You can print documents and photos on a variety of paper types and sizes. For details, see page 7. (For instructions on loading envelopes, see your online User’s Guide.)

1. Pull out the paper cassette.

Note:
If you are using legal-size paper, extend the paper cassette. See your online User’s Guide for details.

2. Slide the edge guides to the sides of the cassette, then slide the edge guide to your paper size.
3. Load paper against the edge guide, with the glossy or printable side face down. (Load letterhead or pre-printed paper top edge first. Always load paper short edge first; don’t load it sideways.)

**Note:**
Make sure the paper is loaded against the edge guide and not sticking out from the end of the cassette.

Fan the paper and align its edges before loading.

Do not use transparencies or paper with binder holes.

If you are just making a copy or printing a rough draft, plain paper is fine. However, for the best results, use one of Epson’s special ink jet papers, as listed on page 7.

For automatic two-sided printing, use plain paper or Epson Bright White Paper.

You can load up to about 150 sheets of plain paper or 20 sheets of photo paper. See your online *User’s Guide* for more information on paper loading limits.
4. Slide the edge guides against the edges of the paper, but not too tightly.

5. Insert the cassette back into the printer.

<Diagram>

**Note:**
Keep the cassette flat as you insert it.
The paper may slide forward slightly as you insert the cassette. This is normal.
Do not remove or insert the cassette while printing or copying.

6. Slide out the output tray and raise the stopper.

<Diagram>

**Note:**
If you are using legal-size paper, do not raise the stopper.
Using Special Papers

Epson offers a wide array of high quality papers, making it easy to maximize the impact of your documents, photos, presentations, and other projects.

You can purchase genuine Epson ink and paper at Epson Supplies Central℠ at www.epson.com/ink (U.S. sales) or www.epson.ca (Canadian sales). You can also purchase supplies from an Epson authorized reseller. To find the nearest one, call 800-GO-EPSON (800-463-7766).

Scanning a Document or Photo

You can use your Epson Stylus NX620/625 Series to scan original documents and photos and save them on your computer.

Quick Scanning From the Control Panel

You can quickly scan a photo or document and save it on your computer. You can even scan a photo and have it automatically included in an email message.

For Mac OS X 10.6, see “Scanning With Mac OS X 10.6” on page 19.

1. Place your original document or photo on the scanner glass (see page 9).
2. Press the Home button, then press ↑, ↓, ←, or → to select Scan.
3. Press OK, then press ↑ or ↓ to select one of the following options:
   - Scan to PC automatically creates a JPG image and saves it to your computer; ideal for scanning photos
   - Scan to PC (PDF) automatically creates a PDF file and saves it to your computer; ideal for scanning documents
   - Scan to PC (Email) automatically scans a photo, resizes it, launches your email application, and attaches a JPG image to a new outgoing message
4. Do one of the following:
   - If you connected your product to your computer with a USB cable, press OK to select USB Connection and begin scanning.
   - If you connected your product to a wireless or wired network, press ↑ or ↓ until you see your computer name, then press OK to begin scanning.

Once your image is scanned, you see its icon in Windows Explorer or Macintosh Finder, or as an attachment in your email application.
Scanning With Epson Scan Software

You can scan from any TWAIN-compliant application using Epson Scan. Or you can start Epson Scan directly from your computer and save your image to a file.

Note:
For detailed scanning instructions, see the online User’s Guide. For Mac OS X 10.6, see “Scanning With Mac OS X 10.6” on page 19.

1. Place your original document or photo on the scanner glass (see page 9).

2. Do one of the following to start Epson Scan:
   - **Windows:**
     Double-click the **EPSON Scan** icon on your desktop.
   - **Mac OS X 10.4 and 10.5:**
     Open the **Applications** folder, open the **Epson Software** folder, and double-click the **EPSON Scan** icon
   - **To scan from an application,** start your application. Then open the **File** menu, choose **Import** or **Acquire**, and select your product.

3. Epson Scan opens in Full Auto Mode the first time you use it. (You can change the scan mode using the Mode selector in the upper right corner.)

