slide the cassette back into the product until it stops and close the front cover.

7. Select the size and type of the paper you loaded on the product LCD screen and select OK.

Note: If you are printing on letterhead, make sure you select Letterhead as the paper type. Make sure you select the correct paper size setting.

8. Extend the output tray.
Note: Do not remove or insert the paper cassette during printing.

Always follow these paper loading guidelines:

• Load only the recommended number of sheets.
• Load paper short edge first and printable side facedown.
• Make sure the paper is under the tabs on the edge guides and not sticking out from the rear end of the cassette.
• Fan and align the edges of the paper before loading. Do not fan or curl photo paper. Doing so may damage the printable side.
• If the paper is curled, flatten it or curl it slightly in the opposite direction before loading. Printing on curled paper may cause paper jams and smears on the printout.
• Paper feed problems may occur frequently for manual 2-sided printing when printing on one side of pre-printed paper. Reduce the number of sheets to half or less, or load one sheet of paper at a time if paper jams continue.
• Make sure you are using long-grain paper. If you are not sure what type of paper you are using, check the paper packaging or contact the manufacturer to confirm the paper specifications.
• Fan and align the edges of envelopes before loading. If you have trouble loading a stack of envelopes, press each envelope flat before loading it or load one envelope at a time.
• If print quality declines when printing multiple envelopes, try loading one envelope at a time.
• Load letterhead or pre-printed paper top edge first.
• Check the paper package for any additional loading instructions.

Placing Originals on the Product

Follow the instructions here to place your original documents or photos on the product.

Caution: Do not place anything on top of your product or use its cover as a writing surface to avoid damaging it.

Placing Originals on the Scanner Glass
Placing Originals in the Automatic Document Feeder
ADF Original Document Specifications

Placing Originals on the Scanner Glass

You can place originals up to this size on the scanner glass: Letter (8.5 × 11 inches [216 × 279 mm]) or A4 (8.3 × 11.7 inches [210 × 297 mm]).

Note: To view animated instructions on how to place originals on the scanner glass, press the help button and select How To > Place Originals

Note: When originals are placed in the ADF and on the scanner glass, priority is given to the originals in the ADF.
1. Open the document cover.

Note: If there is any dust or dirt on the scanner glass, the scanning range may expand to include it, so the image of the original may be displaced or reduced. Remove any dust and dirt on the scanner glass before scanning.

2. Place your original facedown on the scanner glass with the top facing into the corner. Slide the original to the edges of the indicated corner.

Note: If you are using Epson ScanSmart to scan multiple photos at once, just make sure they are at least 0.2 inch (4.5 mm) away from the edge of the scanner glass and at least 0.8 inch (20 mm) away from each other.
Note: The edges of your original may be cropped by 0.06 inch (1.5 mm) from the edge of the scanner glass. Manually position your original away from the edges to prevent cropping.

Note: When placing bulky originals such as books, prevent exterior light from shining directly onto the scanner glass.

3. Close the document cover gently to keep your original in place.

Caution: Do not push down on the document cover or scanner glass or you may damage the product.

Warning: Be careful not to trap your fingers when closing the document cover or you may be injured.

Remove your originals after scanning. If you leave the originals on the scanner glass for a long time, they may stick to the glass surface.

Placing Originals in the Automatic Document Feeder

You can place single- or multi-page original documents in the Automatic Document Feeder (ADF). Make sure the originals meet the Automatic Document Feeder specifications before loading them.

Caution: Make sure your originals are not creased or folded, and do not contain holes, staples, tape, or other materials that could obstruct the feeder.

Caution: Do not place photographs or valuable artwork in the ADF. Place fragile or valuable originals on the scanner glass to avoid wrinkling or damaging them.

Note: To view animated instructions on how to place originals on the scanner glass, press the ☰ help button and select How To > Place Originals > ADF

Note: When originals are placed in the ADF and on the scanner glass, priority is given to the originals in the ADF.
1. Open the ADF document support and slide out the ADF output tray extension.

2. Slide the ADF edge guide outward.

3. Fan your stack of originals and tap them gently on a flat surface to even the edges.
4. Insert the originals into the ADF faceup and short edge first.

   ![Machine with ADF]

   **Note:** Do not load originals above the arrow mark on the ADF edge guide.

   ![Arrow mark on ADF edge guide]

   The **ADF** icon on the Copy, Scan, and Fax screens lights up.

5. Slide the ADF edge guide against the originals, but not too tightly.

   **Note:** Do not add originals while scanning.

Caution: Do not load the following types of originals in the ADF, or they may be damaged or may damage the scanner. Use the scanner glass for these types of originals:

- Photos
- Thermal paper
- Fabric or other non-paper originals
- Originals with uneven surfaces, such as embossed documents
- Originals containing staples or paper clips
- Originals with carbon paper backing
- Originals with wet ink
- Originals that are bound
- Originals with labels, stickers, or sticky notes
- Ripped, curled, folded, deteriorated, or wrinkled originals
- Originals with holes
- Transparencies
- Carbon-less paper
- Originals that are cut in an irregular shape or with corners that are not right angles

Printing from a Computer

Before printing from your computer, make sure you have set up your product and installed its software as described on the Start Here sheet.

**Note:** If you have an Internet connection, it is a good idea to check for updates to your product software on Epson's support website. If you see a Software Update screen, select **Enable automatic checking** and click OK. The update scans your system to see if you have the latest product software. Follow the on-screen instructions.

Printing with Windows

Printing with the Built-in Epson Driver - Windows 10 S
Printing on a Mac
Printing from a Smartphone or Tablet
Printing with Epson Photo+
Cancelling Printing From the LCD Screen

Printing with Windows

You can print with your product using any Windows application, as described in these sections.

**Note:** If you are using your Epson product with the Windows 10 S operating system, you cannot use the software described in this section. You also cannot download and install any Epson product software from the Epson website for use with Windows 10 S; you must obtain software only from the Windows Store.

Selecting Basic Print Settings - Windows
Selecting Double-sided Printing Settings - Windows
Selecting Additional Layout and Print Options - Windows
Selecting a Printing Preset - Windows
Selecting Extended Settings - Windows
Printing Your Document or Photo - Windows
Checking Print Status - Windows
Locking Printer Settings - Windows
Selecting Default Print Settings - Windows
Changing Automatic Update Options
Selecting Basic Print Settings - Windows

Select the basic settings for the document or photo you want to print.

1. Open a photo or document for printing.
2. Select the print command in your application.

   **Note:** You may need to select a print icon on your screen, the **Print** option in the File menu, or another command. See your application’s help utility for details.

3. If necessary, select your product name as the printer you want to use.

   **Note:** You may also need to select **Properties** or **Preferences** to view your print settings.

You see the Main tab of your printer settings window:
4. Select the size of the paper you loaded as the Document Size setting.
   
   **Note:** You can also select the User-Defined setting to create a custom paper size, but you cannot use the Borderless setting and the Quality setting will be set to Standard.

5. If you are printing a borderless photo, select Borderless. You can click Settings to access additional options for borderless printing.

   **Note:** You must select a compatible borderless paper type and size to print without borders. Check the borderless paper compatibility list for details.

6. Select the orientation of your document.

   **Note:** If you are printing an envelope, select Landscape.

7. Select the type of paper you loaded as the Paper Type setting.

   **Note:** The setting may not exactly match the name of your paper. Check the paper type settings list for details.

8. Select the Quality setting that matches the print quality you want to use.

9. Select a Color option:

   • To print a color document or photo, select the Color setting.
   
   • To print text and graphics in black or shades of gray, select the Black/Grayscale setting.

10. To print on both sides of the paper, select the 2-Sided Printing setting and select the options you want.

11. To print multiple pages on one sheet of paper, or print one image on multiple sheets of paper, select one of the settings in the Multi-Page menu and select the printing options you want.

12. To print multiple copies and arrange their print order, select the Copies options.

13. To preview your job before printing, select Print Preview.

14. To save your print job as a project that can be modified and combined with other print jobs, select Job Arranger Lite.
15. To reduce noise during printing when you select Plain Paper/Bright White Paper, select On in the Quiet Mode menu.

**Note:** Enabling Quiet Mode may reduce printing speed.

**Print Quality Options - Windows**

You can select any of the available Quality options to fine-tune the quality of your print. Some settings may be unavailable, depending on the paper type and border setting you have chosen.

**Draft**
For draft printing on plain paper.

**Draft - Vivid**
For draft printing on plain paper with good quality and print speed.

**Standard**
For everyday text and image printing.

**Standard - Vivid**
For text and graphics with good quality and print speed.

**High**
For photos and graphics with high print quality.

**More Settings**
Opens a window that lets you choose among levels of speed and quality.

**Multi-Page Printing Options - Windows**

You can select any of the available options in the Multi-Page menu to set up your multi-page print job.
2-Up, 4-Up, 6-Up, 8-Up, 9-Up, and 16-Up
Prints several pages on one sheet of paper. Click the Layout Order button to select page layout and border options.

2×1 Poster, 2×2 Poster, 3×3 Poster, 4×4 Poster
Prints one image on multiple sheets of paper to create a larger poster. Click the Settings button to select image layout and guideline options.

Parent topic: Selecting Basic Print Settings - Windows

Selecting Double-sided Printing Settings - Windows
You can print on both sides of the paper by selecting one of the 2-Sided Printing options on the Main tab.

Note: Some options may be pre-selected or unavailable, depending on other settings you have chosen or if you are accessing the product over a network.

1. Select one of the following options for 2-Sided Printing:
   • **Auto (Long-edge binding)** to print your double-sided print job by automatically flipping the paper on the long edge.
   • **Auto (Short-edge binding)** to print your double-sided print job by automatically flipping the paper on the short edge.
   • **Manual (Long-edge binding)** to print your double-sided print job by printing one side and prompting you to flip the paper over on the long edge to print the other side (recommended for paper types that do not support automatic duplexing).
   • **Manual (Short-edge binding)** to print your double-sided print job by printing one side and prompting you to flip the paper over on the short edge to print the other side (recommended for paper types that do not support automatic duplexing).

2. Click the Settings button.
You see this window:

3. Select the double-sided printing options you want to use.
4. Click OK to return to the Main tab.
5. Click the **Print Density** button.

You see this window:

![Print Density Adjustment dialog box](image)

6. Select the type of document you are printing as the Document Type setting. The software automatically sets the Adjustments options for that document type.

7. If necessary, select the Adjustments options you want to use.

8. Click **OK** to return to the Main tab.

9. Print a test copy of your double-sided document to test the selected settings.

10. Follow any instructions displayed on the screen during printing.

Print Density Adjustments - Windows
You can select any of the available options on the Print Density Adjustment window to adjust the print quality of your double-sided print job.

Print Density
Sets the level of ink coverage for double-sided printing.

Increase Ink Drying Time
Sets the amount of time required for drying ink after printing on one side of the paper before printing the other side in double-sided printing to prevent ink smearing.

Parent topic: Selecting Double-sided Printing Settings - Windows
Selecting Additional Layout and Print Options - Windows

You can select a variety of additional layout and printing options for your document or photo on the More Options tab.

1. To change the size of your printed document or photo, select the Reduce/Enlarge Document checkbox and select one of these sizing options:
   - Select the Fit to Page option to size your image to fit the paper you loaded. Select the size of your document or photo as the Document Size setting, and the size of your paper as the Output Paper setting. If you want to center your image on the paper, select the Center option.
   - Select the Zoom to option to reduce or enlarge your document or photo by a specific percentage. Select the percentage in the % menu.

2. Select one of the following Color Correction options:
   - Select Automatic to automatically adjust the sharpness, brightness, contrast, and color saturation for your image.
• Select **Custom** and click the **Advanced** button to manually adjust the color correction settings or turn off color management in your printer software.

• Select **Image Options** to access additional settings for improving printed images.

  **Note:** You can also select **Color Universal Print** settings.

3. To add the following features, click the **Watermark Features** button:

• **Anti-Copy Pattern**: adds a watermark that only appears when your printout is copied

  **Note:** This setting is not available for all types of printing. Click the **Add/Delete** button to create your own pattern, and click the **Settings** button to customize the pattern.

• **Watermark**: adds a visible watermark to your printout

  **Note:** Click the **Add/Delete** button to create your own watermark, and click the **Settings** button to customize the watermark.

• **Header/Footer**: adds information such as the date and time to the top or bottom of your printout

  **Note:** Click the **Settings** button to customize the text and location of the header or footer.

4. Select any of the Additional Settings options to customize your print.

Image Options and Additional Settings - Windows

You can select any of the Image Options and Additional Settings to customize your print. Some options may be pre-selected or unavailable, depending on other settings you have chosen.

Image Options

Emphasize Text
Adjusts the weight of printed text to increase readability.

Emphasize Thin Lines
Adjusts the weight of printed lines to increase visibility.

Edge Smoothing
Smoothes jagged edges in low-resolution images such as screen captures or images from the Web.

Fix Red-Eye
Reduces or removes red-eye in photos.

Print Text in Black
Prints colored text in black.

For Color Text
Prints colored text on a background pattern or underlined.

For Color Graphs and Images
Prints colored graphics and images with overlay patterns.

For Color Text, Graphs, and Images
Prints colored text, graphics, and images with overlay patterns.

Enhancement Options
Specifies Color Universal Print enhancement settings for text, graphics, and images.

Additional Settings Options

Rotate 180°
Prints the image rotated 180° from its original orientation.
Bidirectional Printing
Prints in both directions (right-to-left and left-to-right), speeding up printing, but may reduce print quality.

Mirror Image
Flips the printed image left to right.

Parent topic: Selecting Additional Layout and Print Options - Windows

Header/Footer Settings - Windows
You can select any of the Header/Footer Settings options to add headers or footers when you print. The items are available to print at the top or bottom of your pages, in either the left, right, or center of the page.

Note: These settings are not saved with your document.
You can select to print the following information:
- User Name
- Computer Name
- Date
- Date/Time
- Document Name
- Collate Number (copy number)
- Page Number
- Text

You can also adjust the text settings for the printed information.

**Note:** The user name, computer name, date, and time come from the Windows Control Panel on your computer.

1. Access the Windows Desktop and right-click the icon for your product in the right side of the Windows taskbar, or click the up arrow and right-click .
2. Select **Printer Settings**.
3. Click the **Maintenance** tab.
   
   You see the maintenance options:

   ![Maintenance Options](image.png)

   4. Click the **Extended Settings** button.
You see this window:

5. Select any of the extended settings to customize your print.
6. Click OK to close the Extended Settings window.
7. Click OK to close the printer software window.

Extended Settings - Windows

Parent topic: Printing with Windows

Extended Settings - Windows

You can select these settings on the Extended Settings window.

Enable EPSON Status Monitor 3
Enables product monitoring for ink and paper supplies and other issues.

Check Paper Width Before Printing
Prevents printing beyond the edges of the paper if the paper size setting is incorrect; may reduce print speed.

Short Grain Paper
Prevents ink from smearing when you print on envelopes or other thick paper.

Separator Page
Before each document, prints a separator page containing the title, user, date, and time.
Remove white borders
Removes white margins that may appear when you print borderless photos.

Always Spool RAW Datatype
Increases print speed and may solve other printing problems.

Page Rendering Mode
Increases print speed when printing is extremely slow or the print head stops during printing.

Print as Bitmap
Increases print speed when printing is extremely slow or the print head stops during printing, and other settings do not help.

Skip Blank Page
Ensures that your product does not print pages that contain no text or images.

Change Standard Resolution
Reduces the resolution of print data to correct printing problems.

Refine screening pattern
Prints graphics with a finer screening pattern.

Allow Applications to Perform ICM Color Matching
Allows applications to perform ICM color matching.

Always Use the Driver's Paper Source Setting
Prints using the paper source setting in the printer driver, rather than the setting in your application.

Output 1 page documents facedown in 2-Sided mode
Outputs single-sided pages in a 2-sided print job facedown instead of faceup.

Output documents for filing
Outputs all landscape, portrait, 1-sided, and 2-sided documents in the same orientation for easier filing.

Barcode mode
Reduces bleeding when printing barcodes on plain paper, letterhead paper, recycled paper, preprinted paper, envelopes, and thick paper.

Reduce Print Data Size
Increases print data compression to improve print speed. Not recommended when printing fine patterns.

Use a Mixture of Color Inks to Create Black
Mixes color inks to create composite black when printing at standard quality on plain paper or envelopes.

Selecting Default Print Settings - Windows

When you change your print settings in a program, the changes apply only while you are printing in that program session. If you want to change the print settings you use in all your Windows programs, you can select new default print settings.

1. Access the Windows Desktop and right-click the icon for your product in the right side of the Windows taskbar, or click the up arrow and right-click.
2. Select Printer Settings.
   You see the printer settings window:

   ![Printer Settings Window]

3. Select the print settings you want to use as defaults in all your Windows programs.
4. Click OK.
   These settings are now the defaults selected for printing. You can still change them as needed for printing in any program session.
Changing the Language of the Printer Software Screens

Parent topic: Printing with Windows

Changing the Language of the Printer Software Screens

You can change the language used on the Windows printer software screens.

1. Access the Windows Desktop and right-click the icon for your product in the right side of the Windows taskbar, or click the up arrow and right-click .

2. Select Printer Settings.
   You see the printer settings window.

3. Click the Maintenance tab.
   You see the maintenance options:

4. Select the language you want to use as the Language setting.
5. Click **OK** to close the printer software window.

The printer software screens appear in the language you selected the next time you access them.

**Parent topic:** Selecting Default Print Settings - Windows

### Changing Automatic Update Options

Your printer software for Windows automatically checks for updates to the product software. You can change how often the software checks for updates or disable this feature.

1. Access the Windows Desktop and right-click the icon for your product in the right side of the Windows taskbar, or click the up arrow and right-click.

2. Select **Software Update Settings**.

You see this window:

![Software Update Settings window](image)

3. Do one of the following:
   - To change how often the software checks for updates, select a setting in the **Check every** menu.
   - To disable the automatic update feature, select the **Never** option.

4. Click **OK** to exit.

**Note:** If you choose to disable the automatic update feature, you can check for updates manually.

Selecting Print Settings - Windows 10 S
Select the settings for your print job in your Windows 10 S application.

1. Open a photo or document for printing.
2. Select the print command in your application.
   
   Note: You may need to select a print icon on your screen, the Print option in the File menu, or another command. See your application’s help utility for details.
3. If necessary, select your product name as the printer you want to use.
   
   Note: You may also need to select Properties or Preferences to view your print settings.
You see a window like this:

![Print settings window](image)

4. Select the type of paper you loaded as the **Media** setting.

   **Note:** The setting may not exactly match the name of your paper. Check the paper type settings list for details.

5. Click the **Advanced** button.
You see a window like this:

6. Select the size of the paper you loaded as the **Paper Size** setting.
7. To print multiple copies, select or enter the number as the **Copy Count** setting.
8. To print multiple copies of multi-page documents in sets, select the **Collated** checkbox.
9. Click **OK**.

   You return to the printing preferences window.
10. Select the **Layout** tab.

![Layout tab in printing preferences]

11. Select the orientation of your document as the **Orientation** setting.
12. To print double-sided, select one of the **Print on Both Sides** options, depending on how you want to orient the page layout. The icon next to each option shows the layout.

![Print on Both Sides options]

13. Click **OK** to save your settings.
   
   You see your application's **Print** window.

14. Click **OK** or **Print** to start printing.

**Parent topic:** Printing with the Built-in Epson Driver - Windows 10 S

## Printing on a Mac

You can print with your product using any Mac printing program, as described in these sections.

**Note:** If you have an Internet connection, it is a good idea to check for updates to your product software on Epson’s support website or using Epson Software Updater.

- [Selecting Basic Print Settings - Mac](#)
- [Selecting Page Setup Settings - Mac](#)
Selecting Basic Print Settings - Mac

Select the basic settings for the document or photo you want to print.

1. Open a photo or document for printing.
2. Select the print command in your application.

**Note:** You may need to select a print icon on your screen, the **Print** option in the File menu, or another command. See your application's help utility for details.

