Connecting the TV
Follow these instructions to connect the HDTV tuner and CD-R/RW drive to your TV (tuner is not available in all locations). For instructions on connecting other equipment, see your TV User’s Guide. Make sure your TV is unplugged before connecting to it.

Connecting the HDTV Tuner
1. Slide the OUTPUT SWITCH on the back of the tuner to Y Pb Br.
2. Connect one end of the component video cable to the Y (green), Pb (blue), and Pr (red) Component Input connectors on the back of the TV, as shown. Be sure to match the colors of the cables to the colors of the connectors.
3. Connect the other end of the cable to the Y, Pb, and Pr connectors on the TV.
4. Connect one end of the audio cable (with red/white connectors) to the L-Audio–R connectors on the back of the TV.
5. Connect the other end of the audio cable to the L-Audio–R connectors on the tuner.
6. Connect your antenna cable to the RF IN jack on the tuner. See the tuner User’s Guide for details.
7. Plug the tuner’s power cord into an electrical outlet.

Connecting the CD-R/RW Drive
Note: The connectors on your CD-R/RW drive may be in different positions than shown.
1. Connect the square end of the included USB cable to the USB port on your external CD-R/RW drive.
2. Connect the flat end of the USB cable to the USB port on the back of the TV.
3. Connect the power cord and adapter that came with the CD-R/RW drive to the drive’s power connector and to an electrical outlet.
4. Turn on the CD-R/RW drive by flipping the power switch in back.

Connecting Other Equipment
See your TV User’s Guide for details on connecting other equipment.
Your TV is equipped with a DVI (Digital Video Interface) connector that lets you display pictures from a digital source (such as a satellite receiver or DVD player) without signal loss. Use this connection to obtain the best possible image. If your video equipment does not support DVI, connect it to one of the ports shown here.

The connectors on the front of the TV also let you connect a PC or game console, video camera, and headphones.

Installing the Printer Ink Cassette
1. Insert the cassette in its package. Then remove the red paper strip from the end.
2. Remove the cassette from its package. Then remove the red paper strip from the end.
3. Insert the batteries as shown here, making sure the + and – ends face the right way. Then push them down flat.
4. Grasp the handle and pull the printer out as far as it goes.

Loading Paper
1. Open the paper cassette lid.
2. Load up to 20 sheets of plain paper into the paper cassette. Make sure the shiny side is facing up, with the wide bordered edge facing the hinges of the cassette, and the narrow bordered end facing the open end of the cassette.
3. Flip up the lock cover.
4. Slide the cassette all the way into its slot, open and close, until it clicks into place.
5. Close the printer cover.

Inserting the Remote Control Batteries
1. Insert the batteries as shown here, making sure the + and – ends face the right way. Then push them down flat.
2. Insert the batteries as shown here, making sure the + and – ends face the right way. Then push them down flat.
3. Place the cover into the grooves and slide the cover all the way up until it clicks into place.

Caution: Make sure to lock the printer securely and close the lock cover completely or the printer won’t print.

Selecting a Location and TV Support
Select a suitable location for your TV and follow all of its safety instructions to ensure it operates safely and effectively, as described in the User’s Guide.
You can use an optional Epson TV stand to support your TV. Order part number V12H0085R9 (for the LS47P2) or V12H0085R02 (for the LS57P2) from your dealer.
If your TV included a stand, follow its instructions to securely support the TV as follows:

<table>
<thead>
<tr>
<th>Specification</th>
<th>LS47P2</th>
<th>LS57P2</th>
</tr>
</thead>
<tbody>
<tr>
<td>Width of the base (minimum)</td>
<td>47 inches (119 cm)</td>
<td>56 inches (142 cm)</td>
</tr>
<tr>
<td>Depth of the base (minimum)</td>
<td>16 inches (41 cm)</td>
<td>18 inches (46 cm)</td>
</tr>
<tr>
<td>Weight capacity (minimum)</td>
<td>35 lb (15 kg)</td>
<td>55 lb (25 kg)</td>
</tr>
</tbody>
</table>

Place the stand in a location that allows you access to the back of the TV and provides at least 12 inches (30 cm) of room for ventilation at the sides.
You may want to secure the TV to a wall or other support so it stays upright on its stand during an earthquake or other situation. See your User’s Guide for details.
Before unpacking your TV and its accessories, follow the steps here to get it set up for viewing High Definition digital TV broadcasts.

