Changing the Default Paper Size in the Control Panel

Depending on your product, the default paper size for copies is either A4 (8.3 × 11.7 inches [210 × 297 mm]) or Letter (8.5 × 11 inches [216 × 279 mm]).

- To change the default paper size to A4 (8.3 × 11.7 inches [210 × 297 mm]), make sure the product is turned off, then hold down the color copy button and press the power button to turn the product on. When the product turns on, release both buttons.

- To change the default paper size to Letter (8.5 × 11 inches [216 × 279 mm]), make sure the product is turned off, then hold down the B&W copy button and press the power button to turn the product on. When the product turns on, release both buttons.

Changing the Power Off Timer Setting - Windows

You can use the printer software to change the time period before the printer turns off automatically.

1. Right-click the product icon in the Windows taskbar and select **Printer Settings**.
2. Click the **Maintenance** tab and select **Printer and Option Information**.
   
   You see this window:

   ![Printer and Option Information window](image)

   3. In the drop-down menu, select the length of time after which you want the product to automatically turn off when it is not in use.
4. Click **Send**.
5. When you see the time you selected listed as the Current Printer Setting, click **OK**.

**Parent topic:** The Power Off Timer

## Changing the Power Off Timer Setting - Mac OS X

You can use the printer software to change the time period before the printer turns off automatically.

1. Do one of the following:
   - **Mac OS X 10.6/10.7/10.8:** In the Apple menu or the Dock, select **System Preferences**. Select **Print & Fax** or **Print & Scan**, select your product, and select **Options & Supplies**. Select **Utility** and select **Open Printer Utility**.
   - **Mac OS X 10.5:** In the Apple menu or the Dock, select **System Preferences**. Select **Print & Fax**, select your product, and select **Open Print Queue**. Select **Utility**.

2. Select **Printer Settings**.
   
   You see this window:

   ![EPSON Utility Window](image)

   3. Select the length of time after which you want the product to automatically turn off when it is not in use as the **Power Off Timer** setting.

4. Click **Apply**.

5. Close the Printer Settings window.

Loading Paper for Documents

You can print documents on a variety of paper types and sizes.

1. Flip the feeder guard forward.

2. Pull up the paper support and its extension.
3. Pull out the output tray and open the paper stopper.

Note: If you print on legal-size or longer paper, leave the paper stopper closed.

4. Slide the edge guide left.
5. Insert paper, glossy or printable side up and short edge first, against the right side. If you are inserting a stack of paper, fan the sheets first and tap the stack on a flat surface to even the edges.

6. Slide the edge guide against the paper, but not too tightly.

7. Flip the feeder guard back.

Always follow these paper loading guidelines:

- Load only the recommended number of sheets.
- Load paper short edge first, no matter which way your document faces.
- Load letterhead or pre-printed paper top edge first.
- Do not load paper above the arrow mark inside the edge guide.
• Check the paper package for any additional loading instructions.

1. Do one of the following to select your scan area in the Preview image:
   - Normal preview: Click the Auto Locate icon to create a marquee (dotted line) on the preview image.
• **Thumbnail preview**: Your scan area is selected automatically, but you can change it. Place your cursor in one corner of the desired scan area, then click and drag the cursor to the opposite corner to create a marquee (dotted line) on the preview image.
2. Do the following, as necessary, to work with the selected scan area:
   • If the marquee is correct, continue with the next step.
   • To move the marquee, click inside the scan area and drag the marquee where you want it.
   • To resize the scan area, place your cursor over the edge or corner of the marquee, then click and drag the edges where you want them. (Hold down the Shift key as you resize the marquee to retain the same width/height proportions.)
• **Normal preview**: To create additional marquees (up to 50, if available), click the Copy Marquee icon to copy the existing marquee and paste it on the preview image.

• To delete a marquee, click the marquee, then click the Delete Marquee icon.

3. Click inside the scan area and make any necessary settings in the EPSON Scan window.

Selecting a Scan Size - Professional Mode

You can reduce or enlarge the size of your image as you scan. You can also select a specific scan size, such as a common photo size like 4 × 6 inches (102 × 152 mm). This places a scan area of that size on the preview image so you can use it to help crop the image in the correct proportions.

