Adjusting Control Panel Position

You can adjust the position of the control panel to make it easier to access. Raise or lower it to the desired angle as shown.
Changing LCD Screen Language
You can change the language used on the LCD screen.
1. Press the Home button, if necessary.
2. Press the arrow buttons and then select Setup.
3. Select Printer Setup.
4. Press the arrow buttons and then select Language.
5. Select a language.
6. Press the Home button to exit.

Turning Off Control Panel Sounds
You can turn off the sound heard when you press buttons on the control panel.
1. Press the Home button, if necessary.
2. Press the arrow buttons and then select Setup.
3. Select Printer Setup.
4. Select Sound.
5. Select Button Press.
6. Select the Off setting.
7. Press the Home button to exit.

Selecting Wireless Network Settings From the Touch Panel

You can select or change wireless network settings using your product touch panel.

To install your product on a wireless network, follow the instructions on the Start Here sheet and install the necessary software from the product CD. The installer program guides you through network setup.
**Note:** Breakdown or repair of this product may cause loss of fax and network data and settings. Epson is not responsible for backing up or recovering data and settings during or after the warranty period. We recommend that you make your own backup or print out your fax and network data and settings.

1. Press the 🏡 Home button, if necessary.
2. Press the arrow buttons and then select Setup.
3. Press the arrow buttons and then select Wi-Fi/Network Settings.
4. Select Wi-Fi Setup.
   You see this screen:

   ![Wi-Fi Setup screen](image)

5. Select Wi-Fi Setup Wizard.

   **Note:** If you need to disable the wireless network to set up your product on an Ethernet network, press the arrow buttons and select Disable Wi-Fi instead. Then follow the instructions on the Start Here sheet to set up your product on a wired network and install the necessary software from the product CD. The installer program guides you through network setup.

6. Select the name of your wireless network or enter the name manually.

   **Note:** To enter the wireless network name manually, press the arrow buttons and then select Other SSIDs. Use the displayed keypad to enter your network name, as described in the next step.
7. Enter your wireless password (or network name and then password) using the displayed keypad.

![Enter Password Keypad]

- Press the arrow buttons to move the cursor to the previous or next space.
- Press the number buttons repeatedly to select uppercase letters (ABC), lowercase letters (abc), or numbers (123) and symbols (*!#&).
- To enter a space, select .
- To delete characters, select .
- When you finish entering characters, press the OK button.

8. Confirm the displayed network settings and press the OK button to save them.

   **Note:** If you need to change a setting, press the Back button.

9. If you want to print a network setup report, press the Start button. (Otherwise, select Cancel.)

10. Press the Home button to exit.

    The WiFi light should now be on, but not flashing.

    **Note:** If the WiFi light is off, you may have selected the wrong network name or entered the password incorrectly. Repeat these steps to try again.

Loading Paper

Before you print, load paper for the type of printing you will do.

Loading Paper in the Main Tray
Loading Paper in the Photo Tray
Loading Envelopes
Paper Loading Capacity
Available Epson Papers
Borderless Paper Type Compatibility
Paper or Media Type Settings

Loading Paper in the Main Tray

You can load larger-size paper in the main tray in the paper cassette.

Note: Make sure the CD/DVD tray is closed.

1. Close the output tray, if necessary.
2. Open the front cover.

3. Pull out the paper cassette.
4. Remove any paper loaded in the photo tray on top, if necessary.
5. Slide in the main tray extension (if it is extended) and flip back the photo tray.

6. Pinch the tabs on the main tray edge guides and slide them outward.
7. Load a stack of paper, printable side down, in the main tray as shown.

8. Slide the left edge guide to the edge of the paper.

Note: Make sure the paper fits beneath the top edges of the guide.

9. Slide the front edge guide to the position marked for your paper size.
1. Various paper sizes are marked on the tray

**Note:** Make sure the paper fits beneath the top of the edge guide and does not flip up at the back end of the tray.

10. Lower the photo tray.

11. If you need to load paper in the photo tray, see the instructions for that section.
12. Replace the paper cassette.

13. Extend the output tray and open the paper stopper.
**Note:** Do not remove or insert the paper cassette during printing.

Follow these guidelines for loading paper of this size or longer: Legal (8.5 × 14 inches [216 × 357 mm]):

- Load one sheet at a time.
- Extend the paper cassette and close the paper stopper on the output tray.
- If necessary, allow the end of longer paper to protrude from the paper cassette.

---

**Loading Paper in the Photo Tray**

You can load smaller-size photo paper and other media in the photo tray in the paper cassette.

**Note:** If you also need to load paper in the main tray, follow the instructions for that section first. Make sure the CD/DVD tray is not ejected.

1. Close the output tray, if necessary.
2. Open the front cover.

3. Pull out the paper cassette.
4. Pinch the tabs on the photo tray edge guides and slide them outward.

5. Load photo paper, printable side down, in the photo tray as shown.

    ![Photo tray with paper loaded](image)

    **Note:** Make sure the paper fits beneath the top edge of the guide.

6. Slide the left edge guide to the edge of the paper.

    ![Left edge guide](image)

    **Note:** Make sure the paper fits beneath the top edge of the guide.
7. Slide the front edge guide to the position marked for your paper size.

1. Various paper sizes are marked on the tray

8. Replace the paper cassette.
9. Extend the output tray and open the paper stopper.

Note: Do not remove or insert the paper cassette during printing.

Loading Paper in the Main Tray  
Loading Envelopes

**Loading Envelopes**

You can load envelopes in the main tray of the paper cassette. You can print on plain paper envelopes in this size: No. 10 (4.1 × 9.5 inches [105 × 241 mm]).
1. Close the output tray, if necessary.

2. Open the front cover.
3. Pull out the paper cassette.

4. Remove any paper loaded in the photo tray on top, if necessary.

5. Slide in the main tray extension (if it is extended) and flip back the photo tray.
6. Pinch the tabs on the main tray edge guides and slide them outward.

7. Load up to 10 envelopes in the main tray as shown. Load them printable side down and flap edge left.
8. Slide the edge guides to the edges of the envelopes.

9. Lower the photo tray.
10. Slide the photo tray forward and make sure the envelopes do not flip up at the back end of the tray.

11. If you need to load paper in the photo tray, see the instructions for that section.
12. Replace the paper cassette.
13. Extend the output tray and open the paper stopper.

Always follow these envelope loading guidelines:
- If you have trouble loading a stack of envelopes, press each envelope flat before loading it or load one envelope at a time.
- Do not load envelopes that are curled, folded, or too thin.

Placing Originals on the Product

Follow the instructions here to place your original documents or photos on the product.

**Caution:** Do not place anything on top of your product or use its cover as a writing surface to avoid damaging it.

Placing Originals on the Scanner Glass
Placing Originals in the Automatic Document Feeder

Placing Originals on the Scanner Glass

You can place originals up to this size on the scanner glass: Letter (8.5 × 11 inches [216 × 279 mm]) or A4 (8.3 × 11.7 inches [210 × 297 mm]).

1. Open the document cover.
2. Place your original facedown on the scanner glass with the top of the original facing as shown. Slide the original to the edges of the indicated corner.

**Note:** You can place multiple originals on the scanner glass. Just make sure they are at least 0.25 inch (5 mm) away from each other and from the edge of the scanner glass.
3. If you are copying two book pages onto one sheet, place the book as shown to copy the first page, then turn the book as shown to copy the second page.

4. Close the document cover gently to keep your original in place.

Placing Originals in the Automatic Document Feeder

You can place multi-page original documents in the Automatic Document Feeder (ADF). Make sure the originals meet the Automatic Document Feeder specifications before loading them.

Caution: Make sure your originals are not creased or folded, or contain holes, staples, tape, or other materials that could obstruct the feeder.
1. Open the ADF paper support.

2. Slide the ADF edge guide outward.
3. Fan your stack of originals and tap them gently on a flat surface to even the edges.

4. Insert the originals into the ADF faceup and top-edge first.
5. Slide the ADF edge guide against the originals, but not too tightly.

Copying Documents

You can copy documents onto plain paper or Epson special papers.

1. Place your original document on the scanner glass.
2. Load the paper you want to print on.

   Note: Load only the recommended number of sheets.

3. Press the Home button, if necessary.
4. Select Copy.

   You see this screen:
5. Select **Color** or **B&W**.

6. To print more than one copy, press the + or – button to select the number (up to 99).

7. If you need to adjust the darkness of your copy, press the arrow buttons to change the **Density** setting.

8. To change any of the print settings displayed on the LCD screen, press the **Menu** button, select **Paper and Copy Settings**, select the necessary settings, and then press the **OK** button.

9. When you are ready to copy, press the **Start** button.

    **Note:** To cancel printing, select **Cancel**.

Copying Photos

You can copy color or black-and-white photos onto specific sizes and types of paper, including Epson special papers, for instant photo reprints. You can also restore the colors in faded photos as you copy.

1. Place your original photo on the scanner glass.
2. Load the paper you want to print on.

   **Note:** Load only the recommended number of sheets.

3. Press the Home button, if necessary.
4. Select Copy.

   You see this screen:

![Copy screen](image)

5. Press the Menu button and then select Copy/Restore Photos. You see this screen:
6. To restore colors in faded photos as you copy, select **On**. If your photo or photos are not faded, leave this setting off.

7. Place one or two photos on the glass as shown on the LCD screen. For multiple photos, place them at least 0.25 inch (5 mm) apart.

8. Press the **OK** button to prescan your photo or photos.

9. Press the **OK** button to continue.

10. When you see your scanned image on the LCD screen, you can do one of the following:
    - To print more than one copy of the photo, press the + or – button to select the number (up to 99).
    - To crop, zoom into, or rotate your photo, press the **Display/Crop** button.
    - If you’re copying more than one photo, press the arrow buttons and repeat the selections above.

11. Press the **OK** button to continue.
    You see a screen like this:
To change any of the settings displayed on the LCD screen, press the Menu button, select Paper and Copy Settings, select the necessary settings, and then press the OK button.

12. When you are ready to print, press the Start button.

Note: To cancel printing, select Cancel.

Printing with Windows

You can print with your product using any Windows printing program, as described in these sections.

Selecting Basic Print Settings - Windows
Selecting Advanced Print Settings - Windows
Selecting Print Layout Options - Windows
Selecting Double-sided Printing Settings - Windows
Selecting a Printing Preset - Windows
Printing Your Document or Photo - Windows
Selecting Default Print Settings - Windows
Changing Automatic Update Options

Parent topic: Printing From a Computer

Selecting Basic Print Settings - Windows

Select the basic settings for the document or photo you want to print.

1. Open a photo or document for printing.
2. Select the print command in your application.

Note: You may need to select a print icon on your screen, the Print option in the File menu, or another command. See your application's help utility for details.
3. If necessary, select your product name as the printer you want to use.

   Note: You may also need to select Properties or Preferences to view your print settings.

You see the Main tab of your printer settings window:

4. Select the Quality Option setting that matches your print content and the print quality you want to use.

5. Select the Paper Source setting that indicates where you loaded the paper you want to print on.

6. Select the type of paper you loaded as the Type setting.

   Note: Check the paper type settings list for details.
7. Select the size of the paper you loaded as the **Size** setting.

   **Note:** You can also select the **User Defined** setting to create a custom paper size.

8. Select one of the border options:
   - If you are printing a borderless photo, select **Borderless**.
     
     **Note:** You must select a compatible borderless paper type and size to print borderlessly. Check the borderless paper compatibility list for details.
   - If you are printing a document or a photo with borders, select **Borders**.

9. Select the orientation of your document or photo as shown in the printer settings window.

   **Note:** If you are printing an envelope, select **Landscape**.

10. To print on both sides of the paper, select one of the **2-Sided Printing** options.

11. Select any of the available print options.

   **Note:** If you need to access the Epson product support website, select the **Online Support** button.

---

**Basic Print Options - Windows**

**Parent topic:** Printing with Windows

**Basic Print Options - Windows**

You can select any of the basic print options to customize your print. Some options may be pre-selected or unavailable, depending on other settings you have chosen.

**Fix Photo**

Improves the color, contrast, and sharpness of flawed photos.

   **Note:** Fix Photo uses a sophisticated face recognition technology to optimize photos that include faces. For this to work, both eyes and the nose must be visible in the subject's face. If your photo includes a face with an intentional color cast, such as a statue, you may want to turn off **Fix Photo** to retain the special color effects.

**Fix Red-Eye**

Reduces or removes red-eye in photos.
**Reverse Order**
Prints multi-page print jobs last page first.

**Print Preview**
Displays a preview of your printout before printing.

**Parent topic:** Selecting Basic Print Settings - Windows

---

**Selecting Advanced Print Settings - Windows**

Select print settings on the Advanced tab to customize the quality and color settings for your printout, and save your own printing presets.

1. Click the **Advanced** tab.

   You see the advanced print settings:
2. Select the **Paper & Quality Options** settings for your printout:
   • Select where you loaded the paper you want to print on.
   • Select the type of paper you loaded.

   **Note:** Check the paper type settings list for details.

   • Select the print quality setting you want to use.

   **Note:** Check the print quality setting list for details.

   • Select the size of the paper you loaded.
   • Select **Borderless** to print a borderless photo, or **Borders** to print a document or a photo with borders.

   **Note:** You must select a compatible borderless paper type and size to print borderlessly. Check the borderless paper compatibility list for details.

3. Select **Portrait** or **Landscape** as the orientation of your document or photo.

   **Note:** If you are printing an envelope, select **Landscape**.

4. Select any of the available advanced print options.

5. Select any of the available color management options, or turn off color management.

   **Advanced Print Quality Settings - Windows**

Printing Your Document or Photo - Windows
Selecting Double-sided Printing Settings - Windows
**Advanced Print Quality Settings - Windows**

You can select any of the print quality settings to fine-tune the quality of your print. Some settings may be unavailable, depending on the paper type and border setting you have chosen.

- **Fast Economy**
  For the fastest printing with draft quality.

- **Economy**
  For fast printing with reduced quality.

- **Draft**
  For draft printing on photo paper.

- **Normal**
  For everyday text and image printing.

- **Fine**
  For text and graphics with good quality and print speed.

- **Photo**
  For photos and graphics with good quality and print speed.

- **Photo RPM**
  For the best print quality, but the slowest print speed.

**Parent topic:** Selecting Advanced Print Settings - Windows

**Advanced Print Options - Windows**

You can select any of the print options to customize your print. Some options may be unavailable, depending on other settings you have chosen.

- **Fix Red-Eye**
  Reduces or removes red-eye in photos.

- **High Speed**
  Speeds up printing, but may reduce print quality.

- **Edge Smoothing**
  Prints sharper edges on low-resolution images, such as bars in a graph.

- **Print Preview**
  Displays a preview of your printout before printing.

- **Black/Grayscale**
  Prints text and graphics in black or shades of gray.

**Parent topic:** Selecting Advanced Print Settings - Windows
**Color Management Options - Windows**

You can adjust the **Color Management** settings on the Advanced tab to fine-tune the colors in your printout, or turn off color management in your printer software.

**Color Controls**
- Lets you select a **Color Mode** setting, individual settings for **Brightness**, **Contrast**, **Saturation**, and **Density**, and individual color tones. If you select the **Adobe RGB** color mode, you can also adjust the midtone density using the **Gamma** setting.

**Fix Photo**
- Improves the color, contrast, and sharpness of flawed photos.

**Note:** Fix Photo uses a sophisticated face recognition technology to optimize photos that include faces. For this to work, both eyes and the nose must be visible in the subject's face. If your photo includes a face with an intentional color cast, such as a statue, you may want to turn off **Fix Photo** to retain the special color effects.

**ICM**
- Lets you turn off color management in your printer software using the **Off (No Color Adjustment)** option. You can then manage color using only your application software.

**Parent topic:** Selecting Advanced Print Settings - Windows

---

**Selecting Print Layout Options - Windows**

You can select a variety of sizing and layout options for your document or photo on the Page Layout tab.
• To change the size of your printed document or photo, select the **Reduce/Enlarge Document** checkbox and select sizing options.

• To print on both sides of your paper, select the **2-sided printing** options.

• To print multiple pages on one sheet of paper, or print one image on multiple sheets of paper, select the **Multi-Page** checkbox and select the options you want.

• To print multiple copies and arrange their print order, select the **Copies** options.

• To control printing at the edges of borderless images, select a **Borderless** option:
  - To adjust the automatic settings, select **Auto Expand** as the Enlargement Method setting, then adjust the **Expansion** slider (if necessary) to control the amount of image expansion.
Note: If you select the Min option for the Expansion setting, you may see white borders on your printed photo.

- To print the borderless image at its actual size without scaling, select Retain Size as the Enlargement Method setting.
- To add a watermark to your printout, select Watermark settings.
- To rotate or flip the printed image, select the Rotate 180° or Mirror Image checkboxes.