You'll also find quick instructions for using your TV's Photo on Demand™ system for viewing, printing, and storing your digital photos.

Make sure these items are included:
- TV
- Set-top shelf with screws
- Remote control with 2 AA batteries
- Package of paper (20 sheets)
- Ink cassette
- CD-R/RW drive with USB cable and power cable

Write down the TV’s serial number on the line below. It is located on a sticker on the back left side of the TV.

Serial number ____________________________

Lifting the TV

When lifting the TV, have two people grasp it as shown, using the two handles on back and the top of the frame in front.

Warning
The TV is very heavy. Two people are required to lift or move the TV to avoid injury. Never move the TV and it stand together or the TV may tip and cause injury or be damaged.

Installing the Set-Top Shelf

The set-top shelf provides a convenient support for a center surround sound speaker or your HDTV tuner on top of the TV. The shelf can hold up to 11 lb (5 kg).

Caution
Don't fold the shelf backward on its hinge or it may break.

1. Fold the shelf into an upside-down L-shape with the shorter end on top.
2. Align the holes in the shelf with the holes on the back of the TV.
3. Using a Phillips screwdriver, secure the shelf to the TV with the four screws that came with it.

Tighten the screws.

Selecting a Location and TV Support

Select a suitable location for your TV and follow all of its safety instructions to ensure it operates safely and effectively, as described in the User’s Guide.

You can use an optional Epson TV stand to support your TV. Order part number V12H003R02 (for the LS57P2) or V12H003R03 (for the LS47P2) from your dealer.

If you use your own stand, make sure it can securely support the TV as follows:

- Component video and audio cables
- (not available in all locations)

Connecting the TV

Follow these instructions to connect the HDTV tuner and CD-R/RW drive to your TV (tuner is not available in all locations). For instructions on connecting other equipment, see your TV User’s Guide. Make sure your TV is unplugged before connecting to it.

Connecting the HDTV Tuner

1. Slide the OUTPUT SWITCH on the back of the tuner to Y Pb Br.
2. Connect one end of the component video cable to the Y (green), Pb (blue), and Pr (red) Component Input connectors on the back of the TV, as shown. Be sure to match the colors of the cable to the colors of the connectors.
3. Connect the other end of the cable to the Y, Pb, and Pr connectors on the tuner.
4. Connect one end of the audio cable (with red/white connectors) to the L-Audio-R connectors on the back of the TV.
5. Connect the other end of the audio cable to the L-Audio-R connectors on the tuner.
6. Connect your antenna cable to the RF IN jack on the tuner. See the tuner User’s Guide for details.
7. Plug the tuner's power cord into an electrical outlet.

Connecting the CD-R/RW Drive

Note
The connectors on your CD-R/RW drive may be in different positions than shown.

1. Connect the square end of the included USB cable to the USB port on your external CD-R/RW drive.
2. Connect the flat end of the USB cable to the EXT UF connector on the back of the TV.
3. Connect the power cable and adapter that came with the CD-R/RW drive to the drive's power connector and to an electrical outlet.
4. Turn on the CD-R/RW drive by flipping the power switch in back.

Connecting Other Equipment

See your TV User’s Guide for details on connecting other equipment.

Your TV is equipped with a DVI (Digital Video Interface) connector that lets you display pictures from a digital source (such as a satellite receiver or DVD player) without signal loss. Use this connection to obtain the best possible image. If your video equipment does not support DVI, connect it to one of the ports shown here.

The connectors on the front of the TV also let you connect a PC or game console, video camera, and headphones.

Installing the Printer Ink Cassette

1. Press and release the printer cover latch to open the cover.
2. Flip down the printer lock cover and turn the lock counterclockwise to loosen it. If it doesn’t tighten, push the printer in further and try again.
3. Grasp the handle and pull the printer out as far as it goes.
4. Pull open the ink cover on the side of the printer.
5. Remove the cassette from its package. Then remove the red paper strip from the end.
6. Position the cassette as shown below.