4. Click **Scan**.
The image is scanned and you see its icon in Windows Explorer or Macintosh Finder.

---

**Scanning With Mac OS X 10.6**

You can scan original documents and photos and save them as files on your computer.

1. Open an image editing application such as Preview and select **Import From Scanner** from the File menu, then select **Epson Stylus NX620** or **Epson Stylus NX625**.

2. If you would like to select scan settings, such as Color Restoration and File Save settings, click **Show Details**.

3. Click the **Scan** button to begin scanning. Your image is saved to the folder selected in the **Scan To** pop-up menu.
Maintaining Your Product

Follow the instructions in this chapter to check and clean the print head nozzles, check ink levels, and replace ink cartridges. If you need to align the print head, see the online User’s Guide.

Caution:
To keep your product looking like new, don’t place anything on top of the cover or use it as a writing surface. If you need to clean the cover, use only a soft, non-abrasive microfiber-type cloth.

Checking the Print Head Nozzles

If your printouts are faint or have gaps in them, some of the nozzles in the print head may be clogged or ink may be running low in one or more of the ink cartridges. Follow the steps below to check the print head nozzles.

1. Load a few sheets of plain paper in the paper cassette (see page 4).

2. Press Home, then press ▲, ▼, ◄, or ► to select Setup.

3. Press OK, press ▲ or ▼ to select Maintenance, then press OK again.

4. Press ▲ or ▼ to select Nozzle Check, press OK, then press the ◇ Start button.

5. Check the nozzle check pattern that prints to see if there are gaps in the lines.

6. If there are no gaps, the print head is clean. Press OK and then press Home to continue printing.

   If there are gaps or the pattern is faint, press ▲ or ▼ to select Head Cleaning, then press OK to clean the print head (see page 21).
Cleaning the Print Head

If print quality has declined and the nozzle check indicates clogged nozzles, you can clean the print head. Print head cleaning uses ink, so clean it only if necessary.

**Note:**
You cannot clean the print head if an ink cartridge is expended, and may not be able to clean it when a cartridge is low. You must replace the cartridge first (see page 24).

1. Load a few sheets of plain paper in the paper cassette (see page 4).
2. Press Home, then press ▲, ▼, ◀, or ▶ to select Setup.

3. Press OK, press ▲ or ▼ to select Maintenance, then press OK again.
4. Press ▲ or ▼ to select Head Cleaning, then press OK twice.
5. Select All Colors, All Except Black, or Black Only (depending on which nozzles are clogged), then press the ◇ Start button.

   **Caution:**
   Never turn off the product during head cleaning or you may damage it.

   Cleaning lasts up to 2 minutes. When it’s finished, you see a message on the LCD screen.

6. Press ▲ or ▼ to select Nozzle Check, press OK, and press ◇ Start to run a nozzle check and confirm that the print head is clean.

**Note:**
If you don’t see any improvement after cleaning the print head four times, turn off your product and wait at least six hours to let any dried ink soften. Then try cleaning the print head again. If quality does not improve, one of the ink cartridges may need to be replaced. If that doesn’t help, contact Epson as described on page 50.

If you do not use your product often, it is a good idea to print a few pages at least once a month to maintain good print quality.
Checking Ink Levels

You can check the ink levels anytime right on the LCD screen. To check the ink levels with your Windows or Macintosh software, see the instructions in your online User’s Guide.

**Note:**
Printing stops when an ink cartridge is expended. If a color cartridge is expended, you may be able to continue printing temporarily with black ink; see the online User’s Guide for more information. If the black cartridge is expended, you must replace it to continue printing.

1. Press ‼️ Home, then press ▲, ▼, ◄, or ► to select Setup.

2. Press OK, then press OK again to select Ink Levels.

3. The ink cartridge status is displayed. See page 24 to replace a cartridge, if necessary.

4. Press OK to exit.

In Windows, a window may appear on your computer screen if you try to print when ink is low. This window can optionally display ink offers and other updates from Epson.