Selecting Double-sided Printing Settings - Windows

Selecting Double-sided Printing Settings - Windows

You can print on both sides of the paper by selecting one of the 2-Sided Printing options on the Main tab. You can select additional settings for double-sided printing on the Page Layout tab.

Note: Some options may be pre-selected or unavailable, depending on other settings you have chosen or if you are accessing the product over a network.

1. Select one of the 2-Sided Printing options on the Page Layout tab:
   - Select Auto to automatically print double-sided.
   - Select Manual to print double-sided by first printing one side, then flipping the paper over to print the other side (recommended for paper types that do not support automatic duplexing).
2. If you want to create a booklet from your printed pages, select the Folded Booklet checkbox.
3. Click the Settings button.
   You see this window:
4. Select the double-sided printing options you want to use.
5. Click **OK** to return to the Page Layout tab.
6. To prevent ink from bleeding through the page, click the **Adjust Print Density** button. 
   You see this window:
7. Select the type of document you are printing. The software automatically sets the Adjustments options for that document type.

8. If you selected the Manual document type, select the Adjustments options you want to use.

9. Click OK.

10. Print a test copy of your double-sided document to test the selected settings.

11. Follow any instructions displayed on the screen during printing.

Print Density Adjustments - Windows

Parent topic: Printing with Windows

Double-sided Printing Options - Windows
You can select any of the available options on the 2-Sided Printing Settings window to set up your double-sided print job.

Binding Edge Options
Select a setting that orients double-sided print binding in the desired direction.

Binding Margin Options
Select options that define a wider margin to allow for binding.
**Booklet Options**
Select a binding option to print double-sided pages as a booklet.

**Parent topic:** Selecting Double-sided Printing Settings - Windows

**Print Density Adjustments - Windows**
When you select the Manual setting, you can select any of the available options on the Print Density Adjustment window to adjust the print quality of your double-sided print job.

**Print Density**
Sets the level of ink coverage for double-sided printing.

**Increased Ink Drying Time**
Sets the amount of time required for drying ink after printing on one side of the paper before printing the other side in double-sided printing.

**Parent topic:** Selecting Double-sided Printing Settings - Windows

**Selecting a Printing Preset - Windows**
For quick access to common groups of print settings, you can select a printing preset.

**Note:** You can create your own preset by clicking the Save Settings button on the Advanced tab.

1. Click the Shortcuts tab.
   You see the available Printing Presets options:
2. Place your cursor over a Printing Presets option to view its list of settings.
3. Use any of the available options on the screen to control your printing presets.
4. To choose an option for printing, select it.
5. Click OK.

**Parent topic:** Printing with Windows

**Printing Your Document or Photo - Windows**

Once you have selected your print settings, you are ready to save your settings and print.
1. Click **OK** to save your settings.
   
   You see your application's Print window, such as this one:
2. Click **OK** or **Print** to start printing.

Checking Print Status - Windows

**Parent topic:** Printing with Windows

Checking Print Status - Windows

During printing, you see this window showing the progress of your print job. It allows you to control printing and check ink cartridge status.
• To cancel printing, click **Stop**.
• To see print jobs lined up for printing, click **Print Queue**.
• To check ink status, click **Check Ink Levels**.

**Parent topic:** Printing Your Document or Photo - Windows

### Selecting Default Print Settings - Windows

When you change your print settings in a program, the changes apply only while you are printing in that program session. If you want to change the print settings you use in all your Windows programs, you can select new default print settings.

1. Right-click the product icon in the Windows taskbar.
2. Select **Printer Settings**.
   
   You see the printer settings window:
3. Select the print settings you want to use as defaults in all your Windows programs.
4. Click OK.

These settings are now the defaults selected for printing. You can still change them as needed for printing in any program session.

**Changing the Language of the Printer Software Screens**

**Parent topic:** Printing with Windows

**Changing the Language of the Printer Software Screens**

You can change the language used on the Windows printer software screens.

1. Right-click the product icon in the Windows taskbar.
2. Select **Printer Settings**.
   
   You see the printer settings window.

3. Click the **Maintenance** tab.
   
   You see the maintenance options:

   ![Printer Settings Window](image)

4. Select the language you want to use as the **Language** setting.

5. Click **OK** to close the printer software window.

The printer software screens appear in the language you selected the next time you access them.

**Parent topic:** Selecting Default Print Settings - Windows
Changing Automatic Update Options

Your printer software for Windows automatically checks for updates to the product driver and firmware. You can change how often the software checks for updates or disable this feature.

1. Right-click the product icon in the Windows taskbar.
2. Select **Auto Update Settings**.
   
   You see this window:

3. Do one of the following for each type of update:
   
   • To change how often the software checks for updates, select a setting in the **Check every** menu.
   
   • To disable the automatic update feature, select the **Never** option.

4. Click **Apply**.

5. Click **OK** to exit.

**Note:** If you choose to disable the automatic update feature, it's a good idea to periodically check for updates on Epson's support website.
Printing with Mac OS X 10.5, 10.6, or 10.7
You can print with your product using any Mac OS X printing program, as described in these sections.

Selecting Basic Print Settings - Mac OS X 10.5/10.6/10.7
Selecting Page Setup Settings - Mac OS X 10.5/10.6/10.7
Selecting Print Layout Options - Mac OS X 10.5/10.6/10.7
Selecting Double-sided Printing Settings - Mac OS X 10.5/10.6/10.7
Managing Color - Mac OS X 10.5/10.6/10.7
Printing Your Document or Photo - Mac OS X 10.5/10.6/10.7
Selecting Printing Preferences - Mac OS X 10.5/10.6/10.7

Parent topic: Printing From a Computer

Selecting Basic Print Settings - Mac OS X 10.5/10.6/10.7
Select the basic settings for the document or photo you want to print.

1. Open a photo or document for printing.
2. Select the print command in your application.

   **Note:** You may need to select a print icon on your screen, the Print option in the File menu, or another command. See your application's help utility for details.

3. Select your product as the Printer setting.
4. If necessary, click the arrow next to the Printer setting or the **Show Details** button to expand the print window.

You see the expanded printer settings window for your product:

![Expanded Printer Settings Window](image)

**Note:** The print window may look different, depending on the version of Mac OS X and the application you are using.
5. Select the **Copies** and **Pages** settings as necessary.

   **Note:** If you do not see these settings in the print window, check for them in your application before printing.

6. Select the page setup options: **Paper Size** and **Orientation**.

   **Note:** If you do not see these settings in the print window, check for them in your application before printing. They may be accessible by selecting **Page Setup** from the File menu.

7. Select any application-specific settings that appear on the screen, such as those shown in the image above for the Preview application.

8. Select **Print Settings** from the pop-up menu.

You see these settings:
9. Select the type of paper you loaded as the **Media Type** setting.

   **Note:** The setting may not exactly match the name of your paper. Check the paper type settings list for details.

10. Select the **Print Quality** setting you want to use.

11. Select any of the available print options.

**Print Quality Settings - Mac OS X 10.5/10.6/10.7**

Printing Your Document or Photo - Mac OS X 10.5/10.6/10.7
Print Quality Settings - Mac OS X 10.5/10.6/10.7

You can select any of the print quality settings to fine-tune the quality of your print. Some settings may be unavailable, depending on the paper type and border setting you have chosen.

Fast Economy
For the fastest printing with draft quality.

Economy
For fast printing with reduced quality.

Draft
For draft printing on photo paper.

Normal
For everyday text and image printing.

Fine
For text and graphics with good quality and print speed.

Photo
For photos and graphics with good quality and print speed.

Photo RPM
For the best print quality, but the slowest print speed.

Print Options - Mac OS X 10.5/10.6/10.7

You can select any of the print options to customize your print. Some options may be unavailable, depending on other settings you have chosen.

Expansion
If you selected a borderless paper size setting, adjusts the image expansion settings to control printing at the edges of borderless prints.

Grayscale
Prints text and graphics in black or shades of gray.

Mirror Image
Lets you flip the printed image horizontally.

Note: If you select the Min option for the Expansion setting, you may see white borders on your printed photo.

Parent topic: Selecting Basic Print Settings - Mac OS X 10.5/10.6/10.7
Selecting Page Setup Settings - Mac OS X 10.5/10.6/10.7

Depending on your application, you may be able to select the paper size and orientation settings from the print window.

![Paper Size: US Letter 8.50 by 11.00 inches | Orientation:](image)

**Note:** If you do not see these settings in the print window, check for them in your application before printing. They may be accessible by selecting **Page Setup** from the File menu.

1. Select the size of the paper you loaded as the **Paper Size** setting. If you are printing a borderless photo, select a paper size with a **(Borderless)** option. You can also select a custom setting to create a custom paper size.

   **Note:** You must select a compatible borderless paper type and size to print borderlessly. Check the borderless paper compatibility list for details.

2. Select the orientation of your document or photo as shown in the print window.

   **Note:** If you are printing an envelope, select the icon.

**Note:** You can reduce or enlarge the size of the printed image by selecting **Paper Handling** from the pop-up menu and selecting a scaling option.

**Parent topic:** Printing with Mac OS X 10.5, 10.6, or 10.7

Borderless Paper Type Compatibility

Selecting Print Layout Options - Mac OS X 10.5/10.6/10.7

You can select a variety of layout options for your document or photo by selecting **Layout** from the pop-up menu on the print window.
• To print multiple pages on one sheet of paper, select the number of pages in the **Pages per Sheet** pop-up menu. To arrange the print order of the pages, select a **Layout Direction** setting.
• To print borders around each page on the sheet, select a line setting from the **Border** pop-up menu.
• To invert or flip the printed image, select the **Reverse page orientation** or **Flip horizontally** settings.

Parent topic: Printing with Mac OS X 10.5, 10.6, or 10.7

**Selecting Double-sided Printing Settings - Mac OS X 10.5/10.6/10.7**

You can print on both sides of the paper by selecting **Two-sided Printing Settings** or **Output Settings** from the pop-up menu on the print window.
**Note:** Some options may be pre-selected or unavailable, depending on other settings you have chosen or if you are accessing the product over a network. This screen may be different, depending on the version of Mac OS X you are using.

1. Select one of the **Two-sided Printing** options.
2. Select the type of document you are printing as the **Document Type** setting. The software automatically sets the Adjustments options for that document type.

3. If necessary, customize the Adjustments settings as instructed on the screen.

4. Print a test copy of your double-sided document to test the selected settings.

5. Follow any instructions displayed on the screen during printing.

**Double-sided Printing Options and Adjustments - Mac OS X**

**Parent topic:** Printing with Mac OS X 10.5, 10.6, or 10.7

**Double-sided Printing Options and Adjustments - Mac OS X**

You can select any of the available options in the **Two-sided Printing Settings** or **Output Settings** pop-up menu to set up your double-sided print job.

**Two-sided Printing Options**

**Long-Edge binding**

Orients double-sided printed pages to be bound on the long edge of the paper.

**Short-Edge binding**

Orients double-sided printed pages to be bound on the short edge of the paper.
Adjustments

Print Density
Sets the level of ink coverage for double-sided printing.

Increased Ink Drying Time
Sets the amount of time required for drying ink after printing on one side of the paper before printing the other side in double-sided printing.

Managing Color - Mac OS X 10.5/10.6/10.7

You can adjust the Color Matching and Color Options settings to fine-tune the colors in your printout, or turn off color management in your printer software.

1. Select **Color Matching** from the pop-up menu in the print window.

   ![Color Matching Menu]

2. Select one of the available options.

3. Select **Color Options** from the pop-up menu in the print window.

   ![Color Options Menu]

   **Note:** The available settings on the Color Options menu depend on the option you selected on the Color Matching menu.

4. Select one of the available options.

   Color Matching and Color Options - Mac OS X 10.5/10.6/10.7
Parent topic: Printing with Mac OS X 10.5, 10.6, or 10.7

Color Matching and Color Options - Mac OS X 10.5/10.6/10.7
You can select from these settings on the **Color Matching** and **Color Options** menus.

**Color Matching Settings**

**EPSON Color Controls**
Lets you manage color using controls in your printer software, or turn off color management.

**ColorSync**
Prints using standard color profiles for your product and paper to help match image colors. You can customize the conversion method and filter settings on the ColorSync pop-up menu in the print window.

**Color Options Settings**

**Manual Settings**
Lets you select manual color adjustments. Click the arrow next to **Advanced Settings** and select settings for **Brightness**, **Contrast**, **Saturation**, and individual color tones. You can also select a color **Mode** setting for printing photos and graphics. If you select the **Adobe RGB** color mode, you can also adjust the midtone density using the **Gamma** setting.

**Fix Photo**
Improves the color, contrast, and sharpness of flawed photos.

Note: Fix Photo uses a sophisticated face recognition technology to optimize photos that include faces. For this to work, both eyes and the nose must be visible in the subject's face. If your photo includes a face with an intentional color cast, such as a statue, you may want to turn off **Fix Photo** to retain the special color effects.

**Off (No Color Adjustment)**
Turns off color management in your printer software so you can manage color using only your application software.

   Parent topic: Printing From a Computer
Starting a Scan Using the Product Control Panel

You can scan an image to your computer using your product’s touch panel buttons. Your product automatically selects suitable default scan settings, but you can view or change them as necessary.

1. Make sure you installed the product software and connected the product to your computer or network.

   **Note:** With Mac OS X 10.6/10.7, you must connect your product with a USB cable to scan using the touch panel buttons.

2. Press the Home button, if necessary.

3. Select Scan.

   The scan options are displayed:
4. Press the arrow buttons to view additional scan options, then select the one you want.
   - **Scan to Memory Card** saves your scan file on a memory card and lets you select the file format, quality, and other settings.
   - **Scan to PC** saves your scan file directly to your computer or as an image capture in Mac OS X 10.6/10.7.
   - **Scan to PC (PDF)** saves your scan as a PDF file to your computer or as an image capture in Mac OS X 10.6/10.7.
   - **Scan to PC (Email)** scans your original and attaches it to a message in your e-mail program. You can select the e-mail program you want to use and resize your image, if necessary, from an option screen on your computer.

   **Note:** This works with MAPI-type email such as Microsoft Outlook, Windows Live Mail, Mac Mail, and Entourage, but not web-based email such as Gmail.

   - **Scan to PC (WSD)** lets you manage wireless scanning in Windows 7 or Windows Vista (English only).

5. To scan to your PC, you first need to select how you connected your product to your computer:
   - If your product is connected directly to your computer with a USB cable, select **USB Connection**.
   - If your product is connected to your computer over a network, select the computer name from the list.

6. Press the ✈ **Start** button to start scanning.

Scanning in Home Mode

When you scan in Home Mode, Epson Scan automatically saves your scanned file in JPEG format in your operating system's Pictures or My Pictures folder, or opens it in your scanning program. You can select settings, preview, and change the scanned file settings as necessary.

1. Start Epson Scan and select **Home Mode** as the Mode setting.
   
   You see this window:
2. Select the **Document Type** setting that matches your original, such as **Photograph** or **Text/Line Art**.

3. Select the **Image Type** setting that matches your original.
4. Select the way you plan to use your scanned image as the **Destination** setting. (The Resolution setting is selected automatically based on the Destination setting you choose.)
   - **Screen/Web**: Select this option for images you will e-mail, view on a computer screen, or post on the web.
   - **Printer**: Select this option for images you will print or documents you will convert to editable text using OCR (Optical Character Recognition) software.
   - **Other**: Select this option if you want to select a custom resolution for your image.

5. If you selected **Other** in the last step, select the **Resolution** setting you want to use for your scan.

6. Click the **Preview** button.
   - Epson Scan previews your original and displays the result in a separate Preview window.

7. If desired, select the area in your preview image that you want to scan (scan area).

8. Select any of the image adjustment settings you want to use. Before making adjustments, click the image or scan area in the Preview window.

9. If you want to reduce or enlarge your image as you scan, select the **Target Size** setting you want to use.

10. Click **Scan**.
    - You see the File Save Settings window.

11. Change any of the necessary file save settings and click **OK**.
    - Epson Scan scans your original, and saves the file in the selected folder or opens it in your scanning program. If the file was saved directly to your computer, you see the file in the Windows Explorer or Mac OS X Finder, where you can view and print the image, if desired.

Selecting a Scan Area - Home Mode

You can select a specific area in your preview image to include in your scanned image. You can select the entire image area or a portion of it. You can even select multiple scan areas to create multiple scanned images of different areas (Normal Preview mode only).

You can also use the scan area to select specific Image Adjustments settings for a scanned image. Just be sure to click inside the scan area before selecting the settings.

**Note:** In Home Mode, the default Preview mode is Thumbnail mode. To use Normal Preview mode instead, deselect the Thumbnail checkbox beneath the Preview button, then click the **Preview** button to preview your image again.

