Quick Setup

Connect the projector

Choose from the following connections:

Computer USB Port
Connect a computer using a USB cable.

Connect a computer using a Type B (square) port. Connect the flat end of the cable to any USB port on your computer.

Camera, USB Device, or Epson Document Camera DC-06
Connect a digital camera, USB flash drive, USB storage device, or Epson document camera DC-06 to the projector's Type B (square) port.

Connect the projector to your network using an Ethernet cable.

Connect one end of the cable to the projector's TypeA (square) port. Connect the flat end of the cable to any USB port on your computer.

Connect a computer using the VGA cable that came with the projector.

Connect a computer using a USB cable.

Connect the projector

Project wirelessly over an 802.11g, 802.11b, or 802.11n wireless network. You must install the optional Epson wireless LAN module (part number V261H111P). Your computer must have a wireless card or built-in wireless interface, and be running Windows Vista, Windows XP Professional x64, Windows XP, or Windows 2000, or Mac OS X 10.3 to 10.6.

Follow the steps here to connect the projector wirelessly over an 802.11g, 802.11b, or 802.11n wireless network. You must install the optional Epson wireless LAN module (part number V261H111P). Your computer must have a wireless card or built-in wireless interface, and be running Windows Vista, Windows XP Professional x64, Windows XP, or Windows 2000, or Mac OS X 10.3 to 10.6.

Connect a digital camera, USB flash drive, USB storage device, or Epson document camera DC-06 to the projector's Type B (square) port.

Quick Setup

Before using the projector, make sure you read the safety instructions in the User’s Guide on your projector CD.

Connect the projector

Choose from the following connections:

Computer USB Port
Connect a computer using a USB cable.

Connect the square end of the USB cable to the projector’s Type B (square) port. Connect the flat end of the cable to any USB port on your computer.

Windows® 2000 SP4 or later: After turning on the projector, follow the on-screen instructions to install the Epson USB Display software [EMP_UDSE.EXE; only on first connection].

Note: If the software screen does not display automatically, open My Computer or Computer, then double-click EPSON PJ USB. If it still does not display, access the projector’s Extended menu and select USB Display in the USB Type B setting. See the User’s Guide on your projector CD for instructions.

Mac OS® 10.5.1 or higher: After turning on the projector, the setup folder for USB Display appears in the Finder. Double-click USB Display Installer and follow the on-screen instructions to install the Epson USB Display software (only on first connection).

Computer Monitor Port
Connect a computer using the VGA cable that came with the projector.

Connect one end of the cable to the projector’s Computer 1 or Computer 2 port, and the other end to your computer’s monitor port. If you are using a notebook, switch it to external display (see “Troubleshooting”). You can also connect an audio cable.

External Monitor, External Speakers, and Microphone
You can also connect an external monitor, external speakers, and a microphone to your projector to enhance your presentations. See the User’s Guide on your projector CD for details.

Turn on your equipment

1. Turn on your computer or video source.
2. Plug in the projector.
   - Turn off your computer or video source.
3. Slide the air filter cover latch and open the air filter cover.
4. Press the power button on the projector or remote control.

The power light on the projector turns orange.

Note: To shut down the projector, press the power button twice, then unplug it. You don’t have to wait for the projector to cool down.

The power light flashes green, then stays on.

5. The default language of the menu system is English. To select another language, press the Menu button on the remote control. Select Extended and press Enter. Select Language and press Enter. Select your language and press Enter. Press the Menu to exit the menu system.

Adjust the image

1. If you don’t see an image, press the Source Search button on the projector or the remote control to select the image source.
   - Note: If you still see a blank screen or have other display problems, see the troubleshooting tips on the back of this sheet.
2. To raise the image, press the foot release button and lift the front of the projector. Release the button to lock the foot in position.
3. Rotate the focus ring to sharpen the image.
4. Turn the zoom ring to reduce or enlarge the image.
5. If your image looks like or , you’ve placed the projector off to one side of the screen at an angle. Place it directly in front of the center of the screen, facing the screen squarely. Or press the A/V Mute button on the projector to correct it.
6. If your image looks like or , press the or buttons on the projector to correct it.

Using the remote control

Make sure the batteries are installed as shown (two AA batteries).

For more information on using the remote control, see the User’s Guide on your projector CD.

Project wirelessly

Follow the steps here to connect the projector wirelessly over an 802.11g, 802.11b, or 802.11n wireless network. You must install the optional Epson wireless LAN module (part number V12H418P12). Your computer must have a wireless card or built-in wireless interface, and be running Windows Vista®, Windows XP Professional 64-bit, Windows XP, or Windows 2000, or Mac OS X 10.3 to 10.6.

1. Turn off the projector and unplug the power cord.
2. Slide the air filter cover latch and open the air filter cover.
3. Remove the screw securing the wireless LAN module stopper, then remove the stopper.
4. Insert the wireless LAN module into the port.