**Note:**
To disable checking for ink offers or updates from Epson, see the instructions in your online User’s Guide.
Purchasing Epson Ink Cartridges

You can purchase genuine Epson ink and paper at Epson Supplies Central at www.epson.com/ink3 (U.S. sales) or www.epson.ca (Canadian sales). You can also purchase supplies from an Epson authorized reseller. To find the nearest one, call 800-GO-EPSON (800-463-7766).

Use the following list when you order or purchase new ink cartridges:

<table>
<thead>
<tr>
<th>Ink color</th>
<th>Standard-capacity</th>
<th>Extra High-capacity</th>
</tr>
</thead>
<tbody>
<tr>
<td>Black</td>
<td>125</td>

</tr>
<tr>
<td>Magenta</td>
<td>125</td>
<td>127</td>
</tr>
<tr>
<td>Yellow</td>
<td>125</td>
<td>127</td>
</tr>
</tbody>
</table>

**Note:**
We recommend that you use genuine Epson cartridges and do not refill them. The use of other products may affect your print quality and could result in product damage.

Yields vary considerably based on images printed, print settings, paper type, frequency of use, and temperature. For print quality, a small amount of ink remains in the cartridge after the “replace cartridge” indicator comes on. The product ships with full cartridges and part of the ink from the first cartridges is used for priming the product.

For best printing results, use up a cartridge within six months of opening the package and before the expiration date on the cartridge box.

Store ink cartridges in a cool, dark place. If cartridges have been exposed to cold temperatures, allow them to warm up to room temperature for at least 3 hours before using them.
Replacing Ink Cartridges

Make sure you have a new ink cartridge before you begin.

Caution:
Do not open ink cartridge packages until you are ready to install the ink. Cartridges are vacuum packed to maintain reliability.

Leave the expended cartridge installed until you have obtained a replacement, or the ink remaining in the print head nozzles may dry out.

1. Turn on the product.

2. If an ink cartridge is low or expended, you see a message on the LCD screen indicating which color to replace. Press OK.
   - If you're replacing a cartridge before you see a message on the LCD screen, press Home, press ▲, ◀,◄, or ► to select Setup, and press OK. Then press ▲ or ◀ to select Maintenance, press OK, press ▲ or ◀ to select Ink Cartridge Replacement, and press OK again.

3. Open the scanner, then open the cartridge cover.

4. Squeeze the tab on the cartridge and lift it up. Dispose of it carefully. Do not take the used cartridge apart or try to refill it.

   Warning:
   - If ink gets on your hands, wash them thoroughly with soap and water. If ink gets into your eyes, flush them immediately with water. Keep ink cartridges out of the reach of children and don’t drink the ink.
5. Before you open the new cartridge package, shake it gently four or five times. Then remove it from the package.

6. Remove the yellow tape from the bottom of the ink cartridge.

**Caution:**
Do not remove any other labels or seals, or ink will leak. Do not touch the green chip on the front of the cartridge. This can damage the ink cartridge.

7. Insert the new ink cartridge into the holder and push it down until it clicks into place.

8. Once you replace all the cartridges that need replacing, close the cartridge cover and push it down until it clicks into place.

9. Close the scanner to begin priming the ink delivery system.

This takes about 2 1/2 minutes. When you see a completion message on the LCD screen, ink priming is finished.

**Caution:**
Never turn off the product while ink is priming or you’ll waste ink. If you see an ink replacement message on the LCD screen, press OK and press down all the cartridges securely. Then press OK again. If you remove a low or expended ink cartridge, you cannot reinstall and use the cartridge.
Network Setup

This section provides detailed instructions for setting up your product on a wireless or wired network.

Make sure you follow the instructions on the Start Here sheet to set up your product, choose your connection, and install the software. The on-screen instructions during the installation process help you set up your network connection. Follow the instructions in this chapter only if you need additional help:

- For wireless network setup, see below.
- For wired network (Ethernet®) setup, see page 40.

Wireless Network Setup

The steps in this section provide detailed instructions for setting up your product on a wireless network.

You must install the software on every computer from which you want to print. For the first installation, we recommend using a USB cable (not included) to simplify wireless setup. After the printer is connected to the network, you will be prompted to remove the cable.

If you’re using Mac OS X 10.6 or don’t have a USB cable, you’ll need to use the buttons on the printer to select wireless settings instead.

