Loading Paper for Documents

You can print documents on a variety of paper types and sizes.

1. Flip the feeder guard forward.

2. Pull up the paper support and its extension.
3. Pull out the output tray and open the paper stopper.

**Note:** If you print on legal-size or longer paper, leave the paper stopper closed.

4. Slide the edge guide left.
5. Insert paper, glossy or printable side up and short edge first, against the right side. If you are inserting a stack of paper, fan the sheets first and tap the stack on a flat surface to even the edges.

6. Slide the edge guide against the paper, but not too tightly.

7. Flip the feeder guard back.

Always follow these paper loading guidelines:

- Load only the recommended number of sheets.
- Load paper short edge first, no matter which way your document faces.
- Load letterhead or pre-printed paper top edge first.
- Do not load paper above the arrow mark inside the edge guide.
- Check the paper package for any additional loading instructions.

Placing Originals on the Product

Follow the instructions here to place your original documents or photos on the product.

Caution: Do not place anything on top of your product or use its cover as a writing surface to avoid damaging it.

Placing Originals on the Scanner Glass

Placing Originals on the Scanner Glass

You can place originals up to this size on the scanner glass: Letter (8.5 × 11 inches [216 × 279 mm]) or A4 (8.3 × 11.7 inches [210 × 297 mm]).

1. Open the document cover.
2. Place your original facedown on the scanner glass with the top facing as shown. Slide the original to the edges of the indicated corner.
**Note:** You can place multiple originals on the scanner glass. Just make sure they are at least 0.8 inch (20 mm) away from each other.

3. Close the document cover gently to keep your original in place.

Selecting Basic Print Settings - Windows

Select the basic settings for the document or photo you want to print.

1. Open a photo or document for printing.
2. Select the print command in your application.

**Note:** You may need to select a print icon on your screen, the Print option in the File menu, or another command. See your application's help utility for details.
3. If necessary, select your product name as the printer you want to use.  

**Note:** You may also need to select Properties or Preferences to view your print settings.

You see the Main tab of your printer settings window:

![Main tab of printer settings window](image)

4. Select the **Quality Option** setting that matches your print content and the print quality you want to use.

5. Select the type of paper you loaded as the **Type** setting.  

   **Note:** The setting may not exactly match the name of your paper. Check the paper type settings list for details.
6. Select the size of the paper you loaded as the Size setting.

   Note: You can also select the User Defined setting to create a custom paper size.

7. Select one of the border options:
   • If you are printing a borderless photo, select Borderless.

      Note: You must select a compatible borderless paper type and size to print borderlessly. Check the borderless paper compatibility list for details.

   • If you are printing a document or a photo with borders, select Borders.

8. Select the orientation of your document or photo as shown in the printer settings window.

   Note: If you are printing an envelope, select Landscape.

9. Select any of the available print options.

   Note: If you need to access the Epson product support website, click the Online Support button.

Scanning in Full Auto Mode

When you scan in Full Auto Mode, EPSON Scan automatically saves your scanned file in JPEG format in your operating system’s Pictures or My Pictures folder, or opens it in your scanning program. You can change the scanned file settings and select various image adjustment options before you scan, if necessary.

1. Start EPSON Scan and select Full Auto Mode as the Mode setting.
   You see this window:
To scan in Full Auto Mode, position or load the material you want to scan, then click Scan.

For Color Restoration and other options, click the Customize button and then make the settings.

You can change the scan mode in the Mode list box at the top right of the window.
2. To select image adjustment options or change your scanned file settings, click **Customize**, select the settings, and click **OK**.

![Customize dialog box]

- To choose any of the available image adjustment options, select the checkbox for the option.
- To change the scanned file settings, click **File Save Settings**.

3. Click **Scan**.

EPSON Scan scans your original, and saves the file in the selected folder or opens it in your scanning program. If the file was saved directly to your computer, you see the file in the Windows Explorer or Mac OS X Finder, where you can view and print the image, if desired.

Scan Resolution Guidelines

If you plan to enlarge a scanned image so you can print it at a larger size, you may need to increase the resolution from the default resolution set by EPSON Scan. Follow these guidelines to determine the resolution setting you need:

• You will enlarge the image as you scan it.
  If you will enlarge the image using EPSON Scan's Target Size setting (Home and Professional modes only), you do not need to increase the Resolution setting.

• You will scan the image at its original size, but enlarge it later in an image-editing program.
  Increase EPSON Scan's Resolution setting in your scan. Increase the resolution by the same amount you will increase the image size to retain a high image quality. For example, if the resolution is 300 dpi (dots per inch) and you will double the image size later, change the Resolution setting to 600 dpi.