1. Click the Preview button to preview your image.
2. In the EPSON Scan window, select the size you want your scanned image to be from the Target Size list.

| + Target Size: | 5 x 7 in. |

**Note:** If you need to rotate the orientation of the target size for your image, click the orientation icon.

A marquee (dotted line) appears on your preview image proportioned for the size you selected.
3. Do the following, as necessary, to work with the selected scan area:
   - To move the marquee, click inside the scan area and drag the marquee where you want it.
   - To resize the scan area, place your cursor over the edge or corner of the marquee, then click and drag the edge where you want it.
4. To create a scanned image size that is not available in the Target Size list, click the **Customize** option.

![Target Size dialog box](image)

5. Name the custom size, enter the size, click **Save**, and click **OK**. Then create a scan area on the preview image.

The marquee is automatically proportioned for your custom scan size.

6. To use additional sizing tools, click the + (Windows) or ▶ (Mac OS X) icon next to the Target Size setting and select options as desired.

    ![Additional sizing tools](image)

- **Scale**: Reduces or enlarges your image by the percentage you enter.
- **Trimming**: Turns automatic image cropping on or off.
• Unlock icon: Unlocks the width/height proportions of the scanned image size so you can adjust it without constraint.

Image Preview Guidelines

You can preview your scanned image so you can adjust the scan settings using the preview as a guide. There are two types of preview available, depending on the scan mode and selected settings:

Thumbnail preview
A thumbnail preview displays your previewed images as thumbnails with the scanned image area and exposure automatically selected. If the Thumbnail checkbox is selected, clicking the Preview button opens a thumbnail preview.

Normal preview
A normal preview displays your previewed images in their entirety so you can select the scanned image area and other settings manually. If the Thumbnail checkbox is deselected, clicking the Preview button opens a normal preview.

Scan Resolution Guidelines

If you plan to enlarge a scanned image so you can print it at a larger size, you may need to increase the resolution from the default resolution set by EPSON Scan. Follow these guidelines to determine the resolution setting you need:

• You will enlarge the image as you scan it.
  If you will enlarge the image using EPSON Scan's Target Size setting (Home and Professional modes only), you do not need to increase the Resolution setting.

• You will scan the image at its original size, but enlarge it later in an image-editing program.
  Increase EPSON Scan's Resolution setting in your scan. Increase the resolution by the same amount you will increase the image size to retain a high image quality. For example, if the resolution is 300 dpi (dots per inch) and you will double the image size later, change the Resolution setting to 600 dpi.

• You will scan the image at 100% or smaller size.
  Select EPSON Scan's Resolution setting based on how you will use the scanned image:
  • E-mail/view on a computer screen/post on the web: 96 to 150 dpi
  • Print/convert to editable text (OCR): 300 dpi
  • Fax: 200 dpi
Selecting Scan File Settings

You can select the location, name, and format of your scan file on the File Save Settings window. You can also select various optional settings that control how EPSON Scan behaves when you scan and save files.

The File Save Settings window may appear after you click **Scan** on the EPSON Scan window. You may also be able to access the window by clicking the icon on the EPSON Scan window.
1. Do one of the following to select the folder in which you want to save your scanned image:
   - Click the button for one of the displayed folders.
   - Click the **Other** button, click the **Browse** or **Choose** button, and select a folder.
2. Type in a stem file name in the **Prefix** field. This name is used along with numbers to automatically name your scanned files.
3. Select a different number as the **Start Number** setting, if you like.
4. Select the file format you want to use in the **Image Format Type** menu.
5. If your file format provides optional settings, click the **Options** button to select them.
6. Choose any of the optional settings you want to use by selecting their checkboxes.
7. Click **OK**.

A standard image file format for most Windows programs.

**JPEG (*.jpg)**

An image format that lets you highly compress image data. However, the higher the compression, the lower the image quality. (The Tiff format is recommended when you need to modify or retouch your scanned image.)

**Multi-Tiff (*.tif)**

A Tiff file format when multiple pages are saved to the same file, allowing you to edit the images using a compatible program.