1. Do one of the following to select your scan area in the Preview image:
   - **Thumbnail preview:** Your scan area is selected automatically, but you can change it. Place your cursor in one corner of the desired scan area, then click and drag the cursor to the opposite corner to create a marquee (dotted line) on the preview image.
• **Normal preview**: Click the ![Auto Locate icon](image) to create a marquee (dotted line) on the preview image.
2. Do the following, as necessary, to work with the selected scan area:
   • If the marquee is correct, continue with the next step.
   • To move the marquee, click inside the scan area and drag the marquee where you want it.
   • To resize the scan area, place your cursor over the edge or corner of the marquee, then click and drag the edges where you want them. (Hold down the **Shift** key as you resize the marquee to retain the same width/height proportions.)
• **Normal preview:** To create additional marquees (up to 50), click the Copy Marquee icon to copy the existing marquee and paste it on the preview image.

• To delete a marquee, click the marquee, then click the Delete Marquee icon.

3. Click inside the scan area and make any necessary settings in the Epson Scan window.

**Parent topic:** Scanning in Home Mode

**Available Image Adjustments - Home Mode**

You can select these Image Adjustments options in Epson Scan Home Mode.

![Image Adjustments](image)

**Note:** Select the **Image Option** checkbox if you need to set any of the grayed-out image adjustments. Not all adjustment settings may be available, depending on the Document Type and Image Type setting.

**Descreening**
- Removes the ripple pattern that might appear in subtly shaded image areas, such as skin tones. This option improves results when scanning magazines or newspapers. (The results of descreening do not appear in the preview image, only in your scanned image.)

**Color Restoration**
- Restores the colors in faded photos automatically.

**Backlight Correction**
- Removes shadows from photos that have too much background light.

**Dust Removal**
- Removes dust marks from your originals automatically.

**Text Enhancement**
- Sharpens the appearance of letters in text documents.
Auto Area Segmentation
Makes grayscale images clearer and text recognition more accurate by separating the text from the graphics.

Brightness
Adjusts the overall lightness and darkness of the scanned image.

Contrast
Adjusts the difference between the light and dark areas of the overall scanned image.

Parent topic: Scanning in Home Mode

Selecting a Scan Size - Home Mode
You can reduce or enlarge the size of your image as you scan. You can also select a specific scan size, such as a common photo size like 4 × 6 inches (102 × 152 mm). This places a scan area of that size on the preview image so you can use it to help crop the image in the correct proportions.

1. Click the Preview button to preview your image.
2. In the Epson Scan window, select the size you want your scanned image to be from the Target Size list.

   ![Target Size dropdown](image)

   **Note:** If you need to rotate the orientation of the target size for your image, click the Orientation icon.

   A marquee (dotted line) appears on your preview image proportioned for the size you selected.
3. Adjust the scan area as necessary.
4. To create a scanned image size that is not available in the Target Size list, click the **Customize** option.

   ![Target Size dialog box](image)

5. Name the custom size, enter the size, click **Save**, and click **OK**. Then create a scan area on the preview image.

   The marquee is automatically proportioned for your custom scan size.

### Scanning in Office Mode

When you scan in Office Mode, Epson Scan automatically saves your scanned file in JPEG format in your operating system's Pictures or My Pictures folder, or opens it in your scanning program. You can select settings, preview, and change the scanned file settings as necessary.

1. Start Epson Scan and select **Office Mode** as the Mode setting.

   You see this window:
2. Select the **Image Type** setting that matches your original.

3. Select the **Document Source** setting indicating where you placed your original.

4. Select the **Size** and **Orientation** settings that match your original.

5. Select the **Resolution** setting you want to use for your scan.

6. Click the **Preview** button.
Epson Scan previews your original and displays the result in a separate Preview window.

7. If desired, select the area in your preview image that you want to scan (scanned image area).

8. Select any of the image adjustment settings you want to use. Before making adjustments, click the image or scanned image area in the Preview window.

9. Click **Scan**.

   You see the File Save Settings window.

10. Change any of the necessary file save settings and click **OK**.

Epson Scan scans your original, and saves the file in the selected folder or opens it in your scanning program. If the file was saved directly to your computer, you see the file in the Windows Explorer or Mac OS X Finder, where you can view and print the image, if desired.

**Selecting a Scan Area - Office Mode**

You can select a specific area in your preview image to include in your scanned image. You can select the entire image area or a portion of it. You can even select multiple scan areas to create multiple scanned images of different areas.

You can also use the scan area to select specific Image Adjustments settings for a scanned image. Just be sure to click inside the scan area before selecting the settings.
1. In the Preview window, click the Auto Locate icon to create a marquee (dotted line) on the preview image.

2. Do the following, as necessary, to work with the selected scan area:
   - If the marquee is correct, continue with the next step.
   - To move the marquee, click inside the scan area and drag the marquee where you want it.
• To resize the scan area, place your cursor over the edge or corner of the marquee, then click and drag the edges where you want them. (Hold down the Shift key as you resize the marquee to retain the same width/height proportions.)

• To create additional marquees (up to 50), click the Copy Marquee icon to copy the existing marquee and paste it on the preview image.

• To delete a marquee, click the marquee, then click the Delete Marquee icon.

3. Click inside each scan area and make any necessary settings in the Epson Scan window.

Parent topic: Scanning in Office Mode

Available Image Adjustments - Office Mode

You can select these Image Adjustments options in Epson Scan Office Mode.

Note: Select the Image Option checkbox if you need to set any of the grayed-out image adjustments. Not all adjustment settings may be available, depending on the Image Type setting.

Unsharp Mask
Makes the edges of certain image areas clearer. Turn off this option to leave softer edges.

Descreening
Removes the ripple pattern that might appear in subtly shaded image areas, such as skin tones. This option improves results when scanning magazines or newspapers. (The results of descreening do not appear in the preview image, only in your scanned image.)
Text Enhancement
   Sharpens the appearance of letters in text documents.

Auto Area Segmentation
   Makes grayscale images clearer and text recognition more accurate by separating the text from the graphics.

Color Enhance
   Enhances the red, green, or blue shades in the scanned image.

Brightness
   Adjusts the overall lightness and darkness of the scanned image.

Contrast
   Adjusts the difference between the light and dark areas of the overall scanned image.

Scanning in Professional Mode

When you scan in Professional Mode, Epson Scan automatically saves your scanned file in JPEG format in your operating system’s Pictures or My Pictures folder, or opens it in your scanning program. You can select settings, preview, and change the scanned file settings as necessary.

1. Start Epson Scan and select Professional Mode as the Mode setting.
   You see this window:
2. Select the **Document Type** setting that matches your original, such as **Reflective** for documents or photos.

3. Select the **Document Source** setting indicating where you placed your original.

4. Select the specific type of original you are scanning as the **Auto Exposure Type** setting: **Document** or **Photo**.

5. Select the details of your original and how you want it scanned as the **Image Type** setting.

6. Select the **Resolution** setting you want to use for your scan.

7. Click the **Preview** button.
   
   Epson Scan previews your original and displays the result in a separate Preview window.

8. If desired, select the area in your preview image that you want to scan (scan area).

9. Select any of the image adjustment settings you want to use. Before making adjustments, click the image or scanned image area in the Preview window.

10. If you want to reduce or enlarge your image as you scan, select the **Target Size** setting you want to use.

11. Click **Scan**.

   You see the File Save Settings window.

12. Change any of the necessary file save settings and click **OK**.

   Epson Scan scans your original, and saves the file in the selected folder or opens it in your scanning program. If the file was saved directly to your computer, you see the file in the Windows Explorer or Mac OS X Finder, where you can view and print the image, if desired.

Selecting a Scan Area - Professional Mode

You can select a specific area in your preview image to include in your scanned image. You can select the entire image area or a portion of it. You can even select multiple scan areas to create multiple scanned images of different areas (Normal Preview mode only).

You can also use the scan area to select specific Image Adjustments settings for a scanned image. Just be sure to click inside the scan area before selecting the settings.

Note: In Professional Mode, the default Preview mode is Normal mode. To use Thumbnail Preview mode instead, select the Thumbnail checkbox beneath the Preview button, then click the Preview button to preview your image again.

1. Do one of the following to select your scan area in the Preview image:

   • Normal preview: Click the Auto Locate icon to create a marquee (dotted line) on the preview image.
• **Thumbnail preview**: Your scan area is selected automatically, but you can change it. Place your cursor in one corner of the desired scan area, then click and drag the cursor to the opposite corner to create a marquee (dotted line) on the preview image.
2. Do the following, as necessary, to work with the selected scan area:
   • If the marquee is correct, continue with the next step.
   • To move the marquee, click inside the scan area and drag the marquee where you want it.
   • To resize the scan area, place your cursor over the edge or corner of the marquee, then click and drag the edges where you want them. (Hold down the **Shift** key as you resize the marquee to retain the same width/height proportions.)
• **Normal preview**: To create additional marquees (up to 50), click the Copy Marquee icon to copy the existing marquee and paste it on the preview image.

• To delete a marquee, click the marquee, then click the Delete Marquee icon.

3. Click inside the scan area and make any necessary settings in the Epson Scan window.

### Available Image Adjustments - Professional Mode

You can select these Adjustments options in Epson Scan Professional Mode.

![Adjustments](image)

**Note**: Not all adjustment settings may be available, depending on the Image Type setting.

Click the image adjustment icon to access additional settings.

Click the + (Windows) or ‹ (Mac OS X) icon next to a setting to change the level of adjustment.

**Unsharp Mask**

Makes the edges of certain image areas clearer. Turn off this option to leave softer edges.

**Descreening**

Removes the ripple pattern that might appear in subtly shaded image areas, such as skin tones. This option improves results when scanning magazines or newspapers. (The results of descreening do not appear in the preview image, only in your scanned image.)
Color Restoration
Restores the colors in faded photos automatically.

Backlight Correction
Removes shadows from photos that have too much background light.

Dust Removal
Removes dust marks from your originals automatically.

Auto Exposure
Automatically adjusts the image exposure settings when you click the Auto Exposure icon. To automatically adjust image exposure settings continuously, click the Configuration button, click the Color tab, and select Continuous auto exposure. You can adjust the level of exposure adjustment using a slider.

Histogram Adjustment
Provides a graphical interface for adjusting highlight, shadow, and gamma levels individually. (For advanced users only.) Click the histogram icon to access the settings.

Tone Correction
Provides a graphical interface for adjusting tone levels individually. (For advanced users only.) Click the tone correction icon to access the settings.

Brightness
Adjusts the overall lightness and darkness of the scanned image.

Contrast
Adjusts the difference between the light and dark areas of the overall scanned image.

Saturation
Adjusts the density of colors in the overall image.

Color Balance
Adjusts the balance of colors in the overall image.

Color Palette
Provides a graphical interface for adjusting mid-tone levels, such as skin tones, without affecting the highlight and shadow areas of the image. (For advanced users only.) Click the Color Palette icon to access the settings.

Threshold
Adjusts the level at which black areas in text and line art are delineated, improving text recognition in OCR (Optical Character Recognition) programs.

Parent topic: Scanning in Professional Mode
Selecting a Scan Size - Professional Mode

You can reduce or enlarge the size of your image as you scan. You can also select a specific scan size, such as a common photo size like 4 × 6 inches (102 × 152 mm). This places a scan area of that size on the preview image so you can use it to help crop the image in the correct proportions.

1. Click the **Preview** button to preview your image.

2. In the Epson Scan window, select the size you want your scanned image to be from the **Target Size** list.

   ![Target Size](image)

   **Note:** If you need to rotate the orientation of the target size for your image, click the **orientation** icon.

   A marquee (dotted line) appears on your preview image proportioned for the size you selected.
3. Adjust the scan area as necessary.
4. To create a scanned image size that is not available in the Target Size list, click the **Customize** option.

5. Name the custom size, enter the size, click **Save**, and click **OK**. Then create a scan area on the preview image.

   The marquee is automatically proportioned for your custom scan size.

6. To use additional sizing tools, click the + (Windows) or ▶ (Mac OS X) icon next to the Target Size setting and select options as desired.

   - **Scale**: Reduces or enlarges your image by the percentage you enter.
   - **Trimming**: Turns automatic image cropping on or off.
• Unlock icon: Unlocks the width/height proportions of the scanned image size so you can adjust it without constraint.

Parent topic: Scanning in Professional Mode

Image Preview Guidelines

You can preview your scanned image so you can adjust the scan settings using the preview as a guide. There are two types of preview available:

Thumbnail preview
A thumbnail preview displays your previewed images as thumbnails with the scanned image area and exposure automatically selected. If the Thumbnail checkbox is selected, clicking the Preview button opens a thumbnail preview.

Normal preview
A normal preview displays your previewed images in their entirety so you can select the scanned image area and other settings manually. If the Thumbnail checkbox is deselected, clicking the Preview button opens a normal preview.

Parent topic: Selecting Epson Scan Settings

Scan Resolution Guidelines

If you plan to enlarge a scanned image so you can print it at a larger size, you may need to increase the resolution from the default resolution set by Epson Scan. Follow these guidelines to determine the resolution setting you need:

• You will enlarge the image as you scan it.
  If you will enlarge the image using Epson Scan's Target Size setting (Home and Professional modes only), you do not need to increase the Resolution setting.

• You will scan the image at its original size, but enlarge it later in an image-editing program.
  Increase Epson Scan's Resolution setting in your scan. Increase the resolution by the same amount you will increase the image size to retain a high image quality. For example, if the resolution is 300 dpi (dots per inch) and you will double the image size later, change the Resolution setting to 600 dpi.

• You will scan the image at 100% or smaller size.
  Select Epson Scan's Resolution setting based on how you will use the scanned image:
  • E-mail/view on a computer screen/post on the web: 96 to 150 dpi
  • Print/convert to editable text (OCR): 300 dpi
  • Fax: 200 dpi
Selecting Scan File Settings

You can select the location, name, and format of your scan file on the File Save Settings window. You can also select various optional settings that control how Epson Scan behaves when you scan and save files.

The File Save Settings window may appear after you click Scan on the Epson Scan window. You can also access the window by clicking the icon on the Epson Scan window.
1. Do one of the following to select the folder in which you want to save your scanned image:
   • Click the button for one of the displayed folders.
   • Click the Other button, click the Browse or Choose button, and select a folder.
2. Type in a stem file name in the Prefix field. This name is used along with numbers to automatically name your scanned files.
3. Select a different number as the Start Number setting, if you like.
4. Select the file format you want to use in the Image Format Type menu.
5. If your file format provides optional settings, click the Options button to select them.
6. Choose any of the optional settings you want to use by selecting their checkboxes.
7. Click OK.

Available Scanned File Types and Optional Settings

Parent topic: Selecting Epson Scan Settings

Available Scanned File Types and Optional Settings

You can select from a variety scanned file types and optional settings on the File Save Settings window in Epson Scan.

File Formats

Bitmap (*.bmp)
A standard image file format for most Windows programs.

JPEG (*.jpg)
An image format that lets you highly compress image data. However, the higher the compression, the lower the image quality. (The Tiff format is recommended when you need to modify or retouch your scanned image.)

Multi-Tiff (*.tif)
A Tiff file format when multiple pages are saved to the same file, allowing you to edit the images using a compatible program.

PDF (*.pdf)
A document format that is readable by Windows and Mac OS X systems using Adobe Reader, Acrobat, or other programs. You can save multi-page documents in one PDF file.

PICT (*.pct)
A standard image file format for most Mac OS X programs.
PRINT Image Matching II (*.jpg or *.tif)
File formats that include Epson PRINT Image Matching II data for enhanced quality and a wider color range (does not affect the way the image displays on the screen).

Tiff (*.tif)
A file format created for exchanging data between many programs, such as graphic and DTP software.

Optional Settings

Overwrite any files with the same name
Select to overwrite previous files with the same names.

Show this dialog box before next scan
Select to have the File Save Settings window appear automatically before you scan.

Open image folder after scanning
Select to have Windows Explorer or Mac OS X Finder automatically open to the folder where your scanned image is saved after scanning.

Show Add Page dialog after scanning
If you are scanning a multi-page document using the PDF or Multi-Tiff format, select to display a prompt for scanning additional pages after the first page is scanned.

Parent topic: Selecting Scan File Settings

Scanning with Mac OS X 10.6/10.7
With Mac OS X 10.6/10.7, you can scan with your product using an image-editing application.

Note: You cannot use the Epson Scan program to scan with Mac OS X 10.6/10.7.

1. Open an image editing application, such as Image Capture.
2. Select your Epson product from the DEVICES or SHARED list, if necessary.
   You see this window:
3. Click **Show Details**.
4. Select your scan settings as necessary.
5. Select the folder in which you want to save your scanned file in the **Scan To** pop-up menu.
6. Click **Scan**.

   Your scanned file is saved in the folder you selected.

**Parent topic:**  [Scanning](#)
Scanning to a PDF File

Using Epson Scan, you can scan a multi-page document and save it in one PDF (Portable Document Format) file on your computer.

1. Place your original on your product for scanning.
2. Start Epson Scan.
3. Select the scan mode you want to use.
4. Select the scan settings for your scan.
5. Preview your image.
6. When you finish selecting all your settings, click **Scan**.
   
