Quick Setup

Before using the projector, read these instructions and the safety instructions in the User’s Guide on your projector CD-ROM.

1 Unpack the projector

You should have the following items:

- Projector
- Carrying case
- Power cord
- VGA cable
- USB cable
- Projector remote control (EX30/EX50)
- Projector remote control (EX70)
- Batteries
- Password Protected sticker
- User’s Guide CD-ROM
- Interface label stickers (Included for Canada only)

Canada only: For French speakers, remove sticker(s) from the interface label backing sheet and place over corresponding text on the control panel.

2 Choose a location

The projector supports 4 viewing setups: front projection, ceiling projection, rear projection, and rear/ceiling projection. Choose the best one for your environment. If you install the projector in a rear or overhead position, you’ll need to choose the correct projection option from the Extended menu. See the User’s Guide on your CD-ROM for instructions.

The distance between the projector and the screen generally determines the size of the image, but the size can also vary depending on the aspect ratio (image shape), how you zoom into the image, and whether you’ve adjusted other image settings. Depending on the projector model you are using and the image settings you’ve chosen, you can place the projector anywhere from 33 to 412 inches (84 to 1047 cm) from the screen.

Use the tables in the User’s Guide or the Image Size calculator on the Multimedia Projectors page on Epson’s website to help you determine the proper projection distance.

3 Plug in and turn on

1 Open the A/V Mute slide (lens cover).

2 Connect the power cord to the projector and plug the other end into an electrical outlet.

The ♦ power light on the projector turns orange.

3 Turn on your computer or video source.

4 Press the ♦ power button on the projector or remote control. The projector beeps, the ♦ power light flashes green, and the projector warms up. When the ♦ power light stays green, the projector is ready for use.

Turning off the projector

1 If you’re using a computer, shut it down first, while you can still see the display.

2 Press the ♦ power button on the projector or remote control.

3 When you see the confirmation message, press the ♦ power button again. The projector beeps twice and the ♦ power light turns orange.

With Epson’s Instant Off® technology, there’s no cool-down period. When you’re done, just unplug the projector and it’s ready to travel.

4 Set up the remote control

1 Remove the battery cover.

2 Insert the batteries.

3 Replace the battery cover.

EX30/EX50

EX70

5 Connect your video source

Follow these instructions to connect the projector to your computer using the USB cable (Windows® only), or to your video equipment using an HDMI cable (EX70 only) or component video cable. For instructions on using other connection options, see the User’s Guide on your CD-ROM.

Connecting with a USB cable

If you’re connecting a Windows Vista®, XP, or 2000 computer to the projector, you can use the USB cable. You don’t need to use the VGA cable.

1 Make sure the projector is turned on.

2 Turn on your computer.

3 Connect the square end of the USB cable to the projector’s TypeB USB port.

4 Connect the flat end of the cable to any available USB port on your computer.

Follow the instructions on your computer screen to install the Epson USB Display software (you need to install the software only the first time you connect). After the software has been installed, you see your computer’s screen displayed by the projector.

If you see a “Digital Signature Warning” while installing the software, select Continue.

You can connect an optional audio cable if you want to play sound through the projector. See the User’s Guide on your CD-ROM for instructions.
**Quick Setup**

Before using the projector, read these instructions and the safety instructions in the User’s Guide on your projector CD-ROM.

1 **Unpack the projector**

You should have the following items:

- Projector
- Carrying case
- Component-to-VGA adapter (EX30/EX50 only)
- VGA cable
- Power cord
- USB cable
- Projector remote control (EX30/EX50)
- Projector remote control (EX70)
- Batteries
- User’s Guide CD-ROM
- Interface label stickers (Included for Canada only)
- Password Protected sticker

Canada only: For French speakers, remove sticker(s) from the interface label backing sheet and place over corresponding text on the control panel.

2 **Choose a location**

The projector supports 4 viewing setups: front projection, ceiling projection, rear projection, and rear/ceiling projection. Choose the best one for your environment. If you install the projector in a rear or overhead position, you'll need to choose the correct projection option from the Extended menu. See the User’s Guide on your CD-ROM for instructions.

The distance between the projector and the screen generally determines the size of the image, but the size can also vary depending on the aspect ratio (image shape), how you zoom into the image, and whether you've adjusted other image settings. Depending on the projector model you are using and the image settings you've chosen, you can place the projector anywhere from 33 to 412 inches (84 to 1047 cm) from the screen.

Use the tables in the User’s Guide or the Image Size calculator on the Multimedia Projectors page on Epson’s website to help you determine the proper projection distance.

