Quick Setup

Before using the projector, make sure you read the safety instructions in the online User's Guide.

Connect the projector

Choose from the following connections. See the sections below or the online User's Guide for details.

**Computer**

- **USB port**
  - Connect the square end of a USB cable to the projector's USB-A (flat) port.
  - Connect the flat end of the cable to any USB port on your computer.

  - Windows® 2000 SP4 or later: After turning on the projector, follow the on-screen instructions to install the EPSON USB Display software (EMP_UDSE.EXE; only on first connection).
  - Note: If the software screen does not display automatically, open My Computer or Computer, then double-click EPSON PJ_UD.

- **VGA port**
  - Connect one end of a VGA cable to the projector's Monitor port (only on first connection).
  - Connect the other end to your computer's VGA port.

- **DisplayPort**
  - Connect one end of a DisplayPort cable to the projector's DisplayPort port and the other end to an HDMI port on your computer.

  **Camera or USB device**

  - Connect a digital camera, USB flash drive, or USB storage device to the projector's USB-A (flat) port.
  - If you connect a digital camera, USB flash drive, or USB storage device, you can use the projector's PC Free feature to project images. See the online User's Guide for details.

**Wired network**

- **10BASE-T**
  - Connect the flat end of an Ethernet cable to the projector's Ethernet port and the other end to an Ethernet port on your computer.

- **RJ-45**
  - Connect the flat end of an Ethernet cable to the projector's RJ-45 port and the other end to an Ethernet port on your computer.

- **Wired network**
  - Connect one end of a DisplayPort cable to the projector's DisplayPort and the other end to a DisplayPort on your computer.

  **External monitor and external speakers**

  - You can also connect an external monitor and external speakers to your projector to enhance your presentations. See the online User's Guide for details.

**Turn on your equipment**

1. Turn on your computer or video source.
2. Plug in the projector. The power light on the projector turns orange.
3. Open the A/V Mute slide all the way.
4. Press the power button on the projector or remote control. The projector beeps, the power light flashes green, and then stays on.
5. The default language of the menu system is English. To select another language, press the Menu button on the remote control. Select Extended and press . Select Language and press . Select your language and press . Press the Menu button to exit the menu system.

Adjust the image

1. If you don't see an image, press the Source Search button on the projector or remote control to select the image source.

   **Note:** If you still see a blank screen or have other display problems, see the troubleshooting tips on the back of this sheet.

2. To raise the image, press the foot release button and lift the front of the projector. Release the button to lock the foot in position.
3. Turn the zoom ring to reduce or enlarge the image.
4. Turn the focus ring to sharpen the image.
5. Your projector automatically adjusts images that look like but if necessary you can press the or buttons on the projector to correct it.

Project wireless

Follow the steps here to connect the projector wirelessly over an 802.11n, 802.11g, or 802.11b wireless network. Your computer must have a wireless card or built-in wireless interface, and be running Windows 7, Windows Vista®, Windows XP Professional x64, Windows XP, or Windows 2000, or Mac OS X 10.4 to 10.7.

1. To install the wireless LAN module, open the air filter cover.
2. Remove the screws securing the wireless LAN module stopper, then remove the stopper.
3. Install the wireless LAN module.
**Quick Setup**

Before using the projector, make sure you read the safety instructions in the online User’s Guide.

## Connect the projector

Choose from the following connections. See the sections below or the online User’s Guide for details.

### Computer

- **USB port**
  - Connect the square end of a USB cable to the projector’s USB-B (square) port. Connect the flat end of the cable to any USB port on your computer.
  - **Windows® 2000 SP 4 or later:** After turning on the projector, follow the on-screen instructions to install the EPSON USB Display software (EMP_UDSE.EXE; only on first connection).
  - **Note:** If the software screen does not display automatically, open My Computer or Computer, then double-click EPSON_PJ_UD.
  - **Mac OS X 10.5.1 or higher:** Connect the flat end of the cable to any USB port on your computer.

- **HDMI port**
  - Connect one end of a HDMI cable to the projector’s HDMI port and the other end to your computer’s HDMI port.
  - If you are using a laptop, switch it to external display (see “Troubleshooting”).

- **DisplayPort**
  - Connect one end of a DisplayPort cable to the projector’s DisplayPort (flat) port.
  - If you connect a digital camera, USB flash drive, or USB storage device, you can use the projector’s PC Free feature to project images. See the online User’s Guide for details.