Loading Paper

1. Open the paper cassette lid.
2. Load up to 20 sheets of paper from the included paper package. Position the paper with the shiny side face up, with the wide bordered edge facing the hinge of the cassette, and the narrow bordered end facing the open end of the cassette.

Caution
Don't touch the shiny side of the paper or it will become discolored.

3. Close the cassette lid.
4. Slide the cassette all the way into its slot, open end first, until it clicks into place.
5. Close the printer cover.

Inserting the Remote Control Batteries

1. Press in on the top of the battery cover on the back of the remote control. Then slide the cover down and off the remote.
2. Insert the batteries as shown here, making sure the + and = ends face the right way. Then push them down flat.
3. Place the cover into the grooves and slide the cover all the way up until it clicks into place.
After unpacking your TV and its accessories, follow the steps here to get it set up for viewing High Definition digital TV broadcasts.

You’ll also find quick instructions for using your TV’s Photo on Demand™ system for viewing, printing, and storing your digital photos.

Make sure these items are included:

- TV
- Set-top shelf with screws
- Remote control with 2 AA batteries
- Package of paper (20 sheets)
- Ink cassette
- CD-R/RW drive with USB cable and power cable

Write down the TV’s serial number on the lines below. It is located on a sticker on the back left side of the TV.

**Serial number ________________________________**

### Lifting the TV

When lifting the TV, have two people grasp it as shown, using the two handles in back and the top of the frame in front.

**Warning**

The TV is very heavy. Two people are required to lift or move the TV to avoid injury. Never move the TV and its stand together or the TV may fall and cause injury or be damaged.

### Installing the Set-Top Shelf

The set-top shelf provides a convenient support for a center surround sound speaker or your HDTV tuner on top of the TV. The shelf can hold up to 11 lb (5 kg).

1. Fold the shelf into an upside-down L-shape with the shorter end on top.
2. Align the holes in the shelf with the holes on the back of the TV.
3. Using a Phillips screwdriver, secure the shelf to the TV with the four screws that came with it.

### Selecting a Location and TV Support

Select a suitable location for your TV and follow all of its safety instructions to ensure it operates safely and effectively, as described in the User's Guide.

You can use an optional Epson TV stand to support your TV. Order part number V12H003R09 (for the LS47P2) or V12H003R02 (for the LS57P2) from your dealer.

If you use your own stand, make sure it can securely support the TV as follows:

<table>
<thead>
<tr>
<th>Specification</th>
<th>LS47P2</th>
<th>LS57P2</th>
</tr>
</thead>
<tbody>
<tr>
<td>Width of the base (minimum)</td>
<td>47 inches (119 cm)</td>
<td>56 inches (142 cm)</td>
</tr>
<tr>
<td>Depth of the base (minimum)</td>
<td>16 inches (41 cm)</td>
<td>18 inches (46 cm)</td>
</tr>
<tr>
<td>Weight capacity (minimum)</td>
<td>331 lb (150 kg)</td>
<td>551 lb (250 kg)</td>
</tr>
</tbody>
</table>

Place the stand in a location that allows you access to the back of the TV and provides at least 12 inches (30 cm) of room for ventilation at the sides.

You may want to secure the TV to a wall or other support so it stays upright in its stand during an earthquake or other situation. See your User’s Guide for details.

### Connecting the TV

Follow these instructions to connect the HDTV tuner and CD-R/RW drive to your TV (tuner is not available in all locations). For instructions on connecting other equipment, see your TV User’s Guide. Make sure your TV is unplugged before connecting to it.

#### Connecting the HDTV Tuner

1. Slide the OUTPUT SWITCH on the back of the tuner to Y PB Br.
2. Connect one end of the component video cable to the Y (green), PB (blue), and PR (red) Component Input connectors on the back of the TV, as shown. Be sure to match the colors of the cables to the colors of the connectors.
3. Connect the other end of the cable to the Y, PB, and PR connectors on the tuner.
4. Connect one end of the audio cable (with red/white connectors) to the L–Audio–R connectors on the back of the TV.
5. Connect the other end of the audio cable to the L–Audio–R connectors on the tuner.