**PDF (*.pdf)**

A document format that is readable by Windows and Mac OS X systems using Adobe Reader, Acrobat, or other programs. You can save multi-page documents in one PDF file.

**PICT (*.pct)**

A standard image file format for most Mac OS X programs.
PRINT Image Matching II (*.jpg or *.tif)
File formats that include EPSON PRINT Image Matching II data for enhanced quality and a wider
color range (does not affect the way the image displays on the screen).

Tiff (*.tif)
A file format created for exchanging data between many programs, such as graphic and DTP
software.

Scanning Special Projects

Your product's scanning software offers various options to help you quickly complete special scan projects.

- **Scanning to a PDF File**
- **Restoring Photo Colors as You Scan**
- **Convert Scanned Documents to Editable Text (OCR)**

Parent topic: Scanning

Scanning to a PDF File

Using EPSON Scan, you can scan a multi-page document and save it in one PDF (Portable Document Format) file on your computer.
1. Place your original on your product for scanning.
2. Start EPSON Scan.
3. Select the scan mode you want to use.
4. Select the scan settings for your scan.
5. Preview your image.
6. When you finish selecting all your settings, click **Scan**.
   You see the File Save Settings window.

7. Select **PDF** as the Type setting.
8. Select any other settings you want to use on the File Save Settings window. Click the Options button to access additional settings.

9. Click OK.

EPSON Scan scans your document and you see this window:

![Add Page Confirmation](image)

10. Choose one of the following options on the screen:
   - If you are scanning only one page, click Save File.
   - If you need to scan additional pages in a document, click Add Page. Place additional pages on the product for scanning, click Scan, and repeat until you have scanned all the pages. When you are finished, click Save File.
   - If you need to delete or reorder the scanned pages, click Edit Page. Delete or reorder the pages using the icons that appear on the bottom of the editing window. When you are finished, click OK.

   **Note:** If you installed an OCR (Optical Character Recognition) program, you may see a screen indicating the program is converting your page to text. Wait until the program re-scans the page and close the program, if necessary.

11. Click Close to exit the EPSON Scan window, if necessary.

EPSON Scan scans your original, and saves the PDF file in the selected folder or opens it in your scanning program. If the file was saved directly to your computer, you see the file in the Windows Explorer or Mac OS X Finder, where you can view and print the document, if desired.
Restoring Photo Colors as You Scan

You can restore the colors in faded photos as you scan them using EPSON Scan’s Color Restoration setting. You can select this setting in any of the available scan modes.

**Note:** Color restoration is not available in Office Mode, if EPSON Scan offers that mode.

1. Place your original on your product for scanning.
2. Start EPSON Scan.
3. Select the scan mode you want to use.
4. Select the scan settings for your scan.
5. Preview your image.
6. Locate or access the image adjustment settings.
7. Select the **Color Restoration** checkbox.

8. When you finish selecting all your settings, click **Scan**.
9. Click **Close** to exit the EPSON Scan window, if necessary.

EPSON Scan scans your original, and saves the color-restored file in the selected folder or opens it in your scanning program. If the file was saved directly to your computer, you see the file in the Windows Explorer or Mac OS X Finder, where you can view and print the image, if desired.
Convert Scanned Documents to Editable Text (OCR)

You can scan a document and convert the text into data that you can edit with a word processing, spreadsheet, or HTML-editing program. This process is called OCR (Optical Character Recognition). To scan and use OCR, you need to install an OCR program, such as ABBYY FineReader.

Refilling Ink

When ink in an ink tank is low, you need to refill it.
Before checking the ink levels or refilling the ink tank as described here, be sure to read the ink safety precautions.

**Caution:** If the ink level is below the lower line on the ink tank, fill it to the upper line on the ink tank. Continued use of the product when the ink level is below the lower line on the tank could damage the product.

Ink Safety Precautions

**Ink Handling Precautions**

Observe the following when handling the ink:

- Keep ink bottles and the ink tank unit out of the reach of children. Do not allow children to drink from or handle the ink bottles and bottle caps.
- Do not tilt or shake an ink bottle after removing its seal; otherwise, ink may leak.