• You will scan the image at 100% or smaller size.
  Select EPSON Scan's Resolution setting based on how you will use the scanned image:
  • E-mail/view on a computer screen/post on the web: 96 to 150 dpi
  • Print/convert to editable text (OCR): 300 dpi
  • Fax: 200 dpi
Selecting Scan File Settings

You can select the location, name, and format of your scan file on the File Save Settings window. You can also select various optional settings that control how EPSON Scan behaves when you scan and save files.

The File Save Settings window may appear after you click **Scan** on the EPSON Scan window. You can also access the window by clicking the 📈 icon on the EPSON Scan window.
1. Do one of the following to select the folder in which you want to save your scanned image:
   • Click the button for one of the displayed folders.
   • Click the Other button, click the Browse or Choose button, and select a folder.
2. Type in a stem file name in the Prefix field. This name is used along with numbers to automatically name your scanned files.
3. Select a different number as the Start Number setting, if you like.
4. Select the file format you want to use in the Image Format Type menu.
5. If your file format provides optional settings, click the Options button to select them.
6. Choose any of the optional settings you want to use by selecting their checkboxes.

File Formats

Bitmap (*.bmp)
A standard image file format for most Windows programs.

JPEG (*.jpg)
An image format that lets you highly compress image data. However, the higher the compression, the lower the image quality. (The Tiff format is recommended when you need to modify or retouch your scanned image.)

Multi-Tiff (*.tif)
A Tiff file format when multiple pages are saved to the same file, allowing you to edit the images using a compatible program.

PDF (*.pdf)
A document format that is readable by Windows and Mac OS X systems using Adobe Reader, Acrobat, or other programs. You can save multi-page documents in one PDF file.

PICT (*.pct)
A standard image file format for most Mac OS X programs.
PRINT Image Matching II (*.jpg or *.tiff)
File formats that include EPSON PRINT Image Matching II data for enhanced quality and a wider color range (does not affect the way the image displays on the screen).

Tiff (*.tif)
A file format created for exchanging data between many programs, such as graphic and DTP software.

Purchase EPSON Ink Cartridges

You can purchase genuine EPSON ink and paper at EPSON Supplies Central at www.epson.com/ink3 (U.S. sales) or www.epson.ca (Canadian sales). You can also purchase supplies from an Epson authorized reseller. To find the nearest one, call 800-GO-EPSON (800-463-7766).

**Note:** We recommend that you use genuine EPSON cartridges and do not refill them. The use of other products may affect your print quality and could result in printer damage.

The printer ships with full cartridges and part of the ink from this first set of cartridges is used for priming the printer. Yields vary considerably based on images printed, print settings, paper type, frequency of use, and temperature. For print quality, a variable amount of ink remains in the cartridge after the "replace cartridge" indicator comes on.

Removing and Installing Ink Cartridges

Make sure you have your replacement cartridges handy before you begin. You must install new cartridges immediately after removing the old ones.

Caution: Leave your old cartridges in the printer until you are ready to replace them to prevent the print head nozzles from drying out. Do not open ink cartridge packages until you are ready to install the ink. Cartridges are vacuum packed to maintain reliability.

1. Turn on your product.
2. Lift up the scanner unit.

Caution: Do not move the print head by hand; otherwise, you may damage your product. Do not touch the flat white cable inside the printer.

3. Press the stop button.
   • If a cartridge is low or expended, the print head moves that cartridge to the indicator position. Press the stop button again to check for additional low or expended cartridges. When all cartridges have been identified, the print head moves to the replacement position.
• If no cartridges are low or expended, the print head does not move. If you want to replace a cartridge before it is low or expended, press the ⏎ stop button for 6 seconds. The print head moves to the replacement position.

4. Squeeze the tab on the cartridge and lift the cartridge straight up to remove it.

**Note:** Dispose of used cartridges carefully. Do not take the used cartridge apart or try to refill it.

**Warning:** If ink gets on your skin, wash it thoroughly with soap and water. If ink gets into your eyes, flush them immediately with water. If ink gets into your mouth, spit it out and see a doctor right away. Keep ink cartridges out of the reach of children.
5. Before opening the new cartridge package, shake it gently four or five times.

![Shaking the Cartridge Image]

**Caution:** Do not shake the cartridges after opening the packages, or ink may leak.

6. Remove the cartridge from the package.

**Caution:** Do not touch the green chip on the cartridge. Install the new cartridge immediately after removing the old one; if you do not, the print head may dry out and be unable to print.