14. Select the Connection Mode setting and choose one of these options:
   - Quick connection to the projector to one computer on the network
   - Advanced connection to the projector to multiple computers on the network

15. If you selected Quick connection mode, select the Channel setting for your wireless network and then the SSID Auto Setting setting.

16. Select the type of wireless network you are using as the Wireless LAN Sys. setting.

17. If you selected Advanced connection mode, enter your network SSID (up to 32 characters) as the SSID setting.

18. If your network assigns addresses automatically, select IP Settings and turn on the DHCP setting. If not, turn off the DHCP setting and enter the projector’s IP Address, Subnet Mask, and Gateway Address, as needed.

19. To prevent the SSID and IP address from appearing on the network standby screen, set the SSD Display and or IP Address Display settings to Off.

20. When you are finished, select Complete and press Enter. Then press Enter again to save your settings.

21. Press the Menu button to edit the menu system.

22. See “Install network software” for additional instructions.

Project over a wired network

Follow the steps here to configure your projector for your wired network using the projector’s menu system.

1. Plug in and turn on the projector.

2. Press the Menu button on the remote control, select the Network menu, and press Enter.

4. Select the Basic menu and press Enter.

5. Select the Projector Name setting and enter a name (up to 16 characters long) to identify your projector over the network.

6. Use the displayed keyboard to enter characters. Press the arrow buttons on the remote control to highlight the characters and press Enter to select them.

Note: See the User’s Guide on the projector CD for information on adding passwords.

7. Choose IP Settings and press Enter.

8. If your network assigns addresses automatically, select IP Settings and turn on the DHCP setting. If not, turn off the DHCP setting and enter the projector’s IP Address, Subnet Mask, and Gateway Address, as needed.

9. To prevent the IP address from appearing on the network standby screen, set the SSD Display and or IP Address Display settings to Off.

10. When you are finished, select Complete and press Enter, then press Enter again to save your settings.

11. Press the Menu button to exit the menu system.

12. See “Install network software” for additional instructions.

Install network software

Install the EasyMP Network Projection software on each computer that will project over the network. Use the CD labeled EasyMP Projector Software for Meeting & Presentation to install the program.

For instructions on installing and using your network software, see the EasyMP Network Projection Operation Guide on your projector CD. This guide is installed along with your projector User’s Guide.

To monitor and control your projector over the network, download and install the EasyMP Monitor software and manual from the Epson support web site. You can also install links to the download pages from your projector CD, or go to www.epson.com/support (U.S.) or www.epson.ca/support (Canada) and select your projector.

Troubleshooting

If you see a blank screen or the No signal message after turning on your computer or video device, check the following:

- Make sure the power light on the projector is green and not flashing, and the AV Mute slide is open.
- Press the Source Search button on the projector or the remote control to select the computer as the image source.
- If you’re using a Windows notebook, press the function key on your keyboard that lets you display on an external monitor. It may be labeled CRT/LCD or have an icon such as . You may have to hold down the Fn key while pressing it (such as for F7).
- On a Macintosh®, select the Mirror Displays setting in the System Preferences Displays utility.

Where to get help

Manuals

For more information about using the projector, install the manuals from your projector CD. View the guides by clicking the icons for them on your computer desktop.

Telephone Support Services

To use the Epson PrivateLine® Support service, call 1-800-637-7661 and enter the PIN on the Epson PrivateLine Support card included with your projector. This service is available 6 a.m. to 6 p.m., Pacific Time, Monday through Friday, for the duration of your warranty period. You may also speak with a projector support specialist by dialing:

US: (562) 276-4394. 6 a.m. to 6 p.m., Pacific Time, Monday through Friday.
Canada: (905) 793-8888. 6 a.m. to 6 p.m., Pacific Time, Monday through Friday.

Days and hours of support are subject to change without notice. Toll or long distance charges may apply.

Internet Support

Visit www.epson.com/support (U.S.) or www.epson.ca/support (Canada) for solutions to common problems. You can download utilities and documentation, get FAQs and troubleshooting advice, or e-mail Epson.

Registrations

Register today to get product updates, special promotions, and customer-only offers. You can use the CD included with your projector or register online at www.epson.com/webreg.

Optional accessories

For a list of optional accessories, see the User’s Guide on your projector CD.

You can purchase screens, carrying cases, or other accessories from an Epson authorized reseller. To find the nearest reseller, call 800-GO-EPSON (800-463-7766). Or you can purchase online at www.epsonstore.com (U.S. sales) or www.epson.ca (Canadian sales).
Plug in and turn on the projector.

Close the air filter cover.

Select the Menu button on the remote control, select the Network menu, and press Enter.