3. Select your product as the **Printer** setting.

4. If necessary, click the **Show Details** button to expand the print window.
You see the expanded printer settings window for your product:

![Printer Settings Window]

**Note:** The print window may look different, depending on the Mac OS version and the application you are using.

5. Select the **Copies** and **Pages** settings as necessary.

**Note:** If you do not see these settings in the print window, check for them in your application before printing.
6. Select the page setup options: **Paper Size** and **Orientation**.

   **Note:** If you do not see these settings in the print window, check for them in your application before printing. They may be accessible by selecting **Page Setup** from the File menu.

   **Note:** Paper sizes may include additional options such as **Borderless**.

7. Select any application-specific settings that appear on the screen, such as those shown in the image above for the Preview application.

8. Select **Print Settings** or **Printer Features** from the pop-up menu.

You see these settings:

**Note:** The available print settings and appearance of the print window may be different than those covered here, depending on the Mac OS version and the application you are using.
9. Select the type of paper you loaded as the Media Type setting.

   Note: The setting may not exactly match the name of your paper. Check the paper type settings list for details.

10. Select the Print Quality setting you want to use.

11. Select the Borderless checkbox if you want to print a borderless photo. If the option is grayed out, change the Media Type setting to a paper type that supports borderless printing.

12. Select any of the available print options.

**Color Matching and Color Options - Mac**

**Parent topic:** Printing on a Mac

**Color Matching and Color Options - Mac**

You can select these settings on the **Color Matching** and **Color Options** menus.

**Color Matching Settings**

**EPSON Color Controls**

Lets you manage color using controls in your printer driver or turn off color management.

**ColorSync**

Prints using standard color profiles for your product and paper to help match image colors. You can customize the conversion method and filter settings on the ColorSync pop-up menu in the print window.
Color Options Settings

Manual Settings
Let you select manual color adjustments. Click the arrow next to Advanced Settings and select settings for Brightness, Contrast, Saturation, and individual color tones. You can also select a color Mode setting for printing photos and graphics and the Fix Red-Eye setting to reduce or remove red-eye in photos. Depending on the selected color mode, you can also adjust the midtone density using the Gamma setting.

Fix Photo
Improves the color, contrast, and sharpness of flawed photos. Click the arrow next to Advanced Settings and select the Fix Red-Eye setting to reduce or remove red-eye in photos.

Note: Fix Photo uses a sophisticated face recognition technology to optimize photos that include faces. For this to work, both eyes and the nose must be visible in the subject's face. If your photo includes a face with an intentional color cast, such as a statue, you may want to turn off Fix Photo to retain the special color effects.

Off (No Color Adjustment)
Turns off color management in your printer software so you can manage color using only your application software.

Note: An ICC profile is required if color management is turned off.

Parent topic: Managing Color - Mac

Selecting Printing Preferences - Mac
You can select printing preferences that apply to all the print jobs you send to your product.

1. In the Apple menu or the Dock, select System Preferences.
2. Select Print & Fax, Print & Scan, or Printers & Scanners, select your product, and select Options & Supplies.
3. Select Driver or Options.
You see a screen like this:

4. Select any of the available printing preferences.
5. Click **OK**.

**Printing Preferences - Mac**

**Parent topic:** Printing on a Mac

**Printing Preferences - Mac**

You can select these settings on the **Options** or **Driver** tab.

**Skip Blank Page**

Ensures that your product does not print pages that contain no text or images.

**Quiet Mode**

Lessens noise during printing but may decrease print speed.

**Bidirectional printing**

Prints in both directions (right-to-left and left-to-right), speeding up printing, but may reduce print quality.
**Output documents for filing**
Outputs all landscape, portrait, 1-sided, and 2-sided documents in the same orientation for easier filing.

**Remove white borders**
Removes white margins that may appear when you print borderless photos.

**Warning Notifications**
Lets you choose whether or not to receive warning notifications from the printer software for various operating conditions.

**Establish bidirectional communication**
Allows the product to communicate with the computer. Do not change the default setting unless you experience issues when using a shared printing pool.

**Reduce Print Data Size**
Increases print data compression to improve print speed. Not recommended when printing fine patterns.

---

**Printing Your Document or Photo - Mac**

Once you have selected your print settings, you are ready to print.

Click **Print** at the bottom of the print window.
Checking Print Status - Mac

During printing, you can view the progress of your print job, control printing, and check ink status.

1. Click the printer icon when it appears in the Dock.
   You see the print status window:

2. Select the following options as necessary for your Mac OS version:
   - To cancel printing, click the print job and click Delete.
   - To pause a print job, click the print job and click Hold. To resume a print job, click the paused print job and click Resume.
   - To pause printing for all queued print jobs, click Pause or Pause Printer.
   - To display other printer information, click Settings or Supply Levels.
Parent topic: Printing Your Document or Photo - Mac

Printing from a Smartphone or Tablet

You can print from a smartphone or tablet running iOS or Android using the Epson Smart Panel app.

**Note:** Your device must be connected to the same wireless network as your Epson product, and Epson Smart Panel must be configured for use with your product.

1. Download the Epson Smart Panel app from your device's app store or from Epson's website. See the link below.
2. Open the Epson Smart Panel app and select a print menu on the home screen.
3. Follow the on-screen instructions to begin printing.

Printing with Epson Photo+

You can print photos, CD/DVD labels, and more using a variety of layouts and templates with Epson Photo+. Features include image corrections and adjustments, and adding text and stamps to photos. We recommend printing on genuine Epson photo paper for the best results. Make sure you have set up your product as described on the *Start Here* sheet and installed the Epson Photo+ software. See the Epson Photo+ help utility for more information.

**Note:** If you are using your Epson product with the Windows 10 S operating system, you cannot use Epson Photo+. You also cannot download and install any Epson product software from the Epson website for use with Windows 10 S; you must obtain software only from the Windows Store.

Starting a Scan Using the Product Control Panel

You can scan an image to a variety of destinations using your product's control panel.

1. Make sure you installed the product software and connected the product to your computer or network.

   Note: Restart your computer after installing the product software to enable scanning from the control panel.

2. Place your original on the product for scanning.

3. Press the  home button, if necessary.
4. Select **Scan**.

5. Select one of the following **Scan to** options:
   - **Computer** lets you scan to a connected computer using your saved scan settings.
   - **Cloud** sends your scanned files to a destination that you have registered with Epson Connect.
   - **WSD** lets you manage network scanning in Windows 10, Windows 8.x, Windows 7, or Windows Vista (English only). To use this feature, you must first set up a WSD (Web Services for Devices) port on your Windows 7 or Windows Vista computer (the port is set up automatically on Windows 10 and Windows 8.x).

6. Follow the instructions in the links below to complete your scan.
   - Scanning to a Connected Computer
   - Scanning to the Cloud
   - Setting Up a WSD Port (Windows 7/Windows Vista)

Placing Originals on the Product

Scanning to a Connected Computer

You can scan an original and save it to a connected computer using your product’s control panel. The computer must be connected using a USB cable or connected to the same network as your product. You can save the scanned file as a JPEG or PDF file. You can also set up custom scan settings using Event Manager and automatically scan using those settings on your product control panel.

**Note:** Be sure you have installed Epson ScanSmart, Epson Scan 2, and Event Manager on your computer before scanning to your computer.

1. Place your original on the product for scanning.
2. Press the home button, if necessary.
3. Select **Scan**.
4. Select **Computer**.

You see a screen like this:

![Scan to Computer screen](image)

**Note:** Select **OK** to close the information screen, if necessary.
5. Select **Select a computer** and choose one of the following options:
   - If your computer is connected to your product over a network, select a connected computer from the displayed list. (If the computer is not listed, select **Search Again**.)
   - If you computer is connected to your product using a USB cable, select **USB Connection**.

6. Select **Preview on Computer** and choose one of the following options:
   - **Preview on Computer** to preview the scanned image on a computer before saving. (Windows 7 or later or OS X 10.11.x or later)
   - **Save as JPEG** to save the scanned scanned image as a JPEG file.
   - **Save as PDF** to save the scanned document or image as a PDF file.

7. Select **Send** to start scanning.

**Setting Up a WSD Port (Windows 7/Windows Vista)**

You can scan to a networked Windows computer using WSD (Web Services for Devices). You must first set up a WSD port on your Windows 7 or Windows Vista system (the port is set up automatically on Windows 10 and Windows 8.x).
Before you set up a WSD port, make sure you installed your product software, and connected your product and computer to the same network.

1. Turn on your product.
2. Print a network status sheet so you can identify the network name and model name for your product on the network.
3. Click or Start and select Computer.
4. On the left side of the window, select Network.
5. Locate your product on the Network screen, right-click it, and select Install.
6. When you see the User Account Control screen, click Continue.

   **Note:** If you see an Uninstall screen, click Uninstall and repeat these steps as necessary.

7. When you see the message *Your device is ready to use* in the Windows taskbar, click the message.
8. On the Driver Software Installation screen, make sure your product is listed as *Ready to use*. Then click Close.
9. Do one of the following:
   - **Windows 7:** Click and select Devices and Printers.
   - **Windows Vista:** Click Start and select Control Panel > Hardware and Sound > Printers.
10. Make sure that an icon appears for your product's name on the network.

When you use WSD, select your product name to scan over the network.

### Changing Default Scan Job Settings

You can view or change the default scan job settings your product uses when you scan to your computer. You do this using the Event Manager program.

1. Do one of the following to open Event Manager:
   - **Windows 10:** Click 📗 and select **Epson Software > Event Manager**.
   - **Windows 8.x:** Navigate to the **Apps** screen and select **Event Manager**.
   - **Windows (other versions):** Click 📗 or **Start > All Programs** or **Programs > Epson Software > Event Manager**.
• Mac: Open the Applications folder, click Epson Software, and select Event Manager.

2. Open the Scanner (Windows) or Select Scanner (Mac) drop-down list and select your product, if necessary.

3. Click Make Job Settings.

4. Open the Edit Job Settings drop-down list and select the scan job settings you want to view or change.

5. Change the settings as necessary.

   Note: If you create a new job, you can only assign it to the Custom Action setting. You can change the settings of the other assigned jobs, but you cannot rename them or select a different job.

6. Click OK.

7. Click Close to close the Event Manager window.

Starting a Scan Using Epson ScanSmart

You can start the Epson ScanSmart program to scan originals and easily review and edit scanned images. After that, you can save, print, or share them.

• Windows 10: Click ☐ > Epson Software > Epson ScanSmart.

• Windows 8.x: Navigate to the Apps screen and select Epson ScanSmart.

• Windows (other versions): Click 📑 or Start, and select All Programs or Programs. Select Epson Software > Epson ScanSmart.

• Mac: Open the Applications folder, open the Epson Software folder, and select Epson ScanSmart.
You see a screen like this:

![Epson ScanSmart window](image)

Parent topic: Starting a Scan

## Starting a Scan Using the Epson Scan 2 Icon

You can start the Epson Scan 2 program to select scan settings, scan, and save the scanned image to a file.

**Note**: If you are using your Epson product with the Windows 10 S operating system, you cannot use the software described in this section. You also cannot download and install any Epson product software from the Epson website for use with Windows 10 S; you must obtain software only from the Windows Store.

- **Windows 10**: Click **Start** and select **EPSON > Epson Scan 2**.
- **Windows 8.x**: Navigate to the **Apps** screen and select **Epson Scan 2**.
- **Windows (other versions)**: Click **Start** or **Programs** and select **All Programs** or **Programs**. Select **EPSON > Epson Scan 2 > Epson Scan 2**.
• **Mac**: Open the Applications folder, open the **Epson Software** folder, and select **Epson Scan 2**. You see an Epson Scan 2 window like this:
Starting a Scan from a Scanning Program

You can start Epson Scan 2 from a TWAIN-compliant scanning program to select scan settings, scan, and open the scanned image in the program.

Note: If you are using your Epson product with the Windows 10 S operating system, you cannot use the software described in this section. You also cannot download and install any Epson product software from the Epson website for use with Windows 10 S; you must obtain software only from the Windows Store.

1. Open your scanning program and select its scanning option. (See your scanning program help for instructions.)

2. Select your product.

Note: In certain programs, you may need to select your product as the "source" first. If you see a Select Source option, choose it and select your product. With Windows, do not select a WIA option for your product; not all scan functions will be available.
You see an Epson Scan 2 window like this:
Starting a Scan from a Smartphone or Tablet

You can use the Epson Smart Panel app to scan from a network scanner to an iOS or Android device over a direct Wi-Fi connection.

1. Download the Epson Smart Panel app from your device's app store or from Epson's website. See the link below.
2. Place your original on the product for scanning.
3. Open the Epson Smart Panel app and select a scan menu on the home screen.
4. Follow the on-screen instructions to scan and save your original.

Scanning a Document in Epson ScanSmart

You can scan and review documents and photos in Epson ScanSmart.

Note: The images in this guide show Windows screens. Mac screens may be slightly different. Depending on your product model and software version, not all options may be available.

1. Load your original into the product.
2. Open Epson ScanSmart on your computer. Do one of the following:
   - **Windows 10**: Click > Epson Software > Epson ScanSmart.
   - **Windows 8.x**: Navigate to the Apps screen and select Epson ScanSmart.
   - **Windows (other versions)**: Click or Start, and select All Programs or Programs. Select Epson Software > Epson ScanSmart.
   - **Mac**: Open the Applications folder, open the Epson Software folder, and select Epson ScanSmart.
You see a screen like this:

3. Select an option for the Scan area setting, if necessary.

   **Note:** The Scan area setting limits the scan area to a selected size starting at the placement arrow on the scanner bed. It does not scale the image to the selected size.

4. Select **SCAN**.
The original is scanned. When scanning is complete, you see a screen like this:

5. You can review, edit, or reorder the scanned images as follows:
   • Select + Scan to scan more originals.
   • Select Delete to delete selected scanned images.
   • Select Rotate Right to rotate each scanned image.
   • Select Crop to crop the selected image.
   • Control-click two images, select Stitch Images, and follow the on-screen instructions to combine them into a single image.

6. If Photo Mode is automatically detected, the following enhancement options are available:
   • Auto Color Enhancement: automatically adjusts the brightness, contrast, and saturation of your photos
   • Restore Faded Colors: restores the colors in faded photos automatically
   • Remove Red Eye: automatically removes the red-eye effect from your photos
   • Auto Cropping: automatically crops the scanned image edges

7. When you finish reviewing and editing the scanned images, click Next.
You see a screen like this:

8. Select an option to save, send, or print the scanned images. See the links below.
   
   **Saving a Scan**
   
   **Attaching a Scan to Email**
   
   **Sending a Scan to a Cloud Service**
   
   **Printing a Scan**
   
   **Parent topic:** Scanning

**Saving a Scan**

You can save a scanned image to your computer in a variety of formats.

1. Make sure your originals are scanned and reviewed. See the link below.
2. In the **Select Action** window, click **Save**.
You see a screen like this:

3. Change the settings as follows:
   - The document type and scan date for the file name are automatically detected. You can change them as necessary.
   - You can save the scanned image in a variety of formats. If you select Searchable PDF as the **File type** setting, you can select the OCR (Optical Character Recognition) language.
   - Select the folder on your computer in which to save the file.
4. Click **Save**.

**Parent topic:** Scanning a Document in Epson ScanSmart

**Attaching a Scan to Email**

You can attach a scanned image to an email as a file attachment.

**Note:** Your email app and account settings should be configured before scanning. You must install a MAPI-type email program such as Outlook Express, Windows Live Mail, Entourage, or Mac Mail. Attach to Email only supports 32-bit MAPI-compatible mail apps. Web-based email services such as Gmail are not supported. If you see an error message, your email app may not be compatible and you will need to save the scans and manually attach the file to an email.

1. Make sure your originals are scanned and reviewed. See the link below.
2. In the **Select Action** window, click **Attach to Email**.
   You see a screen like this:

![Attach to Email Settings](image)

3. Change the settings as follows:
   - The document type and scan date for the file name are automatically detected. You can change
     them as necessary.
   - You can save the scanned image in a variety of formats. If you select Searchable PDF as the **File
type** setting, you can select the OCR (Optical Character Recognition) language.
   - If you also want to save a copy of the scanned image to your computer, make sure the checkbox
     is selected and select the folder on your computer in which to save the file.

4. Click **Attach to E-mail**.
   Your email program opens with the file attached to a new email.

**Parent topic:** Scanning a Document in Epson ScanSmart

### Sending a Scan to a Cloud Service

You can upload scanned images to a cloud service.

1. Make sure your originals are scanned and reviewed. See the link below.
2. In the **Select Action** window, click one of the cloud service send options.
You see a screen like this:

![Epson ScanSmart Send to Google Drive Settings](image)

You can print your scanned image and save the scanned file to your computer.

3. Log in to your account.

   **Note:** You may need to allow Epson ScanSmart access to your account. The first time you log in, you may be prompted to enter an authentication code.

4. Change the settings as follows:
   - Select the folder in your account where you want to send the document.
   - The document type and scan date for the file name are automatically detected. You can change them as necessary.
   - You can save the scanned image in a variety of formats. If you select Searchable PDF as the **File type** setting, you can select the OCR (Optical Character Recognition) language.
   - If you also want to save a copy of the scanned image to your computer, click the checkbox.

5. Click **Send**.

   **Parent topic:** Scanning a Document in Epson ScanSmart

**Printing a Scan**

You can print your scanned image and save the scanned file to your computer.
**Note:** Printing scanned images is available only with Epson printers. If you do not have an Epson printer, save the file and print it from an application that can open the file.

1. Make sure your originals are scanned and reviewed. See the link below.
2. In the **Select Action** window, click **Print**.
   
   You see a screen like this:

   ![Print Settings window]

3. Change the settings as follows:
   
   - Select the Epson printer and change the print settings, if necessary.
   - Select the number of copies you want to print.
   - If you also want to save a copy of the scanned image to your computer, click the checkbox.
   - The document type and scan date for the file name are automatically detected. You can change them as necessary.
   - You can save the scanned image in a variety of formats. If you select Searchable PDF as the **File type** setting, you can select the OCR (Optical Character Recognition) language.
   - Select the folder on your computer in which to save the file.

4. Click **Print**.

3. Choose which action icons to display by selecting or deselecting each checkbox. Click the arrow icons to move the icons up or down in the display order you want.

4. Click Close.

Parent topic: Selecting Epson ScanSmart Settings

### Scanning in Epson Scan 2

Epson Scan 2 gives you access to basic and advanced scanning features. You can scan your document and save the scanned image in various file formats in your operating system's Documents or My Documents folder, or open it in your scanning program. You can preview the scanned image and select or change settings as necessary.

**Note:** If you are using your Epson product with the Windows 10 S operating system, you cannot use the software described in this section. You also cannot download and install any Epson product software from the Epson website for use with Windows 10 S; you must obtain software only from the Windows Store.

1. Start Epson Scan 2.
You see this window:
2. Select the **Mode** setting that matches the type of original you are scanning.

3. Select the **Document Source** setting that matches where you placed your original, or select **Auto Detect** to have Epson Scan 2 automatically detect the source.

4. Select the **Document Size** setting that matches the size of your original. You can select **Customize** to enter a custom size, if necessary.

5. Select the image type of your original and how you want it scanned as the **Image Type** setting.

6. Select the **Resolution** setting you want to use for your scan.

7. Select the **Rotate** setting to rotate the scanned image.

8. Select the **Correct Document Skew** setting to correct skewed originals, image contents, or both.

9. Click the **Preview** button.

   Epson Scan 2 previews your original and displays the results in the Epson Scan 2 window.

10. Reinsert your original into the ADF, if necessary.

11. Select any of the additional settings that you want to use on the Main Settings tab.

12. Click the **Advanced Settings** tab and select any settings that you want to use.

13. Select the format in which you want to save your scanned file as the **Image Format** setting. If necessary, select **Options** and select any desired format options.
14. Enter the file name for your scanned file in the **File Name** field. If necessary, select **Settings** to modify the file name settings.

15. Select the location in which you want to save your scanned file as the **Folder** setting. If necessary, select **Select** to create a new folder.

16. Click **Scan**.

   The product scans your original and saves the scanned file in the location you specified.