#### Connecting the CD-R/RW Drive

1. Connect the square end of the included USB cable to the USB port on your external CD-R/RW drive.
2. Connect the flat end of the USB cable to the EXT I/F connector on the back of the TV.
3. Connect the power cable and adapter that came with the CD-R/RW drive to the drive’s power connector and to an electrical outlet.
4. Turn on the CD-R/RW drive by flipping the power switch in back.

### Connecting Other Equipment

See your TV User’s Guide for details on connecting other equipment.

Your TV is equipped with a DVI (Digital Video Interface) connector that lets you display pictures from a digital source (such as a satellite receiver or DVD player) without signal loss. Use this connection to obtain the best possible image. If your video equipment does not support DVI, connect it to one of the ports shown here.

The connectors on the front of the TV also let you connect a PC or support DVI, connect it to one of the ports shown here.

The connectors on the back of the TV also let you connect a PC or

#### Connecting Other Equipment

1. Connect one end of the component video cable to the Y (green), PB (blue), and PR (red) Component Input connectors on the back of the TV.
2. Connect the other end of the cable to the Y, PB, and PR connectors on the tuner.
3. Connect one end of the audio cable (with red/white connectors) to the L–Audio–R connectors on the back of the TV.
4. Connect the other end of the audio cable to the L–Audio–R connectors on the tuner.

### Loading Paper

1. Open the paper cassette lid.
2. Load up to 20 sheets of paper from the included paper package. Position the paper with the shiny side face up, with the wide bordered edge facing the hinges of the cassette, and the narrow bordered end facing the open end of the cassette.

### Installing the Printer Ink Cassette

1. Press and release the printer cover latch to open the cover.
2. Flip down the printer cover latch and turn the lock counterclockwise to loosen it. It spins freely when it is unlocked.
3. Grasp the printer handle and pull the printer out as far as it goes.
4. Pull open the ink cover on the side of the printer.

### Inserting the Remote Control Batteries

1. Press in on the top of the battery cover on the back of the remote control. Then slide the cover down and off the remote.
2. Insert the batteries as shown here, making sure the + and – ends face the right way. Then push them down flat.
3. Place the cover into the grooves and slide the cover all the way up until it clicks into place.
**Turning On the TV**

1. Plug the TV's power cord into an electrical outlet. The Power light comes on orange.
2. To turn on the TV, make sure the equipment switch on the remote control is in the TV position. Then press the Power button.
3. After a few seconds, the Photo screen appears. It displays the photos on your card and outlines the first one in gold:

   - Note: If the photo viewer doesn't come up automatically, press the Photo View button on the TV panel or remote control.
   - To select a different photo, press the Prev, Next >, Select ▲ or Select ▼ button.
   - To enlarge a photo, press the Enter button.
   - To zoom into the photo further, press the Photo Zoom + button. Use the Prev, Next >, Select ▲, and Select ▼ buttons to adjust the viewing position.
   - To rotate a photo, press the Rotate button when the photo isn't zoomed.
4. Press the Exit button when you're done.

**Viewing a Slide Show**

You can view your photos automatically, for a few seconds each, by running a slide show. You can view all the photos or just selected ones.

1. Press the 2 button on the remote control. The Slide Show menu on the left of the screen opens:
   - Note: If you see a blank screen or a “No Signal” message, see “Solving Problems” in the right column.
2. Press Enter to select View Slide Show.
3. The first photo is enlarged and appears on the screen. It displays for 3 seconds, then the next photo is displayed.
4. To end the show, press Exit.

**Selecting a Photo and Printing It**

You can print one photo at a time from a digital photo card (memory card) or CD-R/RW.

1. Press Print button on the remote control. The Print Settings screen opens.
2. Press the Enter button to select the video source.
3. To view all your photos in a slide show, press Enter to select View Slide Show.
4. To print one copy of the photo, press Enter.
5. To print multiple copies, press Next > until the number in the Copier box is correct. Then press Enter. After a moment, printing starts.
   - Note: If you want to print your photo cropped, zoom into it as described above. Only the part you see on the screen will be printed.
6. To print additional photos, repeat these steps. You can send multiple photos for printing at one time, up to 15 photos.
7. If you see a printing error message, select Yes to check for the problem. Then follow the on-screen instructions to solve the problem and continue printing. For additional help, see your User’s Guide.