Note:
If you have trouble setting up your product, see “Network Problems” on page 46.

- If this is the first time that you’re installing the product, see “Installing for the First Time” on page 27.
- If your product is already on your wireless network and you need to set up additional computers to print to the product, see “Setting Up Additional Computers” on page 37.
Installing for the First Time

Before you begin, make sure that you have the following information ready and write it in the space provided below:

- Network name (SSID): _________________________________________
- Network password: ____________________________________________

Note:
If your network password contains uppercase (ABC) or lowercase (abc) letters, be sure to note them correctly. If you don’t know your network name (SSID) or network password, contact the person who set up your wireless network.

1. Make sure your product is turned on.
2. Insert the product software CD.
3. **Windows 7 and Windows Vista®**: If you see the AutoPlay window, click Run Setup.exe. When you see the User Account Control screen, click Yes or Continue.
   - **Windows XP**: When you see the Software Installation screen, continue with step 4.
   - **Mac OS® X**: Double-click the Epson icon.
4. When you see this screen, click Install.
5. When you see this screen, select **Wireless connection** and click **Next**.

6. When you see this screen, select **Set up printer for the first time**, then click **Next**.

7. **Mac OS X 10.6**: At the next screen, click **Next**. Then skip to “Setting Up With the Product Buttons” on page 33 to set up the product without using a temporary USB connection.
8. When you see this screen, select a wireless network setup method, then click Next.

![Epson Stylus NX620/NX625 Series](Image)

**Tip:**
If you need help selecting a wireless network setup method, click *Which option should I choose?* for more information on setup methods.

9. At the next screen, click **Next**.

10. Do one of the following:
   - If you selected *Using temporary USB cable connection*, continue with “Setting Up With a Temporary USB Cable” on page 30.
   - If you selected *Using printer buttons*, continue with “Setting Up With the Product Buttons” on page 33.
**Setting Up With a Temporary USB Cable**

Do not connect the USB cable to your product until instructed to do so in the on-screen instructions.

1. Wait while the software is installed.
2. When you see this screen, connect the product to your computer with a USB cable.
3. Follow the on-screen instructions to continue installing the software.
4. When you see the Firewall Warning screen, click **Next**.

**Note:**
If you see a firewall alert message, click **Unblock** or **Allow** to let EpsonNet Setup continue. Do not select **Ask Me Later**, **Keep Blocking**, or **Block**.
5. When you see a screen like the following, select your network name (SSID) from the list, then click Next.

![Wireless Network Name (SSID) dialog]

**Note:**
If your network name isn’t in the list, select Enter Manually. If your network name contains uppercase (ABC) or lowercase (abc) letters, enter them correctly.

6. If you see a screen like the following, enter your security key or passphrase, then click Next.

Problems and Solutions

Check the solutions below if you’re having trouble using your Epson product.

**Network Problems**

If you have a poor wireless connection, try moving the product to a different location. Avoid placing it next to a microwave oven, 2.4 GHz cordless phone, or large metal object such as a filing cabinet.

**Caution:**
Breakdown or repair of this product may cause loss of network data and settings. Epson is not responsible for backing up or recovering data and settings during or after the warranty period. We recommend that you make your own backup or print out your network data and settings.

**Network setup failed**

- Try moving the product to a different location.
- If your wireless router doesn’t broadcast its network name (SSID), see page 36 for instructions on manually entering your wireless network name.
- Make sure there aren’t any access restrictions (such as MAC address filtering) set on the wireless router. If access restrictions are set, register the product’s MAC address on the router. Print a Network Status Sheet (see page 47) to obtain the MAC address. Then see your router’s manual for instructions.
- If your wireless router has security enabled, make sure you entered the WEP key or WPA passphrase correctly.
- Remove and reinsert the CD to reinstall your product software. (See page 26 if you need detailed instructions.)

**The product’s WiFi light is on but you cannot print**

- Your router might not be assigning IP addresses automatically using DHCP.
- If it isn’t, you will need to set the product’s IP address manually. Make sure it is set correctly for your network.
Cannot scan over the network

- Epson Scan is not available in Mac OS X 10.6; see page 19 for scanning instructions.