**Additional Scanning Settings - Main Settings Tab**

You can select these additional scanning settings on the Epson Scan 2 Main Settings tab. Not all adjustment settings may be available, depending on other settings you have chosen.

- **Rotate**: Rotates the original image clockwise to the desired angle before scanning it. Select **Auto** to allow your product to automatically rotate the image based on the orientation of the text (may take longer to scan).

- **Correct Document Skew**: Corrects skewed originals, image contents, or both.

- **Add or edit pages after scanning**: Lets you add, remove, or edit the pages in a scan, including rotating pages and changing the page order.

**Note**: To save multiple pages in a single file, you must select a file format that supports multiple pages such as **PDF** or **Multi-TIFF**. If you select another file format, each scanned image or page is saved as a separate file.

**Parent topic**: **Scanning in Epson Scan 2**

**Additional Scanning Settings - Advanced Settings Tab**

You can select these additional scanning settings on the Epson Scan 2 Advanced Settings tab. Not all adjustment settings may be available, depending on other settings you have chosen.
Remove Background
Removes the background of the originals.

Text Enhancement
Sharpens the appearance of letters in text documents.

Auto Area Segmentation
Makes black and white images clearer and text recognition more accurate by separating the text from the graphics.

Threshold
Adjusts the level at which black areas in text and line art are delineated, improving text recognition in OCR (Optical Character Recognition) programs.

Color Enhance
Enhances the shades of the color you select in the scanned image. This setting is available only if you select Grayscale or Black & White as the Image Type setting.

Brightness
Adjusts the overall lightness and darkness of the scanned image.

Contrast
Adjusts the difference between the light and dark areas of the overall scanned image.

Gamma
Adjusts the midtone density of the scanned image.

Unsharp Mask
Makes the edges of certain image areas clearer. Turn off this option to leave softer edges.

Descreening
Removes the ripple pattern that might appear in subtly shaded image areas, such as skin tones. This option improves results when scanning magazines or newspapers. (The results of descreening do not appear in the preview image, only in your scanned image.)

Color Restoration
Corrects color in faded images (when scanning in Photo Mode).

Backlight Correction
Lightens darkly backlit images (when scanning in Photo Mode).

Dust Removal
Removes dust on scanned images (when scanning in Photo Mode).

Edge Fill
Corrects shadowing around the edges of the image by filling the shadows with black or white.
Dual Image Output
Scans the original image twice using different output settings (Windows only).

Watermark
Adds a watermark to a scanned image.

Saving Scanned Documents as a Searchable PDF Using Epson Scan 2
You can scan a document and save the text in a searchable PDF. In a searchable PDF, text is recognized using Optical Character Recognition (OCR) and then embedded in the scanned original.

Note: The required Epson Scan 2 OCR Component is installed automatically when you install your product software as instructed on the Start Here sheet. If you install your scanner software programs individually, be sure to also install this component if you want to perform OCR.

1. Load your original in the product for scanning.
2. Start Epson Scan 2.
3. Select your scan settings.
4. Click Preview and adjust the area you want to scan, if necessary.
5. If you are using the ADF, reload the ejected original.
6. Select Searchable PDF as the Image Format setting.
7. Select Options from the Image Format list.
8. Select any of the options on the General tab.
9. Select the Text tab.
10. Make sure the language used in the document text is selected as the Text Language setting.
11. Select the Security tab if you want to add a password to the PDF or protect printing or editing properties.
12. Click OK.
13. Confirm the File Name setting and select a Folder setting for your document.
14. Click Scan.
   The scanned image is saved as a searchable PDF.

**Parent topic:** Scanning in Epson Scan 2

### Image Format Options

You can select different image formats and related options. For details on available options, click the ? icon on the Epson Scan 2 Image Format Options window. Not all image formats have options.
BITMAP (*.bmp)
A standard image file format for most Windows programs.

JPEG (*.jpg)
An image format that lets you highly compress image data. However, the higher the compression, the lower the image quality. (The TIFF format is recommended when you need to modify or retouch your scanned image.)

PNG (*.png)
An image format that does not lose quality during editing.

TIFF (*.tif)
A file format created for exchanging data between many programs, such as graphic and DTP software.

Multi-TIFF (*.tif)
A TIFF file format when multiple pages are saved to the same file, allowing you to edit the images using a compatible program.

PDF (*.pdf)
A document format that is readable by Windows and Mac systems using Adobe Reader, Acrobat, or other programs. You can save multi-page documents in one PDF file.

Searchable PDF (*.pdf)
A document format that is readable by Windows and Mac systems using Adobe Reader, Acrobat, or other programs. You can save multi-page documents in one PDF file. Recognized text in the scanned document can be searched.

Parent topic: Scanning in Epson Scan 2

Scan Resolution Guidelines

The Resolution setting, measured in dpi (dots per inch), controls the amount of detail captured in your scans. Increasing the resolution raises the amount of detail captured but comes with the following disadvantages:

• Larger file sizes
• It takes longer to scan your originals, send/receive your scans by email or fax, and to print your scans
• The image may become too large to fit on your display or print on paper

If you plan to enlarge a scanned image so you can print it at a larger size, you may need to increase the resolution from the default resolution set by Epson Scan 2. Follow these guidelines to determine the resolution setting you need:

• You will scan the image at its original size but enlarge it later in an image-editing program.
Increase the Epson Scan 2 Resolution setting in your scan. Increase the resolution by the same amount you will increase the image size to retain a high image quality. For example, if the resolution is 300 dpi (dots per inch) and you will double the image size later, change the Resolution setting to 600 dpi.

- You will scan the image at 100% or a smaller size.
  
  Select the Epson Scan 2 Resolution setting based on how you will use the scanned image:
  
  - Email/view on a computer screen/post on the web: 96 to 200 dpi
  - Print/fax/convert to editable text (OCR)/create searchable PDF: 200 to 300 dpi

Faxing

See these sections to fax using your product.

**Note:** This product allows you to store names, telephone numbers, and fax data in its memory even when the power is turned off. Make sure you restore all of the default settings if you give away or dispose of the product. This will erase all of your network settings and fax data.

**Connecting a Telephone or Answering Machine**
**Setting Up Fax Features**
**Setting Up Contacts and Contact Groups**
**Sending Faxes**
**Receiving Faxes**
**Checking Fax Status**
**Printing Fax Reports**

**Connecting a Telephone or Answering Machine**

You must connect your product to a telephone wall jack to send or receive faxes. If you want to use the same telephone line to receive calls, you can connect a telephone or answering machine to your product using an additional phone cable.

**Note:** In areas where lightning strikes occur frequently, we recommend that you use a surge protector.

**Note:** If you do not connect a telephone to your product, make sure Receive Mode is set to Auto. Otherwise, you cannot receive faxes.

**Note:** You may not be able to use the printer with the following phone lines or systems:
- VoIP phone line such as DSL or fiber-optic digital service
- Digital phone line (ISDN)
- Some PBX telephone systems
- When adapters such as terminal adapters, VoIP adapters, splitters, or DSL router are connected between the telephone wall jack and the printer
1. Connect a phone cable to your telephone wall jack and to the **LINE** port on your product.

**Note:** If you have a DSL or ISDN connection, you must connect the appropriate DSL filter, or ISDN terminal adapter or router to the wall jack to be able to use the line for faxing or voice calls using your product. Contact your DSL or ISDN provider for the necessary equipment.
2. If you are connecting a telephone or answering machine to your product using a second phone cable, remove the cap from the **EXT** port on your product.

![Diagram showing how to connect a phone](image)

**Note:** Do not remove the cap from the **EXT** port if you are not connecting your telephone.

3. Connect a second phone cable to your telephone or answering machine and to the **EXT** port on your product.

![Diagram showing the connection](image)
Note: If you connect an answering machine and Receive Mode is set to Auto, set the number of rings before your product answers a call to a number that is higher than your answering machine's setting for the number of rings.

Selecting the Line Type
Setting the Number of Rings to Answer

Parent topic: Setting Up Fax Features
Using the Fax Setup Wizard

You can setup the product's basic fax settings using the Fax Setting Wizard. This wizard is automatically displayed when the product is turned on for the first time. You can also change these settings individually from the Fax Settings menu.

1. Press the home button, if necessary.
2. Select Settings.
4. Scroll down and select Fax Settings.
5. Scroll down and select Fax Setting Wizard.
   The Fax Setting Wizard screen appears.
6. Select Proceed.
7. On the Fax Header screen, use the displayed keypad to enter the sender name for your fax source, such as your name or a business name. You can enter up to 40 characters.
8. On the Your Phone Number screen, use the displayed keypad to enter your fax number, up to 20 characters.

   Note: The name and phone number in the fax header identifies the source of the faxes you send.
9. On the Distinctive Ring Setting screen, do one of the following:
   • If you have subscribed to a distinctive ring service from your telephone company, select Settings. Select the ring pattern to be used for incoming faxes or select All.
   • If you do not have a distinctive ring service, select Skip.

   **Note:** Distinctive ring services allows you to have several phone numbers on one phone line. Each number is assigned a different ring pattern. You can use one number for voice calls and another for fax calls. Select the ring pattern assigned to fax calls in the Distinctive Ring Setting. If you select a ring pattern other than All, Receive Mode is automatically set to Auto.

10. On the Proceed screen, confirm the displayed settings and select Proceed, or press the back arrow to change the settings.

11. On the Run Check Fax Connection screen, select Start Checking and follow the on-screen instructions to check the fax connection and print a report of the check result. If there are any errors reported, try the solutions on the report and run the check again.

   If the Select Line Type screen appears, select the correct line type.

   If the Select Dial Tone Detection screen appears, select Disable. However, disabling the dial tone detection function may drop the first digit of a fax number and send the fax to the wrong number.

   **Parent topic:** Setting Up Basic Fax Features

**Selecting the Line Type**

If you connect the product to a PBX phone system or terminal adapter, you must change the product's line type. PBX (Private Branch Exchange) is used in office environments where an external access code such as “9” must be dialed to call an outside line. The default Line Type setting is PSTN (Public Switched Telephone Network), which is a standard home phone line.

1. Press the home button, if necessary.
2. Select Settings.
3. Select **General Settings**.

4. Scroll down and select **Fax Settings**.

5. Select **Basic Settings**.

6. Select **Line Type**.

7. Select **PBX**.

   You see a screen like this:

   ![Settings Screen](image)

8. Set the switch to **Use** to activate the setting.
9. Select **Access Code**.
10. Use the displayed keypad to enter the access code, such as 9, and select **OK**.

**Parent topic:** Setting Up Basic Fax Features

### Setting the Number of Rings to Answer

If you connect an external answering machine and select to receive faxes automatically, make sure the Rings to Answer setting is correct. The number of rings should be higher than the number of rings your answering machine is set to for answering a call.

1. Press the home button, if necessary.
2. Select **Settings**.
3. Select **General Settings**.
4. Scroll down and select **Fax Settings**.
5. Select **Basic Settings**.
6. Select **Rings to Answer**.

![Rings to Answer](image)

7. Select the number of rings and select **OK**. Make sure to select a number higher than the number of rings your answering machine is set to for answering a call.

**Note:** An answering machine picks up every call faster than the product, but the product can detect fax tones and start receiving faxes. If you answer the phone and hear a fax tone, check that the product has started receiving the fax, then hang up the phone.

**Parent topic:** Setting Up Basic Fax Features

**Selecting Advanced Fax Settings**

You can select a variety of advanced fax settings.

1. Press the home button, if necessary.
2. Select **Settings**.
3. Select **General Settings**.

4. Scroll down and select **Fax Settings**.
5. Select the group of settings you want to change.

   - **Print Settings - Fax**
   - **Basic Settings - Fax**
   - **Security Settings - Fax**

**Parent topic:** Setting Up Fax Features

**Print Settings - Fax**

Set the print options you want to use for incoming faxes in the **Receive Settings > Print Settings** menu.

Setting Up the Fax Utility - Windows

You can set up the FAX Utility for Windows for use with your product.

**Note:** Before using the FAX Utility for Windows, make sure you have set up the fax features on your product using the product control panel. Also first confirm that you can send and receive faxes using the control panel.

1. Do one of the following:
   - **Windows 10:** Click 📖 and select **EPSON Software**.
   - **Windows 8.x:** Navigate to the **Apps** screen.
   - **Windows (other versions):** Click 📖 or **Start > Programs or All Programs > EPSON Software**.
2. Select **FAX Utility**.
The first time you use the FAX Utility, you see this introduction window:

3. Read about the FAX Utility and click **Return to the main window** at the bottom of the window.
You see this window:

4. Click **Select Printer** and follow the on-screen instructions to transfer your product's fax settings to the FAX Utility.

   **Note:** For detailed information, click **Help** or **Open Online Help**.

**Parent topic:** Setting Up Fax Features

**Setting Up Fax Features Using the Fax Utility - Mac**

You can set up your fax header and select your fax settings using the FAX Utility for Mac.
1. In the Apple menu or the Dock, select **System Preferences**. Select **Print & Fax**, **Print & Scan**, or **Printers & Scanners**, select the **FAX** option for your product, and select **Options & Supplies**. Select **Utility** and select **Open Printer Utility**.

2. Double-click **FAX Utility**, if necessary.
   
   You see a window like this:

   ![FAX Utility window](image)

   3. Select your **FAX** product in the Printer list.

   4. Select **Fax Settings**.

   5. Follow the prompts that appear on the screen to enter your fax header information and select your fax settings.

   **Note:** For detailed information, select the FAX Utility ? icon.

   **Parent topic:** Setting Up Fax Features

### Setting Up Contacts and Contact Groups

You can set up a list of contacts and their fax numbers so you can quickly select them for faxing. You can also set up contact groups to send a fax message to multiple contacts.

**Parent topic:** Sending Faxes

**Related tasks**

- Selecting the Line Type

**Related topics**

- Setting Up Contacts Using the Product Control Panel
- Placing Originals on the Product

### Sending a Fax Using the Keypad, Contact List, or History

You can send a fax from your product control panel by entering the fax number, or selecting the number from either the contact list or fax history.

**Note:** You can send a black-and-white fax to up to 100 contacts or 99 groups at a time, or send a color fax to one recipient at a time. If your recipient's fax machine does not print in color, your fax is automatically sent in black-and-white.
1. Place your original on the product for faxing.

   **Note:** You can send up to 100 pages in one fax transmission, depending on the remaining amount of memory.

2. Press the \( \Rightarrow \) home button, if necessary.

3. Select **Fax**.

   You see a screen like this:

   ![Fax screen](image)

4. Do one of the following to select fax recipients:
   - **Manually enter a fax number:** Select **Keypad**, enter a fax number using the displayed keypad, and press **OK** when done. To add another fax number, repeat this step; the number of multiple recipients appears in the upper right corner of the LCD screen.

      **Note:** If direct dialing has been restricted, you can only select the number from the contact list or fax history. If necessary, enter an outside line access code (such as 9) at the beginning of the fax number. If the access code has been set up in the **Line Type** setting, enter the # pound sign instead of the code. If your fax number requires a brief pause, select \( \_\_ \) to insert a pause symbol (\( \_\_ \)).

   - **Select from the contact list:** Select **Contacts** to display the contact list. Select one or more contacts (select the contact again to deselect it), and select **Close**.
• **Select from the sent fax history:** Select **Recent** to display the sent fax history. Select a recipient from the list.

**Note:** To delete selected recipients, press the number of multiple recipients displayed in the upper right corner of the LCD screen. Select each recipient you want to delete and select **Remove**.

5. If you need to change any fax settings, select **Fax Settings** and select your settings.

6. If you want to preview your fax in black-and-white on the LCD screen, select **Preview**. (If the preview looks incorrect, select **Cancel**, reposition the document or change the fax settings, and repeat this step.) You cannot send the fax in color after previewing it.

**Note:** If you do not touch the preview screen for 20 seconds, your product sends the fax automatically. You cannot preview images when the **Direct Send** setting is turned on.

7. Select **Send**.

**Note:** To cancel faxing, select the 📄 icon.

Your product scans your original and prompts you to place additional pages, if necessary.

After scanning your originals, your product dials the number and sends the fax.

**Parent topic:** Sending Faxes from the Product Control Panel

Parent topic: Sending Faxes from the Product Control Panel
Sending a Fax at a Specified Time

You can send a fax at a time of your choice. You can only schedule one fax at a time.

**Note:** Make sure the product's date and time settings are correct. You can only send faxes in black-and-white when you use this option.

1. Place your original on the product for faxing.
2. Press the home button, if necessary.
3. Select Fax.
   
   You see a screen like this:

4. Enter a fax number or select a number from the Contacts or Recent list.
5. Select Fax Settings.
6. Select Send Fax Later.
7. Select On.
8. Select Time, use the displayed keypad on the LCD screen to enter your desired time, and select OK, then select OK again.
9. Select the Recipient tab and select Send.

   **Note:** To cancel faxing, select the icon.
After scanning your originals, your product dials the number and sends the fax at the specified time.

**Note:** If the product is turned off at the specified time, the fax is sent when it is powered on.

**Note:** You cannot send another fax until the fax has been sent at the specified time. If you want to send another one, you need to cancel the scheduled fax by selecting **Fax** on the Home screen and then deleting it.

- Placing Originals on the Product

### Dialing Fax Numbers from a Connected Telephone

If you connected a telephone to the **EXT** port on your product, you can send a fax by dialing the fax number from the connected telephone. If the recipient's phone number and fax number are the same, you can speak to the recipient before sending the fax.

1. Place your original on the product for faxing.
2. Press the home button, if necessary.
3. Dial the fax number from the connected telephone. Speak to the recipient if necessary.

**Note:** If you are using a pre-paid calling card, enter the number and password required to use the card before entering the destination fax number.

4. Select **Fax** on the LCD screen.
5. Select **Fax Settings** and select any settings as necessary.

**Note:** Your product now communicates with the recipient's fax machine. Do not hang up the telephone.

6. When you hear a fax tone, select **Send** to start sending the fax.

**Note:** If your recipient's fax machine does not print in color, your fax is automatically sent in black-and-white.

7. Hang up the telephone.
Parent topic: Sending Faxes from the Product Control Panel

Sending Faxes Using the Fax Utility - Windows

You can send a fax from a printing program in Windows. You can fax up to 100 pages at a time, including a cover sheet.

1. Open the file you want to fax and select the print command.

   You see a window like this:

   ![Print window](image)

   You can see:
   - Select Printer: EPSON (FAX)
   - Status: Ready
   - Number of copies: 1
   - Pages: 1-3

2. Select your product with the FAX option as the printer.

3. To change the Paper Size, Orientation, Color, Image Quality, or Character Density settings, click the Preferences or Properties button, change the necessary settings, and click OK.

   **Note:** If you see a Setup, Printer, or Options button, click it. Then click Preferences or Properties on the next screen. For more information about selecting fax print settings, click Help.

4. Select the Page Range as necessary. (Leave the Number of copies set to 1.)
5. Click **Print** or **OK**.
   If you’re faxing for the first time, you see a window like this one:

6. Enter your sender information so that recipients can identify the origin of the fax. Then click **OK** to save the sender information.
You see a window like this:

7. If you want to add a cover sheet, click the **Attach a cover sheet** checkbox.
8. To add other documents to the transmission, click the **Add documents to send** checkbox.
9. You can enter recipients by doing one of the following:
   • Select a recipient from the phonebook or contacts on the printer and click **Add**.
   • Enter the recipient's name and fax number and click **Add**.

   **Note:** For detailed instructions on using the Epson FAX Utility, click **Help**.

10. Click **Next** when you are done selecting recipients.
11. If you selected the **Add documents to send** checkbox, follow the instructions on the screen to add documents to your fax and then click **Next**.

12. If you selected the **Attach a cover sheet** checkbox, select a cover sheet and enter a subject and message, then click **Next**.

13. Click **Send** to transmit your fax.

**Parent topic:** [Sending Faxes](#)

### Sending Faxes Using the Fax Utility - Mac

You can send a fax from a Mac printing program using the FAX Utility. You can fax up to 100 pages at a time, including a cover sheet.

1. Open the file you want to fax.
2. Select the print command in your application.

   **Note:** You may need to select a print icon on your screen, the **Print** option in the **File** menu, or another command. See your application's help utility for details.