**Inserting a Photo Card**

1. To insert your photo card, go to the photo card slot on the TV. The Card light goes off.
2. Insert your photo card in the appropriate slot on the TV’s front panel. The Card light turns on.

**Selecting a Photo View**

Use the arrow buttons to highlight options.

Press Enter to select them.

**Selecting a Photo and Printing It**

1. To select a channel, use the Ch± button. Or enter a channel using the number buttons and press Ch Enter.
2. When you want to operate the TV again, slide the equipment switch on the remote control back to the TV position.

**Solving Problems**

If you have problems setting up your TV, see the suggestions here. For additional troubleshooting advice, see your TV User’s Guide.

**Where To Get Help**

Epson provides technical assistance through the World Wide Web 24 hours a day. From the home screen, you can reach Epson’s product support page at http://support.epson.com. After selecting your product, you can access troubleshooting information, download product documentation, and receive technical advice through e-mail.

To use the Epson PrivateLine Support service, call (800) 637-7661 and enter the PIN on the Epson PrivateLine Support card included with your documentation. This is the fastest way of speaking to a live representative, and it’s free. This service is available 6 AM to 6 PM, Pacific Time, Monday through Friday, for the duration of your warranty period.

You may also speak with a TV support specialist by dialing one of these numbers:

- U.S.: (562) 276-4394, 6 AM to 6 PM, Pacific Time, Monday through Friday
- Canada (905) 790-5839, 6 AM to 6 PM, Pacific Time, Monday through Friday

Toll or long-distance charges may apply.

Before you call, please have the following information ready:

- Product name (Epson Livingstation LS47P2 or LS57P2)
- Product serial number (located on the back left side of the TV or on the front of this sheet)
- Description of the problem

You can purchase supplies and accessories from your dealer or from Epson. Call (800) 873-7766 or visit the Epson Store at www.epsonstore.com (U.S. sales only). In Canada, please call (800) 465-7766 for dealer referral.

---

**Photo on Demand**

Your TV’s Photo on Demand system lets you view photos on digital photo cards (also called memory cards) or a CD-R/RW disc. Before you save photos on a CD, press the CD-R/RW Writer menu. Use the arrow buttons to highlight options. Then press Enter to select Write to CD-R/RW. Make sure your disc can be written to at 4X speed. Some high-speed discs don’t support 4X writing, so check your disc for details.

Before you save photos on a CD, make sure the external CD-R/RW drive is plugged in and turned on. Then press the eject button again to close the tray. You see a writing confirmation message while your photos are saved to the CD and the drive light flashes. When it’s finished, the CD tray opens and you see a completion message. Press Exit.

**Selecting a Photo and Printing It**

1. Press the Menu button, enter the default password (0000), and select Auto Scan to detect local channels. See the tuner User’s Guide for details.
2. If you see a blank screen or a “No Signal” message, see “Solving Problems.”
3. If the photo viewer doesn’t come up automatically, press the Photo View button on the TV panel or remote control.

**Inserting a Photo Card**

1. CompactFlash® card
2. SmartMedia® card
3. SD/MultiMediaCard™
4. Metal contacts face down
5. Memory Stick PRO™ and PRO Duo™ cards are not supported at this time.

---

**Support card included with your documentation. This is the fastest way of speaking to a live representative, and it’s free.**

Turning On the TV

1. Plug the TV's power cord into an electrical outlet. The Power light comes on orange.

2. To turn on the TV, make sure the equipment switch on the remote control is in the TV position. Then press the Power button.

3. After a few seconds, the Photo screen appears. It displays the photos on your card and outlines the first one in gold.