### Camera or USB device

Connect a digital camera, USB flash drive, or USB storage device to the projector’s USB-A (flat) port.

**Note:** If you still see a blank screen or have other display problems, see the troubleshooting tips on the back of this sheet.

### External monitor and external speakers

You can also connect an external monitor and external speakers to your projector to enhance your presentations. See the online User’s Guide for details.

### Turn on your equipment

1. **Turn on your computer or video source.**
2. **Plug in the projector.** The power light on the projector turns orange.
3. **Open the A/V Mute slide all the way.**
4. **Press the power button on the projector or remote control.** The projector beeps, the power light flashes green, and then stays on.
5. **The default language of the menu system is English.** To select another language, press the Menu button on the remote control. Select **Extended** and press "." Select Language and press "." Select your language and press "." Press the Menu button to exit the menu system.

### Adjust the image

1. **If you don’t see an image, press the Source Search button on the projector or remote control to select the image source.**
2. **To raise the image, press the foot release button and lift the front of the projector. Release the button to lock the foot in position.**
3. **Turn the zoom ring to reduce or enlarge the image.**
4. **Turn the focus ring to sharpen the image.**
5. **Your projector automatically adjusts images that look like this.**

### Using the remote control

- **Choose which source to display.**
- **Navigate projector menus.**
- **Turn off projector display.**
- **Access projector menus.**

**For more information on using the remote control, see the online User’s Guide.**

### Project wirelessly

Follow the steps here to connect the projector wirelessly over an 802.11n, 802.11g, or 802.11b wireless network. Your computer must have a wireless card or built-in wireless interface, and be running Windows 7, Windows Vista®, Windows XP Professional x64, Windows XP, or Windows 2000, or Mac OS X 10.4 to 10.7.

1. **To install the wireless LAN module, open the air filter cover.**
2. **Remove the screws securing the wireless LAN module stopper; then remove the stopper.**
3. **Install the wireless LAN module.**

**Note:** If you connect a digital camera, USB flash drive, or USB storage device, you can use the projector’s PC Free feature to project images. See the online User’s Guide for details.

**Note:** If you still see a blank screen or have other display problems, see the troubleshooting tips on the back of this sheet.

**Note:** If you connect a digital camera, USB flash drive, or USB storage device, you can use the projector’s PC Free feature to project images. See the online User’s Guide for details.
Project over a wired network

Follow the steps here to configure your projector for your wired network using the projector’s menu system.

1. Plug in and turn on the projector.

2. Press the Menu button on the remote control, select the Network menu, and press OK.

3. Select Network Configuration and press OK.

4. Select the Basic menu and press OK.

5. Select the Projector Name setting and enter a name (up to 16 characters long) to identify your projector over the network. Use the displayed keyboard to enter characters. Press the arrow buttons on the remote control to highlight the characters and press OK to select them.

6. Select the Wired LAN menu and press OK.

7. Choose IP Settings and press OK.

8. If your network assigns addresses automatically, select IP Settings and turn on the DHCP setting. If not, turn off the DHCP setting and enter the projector’s IP Address, Subnet Mask, and Gateway Address, as needed.

9. To prevent the IP address from appearing on the network standby screen, set the IP Address Display setting to Off.

10. Click Quick or Advanced, and enter your network’s SSID.

11. If your network assigns addresses automatically turn on DHCP. If not, turn off DHCP and enter the projector’s IP Address, Subnet Mask, and Gateway Address, as needed.

12. To enter numbers, use the arrow buttons on the remote control to highlight a number, then press the OK button. When you’re finished entering an address, highlight Return, then press OK.

13. See “Install network software” for additional instructions.

Install network software

Install the EasyMP Network Projection software on each computer that will project over the network. Use the CD labeled Epson Projector Software to install the program.

For instructions on installing and using your network software, click the icon on your desktop to access the online EasyMP Network Projection Operation Guide (requires an Internet connection). If you don’t see the EasyMP Network Projection Guide icon, you can install it from the projector CD or go to the Epson website, as described on the right.

To monitor and control your projector over the network, download and install the EasyMP Monitor software and manual from the Epson support web site. You can install it to the downloads page from the projector CD or go to the Epson website, as described on the right.

Troubleshooting

If you see a blank screen or the No signal message after turning on your projector or projector image is too dark, check the following:

- Make sure the power light on the projector is green and not flashing, and the AV Mute slide is open.

