- Coax video cable
- Component to VGA cable
Installing the Manuals
1. Insert the projector CD in your computer's CD or DVD drive. (Double-click the Epson installer icon, if necessary.)
2. Select your language, select your projector model, then click User's Guide, EasyMP Guide, EMP Monitor Guide to install the manuals. (If you are using Windows and you don't have Adobe® Reader®, click Adobe Reader to install it also.) Then click Exit.
3. To view the manuals, double-click the PL Pro G5000 Series User Guide, EasyMP Operation Guide (for G5150NL and G5350NL users only), or EMP Monitor Operation Guide (for Windows users only) on your computer's desktop.

Turning the Projector On
1. Turn on your computer or image source.
2. Remove the lens cover.
3. Press the Power button. After the power light stays green, the projector is ready.

Note: If the Direct Power On function is enabled, you can turn the projector on without pressing the Power button; just plug it in or flip the switch controlling the outlet to which the projector is connected. To turn on this feature, see the User's Guide.

4. If you don't see your image, see “Switching Between Image Sources” or “Troubleshooting.”

Switching Between Image Sources
1. If you don't see your image, see “Troubleshooting.”

2. Remove the lens cover.
3. Press the Power button. After the power light stays green, the projector is ready.

Changing the Aspect Ratio
If you see a blank screen or the message No signal
• Make sure the Power light on the projector is green and not flashing, and the lens cover is removed.
• Make sure the cables are connected correctly. (See the User's Guide.)
• You may need to change the image source. See “Switching Between Image Sources.” (Also make sure the device source is turned on.)

If the projector and the notebook don’t display the same image Windows®:
Hold down the Fn key and press the function key on your notebook (such as A°C or CRT/LCD) until you see the display on both monitors. If that does not work, open the Windows Control Panel, click Display, Settings, and Advanced. Make sure the external monitor port is set as your primary display. See your computer's documentation or online help for details.

Macintosh®:
From the Apple® menu, select System Preferences, Display or Displays, VGA Display or Color LCD, and Arrange or Arrangement. Then select Mirror Displays.

Troubleshooting
If you see a blank screen or the message No signal
• Make sure the Power light on the projector is green and not flashing, and the lens cover is removed.
• Make sure the cables are connected correctly. (See the User's Guide.)
• You may need to change the image source. See “Switching Between Image Sources.” (Also make sure the device source is turned on.)

If the projector and the notebook don’t display the same image Windows®:
Hold down the Fn key and press the function key on your notebook (such as A°C or CRT/LCD) until you see the display on both monitors. If that does not work, open the Windows Control Panel, click Display, Settings, and Advanced. Make sure the external monitor port is set as your primary display. See your computer's documentation or online help for details.

Macintosh®:
From the Apple® menu, select System Preferences, Display or Displays, VGA Display or Color LCD, and Arrange or Arrangement. Then select Mirror Displays.

Focusing and Zooming
Press the Source button on the remote control to turn the focus ring to sharpen the image.

Correcting Image Shape
• If your image looks like or , press or button on the projector to correct it. You can also use the remote control to correct the shape (see the User’s Guide).
• If your image looks like or , press or button on the projector to correct it. You can also use the remote control to correct the shape (see the User’s Guide).
• If your image is uneven on all sides, you can use Quick Corner® to adjust the shape. See the User’s Guide.

You can fine-tune the height or level of the image by turning any of the projector’s adjustable feet. Use the horizontal lens shift dial to move your image left or right, as shown above.

Vertical lens shift dial
Horizontal lens shift dial

Turning the Projector Off
1. First turn off your computer or image source.
2. Then press the Power button to turn it off. At the confirmation message, press the Power button again.

Note: If the Direct Power On function is enabled, you can unplug the projector by pressing the Power button or flip the switch controlling the outlet to which the projector is connected instead.