Note
- If the photo viewer doesn’t come up automatically, press the Photo View button on the TV panel or remote control.
  - To select a different photo, press the Prev. <, Next >, Select ▲, or Select ▼ button.
  - To enlarge a photo, press the Enter button.
  - To zoom into the photo further, press the Photo Zoom + button. Use the Prev. <, Next >, Select ▲, and Select ▼ buttons to adjust the viewing position. Press Photo Zoom – to zoom back out.
  - To rotate a photo, press the Rotate button when the photo isn’t zoomed.

4. Press the Exit button when you’re done.

Viewing a Slide Show

You can view your photos automatically, for a few seconds each, by running a slide show. You can view all the photos or just selected ones.

1. Press the 2 button on the remote control. The Slide Show menu on the left of the screen opens.

2. To view all your photos in a slide show, press Enter to select View Slide Show.

3. The first photo is enlarged and appears on the screen. It displays for 3 seconds, then the next photo is displayed.

4. To end the slide show, press Exit.

Selecting a Photo and Printing It

You can print one photo at a time from a digital photo card (memory card) or CD-R/RW.

1. Press the Prev. <, Next >, Select ▲, or Select ▼ button to highlight the photo you want to print.

2. If you want to print your photo cropped, zoom into it as described above. Only the part you see on the screen will be printed.

3. Press the Print button on the TV panel or remote control. You see the Print Settings screen.

4. To print one copy of the photo, press Enter.

   - To print multiple copies, press Next > until the number in the Copies box is correct. Then press Enter.

   - After a moment, printing starts.

   - During printing, the Printer light flashes. When printing is finished, the Printer light turns off.

5. To print additional photos, repeat these steps. You can send multiple photos for printing at one time, up to 15 photos.

   - If you see a printing error message, select Yes to check for the problem.

   - Then follow the on-screen instructions to solve the problem and continue printing. For additional help, see your User’s Guide.

   - When you’ve finished printing, remove the borders from the edges of your photo by bonding them back and forth and tearing them off.

Storing Photos on a CD

Before you save photos on a CD, make sure the external CD-R/RW drive is plugged in and turned on.

Note
- Make sure that your disc can be written to all 4 speed. Some high-speed discs don’t support 6x writing, so check your disc specifications before inserting it into the drive. See your User’s Guide for additional details on supported discs and formats.

1. Press the eject button on the drive to open the tray.

2. Place a new, blank CD-R/RW disc on the tray with the label side facing up. Make sure the disc lies flat in the tray.

3. Press the eject button again to close the tray.

Caution
- Avoid using the eject button to open and close the tray. Pulling in the tray may damage the drive and your disc.

4. Press the 3 button on the remote control to open the CD-R/RW Writer menu.

5. To write all of the photos on your digital photo card to the CD, press Enter to select Write to CD-R/RW.

6. You see a confirmation message: Press Enter to select Yes or press Exit to cancel.

7. You see a writing confirmation message while your photos are sent to the CD and the drive light flashes.

   - When it’s finished, the CD tray opens and you see a completion message. Press Enter.

Solving Problems

If you have problems setting up your TV, see the suggestions here. For additional troubleshooting advice, see your TV User’s Guide.

Problem | Solution
--- | ---
The power won’t come on. | Make sure you slide the equipment switch on the remote control to the TV position before pressing the Power button. To turn on the HDTV tuner, slide the switch to the STB1 position.

Make sure your electrical outlet is working and isn’t controlled by a switch or timer.

Check that the power cord is connected securely.

If the Power light is flashing orange, the TV is cooling down. When it stops flashing and lights up again, you can unplug it or press the Power button to turn it on.

If the Power light is flashing green, the TV is warming up. When it stops flashing and remains green, the TV is ready.

If the Power light is red, you may have a problem with the TV, depending on the state of the Lamp light. See your User’s Guide for details.

The buttons on the TV panel don’t work. | When the TV is warming up or cooling down (the Power light is flashing), you can’t use the buttons. When the Power light stays green or orange, the buttons are operable.

The TV fuse keeps running when the TV is turned off. | The TV has itself down using internal power even after you turn it off.

You see a blank screen or a “No Signal” message. | Users the video source (HDTV tuner, DVD player, etc.)

Insert a disc or tape, if you’re storing one, and press Play.

Press the TV/Vide0 button to select the video source.