3 **Plug in and turn on**

1 Open the A/V Mute slide (lens cover).
2 Connect the power cord to the projector and plug the other end into an electrical outlet.

The power light on the projector turns orange.

3 Turn on your computer or video source.
4 Press the power button on the projector or remote control. The projector beeps, the power light flashes green, and the projector warms up. When the power light stays green, the projector is ready for use.

4 **Set up the remote control**

1 Remove the battery cover.
2 Insert the batteries.
3 Replace the battery cover.

EX30/EX50

EX70

5 **Connect your video source**

Follow these instructions to connect the projector to your computer using the USB cable (Windows® only), or to your video equipment using an HDMI cable (EX70 only) or component video cable. For instructions on using other connection options, see the User’s Guide on your CD-ROM.

**Connecting with a USB cable**

If you’re connecting a Windows Vista®, XP, or 2000 computer to the projector, you can use the USB cable. You don’t need to use the VGA cable.

1 Make sure the projector is turned on.
2 Turn on your computer.
3 Connect the square end of the USB cable to the projector’s TypeB USB port.
4 Connect the flat end of the cable to any available USB port on your computer.

5 Follow the instructions on your computer screen to install the Epson USB Display software (you need to install the software only the first time you connect). After the software has been installed, you see your computer’s screen displayed by the projector.

**Note** If you see a “Digital Signature Warning” while installing the software, select Continue.

You can connect an optional audio cable if you want to play sound through the projector. See the User’s Guide on your CD-ROM for instructions.

**Turning off the projector**

1 If you’re using a computer, shut it down first, while you can still see the display.
2 Press the power button on the projector or remote control.
3 When you see the confirmation message, press the power button again. The projector beeps twice and the power light turns orange.

With Epson’s Instant Off® technology, there’s no cool-down period. When you’re done, just unplug the projector and it’s ready to travel.
Quick Setup

Before using the projector, read these instructions and the safety instructions in the User’s Guide on your projector CD-ROM.

1 Unpack the projector

3 Plug in and turn on

1. Open the A/V Mute slide (lens cover).

2. Connect the power cord to the projector and plug the other end into an electrical outlet.

The power light on the projector turns orange.

3. Turn on your computer or video source.

4. Press the power button on the projector or remote control. The projector beeps, the power light flashes green, and the projector warms up. When the power light stays green, the projector is ready for use.

Turning off the projector

1. If you’re using a computer, shut it down first, while you can still see the display.

2. Press the power button on the projector or remote control.

3. When you see the confirmation message, press the power button again. The projector beeps twice and the power light turns orange.

With Epson’s Instant Off® technology, there’s no cool-down period. When you’re done, just unplug the projector and it’s ready to travel.

4 Set up the remote control

1. Remove the battery cover.

2. Insert the batteries.

3. Replace the battery cover.

5 Connect your video source

Follow these instructions to connect the projector to your computer using the USB cable (Windows® only), or to your video equipment using an HDMI cable (EX70 only) or component video cable. For instructions on using other connection options, see the User’s Guide on your CD-ROM.

Connecting with a USB cable

If you’re connecting a Windows Vista®, XP, or 2000 computer to the projector, you can use the USB cable. You don’t need to use the VGA cable.

1. Make sure the projector is turned on.

2. Turn on your computer.

3. Connect the square end of the USB cable to the projector’s Type B USB port.

4. Connect the flat end of the cable to any available USB port on your computer.

5. Follow the instructions on your computer screen to install the Epson USB Display software (you need to install the software only the first time you connect). After the software has been installed, you see your computer’s screen displayed by the projector.

NOTE: If you see a “Digital Signature Warning” while installing the software, select Continue.

You can connect an optional audio cable if you want to play sound through the projector. See the User’s Guide on your CD-ROM for instructions.

Turn over
Connecting with an HDMI cable (EX70 only)
For the best image and sound quality, connect your video equipment to the HDMI port, if possible.

1 Connect an HDMI cable (not included) to the HDMI port on your video player and the HDMI port on the projector.

2 Start your video or presentation. Use the Source Search button on the projector or the Search or Source Search button on the remote control to select the HDMI source, if necessary.

Connecting with a component video cable
If your video equipment has component video connectors (three connectors labeled either Y/Cb/Cr or Y/Pb/Pr), you can use a component-to-VGA cable (not included) to connect the projector. Or, with the EX30 and EX50, you can use a component video cable (not included) along with the included component-to-VGA adapter.

Once you’ve connected the cable(s), start your video or presentation. Use the Source Search button on the projector or the Search or Source Search button on the remote control to select the video source, if necessary.