7. Remove the yellow tape from the bottom of the cartridge.

![Removing the Yellow Tape Image]

**Caution:** Do not remove any other labels or seals, or ink will leak.
8. Insert the new cartridge into the holder and push it down until it clicks into place.

9. Lower the scanner unit.

10. Press the $\square$ stop button.
   The print head moves to its home position and the printer starts charging the ink. This takes about 2 minutes. When the $\bigcirc$ power light stops flashing and remains on, ink charging is finished.

   Caution: Never turn off the product while the power light is flashing or you will waste ink.
Note: If the ink light is on after the print head moves to its home position or the power light is still flashing 3 minutes after replacing a cartridge, an ink cartridge may not be installed properly. Press the stop button, then press the ink cartridge down until it clicks into place.

If you remove a low or expended ink cartridge, you cannot re-install and use the cartridge.

Caution: If you remove an ink cartridge for later use, protect the ink supply area from dirt and dust and store it in the same environment as the printer. The valve in the ink supply port is designed to contain any excess ink, but do not touch the ink supply port or surrounding area. Always store ink cartridges with the label facing up; do not store cartridges upside-down.

Cleaning Your Product

To keep your product working at its best, you should clean it several times a year.

Close the output tray and paper support when you are not using the product to protect it from dust.

**Caution:** Do not use a hard brush, alcohol, or paint thinner to clean the product or you may damage it. Do not use oil or other lubricants inside the product or let water get inside it.

1. Turn off the product.
2. Disconnect the power cable and any connected interface cables.
3. Remove all the paper.
4. Clean the scanner glass with a soft, lint-free cloth (microfiber is recommended), moistened with a little glass cleaner.

**Caution:** Do not spray glass cleaner directly on the glass and do not press the glass surface with any force.

5. Clean the outer case and control panel with a soft, dry cloth. Do not use liquid or chemical cleansers.

**Parent topic:** Cleaning and Transporting Your Product

Transporting Your Product

If you need to ship your product or transport it a long distance, prepare it for transportation as described here.

**Caution:** During transportation and storage, follow these guidelines:
- Avoid tilting the product, placing it vertically, or turning it upside down; otherwise ink may leak.
- Leave the ink cartridges installed. Removing the cartridges can dry out the print head and may prevent the product from printing.
• Do not carry the product by its control panel; this may damage the product.

1. Turn off the product.
2. Lift up the scanner unit and check to see if the print head is in the far right position (the home position). If not, turn on the product, wait for the print head to move, then turn the product off again.

Caution: Do not place tape on the white flat cable inside the product; otherwise, you may damage your product.

4. Lower the scanner unit.
5. Remove all the paper from the product.
6. Unplug any connected cables.
7. Close the output tray and paper support.
8. Lower the control panel by squeezing the release bar and gently pushing the panel down.

**Caution:** Do not lower the control panel without first squeezing the release bar or you may damage your product.

9. Place the product in its original packing materials, if possible, or use equivalent materials with cushioning around the product.

Keep the product level during transportation. Be sure to remove the tape from the ink cartridge holder before turning on your product. If print quality has declined when you print again, clean and align the print head.

Noise After Ink Installation
If you hear noises from your product after installing ink, check these explanations:

- The first time you install ink cartridges, the product must prime its print head. Wait until priming finishes before you turn off the product, or it may prime improperly and use excess ink the next time you turn it on. Your product is finished priming the print head when the ⚪ power light stops flashing.
• If the product's print head stops moving or making noise, and the charging process has not finished after 5 minutes, turn off your product. Turn it back on and check to see if charging is still in progress. If it is still in progress, contact Epson for help.

Product Cannot Connect to a Wireless Router or Access Point

If your product has trouble finding or connecting to a wireless router or access point, try these solutions:

• Make sure to place your product within contact range of your router or access point.

  **Note:** Avoid placing your product near a microwave oven, 2.4 GHz cordless phone, or large metal object, such as a filing cabinet.

• Verify that your router or access point is operating correctly by connecting to it from your computer or another device.
• You may need to disable the firewall and any anti-virus software on your wireless router or access point.
• Check to see if access restrictions, such as MAC address filtering, are set on the router or access point. If access restrictions are set, add your product's MAC address to your router's address list. To obtain your product's MAC address, print a network status sheet. Then follow the instructions in your router or access point documentation to add the address to the list.
• If your router or access point does not broadcast its network name (SSID), follow the instructions that came with your product to enter your wireless network name manually.
• If your router or access point has security enabled, determine the kind of security it is using and any required password or passphrase for connection. Then make sure to enter the exact WEP key or WPA passphrase correctly.

