<sup>1</sup> Some functions may not be supported by Mac®, like accessing memory cards when the all-in-one is networked.  
<sup>2</sup> For sending faxes, on Windows only  
<sup>3</sup> User supplied cable required to fully or partially charge USB devices that comply with USB 2.0 standards, rated 500 mA or less.  
<sup>4</sup> One-year limited warranty to all purchasers; toll-free support and second-year warranty require registration within 60 days of purchase.  
 With registration, Epson provides free customer phone support for the life of the product. Under warranty, calls are toll free. Offer valid only in the United States.  
<sup>5</sup> Based on accelerated testing of prints displayed under glass in indoor display or in album conditions. Actual print stability will vary according to media, printed image, display conditions, light intensity, temperature, humidity and atmospheric conditions. Epson does not guarantee the longevity of prints. For maximum print life, display all prints under glass or UV filter or properly store them.  
<sup>6</sup> Calculated printing/copying 5 sheets of letter-size color documents per day, one day defined as 8 hours with the power on and 16 hours with the power off. Power consumption will vary according to the customer's product usage. Based on a 2008 national average electricity cost of 11.47 cents per kWh.  
<sup>7</sup> See our website for convenient and reasonable recycling options at [www.epson.com/recycle](http://www.epson.com/recycle)  
<sup>†</sup> Maximum pages/copies per minute (PPM/CPM) are measured after first page with text patterns in Draft Mode on plain paper. Color photo in Draft Mode on Premium Photo Paper Glossy measured from start of paper feed. Laser quality black and color print speeds are determined in default, single-side mode in accordance with ISO/IEC 24734. Actual print times will vary based on system configuration, software, and page complexity. See [www.epson.com/printspeed](http://www.epson.com/printspeed) for details, including complete ISO reports.  
<sup>††</sup> Adapter required.  
<sup>†††</sup> Cartridge yields are based on continuous printing of a suite of five black and color pages as required by ISO/IEC 24711 and 24712. Actual yields will vary considerably for reasons including images printed, print settings, temperature and humidity. Yields may be lower when printing infrequently or predominantly with one ink color. A variable amount of ink remains in the cartridges after the "replace cartridge" signal. Part of the ink from the first cartridges is used for priming the all-in-one. Ink is used for both printing and print head maintenance. All inks are used for both black and color printing. For more information about yields for this all-in-one, see [www.epson.com/cartridgeinfo](http://www.epson.com/cartridgeinfo)