Check the cable connections.

If you still don’t see an image, see your TV User’s Guide for more troubleshooting help.

- Product serial number (located on the back left side of the TV or on the front of this sheet)
- Description of the problem

You can purchase supplies and accessories from your dealer or from Epson. Call (800) 873-7766 or visit the Epson Store™ at www.epsonstore.com (U.S. sales only). In Canada, please call (800) 465-7766 for dealer referral.

Turning On the HDTV Tuner

1. Press the TV/Video button on the remote control or select COMPONENT1 displays on the screen. This shows that the HDTV tuner is selected as the input source.

2. To turn on the tuner, slide the equipment switch on the remote control to the STB1 (see Top Box 1) position. Then press the Power button.

3. Wait until you see a message on the screen.

Note
- If you see a blank screen or a “No Signal” message, see “Solving Problems” in the right column.

4. Press the Menu button, enter the default password (0000), and select Auto Scan to detect local channels. See the tuner User’s Guide for details.

5. To select a channel, use the CH +/- button. Or enter a channel using the number buttons and press CH Enter. Use the + button to enter digital subchannels (for example, 28–1).

Note
- When you want to operate the TV again, slide the equipment switch on the remote control back to the TV position.

Using Photo on Demand

Your TV’s Photo on Demand system lets you view photos on digital photo cards (also called memory cards) or CD-R/RW discs, print the photos on its built-in printer, and store them on CDs. Follow the quick steps below or the expanded instructions in your User’s Guide.

Inserting a Photo Card

1. Make sure the TV is turned on, the Power light is green and not flashing, and the Card light is off.

2. Insert your photo card in the appropriate slot on the TV’s front panel. The Card light turns on.

Note
- Memory Stick PRO™ and PRO Duo™ cards are not supported at this time.

3. Place a new, blank CD-R/RW disc on the tray with the label side facing up. Make sure the disc lays flat in the tray.

Caution
- Avoid using the eject button to open and close the tray. Pulling in the tray may damage the drive and your disc.

4. Press the 3 button on the remote control to open the CD-R/RW Writer menu.

5. To write all of the photos on your digital photo card to the CD, press Enter to select Write to CD-R/RW.

6. You see a confirmation message: Press Enter to select Yes or press Exit to cancel.

7. You see a writing confirmation message while your photos are sent to the CD and the drive light flashes.

   - When it’s finished, the CD tray opens and you see a completion message. Press Enter.

**Turning On the TV**

1. Plug the TV's power cord into an electrical outlet. The Power light comes on orange.
2. To turn on the TV, make sure the equipment switch on the remote control is in the TV position. Then press the Power button.

The Power light flashes green while the TV warms up. Wait for it to stop flashing and remain green.

**Turning On the HDTV Tuner**

1. Press the TV/Video button on the remote control until COMPONENT1 displays on the screen. This shows that the HDTV tuner is selected as the input source.
2. To turn on the HDTV tuner, make sure the equipment switch on the remote control is in the TV position. Then press the Power button.
3. Wait until you see a message on the screen.

*Note*

If you see a black screen or a "No Signal" message, see "Solving Problems" in the far-right column.

4. Press the Menu button, enter the default password (0000), and select Auto Scan to detect local channels. See the tuner User's Guide for details.

5. To select a channel, use the Ch +/- button. Or enter a channel using the number buttons and press Enter. Use the +/- buttons to enter digital subchannels (for example, 28–1).

*Note*

When you want to operate the TV again, slide the equipment switch on the remote control back to the TV position.

**Using Photo on Demand**

Your TV’s Photo on Demand system lets you view photos on digital photo cards (also called memory card) or CD-R/RW discs, print the photos on its built-in printer, and store them on CDs. Follow the quick steps below or the expanded instructions in your User’s Guide.

**Inserting a Photo Card**

1. Make sure the TV is turned on, the Power light is green and not flashing, and the Card light is off.
2. Insert your photo card in the appropriate slot on the TV’s front panel. The Card light turns on.

3. After a few seconds, the Photo screen appears. It displays the photos on your card and outlines the first one in gold:

   *Note*

   If the photo viewer doesn’t come up automatically, press the Photo View button on the TV panel or remote control.