With Epson’s Instant Off® technology, you don’t have to wait for the projector to cool down; just turn it off or unplug it when you’re done.

Adjusting Image Position
If the projector is mounted to the ceiling, use the vertical lens shift dial to move your image up or down or use the horizontal lens shift dial to move your image left or right. You can also use the ceiling mount to adjust the position.

• If the projector is on a table, place it so it faces the screen as squarely as possible. To raise the image, use the vertical lens shift dial as shown above. To lower the image, press the blue foot release lever and lift the front of the projector to extend the front adjustable foot. Release the lever to lock the foot in position.

• If your image looks like or , press or button on the projector to correct it. You can also use the remote control to correct the image shape (see the User’s Guide).

• If your image looks like or , press or button on the projector to correct it. You can also use the remote control to correct the image shape (see the User’s Guide).

Press the Source button on the remote control to turn the zoom ring to reduce/enlarge the image.

For inputs image through the Computer1, Computer2, or BNC ports, select Normal to automatically resize the image. For images input through the HDMI port, select Auto to project the image in the best aspect ratio.

Turning the Projector Off
1. First turn off your computer or image source.
2. Then press the Power button to turn it off. At the confirmation message, press the Power button again.

Note: If the Direct Power On function is enabled, you can unplug the projector by pressing the Power button or flip the switch controlling the outlet to which the projector is connected instead.

With Epson’s Instant Off® technology, you don’t have to wait for the projector to cool down; just turn it off or unplug it when you’re done.

Troubleshooting
If you see a blank screen or the message No signal
• Make sure the power light on the projector is green and not flashing, and the lens cover is removed.
• Make sure the cables are connected correctly. (See the User’s Guide.)
• You may need to change the image source. See “Switching Between Image Sources.” (Also make sure the device source is turned on.)

If the projector and the notebook don’t display the same image
Windows®: Hold down the Fn key and press the function key on your notebook (such as Alt, CRTL, or CRT/LCD) until you see the display on both monitors. If that does not work, open the Windows Control Panel, click Display, Settings, and Advanced. Make sure the external monitor port is set as your primary display. See your computer’s documentation or online help for details.
Macintosh®: From the Apple® menu, select System Preferences, Display or Displays, VGA Display or Color LCD, and Arrange or Arrangement. Then select Mirror Displays.

If your image is uneven on all sides, you can use Quick Corner® to adjust the shape. See the User’s Guide.

Internet Support
Visit Epson’s support website at epson.com/support and select your product for solutions to common problems. You can download utilities and documentation, get FAQs and troubleshooting advice, or e-mail Epson with your questions.
Visit http://www.presentersonline.com to access tips, templates, and training for developing successful presentations.
Speak to a support representative
To use the Epson PrivateLine® Support service, call (800) 637-7661 and enter the PIN on the included Epson PrivateLine Support card. This service is available 6 AM to 6 PM, Pacific Time, Monday through Friday, for the duration of your warranty period. You may also speak with a projector support specialist by dialing one of the following numbers. (Toll or long distance charges may apply.)
U.S.: (562) 276-4394, 6 AM to 6 PM, Pacific Time, Monday-Friday
Canada: (905) 709-3839, 6 AM to 6 PM, Pacific Time, Monday-Friday
Days and hours of support are subject to change without notice.

Purchase supplies and accessories
You can purchase screens and other accessories from an Epson authorized reseller. To find the nearest reseller, call 800-GO-EPSON (800-463-7766). Or you can purchase online at www.epsonstore.com (U.S. sales) or www.epson.ca (Canadian sales).
Installing the Manuals
1. Insert the projector CD in your computer’s CD or DVD drive. (Double-click the Epson installer icon, if necessary.)
2. Select your language, select your projector model, then click User’s Guide, EasyMP Guide, EMP Monitor Guide to install the manuals. (If you are using Windows and you don’t have Adobe® Reader®, click Adobe Reader to install it also.) Then click Exit.