   You see the File Save Settings window.
7. Select **PDF** as the Type setting.
8. Select any other settings you want to use on the File Save Settings window.
9. Click **OK**.

   Epson Scan scans your document and you see this window:
10. Choose one of the following options on the screen:
   • If you are scanning only one page, click **Save File**.
   • If you need to scan additional pages in a document, click **Add Page**. Place additional pages on the product for scanning, click **Scan**, and repeat until you have scanned all the pages. When you are finished, click **Save File**.
   • If you need to delete or reorder the scanned pages, click **Edit Page**. Delete or reorder the pages using the icons that appear on the bottom of the editing window. When you are finished, click **OK**.

   **Note:** If you installed an OCR (Optical Character Recognition) program, you may see a screen indicating the program is converting your page to text. Wait until the program re-scans the page and close the program, if necessary.

11. Click **Close** to exit the Epson Scan window, if necessary.

Epson Scan scans your original, and saves the PDF file in the selected folder or opens it in your scanning program. If the file was saved directly to your computer, you see the file in the Windows Explorer or Mac OS X Finder, where you can view and print the document, if desired.

Convert Scanned Documents to Editable Text (OCR)

You can scan a document and convert the text into data that you can edit with a word processing, spreadsheet, or HTML-editing program. This process is called OCR (Optical Character Recognition).

To scan and use OCR, you need to install an OCR program, such as ABBYY FineReader.

**Note:** You can use ABBYY FineReader to convert scanned documents to editable text in Mac OS X 10.6. First, scan and save your document using an application such as Image Capture. Then open ABBYY FineReader, open the Get Images From pop-up menu and select File. Select the conversion option you want to use, then select your scanned file and follow the instructions on the screen.

**Note:** ABBYY FineReader is not supported on Mac OS X 10.7. Check the Epson support site at www.epson.com/support/lion (U.S.) or www.epson.ca/support/lion (Canada) to learn about possible updates to the software.

**Scanning Using OCR - Windows**

You can use the ABBYY FineReader OCR program to convert scanned documents to editable text.

1. Place your original on your product for scanning.

2. Click or Start > All Programs or Programs > ABBYY FineReader Sprint > ABBYY FineReader Sprint.

You see this window:
3. Select the language used in the document you are going to scan as the **Document Language** setting.

4. Click the **Scan to Other Formats** icon.
   
   You see the Select Scanner window.

5. Select your product and click **OK**.

   **Note:** Do not select a **WIA** option for your product; it will not work correctly.

   You see the scan settings window.

6. Select your scan settings.

7. Click **Preview** and adjust the area you want to scan, if necessary.

8. Click **Scan**.

   **Note:** To scan a multi-page document, select settings in the Multi-Page Scanning section and click **Scan** for each page.

9. When you are finished scanning, click **Close**.
Your document is scanned and processed into editable text, then you see the Save As window.

10. Select a name and a file format for your document and click **Save**.

The file is saved and then opened in an application associated with the file type you selected, if available on your system.

**Parent topic:** Convert Scanned Documents to Editable Text (OCR)

**Scanning Using OCR - Mac OS X 10.4 or 10.5**

You can use the ABBYY FineReader OCR program to convert scanned documents to editable text.

1. Place your original on your product for scanning.
2. Open the **Applications** folder and click the **ABBYY FineReader Sprint** icon.

You see this window:
3. Open the **Get Images From** pop-up menu and select your product.
4. Select the language used in the document you are going to scan as the **Document Language** setting.
5. Select the type of document you are going to scan.
   Epson Scan starts in the last scan mode you used.
6. Select your scan settings and click **Scan**.
   Your document is scanned and you see the Epson Scan window while your document is converted to editable text.
7. Click **Close** to close the Epson Scan window and Preview window, if necessary.
   You see the Save Converted File As window:

```
Save Converted File As

Save As: FRoutput
Where: Documents

Open after saving

Cancel  Save
```

8. Click the **Save** button.
   The file is saved and then opened in an application associated with the file type you selected, if available on your system.

Faxing

See these sections to fax using your product.

**Note:** This product allows you to store names, telephone numbers, and fax data in its memory even when the power is turned off. Make sure you restore all of the default settings if you give away or dispose of the product. This will erase all of your network settings and fax data.

**Connecting a Telephone or Answering Machine**
**Setting Up Fax Features**
**Setting Up Speed Dial and Group Dial Lists**
**Sending Faxes**
**Receiving Faxes**

**Connecting a Telephone or Answering Machine**

You must connect your product to a telephone wall jack to send or receive faxes. If you want to use the same telephone line to receive calls, you can connect a telephone or answering machine to your product using an additional phone cable.

**Note:** If you do not connect a telephone to your product, make sure to turn on **Auto Answer**. Otherwise, you cannot receive faxes.

1. Connect the phone cable to your telephone wall jack and to the **LINE** port on your product.
**Note:** If your telephone line included a DSL Internet connection, you must connect a DSL filter to the wall jack to be able to use the line for faxing or voice calls using your product. Contact your DSL provider for the necessary filter.

1. Telephone wall jack
2. DSL filter
3. DSL modem

2. If you are connecting a telephone or answering machine to your product using a second phone cable, remove the cap from the **EXT.** port on your product.
3. Connect the second phone cable to your telephone or answering machine and to the **EXT.** port on your product.

**Note:** If you connect an answering machine and **Auto Answer** is turned on, make sure the product's **Rings to Answer** setting is set higher than the number of rings your answering machine is set to answer a call.

Any phone or answering machine must be connected to the **EXT.** port for your product to detect an incoming fax call when the phone is picked up. Epson cannot guarantee compatibility with VoIP, cable phone systems, or fiber optic digital services such as FIOS.

**Parent topic:** Faxing

### Setting Up Fax Features

Before faxing with your product, set up your fax header and select the fax features you want to use.

**Note:** If you leave your product unplugged for a long period of time, you may need to reset the date and time settings for faxes.

Selecting Your Country or Region

Before faxing, select the country or region in which you are using your product.

Note: If you change the country or region, your fax settings return to their defaults and you must select them again.

1. Press the Home button, if necessary.
2. Press the arrow buttons and then select Setup.
3. Select Printer Setup.

You see this screen:
4. Press the arrow buttons and then select **Country/Region**.

5. Press the arrow buttons, if necessary, then select your country or region. You see a confirmation screen.

6. If the setting is correct, select **Yes**. (If not, select **No** and retry.)

   **Note:** Changing the country or region restores the fax settings to the default settings.

**Parent topic:** Setting Up Fax Features Using the Product Control Panel

**Selecting the Date and Time**

Before faxing, select the current date, time, and daylight saving phase in your area, and choose your preferred date and time format.

1. Press the **Home** button, if necessary.
2. Press the arrow buttons and then select **Setup**.

3. Select **Printer Setup**.

You see this screen:

4. Press the arrow buttons and then select **Daylight Saving Time**.

5. Select one of the following settings for the current conditions in your area:
   - **Winter**: it is winter or your region does not use Daylight Saving Time (DST)
• **Summer**: it is spring or summer and your region uses Daylight Saving Time (DST)

After making a selection, you return to the **Printer Setup** screen.

**Note**: If your region uses Daylight Saving Time (DST), you must change this setting to match the season. When you change from **Winter** to **Summer**, your product automatically sets its clock ahead one hour. When you change from **Summer** to **Winter**, it sets its clock back one hour.

6. Select **Date/Time**.
   
   You see this screen:

   ![Date Format Screen](image)

   7. Select the date format you want to use.
   8. Use the numeric keypad to enter the current date, then press **OK**.
   9. Select the time format you want to use.
   10. Use the numeric keypad to enter the current time, select **AM** or **PM** if you selected a 12-hour time format, then press **OK**.

   You return to the **Printer Setup** screen.

**Parent topic**: Setting Up Fax Features Using the Product Control Panel

### Entering Fax Header Information

Before faxing, add your sender name and fax number to the fax header to identify the source of the faxes you send.

1. Press the **Home** button, if necessary.
2. Press the arrow buttons and then select **Setup**.

3. Press the arrow buttons and then select **Fax Settings**.
   
   You see this screen:

4. Select **Communication**.
5. Press the arrow buttons and then select **Header**.
6. Select **Fax Header**.
   
   You see this screen:
7. Use the numeric keypad to enter the sender name for your fax source, such as your name or a business name. You can enter up to 40 characters.

8. Press the OK button.
   You return to the Header screen.

9. Select Your Phone Number.
   You see this screen:
10. Use the numeric keypad to enter your fax number, up to 20 characters. For international numbers that require use of a + symbol, press the # key.

**Note:** When entering a phone number, the * key does not work.

11. Press the **OK** button.

You return to the **Header** screen.

**Parent topic:** Setting Up Fax Features Using the Product Control Panel

**Entering Numbers and Characters for Faxing**

Follow these guidelines to enter numbers and characters for faxing and setting up your fax settings.

- To enter text or characters, press the keys on the numeric keypad until the desired character or number appears.
- To enter symbols, press the 1 key until the desired symbol appears.
- To enter a pause symbol (–) in phone numbers requiring a brief pause during dialing, press .
- To move the cursor to the next or previous space, press the left or right arrow buttons on the LCD screen.
- To insert a space and move one character to the right, press .
- To delete a character and move one character to the left, press .

**Parent topic:** Setting Up Fax Features Using the Product Control Panel
Selecting Fax Send and Receive Settings

4. Select Send Settings or Receive Settings.
5. Change any of the available settings.
6. Press the OK button to exit.

Parent topic: Setting Up Fax Features Using the Product Control Panel

Selecting Fax Communication Settings
You can customize how your product sends and receives faxes over your phone line.

1. Press the Home button, if necessary.
2. Press the arrow buttons and then select Setup.

3. Press the arrow buttons and then select Fax Settings.
   You see this screen:
4. Select Communication.
5. Change any of the available settings.
6. Press the OK button when you're done.

Parent topic: Setting Up Fax Features Using the Product Control Panel

Printing Fax Reports

You can run a variety of reports on your fax transmissions and print your speed and group dial lists.

Note: You can also select to print a report automatically after a fax is sent by going to Setup > Fax Settings > Send Settings > Last Transmission Report.

1. Make sure you loaded letter-size or larger paper in your product.
2. Press the Home button, if necessary.
3. Select Fax.

4. Press the Menu button.

5. Press the arrow buttons and then select Fax Report.
   You see this screen:

6. Select one of the available reports.

7. Press the Start button to print the report.

Parent topic: Setting Up Fax Features Using the Product Control Panel
Restoring Default Fax Settings

You can restore your fax settings to their default options, if necessary.

1. Press the Home button, if necessary.
2. Press the arrow buttons and then select Setup.

3. Press the arrow buttons and then select Restore Default Settings.
   You see this screen:

4. Select one of the available options.
You see a confirmation screen.

5. Select **Yes** or **No**.

Fax Send Options

Parent topic: Sending Faxes

Manually Dialing or Redialing Fax Numbers

You can send a fax from your product control panel by manually dialing the fax number or redialing the last dialed fax number.

1. Place your original on the product for faxing.
2. Press the Home button, if necessary.
3. Select Fax.
4. Do one of the following:
   - Press then use the numeric keypad to enter the fax number. You can enter up to 64 characters.
• Press **Redial** to redial the last dialed fax number.

5. Select **Color** (for color originals) or **B&W** (for black-and-white originals).

   **Note:** If your recipient’s fax machine does not print in color, your fax is automatically sent in black-and-white.

6. If you need to change any fax settings, press the **Menu** button, select **Send Settings**, and select your settings. When you finish selecting settings, press **OK**.

7. To see a summary of your fax transmission settings, if desired, press **OK**.

8. Press the **Start** button.

9. Select **Auto Document Feeder (ADF)** or **Document glass**.

10. Press **OK** if you selected **Auto Document Feeder (ADF)**.

    **Note:** To cancel faxing, select **Cancel**.

    Your product scans your original and prompts you to place additional pages, if necessary.

After scanning your originals, your product dials the number and sends the fax.

**Note:** If the number is busy or there is a communication problem, your product displays a redialing message and will redial the number in a few minutes.

**Parent topic:** Sending Faxes from the Product Control Panel
Selecting Fax Numbers from Speed or Group Dial Lists

You can send a fax from your product control panel by selecting a speed dial or group dial entry from the list.

1. Place your original on the product for faxing.
2. Press the Home button, if necessary.
3. Select Fax.
4. Select Speed Dial or Group Dial.
5. Select the speed dial or group dial entry you want to fax.
6. Select Color (for color originals) or B&W (for black-and-white originals).

Note: If your recipient's fax machine does not print in color, your fax is automatically sent in black-and-white.

7. If you need to change any fax settings, press the Menu button, select Send Settings, and select your settings. When you finish selecting settings, press OK.
8. To see a summary of your fax transmission settings, if desired, press OK.
9. Press the \( \text{Start} \) button.

10. Select **Auto Document Feeder (ADF)** or **Document glass**.

11. Press **OK** if you selected **Auto Document Feeder (ADF)**.

   **Note:** To cancel faxing, select \( \text{Cancel} \).

   Your product scans your original and prompts you to place additional pages, if necessary.

   After scanning your originals, your product dials the number and sends the fax.

   **Note:** If the number is busy or there is a communication problem, your product displays a redialing message and will redial the number in a few minutes.

**Parent topic:** Sending Faxes from the Product Control Panel

**Dialing Fax Numbers from a Connected Telephone**

If you have connected a telephone to the **EXT** port on your product, you can send a fax by dialing the fax number from the connected telephone.

1. Place your original on the product for faxing.
2. Press the \( \text{Home} \) button, if necessary.
3. Select **Fax**.

4. Dial the fax number from the connected telephone.
   You see this screen:

   ![Fax Screen](image1.png)

5. Select **Send**.

   **Note:** You product now communicates with the recipient's fax machine. Do not hang up the telephone.
6. Select **Color** (for color originals) or **B&W** (for black-and-white originals).

   **Note:** If your recipient’s fax machine does not print in color, your fax is automatically sent in black-and-white.

7. If you need to change any fax settings, press the `Menu` button, select **Send Settings**, and select your settings. When you finish selecting settings, press **OK**.

8. Press the `Start` button.

9. Select **Auto Document Feeder (ADF)** or **Document glass**.

10. Press **OK** if you selected **Auto Document Feeder (ADF)**.

   **Note:** To cancel faxing, select `Cancel`.

   Your product scans your original and prompts you to place additional pages, if necessary.

11. Hang up the telephone.

   After scanning your originals, your product sends the fax.

Sending Faxes Using the Fax Utility - Windows

You can send a fax from a printing program in Windows.

1. Open the file you want to fax and select **Print**.
2. Select your product with the **FAX** option as the printer.

3. To change the Paper Size, Orientation, Color, Image Quality, or Character Density settings, click the **Preferences** or **Properties** button.

   **Note:** If you see a **Setup**, **Printer**, or **Options** button, click it. Then click **Preferences** or **Properties** on the next screen. For more information about selecting fax print settings, click **Help**.

4. Select the Page Range as necessary. (Leave the Number of copies set to **1**.)

   **Note:** You can fax up to 100 pages, including the cover sheet.

5. Click **Print**.

   If you’re faxing for the first time, you see a window like this one:
6. Enter your sender information so that recipients can identify the origin of the fax. Then click **OK** to save the sender information.

7. Add a cover sheet, input a fax number, or set up a phone book of numbers for future use, then click **Next**.

   **Note:** For detailed instructions on using the Epson FAX Utility, click **Help**.

8. If you added a cover sheet to your fax, select a cover sheet style, enter your subject and comment information, then click **Next**.

9. Click **Send** to transmit your fax.

**Parent topic:** Sending Faxes

### Sending Faxes Using the Fax Utility - Mac OS X

You can send a fax from a Mac OS X printing program using the Fax Utility. You can fax up to 100 pages at a time, including a cover sheet.
1. Open a photo or document for faxing.
2. Select the print command in your application.

   **Note:** You may need to select a print icon on your screen, the **Print** option in the **File** menu, or another command. See your application's help utility for details.

3. Select your product **FAX** option as the **Printer** setting.
4. Select the number of pages you are faxing as the **Pages** setting.

   **Note:** Leave the **Copies** setting set to 1.

5. Select **Recipient Settings** from the pop-up menu.

   You see this window:
6. Do one of the following to choose your recipient:
   • Select a name or group from the **Recipient List**.
   • Enter a name, company, and fax number and click the + button.
   • Click the icon and select a recipient from your address book.

7. Select **Fax Settings** from the pop-up menu.
   You see this window:
8. Select the **Color** and **Image Quality** settings you want to use for your fax.

9. Click **Fax**.

**Parent topic:** Sending Faxes

## Receiving Faxes

See these sections to receive faxes with your product.