   - To select a different photo, press the Prev. <, Next >, Select ▲, or Select ▼ button.
   - To enlarge a photo, press the Enter button.
   - To zoom into the photos further, press the Photo Zoom + button. Use the Prev. <, Next >, Select ▲, and Select ▼ buttons to adjust the viewing position.
   - To exit the photo, press the Exit button when you’re done.

4. Press the Exit button when you’re done.

**Viewing a Slide Show**

You can view your photos automatically, for a few seconds each, by running a slide show. You can view all the photos or just selected ones.

1. Press the 2 button on the remote control. The Slide Show menu on the left of the screen opens:

   - To view all your photos in a slide show, press Enter to select View Slide Show.
   - The first photo is enlarged and appears on the screen. It displays for 3 seconds; then the next photo is displayed.
   - To end the slide show, press Exit.

2. Selecting a Photo and Printing It

You can print one photo at a time from a digital photo card (memory card) or CD-R/RW.

1. Press Prev. <, Next >, Select ▲, or Select ▼ to highlight the photo you want to print.
2. If you want to print your photo cropped, zoom into it as described above. Only the part you see on the screen will be printed.
3. Press the Print button on the TV panel or remote control. You see the Print Settings screen:

   - To print one copy of the photo, press Enter.
   - To print multiple copies, press Enter until the number in the Copies box is correct. Then press Enter. After a moment, printing starts.
   - During printing, the Printer light flashes. When printing is finished, the Printer light turns off.
   - To print additional photos, repeat these steps. You can send multiple photos for printing at one time, up to 15 photos.
   - If you are still out an image, see your TV User’s Guide for more troubleshooting help.

**Storing Photos on a CD**

Before you use photos on a CD, make sure the external CD-R/RW drive is plugged in and turned on.

*Note*

Make sure that your disc can be written to at 4X speed. Some high-speed discs don’t support 4X writing, so check your disc for details.

1. Press the eject button on the drive to open the tray.
2. Place a new, blank CD-R/RW disc on the tray with the label side facing up. Make sure the disc lays flat in the tray.
3. Press the eject button again to close the tray.

Caution

Avoid use the eject button to open and close the tray. Pulling in the tray may damage the drive and your disc.

4. Press the 3 button on the remote control to open the CD-R/RW Writer menu:

   - To write all of the photos on your digital photo card to the CD, press Enter to select Write to CD-R/RW.
   - You see a confirmation message. Press Enter to select Yes or press Exit to cancel.
   - You see a warning confirmation message while your photos are written to the CD and the drive light flashes.

5. When it’s finished, the CD tray opens and you see a completion message. Press Enter.

**Solving Problems**

If you have problems setting up your TV, see the suggestions here. For additional troubleshooting advice, see your TV User’s Guide.

**Where To Get Help**

Epson provides technical assistance through the World Wide Web 24 hours a day. From the Internet, you can reach Epson’s product support page at http://support.epson.com. After selecting your product, you can access troubleshooting information, download product documentation, and receive technical advice through e-mail.

To use the Epson PrinterLink™ Support service, call (800) 637-7661 and enter the PIN on the Epson PrinterLink Support card included with your documentation. This is the fastest way of speaking to a live representative, and it’s free. This service is available 6 AM to 6 PM, Pacific Time, Monday through Friday, for the duration of your warranty period.

You may also speak with a TV support specialist by dialing one of these numbers:

- U.S.: (562) 276-4594, 9 AM to 6 PM, Pacific Time, Monday through Friday
- Canada: (905) 790-5839, 9 AM to 6 PM, Pacific Time, Monday through Friday

Tell us long-distance charges may apply.

Before you call, please have the following information ready:

- Product name (Epson LivingStar L647P2 or L517P2)
- Product serial number (located on the back left side of the TV or on the front of this sheet)
- Description of the problem

You can purchase supplies and accessories from your dealer or from Epson. Call (800) 873-7766 or visit the Epson Store at www.epsonstore.com (U.S. sales only). In Canada, please call (800) 463-7766 for dealer referral.