Select the Connection Mode setting and choose one of these options:
- Quick to connect the projector to one computer on the network
- Advanced to connect the projector to multiple computers on the network

Select the Projector Name setting and enter a name (up to 16 characters) to identify your projector over the network.

Select the Wired LAN menu and press Enter.

Select the Wireless LAN menu and press Enter.

Press the Menu button on the remote control to highlight the characters and press Enter to select them.

Note: See the User's Guide on the projector CD for information on adding passwords.

Choose Network Configuration and press Enter.

Select the Basic menu and press Enter.

Select Network Configuration and press Enter.

Select the Wired LAN menu and press Enter.

Choose IP Settings and press Enter.

Press the Menu button to exit the menu system.

Get “Install network software” for additional instructions.

Project over a wired network

Follow the steps here to configure your projector for your wired network using the projector’s menu system.

Plug in and turn on the projector.

Press the Menu button on the remote control, select the Network menu, and press Enter.

Use the displayed keyboard to enter characters. Press the arrow buttons on the remote control to highlight the characters and press Enter to select them.

To configure your projector for your wireless network, do one of the following:
- If you’re using the optional Quick Wireless Connection USB key (Window only), insert it into the projector’s USB Type A port, wait for the displayed message, remove the key, and connect it to a USB port on your computer. Follow the on-screen instructions to install the driver, then run your presentation. For details, see the User’s Guide on your projector CD.
- If you’re not using the key, continue with these steps.

Press the Menu button on the remote control, select the Wireless LAN Sys. setting.

Press the Menu button again to save your settings.

Follow the steps here to configure your projector for your wired network:

1. Plug in and turn on the projector.
2. Press the Menu button on the remote control, select the Network menu, and press Enter.

Install network software

Install the EasyMP Network Projection software on each computer that will project over the network. Use the CD labeled EasyMP Projector Software for Meeting & Presentation to install the program.

For instructions on installing and using your network software, see the EasyMP Network Projection Software Guide on your projector CD. This guide is installed along with your projector’s User’s Guide.

To monitor and control your projector over the network, download and install the EasyMP Monitor software and manual from the Epson support website. You can also install the CD based on your projector CD, go to www.epson.com/support (U.S.) or www.epson.ca/support (Canada) and select your projector.

Troubleshooting

If you see a blank screen or the No signal message after turning on your computer or video device, check the following:

- Make sure the power light on the projector is green and not flashing, and the AV Mute slide is open.
- Press the Source Search button on the projector or the remote control to select the computer or the image source.
- If you’re using a Windows notebook, press the function key on your keyboard that lets you display an external monitor. It may be labeled CRT/LCD or have an icon such as . You may have to hold down the Fin key while pressing it such as (F1:7).
- On a Macintosh, select the Mirror Displays setting in the System Preferences Displays utility.

Replace the wireless LAN module stopper and secure it using the screw you removed.

Close the air filter cover.

Plug in and turn on the projector.

To configure your projector for your wireless network, do one of the following:
- If you’re using the optional Quick Wireless Connection USB key (Window only), insert it into the projector’s USB Type A port, wait for the displayed message, remove the key, and connect it to a USB port on your computer. Follow the on-screen instructions to install the driver, then run your presentation. For details, see the User’s Guide on your projector CD.
- If you’re not using the key, continue with these steps.

Press the Menu button on the remote control, select the Network menu, and press Enter.

Select the Wireless LAN menu and press Enter.

Select the Connection Mode setting and choose one of these options:
- Quick to connect the projector to one computer on the network
- Advanced to connect the projector to multiple computers on the network

Select the Projector Name setting and enter a name (up to 16 characters) to identify your projector over the network.

Use the displayed keyboard to enter characters. Press the arrow buttons on the remote control to highlight the characters and press Enter to select them.

To prevent the SSID and IP address from appearing on the network as needed.

If your network assigns addresses automatically, select IP Settings and turn on the DHCP setting. If not, turn off the DHCP setting and enter the projector’s IP Address, Subnet Mask, and Gateway Address, as needed.

Press the Menu button on the remote control, select the Wireless LAN Sys. setting.

Press the Menu button again to save your settings.

Get “Install network software” for additional instructions.

Complete network configuration.

Press the Menu button to exit the menu system.

Choose IP Settings and press Enter.

If your network assigns addresses automatically, select IP Settings and turn on the DHCP setting. If not, turn off the DHCP setting and enter the projector’s IP Address, Subnet Mask, and Gateway Address, as needed.

To prevent the IP address from appearing on the network standby screen, set the SSD Display and/or IP Address Display settings to Off.

When you are finished, select Complete and press Enter, then press Enter again to save your settings.

Press the Menu button to exit the menu system.

Get “Install network software” for additional instructions.

Install network software

Install the EasyMP Network Projection software on each computer that will project over the network. Use the CD labeled EasyMP Projector Software for Meeting & Presentation to install the program.