3. Select your product **FAX** option as the **Printer** setting.
4. If necessary, click the **Show Details** button to expand the print window.

**Note:** The print window may look different, depending on the Mac OS version and the application you are using.
5. Select the number of pages you are faxing as the **Pages** setting.

**Note:** Leave the **Copies** setting set to 1.

6. Select **Recipient Settings** from the pop-up menu.

You see this window:

![Recipient Settings window](image)

7. Do one of the following to choose your recipient:
   - Select a name or group from the **Recipient List**.
   - Enter a name, company, and fax number and click the + button.
   - Click the icon and select a recipient from your address book.

8. Select **Fax Settings** from the pop-up menu.
You see this window:

9. Select the **Color** and **Image Quality** settings you want to use for your fax.
10. Click **Fax**.

### Receiving Faxes

See these sections to receive faxes with your product.

Fax Reception
Receiving Faxes Automatically
Receiving Faxes Manually
Receiving a Fax by Polling
Storing and Viewing Received Faxes

Parent topic: Faxing

### Fax Reception

Your product will automatically receive and print faxes when you set the Receive Mode to **Auto**.

If you connected a telephone to your product so you can use the same phone line for faxes and voice calls, you can also set your product to receive faxes manually. This allows you to check for a fax tone using the telephone and press a button on your product to receive the fax.
Make sure to load paper in your product and select your fax settings before receiving a fax.

Note: If you run out of paper during fax printing, load more paper and press the button indicated on your product’s LCD screen to continue.

Parent topic: Receiving Faxes

Receiving Faxes Automatically

To receive faxes automatically, make sure Receive Mode is set to Auto (the default setting for the product).

To change the Receive Mode if necessary, select Settings > General Settings > Fax Settings > Basic Settings > Receive Mode.

If an answering machine is connected, make sure the product's Rings to Answer setting is set higher than the number of rings your answering machine is set to answer a call. For example, if the answering machine is set to pick up on the fourth ring, set the product to pick up on the fifth ring or later.

Parent topic: Receiving Faxes

Related tasks
Receiving Faxes Manually

Receiving Faxes Manually

You can set up your product to receive faxes manually by setting the Receive Mode to Manual. This lets you check for a fax tone on the connected telephone before receiving a fax.

1. To change the Receive Mode, select Settings > General Settings > Fax Settings > Basic Settings > Receive Mode and select Manual.
2. When the connected telephone rings, answer the call.
3. If you hear a fax tone, select Fax on the LCD display.

Note: To receive a fax using the attached telephone instead of the product control panel, enable the Fax Settings > Basic Settings > Remote Receive setting.

4. Select Send/Receive.
5. Select Recv..
6. Select the ◊ icon to start receiving the fax.
7. Hang up the telephone.
Receiving a Fax by Polling

You can use polling to receive a fax from another fax machine (such as a fax information service).

**Note:** You cannot use polling to receive a fax from a fax information service that uses audio guidance.

1. Press the home button, if necessary.
2. Select Fax.
   
   You see a screen like this:

   ![Fax screen](image)

3. Select the icon.
4. Set Polling Receive to On.
5. Select Close.
6. Enter the fax number you expect to receive the fax from.

   **Note:** When Direct Dialing Restrictions is set to On, you can only select fax recipients from the contact list or the sent fax history. You cannot manually enter a fax number.
7. Select **Polling** to start receiving the fax.

**Parent topic:** Receiving Faxes

### Storing and Viewing Received Faxes

You can save received faxes in your product’s memory and view them on the LCD screen.

1. Press the home button, if necessary.
2. Select **Settings > General Settings > Fax Settings > Receive Settings**.
3. Select **Fax Output Settings**.

4. If a confirmation message is displayed, select **OK** to dismiss it.
5. Select **Save to Inbox**.
6. Set **Save to Inbox** to **On**.
7. Select **Options when memory is full** and choose an option.
8. Select **Inbox Password Settings** to set, change, or reset the password for the inbox.

**Note:** You cannot set an Inbox password if you set **Options when memory is full** to **Receive and print faxes**.

9. Press the home button.
10. Select ✉️.
11. Select **Open Inbox (XX Unread)** and enter the inbox password, if necessary.
12. Select the fax you want to view.
   You see the fax displayed on the screen.

13. Select the icon.
14. Select one of the printing or deleting options, and follow the on-screen instructions.

**Note:** Delete faxes after you print or view them to prevent the product’s memory from filling up. When the memory is full, you can only print or reject incoming faxes.

**Parent topic:** Receiving Faxes

### Checking Fax Status

You can check the status of current fax jobs, or faxes that have been received or sent on the product control panel.

1. Press the home button, if necessary.
2. Select **Fax**.
   You see a screen like this:

3. Select the icon.
4. Select **Transmission Log** and select the fax job you want to check.

   **Note:** If you see a numbered icon above the 📀 icon on your product's LCD screen or the received fax light is flashing, received faxes have been temporarily saved to the product's memory.

**Parent topic:** Faxing

### Printing Fax Reports

You can print several types of fax reports whenever necessary.

1. Press the 📈 home button, if necessary.
2. Select **Fax**.

   You see a screen like this:

![Fax Screen](image)

3. Select the 📈 icon.
4. Select **Fax Report**.
5. Select the fax report you want to print.
6. Select **Print** to print the report.

Refilling Ink and Replacing the Maintenance Box

When the ink level is below the lower line on an ink tank, you need to refill it. Before checking the ink level or refilling an ink tank as described here, be sure to read the ink safety precautions.

**Caution:** If the ink level is below the lower line on the ink tank, fill it to the upper line on the ink tank. Continued use of the product when the ink level is below the lower line on a tank could damage the product.

**Ink Safety Precautions**

**Note:** Epson strongly recommends the use of genuine ink to ensure optimal print quality and performance.

**Note:** The product has a low ink alert system. The accuracy of this system depends on the user refilling the ink tanks correctly. The product cannot directly measure the ink levels in the tanks; instead it estimates the amount of ink remaining by internally monitoring ink usage. The low ink alert system may generate inaccurate messages if the ink tanks are not refilled according to these instructions.

As a precaution, perform regular visual inspections of the ink tanks to ensure ink levels do not fall below the lower line. Continued use of the product when the ink level is below the lower line on a tank could damage the product.

**Ink Handling Precautions**

- Keep ink bottles and the ink tanks out of the reach of children. Do not allow children to drink from or handle the ink bottles and bottle caps.
- Do not tilt or shake an ink bottle after opening it; otherwise, ink may leak.
• Be careful not to touch any ink when you handle the ink tanks, ink tank caps, and opened ink bottles or ink bottle caps.

• If ink gets on your skin, wash it thoroughly with soap and water. If ink gets into your eyes, flush them immediately with water. If discomfort or problems persist, see a doctor immediately. If ink gets into your mouth, spit it out and see a doctor right away.

• Do not disassemble the maintenance box; otherwise ink may get into your eyes or on your skin.

• Do not shake or squeeze the ink bottles.

• If ink spills, wipe it up immediately. To prevent the ink from spreading, blot the spill with a dry cloth, then wipe it with a damp cloth. The ink will be hard to remove once it has dried.

Ink Refilling Precautions

• Use ink bottles with the correct part number for this product.

• Epson's warranties do not extend to any damage caused by the use of third-party ink or ink not designed for your printer.

• This product requires careful handling of ink. Ink may splatter when the ink tanks are filled or refilled with ink. If ink gets on your clothes or belongings, it may not come off.

• Do not open the ink bottle package until you are ready to fill an ink tank. Ink bottles are vacuum packed to maintain reliability. If you leave an ink bottle unpacked for a long time before using it, print quality may be affected.

• If the ink level is below the lower line on an ink tank, refill the ink. Continued use of the product when the ink level is below the lower line on an ink tank could damage the product.

• Visually check the ink levels in the product's ink tanks to confirm the actual ink levels. Continued use of the product when the ink is expended could damage the product.

• Do not maintain low ink levels for extended periods of time.

• Epson recommends filling an ink tank to the upper line before resetting the ink level.

• For optimum printing results, refill the ink tanks to the upper line at least once a year.

• After bringing an ink bottle inside from a cold storage site, allow it to warm up at room temperature for at least three hours before using it.

• Use the ink bottle before the date printed on the package.

• After opening an ink bottle, Epson recommends using it as soon as possible.

• Store ink bottles in a cool, dark place. Keep them out of direct sunlight.

• Do not store the ink bottles in high or freezing temperatures.
• Store the ink bottles in the same environment as the product. When storing or transporting an opened ink bottle, do not tilt the bottle and do not subject it to impacts or temperature changes. Otherwise, ink may leak even if the cap on the ink bottle is tightened securely. Be sure to keep the ink bottle upright when tightening the cap, and take measures to prevent ink from leaking when you transport the bottle.

**Ink Bottle and Ink Tank Information**

• To maintain optimum print head performance, some ink is consumed from all ink tanks during printing and when performing maintenance operations, such as cleaning the print head. Ink may also be consumed when the product is turned on.

• Some ink in the ink bottles supplied with your product is used during initial setup; these ink bottles may print fewer pages compared to subsequent ink bottles.

• The ink bottles may contain recycled materials, but this does not affect product function or performance.

• The specification and appearance of the ink bottles are subject to change without prior notice for improvement.

• If an ink bottle is dented, you can still use the ink. The quality and quantity of ink will not be affected.

• When printing in monochrome or grayscale, color ink may be used instead of black ink, depending on the paper type or print quality settings. This is because a mixture of color inks is used to create black.

• A reserve amount of ink remains in the tank when your product indicates that a refill is necessary. The yields quoted for you do not include this reserve.

Checking Ink and Maintenance Box Levels - Windows

A low ink reminder appears if you try to print when ink is low, and you can check your ink levels at any time using a utility on your Windows computer.

1. To check your ink and maintenance box levels, access the Windows Desktop and double-click the icon for your product in the right side of the Windows taskbar, or click the up arrow and double-click .
You see a window like this:

2. Refill any ink tank or replace the maintenance box as needed.

Note: The ink levels displayed are an estimate and may differ from the actual ink remaining in the ink tanks. To confirm the actual remaining ink, visually check the ink levels in the ink tanks. Continued use of the product when the ink level is below the lower line on the tank could damage the product.
Checking Ink and Maintenance Box Levels - Mac

You can check your ink levels using a utility on your Mac.

1. In the Apple menu or the Dock, select System Preferences. Select Print & Fax, Print & Scan, or Printers & Scanners, select your product, and select Options & Supplies. Select Utility and select Open Printer Utility.

2. Select EPSON Status Monitor.

You see a window like this:
3. Refill any ink tank or replace the maintenance box as needed.

   **Note:** To update or refresh the displayed ink levels, click **Update**.

   **Note:** The ink levels displayed are an estimate and may differ from the actual ink remaining in the ink tanks. To confirm the actual remaining ink, visually check the ink levels in the ink tanks. Continued use of the product when the ink level is below the lower line on the tank could damage the product.

### Purchase Epson Ink and Maintenance Box

You can purchase genuine Epson ink, maintenance boxes, and paper at [epson.com](http://epson.com) (U.S. sales) or [epson.ca](http://epson.ca) (Canadian sales). You can also purchase supplies from an Epson authorized reseller. To find the nearest one, call 800-GO-EPSON (800-463-7766) in the U.S. or 800-807-7766 in Canada.

**Note:** Epson's warranties do not extend to any damage caused by the use of third-party ink or ink not designed for your printer.
The included initial ink bottles must be used for printer setup and are not for resale. The printer ships with full ink bottles and part of the ink from the first bottles is used to charge the print head. Yields vary considerably based on images printed, print settings, paper type, frequency of use and temperature.

Refilling the Ink Tanks

Make sure you have new ink bottles handy and have read the ink safety precautions before you begin.

You can continue to use the product even if one or more ink tanks are not filled all the way. However, for the most accurate ink level monitoring, fill all the ink tanks up to the top line.

Note: The product has a low ink alert system. The accuracy of this system depends on the user refilling the ink tanks correctly. The product cannot directly measure the ink levels in the tanks; instead it estimates the amount of ink remaining by internally monitoring ink usage. The low ink alert system may generate inaccurate messages if the ink tanks are not refilled according to these instructions.

As a precaution, perform regular visual inspections of the ink tanks to ensure ink levels do not fall below the lower line. Continued use of the product when the ink level is below the lower line on the tank could damage the product.
Caution: Wear disposable gloves while refilling the ink tanks to avoid staining your hands. If ink spills, wipe it off immediately with a damp towel to avoid permanent stains. If ink gets on your clothes or belongings, it may not come off.

1. Turn on your product.
2. Close the document cover if it is open.
3. Lift up the scanner unit with both hands until it locks.
4. Open the ink tank cover.

5. Read the precautions on the screen and then proceed to the next screen.
6. Open the cap for the ink tank you are going to fill.

**Note:** Make sure that the color of the ink tank matches the ink color that you want to refill.
7. Hold the ink bottle upright and slowly turn the bottle cap to remove it.

Caution: Do not shake or squeeze the bottle. Do not touch the top of the bottle after its cap is removed.

Warning: If ink gets on your skin, wash it thoroughly with soap and water. If ink gets into your eyes, flush them immediately with water. If ink gets into your mouth, spit it out immediately. Seek medical advice if problems persist. Keep the ink bottles out of the reach of children and do not drink the ink.

8. Position the top of the ink bottle with the filling port and then insert the bottle straight onto the port. Ink flows into the tank.

Note: Refer to the color-coded sticker on the ink tank unit to identify the color of each tank. Do not force the bottles into position; they are keyed for each color.
9. Wait for the ink to fill the tank. Do not squeeze the bottle. Ink flows into the tank and stops automatically when the ink is filled to the upper line.

**Note:** If ink does not flow from the bottle, lift and reinsert the bottle. If the ink has reached the upper line of the tank, do not remove and reinsert the bottle or ink may leak.
10. When the ink tank is full, remove the ink bottle and securely close the ink bottle cap.

![Image of ink bottle]

**Note:** Do not leave the ink bottle inserted. The bottle may be damaged or ink may leak. If any ink remains in the bottle, replace the bottle cap and tighten it. Store the bottle upright for later use.

11. Securely close the ink tank cap.

12. Repeat the previous steps as necessary for each ink tank you need to refill.

13. Close the ink tank cover, then close the scanner unit using both hands.

![Image of printer with scanner unit closed]
Note: The scanner unit is designed to close slowly and resist a little as a precaution against injuring your fingers. Continue to close the scanner unit even if you feel some resistance.

14. Select Proceed and follow the on-screen instructions to reset the ink level for the colors you refilled. Even if you do not refill ink up to the upper line on the ink tank, you can continue using the product. To keep your product operating at its best, however, fill ink tank up to the upper line and reset the ink level immediately.

Checking Ink Levels on Your Product

Maintenance Box Replacement

The maintenance box stores surplus ink that gets collected during printing or print head cleaning. When you see a message on the LCD screen, follow the on-screen instructions to replace the maintenance box.

Note: When the maintenance box is full, you cannot print or clean the print head until it is replaced. However, you can perform operations that do not require ink, such as scanning.

Note the following precautions when replacing the maintenance box:

• Do not remove the maintenance box or its cover except when replacing the maintenance box; otherwise, ink may leak.
• Do not touch the green chip on the side of the maintenance box.
• Do not tilt the maintenance box after removing it or ink may leak.
• Do not touch the openings in the maintenance box or you may get ink on you.
• Do not drop the maintenance box or subject it to strong shocks.
• If you cannot replace the cover, the maintenance box may not be installed correctly. Remove and reinstall the maintenance box.
• Do not store the maintenance box in high or freezing temperatures.
• Do not replace the maintenance box during printing; otherwise, ink may leak.
• Keep the maintenance box out of direct sunlight.
**Caution:** Do not reuse a maintenance box that has been removed and left uninstalled for a long period. Keep the maintenance box away from direct sunlight.

**Note:** The maintenance box is a user-replaceable part and is not covered by the product warranty.

Print Head Maintenance

If your printouts become too light, or you see dark or light bands across them, you may need to clean the print head nozzles. Cleaning uses ink, so clean the nozzles only if print quality declines.

You can check for clogged nozzles before you clean them so you don’t clean them unnecessarily.

Note: You cannot clean the print head if the ink level has reached the lower line on the ink tank, and may not be able to clean it when the ink level in any of the tanks is low. You must refill the ink tank first.

If you still see white or dark lines or gaps in your printouts, even after cleaning the print head several times, you can run a Power Cleaning.

**Caution:** Never turn off the product or open the scanner unit during a cleaning cycle or you may not be able to print.
6. Check the printed pattern to see if there are gaps in the lines.

   **Print head is clean**

   ![Print head is clean pattern]

   **Print head needs cleaning**

   ![Print head needs cleaning pattern]

   **Print head needs Power Cleaning**

   ![Print head needs Power Cleaning pattern]

7. Do one of the following:
   - If there are no gaps, the print head is clean. Select O.
• If there are gaps or the pattern is faint, select X. Follow the instructions on the screen to clean the print head again.
• If almost the entire pattern is missing, select O and run a Power Cleaning.

If you don’t see any improvement after cleaning the print head up to 3 times, turn off the product and wait at least 12 hours. Then run a nozzle check and try cleaning the print head again, if necessary. If quality still does not improve, run a Power Cleaning.

Cleaning the Print Head Using a Computer Utility

You can clean the print head using a utility on your Windows or Mac computer.

1. Make sure there are no errors on the LCD screen and the output tray is extended.
2. Load a few sheets of plain paper in the product.
3. Do one of the following:
   • **Windows**: Access the Windows Desktop and right-click the icon for your product in the right side of the Windows taskbar, or click the up arrow and right-click .
   • **Mac**: In the Apple menu or the Dock, select System Preferences. Select Print & Fax, Print & Scan, or Printers & Scanners, select your product, and select Options & Supplies. Select Utility and select Open Printer Utility.
4. Select Print Head Cleaning.
You see a window like this:

5. Click **Start** to begin the cleaning cycle.
   The power light flashes throughout the cleaning cycle and stays on when the cleaning cycle is finished.

   **Caution:** Never turn off the product or open the scanner unit during a cleaning cycle or you may not be able to print.

6. When the cleaning cycle is finished, you can check to see if the nozzles are clean; click **Print Nozzle Check Pattern** and click **Print**.
7. Check the printed pattern to see if there are gaps in the lines.

Print head is clean

Print head needs cleaning

Print head needs Power Cleaning

- If there are no gaps, click **Finish**.
- If there are gaps or the pattern is faint, click **Clean** to clean the print head again.
If almost the entire pattern is missing, click **Finish** and perform a Power Cleaning.

If you don’t see any improvement after cleaning the print head up to 3 times, turn off the product and wait at least 12 hours. Then check the print head nozzles and try cleaning the print head again, if necessary. If quality still does not improve, run a Power Cleaning.

**Parent topic:** Print Head Cleaning

### Power Cleaning

If you still see white or dark lines or missing nozzles in your printouts, even after cleaning the print head several times, you can run a Power Cleaning.

If you do not see improvement after running a Power Cleaning, turn off the product and wait at least 12 hours before running another Power Cleaning.

**Caution:** Running a Power Cleaning consumes a lot of ink, so you should run it only if necessary. Make sure each ink tank is at least one-third full before running a Power Cleaning, or it may damage the product.

**Caution:** Power Cleaning may cause the maintenance box to reach its capacity sooner. When the maintenance box is full, you need to replace it to continue printing. If the ink levels or the free space in the maintenance box are insufficient for Power Cleaning, you cannot run this feature.

### Power Cleaning Using the Product Control Panel

You can run a Power Cleaning using the control panel on your product.
Note: After a Power Cleaning, you must turn off the product and wait at least 12 hours before running another Power Cleaning.

1. Visually check the ink levels and make sure each ink tank is at least one-third full.

   Caution: If you run a Power Cleaning when the ink levels are low, you may damage the product.

2. Press the home button, if necessary.
4. Follow the on-screen instructions to run the Power Cleaning.
   A confirmation screen is displayed when Power Cleaning is complete.
5. Select OK on the confirmation screen and then run a nozzle check.

