** Ink lightfastness ratings based on accelerated testing of prints on specialty media, displayed indoors, under glass. Six times longer fade resistance for plain paper documents based on unframed color prints in indoor display conditions. Actual print stability will vary according to media, printed image, display conditions, light intensity, humidity and atmospheric conditions. Epson does not guarantee the longevity of prints. For maximum print life, display all prints under glass or properly store them. Visit www.wilhelm-research.com for the latest information.

*** We recommend that you use genuine Epson ink cartridges. The use of other products may affect your print quality and longevity and could result in all-in-one damage. Yields vary considerably based on images printed, print settings, paper type, frequency of use and temperature. See www.epson.com/cartridgeinfo for more information about cartridges.