**Ink Refilling Precautions**

- Use ink bottles with the correct part number for this product.
- The use of non-genuine ink may cause damage that is not covered by Epson’s warranty, and under certain circumstances, may cause erratic product behavior.
- This product requires careful handling of ink. Ink may splatter when the ink tanks are filled or refilled with ink. If ink gets on your clothes or belongings, it may not come off.
- Do not open the ink bottle package until you are ready to fill an ink tank. Ink bottles are vacuum packed to maintain reliability. If you leave an ink bottle unpacked for a long time before using it, print quality may be affected.
- If the ink level is below the lower line on the ink tank, refill the ink soon. Continued use of the product when the ink level is below the lower line on the ink tank could damage the product.
• Epson recommends filling all ink tanks to the upper line when the product is not operating to reset the ink levels. If the ink tanks are filled as specified above, this product will provide an alert and stop operating at the estimated time so that the ink levels do not fall below the lower line on the ink tanks.

• After bringing an ink bottle inside from a cold storage site, allow it to warm up at room temperature for at least three hours before using it.

• Store ink bottles in a cool, dark place.

• Store the ink bottles in the same environment as the product. When storing or transporting an ink bottle after removing its seal, do not tilt the bottle and do not subject it to impacts or temperature changes. Otherwise, ink may leak even if the cap on the ink bottle is tightened securely. Be sure to keep the ink bottle upright when tightening the cap, and take measures to prevent ink from leaking when you transport the bottle.

Ink Bottle and Ink Tank Information

• To maintain optimum print head performance, some ink is consumed from all ink tanks during printing and when performing maintenance operations, such as cleaning the print head.

• The ink bottles may contain recycled materials, but this does not affect product function or performance.

• When printing in monochrome or grayscale, color ink may be used, instead of black ink, depending on the paper type or print quality settings. This is because a mixture of color inks is used to create black.

Check Ink Levels

To confirm the actual ink remaining, visually check the ink levels in the product’s ink tanks. Make sure the ink levels are above the lower lines on the ink tanks.

Your product’s ink light will also indicate when an ink tank is low or needs to be refilled.

Caution: If the ink level is below the lower line on the ink tank, fill it to the upper line on the ink tank. Continued use of the product when the ink level is below the lower line on the tank could damage the product.
Checking Ink Status Lights

You can check the status of the ink levels by checking the lights on your product and by visually checking the ink levels in the product's ink tanks.

- If ink is low but the ink level is above the lower line on the ink tank, the ink light may flash. You can continue printing until the ink tank needs to be refilled.
- If the ink light is on, the ink is below the lower line on the ink tank and the printer may stop printing. You should refill the ink tank before you continue printing.

**Caution:** If the ink level is below the lower line on the ink tank, fill it to the upper line on the ink tank. Continued use of the product when the ink level is below the lower line on the tank could damage the product.

Purchase EPSON Ink

You can purchase genuine EPSON ink and paper from an EPSON authorized reseller. To find the nearest reseller, visit [global.latin.epson.com](http://global.latin.epson.com) or call your nearest Epson sales office (website available in Spanish and Portuguese only).

**Note:** This product was originally designed to work with genuine EPSON inks. Your product may not function properly if you use other types of ink and may affect Epson's warranty.

The included ink bottles must be used for printer setup and are not for resale. The printer ships with full ink bottles and part of the ink from the first bottles is used to charge the print head. Yields vary considerably based on images printed, print settings, paper type, frequency of use, and temperature. For print quality, a small amount of ink remains in the tank after the "refill ink" indicator comes on.

The ink bottles that came with your printer have a lower yield due to the ink charging process. This process is carried out the first time you turn on the printer and guarantees better performance. Do not load paper before refilling the ink tanks.

Refilling the Ink Tanks

Make sure you have new ink bottles handy and have read the ink safety precautions before you begin.

You can continue to use the product even if one or more ink tanks are not filled all the way. However, to keep your product operating at its best, fill all the ink tanks up to the top line.

Caution: Wear plastic gloves while refilling the ink tanks to avoid staining your hands.

1. Place a sheet of paper under the ink tank area in case of spills.
2. Turn on your product.
3. Make sure the power light is on, but not flashing.
4. Unhook the ink tank unit from the product and lay it down.