- [Fax Reception](#)
- [Receiving Faxes Automatically (Auto Answer)](#)
- [Receiving Faxes Manually](#)

**Parent topic:** Faxing
Fax Reception

Your product will automatically receive and print faxes when you set fax reception mode to Auto Answer.

If you connected a telephone to your product so you can use the same phone line for faxes and voice calls, you can also set your product to receive faxes manually. This allows you to check for a fax tone using the telephone and press a button on your product to receive the fax.

Make sure to load paper in your product and select your fax settings before receiving a fax.

Note: If you run out of paper during fax printing, load more paper and press the button indicated on your product LCD screen to continue.

Parent topic: Receiving Faxes

Receiving Faxes Automatically (Auto Answer)

To receive and print faxes automatically, you can turn on Auto Answer mode.

Check the Auto Answer light on your product to see if Auto Answer mode is turned on or not.

To turn Auto Answer mode on or off, press the Auto Answer auto answer button.

If an answering machine is connected, make sure the product's Rings to Answer setting is set higher than the number of rings your answering machine is set to answer a call. For example, if the answering machine is set to pick up on the fourth ring, set the product to pick up on the fifth ring or later.

If a telephone is connected, and you use it to answer a call that turns out to be a fax, wait until the product's LCD screen displays a message that a connection has been made before hanging up.

Parent topic: Receiving Faxes

Receiving Faxes Manually

You can set up your product to receive faxes manually by turning off Auto Answer mode. This lets you check for a fax tone on the connected telephone before receiving a fax.

1. When the connected telephone rings, answer the call.

   You see this message on your product's LCD screen:
2. If you hear a fax tone, select Receive.

   **Note:** Leave the answered call active as you receive the fax transmission.

3. Follow the instructions on the screen to receive the fax.
   When fax transmission is finished, you see the LCD screen above.

4. Hang up the phone call.

5. Press the OK button to print the fax.

**Parent topic:** Receiving Faxes
Using Memory Cards With Your Product

Follow the instructions here to work with a memory card inserted into your product.

Inserting a Memory Card
Printing from a Memory Card
Transferring Photos on a Memory Card

Inserting a Memory Card

Insert only one memory card at a time in one of your product's memory card slots.

1. Make sure the memory card and the files on it are compatible with your product before inserting the card.
2. Insert your memory card into the correct slot, making sure the card is oriented correctly.
**Note:** Do not force the card all the way into the slot. Insert it only until it meets resistance.

The memory card access light flashes and then stays lit.

**Caution:** Do not remove a memory card or turn off your product while the memory card access light is flashing or you may lose data from the memory card.

Memory Card Types
Memory Card File Specifications
Removing a Memory Card

Parent topic: Using Memory Cards With Your Product

**Memory Card Types**

You can insert these types of memory cards in your product.

**Note:** Cards marked with an asterisk (*) require an adapter; consult your adapter documentation for details on using it.
**Upper Slot**
You can insert the following cards in the upper slot:
- Memory Stick
- Memory Stick PRO
- Memory Stick Duo*
- Memory Stick PRO Duo*
- Memory Stick PRO-HG Duo*
- Memory Stick Micro*
- MagicGate Memory Stick
- MagicGate Memory Stick Duo*
- SDXC
- SDHC
- SD
- MultiMediaCard

- miniSDHC*
- miniSD*
- microSDHC*
- microSD*
- xD-Picture Card
- xD-Picture Card Type M
- xD-Picture Card Type M+
- xD-Picture Card Type H

**Lower Slot**
You can insert the following cards in the lower slot:
- CompactFlash
Memory Card File Specifications
You can insert memory cards in your product containing files that meet these specifications.

File format JPEG with the Exif version 2.3 standard
Image size 80 × 80 pixels to 9200 × 9200 pixels
Number of files Up to 9990

Removing a Memory Card
After you finish working with a memory card, you can check to make sure it is safe to remove it from your product.

Caution: Do not remove a memory card or turn off your product while the memory card access light is flashing or you may lose data from the memory card.

1. Make sure the memory card access light is not flashing.
2. If your product is connected to your computer using a USB cable, do one of the following:
   • **Windows**: Open the My Computer, Computer, or Windows Explorer utility. Then right-click the name of your memory card (listed as a removable disk) and select Eject.
   • **Mac OS X**: Drag the removable disk icon for your memory card from the desktop into the trash.
3. Pull the memory card straight out of its slot.

**Viewing and Printing Individual Photos**

You can select individual photos for printing as you view them on the LCD screen.

1. Press the 🏛️ Home button, if necessary.
2. Select **Print Photos**

3. Select **View and Print Photos**.
   You see a screen like this:

4. Press the arrow buttons to scroll through your photos and view the one you want.
   
   **Note:** To display 9 photos at a time on the LCD screen, press the **Display/Crop** button three times.
5. Press the + button to select the photo for printing.
   • To print more than one copy of the photo, press the + or – button to select the number (up to 99).
   • To crop, zoom into, or rotate your photo, press the Display/Crop button.
   • If View Auto Correct: Off appears on the screen, tap the photo to preview how your printouts will look with Fix Photo turned on.
   • To view additional photos and select others for printing, press the arrow buttons and repeat the selections above.

6. Press the OK button to see a preview of the photos that will print.
   You see a screen like this:

   ![Confirm Settings screen]

7. Do either of the following as necessary:
   • To change any of the print settings displayed on the LCD screen, press the Menu button, select Print Settings, and select the necessary settings. When you are finished, press the OK button.
   • To modify any of the previewed photos, press the Menu button, select Photo Adjustments, and select the necessary settings. When you are finished, press the OK button.

8. When you are ready to print, press the Start button.

   Note: To cancel printing, select Cancel.

Printing Photo Layouts from a Memory Card

You can print one or more photos from a memory card in special layouts on various sizes of photo paper.

1. Press the ➤ Home button, if necessary.
2. Select **Print Photos**.

![Print Photos Menu]

3. Press the arrow buttons and then select **Photo Layout Sheet**.
   
   You see this screen:

![Photo Layout Sheet]

4. Press the arrow buttons to view all of the layout options, then select the option you want.

5. Press **Paper Size**, then select the size that matches the paper you loaded.
   
   Depending on the layout you selected, you may see this screen:
6. If you see the screen above, do one of the following:
   • To allow your product to place the photos in the layout automatically, select **Automatic layout**.
   • To place photos in the layout manually, select **Place photos manually** and follow the instructions displayed on the screen.

7. Press the arrow buttons to select the photos you want to print.
8. Press the + or – button to select one or more copies of each photo (up to 99).
9. To select other photos for printing, press the arrow buttons and repeat the selections above, then press the **OK** button.
10. To print more than one copy of the photo layout sheet, press the + or – buttons to select the number (up to 99), then press the **OK** button.
11. When you are ready to print, press the **Start** button.

   **Note:** To cancel printing, select **Cancel**.

**Photo Layout Options**

**Parent topic:** Printing from a Memory Card

**Photo Layout Options**

Select the layout you want to use when printing your photos in a layout.

**2-up, 4-up, 8-up, or 20-up**

Print 2, 4, 8, or 20 photos on one sheet.
Upper ½ or Lower ½
Print one photo in the upper or lower half of the sheet.

Photo ID
Prints 4 ID-sized photos on one sheet.

Jewel Upper
Prints one photo on the upper half of a folded jewel case insert.

Jewel Index
Prints 24 to 48 thumbnail images on a folded jewel case insert.

Picture Package
Prints one photo in multiple sizes on one sheet.

Printing Photo Greeting Cards
You can create custom greeting cards using photos on your memory card, and add your own handwritten or printed text.

First you select your photo and print a template on plain paper. Then you fill out the template, add your message, and print your cards.

Creating and Printing a Greeting Card Template
Printing a Greeting Card from a Template

Parent topic: Printing from a Memory Card

Creating and Printing a Greeting Card Template
Before you start, make sure plain paper is loaded and your memory card is inserted.

1. Press the Home button, if necessary.
2. Select **Print Photos**.

3. Select **Print Photo Greeting Card**.
   You see this screen:

4. Select **Select Photo and Print Template**, then press **OK**.

5. Press the arrow buttons to select the photo you want, then press the **OK** button.
   You see this screen:
6. Select **Paper Size**, then select **Letter** to print three cards on one letter-size sheet or **4x6in** to print one card.

7. Select **Paper Type**, then select the type of paper you plan to use.

8. Follow the instructions on the LCD screen to select your layout and frame settings.

9. When you are ready to print your greeting card template on plain paper, press the ⚽ **Start** button.

**Parent topic:** Printing Photo Greeting Cards

**Related tasks**

- Printing a Greeting Card from a Template

**Printing a Greeting Card from a Template**

After your greeting card template is printed, you fill it out to create your card and add your message.
1. Use a dark pen or pencil to fill in the circles and select the Text Style and Text Effects.

2. Add your greeting card message. You can write it in by hand, print a message and paste it into the box, or draw a picture.

   **Tip:** When adding text, place it in the direction that your photo faces.

3. Load Epson photo paper either in the main tray for this size: Letter (8.5 × 11 inches [216 × 279 mm]) or in the photo tray for this size: 4 × 6 inches (102 × 152 mm).

4. Select **Print Greeting Cards from Template**.

5. Follow the instructions on the LCD screen to place the template facedown on the scanner glass, with the blue triangle facing into the back left corner.
6. Close the document cover.
7. To print more than one copy, press the + or – button to select the number (up to 99).
8. When you are ready to print, press the Start button.

   **Note:** To cancel printing, select Cancel.

When you finish printing, cut your greeting cards apart, if necessary.

**Parent topic:** Printing Photo Greeting Cards

**Printing Photo Proofsheets from a Memory Card**

You can print a proof sheet containing small versions of all the photos on your memory card.

1. Press the Home button, if necessary.
2. Select Print Photos.
3. Press the arrow buttons and then select Print Proof Sheet.

   You see this screen:
4. To change any of the print settings displayed on the LCD screen, press the `Menu` button, select `Print Settings`, and select the necessary settings. Then press the `OK` button.

5. When you are ready to print, press the `Start` button.

   **Note:** To cancel printing, select `Cancel`.

**Transferring Photos on a Memory Card**

You can transfer photos to and from a memory card inserted into your product's memory card slots.

- Transferring Photos from a Memory Card to Your Computer
- Transferring Photos from a Memory Card to an External Device

**Parent topic:** Using Memory Cards With Your Product

### Transferring Photos from a Memory Card to Your Computer

You can transfer photos to and from a memory card inserted into your product's memory card slots and a computer connected to your product.

**Note:** Do not transfer photos to and from a memory card while you are printing from the memory card.

1. Make sure your product is connected to a computer.
2. Insert a memory card into one of the memory card slots.
3. Do one of the following to access your memory card files from your computer:
   - **Windows**: Select the **Computer** or **My Computer** utility.
   - **Mac OS X**: Look for the removable disk icon on your desktop.

4. Select the removable disk icon.

5. Select the folder that contains your photos.

6. Drag the photos you want to transfer to the desired folder on your computer or on your memory card.

   **Note**: Your product's LCD screen does not update to display new photos transferred to the memory card. Wait until the memory card access light stops flashing, then remove and insert the memory card to update the photos displayed.

**Parent topic**: Transferring Photos on a Memory Card

**Related tasks**

- Inserting a Memory Card

### Transferring Photos from a Memory Card to an External Device

You can back up photos from your memory card to an external storage device connected to the product, such as a USB flash drive, external hard drive, or external CD or DVD burner.

**Note**: Epson cannot guarantee the compatibility of your storage device.

1. Insert a memory card in one of the memory card slots.
2. Insert your USB flash drive or the USB cable for your external drive into the ✂️ USB port on the front of your product.

3. Insert storage media (such as a CD) into your drive, if necessary.

4. Press the 🏡 Home button, if necessary.

5. Press the arrow buttons and then select **Back Up Data**.
6. Select **Back Up Memory Card**.

![Image of Back Up Memory Card]

7. Follow the instructions on the screen to disconnect the product from your computer and begin copying files to the external device.

8. When the backup is finished, you can remove your memory card and disconnect the external device. The files are saved in folders numbered for each backup session.

### Connecting and Using a USB Flash Drive or External Device

Before you connect your thumb drive or device, make sure the product is turned on but not printing.

**Note:** Epson cannot guarantee the compatibility of your drive.

1. Remove any memory cards from the product.
2. Load the paper you want to use for printing.
3. Insert your USB thumb drive or the USB cable that came with your device to the USB port on the front of your product.
4. Insert storage media (such as a CD) into your drive, if necessary.

5. If there are folders on your storage media, select the folder you want and press the OK button.
   You can view and print your photos from the LCD screen.

When you finish printing, make sure the access light on the drive is not flashing, then remove or disconnect it from the product.

**Caution:** Do not remove the USB drive or turn off the product when the access light is flashing, or you may lose photos on the drive.

---

**Charging a USB Device Using Your Product**

You can charge your cell phone, music player, or other portable device by connecting it to the product. All you need is a user-supplied USB cable that is designed to work with your device.
Caution: Make sure your portable device complies with USB 2.0 standards. Devices that draw more than 500 mA may damage your Epson product. Epson cannot guarantee the compatibility of your device. Contact the device manufacturer for more information.

1. Turn on your product.
2. Connect your portable device to the USB port on the front of the product.
3. Leave your product on while charging (it will continue to charge even after going into sleep mode).

Note: You cannot use the USB port to transfer images from your device to your computer. If you want to transfer images, use the memory card slots instead. Disconnect your portable device before inserting a memory card.

Printing Personalized Projects

You can turn any photo or drawing into a coloring book page, or print lined paper, graph paper, or stationery with a photo background.

Printing Coloring Book Pages
Printing Personalized Note Paper
Printing Lined Paper and Graph Paper

Printing Coloring Book Pages

You can create a coloring page from a photo on your memory card, or from a photo or drawing placed on the scanner glass.

1. Load one of these types of paper in either Letter (8.5 × 11 inches [216 × 279 mm]) or A4 (8.3 × 11.7 inches [210 × 297 mm]) size:
   • Plain paper
   • Epson Bright White Paper
   • Epson Presentation Paper Matte
   • Epson Premium Presentation Paper Matte
2. Press the Home button, if necessary.
3. Select Coloring Book.
4. Select and do one of the following:
   - **Photo or Drawing on Glass**
     Place your original facedown on the scanner glass, in the back left corner. Press OK.
   - **Photo on Memory Card**
     Make sure your memory card is inserted, and press OK. Press the arrow buttons to select the photo you want to use, then press OK.

5. Select the size of paper that you loaded.

![Select paper size and type.](image)

6. If necessary, press the Menu button, select **Print Settings**, and press the OK button to adjust the following settings:
   - **Density** to make the print lighter or darker
   - **Line Detection** to change the amount of detail in the print

7. When you are ready to print, press the Start button.

   **Note:** To cancel printing, select Cancel.

Follow the instructions here to print a design onto ink jet-printable CDs or DVDs to create a custom label.

CD/DVD Printing Features

Loading a CD/DVD
Removing a Printed CD/DVD
Placing a CD/DVD on the Scanner Glass
Copying onto a CD/DVD
Printing Photos from a Memory Card Onto a CD/DVD
Printing a Jewel Case Insert from a Memory Card
Printing on CDs/DVDs from a Computer

CD/DVD Printing Features

You can use any of the following features to print custom CD/DVD labels and accessories:

• Copy an existing CD/DVD label onto a new CD/DVD
• Use your product's control panel to print photos from a memory card onto a CD/DVD
• Print text and images from your computer using the Epson Print CD software that came with your product

You can also use your product's control panel to create a CD jacket or jewel case insert with photos from a memory card.

Parent topic: Printing on CDs/DVDs

Related tasks

Copying onto a CD/DVD
Printing Photos from a Memory Card Onto a CD/DVD
Printing a Jewel Case Insert from a Memory Card

Loading a CD/DVD

You can print on any compatible, ink jet-printable CDs or DVDs, including Blu-ray Discs.

Note: If you are using discs where the printable area extends to within 0.16 inch (4 mm) of the center hole, you may need to adjust the inner diameter setting using the control panel or Epson Print CD software.
1. Make sure you burn your files, music, or video onto your disc before printing on it.
2. Push in the output tray.

3. Raise the control panel all the way up.

4. Press the **CD Tray** button.

   **Caution:** Do not try to pull the tray out; it extends automatically as far as possible.
5. Place your disc on the CD/DVD tray with the label side up. Gently press it into place.

![Disc being placed on CD/DVD tray](image)

6. Press the \(\text{CD Tray}\) button to position the disc for printing.

**Note:** The CD/DVD tray will retract automatically if you wait several minutes before pressing the button.

**Caution:** Do not turn off the product with a CD or DVD loaded in it. Always remove the disc first.

**Parent topic:** Printing on CDs/DVDs

### Removing a Printed CD/DVD

After your CD/DVD is printed, the tray extends automatically.