You can connect an optional audio cable if you want to play sound through the projector. See the User’s Guide on your CD-ROM for instructions.

Adjust the image

1 To raise the image, press the foot release lever and lift the front of the projector. Release the lever to lock the foot in the position you want.

2 Rotate the focus ring to sharpen the image. To reduce or enlarge the image, rotate the zoom ring (EX50/EX70 only) or press the Wide (enlarge) or Tele (reduce) button on the projector’s control panel (EX30 only).

3 If your image looks like or , first make sure the projector is facing the screen squarely. Then, if necessary, press the Focus and Zoom buttons on the projector’s control panel until the image looks correct.

4 To select the best color mode, press the Color Mode button on the remote control (EX70 only). Press it repeatedly to move through the options.

You can also select the Color Mode setting from the projector’s Image menu. See the User’s Guide on your CD-ROM for instructions.

5 When you’re done, click Exit.

To open your User’s Guide, double-click the User’s Guide icon on your desktop.

Install your User’s Guide and register your projector

1 Insert the projector CD-ROM in your drive. If the installer doesn’t open automatically, double-click the Epson CD-ROM icon, then double-click the Epson installer icon.

2 Select English.

3 Follow the instructions on the screen to register.

   NOTE
   You can also register at www.epson.com/webreg.

4 After you register the projector, click User’s Guide to install it. (If you are using Windows and don’t already have Adobe® Reader®, click Adobe Reader and follow the on-screen instructions to install it.)

5 When you’re done, click Exit.

To open your User’s Guide, double-click the User’s Guide icon on your desktop.

Internet support
Visit Epson’s support website at epson.com/support and select your product for solutions to common problems. You can download utilities and documentation, get FAQs and troubleshooting advice, or e-mail Epson with your questions.

Visit http://www.presentersonline.com to access tips, templates, and training for developing successful presentations.

Speak to a support representative
To use the Epson PrivateLine® Support service, call (800) 637-7661 and enter the PIN on the Epson PrivateLine Support card that came with your projector. This service is available 6 AM to 6 PM, Pacific Time, Monday through Friday, for the duration of your warranty period. You may also speak with a projector support specialist by dialing one of the following numbers. (Toll or long distance charges may apply.)

U.S.: (562) 276-4394, 6 AM to 6 PM, Pacific Time, Monday-Friday
Canada: (905) 709-3839, 6 AM to 6 PM, Pacific Time, Monday-Friday

Days and hours of support are subject to change without notice.

Purchase supplies and accessories
You can purchase screens and other accessories from an Epson authorized reseller. To find the nearest reseller, call 800-GO-EPSON (800-463-7766). Or you can purchase online at www.epsonstore.com (U.S. sales) or www.epson.ca (Canadian sales).

Troubleshooting

If you see a blank screen
If you see a blank screen or the No signal message after turning on your computer or video source, check the following:

- Make sure the power light on the projector is green and not flashing and the A/V Mute slide (lens cover) is open.
- Make sure the cables are connected correctly. (See the User’s Guide for more information.)
- If you’ve connected more than one video source, you may need to press the Source Search button on the projector or the Search or Source Search button on the remote control to select the one you want to watch. (Allow a few seconds for the projector to sync up after pressing it.)

If the projector and the notebook don’t display the same image
If you’re using a Macintosh® notebook:

Hold down the Fn key and press the function key (such as or CRT/LCD) that lets you display on an external monitor. On most systems, the or CRT/LCD key lets you toggle between the LCD screen and the projector, or display on both at the same time.

- Check your monitor settings to make sure both the LCD screen and the external monitor port are enabled. From the Control Panel, open the Display utility, click the Settings tab, then click Advanced. The method for adjusting the settings varies by brand; you may need to click a Monitor tab, then make sure the external Monitor port is set as your primary display and/or enabled. See your computer’s documentation or online help for details.

If you’re using a Windows notebook:

- Hold down the Shift key and press the arrow keys to select another display. (If you are using Windows and don’t already have Adobe Reader, click Adobe Reader and follow the on-screen instructions to install it.)
- Make sure the cables are connected correctly. (See the User’s Guide for more information.)
- Connect an HDMI cable (not included) to the HDMI port on your computer or video source, check the following:

- Make sure the cables are connected correctly. (See the User’s Guide for more information.)
- If you’ve connected more than one video source, you may need to press the Source Search button on the projector or the Search or Source Search button on the remote control to select the one you want to watch. (Allow a few seconds for the projector to sync up after pressing it.)

