

Expanded Order View

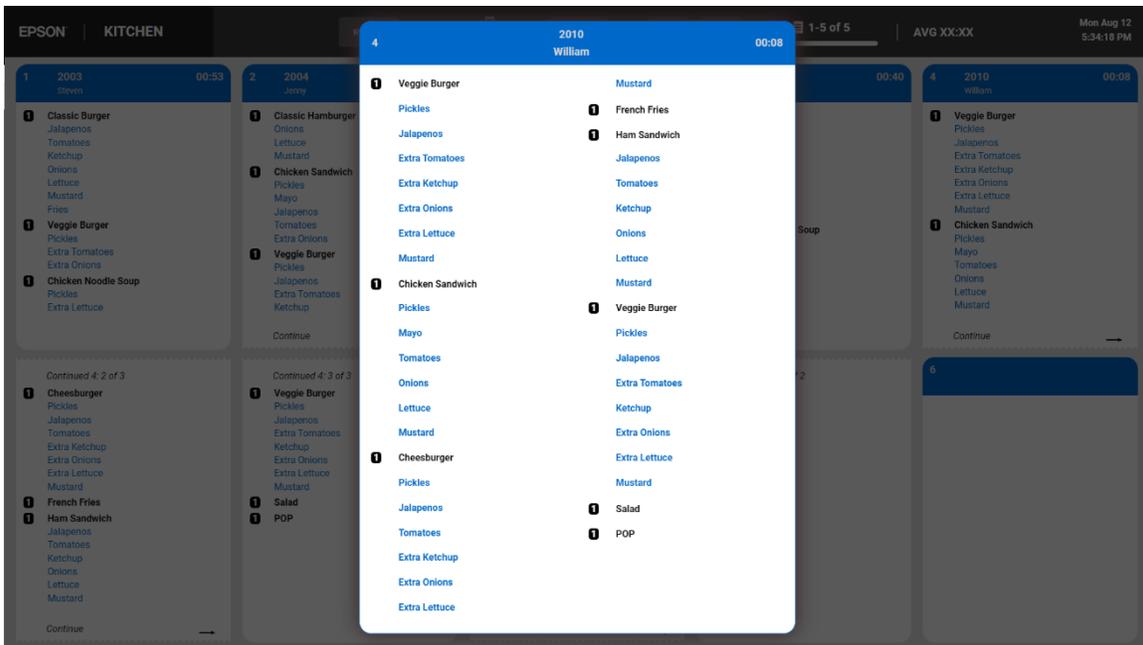

About this Guide

This guide consists of 3 sections:

- **Overview** – A detailed description of the Expanded Order View (Popup Window) in a TrueOrder™ Kitchen Display System.
- **How to with the KB1700** – KB1700 bump bar operation.
- **How to with the KB9000** – KB9000 bump bar operation.
- **How to with a touchscreen** – Touchscreen operation.

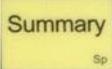

Overview

An order can be selected to be viewed in its own pop-up window. This is convenient if orders span multiple windows or if an order in the last tile extends off screen and you would like to see the entire order in its own window.

Using the KB1700 Bumpbar

Selecting an Order:

Press  followed by the tile number for the order:

Selecting Tiles 1-9:

Press the tile number  to  to select the tile associated with the desired order.

Selecting Tiles 10-99:

Press , followed by key  to  to indicate tens digit, followed by key  to  to indicate ones digit, where the  key means the units value is "0" (zero).

Exiting Expanded Order View:

Press any key to exit and return to the main display.

Using the KB9000 Bumpbar

Selecting an Order:

Press  followed by the tile number for the order:

Selecting Tiles 1-9:

Press the tile number  to  to select the tile associated with the desired order.

Selecting Tiles 10-99:

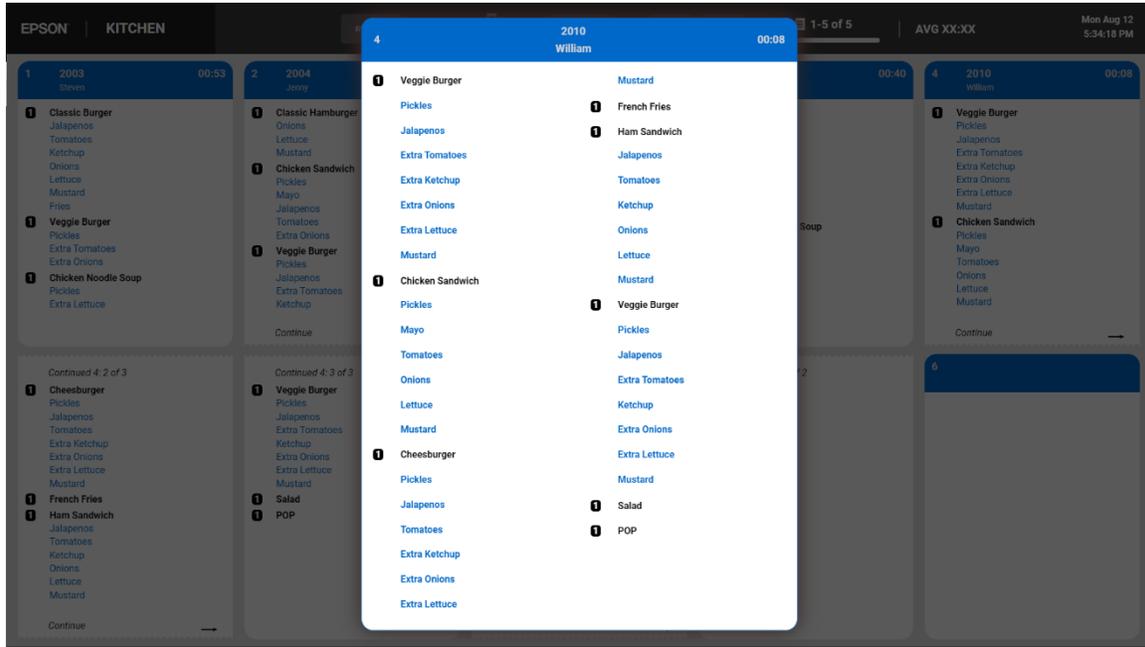

Press , followed by key  to  to indicate the tens digit, followed by key  to  to indicate the ones digit, where the  key means the units value is "0" (zero).

Exiting Expanded Order View:

Press any key to exit and return to the main display.

Using a Touchscreen

Press and hold the tile header for 1 second to bring up the expanded order view.

Exiting Expanded Order View:

Press the screen anywhere to exit and return to the main display.