**Caution:** Do not try to pull the tray out; it extends automatically as far as possible.

1. Remove the disc as shown.

![Disc being removed from CD/DVD tray](image)

2. Press the \(\text{CD Tray}\) button to close the tray.

**Note:** The tray will close automatically after a few minutes if you do not press the button.
3. Lower the control panel.

After printing, handle the CD/DVD carefully. You may need to wait up to 24 hours for the ink to dry fully before inserting it in a drive, depending on the type of disc you used. Keep printed discs away from moisture and direct sunlight.

**Parent topic:** Printing on CDs/DVDs

### Placing a CD/DVD on the Scanner Glass

You can place a CD/DVD on the scanner glass and copy the label design onto another CD.

1. Open the document cover.
2. Place your CD/DVD facedown in the center of the scanner glass.

3. Close the document cover gently to keep your disc in place.

Parent topic: Printing on CDs/DVDs

Copying onto a CD/DVD

You can copy a printed photo or CD/DVD label directly onto an ink jet-printable CD or DVD.

1. Press the Home button, if necessary.
2. Select Copy.
   You see this screen:
3. Press the \( \text{Menu} \) button.
4. Select \( \text{CD/DVD Copy} \).
5. Follow the instructions on the LCD screen to place a CD/DVD or photo on the scanner glass.
6. If necessary, adjust the inner and outer diameter of your CD as shown on the screen, then press the \( \text{OK} \) button.
   
   You see this screen:

   ![Screen with options]

7. Select one of the options shown on the screen, then follow the instructions to load a CD/DVD or print a test on paper.

8. Select the copy settings you want, then press the \( \text{Start} \) button to print.

Removing and Installing Ink Cartridges

**Purchase Epson Ink Cartridges**

You can purchase genuine Epson ink and paper at Epson Supplies Central at [www.epson.com/ink3](http://www.epson.com/ink3) (U.S. sales) or [www.epson.ca](http://www.epson.ca) (Canadian sales). You can also purchase supplies from an Epson authorized reseller. To find the nearest one, call 800-GO-EPSON (800-463-7766).

**Note:** We recommend that you use genuine Epson cartridges and do not refill them. The use of other products may affect your print quality and could result in printer damage.

The printer ships with full cartridges and part of the ink from this first set of cartridges is used for priming the printer. Yields vary considerably based on images printed, print settings, paper type, frequency of use, and temperature. For print quality, a variable amount of ink remains in the cartridge after the "replace cartridge" indicator comes on.

**Ink Cartridge Part Numbers**

**Parent topic:** Replacing Ink Cartridges

**Ink Cartridge Part Numbers**

Use these part numbers when you order or purchase new ink cartridges, and use the cartridges within six months of installing them.

<table>
<thead>

<td>High-capacity</td>
</tr>
<tr>
<td>Black</td>
<td>—</td>
</tr>
<tr>
<td>Cyan</td>
<td>99</td>
</tr>
</tbody>
</table>
## Removing and Installing Ink Cartridges

Make sure you have your replacement cartridges handy before you begin. You must install new cartridges immediately after removing the old ones.

**Caution:** Leave your old cartridges in the printer until you are ready to replace them to prevent the print head nozzles from drying out. Do not open ink cartridge packages until you are ready to install the ink. Cartridges are vacuum packed to maintain reliability.

1. Turn on your product.
2. If an ink cartridge is expended, you see a message on the LCD screen. Note which cartridges need to be replaced and press the **OK** button.
3. Open the scanner unit.

**Caution:** Do not move the print head by hand; otherwise, you may damage your product. Do not touch the flat white cable inside the printer.

4. Squeeze the tab on the cartridge and lift the cartridge straight up to remove it.
Note: Dispose of used cartridges carefully. Do not take the used cartridge apart or try to refill it.

Warning: If ink gets on your skin, wash it thoroughly with soap and water. If ink gets into your eyes, flush them immediately with water. If ink gets into your mouth, spit it out and see a doctor right away. Keep ink cartridges out of the reach of children.

5. Remove the cartridge from the package.

Caution: Do not touch the green chip on the cartridge. Install the new cartridge immediately after removing the old one; if you do not, the print head may dry out and be unable to print.

6. Remove the yellow tape from the bottom of the cartridge.

Caution: Do not remove any other labels or seals, or ink will leak.
7. Insert the new cartridge into the holder and push it down until it clicks into place.

8. Once you replace all the cartridges that need replacing, close the scanner unit.
After the product checks the cartridges, ink replacement is complete. If you see an error message, an ink cartridge may not be installed properly. Lift the scanner unit, then press the ink cartridge down until it clicks into place.

If you remove a low or expended ink cartridge, you cannot re-install and use the cartridge.

**Caution:** If you remove an ink cartridge for later use, protect the ink supply area from dirt and dust and store it in the same environment as the printer. The valve in the ink supply port is designed to contain any excess ink, but do not touch the ink supply port or surrounding area. Always store ink cartridges with the label facing up; do not store cartridges upside-down.

**Print head needs cleaning**

![Print head needs cleaning pattern](image)

8. Do one of the following:
   - If there are no gaps, select **Finish Nozzle Check**. Press the 🏡 Home button to exit.
• If there are gaps or the pattern is faint, select Head Cleaning and continue.

9. Press the Start button to clean the print head.

10. Select Nozzle Check and press the Start button to confirm that the print head is clean.

11. Follow the instructions on the screen to repeat the process as necessary.

If you don’t see any improvement after cleaning the print head up to 4 times, leave the product on and wait at least 6 hours. Then try cleaning the print head again. If quality still does not improve, one of the ink cartridges may be old or damaged and needs to be replaced.

Checking the Nozzles Using a Computer Utility

You can check the print head nozzles using a utility on your Windows or Mac computer.

1. Load a few sheets of plain paper in the product.

2. Do one of the following:
   • Windows: Right-click the product icon in the Windows taskbar.
   • Mac OS X 10.6/10.7: In the Apple menu or the Dock, select System Preferences. Select Print & Fax or Print & Scan, select your product, and select Options & Supplies. Select Utility and select Open Printer Utility.
   • Mac OS X 10.4/10.5: In the Apple menu or the Dock, select System Preferences. Select Print & Fax, select your product, and select Open Print Queue or Print Queue. Select Utility.

3. Select Nozzle Check.

You see one of these windows:
To perform a nozzle check, make sure that the printer is on and connected to the computer. Make sure there is no CD/DVD in the CD/DVD tray, and that the CD/DVD tray is closed; otherwise 'Nozzle Check' cannot be performed. Also make sure that A4 or Letter size plain paper is loaded in the paper cassette. Click [Print] to print a nozzle check pattern or click [Cancel] to quit.
4. Click **Print**.
5. Check the printed pattern to see if there are gaps in the lines.

**Print head is clean**

![Print head is clean]

**Print head needs cleaning**
6. If there are no gaps, click **Finish**.
   
   If there are gaps or the pattern is faint, clean the print head.

Replacing Ink Cartridges

---

Cleaning the Print Head Using the Product Control Panel

You can clean the print head using the control panel on your product.

1. Make sure plain paper is loaded in the product.
2. Press the **Home** button, if necessary.
3. Press the arrow buttons and then select **Setup**.
4. Select **Maintenance**.
   
   You see this screen:
5. Select **Head Cleaning**.
You see this screen:

6. Press the ◊ **Start** button to clean the print head. You see a message on the LCD screen during the cleaning cycle.

   **Caution:** Never turn off the product during a cleaning cycle or you may damage it.

When the cleaning cycle is finished, you see this screen:
7. Select **Nozzle Check**, then press the **Start** button to confirm that the print head is clean.

If you don't see any improvement after cleaning the print head up to 4 times, leave the product on and wait at least 6 hours. Then try cleaning the print head again. If quality still does not improve, one of the ink cartridges may be old or damaged and needs to be replaced.

**Cleaning the Print Head Using a Computer Utility**

You can clean the print head using a utility on your Windows computer or Mac.

1. Make sure plain paper is loaded in the product.

2. Do one of the following:
   - **Windows**: Right-click the product icon in the Windows taskbar.
   - **Mac OS X 10.6/10.7**: In the Apple menu or the Dock, select **System Preferences**. Select **Print & Fax** or **Print & Scan**, select your product, and select **Options & Supplies**. Select **Utility** and select **Open Printer Utility**.
   - **Mac OS X 10.4/10.5**: In the Apple menu or the Dock, select **System Preferences**. Select **Print & Fax**, select your product, and select **Open Print Queue** or **Print Queue**. Select **Utility**.

3. Select **Head Cleaning**.

You see one of these windows:
Make sure there is no CD/DVD in the CD/DVD tray, and that the CD/DVD tray is closed; otherwise "Head Cleaning" cannot be performed. Click [Start] to clean the print head nozzles. Because cleaning consumes some ink from all ink cartridges, only clean the print head when faint areas or gaps appear in your printout. Use the "Nozzle Check" utility first to confirm that the print head needs to be cleaned.
4. Click **Start** to begin the cleaning cycle.
   You see a message on the LCD screen during the cleaning cycle.
   
   **Caution:** Never turn off the product during a cleaning cycle or you may damage it.

5. When the cleaning cycle is finished, you can check to see if the nozzles are clean; click **Print Nozzle Check Pattern** and click **Print**.
6. Check the printed pattern to see if there are gaps in the lines.
   
   **Print head is clean**
Print head needs cleaning

- If there are no gaps, click **Finish**.
- If there are gaps or the pattern is faint, click **Clean** to clean the print head again.

If you don’t see any improvement after cleaning the print head up to 4 times, leave the product on and wait at least 6 hours. Then try cleaning the print head again. If quality still does not improve, one of the ink cartridges may be old or damaged and needs to be replaced.

Aligning the Print Head Using the Product Control Panel

You can align the print head using the control panel on your product.

1. Make sure plain paper is loaded in the product.
2. Press the Home button, if necessary.
3. Press the arrow buttons and then select Setup.
4. Select Maintenance.
   You see this screen:

   ![Maintenance menu with options]

5. Select Head Alignment.
   You see this screen:
6. Press the ◇ Start button to print an alignment sheet.

   **Note:** Do not cancel printing while you are printing a head alignment pattern.

   You see this screen:

   ![Print head alignment. Load Letter/A4 plain paper in the main tray and press ◇.]

7. Check the printed pattern and select the number representing the best printed pattern for each set.

8. Press the OK button when you are finished.

**Parent topic:** Print Head Alignment
Aligning the Print Head Using a Computer Utility

You can align the print head using a utility on your Windows computer or Mac.

1. Load a few sheets of plain paper in the product.
2. Do one of the following:
   - **Windows**: Right-click the product icon in the Windows taskbar.
   - **Mac OS X 10.6/10.7**: In the Apple menu or the Dock, select *System Preferences*. Select *Print & Fax* or *Print & Scan*, select your product, and select *Options & Supplies*. Select *Utility* and select *Open Printer Utility*.
   - **Mac OS X 10.4/10.5**: In the Apple menu or the Dock, select *System Preferences*. Select *Print & Fax*, select your product, and select *Open Print Queue* or *Print Queue*. Select *Utility*.
3. Select **Print Head Alignment**.
4. Click **Next**, then click **Print** to print an alignment sheet.

**Note**: Do not cancel printing while you are printing a head alignment pattern.

You see one of these windows:
Look at the alignment sheet.

A

Find the square without any visible bands in sets #1 through #4. Select the number that corresponds to that square from the list below for all sets. Then click [Next >].

If every square contains a band, select the square with the thinnest band or bands. Then click [Realignment].

#1
#2
#3
#4

Realignment  Cancel  Next >
5. Check the printed pattern and follow the instructions on the screen to choose the number representing the best printed pattern for each set.
   - After choosing each pattern number, click **Next**.
   - If no patterns are aligned in one or more of the sets, choose the closest one in each set and click **Realignment**. Then print another alignment sheet and check it.

   **Note:** Click **Skip** (where available) if you want to skip a particular alignment sheet.

6. When you are done, click **Finish**.

**Parent topic:** Print Head Alignment
Cleaning the Paper Path

If you see ink on the back of a printout, you can clean the paper path to remove any excess ink.

1. Load a few sheets of plain paper in the product.
2. Use the product control panel to make a copy, but without placing a document on the scanner glass.
3. Check the back of the ejected paper to see if it is clean.
4. Repeat as necessary until the paper comes out clean.

Cleaning and Transporting Your Product

See these sections if you need to clean or transport your product.

Cleaning Your Product
Transporting Your Product

Cleaning Your Product

To keep your product working at its best, you should clean it several times a year.

Close the output tray and front cover when you are not using the product to protect it from dust.

**Caution:** Do not use a hard brush, alcohol, or paint thinner to clean the product or you may damage it. Do not use oil or other lubricants inside the product or let water get inside it.

1. Turn off the product.
2. Disconnect the power cable and any connected interface cables.
3. Remove all the paper.
4. Clean the scanner glass with a soft, lint-free cloth (microfiber is recommended), moistened with a little glass cleaner.

**Caution:** Do not spray glass cleaner directly on the glass and do not press the glass surface with any force.

5. Open the ADF cover and use a soft, dry, lint-free cloth (microfiber is recommended), to clean the roller and the interior of the ADF.
6. Clean the outer case and control panel with a soft, dry cloth. Do not use liquid or chemical cleansers.

Parent topic: Cleaning and Transporting Your Product

Transporting Your Product

If you need to ship your product or transport it a long distance, prepare it for transportation as described here.

**Caution:** During transportation and storage, follow these guidelines:
- Avoid tilting the product, placing it vertically, or turning it upside down; otherwise ink may leak.
• Leave the ink cartridges installed. Removing the cartridges can dry out the print head and may prevent the product from printing.
• Do not carry the product by its control panel; this may damage the product.

1. Turn off the product.
2. Lift up the scanner and check to see if the print head is in the far right position (the home position). If not, turn on the product, wait for the print head to move, then turn the product off again.
3. Lift up the scanner, remove the transportation lock from its storage position, and install it as shown.
4. Secure the transportation lock with tape.
5. Lower the scanner.
6. Remove all the paper from the product.
7. Unplug any connected cables.
8. Close the output tray.
9. Lower the control panel.
10. Place the product in its original packing materials, if possible, or use equivalent materials with cushioning around the product. Make sure the box adequately protects the product control panel.

Keep the product level during transportation. Be sure to remove the tape and transportation lock, and store the transportation lock as shown before turning on your product.

If print quality has declined when you print again, clean and align the print head.

Checking for Software Updates

Periodically, it's a good idea to check Epson's support website for free updates to your product software. You can select Download the Latest Software from the Home screen of this manual or visit Epson's driver download site (U.S. downloads or Canadian downloads).

With Windows, your printer software automatically checks for updates. You can also manually update the software by selecting Driver Update here:

- Right-clicking the product icon in the Windows taskbar
- On the Maintenance tab in the printer settings window
- In the EPSON program group under your product name

Running a Product Check

Running a product check helps you determine if your product is operating properly.

1. Disconnect any interface cables connected to your product.
2. Load plain paper in the product.
3. Press the Home button, if necessary.
4. Press the arrow buttons and then select Setup.
5. Select Maintenance.
   You see this screen:
6. Select **Nozzle Check**.
   You see this screen:

7. Press the **Start** button.
   After the nozzle pattern prints, you see this screen:
8. Do the following, depending on the results of the product check:

- If the page prints and the nozzle check pattern is complete, the product is operating properly. Any operation problem you may have could be caused by your computer, cable, software, or selected settings. Check the other solutions in this book or try uninstalling and reinstalling your printer software.
- If the page prints but the nozzle check pattern has gaps, clean or align the print head.
- If the page does not print, the product may have a problem. Check the other solutions in this manual. If they do not work, contact Epson.

Resetting Control Panel Defaults

If you have a problem with settings on the product control panel, you can reset them to their factory defaults. You can choose which settings to reset or reset them all.

1. Press the Home button, if necessary.
2. Press the arrow buttons and then select Setup.
3. Press the arrow buttons and then select **Restore Default Settings**.
   You see this screen:

![Restore Default Settings screen](image)

4. Select one of these options:
   - **Fax Send/Receive Settings**: Resets all settings on the Send Settings, Receive Settings, and Communication screens.
   - **Fax Data Settings**: Erases the speed dial list, group dial list, header, and fax log.
   - **Wi-Fi/Network Settings**: Resets all network settings.
   - **All except Wi-Fi/Network Settings**: Resets all control panel settings, except for network settings.
   - **All Settings**: Resets all control panel settings.
   You see a confirmation screen.

5. Select **Yes** to reset the selected settings. (Select **No** if you want to cancel the operation.)

---

**Solving Setup Problems**

Check these sections if you have problems while setting up your product.

- **Noise After Ink Installation**
- **Software Installation Problems**
- **Control Panel Setup Problems**

**Parent topic**: Solving Problems
Noise After Ink Installation

If you hear noises from your product after installing ink, try these solutions:

• The first time you install ink cartridges, the product must prime its print head. Wait until priming finishes before you turn off the product, or it may prime improperly and use excess ink the next time you turn it on. Your product is finished priming the print head when the blue status light stops flashing.