If the projector and the notebook don’t display the same image
If you’re using a Macintosh® notebook with Mac OS® X:

1 From the Apple® menu, select System Preferences, then click Displays.
2 Select VGA Display or Color LCD, click Arrangement or Arrange, and make sure Mirror Displays is checked.

If you see a blank screen
If you see a blank screen or the No signal message after turning on your computer or video source, check the following:

- Make sure the power light on the projector is green and not flashing and the A/V Mute slide (lens cover) is open.
- Make sure the cables are connected correctly. (See the User’s Guide for more information.)
- If you’ve connected more than one video source, you may need to press the Source Search button on the projector or the Search or Source Search button on the remote control to select the one you want to watch. (Allow a few seconds for the projector to sync up after pressing it.)

If the projector and the notebook don’t display the same image

Hold down the Fn key and press the function key (such as or CRT/LCD) that lets you display on an external monitor. On most systems, the or CRT/LCD key lets you toggle between the LCD screen and the projector, or display on both at the same time.

- Check your monitor settings to make sure both the LCD screen and the external monitor port are enabled. From the Control Panel, open the Display utility, click the Settings tab, then click Advanced. The method for adjusting the settings varies by brand; you may need to click a Monitor tab, then make sure the external Monitor port is set as your primary display and/or enabled. See your computer’s documentation or online help for details.

If you’re using a Windows notebook:

- Hold down the Shift key and press the arrow keys to select another display. (If you are using Windows and don’t already have Adobe Reader, click Adobe Reader and follow the on-screen instructions to install it.)
- Make sure the cables are connected correctly. (See the User’s Guide for more information.)
- Connect an HDMI cable (not included) to the HDMI port on your computer or video source, check the following:

- Make sure the cables are connected correctly. (See the User’s Guide for more information.)
- If you’ve connected more than one video source, you may need to press the Source Search button on the projector or the Search or Source Search button on the remote control to select the one you want to watch. (Allow a few seconds for the projector to sync up after pressing it.)

If the projector and the notebook don’t display the same image
If you’re using a Macintosh® notebook with Mac OS® X:

1 From the Apple® menu, select System Preferences, then click Displays.
2 Select VGA Display or Color LCD, click Arrangement or Arrange, and make sure Mirror Displays is checked.
Connecting with an HDMI cable (EX70 only)
For the best image and sound quality, connect your video equipment to the HDMI port, if possible.

1 Connect an HDMI cable (not included) to the HDMI port on your video player and the HDMI port on the projector.

2 Start your video or presentation. Use the Source Search button on the projector or the Search or Source Search button on the remote control to select the HDMI source, if necessary.

Connecting with a component video cable
If your video equipment has component video connectors (three connectors labeled either Y/Cb/Cr or Y/Pb/Pr), you can use a component-to-VGA cable (not included) to connect the projector. Or, with the EX30 and EX50, you can use a component video cable (not included) along with the included component-to-VGA adapter.

Once you’ve connected the cable(s), start your video or presentation. Use the Source Search button on the projector or the Search or Source Search button on the remote control to select the video source, if necessary.

You can connect an optional audio cable if you want to play sound through the projector. See the User’s Guide on your CD-ROM for instructions.

Adjust the image

1 To raise the image, press the foot release lever and lift the front of the projector. Release the lever to lock the foot in the position you want.

2 Rotate the focus ring to sharpen the image. To reduce or enlarge the image, rotate the zoom ring (EX50/EX70 only) or press the Wide (enlarge) or Tele (reduce) button on the projector’s control panel (EX30 only).

3 If your image looks like □ or □, first make sure the projector is facing the screen squarely. Then, if necessary, press the □ and □ buttons on the projector’s control panel until the image looks correct.

4 To select the best color mode, press the Color Mode button on the remote control (EX70 only). Press it repeatedly to move through the options.

You can also select the Color Mode setting from the projector’s Image menu. See the User’s Guide on your CD-ROM for instructions.

See your User’s Guide on the CD-ROM for more information about image adjustments.

Install your User’s Guide and register your projector

1 Insert the projector CD-ROM in your drive. If the installer doesn’t open automatically, double-click the Epson CD-ROM icon, then double-click the Epson installer icon.

2 Select English.

3 Follow the instructions on the screen to register.

You can also register at www.epson.com/webreg.

4 After you register the projector, click User’s Guide to install it. (If you are using Windows and don’t already have Adobe® Reader®, click Adobe Reader and follow the on-screen instructions to install it.)

5 When you’re done, click Exit.

To open your User’s Guide, double-click the User’s Guide icon on your desktop.