Note: Do not pull on the ink tubes.
5. Open the ink tank unit cover, then remove the ink tank’s cap.

Note: Make sure the color of the ink tank matches the ink color you want to refill, and only remove the cap from that ink tank. Be careful not to spill any ink.

6. Snap off the tip of the bottle cap, but do not dispose of the bottle cap tip so you can use it to seal the bottle cap later, if necessary. Then remove the cap, remove the seal from the bottle, and replace the cap on the bottle.

Note: Make sure the color of the ink bottle matches the ink color you want to refill.

Caution: Install the bottle cap tightly; otherwise, ink may leak.
7. Refill the ink tank with the correct color ink up to the upper line on the ink tank.
8. If any ink remains in the ink bottle after filling the ink tank, place the bottle cap tip securely on the bottle cap and store the ink bottle upright for later use.

9. Place the rubber cap securely on the ink tank.

10. Repeat the previous steps as necessary for each ink color you need to refill.
11. Close the ink tank unit cover.

12. Hook the ink tank unit onto the product.

If the ⚪️ power light is on, press the ⚪️ stop button.

Flushing the Ink Tubes Using a Computer Utility

You can use the Power Ink Flushing utility to flush the ink tubes.

Before you begin, make sure there are no warnings or errors indicated by the product control panel.

1. Make sure the transportation lock on the ink tank unit is set to the unlocked (printing) position: 

2. Do one of the following:
   
   • **Windows**: Right-click the product icon in the Windows taskbar and select **Printer Settings**. Then click the **Maintenance** tab.
   
   • **Mac OS X 10.6/10.7/10.8**: In the Apple menu or the Dock, select **System Preferences**. Select **Print & Fax** or **Print & Scan**, select your product, and select **Options & Supplies**. Select **Utility** and select **Open Printer Utility**.
   
   • **Mac OS X 10.5**: In the Apple menu or the Dock, select **System Preferences**. Select **Print & Fax**, select your product, and select **Open Print Queue**. Select **Utility**.

3. Click the **Power Ink Flushing** button.

You see one of these windows:
If there is still banding or missing colors in the print outs even after running Head Cleaning several times, you may need to replace the ink inside the ink tubes to solve the problem.

This function allows you to replace all of the ink inside the ink tubes.

This function consumes a lot of ink. We only recommend using this function after running Head Cleaning several times.

Note: Before using this function, make sure there is enough ink in the printer's ink tanks. If there is not enough ink, refill the ink tanks.
4. Follow the on-screen instructions to flush the ink tubes.

5. When you finish flushing the ink tubes, run a nozzle check to check the print quality. If necessary, also clean the print head.

If you don’t see any improvement, turn off the product and wait at least 6 hours. Then check the print quality again. If quality still does not improve, contact Epson for support.

Print Head Alignment

If your printouts become grainy or blurry, you notice misalignment of vertical lines, or you see dark or light horizontal bands, you may need to align the print head.

Note: Banding may also occur if your print head nozzles need cleaning.
Aligning the Print Head Using a Computer Utility

You can align the print head using a utility on your Windows computer or Mac.

1. Load a few sheets of plain paper in the product.
2. Do one of the following:
   - **Windows**: Right-click the product icon in the Windows taskbar.
   - **Mac OS X 10.6/10.7/10.8**: In the Apple menu or the Dock, select System Preferences. Select Print & Fax or Print & Scan, select your product, and select Options & Supplies. Select Utility and select Open Printer Utility.
   - **Mac OS X 10.5**: In the Apple menu or the Dock, select System Preferences. Select Print & Fax, select your product, and select Open Print Queue. Select Utility.
3. Select Print Head Alignment.
4. Click Next, then click Print to print an alignment sheet.

**Note**: Do not cancel printing while you are printing a head alignment pattern.

You see one of these windows:
Look at the alignment sheet.

Find the square without any visible bands in sets #1 through #5. Select the number that corresponds to that square from the list below for all sets. Then click [Next >].

If every square contains a band, select the square with the thinnest band or bands. Then click [Realignment].