Network Software Cannot Find Product on a Network

If EpsonNet Setup cannot find your product on a network, try these solutions:

• Make sure your product is turned on and connected to your network. Verify connection using your product control panel.
• If necessary, reinstall your product software and try running EpsonNet Setup again.

Cannot Print Over a Network

If you cannot print over a network, try these solutions:

• Make sure that your product is turned on.
• Make sure you install your product's network software as described in your product documentation.
• Print a network status sheet and verify that the network settings are correct. If the network status is **Disconnected**, check any cable connections and turn your product off and then on again.
• If you are using TCP/IP, make sure the product's IP address is set correctly for your network. If your network does not assign IP addresses using DHCP, set the IP address manually.
• Make sure your computer and product are both using the same wireless network.
• If network printing is slow, print a network status sheet and check the signal strength. If it is poor, place your product closer to your router or access point.

*Note:* Avoid placing your product near a microwave oven, 2.4 GHz cordless phone, or large metal object, such as a filing cabinet.

• If you are connecting the product via Wi-Fi Protected Setup (WPS) and the WiFi light on your product is not solid green, make sure you press the **Wi-Fi** button on the product within 2 minutes of pressing the WPS button on your router. Hold down the **Wi-Fi** button on the product for 3 seconds.
• If you are connecting the product via EpsonNet Setup and the WiFi light on your product is not solid green, make sure your product software was installed correctly. If necessary, reinstall your software.

Paper Feeding Problems
If you have problems feeding paper, try these solutions:
• If paper does not feed for printing, remove it. Then reload it in the sheet feeder against the right side and beneath the tab. Slide the edge guide against the edge of the paper, making sure that the paper stack is not above the arrow mark on the edge guide.
• If multiple pages feed at once, remove the paper, fan the edges to separate the sheets, and reload it.
• If paper jams when you load only one or two sheets, try loading more sheets at a time. Do not load more than the recommended number of sheets.
• If paper jams when you print on both sides of the paper, try loading fewer sheets.
• For best results, follow these guidelines:
  • Use new, smooth, high-quality paper that is not curled, creased, old, too thin, or too thick.
  • Load paper in the sheet feeder printable side up.
  • Do not load paper with holes punched in it.
  • Follow any special loading instructions that came with the paper.

Printing is Slow
If printing becomes slow, try these solutions:

• Make sure your system meets the requirements for your operating system. If you are printing a high-resolution image, you may need more than the minimum requirements. If necessary, increase your system's memory.
• Clear space on your hard drive or run a defragmentation utility to free up existing space.
• Close any programs you are not using when you print.
• If your product is connected to a USB hub, connect it directly to your computer instead.
• If printing becomes slower after printing continuously for a long time, the product may have automatically slowed down to protect the print mechanism from overheating or becoming damaged. Let the product rest with the power on for 30 minutes, then try printing again.

For the fastest printing, select the following settings in your product software:

• Make sure the paper type setting matches the type of paper you loaded.
• Turn on any high speed settings in your product software.
• Select a lower print quality setting.
• Windows: Click the Maintenance tab, select Speed & Progress, and select the following settings:
  • High Speed Copies
  • Always spool RAW datatype
  • Page Rendering Mode
  • Print as Bitmap

Blurry or Smeared Printout

If your printouts are blurry or smeared, try these solutions:
• Make sure your paper is not damp, curled, old, or loaded facedown in the sheet feeder (the printable side should be faceup).
• Use a support sheet with special paper, or load special paper one sheet at a time.
• Make sure your paper meets the specifications for your product.
• Use EPSON papers to ensure proper saturation and absorption of genuine EPSON inks.
• Make sure the paper type setting in your product software matches the type of paper you loaded.
• Remove each sheet from the output tray as it is printed.
• Avoid handling printouts on glossy paper right after printing to allow the ink to set.
• Turn off any high speed settings in your product software.
If you print on both sides of a sheet of paper, smudges may appear on the reverse side of heavily saturated or dark images. If one side of a sheet will contain a lighter image or text, print that side first.

Scanned Image Colors Do Not Match Original Colors

Printed colors can never exactly match the colors on your computer monitor because printers and monitors use different color systems: monitors use RGB (red, green, and blue) and printers typically use CMYK (cyan, magenta, yellow, and black).

Check the color matching and color management capabilities of your computer, display adapter, and the software you are using to see if they are affecting the palette of colors you see on your screen.