- If you cannot scan from the product’s control panel, make sure you restarted your computer after installing the product software. Make sure Epson Event Manager is not being blocked by your firewall or security software.

- If you are scanning a large document at high resolution, a communication error may occur. If the scan did not complete, lower the resolution.

- If network communication was interrupted while starting Epson Scan, exit Epson Scan, and restart it after a few seconds. If Epson Scan cannot restart, turn the product off and on, and then try again. Check the Timeout Setting in EPSON Scan Settings. For details, see the Epson Scan Help.

Print a Network Status Sheet

1. Press Home, then press ▲, ▼, ◀, or ▶ to select Setup.

2. Press OK, press ▲ or ▼ to select Network Settings, then press OK again.

3. Press ▲ or ▼ to select Confirm Network Settings, press OK, then press ◇ Start to print a network status sheet.

Printing and Copying Problems

- Make sure your paper is loaded printable side down (usually the whiter, brighter, or glossy side). Load it short edge first and don’t load it above the arrow marks on the edge guides.

- Make sure the paper you loaded matches the paper size and paper type settings on the control panel or in your printer software (see page 16).
■ Position your original against the back left corner of the scanner glass. If the edges are cropped, move your original away from the edges slightly. Place the document flat against the scanner glass.

■ Printing stops when an ink cartridge is expended. If a color cartridge is expended, you may be able to continue printing temporarily with black ink; see the online *User’s Guide* for more information. If the black cartridge is expended, you must replace it to continue printing.

**Paper Feeding Problems**

If paper doesn’t feed correctly, remove the paper and fan the sheets, then reload them as shown on page 4. Do not load too many sheets at once.

If paper has jammed, follow the steps on the LCD screen. If that doesn’t help, turn the printer off and check the following areas:

1. Remove the paper cassette and carefully remove any jammed paper.

2. Lift the scanner and carefully remove any paper trapped inside.
3. Remove the duplexer from the back of the printer and check for jammed paper. Open the cover on the duplexer to remove any paper, if necessary.

For more detailed information on removing jammed paper, see the online User’s Guide.

**Print Quality Problems**

- For the best print quality, use Epson papers (see page 7) and genuine Epson ink cartridges (see page 24).
- If you notice light or dark bands across your printouts or they are too faint, run a nozzle check (see page 20) to see if the print head needs cleaning.
- If you notice jagged vertical lines, you may need to align the print head. See the online User’s Guide for instructions.
- The ink cartridges may be low on ink. Check your cartridge levels (see page 22) and replace cartridges, if necessary (see page 24).
- Clean the scanner glass with a soft, dry, lint-free cloth (paper towels are not recommended), or use a small amount of glass cleaner on a soft cloth, if necessary. Do not spray glass cleaner directly on the glass.

Important Safety Instructions

Before using your Epson product, read and follow these safety instructions:

■ Be sure to follow all warnings and instructions marked on your Epson product.
■ Use only the type of power source indicated on the product label.
■ Use only the power cord that comes with the product. Use of another cord may cause fires or shock. Do not use the cord with any other equipment.
■ Place the product near a wall outlet where the plug can be easily unplugged.
■ If you won’t be using the product for a long period, unplug the power cord from the electrical outlet.
■ Always turn off the product using the \( \text{On} \) button, and wait until the LCD screen has turned off completely before unplugging the product or cutting off power to the electrical outlet.
■ Avoid plugging the product into an outlet on the same circuit as a photo copier or air control system that regularly switches on and off, or on an outlet controlled by a wall switch or timer.
■ Do not let the power cord become damaged or frayed.
■ If you use an extension cord with the product, make sure the total ampere rating of the devices plugged into the extension cord does not exceed the cord’s ampere rating. Also, make sure the total ampere rating of all devices plugged into the wall outlet does not exceed the wall outlet’s ampere rating.
■ Place the product on a flat, stable surface that extends beyond its base in all directions. It will not operate properly if it is tilted or at an angle.
■ Avoid placing the product in locations that are subject to rapid changes in heat or humidity, shocks or vibrations, or dust.
■ Do not place or store the product outdoors or in locations with excessive water, high temperature, or high humidity. Do not use with wet hands.
■ Leave enough room around the product for sufficient ventilation. Make sure the product is at least 4 inches (10 cm) away from the wall.
■ Do not block or cover openings in the case or insert objects through the slots.
■ Do not place the product near a heat source, strong light source, or in direct sunlight.
Do not use aerosol products that contain flammable gases inside or around the product. Doing so may cause fire.