#1 4
#2 4
#3 1
#4 4
#5 4
5. Check the printed pattern and follow the instructions on the screen to choose the number representing the best printed pattern for each set.
   - After choosing each pattern number, click **Next**.
   - If no patterns are aligned in one or more of the sets, choose the closest one in each set and click **Realignment**. Then print another alignment sheet and check it.

   **Note:** Click **Skip** (where available) if you want to skip a particular alignment sheet.

6. When you are done, click **Finish**.

Cleaning and Transporting Your Product

See these sections if you need to clean or transport your product.

Cleaning Your Product
Transporting Your Product

Cleaning Your Product

To keep your product working at its best, you should clean it several times a year.
Close the output tray and paper support when you are not using the product to protect it from dust.

**Caution:** Do not use a hard brush, alcohol, or paint thinner to clean the product or you may damage it.
Do not use oil or other lubricants inside the product or let water get inside it.

1. Turn off the product.
2. Unplug the power cable.
3. Disconnect any connected cables.
4. Remove all the paper.
5. Clean the scanner glass with a soft, lint-free cloth (microfiber is recommended), moistened with a little glass cleaner.

**Caution:** Do not spray glass cleaner directly on the glass and do not press the glass surface with any force.

6. Clean the outer case and control panel with a soft, dry cloth. Do not use liquid or chemical cleansers.

Transporting Your Product

If you need to ship your product or transport it some distance, prepare it for transportation as described here.

**Caution:** During transportation and storage, follow these guidelines:
- Avoid tilting the product, placing it vertically, or turning it upside down; otherwise ink may leak.
• When storing or transporting an ink bottle after removing its seal, do not tilt the bottle and do not subject it to impacts or temperature changes. Otherwise, ink may leak even if the cap on the ink bottle is tightened securely. Be sure to keep the ink bottle upright when tightening the cap, and take measures to prevent ink from leaking when transporting the ink bottles.

1. Turn off the product.
2. Lift up the scanner unit and check to see if the print head is in the far right position (the home position). If not, turn on the product, wait for the print head to move to the far right, then turn the product off again.
3. Secure the print head to the case with tape.

Caution: Do not place tape on the white flat cable inside the product; otherwise, you may damage your product.

4. Lower the scanner unit.
5. Remove all the paper from the product.
6. Unplug the power cable.
7. Disconnect any connected cables.
8. Set the transportation lock to the locked (transport) position.

9. Check to make sure that the ink tank caps are installed securely.
10. Place the transportation covers that came with your product over the protruding parts of the ink tank, and then hook the ink tank unit onto the product.

11. Close the output tray and paper support.

12. Place the product in its original packaging materials, if possible, or use equivalent cushioning around the product.

**Caution:**

- Keep the product level during transport. Otherwise, ink may leak.
- Do not put opened ink bottles in the box with product.
Before using the product:

• Be sure to remove the tape from the print head.
• Be sure to set the transportation lock to the unlocked (printing) position: 
• Be sure to remove the transportation caps.

**Note:** Store the transportation caps on the inside wall of the ink tank unit while using the product.

If print quality has declined when you print again, clean and align the print head.

### Running a Product Check

Running a product check helps you determine if your product is operating properly.
1. Press the power button to turn the product off.

2. Disconnect any interface cables connected to your product.

3. Load plain paper in the product.

4. Hold down the stop button and press the power button to turn the product on.

5. When the product turns on, release both buttons.
   The product begins printing a nozzle check pattern.

6. Do the following, depending on the results of the product check:
   • If the page prints and the nozzle check pattern is complete, the product is operating properly. Any operation problem you may have could be caused by your computer, cable, software, or selected settings. Check the other solutions in this manual or try uninstalling and reinstalling your printer software.
   • If the page prints but the nozzle check pattern has gaps, clean or align the print head.
   • If the page does not print, the product may have a problem. Check the other solutions in this manual. If they do not work, contact Epson.

Noise After Filling the Ink

If you hear noises from your product after filling the ink tanks with ink, check these explanations:

• The first time you fill the tanks with ink, the product must charge its print head. Wait until charging finishes before you turn off the product, or it may charge improperly and use excess ink the next time you turn it on. Your product is finished charging the print head when the power light stops flashing.