   If the print quality did not improve, turn off the printer and wait at least 12 hours before running another nozzle check. Run Print Head Cleaning or Power Cleaning depending on the printed pattern.

   If the print quality does not improve after running the Power Cleaning utility multiple times, contact Epson for support.

Print Head Alignment

If your printouts become grainy or blurry, you notice misalignment of vertical lines, or you see dark or light horizontal bands, you may need to align the print head.

Note: Banding may also occur if your print head nozzles need cleaning.

Aligning the Print Head Using the Product Control Panel

Parent topic: Adjusting Print Quality

Aligning the Print Head Using the Product Control Panel

You can align the print head using the control panel on your product.

1. Make sure there are no errors on the LCD screen and the output tray is extended.
2. Load a few sheets of plain paper in the product.
3. Press the home button, if necessary.
4. Select Maintenance > Print Head Alignment.
5. Select one of the following options:
   • Vertical Alignment if your printout is blurry or contains vertical ruled lines that are misaligned.
   • Horizontal Alignment if your printout contains horizontal banding.
6. Select **Print** to print an alignment sheet.

   **Note:** Do not cancel printing while you are printing head alignment patterns.

7. Check the printed patterns on the alignment sheet and select the following on the LCD screen, depending on the alignment pattern you printed:

   - **Vertical Alignment:** For each set of patterns, select the number representing the pattern with the least amount of separation or overlap.

   ![Vertical Alignment Pattern]

   - **Horizontal Alignment:** Select the number representing the pattern with the least amount of separation or overlap.

   ![Horizontal Alignment Pattern]

8. Select **OK** when you are finished.

**Parent topic:** Print Head Alignment
If you see ink on the back of a printout, you can clean the paper guide rollers to remove any excess ink.

1. If printouts are smeared or scuffed, load plain paper in the cassette in this size: Letter (8.5 × 11 inches [216 × 279 mm]) or A4 (8.3 × 11.7 inches [210 × 297 mm]).

2. Select **Maintenance > Paper Guide Cleaning**.

3. Follow the on-screen instructions to clean the paper guide.

4. Repeat these steps as necessary until the paper comes out clean.

5. If the paper is still smeared with ink, turn off the product and lift up the scanner unit with both hands until it locks.
6. Using a cotton swab, wipe off any ink smears on the part shown in the illustration below.

![Illustration of cotton swab wiping ink smears](image)

**Caution:** Do not use tissue paper to clean the inside of the product as lint can clog the print head nozzles. Do not touch the flat white cable, the translucent film, or the ink tubes inside the product.

7. Close the scanner unit.

**Note:** The scanner unit is designed to close slowly with slight resistance to help prevent injury to your fingers. Continue to close the scanner unit even if you feel some resistance.

Cleaning the Print Head Path
If the print quality has not improved after cleaning and aligning the print head and cleaning the paper path, the print head path inside the printer may be smeared with ink.

To clean the print head path, use the following:
• Several cotton swabs
• ¼ cup (59 ml) water containing 2 to 3 drops of mild dish detergent
• A small flashlight

Caution: Do not use any other liquid to clean the print head path or you may damage your product. Do not use tissue paper to clean the inside of the product. The print head nozzles may become clogged with lint.

1. Turn off the product.
2. Unplug the power cable.
3. Disconnect any connected cables.
4. Close the document cover, if necessary.
5. Lift up the scanner unit with both hands until it locks.

**Caution:** Do not touch the flat white cable, translucent film, or ink tubes inside the product. Doing so may cause a malfunction.
6. Using the flashlight, check the translucent film shown here for ink smears.

1 Translucent film
2 Print head rail

Caution: Do not touch the print head rail or wipe the grease off of it. You may not be able to print.
7. Moisten a cotton swab with the water and detergent mixture, and squeeze out any excess moisture. Lightly wipe the ink off the translucent film.

**Caution:** Do not press too hard on the film or you may dislocate the anchor springs and damage your product.

8. Use a new, dry cotton swab to dry the translucent film.
9. Repeat steps 7 and 8 as necessary to clean all ink smears.
10. When the translucent film is dry, close the scanner unit.

**Note:** The scanner unit is designed to close slowly with slight resistance to help prevent injury to your fingers. Continue to close the scanner unit even if you feel some resistance.

11. Reconnect any disconnected cables, plug in the power cord, and turn on the product.

**Parent topic:** Adjusting Print Quality

Cleaning the Paper Rollers

If you encounter repeated paper feed issues from the cassette, clean the paper rollers inside the product.

1. Turn off the product.
2. Unplug the power cable.
3. Disconnect any connected cables.
4. Close the document cover, if necessary.
5. Open the scanner unit with both hands until it locks.
6. Make sure the ink tank caps are securely closed.

Note: If the ink tank caps are not securely closed, ink may leak.

7. Close the scanner unit.

Note: The scanner unit is designed to close slowly with slight resistance to help prevent injury to your fingers. Continue to close the scanner unit even if you feel some resistance.

8. Slide out the paper cassette and remove the paper.
9. Place the product on its side with the ink tank on the bottom.

![Image of product on side]

**Warning:** Be careful not to trap your fingers under the product.

10. Use a soft, moist cloth to clean the paper rollers, as shown. Rotate the rollers to clean them thoroughly.

![Image of paper rollers]

11. Return the product to its normal position.

**Caution:** Do not leave the printer on its side for an extended period of time.

248
12. Replace the paper, slide in the paper cassette, and connect the power cord.

Cleaning and Transporting Your Product

See these sections if you need to clean or transport your product.

Cleaning Your Product
Transporting Your Product

Cleaning Your Product
To keep your product working at its best, you should clean it several times a year.

**Caution:** Do not use a hard brush, alcohol, or paint thinner to clean the product or you may damage it. Do not use oil or other lubricants inside the product or let water get inside it. Do not touch the flat white cable, translucent film, or ink tubes inside the product.

1. Turn off the product.
2. Unplug the power cord.
3. Disconnect any connected cables.
4. Pull out the paper cassette and remove the paper.
5. Clean the outer case and control panel with a soft, clean cloth moistened with a little water. If you cannot remove the dirt, try cleaning with a soft cloth moistened with a mild detergent.
6. Open the document cover.
7. Clean the scanner glass and the glass area on the left with a soft, lint-free cloth (microfiber is recommended) moistened with a little glass cleaner.

**Caution:** Do not spray glass cleaner directly on the glass and do not press the glass surface with any force.

8. Close the document cover.
9. Open the ADF cover.

10. Use a soft, moistened, lint-free cloth (microfiber is recommended) to clean the rollers and the interior of the ADF.

11. Close the ADF cover.

Parent topic: Cleaning and Transporting Your Product

**Transporting Your Product**

If you need to store your product or transport it some distance, prepare it for transportation as described here.
Caution: During transportation and storage, follow these guidelines:
• Avoid tilting the product, placing it vertically, or turning it upside down; otherwise ink may leak.

![Caution symbols]

• When storing or transporting an ink bottle after it has been opened, do not tilt the bottle and do not subject it to impacts or temperature changes. Otherwise, ink may leak even if the cap on the ink bottle is tightened securely. Be sure to keep the ink bottle upright when tightening the cap, and take measures to prevent ink from leaking when transporting the ink bottles.
• Do not put opened ink bottles in the box with the product.
• Do not carry the product by its control panel; this may damage the product.
  1. Turn off the product.
  2. Wait until the power light turns off and then unplug the power cable.

Caution: Wait until the power light is off before you unplug the power cable to allow the print head to return to the home position. If the print head does not return to the home position, the ink can dry out and your product can be damaged.
3. Disconnect any connected cables.
4. Remove all the paper from the product.
5. Close the document cover, if necessary.
6. Lift up the scanner unit with both hands until it locks.

7. Secure the print head to the case with tape.
Caution: Do not place tape on the white flat cable inside the product; otherwise, you may damage your product.

8. Make sure the ink tank caps are securely closed and close the ink tank cover.

9. Lower the scanner unit using both hands.

Note: The scanner unit is designed to close slowly and resist a little as a precaution against injuring your fingers. Continue to close the scanner unit even if you feel some resistance.
10. Slide in the output tray and close the front cover, then lower the control panel.

11. Place the product in its original packaging materials, if possible, or use equivalent cushioning around the product.

   Be sure to remove the tape from the print head before turning on your product. If print quality has declined when you print again, clean and align the print head.

Checking for Software Updates

It's a good idea to check Epson's support website occasionally for free updates to your product software. Visit epson.com/support (U.S.) or epson.ca/support (Canada) and select your product.

• **Windows**: Your printer software automatically checks for updates. You can also manually update the software by selecting **Software Update** here:

  • Accessing the Windows Desktop and right-clicking the **icon for your product in the right side of the Windows taskbar, or clicking the up arrow and right-clicking**.
  • On the **Maintenance** tab in the printer settings window
You can also update the software by selecting **EPSON Software Updater** in the **EPSON** or **Epson Software** program group, accessible by the **Start** button, or on the **Start** or **Apps** screens, depending on your version of Windows.

- **OS X**: You can manually update the software by opening the **Applications > Epson Software** folder and selecting **EPSON Software Updater**.

- **macOS 10.12.x, 10.13.x, 10.14.x, 10.15.x, or 11.x**: You can manually update the software by opening the **App Store**, selecting **Updates**, searching for a software update option for Epson Software, and selecting **Update**.

**Parent topic**: Solving Problems

## Viewing the Help Screen

You can view troubleshooting or how-to topics on the LCD screen at any time.

1. Press the ☰ help button.
   
   You see a screen like this:

**Message Appears Prompting You to Reset Ink Levels**

If you see a message on the LCD screen prompting you to reset the ink levels, do the following:

1. Refill all of the ink tanks or the ink tanks indicated on the LCD screen all the way to the top.

   **Note:** Depending on the operating conditions, you may see the ink reset message even when there is still ink in the tanks.

2. Select the colors that you refilled on the LCD screen.
3. Follow the instructions on the LCD screen to reset the ink levels.

   **Note:** The product has a low ink alert system. The accuracy of this system depends on the user refilling the ink tanks correctly. The product cannot directly measure the ink levels in the tanks; instead it
estimates the amount of ink remaining by internally monitoring ink usage. The low ink alert system may generate inaccurate messages if the ink tanks are not refilled according to these instructions.

As a precaution, perform regular visual inspections of the ink tanks to ensure ink levels do not fall below the lower line. Continued use of the product when the ink level is below the lower line on the tank could damage the product.

Running a Product Check

Running a product check helps you determine if your product is operating properly.

1. Disconnect any interface cables connected to your product.
2. Load plain paper in the product.
3. Press the home button, if necessary.
4. Select Maintenance > Print Head Nozzle Check.
5. Select Print.
   The nozzle check pattern is printed.
6. Do one of the following, depending on the results of the product check:
   • If the page prints and the nozzle check pattern is complete, the product is operating properly. Any operation problem you may have could be caused by your computer, cable, software, or selected settings. Check other solutions or try uninstalling and reinstalling your printer software.
   • If the page prints but the nozzle check pattern has gaps, clean or align the print head.
   • If the page does not print, the product may have a problem. Check the other solutions in this manual. If they do not work, contact Epson.

Product Does Not Turn On or Off
Noise After Filling the Ink
Software Installation Problems

Parent topic: Solving Problems

Product Does Not Turn On or Off

If you cannot turn the product on or off, try these solutions:

- If you cannot turn on your product, make sure the power cord is securely connected and hold down the power button a little longer.
• If you cannot turn off your product, hold down the power button a little longer. If you still cannot turn off your product, unplug the power cord, plug the power cord back in, then turn your product on and off again using the power button.

Parent topic: Solving Setup Problems

Noise After Filling the Ink

If you hear noises from your product after filling the ink tanks with ink, check these explanations:
• The first time you fill the tanks with ink, the product must charge its print head. Wait until charging finishes before you turn off the product, or it may charge improperly and use excess ink the next time you turn it on. Your product is finished charging the print head when the power light stops flashing.
• If the product’s print head stops moving or making noise, and the charging process has not finished after approximately 20 minutes, turn off your product. Turn it back on and check to see if charging is still in progress. If it is still in progress, contact Epson for help.

Software Installation Problems

If you have problems while installing your product software, try these solutions:
• Make sure your product is turned on and any necessary cables are securely connected at both ends. If you still have problems installing software, disconnect the cable and carefully follow the instructions on the Start Here sheet. Also make sure your system meets the requirements for your operating system.
• Close any other programs, including screen savers and virus protection software, and install your product software again.
• In Windows, make sure your product is selected as the default printer and the correct port is shown in the printer properties.
• If you see any error message or your software does not install correctly in Windows, you may not have software installation privileges. Contact your system administrator.
• If you are printing over a network, make sure your product is set up properly on the network.
• If the USB cable is not recognized, try using a different USB cable.

Parent topic: Solving Problems

Product Cannot Connect to a Wireless Router or Access Point
If your product has trouble finding or connecting to a wireless router or access point, try these solutions:

• If you are connecting the product via Wi-Fi Protected Setup (WPS) and the Wi-Fi icon on your product's LCD screen is not lit or does not appear, make sure you select one of the WPS options from the product control panel within 2 minutes of pressing the WPS button on your router.

• Make sure to place your product within contact range of your 2.4 GHz router or access point. Avoid placing your product near a microwave oven, 2.4 GHz cordless phone, or large metal object, such as a filing cabinet.

Note: If you are using a 5 GHz wireless router, set the router to operate in dual band (2.4 GHz and 5 GHz) mode. If your router uses a single network name (SSID) for both the 2.4 GHz and 5 GHz band, give each band its own network name (SSID) instead, such as Home Network 2.4 GHz and Home Network 5 GHz. See your router documentation or contact your internet service provider for instructions.
• Verify that your router or access point is operating correctly by connecting to it from your computer or another device.

• Print a network connection report and check the codes and messages on the report to help determine the cause of the problem.

• You may need to disable the firewall and any anti-virus software on your wireless router or access point.

• Try restarting your router following the instructions in your router documentation.

  **Note:** If you are reading these instructions online, you will lose your Internet connection when you restart your router.

• Check to see if access restrictions, such as MAC address filtering, are set on the router or access point. If access restrictions are set, add your product's MAC address to your router's address list. To obtain your product's MAC address, print a network status sheet. Then follow the instructions in your router or access point documentation to add the address to the list.

• If your router or access point does not broadcast its network name (SSID), follow the instructions that came with your product to enter your wireless network name manually.

• If your router or access point has security enabled, determine the kind of security it is using and any required password or passphrase for connection. Then make sure to enter the exact WEP key or WPA passphrase correctly.

• Check if your computer is restricting the available wireless channels. If so, verify that your wireless access point is using one of the usable channels and change to a usable channel, if necessary.

• Turn off the devices you want to connect to the network. Wait for about 10 seconds and then turn on the devices in the following order: wireless router, computer or smart device, and then your product. Move your product and computer or smart device closer to the wireless router to help with radio wave communication, and then try to make network settings again.

• If the IP address assigned to the product is 169.254.XXX.XXX and the subnet mask is 255.255.0.0, the IP address may not be assigned correctly. Check the IP address and the subnet mask assigned to the product. Restart the wireless router or reset the network settings for the product.

• If you are using a Wi-Fi Direct connection that suddenly disconnects, the Wi-Fi direct password on your device may have been changed. If necessary, delete the existing **DIRECT-xxxxxxxx** connection settings from your device and enter a new password. See your device documentation for instructions.

Network Software Cannot Find Product on a Network

If EpsonNet Setup cannot find your product on a network, try these solutions:
• Make sure your product is turned on and connected to your network. Verify the connection using your product control panel.
• Check if your network name (SSID) contains non-ASCII characters. Your product cannot display non-ASCII characters.
• Print a network connection report and check the codes and messages on the report to help determine the cause of the problem.
• Make sure your product is not connected to a guest network.
• If necessary, reinstall your product software and try running EpsonNet Setup again:
  1. Reset your product’s network settings to their factory defaults.
  2. Windows only: Uninstall your product software.
  3. Restart your router following the instructions in your router documentation.

  Note: If you are reading these instructions online, you will lose your Internet connection when you restart your router, so note the next step before restarting it.

  4. Download your product software from the Epson website using the instructions on the Start Here sheet.

  Note: If you have replaced your router, reinstall your product software to connect to the new router.

  Note: If you are using a 5 GHz wireless router, set the router to operate in dual band (2.4 GHz and 5 GHz) mode. If your router uses a single network name (SSID) for both the 2.4 GHz and 5 GHz band, give each band its own network name (SSID) instead, such as Home Network 2.4 GHz and Home Network 5 GHz. See your router documentation or contact your internet service provider for instructions.
• Check to see if your wireless router or access point has an enabled Privacy Separator function that is preventing detection of your device over the network. See your router or access point documentation for instructions on disabling the Privacy Separator function.

• Try accessing any website from your computer to make sure that your computer's network settings are correct. If you cannot access any website, there is a problem on the computer. Check the network connection of the computer. See the documentation provided with the computer for details.

**Product Does Not Appear in Mac Printer Window**

If your product does not appear in the Mac printer window, try these solutions:

• Turn your product off, wait 30 seconds, then turn it back on again.

• If you are connecting the product via Wi-Fi Protected Setup (WPS) and the Wi-Fi icon on your product's LCD screen is not lit, make sure you select one of the WPS options from the product control panel within 2 minutes of pressing the WPS button on your router.

• If you are connecting the product wirelessly via EpsonNet Setup and the Wi-Fi icon does not appear lit on your LCD screen, make sure your product software was installed correctly. If necessary, reinstall your software.

**Note:** If you are using a 5 GHz wireless router, set the router to operate in dual band (2.4 GHz and 5 GHz) mode. If your router uses a single network name (SSID) for both the 2.4 GHz and 5 GHz band, give each band its own network name (SSID) instead, such as Home Network 2.4 GHz and Home Network 5 GHz. See your router documentation or contact your internet service provider for instructions.

Uninstall Your Product Software
Wireless Network Connection is Unstable on a Mac

If you connected a device to a USB 3.0 port on your Mac, you may experience wireless network interference between your product and your Mac.

If you cannot connect to your product over the wireless network or the connection becomes unstable, move the device connected to your Mac USB 3.0 port further away from your Mac.

Parent topic: Solving Network Problems

Wired Network Connection Becomes Unstable

When you connect the product to a wired network using a router or access point that supports IEEE 802.3az (Energy Efficient Ethernet), the connection may become unstable, you may be unable to connect to the product, and the communication speed may become slow. If you experience any of these issues, follow the steps below to disable IEEE 802.3az and then connect your product again.

1. Disconnect the Ethernet cables connected to the computer and your product.
2. Disable IEEE 802.3az for the computer's network adapter if it is enabled (check your operating system's Ethernet connection settings).
3. Connect the computer and your product directly with an Ethernet cable.
4. Print a network connection report from your product.
5. On the computer, open a web browser and enter your product's IP address from the network connection report.
6. Select Advanced Settings > Network Settings > Wired LAN.
7. Select OFF for IEEE 802.3az and click Next.
8. Click OK and remove the Ethernet cable connecting the computer and your product.
9. If you disabled IEEE 802.3az for your computer's network adapter, enable it.
10. Reconnect the Ethernet cables from the router or access point to your computer and product.

If problems still occur, other devices on the network may be causing them.

Printing a Network Connection Report
Cannot Print Over a Network

If you cannot print over a network, try these solutions:

- Make sure that your product is turned on.
- Make sure you install your product's network software as described in your product documentation.
- Make sure that the latest version of your product's Epson printer driver is installed. If a genuine Epson printer driver is not installed, the available functions are limited.
- Print a network status sheet and verify that the network settings are correct. If the network status is Disconnected, check any cable connections and turn your product off and then on again.
- Print a network connection report and check the codes and messages on the report to help determine the cause of the problem.
- If you are using TCP/IP, make sure the product's IP address is set correctly for your network. If your network does not assign IP addresses using DHCP, set the IP address manually.
- Make sure your computer and product are both using the same wireless network.
- If network printing is slow, print a network status sheet and check the signal strength. If it is poor, place your product closer to your router or access point. Avoid placing your product near a microwave oven, cordless phone, or large metal object, such as a filing cabinet.

