

Attention: Macintosh® OS X Users

Although all of your printer's functions are available in the Classic Environment, some limitations remain in the OS X environment. Your OS X printer software currently does not support:

- Borderless or roll paper printing, or the maximum printable area feature
- The printer's built-in PC card slot in OS X 10.2 only. If you have OS X 10.2, make sure you install the OS 8.6 to 9.x printer software, as described on your *Start Here* sheet, to support this feature.

Because EPSON® is constantly updating your printer software, it's a good idea to visit the EPSON support web site at <http://support.epson.com> for free updates to your printer driver. At the site, select the **Drivers & Downloads** option, then choose **Ink Jet Printers** and select your product name. Follow the on-screen instructions to download and install the new software.