To adjust the colors in your scanned image, adjust these EPSON Scan settings (if available) and try scanning again:

In most cases, you do not need to uninstall your product software before re-installing it. However, you can download the Uninstall Center utility from the Epson support website to uninstall your product software as described here.

**Note**: If you find that re-installing your product software does not solve a problem, contact Epson.

1. To download the Uninstall Center utility, visit the Epson download site ([U.S. downloads](https://www.epson.com/usa/support/downloads) or [Canadian downloads](https://www.epson.ca/support/downloads)).
2. Follow the instructions on the screen to install the Uninstall Center.
3. Quit all applications currently running on your Mac.
4. Select the checkbox for each software program you want to uninstall.
5. Click *Uninstall*.
6. Follow the on-screen instructions to uninstall the software.
7. To reinstall your product software, see the *Start Here* sheet for instructions.

   **Note**: If you uninstall the printer driver and your product name remains in the Print & Fax or Print & Scan window, select your product name and click the – (remove) icon to remove it.
Where to Get Help

If you need to contact Epson for technical support services, use the following support options.

Internet Support
Visit Epson’s support website at www.epson.com/support (U.S.) or www.epson.ca/support (Canada) for solutions to common problems. You can download drivers and documentation, get FAQs and troubleshooting advice, or e-mail Epson with your questions.

Speak to a Support Representative
Before you call Epson for support, please have the following information ready:
• Product name
• Product serial number (located on a label on the product)
• Proof of purchase (such as a store receipt) and date of purchase
• Computer configuration
• Description of the problem
Then call:
• U.S.: (562) 276-4382, 6 AM to 8 PM, Pacific Time, Monday through Friday, and 7 AM to 4 PM, Pacific Time, Saturday
• Canada: (905) 709-3839, 6 AM to 8 PM, Pacific Time, Monday through Friday
Days and hours of support are subject to change without notice. Toll or long distance charges may apply.

Purchase Supplies and Accessories
You can purchase genuine EPSON ink and paper at EPSON Supplies Central at www.epson.com/ink3 (U.S. sales) or www.epson.ca (Canadian sales). You can also purchase supplies from an Epson authorized reseller. To find the nearest one, call 800-GO-EPSON (800-463-7766).

Ink Cartridge Specifications

Note: We recommend that you use genuine EPSON cartridges and do not refill them. The use of other products may affect your print quality and could result in printer damage.

The printer ships with full cartridges and part of the ink from this first set of cartridges is used for priming the printer. Yields vary considerably based on images printed, print settings, paper type, frequency of use, and temperature. For print quality, a variable amount of ink remains in the cartridge after the "replace cartridge" indicator comes on.

Color: Cyan, Magenta, Yellow, Black
**Cartridge life**

Unopened package: do not use if the date on the package has expired

**Temperature**

Storage: –4 to 104 °F (–20 to 40 °C)
1 month at 104 °F (40 °C)
Ink freezes at 10.4 °F (–12 °C)
Ink thaws and is usable after 3 hours at 77 °F (25 °C)

**Note:** For best printing results, use up a cartridge within 6 months of opening the package.

### Safety and Approvals Specifications

**United States**
- Safety: UL60950-1
- EMC: FCC part 15 Subpart B class B

**Canada**
- Safety: CAN/CSA-C22.2 No. 60950-1
- EMC: CAN/CSA-CEI/IEC CISPR 22 Class B

This equipment contains the following wireless module:
- Manufacturer: Marvell Semiconductor Inc.
- Type: SP88W8786-MD0-2C2T00

This product conforms to Part 15 of FCC Rules and RSS-210 of the IC Rules. Epson cannot accept responsibility for any failure to satisfy the protection requirements resulting from a non-recommended modification of the product. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation of the device.

To prevent radio interference to the licensed service, this device is intended to be operated indoors and away from windows to provide maximum shielding. Equipment (or its transmit antenna) that is installed outdoors is subject to licensing.

FCC Compliance Statement

**For United States Users**

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio or television reception. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause interference to radio and television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

**WARNING**

The connection of a non-shielded equipment interface cable to this equipment will invalidate the FCC Certification or Declaration of this device and may cause interference levels which exceed the limits established by the FCC for this equipment. It is the responsibility of the user to obtain and use a shielded equipment interface cable with this device. If this equipment has more than one interface connector, do not leave cables connected to unused interfaces. Changes or modifications not expressly approved by the manufacturer could void the user’s authority to operate the equipment.