Note: If you are using a 5 GHz wireless router, set the router to operate in dual band (2.4 GHz and 5 GHz) mode. If your router uses a single network name (SSID) for both the 2.4 GHz and 5 GHz band, give each band its own network name (SSID) instead, such as Home Network 2.4 GHz and Home Network 5 GHz. See your router documentation or contact your internet service provider for instructions.

- Try restarting your router following the instructions in your router documentation.

Note: If you are reading these instructions online, you will lose your Internet connection when you restart your router.

- Check to see if your wireless router or access point has an enabled Privacy Separator function that is preventing printing from a device over the network. See your router or access point documentation for instructions on disabling the Privacy Separator function.

- If you are connecting the product wirelessly via EpsonNet Setup and the Wi-Fi connection icon is not lit or does not appear on the product's LCD screen, make sure your product software was installed correctly. If necessary, reinstall your software.
• Check your product's connection status by opening the EPSON Status Monitor 3 (Windows) or EPSON Status Monitor (Mac) on your computer. If the remaining ink levels are displayed, a connection has been successfully established between your computer and your product.

• If you are printing a large data size image, the computer may run out of memory. Print the image at a lower resolution or a smaller size.

Cannot Scan Over a Network

If you have problems scanning over a network, try these solutions:

• If you cannot scan from your product control panel, make sure you restarted your computer after installing the product software. Make sure the Event Manager program is not being blocked by your firewall or security software.

Note: If you are using a 5 GHz wireless router, set the router to operate in dual band (2.4 GHz and 5 GHz) mode. If your router uses a single network name (SSID) for both the 2.4 GHz and 5 GHz band, give each band its own network name (SSID) instead, such as Home Network 2.4 GHz and Home Network 5 GHz. See your router documentation or contact your internet service provider for instructions.

• If you are scanning a large original at a high resolution, a network communication error may occur. Try scanning again at a lower resolution.

• If network communication was interrupted while starting Epson Scan 2, exit Epson Scan 2, wait a few seconds, and restart it. If Epson Scan 2 cannot restart, turn off your product, turn it back on, and try restarting Epson Scan 2 again.

• Check the scanner setting and reset the connection if necessary using Epson Scan 2 Utility:
Windows 10: Click [+] and select EPSON > Epson Scan 2 Utility. Make sure your product is selected. If necessary, select the Other tab and click Reset.

Windows 8.x: Navigate to the Apps screen, select EPSON, and select Epson Scan 2 Utility. Make sure your product is selected. If necessary, select the Other tab and click Reset.

Windows (other versions): Click 🌐 or Start > All Programs or Programs > EPSON > Epson Scan 2 > Epson Scan 2 Utility. Make sure your product is selected. If necessary, select the Other tab and click Reset.

Mac: Open the Applications folder, click Epson Software, and click Epson Scan 2 Utility. Make sure your product is selected. If necessary, select the Other tab and click Reset.

- You may need to disable the firewall and any anti-virus software on your wireless router or access point.

Solving Copying Problems

Check these solutions if you have problems copying with your product.

Product Makes Noise, But Nothing Copies
Product Makes Noise When It Sits for a While
Copies Have Incorrect or Faint Colors
Position, Size, or Margins of Copies are Incorrect

Parent topic: Solving Problems
Product Makes Noise, But Nothing Copies

If your product makes a noise, but nothing copies, try these solutions:

• Run a nozzle check to see if any of the print head nozzles are clogged. Then clean the print head, if necessary.
• If the nozzle check page does not print, but the product's power is on, make sure your product software is installed correctly.
• Make sure your product is level (not tilted).

Parent topic: Solving Copying Problems

Related concepts
Print Head Nozzle Check
Print Head Cleaning

Product Makes Noise When It Sits for a While

Your product is performing routine maintenance. This is normal.

Parent topic: Solving Copying Problems

Copies Have Incorrect or Faint Colors

If your copies have incorrect, uneven, smeared, or faint colors, try these solutions:

• Run a print head nozzle check to see if any of the nozzles are clogged. Then clean the print head, if necessary.
• Do not press too hard on the original when you copy from the scanner glass.
• Clean the scanner glass with a soft, dry, lint-free cloth or use a small amount of glass cleaner on the cloth, if necessary. Paper towels are not recommended.

Caution: Do not spray glass cleaner directly on the scanner glass.

• Clean the ADF.
• If the colors are smeared, try lowering the copy density setting on the LCD screen.
• Make sure your paper is not curled.
• When vertical banding appears or the paper is smeared, clean the paper path.
• When horizontal banding appears or the top or bottom of the paper is smeared, load paper in the correct direction and slide the edge guides to the edges of the paper.
Position, Size, or Margins of Copies are Incorrect

If the position, size, or margins of your copies are incorrect, try these solutions:

• When placing originals in the ADF, make sure the edge guides are against the edges of the paper.

• When placing originals on the scanner glass, make sure the original is placed correctly for scanning. Align the corner of the original with the corner indicated by the symbol on the scanner glass. If necessary, move the original away from the edges of the scanner glass slightly.

• Clean the scanner glass and ADF.

• Make sure the paper is loaded in the correct direction.

• Select the appropriate Original Size in the copy settings on the LCD screen.

Paper Feeding Problems

Originals Do Not Feed From the Automatic Document Feeder

Paper Jams Inside the Product

Paper Ejection Problems

Parent topic: Solving Problems

Paper Feeding Problems

If you have problems feeding paper, try these solutions:

• Make sure the paper cassette is inserted all the way in the printer.

• Make sure the paper size and type settings match the size and type of paper you loaded.

• If paper does not feed correctly, remove and reload it in the cassette and adjust the edge guides. Make sure the paper stack is not above the tab on the edge guides inside the cassette.

• If multiple pages feed at once, remove the paper, fan the edges to separate the sheets, and reload it.

• Do not load more than the recommended number of sheets.

• Make sure your paper meets the specifications for your product.

• If paper jams when you print on both sides of the paper, try loading fewer sheets.
• For best results, follow these guidelines:
  • Use new, smooth, high-quality paper that is not curled, creased, old, too thin, or too thick.
  • Load paper in the cassette printable side down.
  • Follow any special loading instructions that came with the paper.

  Note: Your product will not operate properly while tilted at an angle. Place it on a flat, stable surface that extends beyond the base of the product in all directions.

• Clean the paper rollers.
• Operate your product in the recommended environmental conditions.

Cleaning the Paper Guide

Originals Do Not Feed From the Automatic Document Feeder

If your originals do not feed when placed in the ADF, try these solutions:
  • Make sure the ADF icon lights up on the Copy, Fax, or Scan screen on the LCD screen. If not, reload the originals.
  • Make sure the size, weight, and number of your originals are supported by the ADF.
  • Make sure the originals are loaded correctly.
  • Make sure the document is not curled or creased.
  • Try cleaning the inside of the ADF.
  • Do not load originals above the arrow mark on the ADF edge guide.
Paper Jams Inside the Product

If you see a message that paper has jammed in the product, follow the on-screen instructions to locate and remove the jammed paper.

Take the following precautions when removing jammed paper from the product:

- Remove the jammed paper carefully. Using too much force may damage the product.
- Unless specifically instructed, avoid tilting the product, placing it on its side, or turning it upside down, as ink may spill.

**Warning:** Never touch the buttons on the control panel while your hand is inside the product. If the product starts operating, it may cause an injury. Do not touch any protruding parts inside the product.
Paper Ejection Problems

If you have problems with paper ejecting properly, try these solutions:

- If paper does not eject fully, you may have set the wrong paper size. Cancel printing to eject the paper. Select the correct paper size when you reprint.
- If paper is wrinkled when it ejects, it may be damp or too thin. Load new paper and be sure to select the correct paper type setting when you reprint.
- If you are using letterhead paper, select the appropriate paper type setting.

Solving Problems Printing from a Computer

Check these sections if you have problems while printing from your computer.

Note: When printing using AirPrint, the available print settings are different from those covered in this manual. See the Apple website for details.

- Nothing Prints
- Product Icon Does Not Appear in Windows Taskbar
- Printing is Slow

Parent topic: Solving Problems

Nothing Prints

If you have sent a print job and nothing prints, try these solutions:

- Make sure your product is turned on and connected to your computer.
• Make sure any interface cables are connected securely at both ends.
• If you connected your product to a USB hub, make sure it is a first-tier hub. If it still does not print, connect your product directly to your computer instead of the hub.
• Make sure the printer status is not offline or pending.
• Make sure you are using the Epson printer driver for your product or the available functions are limited.
• Run a product check to see if a test page prints. If the test page prints, check to see if your product software is installed correctly.
• Make sure your system meets the requirements for your operating system. If you are printing a high-resolution image, you may need more than the minimum requirements. Print the image at a lower resolution or if necessary, increase your system’s memory.
• In Windows, make sure your product is selected as the default printer and the printer port setting matches the printer connection port.
• In Windows, delete all jobs from the Windows Spooler. Click Print Queue on the Maintenance tab in the printer settings window, and cancel any stalled print jobs.
• In Windows, do one of the following to open the Epson Printer Connection Checker and follow the on-screen instructions to check the connection status:
  • **Windows 10:** Click and select Epson Software > Epson Printer Connection Checker.
  • **Windows 8.x:** Navigate to the Apps screen and select the Epson Printer Connection Checker icon.
  • **Windows 7:** Click and select All Programs > Epson Software > Epson Printer Connection Checker.
• On a Mac, make sure the printer is added to the printer list and the printer is not paused.

**Parent topic:** Solving Problems Printing from a Computer

Product Status Messages

**Related tasks**

Running a Product Check
Product Icon Does Not Appear in Windows Taskbar

If you do not see your product icon in the Windows taskbar, first try restarting your computer. If that does not work, try this solution:

1. Do one of the following:
   • **Windows 10**: Click and select (Settings) > Devices > Printers & scanners. Select your product name and select Manage > Printing preferences.
   • **Windows 8.x**: Navigate to the Apps screen and select Control Panel > Hardware and Sound > Devices and Printers. Right-click your product name, select Printing Preferences, and select your product name again if necessary.
   • **Windows 7**: Click and select Devices and Printers. Right-click your product name, select Printing Preferences, and select your product name again if necessary.
   • **Windows Vista**: Click , select Control Panel, and click Printer under Hardware and Sound. Right-click your product name, select Printing Preferences, and select your product name again if necessary.

2. Click the **Maintenance** tab.
3. Click the **Extended Settings** button.
4. Select **Enable EPSON Status Monitor 3** and click **OK**.
5. Click the **Monitoring Preferences** button.
6. Click the checkbox for the option that adds the shortcut icon to the taskbar.
7. Click **OK** to close the open program windows.

Parent topic: Solving Problems Printing from a Computer

Printing is Slow

If printing becomes slow, try these solutions:

• Make sure your system meets the requirements for your operating system. If you are printing a high-resolution image, you may need more than the minimum requirements. If necessary, increase your system's memory.
• If you are using Windows 7, close the Devices and Printers window before you print.
• On a Mac, make sure you download and install the Epson printer driver.
• Make sure **Quiet Mode** is turned off.
• Clear space on your hard drive or run a defragmentation utility to free up existing space.
• Close any programs you are not using when you print.
• If your product is connected to a USB hub, connect it directly to your computer instead.
• If printing becomes slower after printing continuously for a long time, the product may have automatically slowed down to protect the print mechanism from overheating or becoming damaged. Let the product rest with the power on for 30 minutes, then try printing again.
• If you are printing over a wireless network, factors such as interference, network traffic, or weak signal strength may affect your printing speed.

**Note:** If you are using a 5 GHz wireless router, set the router to operate in dual band (2.4 GHz and 5 GHz) mode. If your router uses a single network name (SSID) for both the 2.4 GHz and 5 GHz band, give each band its own network name (SSID) instead, such as Home Network 2.4 GHz and Home Network 5 GHz. See your router documentation or contact your internet service provider for instructions.

For the fastest printing, select the following settings in your product software:

• Turn on any high speed settings in your product software.
• Select a lower print quality setting.
• **Windows:** Click the **Maintenance** or **Utility** tab, select **Extended Settings** or **Speed and Progress**, and select the following settings:
  • **Always Spool RAW Datatype**
  • **Page Rendering Mode**
  • **Print as Bitmap**
• **Windows:** Select **Printing preferences**, click the **More Options** tab, and make sure the **Bidirectional printing** setting is enabled.
• **Mac:** Select **System Preferences**, select **Printers & Scanners**, and select your product. Select **Options & Supplies**, select **Options** (or **Driver**), and enable the **Bidirectional printing** setting.

If printing is still slow and you are using Windows 7 or Windows Vista, try the following:

  1. Click ![Computer](Computer) and select **Computer** or **My Computer**. Double-click the **C:** drive and open these folders: **ProgramData > EPSON > PRINTER**.
Note: If you do not see the ProgramData folder, open the Organize menu and select Folder and search options. In the window that appears, click the View tab, select Show hidden files, folders, and drives in the Advanced settings list, and click OK.

2. Right-click the EPAUDF01.AUD file and select Delete.
3. Restart your computer and try printing again.

Incorrect Characters Print
If incorrect characters appear in your prints, try these solutions before reprinting:

- Make sure any cables are securely connected at both ends.
- In Windows, delete all jobs from the Windows Spooler. Click **Print Queue** on the Maintenance tab in the printer settings window, and cancel any stalled print jobs.
- If your product is connected to a USB hub, connect it directly to your computer instead.
- If incorrect characters still appear in your prints, try connecting your product using a different cable.
- If your computer entered sleep mode the last time you printed, the next print job after your computer exits sleep mode may contain garbled characters. Print your document again.
• Make sure you are using the printer software for this product. Check the product name at the top of the driver window.

Incorrect Image Size or Position

If your printed image is the wrong size or in the wrong position, try these solutions:

• Make sure you selected the correct paper size and layout settings in your printing program and printer software.

• Make sure you selected the correct paper size on the control panel.

• Make sure your paper is positioned correctly for feeding into the printer.

• Clean the scanner glass and document cover.

• If the edges of a copy are cropped, slightly move the original away from the edges of the scanner glass.

• Make sure you selected the correct margins for your paper size in your printing program.

• Be sure to select the appropriate original size setting for your original in the copy settings.

• If the image is slightly enlarged and cropped during borderless printing, change the Expansion setting.

You can use the preview option in your printer software to check your margins before you print.

Solving Print Quality Problems

Check these sections if your printouts have problems with print quality, but your image looks fine on your computer screen.

Note: When printing using AirPrint, the available print settings are different from those covered in this manual. See the Apple website for details.

White or Dark Lines in Printout
Blurry or Smeared Printout
Faint Printout or Printout Has Gaps
Grainy Printout
Incorrect Colors
White or Dark Lines in Printout

If you notice white or dark lines in your prints (also called banding), try these solutions before you reprint:

- Run a nozzle check to see if any of the print head nozzles are clogged. Then clean the print head, if necessary.
- Make sure the paper type setting matches the type of paper you loaded.
- Make sure you loaded the printable side of the paper correctly for your product.
- Turn off any high speed settings in your product software.
- Align the print head.
- Adjust the print quality in the product software.
- When horizontal banding appears or the top or bottom of the paper is smeared, load paper in the correct direction and slide the edge guides to the edges of the paper.
- When vertical banding appears or the paper is smeared, clean the paper path.
- You may need to refill the ink. Visually check the ink levels.
- If you have not used the product for a long time, run the Power Cleaning utility.

**Note:** Power Cleaning consumes a lot of ink, so run this utility only if you cannot improve print quality by cleaning the print head.

Loading Paper

Blurry or Smeared Printout
If your printouts are blurry or smeared, try these solutions:

• Make sure your paper is not damp, curled, old, or loaded incorrectly in your product.
• Slide the edge guides to the edges of the paper.
• Use a support sheet with special paper, or load special paper one sheet at a time.
• Make sure your paper meets the specifications for your product.
• Use Epson papers to ensure proper saturation and absorption of genuine Epson inks.
• Make sure the paper type setting in your product software matches the type of paper you loaded.
• Make sure you loaded the printable side of the paper correctly for your product.
• If you are printing on thick paper or envelopes, make sure you select the appropriate settings. In Windows, you can also try selecting Short Grain Paper in Extended Settings.
• Remove each sheet from the output tray as it is printed.
• Avoid handling printouts on glossy paper right after printing to allow the ink to set.
• Turn off any high speed settings in your product software.
• When vertical banding appears or the paper is smeared, clean the paper path.
• When horizontal banding appears or the top or bottom of the paper is smeared, load paper in the correct direction and slide the edge guides to the edges of the paper.
• If you printed on the wrong side of photo paper, clean the paper path.
• If you print on both sides of a sheet of paper, smudges may appear on the reverse side of heavily saturated or dark images. If one side of a sheet will contain a lighter image or text, print that side first. Make sure the ink has dried before reloading the paper to print on the other side. Adjust the density and/or ink drying time settings.
• Lower the copy density setting on the product control panel.
• The ink levels may be low and you may need to refill the ink. Visually check the ink levels.
• Run a nozzle check to see if any of the print head nozzles are clogged. Then clean the print head, if necessary.
• Align the print head.
• Adjust the print quality in the product software.
• Clean the paper path.
• If you printed when the ink levels were too low to be seen in the ink tank windows, refill the ink tanks to the upper lines and run the Power Cleaning utility. Then run a nozzle check to see if print quality has improved.
• If you have not used the product for a long time, run the Power Cleaning utility.

  **Note:** Power Cleaning consumes a lot of ink, so run this utility only if you cannot improve print quality by cleaning the print head.

**Note:** Your product will not operate properly while tilted at an angle. Place it on a flat, stable surface that extends beyond the base of the product in all directions.

Faint Printout or Printout Has Gaps

If your printouts are faint or have gaps, try these solutions:

- Run a nozzle check to see if any of the print head nozzles are clogged. Then clean the print head, if necessary.
- The ink levels may be low. Visually check the ink levels.
- Make sure the paper type setting matches the type of paper you loaded.
- Make sure your paper is not damp, curled, old, or loaded incorrectly in your product.
- Align the print head.
- Adjust the print quality in the product software.
- Clean the paper path.
- If you have not used the product for a long time, run the Power Cleaning utility.

Note: Power Cleaning consumes a lot of ink, so run this utility only if you cannot improve print quality by cleaning the print head.

- If you printed when the ink levels were too low to be seen in the ink tank windows, refill the ink tanks to the upper lines and then run the Power Cleaning utility to replace the ink inside the ink tubes. After running the utility, run a nozzle check to see if print quality has improved.
- If you cannot solve the problem using head cleaning, you can print immediately from a Windows computer with a mixture of color inks to create composite black. Select the Use a Mixture of Color Inks to Create Black setting from Extended Settings on the printer driver’s Maintenance tab. You can print at Standard print quality when the Paper Type is Plain Paper / Bright White Paper, Letterhead, or Envelope.

Print Head Nozzle Check
Grainy Printout

If your printouts are grainy, try these solutions:

• Make sure you loaded the printable side of the paper correctly for your product.
• Select a higher print quality setting and turn off any high speed settings in your product software.
• Run a nozzle check to see if any of the print head nozzles are clogged. Then clean the print head, if necessary.
• Align the print head.
• Adjust the print quality in the product software.
• You may need to increase the image resolution or print a smaller size; see your software documentation.

Note: Images from the Internet may be low resolution and not result in a high quality printout.

• If you enlarged the image size in an image-editing program, you need to increase the image resolution setting to retain a high image quality. Increase the image resolution by the same amount you increase the image size. For example, if the image resolution is 300 dpi (dots per inch) and you will double the image size for printing, change the resolution setting to 600 dpi.
Note: Higher resolution settings result in larger file sizes, which take longer to process and print. Consider the limitations of your computer system when selecting a resolution, and select the lowest possible resolution that produces acceptable quality to keep file sizes manageable.