• If the product's print head stops moving or making noise, and the charging process has not finished after approximately 20 minutes, turn off your product. Turn it back on and check to see if charging is still in progress. If it is still in progress, contact Epson for help.

Software Installation Problems

If you have problems while installing your product software, try these solutions:

• Make sure your product is turned on and the USB cable is securely connected at both ends. If you still have problems installing software, disconnect the cable and carefully follow the instructions on the Start Here sheet. Also make sure your system meets the requirements for your operating system.

• Close any other programs, including screen savers and virus protection software, and install your product software again.

• In Windows, make sure your product is selected as the default printer and the correct port is shown in the printer properties.

• If you see any error message or your software does not install correctly in Windows, you may not have software installation privileges. Contact your System Administrator.

Product Makes Noise, But Nothing Copies

If your product makes a noise, but nothing copies, try these solutions:

- Run a nozzle check to see if any of the print head nozzles are clogged. Then clean the print head, if necessary.
- If the nozzle check page does not print, but the product's power light is on, make sure your product software is installed correctly.
- Make sure your product is level (not tilted).

Paper Feeding Problems

If you have problems feeding paper, try these solutions:

• If paper does not feed for printing, remove it. Then reload it in the sheet feeder against the right side and beneath the tab. Slide the edge guide against the edge of the paper, making sure that the paper stack is not above the arrow mark on the edge guide.
• If multiple pages feed at once, remove the paper, fan the edges to separate the sheets, and reload it.
• If paper jams when you load only one or two sheets, try loading more sheets at a time. Do not load more than the recommended number of sheets.
• If paper jams when you print on both sides of the paper, try loading fewer sheets.
• For best results, follow these guidelines:
  • Use new, smooth, high-quality paper that is not curled, creased, old, too thin, or too thick.
  • Load paper in the sheet feeder printable side up.
  • Do not load paper with holes punched in it.
  • Follow any special loading instructions that came with the paper.

Printing is Slow

If printing becomes slow, try these solutions:

- Make sure your system meets the requirements for your operating system. If you are printing a high-resolution image, you may need more than the minimum requirements. If necessary, increase your system's memory.
- If you are using Windows 7, close the **Devices and Printers** window before you print.
- Clear space on your hard drive or run a defragmentation utility to free up existing space.
- Close any programs you are not using when you print.
- If your product is connected to a USB hub, connect it directly to your computer instead.
- If printing becomes slower after printing continuously for a long time, the product may have automatically slowed down to protect the print mechanism from overheating or becoming damaged. Let the product rest with the power on for 30 minutes, then try printing again.

For the fastest printing, select the following settings in your product software:

- Make sure the paper type setting matches the type of paper you loaded.
- Turn on any high speed settings in your product software.
- Select a lower print quality setting.

- **Windows**: Click the **Maintenance** tab, select **Speed & Progress** or **Extended Settings**, and select the following settings:
  - **High Speed Copies**
  - **Always spool RAW datatype**
  - **Page Rendering Mode**
  - **Print as Bitmap**

• Avoid handling printouts on glossy paper right after printing to allow the ink to set.
• Turn off any high speed settings in your product software.
• If you print on both sides of a sheet of paper, smudges may appear on the reverse side of heavily saturated or dark images. If one side of a sheet will contain a lighter image or text, print that side first. Make sure the ink has dried before reloading the paper to print on the other side.
• Make sure the transportation caps are not installed.
• Run a nozzle check to see if any of the print head nozzles are clogged. Then clean the print head, if necessary.
• Align the print head.
• Clean the paper path.

**Note**: Your product will not operate properly while tilted at an angle. Place it on a flat, stable surface that extends beyond the base of the product in all directions.

**Faint Printout or Printout Has Gaps**

If your printouts are faint or have gaps, try these solutions:

• Run a nozzle check to see if any of the print head nozzles are clogged. Then clean the print head, if necessary.
• The ink levels may be low. Visually check the ink levels.
• Make sure the paper type setting matches the type of paper you loaded.
• Make sure your paper is not damp, curled, old, or loaded facedown in the sheet feeder (the printable side should be faceup).
• Make sure you set the transportation lock to the unlocked (printing) position: 🗝.
• Make sure the transportation caps are not installed.
• Align the print head.
• Clean the paper path.

