© 2010 Epson America, Inc. 9/10
Turning the Projector On

1. Turn on your computer or image source.
2. Remove the lens cover.
3. Press the \( \) power button. After the power light stays green, the projector is ready.
   Note: If the Direct Power On function is enabled, you can turn on the projector without pressing the \( \) power button; just plug it in or flip the switch controlling the outlet to which the projector is connected. To turn on this feature, see the User’s Guide.
4. If your image does not appear, see “Switching Between Image Sources” or “Troubleshooting.”

Switching Between Image Sources

Press the Search button (remote control), one of the Source buttons (remote control), or the Source Search button (projector).

Adjusting Image Position

If the projector is mounted to the ceiling, use the vertical lens shift dial to move your image up or down use the horizontal lens shift dial to move your image left or right. You can also use the ceiling mount to adjust the position.

Correcting Image Shape

- If your image looks like \( \) or \( \), press the \( \) or \( \) button on the projector to correct it. You can also use the remote control to correct the image shape (see the User’s Guide).
- If your image looks like \( \) or \( \), press the \( \) or \( \) button to correct it. You can also use the remote control to correct the image shape (see the User’s Guide).
- If your image is uneven on all sides, you can use Quick Corner \( * \) to adjust the shape. See the User’s Guide.

Changing the Aspect Ratio

Press the Aspect button on the remote control to change the aspect ratio.

For images input through the Computer1 or Computer2 ports, select Normal, Mirror, or 4:3. To view the manuals, double-click the EasyMP Monitor software.

Installing the Manuals

1. Insert the projector CD in your computer’s CD or DVD drive. (Double-click the Epson installer icon, if necessary.)
2. Select your language, select your projector model, and follow the press the instructions on the screen to register.
3. Press the \( \) button on the or \( \) button to install the manuals. For Windows users, click Install Link to EasyMP Monitor Download Page to install an icon on your computer’s desktop that you can use to access the EasyMP Monitor software.

Turning the Projector Off

Press the \( \) power button to turn the projector off. At the confirmation message, press the \( \) power button again.

Note: If the Direct Power On function is enabled, you can unplug the projector or flip the switch controlling the outlet to which the projector is connected instead.

With Epson’s Instant Off \( \) technology, you don’t have to wait for the projector to cool down; just turn it off or unplug it when you’re done.

Troubleshooting

You see a blank screen or the message No signal.
- Make sure the \( \) power light on the projector is green and not flashing, and the lens cover is removed.
- Make sure the cables are connected correctly. See the User’s Guide.
- You may need to change the image source. See “Switching Between Image Sources.” (Also make sure the device is turned on.)
- If you need help positioning the projector for your desired screen size, you can use the online image size calculator. Visit epson.com/support (U.S.) or epson.ca/support (Canada) and select Throw Distance Calculation.

To use the Epson PrivateLine\textsuperscript{\textregistered} Support service, call (800) 637-7761 and enter the PIN on the included Epson PrivateLine Support card. This service is available 6 AM to 6 PM, Pacific Time, Monday through Friday, for the duration of your warranty period. You may also speak with a projector support specialist by dialing one of the following numbers.

U.S.: (562) 276-4394, 6 AM to 6 PM, Pacific Time, Monday-Friday
Canada: (905) 728-3839, 6 AM to 6 PM, Pacific Time, Monday-Friday

Days and hours of support are subject to change without notice. Toll or long distance charges may apply.

Purchase supplies and accessories
You can purchase screens, ceiling mounts, and other accessories from an Epson authorized reseller. To find the nearest reseller, call 800-GO-EPSON (800-463-7766). Or you can purchase online at www.epsonstore.com (U.S. sales) or www.epson.ca (Canadian sales).

Where to Get Help

Internet support
Visit epson.com/support (U.S.) or epson.ca/support (Canada) where you can download utilities and documentation, get FAQs and troubleshooting advice, or e-mail Epson.

If you need help positioning the projector for your desired screen size, you can use the online image size calculator. Visit epson.com/support (U.S.) or epson.ca/support (Canada) and select Throw Distance Calculation.

Speak to a support representative
To use the Epson PrivateLine\textsuperscript{\textregistered} Support service, call (800) 637-7761 and enter the PIN on the included Epson PrivateLine Support card. This service is available 6 AM to 6 PM, Pacific Time, Monday through Friday, for the duration of your warranty period. ### Turning the Projector On

1. Insert the projector CD in your computer’s CD or DVD drive. (Double-click the Epson installer icon, if necessary.)
2. Select your language, select your projector model, and follow the on-screen instructions on the screen to register.

### Adjusting Image Position

- **If the projector is mounted to the ceiling,** use the vertical lens shift dial to move your image up or down using the horizontal lens shift dial to move your image left or right. You can also use the ceiling mount to adjust the position.
- **If the projector is on a table,** place it so it faces the screen as squarely as possible. To raise the image, use the vertical lens shift dial as shown above, or press the blue foot release lever and lift the front of the projector to extend the front adjustable foot. Release the lever to lock the foot in position.

### Correcting Image Shape

- **If your image looks like □ or □,** press the □ or □ button on the projector to correct it. You can also use the remote control to correct the image shape (see the User’s Guide).
- **If your image looks like □ or □,** press the □ or □ button to correct it. You can also use the remote control to correct the image shape (see the User’s Guide).
- **If your image is uneven on all sides,** you can use Quick Corner to adjust the shape. See the User’s Guide.

### Changing the Aspect Ratio

Press the Aspect button on the remote control to change the aspect ratio.

For images input through the Computer 1 or Computer 2 ports, select Normal to automatically resize the image.

### Turning the Projector Off

Press the □ power button to turn the projector off. At the confirmation message, press the □ power button again.

Note: If the Direct Power Off function is enabled, you can unplug the projector or flip the switch controlling the outlet to which the projector is connected instead.

With Epson’s Instant Off technology, you don’t have to wait for the projector to cool down; just turn it off or unplug it when you’re done.

### Troubleshooting

**You see a blank screen or the message No signal.**

- Make sure the □ power light on the projector is green and not flashing, and the lens cover is removed.
- Make sure the cables are connected correctly. See the User’s Guide.
- You may need to change the image source. See “Switching Between Image Sources.” (Also make sure the source device is turned on.)

**The projector and the notebook do not display the same image.**

Windows®

Press the function key on your keyboard that sets you display on an external monitor (allow a few seconds for the projector to sync up after you press the key). It may be labeled CRT/LCD or have a Δ/□ icon, and you may have to hold down the Fn key while pressing it.

If that doesn’t work, open the Display utility in the Windows Control Panel (in Windows Vista®, right-click on the desktop and select Personalize). Next, click Change display settings. Display settings, or Settings, and Advanced or Advanced Settings. Make sure the external monitor port is set as your primary display and/or enabled. See your computer’s documentation or online help for details.

**Mac OS® X**

Select System Preferences, Display or Displays, and Display Displays. Then, if you’re using Mac OS X 10.6.x, click Show displays in menu bar. If you’re using a different version of Mac OS X, select VGA Display or Color LCD, Arrange or Arrange, and Mirror Displays.