Incorrect Colors
If your printouts have incorrect colors, try these solutions:

• Make sure the paper type setting matches the paper you loaded.
• Make sure the Black/Grayscale or Grayscale setting is not selected in your printer software.
• If you selected Standard-Vivid (Windows) or Normal-Vivid (Mac) as the quality setting in the printer software, try selecting Standard (Windows) or Normal (Mac) instead.
• Run a nozzle check to see if any of the print head nozzles are clogged. Then clean the print head, if necessary.
• The ink levels may be low and you may need to refill the ink. Visually check the ink levels.
• If you printed when the ink levels were too low to be seen in the ink tank windows, refill the ink tanks to the upper lines and run the Power Cleaning utility. Then run a nozzle check to see if print quality has improved.
After you print, the colors in your printout need time to set as the ink dries. During this time, the colors may look different than you expect. To speed up drying time, do not stack your printouts on top of each other.

Your printed colors can never exactly match your on-screen colors. However, you can use a color management system to get as close as possible. Try using the color management options in your printer software.

Select Custom as the Color Correction setting on the More Options tab of the printer software, then click Advanced. Try changing the Scene Correction setting to something other than Automatic. If changing that setting does not work, change the Color Management setting to any color correction method other than PhotoEnhance.

For best results, use genuine Epson paper.

If you have not used the product for a long time, run the Power Cleaning utility.

Note: Power Cleaning consumes a lot of ink, so run this utility only if you cannot improve print quality by cleaning the print head.

Solving Scanning Problems
Check these solutions if you have problems scanning with your product.

Scanning Software Does Not Operate Correctly
Cannot Start Epson Scan 2
Scanning is Slow
Cannot Send Scans to a Cloud Service

Parent topic: Solving Problems

**Scanning Software Does Not Operate Correctly**

If your scanning software does not operate correctly, try these solutions:

- Make sure your computer has adequate memory and meets the system requirements for your operating system.
- Make sure your computer is not running in a power-saving mode, such as sleep or standby. If so, wake your system and restart your scanning software.
- If you upgraded your operating system but did not reinstall your scanning software, try reinstalling it.
- In Windows, make sure your product is listed as a valid device in the **Scanners and Cameras** control panel.
- Try scanning at a lower resolution or increase the free space on the computer's hard disk. Scanning stops if the total data size reaches the limit.
- Use the Epson Scan 2 Utility on your computer to reset the scanner software settings. If resetting the settings does not solve the problem, uninstall and reinstall the scanner software.

Parent topic: Solving Scanning Problems

Mac System Requirements

**Cannot Start Epson Scan 2**

If you cannot start Epson Scan 2, try these solutions:

- Make sure your product is turned on and any interface cables are securely connected at both ends.
- Make sure Epson Scan 2 is selected as your scanning program.
- Make sure your computer is not running in a power-saving mode, such as sleep or standby. If so, wake your system and restart Epson Scan 2.
- Check the connection setting and test the connection using Epson Scan 2 Utility:
Windows 10: Click and select EPSON > Epson Scan 2 Utility. Make sure the correct product is selected. If necessary, select the Other tab and click Reset.

Windows 8.x: Navigate to the Apps screen and select Epson Scan 2 Utility. Make sure the correct product is selected. If necessary, select the Other tab and click Reset.

Windows (other versions): Click or Start > All Programs or Programs > EPSON > Epson Scan 2 > Epson Scan 2 Utility. Make sure the correct product is selected. If necessary, select the Other tab and click Reset.

Mac: Open the Applications folder, click Epson Software, and click Epson Scan 2 Utility. Make sure the correct product is selected. If necessary, select the Other tab and click Reset.

• Make sure you do not have multiple versions of Epson Scan 2 installed. If you do, uninstall both versions and install one version.

• If you upgraded your operating system but did not reinstall Epson Scan 2, try reinstalling it.

Solving Scanned Image Quality Problems
Check these sections if a scanned image on your computer screen has a quality problem.

Note: For solutions when using the Epson ScanSmart software, see the Epson ScanSmart help utility.

Image Consists of a Few Dots Only
Line of Dots Appears in All Scanned Images
Straight Lines in an Image Appear Crooked
Scanned Image Quality Problems
Characters are Not Recognized During Conversion to Editable Text (OCR)
Image Colors are Patchy at the Edges
Ripple Patterns Appear in an Image
Scanned Image Edges are Cropped
Resetting the Epson Scan 2 Settings

Parent topic: Solving Problems

Image Consists of a Few Dots Only
If your scanned image consists only of a few dots, try these solutions:
• Make sure you placed your original for scanning facing the correct way.
• If the Image Type setting is Black & White, adjust the Threshold and scan again.
• Remove any lint or dirt from your original.
• Clean the scanner glass.
• Do not press on the original or the document cover with too much force.
Line of Dots Appears in All Scanned Images
If a line of dots appears in all your scanned images, try these solutions:

- Clean the scanner glass with a soft, dry, lint-free cloth or use a small amount of glass cleaner on the cloth, if necessary. Paper towels are not recommended.

  Caution: Do not spray glass cleaner directly on the scanner glass.

- Make sure any interface cables are securely connected at both ends.
- Remove any dust or dirt that may have adhered to your original.

If you are scanning from the ADF, make sure the ADF edge guide fits against the loaded originals. You can also try cleaning the ADF and scanning again.

Straight Lines in an Image Appear Crooked
If straight lines in an original appear crooked in a scanned image, make sure to place your original straight when you scan it.

If you are scanning from the ADF, make sure the ADF edge guide fits against the loaded originals. You can also try cleaning the ADF and scanning again.

Scanned Image Quality Problems
If you encounter quality problems with your scanned image, try these solutions:
Image is Distorted or Blurry
- Do not move your original or your product during scanning.
- Do not press on the document cover or the original with too much force.
- If you are scanning from the ADF, place your originals on the scanner glass. Some originals may not be scanned properly from the ADF.
- Your product will not operate properly while tilted at an angle. Place your product on a flat, stable surface that extends beyond its base in all directions.
- Adjust these Epson Scan 2 or Epson ScanSmart settings (if available) and try scanning again:
  - Increase the Resolution setting.
  - If the Image Type setting is Black & White, adjust the Threshold setting.
  - If the Image Type setting is Color or Grayscale, select the Unsharp Mask setting.
  - If the Image Type setting is Black & White, select Text Enhancement. If the Image Type setting is Color or Grayscale, change the Text Enhancement setting to High.

Image is Too Dark
- If the Image Type is set to Color or Grayscale, adjust the Brightness setting.
- Check the brightness and contrast settings of your computer monitor.

Back of Original Image Appears in Scanned Image
- Place a piece of black paper on the back of the original and scan it again.
- Adjust these Epson Scan 2 or Epson ScanSmart settings (if available) and try scanning again:
  - Select the Advanced Settings tab and adjust the Brightness setting.
  - If the Image Type is set to Black & White, select Text Enhancement. If the Image Type is set to Color or Grayscale, change the Text Enhancement setting to High.

Note: The Text Enhancement and Remove Background settings depend on the selected Image Type.

Scanned Image Colors Do Not Match Original Colors
Printed colors can never exactly match the colors on your computer monitor because printers and monitors use different color systems: monitors use RGB (red, green, and blue) and printers typically use CMYK (cyan, magenta, yellow, and black).
Check the color matching and color management capabilities of your computer, display adapter, and the software you are using to see if they are affecting the palette of colors you see on your screen.

To adjust the colors in your scanned image, adjust these Epson Scan 2 or Epson ScanSmart settings (if available) and try scanning again:

- If the **Image Type** setting is **Color** or **Grayscale**, adjust the **Contrast** setting.
- If the **Image Type** setting is **Black & White** or **Grayscale**, adjust the **Color Enhance** setting.

### Characters are Not Recognized During Conversion to Editable Text (OCR)

If characters in your scanned images are not recognized during OCR conversion, try these solutions:

- Make sure your original is loaded straight on your product.
- Use an original with clear text.
- When saving scanned images as Searchable PDFs, make sure the correct OCR language is selected.
- Adjust the following Epson Scan 2 or Epson ScanSmart settings if available, and try scanning again:
  - On the **Main Settings** tab, make sure you select the correct **Image Type** for your original.
  - On the **Main Settings** tab, set the **Resolution** between 200 and 600 dpi.
  - On the **Advanced Settings** tab, select **Text Enhancement** and choose a setting.

**Note:** The **Text Enhancement** setting depends on the selected **Image Type**.

- If the **Image Type** is set to **Black & White**, adjust the **Threshold** setting on the **Advanced Settings** tab. (The **Image Option** must be set to **None**.)

**Parent topic:** Solving Scanned Image Quality Problems

**Related references**

Image Colors are Patchy at the Edges

If you are scanning a thick or warped original, cover its edges with paper to block external light as you scan it.

Parent topic: Solving Scanned Image Quality Problems

Ripple Patterns Appear in an Image

You may see a ripple pattern (called a moiré) in scanned images of printed documents. This is caused by interference from differing pitches in the scanner's screen and your original's halftone screen. To reduce this effect, adjust these Epson Scan 2 settings (if available) and try scanning again:

- Select the Descreening setting.
- Select a lower Resolution setting.

Parent topic: Solving Scanned Image Quality Problems

Scanned Image Edges are Cropped

If the edges of a scanned image are cropped, make sure your original is placed correctly for scanning. If necessary, move your original away from the edges of the scanner glass slightly.

In the Epson Scan 2 or Epson ScanSmart settings, set the Edge Fill setting to None.

When scanning using Epson ScanSmart and placing multiple originals on the scanner glass, make sure there is a gap of at least 0.8 in. (20 mm) between the originals.

Placing Originals on the Scanner Glass
Resetting the Epson Scan 2 Settings

If you continue to experience image quality problems after trying all possible solutions, you may need to reset the Epson Scan 2 settings using the Epson Scan 2 Utility.

1. Do one of the following to start the Epson Scan 2 Utility:
   - **Windows 10:** Click > EPSON > Epson Scan 2 Utility.
   - **Windows 8.x:** Navigate to the Apps screen and select Epson Scan 2 Utility.
   - **Windows (other versions):** Click or Start, and select All Programs or Programs. Select EPSON > Epson Scan 2 > Epson Scan 2 Utility.
   - **Mac:** Open the Applications folder, open the Epson Software folder, and select Epson Scan 2 Utility.

2. Click the Other tab.

3. Click Reset and confirm your choice.

**Note:** If resetting the Epson Scan 2 settings does not solve your problem, uninstall Epson Scan 2 and re-install it.

Solving Faxing Problems

Check these solutions if you have problems faxing with your product.

- **Cannot Send or Receive Faxes**
- **Cannot Receive Faxes with a Telephone Connected to Your Product**
- **Fax Memory Full Error Appears**
- **Fax Quality is Poor**
- **Sent Fax is Received in an Incorrect Size**
- **Received Fax is Not Printed**

Parent topic: Solving Problems

Cannot Send or Receive Faxes

If you cannot send or receive faxes, try these solutions:

- If you are faxing from a computer, use the Epson FAX Utility to send your fax.
• Make sure the recipient's fax machine is turned on and working.
• Make sure paper is loaded correctly in your product.
• Make sure you have set up your header information and have not blocked your caller ID. Otherwise, your faxes might be rejected by the recipient's fax machine.
• If you did not connect a telephone to your product, set the Receive Mode setting to Auto so you can receive faxes automatically.
• Check that the cable connecting your telephone wall jack to your product's LINE port is secure.
• Print a fax connection report using your product control panel or fax software to help diagnose the problem.
• Verify that the telephone wall jack works by connecting a phone to it and testing it.
• Check the Line Type setting and set it to PBX. If your phone system requires an external access code to reach an outside line, register the code to the product and add a # (hash) to the beginning of the phone number when dialing.
• If you connected your product to a DSL phone line, you must connect a DSL filter to the phone jack to enable faxing over the line. Contact your DSL provider for the necessary filter.
• Try lowering your product's fax speed setting.
• If your telephone line uses call waiting and you have trouble receiving faxes, turn off call waiting to prevent disruption of incoming faxes.
• If you have subscribed to a call forwarding service, the product may not be able to receive faxes. Contact your service provider for assistance.
• Check your inbox and delete faxes after reading or printing them. If the inbox is full, the product cannot receive faxes.
• If you cannot send faxes at a specified time, make sure the date and time are set correctly on the product.

Note: If your product is connected to a VoIP (Voice over Internet Protocol) phone line, keep in mind that fax machines are designed to work over analog phone lines. Epson cannot guarantee that fax transmission will work when using VoIP.

If your phone line includes voice mail answering services, calls or faxes may be inadvertently received by your voice mail service.

Parent topic: Solving Faxing Problems
Cannot Receive Faxes with a Telephone Connected to Your Product

If you cannot receive faxes when a telephone is connected to your product, try these solutions:

- Make sure your telephone is connected to your product's EXT port.
- Make sure the Receive Mode is set to Manual.

Note: When answering a call that is a fax, wait until the product's LCD screen displays a message that a connection has been made before you hang up.

Fax Memory Full Error Appears

If you see an error message telling you that the product's fax memory is full, try these solutions:

- If you set the product to save received faxes in the product's memory or inbox, delete any faxes you have already read.

Note: Your product can store up to 100 faxes before its inbox is full.

- If you set the product to save received faxes on a computer, turn on the selected computer. Once the faxes are saved on the computer, they are deleted from the product's memory.
- If the memory is full, try the following:
  - Send a monochrome fax using the direct sending feature
• Send your faxes in smaller batches
• If the product cannot print a received fax due to a product error, such as a paper jam, the memory full error may appear. Clear any product errors, then ask the sender to resend the fax.

Parent topic: Solving Faxing Problems

Related tasks

Setting Up the Fax Utility - Windows

Fax Quality is Poor

If you receive a poor quality fax, try these solutions:
• Try enabling the error correction mode (ECM) setting.
• Contact the fax sender and ask them to send the fax in a higher resolution.
• Try reprinting the received fax.

If the sent fax quality is poor, try these solutions:
• Clean the scanner glass.
• Clean the ADF.
• Try changing the resolution or density setting on the control panel.
• Do not press on the document cover or the original with too much force.
• Remove any dust or dirt from the originals.
• If you are sending a monochrome fax to a single recipient, try sending the fax using the Direct Send feature.

Note: If you send a high-resolution monochrome fax without using the Direct Send feature, the product may automatically lower the resolution.

• Try enabling the error correction mode (ECM) setting.
• If the back of the original appears in your sent fax, place a piece of black paper on the back of the original and fax it again.

Cleaning Your Product

**Sent Fax is Received in an Incorrect Size**
If your recipient receives a fax in an incorrect size, try these solutions:

• If you are sending a fax using the scanner glass, make sure your original is placed correctly and that the correct paper size is selected on the control panel.

• Clean the scanner glass and document cover.

Parent topic: Solving Faxing Problems
Related tasks
Cleaning Your Product

**Received Fax is Not Printed**
If a received fax is not printed, try these solutions:

• Make sure the product is free of errors. The product cannot print received faxes if an error has occurred with the product, such as a paper jam.

• If the product has been set to save received faxes in the product's memory or inbox, received faxes are not automatically printed. Check the **Receive Settings** options on the product control panel and change them, if necessary.

**Uninstall Your Product Software**
If you have a problem that requires you to uninstall and re-install your software, follow the instructions for your operating system.

Uninstalling Product Software - Windows
Uninstalling Product Software - Mac

Parent topic: Solving Problems
Uninstalling Product Software - Windows

You can uninstall and then re-install your product software to solve certain problems.

1. Turn off the product.
2. Disconnect any interface cables.
3. Do one of the following:

   - **Windows 10**: Click and select (Settings) > Apps or System > Apps & features. Then select the program you want to uninstall and select Uninstall.
   - **Windows 8.x**: Navigate to the Apps screen and select Control Panel > Programs > Programs and Features. Select the uninstall option for your Epson product, then select Uninstall/Change.

   Note: If you see a User Account Control window, click Yes or Continue.

4. Do one of the following to uninstall Epson Event Manager, then follow any on-screen instructions:

   - **Windows 10/8.x**: Select Epson Event Manager and click Uninstall.
   - **Windows 7/Windows Vista**: Open the Windows Control Panel utility. Select Programs and Features. (In Classic view, select Programs and click Uninstall a program.) Select Epson Event Manager and click Uninstall/Change.

5. Do one of the following to uninstall Epson Scan 2, then follow any on-screen instructions:

   - **Windows 10**: Select Epson Scan 2 and click Uninstall.
   - **Windows 8.x/Windows 7/Windows Vista**: Select Epson Scan 2 and click Uninstall/Change.

6. Do one of the following to uninstall Epson ScanSmart, then follow any on-screen instructions:

   - **Windows 10**: Select Epson ScanSmart and click Uninstall.
   - **Windows 8.x/Windows 7/Windows Vista**: Select Epson ScanSmart and click Uninstall/Change.
7. Restart your computer, then see the Start Here sheet to re-install your software.

Note: If you find that re-installing your product software does not solve a problem, contact Epson.

Uninstalling Product Software - Mac

In most cases, you do not need to uninstall your product software before re-installing it. However, you can download the Uninstaller utility from the Epson support website to uninstall your product software as described here.

Note: If you find that re-installing your product software does not solve a problem, contact Epson.

1. To download the Uninstaller utility, visit epson.com/support (U.S.) or epson.ca/support (Canada) and select your product.
2. Click Downloads.
3. Select your operating system, click Utilities, locate the Uninstaller utility, and click Download.
4. Run the file you downloaded.
5. Double-click the Uninstaller icon.
6. In the Epson Uninstaller screen, select the checkbox for each software program you want to uninstall.
7. Click Uninstall.
8. Follow the on-screen instructions to uninstall the software.
9. Reinstall your product software.

Note: If you uninstall the printer driver and your product name remains in the Print & Fax, Print & Scan, or Printers & Scanners window, select your product name and click the – (remove) icon to remove it.

Where to Get Help
Where to Get Help

If you need to contact Epson for technical support services, use the following support options.

Internet Support
Visit Epson’s support website at epson.com/support (U.S.) or epson.ca/support (Canada) and select your product for solutions to common problems. You can download drivers and documentation, get FAQs and troubleshooting advice, or e-mail Epson with your questions.

Speak to a Support Representative
Before you call Epson for support, please have the following information ready:
• Product name
• Product serial number (located on a label on the product)
• Proof of purchase (such as a store receipt) and date of purchase
• Computer configuration
• Description of the problem
Then call:
• U.S.: (562) 276-4382, 6 AM to 8 PM, Pacific Time, Monday through Friday, and 7 AM to 4 PM, Pacific Time, Saturday
• Canada: (905) 709-3839, 6 AM to 8 PM, Pacific Time, Monday through Friday, and 7 AM to 4 PM, Pacific Time, Saturday
Days and hours of support are subject to change without notice. Toll or long distance charges may apply.

Purchase Supplies and Accessories
You can purchase genuine Epson ink and paper at epson.com (U.S. sales) or epson.ca (Canadian sales). You can also purchase supplies from an Epson authorized reseller. To find the nearest one, call 800-GO-EPSON (800-463-7766) in the U.S. or 800-807-7766 in Canada.

Ink Specifications

**Note:** Epson's warranties do not extend to any damage caused by the use of third-party ink or ink not designed for your printer.
The included initial ink bottles must be used for printer setup and are not for resale. The printer ships with full ink bottles and part of the ink from the first bottles is used to charge the print head. Yields vary considerably based on images printed, print settings, paper type, frequency of use and temperature.

**Color**  
Black, Cyan, Magenta, Yellow

**Ink life**  
Opened package: Use as soon as possible  
Unopened package: Use before the date on the package has expired

**Temperature**  
Storage: –4 to 104 °F (–20 to 40 °C)  
1 month at 104 °F (40 °C)  
Ink freezes at 5 °F (–15 °C)  
Ink thaws and is usable after approximately 2 hours at 77 °F (25 °C)

Safety and Approvals Specifications

United States
Safety: UL60950-1
EMC: FCC Part 15 Subpart B Class B

Canada
Safety: CAN/CSA-C22.2 No.60950-1
EMC: CAN ICES-3 (B)/NMB-3 (B)

This equipment contains the following wireless module:
• Manufacturer: Seiko Epson Corporation
• Type: J26H006

This product conforms to Part 15 of FCC Rules and RSS-210 of the IC Rules. Epson cannot accept responsibility for any failure to satisfy the protection requirements resulting from a non-recommended modification of the product. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation of the device.