Grainy Printout

If your printouts are grainy, try these solutions:
• Make sure you loaded the printable side of the paper faceup in the sheet feeder.
• Select a higher print quality setting and turn off any high speed settings in your product software.
• Run a nozzle check to see if any of the print head nozzles are clogged. Then clean the print head, if necessary.
• Align the print head.
• You may need to increase the image resolution or print a smaller size; see your software documentation.

Incorrect Colors

If your printouts have incorrect colors, try these solutions:

• Make sure the **Black/Grayscale** or **Grayscale** setting is not selected in your printer software.
• Run a nozzle check to see if any of the print head nozzles are clogged. Then clean the print head, if necessary.
• Make sure you set the transportation lock to the unlocked (printing) position: 🅰️.
• Make sure the transportation caps are not installed.
• The ink levels may be low and you may need to refill the ink. Visually check the ink levels. Also make sure you filled the tanks with the correct colors of ink.
• Your printed colors can never exactly match your on-screen colors. However, you can use a color management system to get as close as possible. Try using the color management options in your printer software.
• For best results, use genuine EPSON ink and paper.

Scanning Software Does Not Operate Correctly

If your scanning software does not operate correctly, try these solutions:

• Make sure your computer has adequate memory and meets the system requirements for your operating system.
• Make sure your computer is not running in a power-saving mode, such as sleep or standby. If so, wake your system and restart your scanning software.
• If you upgraded your operating system but did not reinstall your scanning software, try reinstalling it.

Image is Distorted or Blurry
If a scanned image appears distorted or blurry, try these solutions:

• Make sure your original is not wrinkled or warped. This may prevent the original from laying flat on the scanner glass.
• Do not move your original or your product during scanning.
• Your product will not operate properly while tilted at an angle. Place it on a flat, stable surface that extends beyond the base of the product in all directions.

Ripple Patterns Appear in an Image
You may see a ripple pattern (called a moiré) in scanned images of printed documents. This is caused by interference from differing pitches in the scanner's screen and your original's halftone screen. To reduce this effect, adjust these EPSON Scan settings (if available) and try scanning again:
• Select the Descreening setting.
• Select a lower Resolution setting.

Image is Scanned Upside-Down

Your product scans using the Auto Photo Orientation setting. This setting checks the preview image for faces, the sky, and other features, and then correctly rotates the photo when it is scanned, if necessary. If your photo is not oriented correctly using this option, deselect the Auto Photo Orientation setting and scan again.

Scanned Image Colors Do Not Match Original Colors

Printed colors can never exactly match the colors on your computer monitor because printers and monitors use different color systems: monitors use RGB (red, green, and blue) and printers typically use CMYK (cyan, magenta, yellow, and black).

Check the color matching and color management capabilities of your computer, display adapter, and the software you are using to see if they are affecting the palette of colors you see on your screen.

To adjust the colors in your scanned image, adjust these EPSON Scan settings (if available) and try scanning again:

- Change the Image Type setting and experiment with different combinations of the next settings.
- Adjust the Tone Correction setting.
- Adjust the Auto Exposure setting.

Ink Specifications

Note: This product was originally designed to work with genuine EPSON inks. Your product may not function properly if you use other types of ink and may affect Epson's warranty.

The included ink bottles must be used for printer setup and are not for resale. The printer ships with full ink bottles and part of the ink from the first bottles is used to charge the print head. Yields vary considerably based on images printed, print settings, paper type, frequency of use, and temperature. For print quality, a small amount of ink remains in the tank after the "refill ink" indicator comes on.

The ink bottles that came with your printer have a lower yield due to the ink charging process. This process is carried out the first time you turn on the printer and guarantees better performance. Do not load paper before refilling the ink tanks.
**Color**
Cyan, Magenta, Yellow, Black

**Ink life**
For best results, use up ink within 6 months of removing the seal from an ink bottle.

**Temperature**
Storage: –4 to 104 °F (–20 to 40 °C)
1 month at 104 °F (40 °C)
Ink freezes at 3.2 °F (–16 °C)