• If the product's print head stops moving or making noise, and the charging process has not finished after 5 minutes, turn off your product. Turn it back on and check to see if charging is still in progress. If it is still in progress, contact Epson for help.

• Turn off the product, then make sure the transportation lock has been removed and placed in the storage area as shown below. Wait a moment, then turn the product back on to clear the error.

Software Installation Problems

If you have problems while installing your product software, try these solutions:

• Make sure your product is turned on and the USB cable is securely connected at both ends. If you still have problems installing software, disconnect the cable and carefully follow the instructions on the Start Here sheet. Also make sure your system meets the requirements for your operating system.

• Close any other programs, including screen savers and virus protection software, and install your product software again.

• In Windows, make sure your product is selected as the default printer and the correct port is shown in the printer properties.
If you see any error message or your software does not install correctly in Windows, you may not have software installation privileges. Contact your System Administrator.

Cannot Print Over a Network
Cannot Scan Over a Network
Printing a Network Status Sheet

Parent topic: Solving Problems

Product Cannot Connect to a Wireless Router or Access Point

If your product has trouble finding or connecting to a wireless router or access point, try these solutions:

- Make sure to place your product within contact range of your router or access point.
Note: Avoid placing your product near a microwave oven, 2.4 GHz cordless phone, or large metal object, such as a filing cabinet.

- Verify that your router or access point is operating correctly by connecting to it from your computer or another device.
- You may need to disable the firewall and any anti-virus software on your wireless router or access point.
- Check to see if access restrictions, such as MAC address filtering, are set on the router or access point. If access restrictions are set, add your product's MAC address to your router’s address list. To obtain your product's MAC address, print a network status sheet. Then follow the instructions in your router or access point documentation to add the address to the list.
- If your router or access point does not broadcast its network name (SSID), follow the instructions that came with your product to enter your wireless network name manually.
- If your router or access point has security enabled, determine the kind of security it is using and any required password or passphrase for connection. Then make sure to enter the exact WEP key or WPA passphrase correctly.

Parent topic: Solving Network Problems

Network Software Cannot Find Product on a Network

If EpsonNet Setup cannot find your product on a network, try these solutions:

- Make sure your product is turned on and connected to your network. Verify connection using your product control panel.
- If necessary, reinstall your product software and try running EpsonNet Setup again.

Parent topic: Solving Network Problems

Related concepts
When to Uninstall Your Product Software

Product Does Not Appear in Mac OS X Printer Window

If your product does not appear in the Mac OS X printer window, try these solutions:

- Turn your product off, wait 30 seconds, then turn it back on again.
- If you are connecting the product via EpsonNet setup and the WiFi light on your product is not solid green, make sure your product software was installed correctly. If necessary, reinstall your software.

Parent topic: Solving Network Problems
Cannot Print Over a Network

If you cannot print over a network, try these solutions:

- Make sure that your product is turned on.
- Make sure you install your product’s network software as described in your product documentation.
- Print a network status sheet and verify that the network settings are correct. If the network status is Disconnected, check any cable connections and turn your product off and then on again.
- If you are using TCP/IP, make sure the product’s IP address is set correctly for your network. If your network does not assign IP addresses using DHCP, set the IP address manually.
- Make sure your computer and product are both using the same wireless network.
- If network printing is slow, print a network status sheet and check the signal strength. If it is poor, place your product closer to your router or access point.

Note: Avoid placing your product near a microwave oven, 2.4 GHz cordless phone, or large metal object, such as a filing cabinet.

- If you are connecting the product via EpsonNet setup and the WiFi light on your product is not solid green, make sure your product software was installed correctly. If necessary, reinstall your software.

Parent topic: Solving Network Problems

Printing a Network Status Sheet

Cannot Scan Over a Network

If you cannot start Epson Scan for scanning over a network, try these solutions:

- If you are scanning a large original at a high resolution, a network communication error may occur. Try scanning again at a lower resolution.
- If network communication was interrupted while starting Epson Scan, exit Epson Scan, wait a few seconds, and restart it. If Epson Scan cannot restart, turn off your product, turn it back on, and try restarting Epson Scan again.
- Make sure the option selected as the Timeout Setting in the Epson Scan Setting program is long enough to complete scanning over a network. See Epson Scan Help for details.
- You may need to disable the firewall and any anti-virus software on your wireless router or access point.
Note: Epson Scan is not available for Mac OS X 10.6 or 10.7.

**Paper Feeding Problems**

If you have problems feeding paper, try these solutions:

- If paper does not feed for printing, remove it from the tray. Reload it against the right side, then adjust the edge guides. Make sure the paper stack is not above the tab on the edge guides inside the cassette.
- If multiple pages feed at once, remove the paper, fan the edges to separate the sheets, and reload it.
- Do not load more than the recommended number of sheets.
- If paper jams when you print on both sides of the paper, try loading fewer sheets.
- For best results, follow these guidelines:
  - Use new, smooth, high-quality paper that is not curled, creased, old, too thin, or too thick.
  - Load paper in the cassette printable side down.
  - Do not load paper with holes punched in it.
  - Follow any special loading instructions that came with the paper.

Paper Jams in the Automatic Document Feeder

If you have problems with paper jams in the automatic document feeder (ADF), try these solutions:

1. Remove your originals from the ADF.
2. Open the ADF cover.

3. Remove any jammed paper.
Caution: Do not remove paper jammed inside the ADF without opening the cover or you could damage the ADF.

4. Leave the ADF cover open, then raise the scanner cover.

5. Remove any jammed paper.
6. Lower the scanner cover, close the ADF cover, and reload your originals.

**Caution:** Make sure you do not load the ADF beyond its capacity for your paper size. Also make sure the originals you load are not bent, folded, or curled and do not have tape, staples, or other materials that could obstruct the feeder.

7. Follow the prompts on the LCD screen to clear any error messages.

Solving Problems Printing from a Computer

Check these sections if you have problems while printing from your computer.

Nothing Prints
Product Icon Does Not Appear in Windows Taskbar
Error After Cartridge Replacement
Printing is Slow

Parent topic: Solving Problems

Nothing Prints

If you have sent a print job and nothing prints, try these solutions:

• Make sure your product is turned on.

• Make sure any interface cables are connected securely at both ends.
• If you connected your product to a USB hub, make sure it is a first-tier hub. If it still does not print, connect your product directly to your computer instead of the hub.

• Run a product check to see if a test page prints. If the test page prints, check to see if your product software is installed correctly.

• In Windows, make sure your product is selected as the default printer.

• In Windows, clear any stalled print jobs from the Windows Spooler:

  • **Windows 7**: Click 🗳️ and select **Devices and Printers**. Right-click your product name, select **See what's printing**, right-click the stalled print job, click **Cancel**, and click **Yes**.

  • **Windows Vista**: Click 🗳️ and select **Control Panel**. Click **Printer** under **Hardware and Sound**, right-click your product name, select **Open**, right-click the stalled print job, click **Cancel**, and click **Yes**.

  • **Windows XP**: Click **Start** and select **Printers and Faxes**. (Or open the **Control Panel**, select **Printers and Other Hardware** if necessary, and select **Printers and Faxes**.) Right-click your product name, select **Open**, right-click the stalled print job, click **Cancel**, and click **Yes**.

---

**Product Icon Does Not Appear in Windows Taskbar**

If you do not see your product icon in the Windows taskbar, first try restarting your computer. If that does not work, try this solution:

1. Do one of the following:

   • **Windows 7**: Click 🗳️ and select **Devices and Printers**.

   • **Windows Vista**: Click 🗳️, select **Control Panel**, and click **Printer** under **Hardware and Sound**.

   • **Windows XP**: Click **Start** and select **Printers and Faxes**. (Or open the **Control Panel**, select **Printers and Other Hardware** if necessary, and **Printers and Faxes**.)

2. Right-click your product name, and select **Printing Preferences**.

3. Click the **Maintenance** tab.

4. Click the **Speed & Progress** button.

5. Click the **Monitoring Preferences** button.

---

**Parent topic**: Solving Problems Printing from a Computer

### Error After Cartridge Replacement

If you see an error light or error message after you replace an ink cartridge, try this solution:

1. Remove and reinsert the ink cartridge you replaced, making sure to push it all the way into its slot.
2. Complete the ink cartridge installation steps.

**Parent topic:** Solving Problems Printing from a Computer

**Related topics**

Replacing Ink Cartridges

### Printing is Slow

If printing becomes slow, try these solutions:

- Make sure your system meets the requirements for your operating system. If you are printing a high-resolution image, you may need more than the minimum requirements. If necessary, increase your system's memory.
- Clear space on your hard drive or run a defragmentation utility to free up existing space.
- Close any programs you are not using when you print.
- If your product is connected to a USB hub, connect it directly to your computer instead.
- If printing becomes slower after printing continuously for a long time, the product may have automatically slowed down to protect the print mechanism from overheating or becoming damaged. Let the product rest with the power on for 30 minutes, then try printing again.

For the fastest printing, select the following settings in your product software:

- Make sure the paper type setting matches the type of paper you loaded.
- Turn on any high speed settings in your product software.
- Select a lower print quality setting.
- **Windows:** Click the **Maintenance** tab, select **Speed & Progress**, and select the following settings:
  - **High Speed Copies**
  - **Always spool RAW datatype**
Solving Page Layout and Content Problems

Check these sections if you have problems with the layout or content of your printed pages.

Inverted Image
Too Many Copies Print
Blank Pages Print
Incorrect Margins on Printout
Border Appears on Borderless Prints
Incorrect Characters Print
Incorrect Image Size or Position
Slanted Printout

Inverted Image

If your printed image is inverted unexpectedly, try these solutions:

- Turn off any mirror or inversion settings in your printing application.
- Turn off the Mirror Image, Flip horizontally, or Reverse page orientation settings in your printer software. (This option has different names, depending on your operating system version.)

Note: Leave these options turned on when you print on transfer paper, if available for your product.
Too Many Copies Print

Make sure that the Copies setting in your printing program or printer software is not set for multiple copies.

Blank Pages Print

If blank pages print unexpectedly, try these solutions:

- Make sure you selected the correct paper size settings in your printing program and printer software.
- If a blank page exists in a document you are printing and you want to skip printing it, select the Skip Blank Page setting in your printer software.
- Run a print head nozzle check to see if any of the nozzles are clogged. Then clean the print head, if necessary.
- Make sure your product is selected as the printer in your printing program.
Incorrect Margins on Printout
If your printed page has incorrect margins, try these solutions:
• Make sure you selected the correct paper size settings in your printing program and printer software.
• Make sure you selected the correct margins for your paper size in your printing program.
• Make sure your paper is positioned correctly for feeding into the printer.
You can use the preview option in your printer software to check your margins before you print.

Border Appears on Borderless Prints
If you see a border on borderless prints, try these solutions:
• Make sure you are printing on a compatible borderless paper type and size.

  Note: Do not select a custom paper size for borderless prints.

• **Windows**: Make sure you selected the **Borderless** setting in your printer software.
• **Mac OS X**: Make sure you selected a paper size with a (Borderless) option in your printer software.
• Adjust the **Expansion** setting to adjust the amount of image expansion on the edges of borderless prints.

Incorrect Characters Print

If incorrect characters appear in your prints, try these solutions before reprinting:

- Make sure any interface cables are securely connected at both ends.
- In Windows, clear any stalled print jobs from the Windows Spooler:
  - Windows 7: Click and select Devices and Printers. Right-click your product name, select See what's printing, right-click the stalled print job, click Cancel, and click Yes.
  - Windows Vista: Click and select Control Panel. Click Printer under Hardware and Sound, right-click your product name, select Open, right-click the stalled print job, click Cancel, and click Yes.
  - Windows XP: Click Start and select Printers and Faxes. (Or open the Control Panel, select Printers and Other Hardware if necessary, and select Printers and Faxes.) Right-click your product name, select Open, right-click the stalled print job, click Cancel, and click Yes.
- Make sure your product is selected as the printer in your printing program.
- If your product is connected to a USB hub, connect it directly to your computer instead.

Parent topic: Solving Page Layout and Content Problems

Incorrect Image Size or Position

If your printed image is the wrong size or in the wrong position, try these solutions:

- Make sure you selected the correct paper size and layout settings in your printing program and printer software.
- Make sure your paper is positioned correctly for feeding into the printer.

You can use the preview option in your printer software to check your margins before you print.

Solving Scanned Image Quality Problems

White or Dark Lines in Printout
If you notice white or dark lines in your prints (also called banding), try these solutions before you reprint:
• Clean the print head.
• Make sure the paper type setting matches the type of paper you loaded.
• Make sure you loaded the printable side of the paper facedown in the cassette.
• Turn off any high speed settings in your product software.
• Align the print head.
• You may need to replace the ink cartridges.

Blurry or Smeared Printout

If your printouts are blurry or smeared, try these solutions:
• Make sure your paper is not damp, curled, old, or loaded faceup in the cassette (the printable side should be facedown).
• Use a support sheet with special paper, or load special paper one sheet at a time.
• Make sure your paper meets the specifications for your product.
• Use Epson papers to ensure proper saturation and absorption of genuine Epson inks.
• Make sure the paper type setting in your product software matches the type of paper you loaded.
• Remove each sheet from the output tray as it is printed.
• Avoid handling printouts on glossy paper right after printing to allow the ink to set.
• Turn off any high speed settings in your product software.
• If you print on both sides of a sheet of paper, smudges may appear on the reverse side of heavily saturated or dark images. If one side of a sheet will contain a lighter image or text, print that side first. Adjust the Print Density and/or Ink Drying Time settings.
• Clean the print head.
• Align the print head.
• Clean the paper path.

**Note:** Your product will not operate properly while tilted at an angle. Place it on a flat, stable surface that extends beyond the base of the product in all directions.

**Faint Printout or Printout Has Gaps**

If your printouts are faint or have gaps, try these solutions:
• Clean the print head.
• The ink cartridges may be old or low on ink, and you may need to replace them.
• Make sure the paper type setting matches the type of paper you loaded.
• Make sure your paper is not damp, curled, old, or loaded faceup in the cassette (the printable side should be facedown).
• Clean the paper path.
Grainy Printout

If your printouts are grainy, try these solutions:

- Make sure you loaded the printable side of the paper facedown in the cassette.
- Select a higher print quality setting and turn off any high speed settings in your product software.
- Clean the print head.
- Align the print head.
- You may need to increase the image resolution or print a smaller size; see your software documentation.
Incorrect Colors

If your printouts have incorrect colors, try these solutions:

• Make sure the Black/Grayscale or Grayscale setting is not selected in your printer software.
• Clean the print head.
• The ink cartridges may be old or low on ink, and you may need to replace them.
• Your printed colors can never exactly match your on-screen colors. However, you can use a color management system to get as close as possible. Try using the color management options in your printer software.
• For best results, use genuine Epson ink and paper.

Solving Scanning Problems

Check these solutions if you have problems scanning with your product.

Scanning Software Does Not Operate Correctly
Cannot Start Epson Scan

Parent topic: Solving Problems

Scanning Software Does Not Operate Correctly

If your scanning software does not operate correctly, try these solutions:

• Make sure your computer has adequate memory and meets the system requirements for your operating system.
• Make sure your computer is not running in a power-saving mode, such as sleep or standby. If so, wake your system and restart your scanning software.
• If you upgraded your operating system but did not reinstall your scanning software, try reinstalling it.

    **Note:** Epson Scan is not available for Mac OS X 10.6/10.7.

**Cannot Start Epson Scan**

If you cannot start Epson Scan, try these solutions:

• Make sure your product is turned on and any interface cables are securely connected at both ends.
• Make sure Epson Scan is selected in your scanning program.
• Make sure your computer is not running in a power-saving mode, such as sleep or standby. If so, wake your system and restart Epson Scan.
• If you upgraded your operating system but did not reinstall Epson Scan, try reinstalling it.

    **Note:** Epson Scan is not available for Mac OS X 10.6/10.7.

**Solving Scanned Image Quality Problems**

Check these sections if a scanned image on your computer screen has a quality problem.

- Image Consists of a Few Dots Only
- Line of Dots Appears in All Scanned Images
- Straight Lines in an Image Appear Crooked
- Image is Distorted or Blurry
- Image Colors are Patchy at the Edges
- Image is Too Dark
Image Consists of a Few Dots Only

If your scanned image consists only of a few dots, try these solutions:

- Make sure you placed your original for scanning facing the correct way.
- If you are scanning using the Epson Scan Black & White setting, adjust the Threshold setting and scan again.

Placing Originals on the Product

Line of Dots Appears in All Scanned Images

If a line of dots appears in all your scanned images, clean the scanner glass with a soft, dry, lint-free cloth or use a small amount of glass cleaner on the cloth, if necessary. Paper towels are not recommended.