- Press the Source Search button on the projector or the remote control to switch to the correct image source, if necessary.

- If you’re using a Windows laptop, press the function key on your keyboard that lets you display on an external monitor. It may be labeled CRT/LCD or have an icon such as । \।. You may have to hold down the Fn key while pressing it (such as Fn + F7). Wait a moment for the display to appear.

- If you’re using a Mac laptop, open System Preferences and select Displays. Select the VGA Display or Color LCD option if necessary, then click the Arrange or Arrange All tab, and select the Mirror Displays check box.

Where to get help

Manuals

For more information about using the projector, click the icons on your desktop to access the online manuals (requires an Internet connection). If you don’t see the EasyMP Network Projection Guide icon, you can install it from the projector CD or go to the Epson website, as described below.

Telephone support services

To use the EPSON PrivateLine Support service, call (800) 637-7661 and enter the PIN on the EPSON PrivateLine Support card included with your projector. This service is available 6 am to 8 pm, Pacific Time, Monday through Friday, for the duration of your warranty period. You may also speak with a projector support specialist by dialing:

US: (866) 257-3999, 6 am to 8 pm, Pacific Time, Monday through Friday, and 7 am to 4 pm, Pacific Time, Saturday

Canada: (905) 709-3839, 6 am to 8 pm, Pacific Time, Monday through Friday

Days and hours of support are subject to change without notice. Toll or long distance charges may apply.

Internet support

Visit www.epson.com/support (U.S.) or www.epson.ca/support (Canada) for solutions to common problems. You can download utilities and documentation, get FAQs and troubleshooting advice, or e-mail Epson.

Registration

Register today to get product updates, special promotions, and customer-only offers. You can use the CD included with your projector or register online at www.epson.com/webreg.

Optional accessories

For a list of optional accessories, see the online User’s Guide.

You can purchase screens or other accessories from an Epson authorized reseller. To find the nearest reseller, call 800-GO-EPSON (800-463-7766). Or you can purchase online at www.epsonstore.com (U.S. sales) or www.epson.ca (Canadian sales).
Project over a wired network

Follow the steps here to configure your projector for your wired network using the projector's menu system.

1. Plug in and turn on the projector.
2. Press the Menu button on the remote control, select the Network menu, and press "Ok".
3. Select Network Configuration and press "Ok".
4. Select the Basic menu and press "Ok".
5. Choose Network Configuration and press "Ok".
6. Select the Wireless LAN menu and press "Ok".
7. Press the Menu button on the remote control, select the Network menu, and press "Ok".
8. Choose Network Configuration and press "Ok".
9. Select the Wireless LAN menu and press "Ok".
10. Click Quick or Advanced, and enter your network's SSID.
11. If your network assigns addresses automatically turn on DHCP. If not, turn off DHCP and enter the projector's IP Address, Subnet Mask, and Gateway Address, as needed.
   - To enter numbers, use the arrow buttons on the remote control to highlight a number, then press the "Ok" button. When you're finished entering an address, highlight Return, then press "Ok".
12. To prevent the SSID and IP address from appearing on the network standby screen, set the SSID Display and/or IP Address Display settings to Off.
13. See "Install network software" for additional instructions.

Install network software

Install the EasyMP Network Projection software on each computer that will project over the network. Use the CD labeled Epson Projector Software to install the program.

For instructions on installing and using your network software, click the icon on your desktop to access the online EasyMP Network Projection Operation Guide (requires an Internet connection). If you don't see the EasyMP Network Projection Guide icon, you can install it from the projector CD or go to the Epson website, as described on the right.

To monitor and control your projector over the network, download and install the EasyMP Monitor software and manual from the Epson support web site. You can also install a link to the downloads page from the projector CD or go to the Epson website, as described on the right.

Troubleshooting

If you see a blank screen or the No signal message after turning on your computer or wireless device, check the following:
- Make sure the power light on the projector is green and not flashing, and the A/V Mute slide is open.
- Press the Source Search button on the projector or the remote control to switch to the correct image source, if necessary.
- If you're using a Windows laptop, press the function key on your keyboard that lets you display on an external monitor. It may be labeled CRT/LCD or have an icon such as . You may have to hold down the Fn key while pressing it (such as or ). Wait a moment for the display to appear.
- If you're using a Mac laptop, open System Preferences and select Displays. Select the VGA Display or Color LCD option if necessary, then click the Arrange or Arrangement tab, and select the Mirror Displays check box.