Do not press too hard on the document table when placing the original.

Do not open the scanner section while the product is copying, printing, or scanning.

Do not touch the flat white cable inside the product.

Be careful not to trap your fingers when closing the document cover or scanner.

Do not spill liquid on the product.

Adjust only those controls that are covered by the operating instructions. Except as specifically explained in your documentation, do not disassemble, modify, or attempt to service the product or power cord yourself.

Unplug the product and refer servicing to qualified service personnel under the following conditions: if the power cord or plug is damaged; if liquid has entered the product; if the product has been dropped or the case damaged; if the product does not operate normally or exhibits a distinct change in performance.

When storing or transporting the product, do not tilt it, stand it on its side, or turn it upside down; otherwise ink may leak from the cartridges.

When connecting the printer to a computer or other device with a cable, ensure the correct orientation of the connectors. Each connector has only one correct orientation. Inserting a connector in the wrong orientation may damage both devices connected by the cable.

Allow spaces behind the printer for the cables, and space above the printer so that you can fully raise the document cover.

Do not move the print head by hand; otherwise, you may damage the printer.

Before transporting the printer, make sure that the print head is in the home (far right) position and the ink cartridges are in place.

**LCD Screen Safety**

Use only a dry, soft cloth to clean the LCD screen. Do not use liquid or chemical cleansers.

If the LCD screen is damaged, contact Epson. If the liquid crystal solution gets on your hands, wash them thoroughly with soap and water. If the liquid crystal solution gets into your eyes, flush them immediately with water. If discomfort or vision problems remain after a thorough flushing, see a doctor immediately.
Ink Cartridge Safety

- Keep ink cartridges out of the reach of children and do not drink the ink.
- Be careful when you handle used ink cartridges; there may be ink remaining around the ink supply port. If ink gets on your skin, wash it off with soap and water. If it gets in your eyes, flush them immediately with water. If discomfort or vision problems remain after a thorough flushing, see a doctor immediately.
- Do not shake ink cartridges after opening their packages; this can cause leakage.
- Do not put your hand inside the product or touch any cartridges during printing.
- Install a new ink cartridge immediately after removing an expended one. Leaving cartridges uninstalled can dry out the print head and may prevent the product from printing.
- If you remove an ink cartridge for later use, protect the ink supply area from dirt and dust and store it in the same environment as the product. Note that there is a valve in the ink supply port, making covers or plugs unnecessary, but care is needed to prevent the ink from staining items that the cartridge touches. Do not touch the ink cartridge ink supply port or surrounding area. Do not store cartridges upside down.
- Shake new ink cartridges four or five times before opening their packages.
- Do not remove or tear the label on the cartridge; this can cause leakage.
- Install the ink cartridge immediately after you remove it from its package. If you leave a cartridge unpacked for a long time before using it, normal printing may not be possible.
- Do not disassemble or remodel the ink cartridge, otherwise you may not be able to print normally.
- After bringing an ink cartridge inside from a cold storage site, allow it to warm up at room temperature for at least three hours before using it.
- Store ink cartridges in a cool, dark place.
- Do not touch the green IC chip on the side of the cartridge. Doing so may prevent normal operation and printing.
Wireless Network Safety

- Do not use this product inside medical facilities or near medical equipment. Radio waves from this product may adversely affect the operation of electrical medical equipment.
- Keep this product at least 8.7 inches (22 cm) away from cardiac pacemakers. Radio waves from this product may adversely affect the operation of cardiac pacemakers.
- Do not use this product near automatically controlled devices such as automatic doors or fire alarms. Radio waves from this product may adversely affect these devices, and could lead to accidents due to malfunction.