Caution: Do not spray glass cleaner directly on the scanner glass.

Related tasks
Cleaning Your Product
Straight Lines in an Image Appear Crooked

If straight lines in an original appear crooked in a scanned image, make sure to place your original straight when you scan it.

Parent topic: Solving Scanned Image Quality Problems
Related topics
Placing Originals on the Product

Image is Distorted or Blurry

If a scanned image appears distorted or blurry, try these solutions:

• Make sure your original is not wrinkled or warped. This may prevent the original from laying flat on the scanner glass.
• Do not move your original or your product during scanning.
• Your product will not operate properly while tilted at an angle. Place it on a flat, stable surface that extends beyond the base of the product in all directions.
• Adjust these Epson Scan settings (if available) and try scanning again:
  • Select the Unsharp Mask setting.
  • Adjust the Auto Exposure setting.
  • Increase the Resolution setting.

Parent topic: Solving Scanned Image Quality Problems
Related topics
Selecting Epson Scan Settings

Image Colors are Patchy at the Edges

If you are scanning a thick or warped original, cover its edges with paper to block external light as you scan it.

Parent topic: Solving Scanned Image Quality Problems

Image is Too Dark

If your scanned image is too dark, try these solutions:

• Adjust these Epson Scan settings (if available) and try scanning again:
  • Auto Exposure
• Brightness
• Histogram Adjustment
• Check the brightness and contrast settings of your computer monitor.

Parent topic: Solving Scanned Image Quality Problems
Related topics
Selecting Epson Scan Settings

Back of Original Image Appears in Scanned Image
If an image from the back of a thin original appears in your scanned image, place a piece of black paper on the back of the original and scan it again.

Parent topic: Solving Scanned Image Quality Problems

Ripple Patterns Appear in an Image
You may see a ripple pattern (called a moiré) in scanned images of printed documents. This is caused by interference from differing pitches in the scanner’s screen and your original’s halftone screen. To reduce this effect, adjust these Epson Scan settings (if available) and try scanning again:
• Select the Descreening setting.
• Select a lower Resolution setting.

Parent topic: Solving Scanned Image Quality Problems
Related topics
Selecting Epson Scan Settings

Scanned Image Colors Do Not Match Original Colors
Printed colors can never exactly match the colors on your computer monitor because printers and monitors use different color systems: monitors use RGB (red, green, and blue) and printers typically use CMYK (cyan, magenta, yellow, and black).

Check the color matching and color management capabilities of your computer, display adapter, and the software you are using to see if they are affecting the palette of colors you see on your screen.
To adjust the colors in your scanned image, adjust these Epson Scan settings (if available) and try scanning again:
• Change the Image Type setting and experiment with different combinations of the next settings.
• Adjust the Tone Correction setting.
• Adjust the **Auto Exposure** setting.

**Parent topic:** Solving Scanned Image Quality Problems

Memory Card Types

Related tasks
Inserting a Memory Card

Cannot View or Print Photos from a Memory Card
If you cannot view or print photos from a memory card inserted in your product, try these solutions:

• Make sure you have inserted only one memory card at a time.
• Make sure your memory card is compatible with the product.
• Make sure the files on your memory card are in the correct format.
• If you have too many photos on your memory card, you may not see all the photos you expect or may be prompted to select a group of photos by date. Reduce the number of photos on your card or select one group of photos at a time. Check the memory card specifications for the maximum number of photos.

Solving Faxing Problems

Check these solutions if you have problems faxing with your product.

Cannot Send or Receive Faxes
Cannot Receive Faxes with a Telephone Connected to Your Product

Parent topic: Solving Problems

Cannot Send or Receive Faxes

If you cannot send or receive faxes, try these solutions:

• Make sure the recipient's fax machine is turned on and working.
• Make sure paper is loaded correctly in your product.
• Make sure Auto Answer mode is turned on to receive faxes automatically. Check your product control panel to see if this mode is turned on.
• Check that the cable connecting your telephone wall jack to your product's LINE port is secure.
• Print a fax connection report using your product control panel or fax software to help diagnose the problem.
• Verify that the telephone wall jack works by connecting a phone to it and testing it.
• If you connected your product to a DSL phone line, you must connect a DSL filter to the phone jack to enable faxing over the line. Contact your DSL provider for the necessary filter.
• If your telephone line has static, turn off your product's V.34 and ECM (Error Correction Mode) fax communication settings and try faxing again.
Note: If your product is connected to a VoIP (Voice over Internet Protocol) phone line, keep in mind that fax machines are designed to work over analog phone lines. Epson cannot guarantee that fax transmission will work when using VoIP.

If your phone line includes voice mail answering services, calls or faxes may be inadvertently received by your voice mail service.

When to Uninstall Your Product Software
If you have a problem that requires you to uninstall and re-install your software, follow the instructions for your operating system.

Uninstalling Product Software - Windows
Uninstalling Product Software - Mac OS X

Parent topic: Solving Problems

Uninstalling Product Software - Windows
You can uninstall and then re-install your product software to solve certain problems.
1. Turn off the product.
2. Disconnect any interface cables.
3. Click ⊗ or Start, and select All Programs or Programs.
4. Select EPSON, select your product, then click EPSON Printer Software Uninstall.

   **Note:** If you see a User Account Control window, click Yes or Continue.

5. In the next window, select your product and click OK. Then follow any on-screen instructions.
6. Open the Windows Control Panel utility.
7. Do one of the following to uninstall Epson Event Manager, then follow any on-screen instructions:
   - **Windows 7 or Windows Vista:** Select Programs and Features. (In Classic view, select Programs and click Uninstall a program.) Select Epson Event Manager and click Uninstall/Change.
   - **Windows XP:** Double-click Add or Remove Programs. Select Epson Event Manager and click Change/Remove.
8. Do one of the following to uninstall Epson Scan, then follow any on-screen instructions:
   - **Windows 7 or Windows Vista:** Select Epson Scan and click Uninstall/Change.
   - **Windows XP:** Select Epson Scan and click Change/Remove.
9. Restart your computer, then see the Start Here sheet to re-install your software.

   **Note:** If you find that re-installing your product software does not solve a problem, contact Epson.

**Parent topic:** When to Uninstall Your Product Software

### Uninstalling Product Software - Mac OS X

In most cases, you do not need to uninstall your product software before re-installing it. However, you can download the Uninstall Center utility from the Epson support website to uninstall your product software as described here.

**Note:** If you find that re-installing your product software does not solve a problem, contact Epson.

1. To download the Uninstall Center utility, visit the Epson download site (U.S. downloads or Canadian downloads).
2. Extract the contents of the zip file you downloaded onto your hard drive.
3. Quit all applications currently running on your Mac.
4. Open the Applications > Epson Software folder.
5. Double-click the Uninstall Center icon.
6. Select the checkbox for each software program you want to uninstall.
7. Click Uninstall.
8. Follow the on-screen instructions to uninstall the software.
9. To reinstall your product software, see the Start Here sheet for instructions.

Note: If you uninstall the printer driver and your product name remains in the Print & Fax or Print & Scan window, select your product name and click the – (remove) icon to remove it.

Where to Get Help

If you need to contact Epson for technical support services, use the following support options.

Internet Support

Visit Epson's support website at www.epson.com/support (U.S.) or www.epson.ca/support (Canada) for solutions to common problems. You can download drivers and documentation, get FAQs and troubleshooting advice, or e-mail Epson with your questions.

Speak to a Support Representative

Before you call Epson for support, please have the following information ready:

- Product name
- Product serial number (located on a label on the product)
- Proof of purchase (such as a store receipt) and date of purchase
- Computer configuration
- Description of the problem

Then call:

- U.S.: (562) 276-4382, 6 AM to 8 PM, Pacific Time, Monday through Friday, and 7 AM to 4 PM, Pacific Time, Saturday
• Canada: (905) 709-3839, 6 AM to 8 PM, Pacific Time, Monday through Friday
Days and hours of support are subject to change without notice. Toll or long distance charges may apply.

Purchase Supplies and Accessories
You can purchase genuine Epson ink and paper at Epson Supplies Central at www.epson.com/ink3 (U.S. sales) or www.epson.ca (Canadian sales). You can also purchase supplies from an Epson authorized reseller. To find the nearest one, call 800-GO-EPSON (800-463-7766).

Paper Specifications

Use paper under normal conditions:

- Temperature: 59 to 77 °F (15 to 25 °C)
- Humidity: 40 to 60% RH

Note: Since the quality of any particular brand or type of paper may be changed by the manufacturer at any time, Epson cannot guarantee the quality of any non-Epson brand or type of paper. Always test a sample of paper stock before purchasing large quantities or printing large jobs.
Single-sheets

Size
- A4 (8.3 × 11.7 inches [210 × 297 mm])
- A6 (4.1 × 5.8 inches [105 × 148 mm])
- Letter (8.5 × 11 inches [216 × 279 mm])
- Legal (8.5 × 14 inches [216 × 357 mm])
- 4 × 6 inches (102 × 152 mm)
- 5 × 7 inches (127 × 178 mm)
- 8 × 10 inches (203 × 254 mm)
- 16:9 wide (4 × 17.1 inches [102 × 434 mm])

Paper types
Plain paper and paper distributed by Epson

Thickness
0.003 to 0.004 inch (0.08 to 0.11 mm)

Weight
17 lb (64 g/m²) to 24 lb (90 g/m²)

Envelopes

Size
No. 10 (4.1 × 9.5 inches [105 × 241 mm])

Paper types
Plain bond paper

Weight
20 lb (75 g/m²) to 24 lb (90 g/m²)

Envelopes
1. Left: 0.12 inch (3 mm) minimum
2. Bottom: 0.20 inch (5 mm) minimum
3. Top: 0.20 inch (5 mm) minimum
4. Right: 0.78 inch (20 mm) minimum

**CD/DVDs**

**12-cm CD/DVDs**

1. 0.7 inch (18 mm) minimum inner margin
2. 4.7 inch (120 mm) maximum outer margin

**8-cm CD/DVDs**
1 0.7 inch (18 mm) minimum inner margin
2 3.2 inch (80 mm) maximum outer margin

Note: Avoid printing in the clear plastic areas of discs to prevent staining the disc with ink.

Parent topic: Technical Specifications

Ink Cartridge Specifications

Note: We recommend that you use genuine Epson cartridges and do not refill them. The use of other products may affect your print quality and could result in printer damage.

The printer ships with full cartridges and part of the ink from this first set of cartridges is used for priming the printer. Yields vary considerably based on images printed, print settings, paper type, frequency of use, and temperature. For print quality, a variable amount of ink remains in the cartridge after the "replace cartridge" indicator comes on.

Color
Cyan, Magenta, Yellow, Black, Light Cyan, Light Magenta

Cartridge life
Opened package: 6 months
Unopened package: do not use if the date on the package has expired
Temperature

Storage: –4 to 104ºF (–20 to 40 ºC)
1 month at 104 ºF (40 ºC)
Ink freezes at 3.2 ºF (–16 ºC)
Ink thaws and is usable after 3 hours at 77ºF (25 ºC)

Note: For best printing results, use up a cartridge within 6 months of opening the package.

Note: Ink cartridges may contain recycled materials. This does not affect product function or performance.

Network Interface Specifications

- **Wireless LAN standard**: IEEE 802.11 b/g/n
- **Wireless security**: WPA-PSK (TKIP/AES) WPA2 compliant
  - WEP (64/128 bit)
- **Frequency band**: 2.4 GHz
- **Communication mode**: Infrastructure mode
  - Ad hoc mode
- **Ethernet standard**: 100BASE-TX/10BASE-T

*Note*: Wireless LAN standard complies with either IEEE 802.11 b/g or IEEE 802.11 b/g/n, depending on purchase location.

Safety and Approvals Specifications

- **United States**
  - Safety: UL60950-1
  - EMC: FCC part 15 Subpart B class B
- **Canada**
  - Safety: CAN/CSA C22.2 No. 60950-1
  - EMC: CAN/CSA-CEI/IEC CISPR 22 Class B

This equipment contains the following wireless module:
- Manufacturer: Marvell Semiconductor Inc.
- Type: SP88W8786-MD0-2C2T00

This product conforms to Part 15 of FCC Rules and RSS-210 of the IC Rules. Epson cannot accept responsibility for any failure to satisfy the protection requirements resulting from a non-recommended modification of the product. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation of the device.
To prevent radio interference to the licensed service, this device is intended to be operated indoors and away from windows to provide maximum shielding. Equipment (or its transmit antenna) that is installed outdoors is subject to licensing.

FCC Compliance Statement

For United States Users
This equipment complies with Part 68 of the FCC rules and the requirements adopted by the ACTA. On the back side is a label that contains, among other information, the FCC registration number and the ringer equivalence number (REN) for this equipment. You must, upon request, provide this information to your local telephone company. The information associated with the services the equipment is to be connected are REN: 0.1B, Jack type: RJ-11C.

The REN is useful to determine the quantity of devices that you may connect to your telephone line and still have all of those devices ring when your telephone number is called. In most, but not all areas, the sum of the RENs of all devices connected to one line should not exceed five (5.0). To be certain of the number of devices that you may connect to your line, you may want to contact your local telephone company. For products approved after July 23, 2001, the REN for this product is part of the product identifier that has the format US: BKMFA01BC431A. The digits represented by 01 are the REN without a decimal point (e.g., 01 is a REN of 0.1). For earlier products, the REN is separately shown on the label.

This equipment may not be used on coin service provided by the telephone company. Connection to party lines is subject to state tariffs.

Should this equipment cause harm to the telephone network, the telephone company may discontinue your service temporarily. If possible they will notify you in advance that temporary discontinuance of service may be required. But if advanced notice isn’t practical, the telephone company will notify you as soon as possible. You will be informed of your right to file a complaint with the FCC. The telephone company may make changes in its facilities, equipment, operations or procedures that could affect the proper functioning of your equipment. If they do, you will be notified in advance to give you an opportunity to maintain uninterrupted telephone service.
This product is not intended to be repaired. If you experience trouble with this equipment, please contact:
Name: Epson America, Inc.
Address: 3840 Kilroy Airport Way, Long Beach, CA 90806 U.S.A.
Telephone: (562) 981-3840

The telephone company may ask that you disconnect this equipment from the network until the problem has been corrected or until you are sure that the equipment is not malfunctioning.

A plug and jack used to connect this equipment to the premises wiring and telephone network must comply with the applicable FCC Part 68 rules and requirements adopted by the ACTA. A compliant telephone cord and modular plug is provided with this product. It is designed to be connected to a compatible modular jack that is also compliant. See installation instructions for details.

The Telephone Consumer Protection Act of 1991 makes it unlawful for any person to use a computer or other electronic device, including fax machines, to send any message unless such message clearly contains in a margin at the top or bottom of each transmitted page or on the first page of the transmission, the date and time it is sent and an identification of the business or other entity, or other individual sending the message and the telephone number of the sending machine or such business, other entity, or individual. In order to program this information into your fax machine, follow the instructions for entering fax header information.

According to the FCC’s electrical safety advisory, we recommend that you may install an AC surge arrestor in the AC outlet to which this equipment is connected. Telephone companies report that electrical surges, typically lightning transients, are very destructive to customer terminal equipment connected to AC power sources and that this is a major nationwide problem.

If your home has specially wired alarm equipment connected to the telephone line, ensure the installation of this equipment Model C431A does not disable your alarm equipment. If you have questions about what will disable alarm equipment, consult your telephone company or a qualified installer.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio or television reception. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause interference to radio and television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
• Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
• Consult the dealer or an experienced radio/TG technician for help.

**WARNING**

The connection of a non-shielded equipment interface cable to this equipment will invalidate the FCC Certification or Declaration of this device and may cause interference levels which exceed the limits established by the FCC for this equipment. It is the responsibility of the user to obtain and use a shielded equipment interface cable with this device. If this equipment has more than one interface connector, do not leave cables connected to unused interfaces. Changes or modifications not expressly approved by the manufacturer could void the user’s authority to operate the equipment.

**For Canadian Users**

1. This product meets the applicable Industry Canada technical specifications.
2. The Ringer Equivalence Number is an indication of the maximum number of devices allowed to be connected to a telephone interface. The termination on an interface may consist of any combination of devices subject only to the requirement that the sum of the RENs of all the devices does not exceed five.

This Class B digital apparatus complies with Canadian ICES-003.

Le présent matériel est conforme aux spécifications techniques applicables d’Industrie Canada.

L'indice d'équivalence de la sonnerie (IES) sert à indiquer le nombre maximal de terminaux qui peuvent être raccordés à une interface téléphonique. La terminaison d'une interface peut consister en une combinaison quelconque de dispositifs, à la seule condition que la somme d'indices d'équivalence de la sonnerie de tous les dispositifs n'excède pas 5.

Cet appareil numérique de la classe B est conforme à la norme NMB-003 du Canada.