To prevent radio interference to the licensed service, this device is intended to be operated indoors and away from windows to provide maximum shielding. Equipment (or its transmit antenna) that is installed outdoors is subject to licensing.

This equipment complies with FCC/IC radiation exposure limits set forth for an uncontrolled environment and meets the FCC radio frequency (RF) Exposure Guidelines in Supplement C to OET65 and RSS-102 of the IC radio frequency (RF) Exposure rules. This equipment should be installed and operated so that the radiator is kept at least 7.9 inches (20 cm) or more away from a person's body (excluding extremities: hands, wrists, feet and ankles).

Important Safety Instructions

Before using your Epson product, read and follow these safety instructions.

General Product Safety Instructions
Wireless Connection Safety Instructions
LCD Screen Safety Instructions
Telephone Equipment Safety Instructions

Parent topic: Notices

General Product Safety Instructions

• Be sure to follow all warnings and instructions marked on the product.
• Use only the type of power source indicated on the product's label.
• Use only the power cord that comes with the product. Use of another cord may cause fires or shock. Do not use the cord with any other equipment.
• Make sure the AC power cord meets the relevant local safety standard.
• Place the product near a wall outlet where the plug can be easily unplugged.
• Avoid plugging the product into an outlet on the same circuit as a photo copier or air control system that regularly switches on and off, or on an outlet controlled by a wall switch or timer.
• Do not let the power cord become damaged or frayed. Place it to avoid abrasions, cuts, fraying, crimping, and kinking. Do not place objects on top of it and do not allow it to be stepped on or run over. Be careful to keep the cord straight at each end.
• If you use an extension cord with the product, make sure the total ampere rating of the devices plugged into the extension cord does not exceed the cord's ampere rating. Also, make sure the total ampere rating of all devices plugged into the wall outlet does not exceed the wall outlet's ampere rating.

• Always turn off the product using the power button, and wait until the power light stops flashing before unplugging the product or cutting off power to the electrical outlet.

• If you will not be using the product for a long period, unplug the power cord from the electrical outlet.

• Place the product on a flat, stable surface that extends beyond its base in all directions. It will not operate properly if it is tilted or at an angle.

• Allow space behind the product for the cables, and space above the product so that you can fully raise the document cover.

• Leave enough space in front of the product for the paper to be fully ejected.

• Avoid locations that are subject to rapid changes in heat or humidity, shocks or vibrations, or dust.

• Do not place or store the product outdoors.

• Do not place the product near excessive heat sources or in direct sunlight.

• Leave enough room around the product for sufficient ventilation. Do not block or cover openings in the case or insert objects through the slots.

• Keep the product away from potential sources of electromagnetic interference, such as loudspeakers or the base units of cordless telephones.

• Keep your product at least 8.7 inches (22 cm) away from cardiac pacemakers to prevent your product's radio waves from affecting the operation of the pacemaker.

• When connecting the product to a computer or other device with a cable, ensure the correct orientation of the connectors. Each connector has only one correct orientation. Inserting a connector in the wrong orientation may damage both devices connected by the cable.

• Do not sit or lean on the product. Do not place heavy objects on the product.

• Do not touch the flat white cable, translucent film, or ink tubes inside the product.

• Do not move the print head by hand; this may damage the product.

• Do not put your hand inside the product while it is printing.

• Do not spill liquid on the product or use the product with wet hands.

• Do not use aerosol products that contain flammable gases inside or around the product. Doing so may cause fire.

• Do not press too hard on the scanner glass when placing originals.
- Do not open the scanner section while the product is copying, printing, scanning, or performing any other functions.
- Be careful not to trap your fingers when closing the document cover or scanner unit.
- Except as specifically explained in your documentation, do not attempt to service or disassemble the product yourself.
- Unplug the product and refer servicing to qualified service personnel under the following conditions: if the power cord or plug is damaged; if liquid has entered the product; if the product has been dropped or the case damaged; if the product does not operate normally or exhibits a distinct change in performance. Adjust only those controls that are covered by the operating instructions.
- Prolonged use of the product when the ink level is below the lower line could damage the product. Fill the ink tank to the upper line while the product is not operating. To display the correct ink level estimates, reset the ink level after filling the tank.
- Before transporting the product, make sure that the print head is in the home (far right) position.
- When storing or transporting the product, do not tilt it, stand it on its side, or turn it upside down; otherwise, ink may leak.

**Wireless Connection Safety Instructions**

Radio waves from this product may adversely affect the operation of medical equipment or automatically controlled devices, such as pacemakers, automatic doors or fire alarms. When using this product near such devices or inside a medical facility, follow the directions from authorized staff members at the facility, and follow all posted warnings and directions on the device to avoid causing an accident.

**Parent topic:** [Important Safety Instructions](#)

**LCD Screen Safety Instructions**

- Use only a dry, soft cloth to clean the LCD screen. Do not use liquid or chemical cleansers.
- If the LCD screen is damaged, contact Epson. If the liquid crystal solution gets on your hands, wash them thoroughly with soap and water. If the liquid crystal solution gets into your eyes, flush them immediately with water. If discomfort or vision problems remain after a thorough flushing, see a doctor immediately.
- Do not press too hard on the LCD screen or subject it to heavy impacts.
- Do not use a pointy or sharp object, such as a pen or your fingernail, to operate the LCD screen.
- If the LCD screen chips or cracks, do not touch or attempt to remove the broken pieces; contact Epson for support.
• Do not subject your product to sudden changes in temperature or humidity; this may cause condensation to develop inside the LCD screen and degrade its performance.
• The LCD screen may contain a few small bright or dark spots, and may display uneven brightness. These are normal and do not indicate that the screen is damaged in any way.

Telephone Equipment Safety Instructions

When using telephone equipment, you should always follow basic safety precautions to reduce the risk of fire, electric shock, and personal injury, including the following:
• Do not use the Epson product near water.
• Avoid using a telephone during an electrical storm. There may be a remote risk of electric shock from lightning.
• Do not use a telephone to report a gas leak in the vicinity of the leak.

Caution: To reduce the risk of fire, use only a No. 26 AWG or larger telecommunication line cord.

Parent topic: Important Safety Instructions

FCC Compliance Statement

For United States Users

This equipment complies with Part 68 of the FCC rules and the requirements adopted by the Administrative Council for Terminal Attachments ("ACTA"). On the surface of this equipment is a label that contains, among other information, a product identifier in the format US:AAAAEQ##TXXXX. If requested, this number must be provided to the telephone company.

Applicable certification jack Universal Service Order Codes ("USOC") for the equipment: RJ11C.

A plug and jack used to connect this equipment to the premises wiring and telephone network must comply with the applicable FCC Part 68 rules and requirements adopted by the ACTA. A compliant telephone cord and modular plug is provided with this product. It is designed to be connected to a compatible modular jack that is also compliant. See installation instructions for details.

The REN is used to determine the number of devices that may be connected to a telephone line. Excessive RENs on a telephone line may result in the devices not ringing in response to an incoming call. In most but not all areas, the sum of RENs should not exceed five (5.0). To be certain of the number of devices that may be connected to a line, as determined by the total RENs, contact the local telephone company. For products approved after July 23, 2001, the REN for this product is part of the product
identifier that has the format US:AAAEQ##TXXXX. The digits represented by ## are the REN without a decimal point (e.g., 03 is a REN of 0.3). For earlier products, the REN is separately shown on the label.

If this equipment causes harm to the telephone network, the telephone company will notify you in advance that temporary discontinuance of service may be required. But if advance notice isn’t practical, the telephone company will notify the customer as soon as possible. Also, you will be advised of your right to file a complaint with the FCC if you believe it is necessary.

The telephone company may make changes in its facilities, equipment, operations, or procedures that could affect the operation of the equipment. If this happens the telephone company will provide advance notice in order for you to make necessary modifications to maintain uninterrupted service.

If you have problems with this product and require technical or customer support, please visit www.epson.com for more information.

This product is not intended to be repaired by the customer. If you experience trouble connecting this equipment to a telephone line, please contact:

Name: Epson America, Inc.
Address: 3131 Katella Ave., Los Alamitos, CA 90720 U.S.A.
Telephone: (562) 981-3840

If the equipment is causing harm to the telephone network, the telephone company may request that you disconnect the equipment until the problem is resolved.

This equipment may not be used on coin service provided by the telephone company. Connection to party line service is subject to state tariffs. Contact the state public utility commission, public service commission or corporation commission for information.

If your home has specially wired alarm equipment connected to the telephone line, ensure the installation of this equipment does not disable your alarm equipment. If you have questions about what will disable alarm equipment, consult your telephone company or a qualified installer.

The Telephone Consumer Protection Act of 1991 makes it unlawful for any person to use a computer or other electronic device, including fax machines, to send any message unless such message clearly contains in a margin at the top or bottom of each transmitted page or on the first page of the transmission, the date and time it is sent and an identification of the business or other entity, or other individual sending the message and the telephone number of the sending machine or such business, other entity, or individual. (The telephone number provided may not be a 900 number or any other number for which charges exceed local or long-distance transmission charges.)

In order to program this information into your fax machine, click the link below for instructions on entering fax header information.

According to the FCC’s electrical safety advisory, we recommend that you may install an AC surge arrester in the AC outlet to which this equipment is connected. Telephone companies report that
electrical surges, typically lightning transients, are very destructive to customer terminal equipment connected to AC power sources and that this is a major nationwide problem.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio or television reception. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause interference to radio and television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

**WARNING**

The connection of a non-shielded equipment interface cable to this equipment will invalidate the FCC Certification or Declaration of this device and may cause interference levels which exceed the limits established by the FCC for this equipment. It is the responsibility of the user to obtain and use a shielded equipment interface cable with this device. If this equipment has more than one interface connector, do not leave cables connected to unused interfaces. Changes or modifications not expressly approved by the manufacturer could void the user’s authority to operate the equipment.

**For Canadian Users**

1. This product meets the applicable Innovation, Science and Economic Development Canada technical specifications.

2. The Ringer Equivalence Number indicates the maximum number of devices allowed to be connected to a telephone interface. The termination of an interface may consist of any combination of devices subject only to the requirement that the sum of the RENs of all the devices does not exceed five.

**CAN ICES-3(B)/NMB-3(B)**

Le présent produit est conforme aux spécifications techniques applicables d’Innovation, Sciences et Développement économique Canada.

L’indice d’équivalence de la sonnerie (IES) sert à indiquer le nombre maximal de dispositifs qui peuvent être raccordés à une interface téléphonique. La terminaison d’une interface peut consister en une combinaison quelconque de dispositifs, à la seule condition que la somme des IES de tous les dispositifs n’excède pas cinq.
1. **DISPUTES, BINDING INDIVIDUAL ARBITRATION, AND WAIVER OF CLASS ACTIONS AND CLASS ARBITRATIONS**

1.1 **Disputes.** The terms of this Section 1 shall apply to all Disputes between you and Epson. The term "Dispute" is meant to have the broadest meaning permissible under law and includes any dispute, claim, controversy or action between you and Epson arising out of or relating to this Agreement, Epson branded products (hardware and including any related software), or other transaction involving you and Epson, whether in contract, warranty, misrepresentation, fraud, tort, intentional tort, statute, regulation, ordinance, or any other legal or equitable basis. "DISPUTE" DOES NOT INCLUDE IP CLAIMS, or more specifically, a claim or cause of action for (a) trademark infringement or dilution, (b) patent infringement, (c) copyright infringement or misuse, or (d) trade secret misappropriation (an "IP Claim"). You and Epson also agree, notwithstanding Section 1.6, that a court, not an arbitrator, may decide if a claim or cause of action is for an IP Claim.

1.2 **Binding Arbitration.** You and Epson agree that all Disputes shall be resolved by binding arbitration according to this Agreement. ARBITRATION MEANS THAT YOU WAIVE YOUR RIGHT TO A JUDGE OR JURY IN A COURT PROCEEDING AND YOUR GROUNDS FOR APPEAL ARE LIMITED. Pursuant to this Agreement, binding arbitration shall be administered by JAMS, a nationally recognized arbitration authority, pursuant to its code of procedures then in effect for consumer related disputes, but excluding any rules that permit joinder or class actions in arbitration (for more detail on procedure, see Section 1.6 below). You and Epson understand and agree that (a) the Federal Arbitration Act (9 U.S.C. §1, et seq.) governs the interpretation and enforcement of this Section 1, (b) this Agreement memorializes a transaction in interstate commerce, and (c) this Section 1 shall survive termination of this Agreement.

1.3 **Pre-Arbitration Steps and Notice.** Before submitting a claim for arbitration, you and Epson agree to try, for sixty (60) days, to resolve any Dispute informally. If Epson and you do not reach an agreement to resolve the Dispute within the sixty (60) days, you or Epson may commence an arbitration. Notice to Epson must be addressed to: Epson America, Inc., ATTN: Legal Department, 3131 Katella Ave., Los Alamitos, CA 90720 (the "Epson Address"). The Dispute Notice to you will be sent to the most recent address Epson has in its records for you. For this reason, it is important to notify us if your address changes by emailing us at EAILegal@ea.epson.com or writing us at the Epson Address above. Notice of the Dispute shall include the sender's name, address and contact information, the facts giving rise to the
Dispute, and the relief requested (the "Dispute Notice"). Following receipt of the Dispute Notice, Epson and you agree to act in good faith to resolve the Dispute before commencing arbitration.

1.4 Small Claims Court. Notwithstanding the foregoing, you may bring an individual action in the small claims court of your state or municipality if the action is within that court's jurisdiction and is pending only in that court.

1.5 WAIVER OF CLASS ACTIONS AND CLASS ARBITRATIONS. YOU AND EPSON AGREE THAT EACH PARTY MAY BRING DISPUTES AGAINST THE OTHER PARTY ONLY IN AN INDIVIDUAL CAPACITY, AND NOT AS A PLAINTIFF OR CLASS MEMBER IN ANY CLASS OR REPRESENTATIVE PROCEEDING, INCLUDING WITHOUT LIMITATION FEDERAL OR STATE CLASS ACTIONS, OR CLASS ARBITRATIONS. CLASS ACTION LAWSUITS, CLASS-WIDE ARBITRATIONS, PRIVATE ATTORNEY-GENERAL ACTIONS, AND ANY OTHER PROCEEDING WHERE SOMEONE ACTS IN A REPRESENTATIVE CAPACITY ARE NOT ALLOWED. ACCORDINGLY, UNDER THE ARBITRATION PROCEDURES OUTLINED IN THIS SECTION, AN ARBITRATOR SHALL NOT COMBINE OR CONSOLIDATE MORE THAN ONE PARTY'S CLAIMS WITHOUT THE WRITTEN CONSENT OF ALL AFFECTED PARTIES TO AN ARBITRATION PROCEEDING.

1.6 Arbitration Procedure. If you or Epson commences arbitration, the arbitration shall be governed by the rules of JAMS that are in effect when the arbitration is filed, excluding any rules that permit arbitration on a class or representative basis (the "JAMS Rules"), available at http://www.jamsadr.com or by calling 1-800-352-5267, and under the rules set forth in this Agreement. All Disputes shall be resolved by a single neutral arbitrator, and both parties shall have a reasonable opportunity to participate in the selection of the arbitrator. The arbitrator is bound by the terms of this Agreement. The arbitrator, and not any federal, state or local court or agency, shall have exclusive authority to resolve all disputes arising out of or relating to the interpretation, applicability, enforceability or formation of this Agreement, including any claim that all or any part of this Agreement is void or voidable. Notwithstanding this broad delegation of authority to the arbitrator, a court may determine the limited question of whether a claim or cause of action is for an IP Claim, which is excluded from the definition of "Disputes" in Section 1.1 above. The arbitrator shall be empowered to grant whatever relief would be available in a court under law or in equity. The arbitrator may award you the same damages as a court could, and may award declaratory or injunctive relief only in favor of the individual party seeking relief and only to the extent necessary to provide relief warranted by that party's individual claim. In some instances, the costs of arbitration can exceed the costs of litigation and the right to discovery may be more limited in arbitration than in court. The arbitrator's award is binding and may be entered as a judgment in any court of competent jurisdiction.

You may choose to engage in arbitration hearings by telephone. Arbitration hearings not conducted by telephone shall take place in a location reasonably accessible from your primary residence, or in Orange County, California, at your option.

a) Initiation of Arbitration Proceeding. If either you or Epson decides to arbitrate a Dispute, both parties agree to the following procedure:
(i) Write a Demand for Arbitration. The demand must include a description of the Dispute and the amount of damages sought to be recovered. You can find a copy of a Demand for Arbitration at http://www.jamsadr.com ("Demand for Arbitration").

(ii) Send three copies of the Demand for Arbitration, plus the appropriate filing fee, to: JAMS, 500 North State College Blvd., Suite 600 Orange, CA 92868, U.S.A.

(iii) Send one copy of the Demand for Arbitration to the other party (same address as the Dispute Notice), or as otherwise agreed by the parties.

b) Hearing Format. During the arbitration, the amount of any settlement offer made shall not be disclosed to the arbitrator until after the arbitrator determines the amount, if any, to which you or Epson is entitled. The discovery or exchange of non-privileged information relevant to the Dispute may be allowed during the arbitration.

c) Arbitration Fees. Epson shall pay, or (if applicable) reimburse you for, all JAMS filings and arbitrator fees for any arbitration commenced (by you or Epson) pursuant to provisions of this Agreement.

d) Award in Your Favor. For Disputes in which you or Epson seeks $75,000 or less in damages exclusive of attorney's fees and costs, if the arbitrator’s decision results in an award to you in an amount greater than Epson's last written offer, if any, to settle the Dispute, Epson will: (i) pay you $1,000 or the amount of the award, whichever is greater; (ii) pay you twice the amount of your reasonable attorney's fees, if any; and (iii) reimburse you for any expenses (including expert witness fees and costs) that your attorney reasonably accrues for investigating, preparing, and pursuing the Dispute in arbitration. Except as agreed upon by you and Epson in writing, the arbitrator shall determine the amount of fees, costs, and expenses to be paid by Epson pursuant to this Section 1.6d).

e) Attorney's Fees. Epson will not seek its attorney's fees and expenses for any arbitration commenced involving a Dispute under this Agreement. Your right to attorney's fees and expenses under Section 1.6d) above does not limit your rights to attorney's fees and expenses under applicable law; notwithstanding the foregoing, the arbitrator may not award duplicative awards of attorney's fees and expenses.

1.7 Opt-out. You may elect to opt-out (exclude yourself) from the final, binding, individual arbitration procedure and waiver of class and representative proceedings specified in this Agreement by sending a written letter to the Epson Address within thirty (30) days of your assent to this Agreement (including without limitation the purchase, download, installation of the Software or other applicable use of Epson Hardware, products and services) that specifies (i) your name, (ii) your mailing address, and (iii) your request to be excluded from the final, binding individual arbitration procedure and waiver of class and representative proceedings specified in this Section 1. In the event that you opt-out consistent with the procedure set forth above, all other terms shall continue to apply, including the requirement to provide notice prior to litigation.

1.8 Amendments to Section 1. Notwithstanding any provision in this Agreement to the contrary, you and Epson agree that if Epson makes any future amendments to the dispute resolution procedure and
class action waiver provisions (other than a change to Epson’s address) in this Agreement, Epson will obtain your affirmative assent to the applicable amendment. If you do not affirmatively assent to the applicable amendment, you are agreeing that you will arbitrate any Dispute between the parties in accordance with the language of this Section 1 (or resolve disputes as provided for in Section 1.7, if you timely elected to opt-out when you first assented to this Agreement).

1.9 Severability. If any provision in this Section 1 is found to be unenforceable, that provision shall be severed with the remainder of this Agreement remaining in full force and effect. The foregoing shall not apply to the prohibition against class or representative actions as provided in Section 1.5. This means that if Section 1.5 is found to be unenforceable, the entire Section 1 (but only Section 1) shall be null and void.
